The future of Howard University as the great colored educational center for America is therefore now well assured, and its leadership of that race will have a far-reaching effect on our country in the years to come.

The Clerk completed the reading of the bill.

Mr. CRAMTON. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes, and had directed him to report the same back with sundry amendments, with the recommendation that the amendments be agreed to and the bill as amended do pass.

Mr. CRAMTON. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not the Chair will put them in gross.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. CRAMTON, a motion to reconsider the vote whereby the bill was passed was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate insists upon its amendments to the bill (H. R. 14801) entitled "An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes," disagreed to by the House of Representatives; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. WARREN, Mr. SMOOT, Mr. MOSES, Mr. OVERMAN, and Mr. HARRIS to be the conferees on the part of the Senate.

The message also announced that the Vice President had appointed Mr. MOSES, Mr. HALE, and Mr. OVERMAN members of the joint committee on the part of the Senate, as provided by Senate Concurrent Resolution 24, providing for the appointment of a joint committee to make the necessary arrangements for the inauguration of the President elect of the United States on the 4th of March next.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the following title was taken from the Speaker's table and under the rule referred as follows:

S. J. Res. 167. Joint resolution limiting the operation of sections 198 and 203 of title 18 of the Code of Laws of the United States; to the Committee on the Judiciary.

AGRICULTURAL APPROPRIATION BILL

Mr. DICKINSON of Iowa, from the Committee on Appropriations, by direction of that committee reported the bill (H. R. 15386) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes, which was referred to the Union Calendar and ordered printed.

Mr. BUCHANAN reserved all points of order.

ADJOURNMENT FOR THE HOLIDAYS

Mr. TILSON. Mr. Speaker, I send the following resolution to the Clerk's desk, and ask unanimous consent for its immediate consideration.

The Clerk read as follows:

House Concurrent Resolution 45

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Saturday, December 22, 1928, they stand adjourned until 12 o'clock meridian Thursday, January 3, 1929.

Mr. TILSON. Mr. Speaker, I wish to say that the minority leader, the gentleman from Tennessee [Mr. GARRETT], before he went away agreed to this resolution. The gentleman from Texas [Mr. GARNER], now substituting for him, also agrees to it; and both the majority and minority leaders of the Senate have agreed to recommend the same resolution to the Senate.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The resolution was agreed to.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. WOLFENDEN (at the request of Mr. DARROW), indefinitely, on account of illness.

ENROLLED JOINT RESOLUTION SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled a joint resolution of the House of the following title, when the Speaker signed the same:

H. J. Res. 346. An act authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month.

ADJOURNMENT

Mr. CRAMTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 27 minutes p. m.) the House adjourned until to-morrow, Saturday, December 15, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Saturday, December 15, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

War Department appropriation bill.

COMMITTEE ON AGRICULTURE

(10 a. m.)

To amend the packers and stockyards act, 1921 (H. R. 13596).

COMMITTEE ON INDIAN AFFAIRS

(10.30 a. m.)

A meeting of the subcommittee to consider a bill for the relief of J. F. McMurray (H. R. 10741).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

685. A communication from the President of the United States, transmitting supplemental estimate of appropriation for the Department of Agriculture, amounting to $500,000 for the fiscal year 1930, for an additional amount for the eradication of tuberculosis in animals (H. Doc. No. 476); to the Committee on Appropriations and ordered to be printed.

686. A letter from the Secretary of the Treasury, transmitting recommendation that the act of Congress approved June 25, 1910, which authorizes and directs the Secretary of the Treasury to acquire by purchase, condemnation, or otherwise a site and building for the accommodation of the United States Subtreasury and other governmental offices at New Orleans, La., be repealed; to the Committee on Public Buildings and Grounds.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. LEAVITT: Committee on Indian Affairs. H. R. 7031. A bill authorizing the Secretary of the Interior to arrange with States for the education, medical attention, and relief of distress of Indians, and for other purposes; with amendment (Rept. No. 1955). Referred to the Committee of the Whole House on the state of the Union.

Mr. DICKINSON of Iowa: Committee on Appropriations. H. R. 15386. A bill making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes; without amendment (Rept. No. 1956). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII the Committee on Military Affairs was discharged from the consideration of the joint resolution (H. J. Res. 284) to authorize an appropriation to pay claims of parents of deceased and injured children killed and injured by an Army airplane landing in Patterson Park, Baltimore, Md., on or about August 14, 1919, and for other purposes, and the same was referred to the Committee on Claims.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRITTEN: A bill (H. R. 15378) to authorize the transfer to the line of the Navy of certain officers of the Construction Corps who are employed on aeronautical duties; to the Committee on Naval Affairs.

By Mr. CRAIL: A bill (H. R. 15379) granting pensions and increase of pensions to widows of certain soldiers who served in the Indian wars from 1817 to 1898, and for other purposes; to the Committee on Pensions.

By Mr. EDWARDS: A bill (H. R. 15380) to establish, maintain, and operate a reforesting station in the first congressional district of Georgia; to the Committee on Agriculture.

By Mr. JOHNSON of Washington: A bill (H. R. 15381) to provide for the establishment of a light vessel at Grays Harbor, in the State of Washington; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 15382) to legalize a trestle, log dump, and booming ground in Henderson Inlet, near Chapman Bay, about 7 miles northeast of Olympia, Wash.; to the Committee on Interstate and Foreign Commerce.

By Mr. SABATH: A bill (H. R. 15383) to amend the first subdivision of section 4 of the naturalization act; to the Committee ou Immigration and Naturalization.

By Mr. BLACK of New York: A bill (H. R. 15384) making it a penal offense to refer to the religion of a candidate for public office; to the Committee on the Judiciary.

By Mr. ZIHLMAN: A bill (H. R. 15385) to regulate the use of spray-painting compressed-air machines, and for other purposes; to the Committee on Labor.

By Mr. DICKINSON of Iowa: A bill (H. R. 15386) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. FISH: A bill (H. R. 15387) to amend the act of February 9, 1907, entitled "An act to define the term 'registered nurse' and to provide for the registration of nurses in the District of Columbia"; to the Committee on the District of Columbia.

By Mr. HOUSTON of Delaware: A bill (H. R. 15388) to amend the act entitled "An act to provide revenue, to regulate commerce in foreign countries, and to encourage the industries in the United States, and for other purposes," approved September 21, 1922; to the Committee on Ways and Means.

By Mr. SIROVICH: A bill (H. R. 15389) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field service," and the Welch Act, approved May 28, 1928, in amendment thereof; to the Committee on the Civil Service.

By Mr. RAGON: A bill (H. R. 15390) granting authority to the Secretary of War to relocate levee of Conway District No. 1, Conway County, Ark.; to the Committee on Flood Control.

Also, a bill (H. R. 15391) making an appropriation for improving the Arkansas River from Little Rock, Ark., to the point where it flows into the Mississippi River, for the purposes of navigation; to the Committee on Appropriations.

By Mr. HOCH: Joint resolution (H. J. Res. 351) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. KIESS: Joint resolution (H. J. Res. 352) for the relief of Porto Rico; to the Committee on Insular Affairs.

By Mr. WHITE of Maine: Joint resolution (H. J. Res. 353) providing for a joint committee to investigate and report upon facts connected with the sinking of the S. S. *Vestris;* to the Committee on Rules.

By Mr. KIESS: Resolution (H. Res. 263) providing for the printing of the Journal of the Thirtieth National Encampment of the Veterans of Foreign Wars of the United States; to the Committee on Printing.

By Mr. FISH: Resolution (H. Res. 264) favoring the ratification by the United States Senate of the Kellogg peace pact; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDREW: A bill (H. R. 15392) granting a pension to Elfred P. Graves; to the Committee on Pensions.

Also, a bill (H. R. 15393) granting a pension to Bridget O'Brien; to the Committee on Invalid Pensions.

By Mr. CANFIELD: A bill (H. R. 15394) granting a pension to William Phillips; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15395) granting a pension to Grant E. Q. Leatherman; to the Committee on Invalid Pensions.

By Mr. CHASE: A bill (H. R. 15396) granting a pension to Mary Jane Eagan; to the Committee on Invalid Pensions.

By Mr. COLLIER: A bill (H. R. 15397) for the relief of Floyd Dillon, deceased; to the Committee on Military Affairs.

By Mr. CULKIN: A bill (H. R. 15398) granting a pension to Mary Jane Chetney; to the Committee on Invalid Pensions.

By Mr. CURRY: A bill (H. R. 15399) granting a pension to William Hecker; to the Committee on Pensions.

By Mr. DICKINSON of Missouri: A bill (H. R. 15400) granting a pension to Martha F. Stigall; to the Committee on Invalid Pensions.

By Mr. DRANE: A bill (H. R. 15401) granting an increase of pension to Abbie M. Stout; to the Committee on Invalid Pensions.

By Mr. EDWARDS: A bill (H. R. 15402) granting retirement annuity or pension to Hiram Elliott; to the Committee on the Civil Service.

Also, a bill (H. R. 15403) granting an increase of pension to Thomas A. Della; to the Committee on Pensions.

By Mr. HARE: A bill (H. R. 15404) to compensate Arthur Ashley Burn, sr., for the loss and death of his son, Arthur A. Burn, jr.; to the Committee on Claims.

By Mr. HASTINGS: A bill (H. R. 15405) to correct the military record of James Luther Hammon; to the Committee on Military Affairs.

By Mr. JOHNSON of Washington: A bill (H. R. 15406) granting a pension to Emma A. Safley; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 15407) granting an increase of pension to Catherine Armstrong; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15408) granting an increase of pension to Clara A. Young; to the Committee on Invalid Pensions.

By Mr. MACGREGOR: A bill (H. R. 15409) granting an increase of pension to Agnes B. Earl; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15410) granting a pension to Julia Fisher; to the Committee on Invalid Pensions.

By Mr. MAGRADY: A bill (H. R. 15411) granting a pension to Edward G. Murton; to the Committee on Pensions.

By Mr. MAJOR of Missouri: A bill (H. R. 15412) granting a pension to Ann C. Guthrie; to the Committee on Invalid Pensions.

By Mr. MOORMAN: A bill (H. R. 15413) granting a pension to Jesse Burnett; to the Committee on Pensions.

By Mr. REECE: A bill (H. R. 15414) granting a pension to Herman Lyons; to the Committee on Pensions.

By Mr. ROBSION of Kentucky: A bill (H. R. 15415) granting a pension to Robert C. Baker; to the Committee on Pensions.

Also, a bill (H. R. 15416) granting a pension to Jesse A. Sparks; to the Committee on Pensions.

Also, a bill (H. R. 15417) granting an increase of pension to Floyd Lapton; to the Committee on Pensions.

Also, a bill (H. R. 15418) granting an increase of pension to Jacob Anderson; to the Committee on Pensions.

By Mr. ROWBOTTOM: A bill (H. R. 15419) granting an increase of pension to Quessie Burns; to the Committee on Pensions.

By Mr. STALKER: A bill (H. R. 15420) granting an increase of pension to Louise L. Pettengill; to the Committee on Invalid Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 15421) for the relief of D. B. Heiner; to the Committee on Claims.

By Mr. THOMPSON: A bill (H. R. 15422) granting a pension to Rosetta B. Munsel; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 15423) granting an increase of pension to Orpha Young; to the Committee on Pensions.

By Mr. WHITE of Maine: A bill (H. R. 15424) for the relief of Dr. W. H. Parsons; to the Committee on War Claims.

By Mr. JOHNSON of Washington: Joint resolution (H. J. Res. 350) to provide for the reappointment of Frederic A. Delano and Irwin B. Laughlin as members of the Board of Regents of the Smithsonian Institution; to the Committee on the Library.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7975. By Mr. BEERS: Petition from citizens of Perry County, Pa., favoring the passage of House bill 11410; to the Committee on the Judiciary.

7976. By Mr. CULLEN: Resolution presented at annual meeting of the board of trustees of the American Printing House for the Blind, expressing the appreciation of the generous attitude of Congress toward the blind pupils in the schools in this country; to the Committee on Appropriations.

7977. By Mr. GARBER: Petition of the Dewey Congressional Medal Men's Association, urging support of House bill 12247 and Senate bill 1265, proposing a reward of $30 per month to the few surviving officers and enlisted men who served with Commodore George Dewey at his famous victory in Manila Bay; to the Committee on Pensions.

7978. Also, letter from F. D. Fant, chairman traffic department, United States Fisheries Association, Jacksonville, Fla., urging support of House Resolution 303; to the Committee on Interstate and Foreign Commerce.

7979. By Mr. MORROW: Petition of New Mexico Cattle and Horse Growers' Association, opposing further grants of public lands within State of New Mexico to Indians or Indian tribes, unless lands so granted to Indians or Indian tribes be put on the State tax rolls; to the Committee on Indian Affairs.

7980. Also, petition of New Mexico Cattle and Horse Growers' Association, indorsing and recommending the leasing of the public domain in New Mexico; to the Committee on the Public Lands.

7981. Also, petition of New Mexico Cattle and Horse Growers' Association, favoring the purchase of isolated tracts of Government lands for grazing purposes, minimum price at which such tracts of land, grazing in character, to be 50 cents per acre; to the Committee on the Public Lands.

7982. Also, petition of New Mexico Cattle and Horse Growers' Association, expressing appreciation for services rendered beef-cattle producers by Department of Agriculture, the National Live Stock and Meat Board, and the Better Beef Association, and favoring increase of 25 cents per car on all cattle sold, the funds to be used by the National Meat Board for increased advertising; to the Committee on Agriculture.

7983. Also, petition of New Mexico Cattle and Horse Growers' Association, urging increased appropriation for salary of Chief of Bureau of Animal Industry, and asking sufficient funds for the study and control of livestock diseases and pests; to the Committee on Agriculture.

7984. Also, petition of New Mexico Cattle and Horse Growers' Association, urging increased appropriation to the Forest Service for improvements upon the grazing lands in the national forests; to the Committee on Agriculture.

7985. Also, petition of New Mexico Cattle and Horse Growers' Association, urging increased appropriation for the Bureau of Biological Survey for control of predatory animals; to the Committee on Agriculture.

7986. Also, petition of New Mexico Cattle and Horse Growers' Association, indorsing House bill 10021, by Mr. Morrow, providing for the establishment of an experiment station in Lea County, N. Mex.; to the Committee on Agriculture.

7987. Also, petition of New Mexico Cattle and Horse Growers' Association, opposing the putting of Mexican labor on quota basis; to the Committee on Immigration.

7988. Also, petition of New Mexico Cattle and Horse Growers' Association, favoring duty on hides; to the Committee on Ways and Means.

7989. Also, petition of New Mexico Cattle and Horse Growers' Association, approving an advance in tariff on beef products; to the Committee on Ways and Means.

7990. Also, petition of New Mexico Cattle and Horse Growers' Association, opposing Senate bill 4264, restricting the sale of livestock to places designated by the Secretary of Agriculture; to the Committee on Agriculture.

7991. Also, petition of New Mexico Cattle and Horse Growers' Association, approving House bill 490, to amend the packers and stockyard act; to the Committee on Agriculture.

7992. By Mr. O'CONNELL: Petition of the Immigration Study Commission, Sacramento, Calif., opposing the repeal of the national-origins clause of the immigration quota act; to the Committee on Immigration and Naturalization.

7993. Also, petition of the Cigarmakers Local Union No. 87, Glendale, Brooklyn, N. Y., opposing the passage of the Cuban parcel post bill (H. R. 9195); to the Committee on Ways and Means.

7994. By Mr. ROBINSON of Iowa: Petition of R. V. McKeever, Otley, Iowa, and O. M. Wilson, Monroe, Iowa, druggists, in support of the Capper-Kelley resale price bill (H. R. 11); to the Committee on Interstate and Foreign Commerce.

7995. Also, petition of druggists and other business men of Bloomfield, Iowa, submitted by J. M. Bootsma, Bloomfield, Iowa, in support of the Capper-Kelley resale price bill (H. R. 11); to the Committee on Interstate and Foreign Commerce.

7996. Also, petition of H. T. Berry, Pulaski, Iowa, in support of the Capper-Kelley resale price bill (H. R. 11); to the Committee on Interstate and Foreign Commerce.

7997. Also, petition of druggists and other business men of Sigourney, Iowa, in support of the Capper-Kelley resale price bill (H. R. 11) submitted by Paul O. Weller, Sigourney, Iowa; to the Committee on Interstate and Foreign Commerce.

7998. Also, petition of druggists and other business men at Newton and Grinnell, Iowa, in support of the Capper-Kelley resale price bill (H. R. 11) submitted by P. J. Jepson, Newton, Iowa; to the Committee on Interstate and Foreign Commerce.

7999. Also, petition of druggists and other business men of Oskaloosa, Eddyville, and New Sharon, Iowa, in support of the Capper-Kelley resale price bill (H. R. 11), submitted by G. E. Stephenson, Eddyville, Iowa; to the Committee on Interstate and Foreign Commerce.

8000. Also, petition of druggists and other business men of Albia, Iowa, in support of the Capper-Kelley resale price bill (H. R. 11), submitted by E. C. Armstrong, Albia, Iowa; to the Committee on Interstate and Foreign Commerce.

8001. Also, petition of druggists and other business men of Newton, Iowa, in support of the Capper-Kelley resale price bill (H. R. 11), submitted by G. H. Nollen, Newton, Iowa; to the Committee on Interstate and Foreign Commerce.

8002. Also, petition of druggists and other business men of Iowa, in support of the Capper-Kelley resale price bill (H. R. 11), submitted by C. A. Burt, Delta, Iowa; to the Committee on Interstate and Foreign Commerce.

8003. Also, petition of druggists and other business men of Ottumwa, Iowa, submitted by C. A. Hill, Ottumwa, Iowa, in favor of the Capper-Kelley resale price bill (H. R. 11); to the Committee on Interstate and Foreign Commerce.

8004. By Mr. SWICK: Petition of Lawrence County Pomona Grange, No. 65, Patrons of Husbandry, New Castle, Pa., protesting the construction of more cruisers than actually needed for police protection, and urging the ratification of the Kellogg peace pact; to the Committee on Naval Affairs.

8005. Also, petition of congregation of the Union Reformed Presbyterian Church, of Mars, Pa., for a Christian amendment to the Constitution of the United States; to the Committee on Revision of Laws.

SENATE

SATURDAY, *December 15, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Almighty Lord, to whom all things in heaven and earth do bow, be now and evermore the strong tower and defense of this Nation, that Thy people may be sober-minded, truthful, reverent in spirit, and pure in heart. Let no unhallowed words pollute the tongues which Thou hast made to praise and bless Thee, no evil action defile the bodies which Thou hast taught us are the temples of Thy presence. Thou hast crowned our country with vast and marvelous achievements; make us, therefore, worthy of the past and true prophets of the future, that Thy kingdom may come and Thy will be done on earth as it is in heaven. Grant this for the sake of Jesus Christ, Thy Son our Lord. Amen.

The Chief Clerk proceeded to read the Journal of the proceedings of the legislative day of Thursday, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

PERSONAL EXPLANATION—BOULDER DAM

Mr. SMOOT. Mr. President, yesterday afternoon I was suffering from a severe headache. I went home early and was not present in the Chamber when the Boulder Dam bill was voted upon. I want to take this occasion, however, to state that if I had been here I would have voted against the bill. I had no idea that it would be finally voted upon at that time.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had adopted a concurrent resolution (H. Con. Res. 45) providing that when the two Houses adjourn on Saturday, December 22, 1928, they stand adjourned until 12 o'clock meridian, Thursday, January 3, 1929, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 14800. An act granting pensions and increase of pensions to certain soldiers, sailors, and marines of the Civil War and certain widows and dependent children of soldiers, sailors, and marines of said war; and

H. R. 15089. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes.

ENROLLED JOINT RESOLUTION SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled joint resolution (H. J. Res. 346) authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month, and it was signed by the Vice President.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	La Follette	Simmons
Barkley	Frazier	McKellar	Smith
Bayard	George	McMaster	Smoot
Bingham	Gerry	McNary	Steck
Black	Gillett	Moses	Steiwer
Blaine	Glass	Neely	Stephens
Blease	Glenn	Nye	Swanson
Borah	Goff	Oddie	Thomas, Idaho
Bratton	Gould	Overman	Thomas, Okla.
Brookhart	Greene	Phipps	Trammell
Broussard	Hale	Pine	Tydings
Bruce	Harris	Pittman	Tyson
Capper	Harrison	Ransdell	Vandenberg
Caraway	Hawes	Reed, Mo.	Walsh, Mass.
Couzens	Hayden	Reed, Pa.	Walsh, Mont.
Curtis	Heflin	Robinson, Ind.	Warren
Dale	Johnson	Sackett	Waterman
Deneen	Jones	Schall	Watson
Dill	Kendrick	Sheppard	Wheeler
Edwards	Keyes	Shipstead	
Fess	King	Shortridge	

Mr. JONES. I desire to announce that the junior Senator from Delaware [Mr. HASTINGS] is detained on official business.

I also wish to announce that the Senator from Nebraska [Mr. NORRIS] is necessarily absent at a meeting of the Committee on the Judiciary.

Mr. SHEPPARD. My colleague the junior Senator from Texas [Mr. MAYFIELD] is unavoidably detained on account of illness. I ask that this announcement may stand for the day.

Mr. GERRY. I desire to announce that the senior Senator from New York [Mr. COPELAND] is necessarily detained from the Senate by reason of illness in his family. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Eighty-two Senators having answered to their names, a quorum is present.

SENATOR FROM OHIO

Mr. FESS. Mr. President, on November 6 THEODORE E. BURTON, of Ohio, was elected a Member of this body to fill out the unexpired term of our late lamented colleague, Frank B. Willis. His certificate of election has already been received and accepted by the Senate. Mr. BURTON is now in the Chamber and ready to take the oath of office.

The VICE PRESIDENT. The Senator elect will present himself at the desk and take the oath of office.

Mr. BURTON, escorted by Mr. FESS, advanced to the Vice President's desk; and the oath prescribed by law having been administered to him by the Vice President, he took his seat in the Senate.

RECEPTION TO ORVILLE WRIGHT

Mr. BINGHAM. Mr. President, yesterday the Senate passed a joint resolution granting the distinguished flying cross to Orville Wright and making a posthumous award to his brother, Wilbur Wright. Next Monday is the twenty-fifth anniversary of the first flight ever made by man. To-day we are so fortunate as to have in the anteroom Mr. Orville Wright himself. I am sure that Members of the Senate will want to meet him and extend to him their congratulations. Therefore, I move that the Senate take a recess for five minutes in order that Mr. Wright may be presented to Senators by the Vice President.

The VICE PRESIDENT. The question is on the motion of the Senator from Connecticut.

The motion was unanimously agreed to, and the Senate took a recess for five minutes.

The Senate being in recess,

Mr. Orville Wright, escorted by Mr. BINGHAM, entered the Chamber, and, having been introduced to the Vice President, stood with him in the area in front of the Secretary's desk and greeted the Members of the Senate as they were introduced to him by the Vice President.

At the expiration of the recess the Senate reassembled.

REPORT OF NATIONAL ACADEMY OF SCIENCES

The VICE PRESIDENT laid before the Senate a communication from the President of the National Academy of Sciences, transmitting, pursuant to law, the report of the academy for the fiscal year ended June 30, 1928, which was referred to the Committee on the Library.

PETITIONS AND MEMORIALS

Mr. FLETCHER presented a petition numerously signed by sundry citizens of Pensacola, Fla., which was referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, without the signatures, as follows:

To Our Senators and Representatives in Congress:

GENTLEMEN: We, the undersigned friends and patrons of the St. Louis-San Francisco Railway Co., and its 30,000 employees, wish to bring to your attention a matter of the gravest importance to the people in general, to the various railroads of the country in particular, and also a matter of grave concern to numerous railroad employees who have spent a lifetime in their chosen profession.

The railroads of the country are the arteries of the lifeblood of the Nation. Upon their success, proper regulation, and efficient functioning depends our prosperity and economic welfare.

There has recently sprung up all over the country a competition on the part of unregulated companies, many of them irresponsible, undertaking to haul freight and passengers in interstate commerce for hire by means of busses, trucks, and publicly operated automobiles in direct competition with the railroad companies.

If this competition were for the public good and contributed to the economic welfare and development of the Nation, no fair-minded man could object. But such is not the case. This unregulated competition is not only seriously endangering the well-established, dependable, and permanent railroad service but endangers the lives and limbs of the public generally, and in case of serious accident, leaves the injured passengers or members of the public without financial protection.

It is not fair that the railroads should be destroyed or their service seriously impaired by such unregulated competition.

We, therefore, earnestly urge upon you the wisdom of Congress immediately taking charge of this situation under the commerce clause of the Constitution and passing an act strictly, justly, and fairly regulating the interstate transportation of freight and passengers by various companies using busses, trucks, automobiles, or similar vehicles for such service.

Such a bill should, among other things, require:

(a) Proper protection against financial irresponsibility.

(b) A fixed schedule upon which the public can depend to be furnished in season and out.

(c) A proper tariff of freight and passenger charges subject to the regulation of a proper commission.

(d) Careful inspection of all motor vehicles to make certain they are safe for the uses to which they are to be devoted.

(e) Proper investigation as to the mental and physical qualifications of the driver of such vehicle for such service.

(f) The provision for some regulatory body or bureau analogous in some respects to the Interstate Commerce Commission, which can see that such transportation companies are efficiently, fairly, conservatively, and dependably operated, and to the end that in serving the public no unnecessary damage or loss be inflicted upon other transportation companies.

(g) An adequate tax consistent with the value of the use of the public highways of the Nation by such transportation companies, such tax to be used first for the payment of the proper supervision; and, secondly, to assist in the maintenance of the highways.

(h) Proper regulations covering the weight, width, and size of such vehicles and prescribing safe speed regulations.

Other items may occur to you, but these are suggested with the idea that if railroad transportation is to be destroyed, that our legislative body make certain that there shall be substituted in lieu thereof, a system of transportation as reliable and efficient as the presently operated railroad systems of the country.

CITY OF PENSACOLA,
State of Florida.

(Signatures omitted.)

Mr. BLACK. Mr. President, I present a letter containing a resolution in reference to the so-called Kellogg peace treaty and ask that it may be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the letter was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

ALABAMA LEAGUE OF WOMEN VOTERS,
Birmingham, Ala., December 12, 1928.

Hon. HUGO BLACK,
United States Senate, Washington, D. C.

DEAR SENATOR BLACK: At a luncheon meeting held Tuesday, December 11, Southern Club, Birmingham, representatives of 15 women's organizations, who in turn represent about 25,000 women, passed a resolution indorsing the Kellogg peace pact.

In the resolution they urged that there be no reservations and that the treaty be ratified at the earliest possible date.

These women petition you as their elected representative in the Senate of the United States to vote for the ratification of the treaty.

Sincerely,

MARTHA DABNEY TOULMIN,
Chairman International Cooperation.
JEANNETTE M. ADAMS,
President Jefferson County League of Women Voters.

(Organizations represented: Federation of Women's Clubs, University Women, Council of Jewish Women, Missionary Societies, Woman's Christian Temperance Union, Young Women's Christian Association, Woman's Trade Union League, Business and Professional Women.)

Mr. HALE presented a petition of members of the Young Women's Christian Association, of Bangor, and sundry citizens of Portland, in the State of Maine, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. EDWARDS presented a letter in the nature of a petition from Miss Cora L. Hartshorn, of Short Hills, N. J., accompanied by a petition signed by 977 citizens of Trenton, Millburn, Short Hills, Wyoming, Orange, East Orange, South Orange, Newark, Succasunna, Maplewood, Jersey City, and Summit, all in the State of New Jersey, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. GILLETT presented petitions of the masters of Groton School, of Groton; members of the faculty and students of Smith College, of Northampton; women of the First Methodist Episcopal Church, of Westfield; members of the School of Religious Education of Boston University; Albert E. Pillsbury, of Boston; and sundry citizens of Bridgewater, Shrewsbury, and Cambridge, all in the State of Massachusetts, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. JONES presented petitions numerously signed by sundry citizens of Seattle, Ellisport, Everett, Auburn, Newcastle, Woodinville, Bryn Mawr, Pullman, Kettle Falls, Tumwater, Raymond, Spokane, Sumner, South Bend, Tacoma, Walla Walla, Yakima, Bellingham, Gig Harbor, LaConner, Tracytown, Bremerton, Annapolis, Silverdale, Manette, Parker, Sumas, Mount Vernon, Zillah, Parkland, Kennewick, Puyallup, Rosalia, Wauna, Burlington, and Kirkland, all in the State of Washington, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

REPORTS OF THE COMMITTEE ON MILITARY AFFAIRS

Mr. REED of Pennsylvania, from the Committee on Military Affairs, to which was referred the bill (H. R. 9961) to equalize the rank of officers in positions of great responsibility in the Army and Navy, reported it with an amendment and submitted a report (No. 1344) thereon.

He also, from the same committee, to which was referred the bill (H. R. 11469) to authorize appropriations for construction at the United States Military Academy, West Point, N. Y., reported it with amendments and submitted a report (No. 1345) thereon.

He also, from the same committee, to which was referred the bill (S. 4640) to provide for the retirement of enlisted men of the Philippine Scouts, and for other purposes, reported it without amendment and submitted a report (No. 1346) thereon.

Mr. BROOKHART, from the Committee on Military Affairs, to which was referred the bill (H. R. 7324) for the relief of Orla W. Robinson, reported it without amendment and submitted a report (No. 1347) thereon.

Mr. BLACK, from the Committee on Military Affairs, to which was referred the bill (H. R. 11071) providing for the purchase of 1,124 acres of land, more or less, in the vicinity of Camp Bullis, Tex., and authorizing an appropriation therefor, reported it without amendment and submitted a report (No. 1348) thereon.

Mr. ROBINSON of Indiana, from the Committee on Military Affairs, to which was referred the bill (H. R. 1320) for the relief of James W. Pringle, reported it with an amendment and submitted a report (No. 1349) thereon.

PRINTING OF ANNUAL REPORT OF NATIONAL SOCIETY OF DAUGHTERS OF THE AMERICAN REVOLUTION

Mr. SHIPSTEAD, from the Committee on Printing, reported the following resolution (S. Res. 280), which was considered by unanimous consent and agreed to:

Resolved, That the thirty-first annual report of the National Society of the Daughters of the American Revolution for the year ended March 1, 1928, be printed, with illustrations, as a Senate document.

PRINTING OF MANUSCRIPT "THE APPOINTING AND REMOVAL POWER OF THE PRESIDENT OF THE UNITED STATES"

Mr. SHIPSTEAD, from the Committee on Printing, to which was referred the resolution (S. Res. 204), submitted by Mr. MCLEAN on April 20, 1928, reported it with an amendment and asked unanimous consent for its immediate consideration.

There being no objection, the Senate proceeded to consider the resolution.

The amendment was, in line 3, after the word "printed," to insert a comma and "as may be directed by the Joint Committee on Printing," so as to make the resolution read:

Resolved, That the manuscript entitled "The appointing and removal power of the President of the United States" by Charles E. Morganston, be printed, as may be directed by the Joint Committee on Printing, as a Senate document.

The amendment was agreed to.

The resolution as amended was agreed to.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BAYARD:

A bill (S. 4936) granting an increase of pension to Ada Beecher (with accompanying papers); to the Committee on Pensions.

By Mr. WATSON:

A bill (S. 4937) continuing the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes; to the Committee on Interstate Commerce.

By Mr. DILL:

A bill (S. 4938) granting war-risk insurance to the estate of Herbert Toll; to the Committee on Finance.

By Mr. BROOKHART:

A bill (S. 4939) granting compensation to Gorfey Orland Laughlin (with accompanying papers); and

A bill (S. 4940) granting compensation to George W. Priegel (with accompanying papers); to the Committee on Finance.

By Mr. TRAMMELL:

A bill (S. 4941) granting an increase of pension to Martin Padgett; to the Committee on Pensions.

By Mr. BARKLEY:

A bill (S. 4942) to authorize a preliminary survey of Rough River in Kentucky, with a view to the control of its floods; to the Committee on Commerce.

By Mr. NEELY:

A bill (S. 4943) granting an increase of pension to Emma D. Walker; to the Committee on Pensions.

By Mr. BRATTON:

A bill (S. 4944) granting a pension to Charles Watlington; to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 4945) granting a pension to Mtee Johnson (with accompanying papers); and

A bill (S. 4946) granting an increase of pension to John Lonergan (with accompanying papers); to the Committee on Pensions.

By Mr. HARRIS:

A bill (S. 4947) for the relief of James D. Poteet; to the Committee on Military Affairs.

A bill (S. 4948) for the relief of A. J. Morgan; and

A bill (S. 4949) for the relief of trustees of Mizpah Methodist Church South, located near Kingston, Ga.; to the Committee on Claims.

A bill (S. 4950) granting a pension to Frank Patty;

A bill (S. 4951) granting an increase of pension to George W. Vineyard;

A bill (S. 4952) granting an increase of pension to Stephen H. Green; and

A bill (S. 4953) granting an increase of pension to Joseph Hixon; to the Committee on Pensions.

AMENDMENT TO RIVER AND HARBOR BILL

Mr. McNARY submitted an amendment intended to be proposed by him to the bill (H. R. 14066) authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, which was referred to the Committee on Commerce and ordered to be printed.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. WALSH of Montana submitted an amendment intended to be proposed by him to House bill 15089, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 91, line 3, after the word "mechanic," insert the following: "$6,000 for a residence for the United States Commissioner," and on page 91, line 8, strike out the amount "$214,400" and insert in lieu thereof "$220,400."

THE CUMBERLAND FALLS PROJECT

Mr. BORAH. Mr. President, I submit a resolution and ask that it may be read. Then I am going to ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. The clerk will read the resolution.

The Chief Clerk read the resolution (S. 279), as follows:

Resolved, That the Federal Power Commission be, and the same is hereby, directed to send to the Senate:

First. A copy of Executive Secretary Merrill's report upon what is known as the Cumberland Falls project.

Second. A copy of any report relative to other or allied projects in the vicinity of the Cumberland Falls project.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

HOUSE BILLS AND CONCURRENT RESOLUTION REFERRED

The following bills were each read twice by their titles and referred as indicated below:

H. R. 14800. An act granting pensions and increase of pensions to certain soldiers, sailors, and marines of the Civil War, and certain widows and dependent children of soldiers, sailors, and marines of said war; to the Committee on Pensions.

H. R. 15089. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes; to the Committee on Appropriations.

The following concurrent resolution (H. Con. Res. 45) was referred to the Committee on Appropriations:

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Saturday, December 22, 1928, they stand adjourned until 12 o'clock meridian, Thursday, January 3, 1929.

PRISON-MADE GOODS

The VICE PRESIDENT. Morning business is closed. The calendar under Rule VIII is in order.

Mr. CURTIS. Mr. President, the Senator from Missouri [Mr. HAWES] is in charge of the unfinished business. I understand that he desires to present some documents for printing in the RECORD, and then, perhaps, we would save time by adjourning until Monday. If the Senator from Missouri is ready to present the documents now, I ask unanimous consent that that may be done, and then we can take an adjournment, or, if it is preferred, we can take an adjournment now.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senator from Missouri is recognized.

Mr. HAWES. Mr. President——

Mr. SMOOT. Will the Senator from Missouri yield to me for a moment?

The PRESIDENT pro tempore. Does the Senator from Missouri yield to the Senator from Utah?

Mr. HAWES. I yield.

Mr. SMOOT. I merely wish to know whether there is going to be any action taken to-day upon the bill, and I ask the Senator that question. If not, I should like to go to the Appropriations Committee and work there, but I am interested in the bill itself, and, if there is going to be any action taken on it, I desire to be present.

Mr. CURTIS. As I understand, the Senator from Missouri desires to present some documents, and then there will be an adjournment without action on the bill. Is that correct?

Mr. HAWES. That is correct.

The PRESIDENT pro tempore. The Senator from Missouri will proceed.

Mr. HAWES. Mr. President, in connection with the unfinished business, I ask permission to have printed in the RECORD at this point three briefs regarding the constitutionality of the bill, a report just issued by the Department of Commerce, and other documents. I make this request in order to economize time, so that the documents referred to may appear in the RECORD and be available on Monday.

Mr. LA FOLLETTE. Mr. President, it is impossible to hear the Senator from Missouri.

The PRESIDENT pro tempore. The Senator from Missouri asks unanimous consent to insert in the RECORD certain briefs discussing the question of the constitutionality of the bill constituting the unfinished business of the Senate and also a report from the Department of Commerce and other papers. Is there objection?

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

STATEMENT OF PRISON LABOR PROBLEM AS SHOWN BY REPORT OF SENATE COMMITTEE, FIRST SESSION, SEVENTIETH CONGRESS

[S. Rept. No. 344, 70th Cong., 1st sess.]

DIVESTING PRISON-MADE PRODUCTS OF THEIR INTERSTATE CHARACTER IN CERTAIN CASES

Mr. HAWES, from the Committee on Interstate Commerce, submitted the following report, to accompany S. 1940:

The Committee on Interstate Commerce, to which was referred the bill (S. 1940) to divest prison-made products of their interstate character in certain cases, having had the same under consideration, report favorably thereon with an amendment, and as amended recommend that the bill do pass.

After 30 days' notice, extensive hearings were held on the subject matter of this bill, beginning on February 7. Additional hearings were held on February 17, and voluminous testimony was taken. Every phase of the problem presented was considered. As a result of such hearings the following facts may be enumerated:

THE RIGHTS OF STATES

The penitentiary problem is a problem for the State. The factors that enter into its adjustment are so many and so varied as to make it essentially a State problem, and no Federal impediment should stand in the way of any State which seeks to determine its own prison affairs and the regulation of the sale of prison products.

Such impediment now exists, and it is only for the removal of the impediment that this legislation is designed.

SUPPORTED BY THREE GREAT ELEMENTS OF SOCIETY

Three distinct and powerful elements in American life earnestly indorsed this measure, each from a separate motive and different viewpoint.

The American Federation of Labor urged the passage of this bill through its properly constituted leaders, and has without exception indorsed the measure through its State organizations.

The viewpoint of labor is that under existing conditions the products of convicts are permitted to flow through channels that bring about a ruinous competition with the labor of free American citizens, 5,000,000 of whom the labor organization represents.

From an entirely different viewpoint manufacturers, representing more than $2,500,000,000 in investments and employing both union and nonunion labor, were heard by the committee urging the passage of the measure for the reason, they stated, that under existing conditions the continuous production of prison-made products in certain centralized industries creates a condition by which the entire competitive market is demoralized and under which the products of free manufacturers are forced into ruinous competition with goods made by convicts.

Wholly aside from these divergent reasons, the General Federation of Women's Clubs, through their properly constituted representatives, and speaking for some 14,000 affiliated branches in the 48 States, urged before the committee the passage of this act on the broad humanitarian ground that under existing conditions all attempts to bring about a proper reform in the prisons of the Nation were being frustrated by the legal impediment under which State laws are made ineffective through interstate commerce.

The blind also appeared, through properly authorized representative of the national organization looking to the betterment of conditions for the blind, in support of this measure. It was brought out that convict labor is dominating the broom industry, which industry is the best suited for those so afflicted.

In addition to these were representatives of the prison reform organization with branches in the States.

It is significant that all five of these elements declared that their ultimate object was the same, to wit, the continuous employment of the convict for the benefit of the State, for his own welfare and rehabilitation, and for the care of his family, and the removal of his products from the field of ruinous competition with both free labor and invested capital.

CHARACTER OF THE BILL

The bill does not represent a new legislative proposal. The measure in similar form has been before previous Congresses, and in identical form was presented to the last Congress, but in each Congress was subjected to such a delay in its consideration that a vote by both branches

of Congress at any session has never been possible. This bill, or a similar one, has been reported favorably three times by a committee of the House and has passed the House on three occasions. A similar bill was reported favorably by the Committee on Interstate Commerce of the Senate as early as 1914.

Briefly, the bill divests convict-made products of their interstate character upon their arrival in the State of their destination and permits the laws of that State to become operative with respect to the sale and distribution of such products within that State. It is simply an enabling act.

The bill does not prohibit the transportation of convict-made goods. It does not force the enactment of any State legislation. It does not alter or in any way interfere with any existing law in any State, nor does it interfere with the management of any State penal institution.

That prisoners must be employed is one of the principles upon which this bill is founded. As a result of the passage of this measure the prisoner of the future may not only be employed but may be employed in such a way as to bring about, through scientific methods, his possible rehabilitation for reentrance into society.

"STATE USE" AND "STATES' USE" PLANS

Testimony was given to the committee concerning the State-use system now in existence in some of the larger States of the Union, and in each case conditions under such system were found satisfactory.

The State-use system is that under which the products of convict labor are diversified with the view to the needs of State institutions, the thought being that under proper surveys as to such needs and under proper diversification of industry in the prisons the output of the penitentiaries will meet the needs of the institutions of the State.

But in addition to the thought underlying the State-use system there was outlined to your committee the States' use plan under which products of a prison in one State may be sold to the institutions of another State, and under a systematic prison management the industries of certain States would be diversified to meet the requirements of certain other near-by States. Such diversification would be based not only upon the needs of adjoining States but upon the proximity of raw materials as well. Such a system also takes into consideration the employment of prisoners in a given State in such industries as will prove most beneficial to the prisoners when paroled or released in that State. But whatever the State or groups of States may do is not the province of this bill, which simply enables them to do as they please.

THE PRISON CONTRACTOR

Opposition to this measure before the committee was significantly confined to prison officials and the directors of some penal institutions, many of them capable and conscientious men. In all but one instance the institutions represented were those in which prison-made products are manufactured by prison contractors or, if manufactured under what is known as the public-account system, are sold through a contractor.

The prison contractor was not present either in person or through his representatives so far as the open hearings were concerned.

His work is the remnant of a system discarded by a majority of the States.

It is significant that with but one exception the prison contract and the prison contractor were not defended even by the opponents of this legislation.

The passage of the bill will benefit the State and the prisoner. It will injure the prison contractor. His opposition will therefore continue and pressure to defeat the bill will be largely inspired by him, although he covers his determined opposition by absence and failure openly to appear, as his occupation can not be defended as beneficial either to State or prisoner. He is the middleman profiting both from the State and the prisoner. He should be eliminated as a factor in the prison problem.

UNCONTROLLABLE ABUSES

The testimony before your committee brought to light certain evils of present conditions.

It was shown that in one State where the people of that State, through their legislature, enacted a law requiring the labeling of convict-made goods, the prisoners in the penitentiaries of that State were engaged in the manufacture of shirts and shoes which were sent out into other States to be dumped on the competitive market bearing labels of misrepresentation.

In the same State the shield of the United States and the lettering "U. S." were fraudulently placed upon the shoes for the purpose of misrepresentation and deceit. Such false labels were being placed upon products by the prisoners themselves, and in one instance they were admittedly placed on products "at the direction of the warden."

State laws against such deception and fraud are ineffective. State labeling laws and similar legislation are unenforceable, and the objectionable conditions which exist are permitted to continue only because States can not enforce their own statutes.

The State, representing the public opinion of that State by enacting laws through its legislature to prevent the sale of convict-made goods, is powerless to enforce its own bill, because other States use its market as a dumping ground for surplus convict-made goods.

With the result that New York (for illustration) regulates the sale of convict-made goods, and the products of its own convicts are eliminated from the State market, but at present the prison contractor may dump upon the New York market the products of convicts from other States.

The State is rendered helpless, its own laws are defeated, and the prison contractor, in defiance of the public opinion of that State, secures a personal profit, first, from the State of origin; second, from the prisoner; and, third, from the market of the State, which is unable to protect itself.

The result is apparent. The products of convicts are not sold upon the market where State use is in force, and yet every other State where the contract system is used may do the thing that the law of that State prohibits.

The bill therefore does not interfere with the rights of States, but it does assist in preserving the right of self-determination for each State.

In certain States where the contract system is in effect, and even in States where the products are distributed through a contract selling agency, the work of the prisoner is under the supervision of a representative of either the so-called manufacturer or the selling agency.

However respectable such supervision may be, the theory is offensive to the principle that the control and direction of prisoners should not be delegated to anyone except responsible officials of the State, and no contractor or selling agency should have anything to do, directly or indirectly, at any time with the prisoners' supervision.

However desirous any State in the Union may be of putting an end of the contract system its efforts are futile, for the reason that it can not rid itself of misbranded and falsely labeled products sent into its borders by prison manufacturers who hold themselves out as legitimate manufacturers.

As a result of present conditions it is only natural that those who are profiting from the prison-contract system will seek to interfere with any movement in any State looking to the adoption of a different system.

The disparity in wages paid prisoners and those paid free labor need not be discussed, as the facts borne out by testimony are matters of common knowledge.

TWO YEARS GIVEN FOR READJUSTMENT

The committee is not unmindful of the practical problem presented in certain States of the necessity of changing present systems. It is this practical problem to which the conscientious wardens and prison officials who appeared before the committee will have to give their attention. It is much the simpler program to go on as at present. To change means the employment of time and study in the reorganization of prison management.

Realizing this the committee amended the bill as introduced by providing that it shall not take effect until two years from date of passage.

This amendment meets the desires of those who favor the principle of the bill, but who are anxious for time necessary to meet the practical problem in their own State.

The 2-year clause in the bill will make it possible for the prison management of any State to make such surveys and such reorganization as may be necessary.

This bill is a necessary step in a national program of prison reorganization which began some years ago with the abolition in a majority of States of the obnoxious contract system, but which has been delayed and hampered by the existence of the legal impediment to which reference has been made.

In those States where the more modern system of prison employment has been adopted through legislative enactment, prison officials reported to the committee that representatives of the General Federation of Women's Clubs, the American Federation of Labor, and the manufacturers had been cooperating to make the new system effective.

The same zeal and activity on the part of these three elements of American life may be confidently relied upon in the future to assist the Government of any State in which the people are desirous of putting into effect a new system of penal conduct.

Such cooperation, however, will only be necessary in those States where it is desired to change the present situation, and such cooperation will only be required when the State itself desires such cooperation, for there is nothing in this bill providing for any change in any State from the present order of things.

Partaking as it does only of the character of a divesting statute, the committee is satisfied as to the constitutionality of this bill. A brief ably setting forth its constitutionality will be found in the record of the hearing.

For the reasons herein set forth your committee recommends that the bill do pass with the following amendment:

In line 6 of page 2, after the word "otherwise," add a new section: "This act shall take effect two years after the date of its approval."

HOOVER CONFERENCE REPORT ON PRISON INDUSTRIES, DECEMBER 12, 1928

NEW YORK, N. Y., *December 12, 1928.*

Hon. HARRY B. HAWES,

United States Senate, Washington, D. C.

MY DEAR SENATOR: On December 3, 1924, a conference was held in Washington with Hon. Herbert Hoover, then Secretary of Commerce, on the subject of ruinous and unfair competition between prison-made products and free industry and labor, in which the interstate shipment of prison-made goods plays an important part.

As the result of this conference, Mr. Hoover authorized the establishment of an advisory committee on prison industries composed of 19 members, all of whom excepting two have approved the report prepared by Mr. Gorton James, of the Department of Commerce.

Thinking that possibly the information contained in this report might be useful in the discussion of the pending Hawes-Cooper, or convict labor bill, I send you my copy for such use as you may desire to make of it.

The report and the appendix covers some 175 pages. I merely send you the summarized views and conclusions contained in the first part of the report, and based upon the statistical and exhaustive details found in the balance of the report which in its entirety will be ultimately published as a public document.

Very sincerely yours,

ARTHUR T. DAVENPORT,
Chairman of Advisory Committee on Prison Industries.

[Inclosure]

DEPARTMENT OF COMMERCE,
BUREAU OF FOREIGN AND DOMESTIC COMMERCE.

PRISON INDUSTRIES

The honorable the SECRETARY OF COMMERCE,
Washington, D. C.

MY DEAR MR. SECRETARY: We take pleasure in submitting herewith the report on the survey, "Marketing of Prison Products" of which you asked us to direct the preparation.

The report was written by Mr. Gorton James, Chief of the Domestic Commerce Division, based on data secured by the Domestic Commerce Division. The work was supervised by the committee through frequent consultations of its several members, and the manuscript has been approved by members of the committee, who have authorized and signed this letter.

May we take this occasion to call your attention to certain conclusions which have been drawn directly from the facts presented in the report.

(1) Certain of the major factors in the normal cost of production which must be met by all manufacturers are entirely absent in the case of prison industries. If anything approaching normal efficiencies of operation can be attained with the use of prison facilities and labor, the total costs of production are obviously below those of the manufacturer who must meet large overhead expenses as well as employ free labor.

(2) It is the universal belief that prisoners should be usefully occupied whether as a part of their punishment or as a means of rehabilitation by teaching them habits of industry. To this end nearly every State has projects either under way or in contemplation for increasing their facilities for providing productive work for their prisoners. As a result, although many idle prisoners are reported, the percentage of those not usefully employed is being constantly diminished.

(3) The volume of goods produced by prison labor is already very large in some lines, but as more prisoners are put to work, and the industries become more efficient, the output of our prisons will be greatly increased.

(4) The effect of placing on the open market a volume of goods which have been produced below normal costs, is to lower prices and disorganize the market. While this practice tends at any time to bring about unfair competitive price conditions, the effect is more keenly felt when there is overproduction. The increase in prison production which is predicted will exaggerate this evil and make it difficult if not impossible for manufacturers employing free labor to exist in trades where the prison output becomes heavy.

(5) The solution of this problem, if prison production is to continue, and all agree that it should, would seems to be the elimination, in one way or another, of the direct price competition of the prison products with so-called "free" products. Only two methods have been proposed for the elimination of such direct price competition:

First, by identifying the prison products so that prices quoted on them would not directly affect market prices generally on similar goods. Differentiation obvious to the buyer would make it possible to sell similar goods in the same retail store with different prices for the prison products and the "free" made products.

Second, by removing the prison products entirely from the open markets.

(6) Foreign countries as well as the State have experienced difficulties in enforcing the identification of prison products, if they pass into commerce through private hands.

Solutions must be found for these problems. Otherwise either prison industries must cease and prisoners kept in idleness or the manufacture of products competing with the prison output will become impossible. Either of these developments would be disastrous, and we urge that legislators, prison authorities, and others involved in the situation give careful consideration to finding a solution.

In view of the fact that the problem is essentially a State problem because most of the output comes from State prisons, there is little that the Federal Government can do beyond upholding the States in the efforts which they make toward solutions.

Respectfully,

Arthur T. Davenport, chairman; A. F. Allison, secretary; Mrs. John F. Sippel, president, General Federation of Women's Clubs; Mrs. John D. Sherman, former president, General Federation of Women's Clubs; Mrs. Saidie Orr Dunbar, chairman department of public welfare, General Federation of Women's Clubs; Miss Julia K. Jaffray, chairman division of correction, General Federation of Women's Clubs; Mr. William Green, president American Federation of Labor; Mr. John J. Manning, secretary-treasurer union label trades department, American Federation of Labor; Mr. William Butterworth, president United States Chamber of Commerce; Mr. E. W. McCullough, manager Department of Manufacture, United States Chamber of Commerce; Mr. William J. Ellis, commissioner department of institutions and agencies, State of New Jersey; Mr. S. F. Dribben, director Association of Cotton Textile Merchants in New York; Mr. M. R. Alden, Joseph M. Hermann Shoe Co.; Mr. J. S. McDaniel, the Cordage Institute; Mr. E. E. Little, director, Eastern Broom Manufacturers & Supply Dealers' Association; Mr. George L. Barnes, Heywood-Wakefield Co.; Mr. E. S. Simpson, International Harvester Co.

MINORITY REPORT

The honorable the SECRETARY OF COMMERCE,
Washington, D. C.

MY DEAR MR. SECRETARY: Mr. Henry Pope, representing on the advisory committee the prison contractors' viewpoint, dissents from the majority approval of the report and has written the attached letter expressing his views, all of which is attached hereto and made a part hereof.

Very sincerely yours,

ARTHUR T. DAVENPORT, *Chairman.*
A. F. ALLISON, *Secretary.*

CHICAGO, ILL., *November 21, 1928.*

The honorable the SECRETARY OF COMMERCE,
Washington, D. C.

MY DEAR MR. SECRETARY: I take pleasure in submitting my observations on the prison-labor problem, the result of 30 years' experience. It is agreed by all students on the subject that useful employment should be furnished prisoners, and my observation is that to furnish this useful employment the work must be of a productive nature, with working conditions as near the same as conditions found in industries outside the prison.

To do this a useful product must be made and sold. Naturally, the price this article will bring depends upon the quality of the workmanship entering into it, whether same is sold with a similar product manufactured outside of prisons, and by people skilled in the marketing of this class of merchandise. If this is done, the product will bring its proper value on the market. However, if restrictions are made as to where the product of this labor is sold, or if the goods are specially branded as a prison product, you will immediately destroy the possibilities of selling at its full commercial value and eventually destroy the industry, bringing idleness to the prisoner as a result.

The total volume of prison labor compared to all labor outside of prisons is so small that it is hardly worth considering, but, even so, it is eminently unfair to confine a prisoner without occupation.

If the sale of the product of prison labor is limited to the State or its political division, it becomes at once impossible, owing to the limited market, to produce a satisfactory product to meet the price of similar products on the market. This is the result after repeated experiments, as tried by many States.

Under the most favorable conditions the chances of finding suitable employment for prisoners is most difficult. In selecting work for prisoners climatic conditions, character and age of prisoners, location of the prison, are all important factors. Consequently the widest possible field should be open for the employment of prisoners, whether confined within the walls or employed otherwise, as on parole or probation, working on farms, as can be done on a large scale and profitably in the southern part of the United States, and on a similar scale in the colder climates and more thickly populated countries.

The products of the farm, such as cotton, dairy products, etc.—in fact, any product to be sold at a fair value—must have a chance to

enter into interstate commerce, and be sold with and assembled with similar products wherever produced. To especially identify this product as prison made would, in many cases, destroy its possibility of profitable sale.

I think we all agree that the solution of this problem does not lie with the Federal Government except in so far as it may affect the Federal prisons. If the Federal Government can work out in their Federal prisons a satisfactory labor problem whereby its prisoners can be profitably and steadily employed on products sold to governmental departments, I am sure, if successful, the States will be glad to follow its lead. Until this is accomplished, I do not see where the Federal Government should interfere, and that each State should be left entire freedom as far as Government interference is concerned to work out its own prison-labor problems.

Yours very truly,

HENRY POPE.

MEMBERS OF ADVISORY COMMITTEE ON PRISON INDUSTRIES

Arthur T. Davenport, chairman Sweet-Orr & Co. (Inc.), 15 Union Square, New York City.

A. F. Allison, secretary International Association of Garment Manufacturers, 395 Broadway, New York City.

Mrs. John F. Sippel, president General Federation of Women's Clubs, 1734 N Street NW., Washington, D. C.

Mrs. John D. Sherman, former president General Federation of Women's Clubs, Olin Hotel, Denver, Colo.

Mrs. Saidie Orr-Dunbar, chairman department of public welfare, General Federation of Women's Clubs, 310 Fitzpatrick Building, Portland, Oreg.

Miss Julia K. Jaffray, chairman division of correction, General Federation of Women's Clubs, 730 Fifth Avenue, New York City.

William Green, president American Federation of Labor, Washington, D. C.

John J. Manning, American Federation of Labor, Washington, D. C.

C. L. Baine, Boot and Shoe Workers' International Union, 246 Sumner Street, Boston, Mass.

William Butterworth, president Chamber of Commerce of the United States, Washington, D. C.

E. W. McCullough, United States Chamber of Commerce, Washington, D. C.

S. F. Dribben, Association of Cotton Textile Merchants, New York City, representing the textile trade.

M. R. Alden, Joseph M. Herman Shoe Co., Millis, Mass., representing the shoe trade.

E. S. Simpson, International Harvester Co., Chicago, Ill., representing the twine and cordage trade.

George L. Barnes, Haywood-Wakefield Co., Wakefield (Boston), Mass., representing the furniture trade.

E. E. Little, New York Broom Supply Co., Brooklyn, N. Y., representing the broom trade.

Henry Pope, Bear Brand Hosiery Co., 336 West Madison Street, Chicago, Ill., representing the hosiery trade.

Sanford Bates, commissioner Department of Correction, Boston, Mass.

William J. Ellis, commissioner of State institutions and agencies, Trenton, N. J.

SUMMARY

The crux of prison manufacturing and marketing problems lies in the fact that other industries can not compete successfully on price with prison-made goods. History gives us constant examples of the fact that the selling of goods below market prices is provocative of ill feeling. This is true between nations and has resulted in such national devices as protective tariffs and antidumping legislation. In our own country the Federal Trade Commission receives many complaints arising from the selling of commodities below normal market levels.

On the other hand progress under the competitive system is gained through the elimination of the inefficient and the obsolete by the process of underselling their products. The new efficiency makes possible the lowering of price, and the old method is driven from the field. Those in business must keep up to date or give way. That is fair competition.

But when some one sells below the market he not only loses part of his own profit but breaks the market for others. Modern market mechanisms are so sensitive that in the case of most commodities, only one or a few sales below the prevailing price will bring the market price down to the new level. This is fair enough when efficiencies have made possible the lowering of price with still a fair margin of profit. When the cut in price is made because of some unfair advantage, however, the producers of competing goods see themselves being forced out of business in spite of their own efficiencies. The struggle is no longer a fair one.

Here lies the crux of the opposition to the distribution in the open market of prison-made goods. Such goods do not need to be sold at full market price. When the State conducts the industry there is no impelling necessity to make a profit. Some even question the ethics of taking any profit on prison products.

Furthermore many of the usual elements of costs of manufacturing are not present where prison labor under prison conditions is used. Wages are seldom paid on the full labor scale, and even where there is an attempt to use such a scale it is not subject to the usual competitive pressure which nearly always forces some wages in an ordinary factory above the normal. Then there are items of overhead, some of which are actually missing, like taxes and others, interest on borrowed capital, and others that are seldom included because they are difficult to separate from regular prison expenses for allocation to the factory.

In short, nothing but the arbitrary adding of estimated figures would bring prison factory accounts to a basis comparable with normal manufacturing accounts, and even on such a basis there would be many elements tending to upset and distort the figures.

Behind such arbitrary cost accounting, moreover, lies the fact that State moneys are actually spent for only part of the usual elements of cost. Regardless of the addition of arbitrary cost accounting elements in arriving at prices, such items would not become cash entries in the accounts of the prison and the books will show an actual profit to the State on factory operations if there is any return over and above the actual cash disbursements.

The reason that market prices are disturbed by the sale of prison products seems to lie in the fact that in the nature of things the prison goods can be sold to meet the lowest prices quoted in the market, and when the market is saturated a profit can still be made on the original actual cost of the prison-made articles while selling the goods at prices below the costs of other manufacturers. In short, the products of private factories operating with free labor can not compete, on a price basis, with prison-made products.

Evidence of the fact that prison-made goods can step into any market at will against products of free industries has been amply provided by the report on Convict Labor in 1923 issued in January, 1925, by the Bureau of Labor Statistics, United States Department of Labor. (Convict Labor in 1923, Bureau of Labor Statistics, Bulletin No. 372, U. S. Department of Labor, Government Printing Office, Washington, January, 1925; pp. 107–166.) Developments in the marketing of garments, which according to that report made up $18,526,686 of the $44,843,355 worth of prison products sold on the open market in 1923 (Convict Labor in 1923, Bureau of Labor Statistics, Bulletin No. 372, U. S. Department of Labor, Government Printing Office, Washington, January, 1925; pp. 107–166), furnish further evidence of the disturbance caused by contractors or State officials in charge of prison industries.

The broom industry reports a similar situation. Mr. Robert C. Norman, of New York City, testified before the congressional committee on convict labor March 5, 1926 (report of hearings before the Committee on Labor, House of Representatives, 69th Cong., 1st sess., on H. R. 8653 (interstate commerce in the products of convict labor), starting March 5, 1926, p. 84), that out of 50,000 tons of broom corn usually cut per annum, at least 12,500 tons are worked up in prisons. The binder twine and the chair industries report similar conditions. Other trades are affected, but not to such a large proportional extent.

The complaint is made that these goods are sold without identification, and the buyer does not know, in most cases, that he is buying prison-made products. The charge of unfairness arises from this lack of knowledge on the part of the buyer, and it is stated if, in all cases, the distinction between prison-made goods and the products of other factories was clear it would make an automatic distinction which would result in the selling of the two classes of goods in different markets, in the same way that differently priced automobiles reach different markets.

REMEDIES WHICH HAVE BEEN SUGGESTED

More frequently perhaps than any other suggested remedies are those which see in changes in systems of prison manufacturing the solution of all difficulties. The complete abolition of the lease, contract, and piece-price system—that is, the elimination of private interest or private profit from prison industry—is advocated by some. The complete alternative, however, that is, exclusively State-managed prison industries, has also resulted in unsatisfactory conditions either for the prisoners or for outside manufacturers and labor, or for both, and it appears that the fault may not be so much in the system of production as in the system of distribution of the products.

A brief review of the history and literature of prison industries presents many suggestions for solving the problem. It must be remembered that the goods are produced for the most part in State prisons containing prisoners supported by State money and incarcerated because of the breaking of State laws. The problem is primarily a State problem, not a national problem, except in so far as the marketing of these goods affects interstate commerce. The suggestions for remedies may be grouped under four main headings:

I. To stop the prisoners from manufacturing articles of commerce.

II. To remove the products of prison manufacturing from the market.

III. To insure fair competition when prison products enter the market.

IV. To reduce by means of diversification the amount of individual items produced in prisons to such a small percentage of the total production in outside industries of those items that the prison product becomes too small a factor to disturb the market.

I. To stop the prisoners from manufacturing articles of commerce: This is the oldest remedy historically which has been tried. This used to be accomplished by the deportation of convicts to penal colonies and the performing of hand-labor tasks (but see also ibid. p. 186, Illinois Stats., sec. 80; p. 189, Indiana Stats., sec. 9850; p. 203, Massachusetts General Laws, sec. 74) or penal labor only in prisons. This, of course, is no longer practical.

It must not be forgotten that one of the principal purposes of factory work in prisons is to teach the prisoners a useful trade which they can practice after their release. Such a desirable use is entirely lost if the prisoners are not employed in work of a nature which they can continue when they are free, or, in other words, in work which is fairly common in their State.

The use of prisoners on the so-called public works—that is, engaging them in road building and public construction—has been used successfully in certain States. Obviously there are limitations on the number of prisoners which can be used in this way and in many States such use is inconvenient. Furthermore, although there is involved no competition in the products of such prison labor, there is competition of the prison labor itself with free labor. An analogy might be drawn in the reluctance of France to accept German reparations in the form of labor, even where it is to be used on public works which otherwise would not be built, such as railroad construction in the colonies.

II. To remove the products of prison manufacturing from the market: The abandonment of certain industries to convict labor, though now and then proposed as the logical result of letting things take their natural course, has never proved constructive; similarly the selection of an industry for a prison because it does not compete with an industry in the State. Such a policy ignores the welfare of other States as well as the question of what the prisoners will do on their return to society.

The suggestion that industries not carried on in the United States be considered for prisons is of no practical significance, since these are so few and of such a specialized nature as not to be applicable to prisons at all. The exportation of convict-labor products, while it has been urged, has never been actively pressed. Import laws of some countries, such as the British Empire, prohibit prison products from entry, and customs duties or other laws of a retaliatory nature which could be invoked against such "dumping" by other countries prevent this suggestion from having practical value.

A method in use in some States which promises help toward the solution of the difficulty is the manufacturing of goods for State use. Although this plan fills needs which otherwise would be supplied by products from private industries, nevertheless the transactions take on the nature of paper transfers on books of the State and do not affect prices in the open market. Difficulty arises in States such as Rhode Island and Vermont, which would find it difficult to absorb the total possible output of their prisons themselves.

III. To insure fair competition when prison products enter the market: It has been suggested that legislative acts might prohibit the selling of prison products below the fair market prices. In the natural operation of markets this is hardly a workable proposition. Many attempts in industries have been made to determine what are fair market prices. One concern spent a good deal of time and money studying the question only to reach the conclusion that, even with a relatively small output, they could, within certain limits, set the market price merely by offering their goods at that price.

Others would be forced to conform if it was below the quotations they were making. It is recognized economic fact that if the market is glutted, prices will drop. The fact that the prison keeps on manufacturing in order to keep its prisoners busy, whether the market is saturated or not, will bring about this latter condition from time to time, no matter what efforts are made to maintain the market price. The effect, therefore, is not solely a matter of price, and "fair market price laws" would not remedy the situation.

Another suggestion is that prison-made goods should be identified. In certain places this is done by labeling prison-made products as such. (The prison labeling bill: The following States have on their statute books laws requiring that convict-made goods when offered for sale on the public markets shall be distinctly marked in words to the following effect, "These goods are convict-made": California, Colorado, Indiana, Louisiana (brooms), Kentucky, Maine, Montana, Nebraska (binder twine), New Jersey, New York, Ohio, Oklahoma, Oregon, Pennsylvania, Wisconsin, and Washington. The following States have on their statute books laws requiring that any persons offering convict-made goods for sale on the public market shall take out a license for such sale: Colorado, Indiana, New York, Pennsylvania.) There seems to be some fear that labeling would prevent the sale of prison-made products. This is undoubtedly true to a certain extent, but there is no proof that it would make an insurmountable difficulty. Binder twine is sold to the farmer in the Northwest and advertised as a prison-made product; as such it is sold below the market price of privately produced twine and in the region where it is sold it has competed successfully with the latter. In a certain large city one of the retail department stores is known to handle prison-made products. It has the second largest sales of any department store in the city because of its low prices. Apparently, however, in this instance its customers represent a different class of buyers than those of the higher-priced stores, and the executives of the latter do not think that it cuts materially into their sales any more than the sales of low-priced automobiles affect the market for higher-priced cars.

The hygienic conditions of prison shops have been improved in most States so that the public no longer would have occasion to object, as it might have in the past, to identified prison-made goods because of the fear of disease arising from unsanitary or unhealthy working conditions. It is an open question therefore how much effect labels might have on the sale of prison products.

IV. To reduce the amount of individual items produced in prisons to such a small percentage of the total production of those items in outside industries that the prison product becomes too small a factor to disturb the market: In other words the suggestion is for diversification. One of the primary purposes of factory work in prisons, from a penological standpoint, is to train the prisoners in a trade and fit him for a useful life after he is released. Diversification appeals to prison authorities so far as it can be introduced effectively. After all, the main purpose should not be to make a profit. Of course, a profit is desirable in so far as it relieves the taxpayer of some of the burden of the support of the penal institutions in his particular State, but the effect on the markets for the products of free labor must necessarily be subordinated to the general effect on society, on the amount of crime, on the number of criminals, and on the welfare of the great body of free citizens.

PRISON INDUSTRIES

Many different groups of people are disturbed over the present condition of prison industries. The greatest apparent difficulty in finding a solution is that different groups are affected in different ways by different phases of the problem; the interrelations have not been clearly seen, and what seem to be adequate solutions for individual parts of the problem have either been inadequate or altogether inharmonious with proposed solutions of other parts of the problem.

PRISON INDUSTRIES AS A STATE PROBLEM

The prison-industry problem is essentially a State affair. Since nearly all the prisons are State institutions supported, where necessary, by appropriations made by their legislatures, and since the punishment of crime is mostly the responsibility of the several States, the methods of care, of discipline, and of rehabilitation of prisoners must necessarily be in each State a State problem linked closely with its legal code and its organization for the administration of justice. This is particularly true because of the great differences in laws in the several States, differences in the methods of dealing with criminals, in the use of the parole, in the extent of segregation of the various kinds of convicts, and even in the legal and public attitude toward the problems of prison administration.

A STATEMENT OF THE PROBLEM

There has always been discussion as to the use of prisoners in productive pursuits, but there is a changing concept of the purpose of providing work for prisoners. The older concept, which is still retained in the law, is that work is a part of punishment; the criminal is sentenced for "three years at hard labor." The newer idea, which is gaining ground in some States, is first that enforced idleness to any man who has within himself the potentiality of reformation is a greater punishment than work, and second, that some criminals can be reformed, made into useful citizens, by being taught to do productive work. The first difficulty in arriving at a solution arises from the conflict of these two views. But aside from that controversy prison authorities and penologists agree that prisoners should be usefully occupied. Free industry and free labor accept this general principle but protest against what they contend is unfair competition resulting from such occupation. This situation has been intensified by lack of agreement on the first point.

The development of modern industry and the increasing competition in productive enterprise has added new difficulties. Certain industries have felt the competition and have objected to prison labor when its products are to be thrown on an already oversupplied market when there is unemployment in the ranks of free labor. Since the World War industry has found itself in a new phase in which the fighting ground of competition has shifted from production to distribution, and the effect of prison products on this new scene of conflict has been disturbed markets. The problem of prison labor is no longer confined within questions of administration of prisons. This governmental problem has become an industrial problem as well as penological and sociological.

THE FACTS

To serve as the basis for study, the facts regarding the prison industry problem may be briefly stated as follows:

It is accepted by prison authorities that prisoners should be given useful occupation. The skilled can usually be found special work about the prison along the lines of their ability or experience, whether it be as

carpenters or mechanics, in the repair work of the institution, as clerks in the office, as musicians in the prison band, or whatnot. For a typical list see report of the State of North Dakota. Such jobs are usually listed in prison statistics under "prison duties" and represent usually the most successful placing of prisoners in work best adapted to them. Other prisoners are sick, bodily or mentally, and can not do regular work. Such persons are listed in the "sick or idle" group. But there remains the large group of unskilled and semiskilled for which work must be provided. It is this last and usually largest group which, so far as possible, is set at "productive" work.

The methods of providing work for prisoners now used in different States are—

I. Road and construction work for the State either under the direction of State engineers or under private contractors. There are difficulties of supervision under this method which increase either with density of population or with distance from the prison.

A. Disposing the products: Work is for the State on State projects.

B. Problems: In some States the building-trades councils have objected on the ground that free labor has thus been deprived of opportunities to work. Road-building contractors and others have also objected on the ground of danger to the public of having criminals on the highways.

II. Manufacturing in the prison or work on State projects or in State-owned mines under the direction of prison authorities, or, if the work is on a large enough scale to justify, under an expert factory supervisor hired by the State working in collaboration with the warden.

A. Disposing the products: Products are the property of the State and are sold by the prison authorities. (a) Sometimes into the ordinary channels of trade through companies incorporated by the prison authorities with no identification in their name to indicate that they are not ordinary private companies. (b) In Minnesota and a few other States direct to retailers and farmers both within and outside the State borders by the prison authorities acting as such. The profits made on sales to the farmers are sufficient to pay the entire upkeep of the prisons so that no appropriations need be made out of taxes. (c) In some States, to State and municipal institutions only, on the theory that the State being charged with the expense of maintaining the prisoner, has the right to use his labor to reduce the general cost to all the taxpayers of such maintenance. It has been explained that if the prison is paid a profit on the work of its inmates, less money need be appropriated to run the prison, but if prices are lowered the State pays less for its purchases so that the taxpayers save in any case.

B. Problems: Unless there is a large enough group to justify hiring an expert director, the work in some instances has apparently been inefficiently organized and quality has not been up to market standards. Even where there is expert direction of the production, frequently there has been inadequate management of the sales of the products. Some prison administrations have organized companies with blind addresses and sold their goods through such companies under the belief that if it were known that the goods were prison made, sales would be more difficult to make. Actually wholesalers and many retailers know and can supply the names of these companies as prison-products jobbers.

In States where products are sold only to State institutions two kinds of difficulties have arisen:

(a) Small States, it is claimed by certain prison wardens (see statements of R. H. Walker, warden State prison, Montpelier, Vt., and Louis H. Putnam, director of State institutions, Providence, R. I., in hearings on convict labor before Committee on Labor, House of Representatives, 69th Cong.), can not absorb the total products of their prison if the prison specializes on one item, and if it does not specialize either quality drops or costs to the State increase beyond prices offered by private manufacturers for the same goods.

(b) There are difficulties in getting State, county, and municipal institutions to buy in any scheme of coordinated purchasing. Some States have found it necessary to enact laws requiring all institutions to submit their requisition first to the prison authorities and to get a statement from the latter that the goods can not be produced in the prisons before purchases are permitted outside. (The Massachusetts law, for instance, reads: "Sec. 53. The commissioner shall, so far as possible, cause such articles and materials as are used in the offices, departments, or institutions of the Commonwealth and of the several counties, cities, and towns to be produced by the labor of prisoners in the institutions named in section 51." Section 57, in part, is as follows: "No bill for any such articles or materials purchased for the use of said offices, departments, or institutions, otherwise than from a prison or from another institution, shall be allowed or paid unless it is accompanied by a certificate from the commissioner showing that a requisition therefor has been made and that the goods can not be supplied from the prisons. Provisions of any city charter contrary to this section shall be void.")

(c) Objections are raised by some because of the displacement in the market by prison products of a portion of the total volume of the goods which can be sold. This objection holds in an inelastic market, and the further question must be faced whether manufacturers and free labor are willing to forego that portion of the total business in order to provide work for prisoners. There is a further question, however, whether the volume of displacement is of as great consequence as the breaking of market prices if the goods are sold without identification in a highly competitive market.

III. Prisoners are sent out to near-by privately owned mines, lumber camps, and plantations under guard, and the employer pays the State for their labor at an agreed rate per head per hour of work.

A. Disposing the products: Products are sold without identification in ordinary channels of trade. The prisons in such cases are supported in part by payments for labor made by the contractors.

B. Problem: Supervision of the prisoners is difficult; the majority of prison wardens seem to be opposed because of the difficulty of controlling the methods of handling prisoners while they are at work outside direct prison jurisdiction even though the prison has its own guards with the men. It has also been found difficult to control the conditions under which the prisoners are required to work from the standpoint of health and safety.

IV. Manufacturing within the prison walls in buildings provided, heated, and lighted by the prison, but on machinery provided by a private contractor, under direction of his foreman and on materials furnished by him, the products being his property to dispose of in the general market. In this case the State is paid nominal piece-work rates for agreed upon standard products per prisoner. Bonuses for production above standard are paid to the prisoner's account to be made available in small amounts for his use or sent to his dependents. In some cases the State receives rental for the use of the factory space.

A. Disposing of the products: Products are often mixed by the manufacturers or contractors with other products produced by the same companies using free labor or from other prisons and sold without identification in ordinary channels of trade. The prisons in such cases are supported in whole or in part by rentals for space and payments for labor from the contractors.

B. Problem: Objections to this system again come from manufacturers and wage earners whose products come into competition with those of the contractors using prison labor. The latter are free of some of the normal overhead and part of the usual labor costs of manufacturing and can, therefore, undersell producers using free labor. There are few cases where products turned out by contractors are sold exclusively to State or governmental institutions. (In West Virginia the building of State highways has been done to a very limited extent by prison labor under the direction of private contractors.)

Penologists object to both III and IV systems on the ground that the main objective is profit rather than the rehabilitation of the prisoners. The American Federation of Labor and also the General Federation of Women's Clubs have gone on record as officially opposed to either the III or IV systems of providing work for prisoners.

V. Summary of the problem: The situation as it exists in spite of improvements already realized seems far from satisfactory to any of the elements involved. Different remedies are offered. The only point on which all seem to be agreed is that there is still room for great improvement. Proponents of various State legislative experiments to improve matters say they have been handicapped by the fact that the sale to the public of prison-made goods from other States is not subject to the rules established for the local prison products, and thus the purpose of the regulations have been nullified. Furthermore, they claim that requirements that products be sold only for State use have been made difficult and often impossible to carry out because of local pressure from manufacturers, contractors, or labor unions who were willing to have State use provided only the prison does not manufacture products which compete with them. Conditions are different in different States, moreover, so that rules which apparently work successfully in one State may not be applicable in another State, making it difficult to act in concert.

Five Angles of Approach to the Problem

The determination of what can be done to improve the situation involves the consideration of the problem from at least five different standpoints: Penological, administrative, political, industrial, sociological.

PENOLOGICAL

Under this head the prime consideration rests on the fact that the convicts have been put under restraint because of the commission of crime. Recent discussions indicate a growing number of persons who substitute for the old purpose of this restraint—punishment—a new purpose, that of rehabilitation where possible. With this changing conception a new examination is necessary of the effect of the various kinds of work and the various conditions under which that work may be done in relation to the primary purpose of rehabilitation of the prisoner. The extent to which prisoners actually can be taught trades depends on the administration and also upon the size of the prison and its location.

In connection with theories of rehabilitation there seems to be one point on which there is not unanimity of opinions. Many penologists consider that all that can be done is to train convicts in habits of regular work. Others would accustom them to selected kinds of work or actually teach them a trade which they can follow after their release from prison. An agreement between these two often conflicting ideas must be reached before it can be decided, for instance, whether

or not the making of work shirts by male prisoners is an effective aid toward rehabilitation, since this is an industry employing mostly women and there is little opportunity for men to find such work. In such cases the prisoners are not being taught a trade they can probably follow after their release.

The State of New Jersey, which operates its prison shops under the State-use system, has classified its prisoners, according to their grade of mentality, into five groups. The highest group is composed of persons already skilled in some occupation and so far as possible the prison arranges for such individuals to carry on the kinds of work at which they are expert. Members of the second group are graded as "superior" and an attempt is made to teach these persons some trade. The third group of men—those of average mentality—are found work as far as possible along lines they have followed in the past, while those of the fourth and fifth groups—the subnormal and moron grades—are merely provided with some regular work, whatever may be available and suitable to their physical ability. Diversification of employment has been worked out on a State program in which each different classification of prisoners is concentrated in one or more prisons and the industrial program is built to fit the groupings of the prisoners. (See description of the New Jersey systems, p. —.)

Of course, if there is a concentration of work on one trade, either under the contract system or any other system, such a differentiation of work is not possible. The larger the prison the more possible it becomes to arrange a diversity of occupations to fit the needs of the different groups. The problem in smaller prisons from which there is no interchange with other prisons of a State, comes down to the very practical question of how far the ideal diversification and classification can be carried out with the resources and the conditions of that particular prison.

From any standpoint, but especially from the standpoint of rehabilitation, to teach a prisoner to use questionable methods seems a matter of grave concern. Yet as an illustration there is a widely quoted description of work in a certain penitentiary by women prisoners who are making fur coats into which they sewed labels stating that the coats had been made in the studios of a New York furrier. (For another illustration, note the "Cease and desist order" of the Federal Trade Commission, in the matter of the Commonwealth Manufacturing Co., and Harry Dushoff, Docket No. 1367, June 25, 1927. (See p. —.) Do such practices conform to the modern conception of the reformation of the prisoners, is a question which is asked on all sides.

ADMINISTRATIVE

Practical limitations arising from the administrative problems of any plan must be recognized at each prison. If the prisoners are to be used in productive work effectively it is frequently necessary to have an expert in that industry, in order to teach the prisoners good technique and to secure the best quality. The greater the diversity the more difficult it becomes to get expert supervisors for each of the lines of work.

Good practices and efficient work in most lines require up-to-date machinery. Of course, it is easier to install kinds of work which require the minimum of machinery. As diversification is increased more machines are required, calling for additional capital investment, as well as more space. If the goal of making prisons self-supporting is held out as the primary aim, the pressure upon the prison authorities is to secure the greatest production with a minimum of investment, an aim which does not seem consistent with ideal penology. The easiest way out, when appropriations are not available for new machinery, might seem to be for the State to make a contract with a private concern to install its own machinery. Contractors, whose natural and proper object is profit, would be influenced in such arrangements by the assurance of a fairly large and steady supply of prisoners. This, however, again tends to defeat the ideal of diversification and in the smaller prisons especially may stand in the way of putting men at the various types of work which would be most helpful to them as individuals.

There are administrative difficulties, furthermore, in connection with the disposal of the goods. Successful managers of men are often poor salesmen. It is usually asking too much, whether in a private factory or a prison shop, to expect a production superintendent to act successfully also in the capacity of sales manager. An easy way out is for the prison management to turn the selling over to a private company, and the contract system therefore appeals in many such instances. Moreover, at this time, when industrial competition is shifting from the production end to the distribution end, the necessity for expert salesmanship has become greater than in past decades. It has been pointed out often that a system which removes the products from the open market relieves the extreme pressure for this selling ability.

POLITICAL

Any remedy or remedies which are suggested for the solution of the prison-labor problem must take into account the political factors involved. There are relatively few penal institutions which are under the control of the Federal Government. The main problem lies in the State institutions, which are subject in each case to the laws of their respective States. This fact makes it difficult, even if desired, to arrive at any standard solution which will fit all cases. Furthermore, experience seems to indicate that it is difficult for any one State to bring about the solution of its own marketing problems unless it can control prison products from other States when they enter its borders.[1] On the other hand, some States claim that they do not have sufficient market within their own borders for their own products and that any of the possible solutions must depend upon their products going into other States. Canada and many foreign countries prohibit the importation of prison-made goods, so that exporting generally is not open as a means of disposing of the goods.

There are also local political difficulties concerned with appropriations. Several States have made the prisons self-supporting. This is naturally desirable from the legislative standpoint. On the other hand, the question has been raised whether any State has a right to support its prisoners out of the profits realized on sales to the citizens of other States, received either directly or indirectly, through a private contractor.

INDUSTRIAL

Any prison product for use anywhere necessarily displaces a possible demand for the product of free labor. Unless prisoners are to be turned to work of a useless variety, that fact must be recognized; if prisoners are used on road building the job will not be available for a private contractor; if prisoners make hosiery the product will displace other goods in the retail stores somewhere; if prisoners make desks or other articles for State use some private manufacturer will be unable to make the sale of his goods to just that extent; if State printing is done in the prison it is not done by a private printer. The question has been raised whether prisoners should be allowed to work in a given trade in which there are free persons out of work. Whether or not the prison production is carried on as a profit-making activitity is a factor bearing on this question.

Arguments have been advanced that, with the exception of a few major items, the displacement of free goods in the market by prison products is so small in proportion to the total volume that it does not count. Looking at it merely from the standpoint of the volume of displacement, this is true of many prison products. It is not true, however, of all lines. For instance, the argument has been advanced that the total binder-twine production by prisons of the country in 1923 was given by the Bureau of Labor Statistics as $5,588,372. This was compared with the total value of twine and rope as reported in the United States census of manufactures of 1923, which was given as $86,309,404. It should be pointed out, however, that the census of manufactures figures include all kinds of twine and rope; prison production is confined almost solely to binder twine. Segregated figures are not available for this one item out of the total of twine and rope reported in the census.

Likewise the total prison production of work shirts given in 1923 by the Bureau of Labor Statistics was valued at $12,379,721. Persons have actually compared this figure in arguing this point before legislative committees with the production of men's shirts reported in the census of manufactures, although it should be obvious that the work-shirt production is only a small portion of the value of all men's shirts. Unfortunately, segregated figures are not available of free production of the identical lines for which figures are available for prison production.

Furthermore, testimony was offered before the Committee on Labor of the House of Representatives of the first session of the Sixty-ninth Congress, March 5, 1926, to the effect that 35 per cent of all the broom-corn sold in the United States went to prison factories. This would indicate that about that proportion of the brooms produced in this

[1] The following estimate of prison-made goods manufactured in other States and marketed annually in Illinois, without identification, made by the Illinois Federation of Labor, was submitted in testimony before the Committee on Labor, House of Representatives, Sixty-ninth Congress, first session, on H. R. 8653, March 5, 1926:

Convict-made goods shipped into Illinois

25,000 dozen brooms and whisks	$150,000
Harness, saddlery, and leather goods	50,000
Furniture, wood and willow ware	150,000
Clothing, shirts, overalls, etc	500,000
Shoes	500,000
Hollow ware, iron pots, kettles, etc., estimates	25,000
Shovels, picks, and farm implements	50,000
Baskets, split wood, willow, reed, and rattan	15,000
Clay products, brick, tile, etc., from all surrounding States	175,000
Textiles, sox, stockings, underwear, etc	125,000
Whips of all kinds, all such products used, made in prison	5,000
Brushes—scrub, floor, clothes, and paint brushes	10,000
Binding twine	100,000
Gloves and mittens	5,000
Iron and steel bolts, nuts, chains, etc	10,000
Cooperage	35,000
Mats and mattings	10,000
Picture moldings	3,000
Stoves	10,000
Tobacco and cigars	5,000
Turpentine and rosin	20,000
Umbrellas	3,000
Wire baskets and other wire products	5,000
Paper boxes	5,000
Baby buggies and gocarts	50,000
Total	2,018,000

country were produced in prisons. (See testimony of Will R. Boyer in hearings before the Committee on Labor, House of Representatives, 69th Cong., 1st sess., on H. R. 8653.)

But, aside from a few lines, the volume of displacement is not considered the most important effect of the marketing of prison products. The argument is advanced that, in the wholesale markets, especially when competition is keen for purchasers, any sale at less than the prevailing market price tends to depress the entire market, even though the sale is small. There are always some sellers who will meet the lower price by cutting their own prices. Even a very small volume of goods sold below market price, merchants point out, will, in this way, bring down all prices and reduce the profits to free industry. In so far as this is true, the fact that the volume of displacement of some prison products is small, therefore, does not necessarily mean that the effect on the market is negligible. But it is contended that it may be, and often is, a serious factor in demoralizing price levels and thus injuring the business and throwing free labor out of work.

SOCIOLOGICAL

Finally any proposal toward the solution of the prison labor problem must take into consideration the general sociological effects thereof. There seems to be a widespread feeling that the effect on the markets for the products of free labor must, necessarily, be subordinated to the general effect on society on the amount of crime, on the number of criminals, and on the welfare of the great body of free citizens. To reduce the number of recidivists is in the long run a matter of paramount importance in the problem of what to do with prisoners.

On the other hand the public at large benefits, (1) if the price of goods consumed by them is reduced; (2) by lowering the costs of their prisons; (3) by having prisoners come out less dangerous and more fitted to take their place in society. And the question to be determined is whether the injury to the specially interested classes, such as employers and laborers, is sufficient to offset these general advantages.

III. MARKETING CONVICT-LABOR PRODUCTS

The latest detailed statistical study of prison industries was made in 1923 by the United States Bureau of Labor Statistics. That report was the most complete that has been made on the subject in this country. The present study was not intended to replace the 1923 report but merely to bring the most important figures as nearly up to date as possible, to canvass the present state of opinion in all the various groups concerned or interested in the problem of prison industries and to sketch briefly the principal changes and experiences in the several States since 1923. There follows a brief summary of such items gathered by a special investigator in 1925 in the field of marketing prison products.

PRISON SALES PROGRAM

Few prison industries have developed an extensive advertising or sales program. A number of those visited employed a salesman for one or more industries. The prison farm machinery plant at Stillwater, Minn., maintains a corps of field men to sell and to give service to purchasers. These men are frequently used to address meetings of farmers to explain the prison industrial program. Advertising in most prison industries is limited to the publication of catalogues or price lists of prison products, and in some prisons such a list represents the total sales effort. Arkansas, Colorado, Illinois, Massachusetts, Wisconsin, and Wyoming, all have adopted legislation requiring the price of prison products sold on the open market to be "As near the market price as possible." It seems to be the concensus of opinion, however, based on experience that it is difficult to determine fairly what is "market price," especially when the prices offered in the market are often so sensitive that they may, within limits, conform to some offering slightly out of line with those that have been prevailing.

"DUMPING" AS A PRISON SALES POLICY

The case of the State of Missouri in releasing over $1,000,000 worth of garments on the market during the first three months of 1925, is illustrative. In 1917 the contract system which had been in vogue there for many years, was stopped by legislative enactment and public account substituted for it. In 1921 a revolving fund of $750,000 was established to maintain the prison industries and an additional $500,000 was advanced later.

On January 1, 1925, a new management took charge of the prison industries. After a complete reinventory and scrapping of unsalable items, the books showed $574,000 in accounts payable, $584,000 due for materials bought but not delivered, and practically nothing in the bank. An examination of stock and inventory on hand showed $1,300,000 worth of materials and goods made up, mostly in odd sizes, which could not be sold except at a sacrifice. Of approximately 2,600 prisoners in the institution 500 were employed in the prison factories and over 2,000 were either idle or engaged at the prison on maintenance jobs. A complete house cleaning in the prison administration resulted, and during the first three months of 1925 it is recorded that officers placed on the market over $1,000,000 worth of garments for whatever they would bring. During that period prison-made overalls, for example, which cost the outside manufacturer $12.50 to produce, were sold, it is alleged, at $9 a dozen. This sale, merchants contended, broke the price and disorganized the market so that it had not recovered its equilibrium a year and a half later, although the physical volume of goods sold was not a large portion of the annual national production.

PRICES FOR FARM SUPPLIES

Another announced policy of some prison industries is to offer prices regularly below those of free industry. A comparison between wholesale prices of a prison factory selling farm machinery and one of its outside competitors showed the following for 1924:

1924 wholesale prices

	Outside plant	Prison plant
6-foot grain binder, straight pole	$177.00	$125.00
6-foot grain binder, tongue truck	194.00	137.00
7-foot grain binder, straight pole	183.25	129.50
7-foot grain binder, tongue truck	199.00	144.50
8-foot grain binder, tongue truck	202.50	150.00
4½-foot mower	67.00	47.50
5-foot mower	68.00	48.50
5-foot giant mower	72.00	51.00
6-foot mower	74.00	52.00
Side delivery rake	96.00	67.00
10-foot 26-T sulky rake	37.00	27.50
10-foot 32-T sulky rake	38.50	28.50
12-foot 36-T sulky rake	44.25	31.00
Tongue truck for binder	26.00	19.00
Transport truck for binder	10.00	8.00

During the same year a firm of public accountants prepared a report with reference to the operations of this State prison farm-machinery plant for the years 1921, 1922, 1923, and 1924, based on figures taken from official records of the State board of control, reports of the warden of the State prison, and data prepared by representatives of the board of control and submitted to committees of the State legislature and of Congress. This report showed a loss on the farm-machinery operations for the 4-year period of $958,887.56.

Based on the percentage of total net loss to total net sales the actual loss on each sale of the three principal products sold by the prison plant—binders, mowers, and rakes—was estimated at 37 per cent of the net sales of these goods, or over one-third of the selling price.

With these facts in hand a legislative investigating committee said, in April, 1923:

"Your committee further finds that while the books of account kept at the said institution show a loss in the machinery department, still the profits of the industries carried on at said institution have been such that beside being self-sustaining it has accumulated a large revolving fund now on hand within a few years. It is evident that the alleged loss is one that does not in fact exist, but is due merely to the charges made for work of the inmates, which charges have never been paid to the inmates, but are rightfully retained in the funds of said institution."

According to the report of the accountants referred to above, wages credited to inmates in the farm-machinery plant for the four years, 1921–1924, totaled $90,054.87, and there was charged against the plant by the prison as a per diem charge for inmate labor during this period $438,083.55. The report also shows that while $958,887.56 was lost on farm machinery, there was a profit of $954,990.76 on binder twine sold during the 4-year period 1921–1924. The loss on farm machinery was therefore actually covered by the profits on binder twine.

In the discussion of State appropriation bills and other financial measures in the legislature, arguments have been offered in favor of maintaining the prison factories as they have been developed. The farmers need the help which lower-priced binder twine gives them is the explanation given by the officials.

INACCURATE UNIT-COST ANALYSES AS BASIS OF PRISON PRICE POLICIES

Accompanying are unit-cost analyses from several prison industries in various States and for various products. They are presented as actually used in determining prices.

An examination of these sheets shows three things—

1. Certain elements usually entering into costs, such as rent, many overhead items, selling costs, and sometimes factory labor, are absent.

2. Even when these elements are arbitrarily added in the analysis, frequently the amount charged is considered inadequate to bring them into a basis comparable with ordinary factory operations. This is particularly true of factory labor costs.

3. Few of the best managed prisons are making regular cost analyses of their products.

A comparison of the unit-cost analysis of a man's heavy work shoe at prisons A, B, C, D, E, F, G, compared with manufacturers H and I, illustrate some of these points. (See Exhibit VII.) Although there is some variation in the material costs, the shoes made by prisons A, B, D, and G and by manufacturers H and I are of the same general class. Prison factory labor costs are figured at 55 cents, 0 cents, 31 cents, and 36 cents; and free factory costs at 80 cents and 51 cents.

Comparing two prisons—E and F—manufacturing the same class of shoes, prison factory labor costs are 15 cents and 0 cents, respec-

tively, although in free factories labor costs in the same shoe are around 45 cents a pair. Note the variations: Prisons B, C, and F actually pay no wages—neither does prison A—but A arbitrarily uses a labor charge which brings its apparent costs to 55 cents, or 10 cents higher than the free factories whose average has been used for comparisons. Prison G pays only nominal wages to prison workers, but attempts the same kind of approximation by setting up a labor charge of 36 cents a pair.

Taking another example, that of the 50 inches by 32 inches quartered-oak flat-top desk (see Exhibit X) the prison factory shows a labor charge of $8.10 covering time of instructor as compared with the free factory charge of $4.89, an example of the difficulty of separating factory labor costs from costs of education, which is the primary object after all.

For binder twine (see Exhibit XIII) labor costs are figured at $0.0035 and $0.0044 per pound by two prison factories, as compared with a cost of approximately $0.01 per pound in free factories.

In work shirts the comparison is equally striking. (See Exhibit XVI.) Three prison factories operating under contract and public account figure labor costs at 75 cents, 90 cents, and 91.4 cents per dozen work shirts, as compared with $1.90 for one and an average of $2 per dozen for six free factories.

"Overhead charges" in unit cost analyses in prison industries are equally erratic. No prison industry was found paying workmen's compensation insurance. In only one prison visited in which work was under a contractor did the latter pay "rent," but usually he paid for light, heat, and power. There were nearly as many variations in contract terms as there were contract prison shops. Few prison industries operating under State account made charges for interest, depreciation, maintenance, and other overhead items, which can not be escaped by free industries.

But apart from natural variations in the actual costs there are further difficulties arising from the lack of records. Quoting from the report of certified public accountants engaged in 1920 to analyze cost and other records as a basis for sales prices in a certain State prison:

"The amount of detailed records of materials, costs, and prices kept in the several departments showed great variation, the ——— department being particularly noticeable for its lack of records. There were no records of the material used in this department during the year, the orders for which it had been used, the rates used during the year in pricing the outside sales, nor the estimated costs upon which the sales prices had been based.

"The ——— department has good perpetual inventory of its raw materials and a detailed basis for estimating the cost of manufacture. The other department selling extensively to the outside is the ——— department, but owing to the exceptional position held by the present foreman it seems inadvisable to make any changes at this time.

"The lack of records in the ——— department, as previously mentioned, is due to the fact that there is no clerk in this department, that the foreman in charge of the department is not familiar with such records and their use, and that the superintendent has not seen fit to take steps to remedy the trouble himself." (Subsequently, it should be said, changes and improvements were made at this prison to correct the defects brought out by this report. The report, nevertheless, is typical of accounting conditions in many prison industries operating under State control.)

In another State prison whose industries were run by the prison authorities, prices charged for prison products did not include any charge for rent, interest, maintenance, or depreciation on buildings used by industries doing nearly $1,500,000 worth of business annually. On May 29, 1925, out of a total of 3,690 prisoners, it was reported that only 620 were engaged in factory work, the rest being idle, only partly engaged, or doing "individual craft" work. The reason assigned for this condition was that no funds could be obtained with which to build new buildings to house additional industries. An annual report of the department in charge of these prisons for the year ending May 31, 1924, stated: "The accounting system has been completely revised under the direction of the department accountant." It evidently had not occurred to the accountant that a charge for rent on factory buildings or its equivalent, such as any free industry must include in its price policy, would provide the money with which an appropriation for new buildings could be funded in a comparatively few years.

Obviously too much can not be expected of prison accounting systems. Only a few have funds available to hire first-class accountants. Most use such accountants as come their way as prisoners to set up their books and can not be sure of continuous expert accounting.

IV. Public or Private Control of Prison Industries

Among the suggestions made for solving the difficulties arising out of the competition of prison industries with free industries, changes in "systems" of prison industries are most frequently advocated. The elimination of the prison contractor and the restriction of prison industries to State-controlled systems, as proposed by the garment industry and others, calls for an examination of the general effects of all systems of prison industries.

Systems of prison industries

According to the terminology in common use, there are six principal "systems" of prison industries, defined as follows (see Convict Labor in 1923, Bulletin No. 372, U. S. Bureau of Labor Statistics, pp. 3, 4):

Contract system: Under this system the State feeds, clothes, houses, and guards the convict. To do this the State maintains an institution and a force of guards and other employees. A contractor engages with the State for the labor of the convict, which is performed within or near the institution. The contractor pays the State a stipulated amount per capita for the services of the convict, supplies his own raw material, and superintends the work.

Piece-price system: This system differs from the contract system mainly in method of payment for the labor of convicts. The State maintains the institution and feeds, clothes, and guards the convicts. The contractor supplies the raw material and pays the State an agreed amount for the work done on each piece or article manufactured by the convicts. The supervision of the work is generally performed by a prison official, although sometimes by the contractors. The officials of the prison not only maintain discipline but also dictate daily quantity of work required.

Public-account system: So far as the convict is concerned, this system does not differ from the piece-price system, but for the institution it is entirely different. In the piece-price system the contractor finances the business and assumes all the changes of profit and loss. In the public-account system the State enters the field of manufacturing on its own account. It buys the raw material, manufactures and puts the product on the market, and assumes all the risk of conducting a manufacturing business. The State has the entire care and control of the convicts and with them conducts an ordinary factory. The institution may sell the product direct or through an agent.

State-use system: Under this system the State conducts a business of manufacture or production, as in the public-account system, but the use or sale of goods produced is limited to the same institution or to other State institutions. The principle of the system is that the State shall produce articles of merchandise for governmental supply requirements only and shall not compete on the open market with the business of manufacturers employing free labor.

Public works and ways system: This system is very nearly like the State-use system. Under this system the labor is applied not to the manufacture of articles of consumption but to the construction and repair of the prison or of other public buildings, roads, parks, breakwaters, and permanent public structures.

Lease system: Under this system the State enters into a contract with a lessee, who agrees to receive the convict, to feed, clothe, house, and guard him, to keep him at work, and to pay the State a specified amount for his labor. The State reserves the right to make rules for the care of the convict and to inspect the convict's quarters and place of work. No institution is maintained by the State other than a place of detention, where the convicts can be held until placed in the hands of the lessee and in which to confine convicts who are unable to work. In other words, the prisoners themselves are leased to the contractor.

States Tabulated According to Three General Classifications in Methods of Marketing Goods Manufactured in State Penal Institutions

Class I. States which restrict the sale of products manufactured by their prisoners to Federal, State, municipal, or county institutions.

Class II. States which manufacture convict-made goods for sale to the consuming public as well as for governmental use. Under this plan the prison-made goods are usually identified as such when sold to the consumer.

Class III. States which sell prison-made goods to private distributors or labor to contractors, who seek private profit in reselling these products to wholesale and retail dealers. Under this plan prison-made goods lose their identity before final sale is made to consumer.

Class I

Eleven States which manufacture prison goods for governmental use only. This classification does not include local sales of farm products:

Arizona (clothing, flour, shoes, road work). See Appendix A.

Georgia (farming, fruit, road work). See Appendix A.

Massachusetts (clothing, furniture, knitting). See Appendix A. (Massachusetts sold 15 per cent of the products of the State prison shops to jobbers in 1927.)

Montana (farming, tag, license plate, clothing). See Appendix A.

Nevada (farming, dairying). See Appendix A.

New Jersey (clothing, shoes, printing, auto tags, woodworking, foundry, knitting, farm, miscellaneous). See Appendix A.

New York (shoes, furniture, underwear, printing, construction, road work, etc.). See Appendix A.

Ohio (farms, clothing, bricks, quarrying, furniture, etc.). See Appendix A.

Oregon (shoes, clothing, printing, flax shop). See Appendix A.

Pennsylvania (hosiery, shoes, printing, clothing, license plate, brush, cannery, garden, miscellaneous). See Appendix A.

Washington (shoes, plate mill, tannery, farming, dairying, printing, cabinet making, miscellaneous). See Appendix A.

CLASS II

Thirteen States which sell their convict-made goods to brokers, wholesalers, retailers, and consumers in addition to manufacturing for governmental use:

Arkansas (clothing, flour, shoes, road work). See Appendix A.

California (grain bags, sold direct to farmers). See Appendix A.

Colorado (canned fruits and vegetables, sold through brokers). See Appendix A.

Kansas (binder twine, sold to farmers). See Appendix A.

Louisiana (farm work). See Appendix A.

Minnesota (farm implements and binder twine). See Appendix A.

Mississippi (cotton growing, farming, lime crushing). See Appendix A.

New Mexico (brick). See Appendix A.

North Dakota (binder twine). See Appendix A.

Rhode Island (work shirts). See Appendix A.

South Dakota (binder twine). See Appendix A.

Texas (cotton growing, farming, livestock). See Appendix A.

Utah (overalls, clothing). See Appendix A.

CLASS III

Twenty-four States which sell prison-made goods to private distributors or labor to contractors who seek private profit in reselling these products to wholesalers and retail dealers. Under this plan prison-made goods lose their identity before final sale is made to consumer. Many, if not all, of the States listed under Class III also operate prison industries in part under Class I or Class II:

Alabama (chambray work shirts, chambray and nainsook underwear). See Appendix A.

Connecticut (work shirts). See Appendix A.

Delaware (work pants). See Appendix A.

Florida (work shirts, athletic underwear). See Appendix A.

Idaho (work shirts). See Appendix A.

Illinois (chairs, furniture, hosiery). See Appendix A.

Indiana (furniture, athletic nainsook underwear). See Appendix A.

Iowa (shirts, aprons, chairs). See Appendix A.

Kentucky (work shirts, shoes, chairs, brooms, horse collars). See Appendix A.

Maine (work shirts). See Appendix A.

Maryland (pants, wire products, brooms, athletic underwear, foundry, clothing, upholstered furniture). See Appendix A.

Michigan (textile denims, chair and cot factory, cannery, brushes, stamp plant, work shirts, overalls). See Appendix A.

Missouri (work shirts, work pants, overalls, brooms, shoes, sisal twine, and fibercraft furniture). See Appendix A.

Nebraska (furniture, work shirts). See Appendix A.

New Hampshire (furniture). See Appendix A.

North Carolina (furniture, mattress factory, convict clothing). See Appendix A.

Oklahoma (work pants, work shirts). See Appendix A.

South Carolina (fiber furniture). See Appendix A.

Tennessee (foundry, stoves and hollow ware, hosiery, loop shop, shirts). See Appendix A.

Vermont (workman's shoes). See Appendix A.

Virginia (work shirts, overalls, chairs). See Appendix A.

West Virginia (brooms, whips, work pants, work shirts). See Appendix A.

Wisconsin (hosiery). See Appendix A.

Wyoming (work shirts). See Appendix A.

California, Colorado, Florida, Georgia, North Carolina, and Virginia have recently employed large numbers of prisoners in road construction. (Convict Labor for Road Work, U. S. Department of Agriculture Bulletin No. 414. Government Printing Office, 1916, pp. 24–57.) Alabama, Arizona, Idaho, Illinois, Massachusetts, Michigan, Nevada, New Jersey, New York, Oklahoma, Oregon, South Carolina, Texas, Utah, Washington, and West Virginia have experimented with smaller numbers. (Convict Labor for Road Work, U. S. Department of Agriculture Bulletin No. 414. Government Printing Office, 1916, pp. 53–61.)

From an industrial point of view, and especially from the point of view of competition with free industry, the employment of prisoners on such work is merely a different form of State use. "The construction and repair of prisons or other public buildings, roads, parks, breakwaters, and permanent public structures" is simply one industry in which prisoners may be employed under the State-use system and is subject to the same general principles which are applicable to all industries under that system.

It should be noted, however, that the various headings in the classification are not mutually exclusive. Thus, West Virginia has had public-account work on roads done under the contract system. Bids were called for from road-building contractors, with the offer by the State of the free use of prisoners on the work by the successful bidder. All bids received contemplated thus using prison labor. In several States at least part of the work shirts produced under contract management are for State use. On the other hand, Rhode Island prisoners make work shirts under prison management which are sold through a private contractor.

In this report, therefore, the use of this terminology has been avoided, so far as possible. Instead two methods of prison labor management only have been recognized:

1. State operation: Management by prison authorities or by persons employed by the State.

2. Contract operation: Management of the work by private persons who use the labor of the prisoners on some contractual basis and who receive the profits derived from the sale of the products.

There have also been recognized in this report four methods of disposing of the products:

1. Sale of products exclusively to State, county, and municipal institutions or work done for them—that is, production of milk or farm products for State institutions, doing laundry work (frequent in women's reformatories), and construction work on roads or public buildings.)

2. Sale of the entire product of a prison industry to a contractor, who in turn sells to the jobbers.

3. Sale to jobbers or retailers in the general market, the goods being either identified as prison products or their identity concealed.

4. Sale to the general public direct—that is, Minnesota twine.

LETTER FROM WILLIAM GREEN, PRESIDENT AMERICAN FEDERATION OF LABOR, DATED DECEMBER 11, 1928, URGING SUPPORT OF HAWES-COOPER BILL

AMERICAN FEDERATION OF LABOR,
Washington, D. C., December 11, 1928.

Hon. HARRY B. HAWES,
Senate Office Building, Washington, D. C.

DEAR SIR: During the nearly half century existence of the American Federation of Labor it has persistently urged the enactment of legislation that would eliminate convict-labor competition with free labor. This competition seriously threatens the stability and security of many established industries, which employ thousands of working men and women.

The Hawes-Cooper convict labor bill, now awaiting action by the Senate, will make it possible for the several States to solve the convict-labor problem.

The bill passed the House by a vote of 303 to 39. We have been assured that at least three-fourths of the Members of the Senate are favorable to the bill and that all that is necessary for its passage is to permit it to come to a vote.

Permit me to urge you to consider the gravity of this issue, as it affects so many thousands of employees and at the same time many employers whose various lines of business are seriously menaced by the competition of goods made in prisons through the employment of convict labor.

In this request we are supported by 48 State federations of labor, 1,000 central labor unions, and 35,000 local unions. The fact that so many organizations have repeatedly and for so many years pleaded for protection from convict-labor competition will certainly appeal to the consciences and sound judgment of Members of the United States Senate.

In the hope that you will give careful consideration to the proposed measure, which I request of you in the name of 4,000,000 organized wage earners in the United States, I am

Respectfully yours,

WM. GREEN,
President American Federation of Labor.

LETTER FROM MRS. JOHN F. SIPPEL, PRESIDENT GENERAL FEDERATION OF WOMEN'S CLUBS, URGING SUPPORT OF HAWES-COOPER BILL

GENERAL FEDERATION OF WOMEN'S CLUBS,
Washington, D. C., December 13, 1928.

MY DEAR SENATOR: The General Federation of Women's Clubs strongly indorses and favors the passage by the Congress of the United States of the bill, known as the Hawes-Cooper convict labor bill (H. R. 7729) now pending before your body and passed by the House of Representatives at the last session by a vote of 303 to 39.

Interested on the one hand in the welfare of women wage earners and the blind workers, and on the other in the humanitarian work of rehabilitating the prisoner, we consider the enabling act now before you for action as a vital step toward the solution of the prison problem. Our attitude is based upon years of serious study of and experience in prison work.

Any assistance you may be able to give in bringing this measure to a prompt and favorable disposition will be greatly appreciated by our membership.

Sincerely yours,

Mrs. JOHN F. SIPPEL,
President General Federation of Women's Clubs.

LETTER FROM A. F. ALLISON, CHAIRMAN MANUFACTURERS' CONFERENCE ON PRISON INDUSTRIES, DATED DECEMBER 13, 1928, URGING SUPPORT OF HAWES-COOPER BILL

MANUFACTURERS' CONFERENCE ON PRISON INDUSTRIES,
New York City, December 13, 1928.

Senator HARRY B. HAWES,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR HAWES: On behalf of the Manufacturers' Conference on Prison Industries I am directed respectfully to call your attention to H. R. 7729, known as the Hawes-Cooper, or convict labor, bill now pending before your body and scheduled for an early vote. As was stated in the records of the hearings, our conference represents diversified industries in more than 38 States, employing large numbers of wage earners, men and women, with an estimated capital investment of more than $2,500,000,000.

Before indorsing this legislation and actively supporting its passage by Congress we had an exhaustive and careful study made both as to the constitutionality of the proposal and its economic merit. With respect to its constitutionality the opinons of our own counsel were fully sustained in the brief submitted by Mr. Donald Richberg, which you will find in the records of the Senate and House hearings. It is important to mention also that on the Senate committee reporting the bill there are 13 lawyers, and on the House committee 9 lawyers. Lengthy discussion of the legal phases of the bill, participated in by eminent legal minds in the House, was followed by passage of the measure in that body by a vote of 303 to 39.

As to the economic merit of the pending bill we may properly say this involves questions with which we must deal each day in the conduct of our own businesses. We now compete in markets which are only too often at the mercy of the prison contractor.

The production and sale of prison-made goods for private profit, as now encouraged or permitted by certain States, does not represent any development of superior method in the management of a factory or efficient distribution of merchandise. It is quite the reverse. It represents exploitation of cheap, nonvoluntary labor and the destruction of sound competitive markets without evidence of compensating advantages to the consumer.

In such a situation, we respectfully submit that the views of the manufacturers and the wage earners who support this convict labor bill may properly be given preference over the interests of the prison contractors.

We have indorsed that portion of the bill under which it does not actually become effective for three years, so that such readjustments may be made as may be necessary in any State in order to provide continuous and useful training in productive labor for prisoners under the State-use system.

In view of the fact that the bill was reported favorably to the Senate on February 21, 1928, and because of the shortness of the present session, we earnestly urge your support of this measure and trust you will discourage delays designed to prevent a Senate vote.

Very sincerely yours,

A. F. ALLISON, *Chairman.*

BANKRUPTCY FACING LARGE INDUSTRY

NATIONAL BROOM MANUFACTURERS' ASSOCIATION,
Chicago, Ill., December 12, 1928.

Hon. HARRY B. HAWES,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR: At the direction of the National Broom and Allied Industries Association, in convention assembled, at Chicago, December 12, 1928, I am directed to call your attention to a measure, H. R. 7729, now pending before your body and known as the Hawes-Cooper, or convict labor, bill.

The facts related at our convention only strengthened the statements made to your honorable body at the hearings before the Interstate Commerce Committee in February, 1928, by Mr. Irwin Richard, our properly authorized representative. (P. 116, hearings.)

Bankruptcy is facing members of our industry and allied trades as the result of unfair competition in prison products. The blind are suffering from the same competition. The broom industry and allied industries are being wrecked slowly but surely by the inroads being made through the sale of convict goods. The blind are being robbed of the most suitable trade yet found for these deserving people. All the facts and figures have been set forth. Each day confirms the fear for the future.

The States are powerless to regulate the sale of prison products because one State can not regulate prison products shipped into its borders from another State. Capital and labor are suffering and the prisoner is not gaining anything meanwhile. The present situation impedes progress; it invites disaster.

In the name of every member of the industry and allied trades which I have the honor to represent, I urge you to give your speedy approval to the disposition of this measure pending before you and assure you that your interest and activity will be greatly appreciated.

Very sincerely yours,

R. M. MONTGOMERY,
President, Grove City, Pa.

JOINT STATEMENT BY THE GENERAL FEDERATION OF WOMEN'S CLUBS IN SUPPORT OF THE HAWES-COOPER BILL

Mrs. John D. Sherman, president; Mrs. Duncan S. Johnson, chairman department of legislation; Mrs. Walter McNab Miller, chairman department of public welfare; Miss Julia K. Jaffray, chairman division of adult delinquency.

The General Federation of Women's Clubs, nearly 20 years ago, became interested in prison labor, because a group of women shirt makers in Baltimore bespoke the interest of other women to help overcome the unfair competition resulting from the large quantities of work shirts being manufactured under the contract system in Maryland penitentiaries.

The Women's Clubs carried the problem to the New York State Department of Labor which made an investigation which disclosed the fact that New York State could not protect its markets against the products of the prisons of other States, even though New York sold no prison products on the general market.

This investigation led to the organization of the National Committee on Prisons and Prison Labor, representatives of the federation assisting in launching the organization with which the general federation has consistently cooperated.

By 1912 the federation was sufficiently interested and informed to adopt the following resolution:

"Whereas club women having discussed throughout the country, under the auspices of the industrial and social conditions committee, the problem of prison labor, and said committee having submitted to careful scrutiny the reports of investigations in this field by the National Committee on Prison Labor and kindred local committees:

"*Resolved*, That the General Federation of Women's Clubs declares itself as opposed to the contract system of prison labor, and to every other system which exploits his labor to the detriment of the prisoner, and that we urge upon the several States the advisability of establishing healthy outdoor work for able convicts, remedial care for the feeble and degenerate, and industrial education for all who have the potentiality for reform. And we further affirm that the products of convicts' labor should be consumed by the States, and that the profits therefrom, above the just cost of his keep, should be used to support such dependent family as he may have."

Since that time a consistent campaign of education has been carried on in all of the States, a strong resolution against the exploitation of prisoners being passed at the council meeting at Atlanta in 1923.

In 1926 the sentiment against this exploitation had strengthened to the point where the federation indorsed the principles of this Hawes-Cooper bill and issued the following statement in support of this bill:

"One hundred thousand men and women are to-day confined in the prisons and reformatories of the 48 States.

"All of these prisoners who are physically and mentally fit must work, not only for their own good and to help support their families but also for the good of the State and society. No State and no private individual has any moral right to reap profit from the labor of the prisoners.

"The contract system is to the prison official the easiest way to provide for the employment of prisoners. Under this system the labor of the prisoner is leased to a private individual or corporation which pays for this labor a sum far below the price paid for free labor and in addition receives free, or for a nominal sum, rent, light, heat, and other overhead charges."

Women workers suffer bitterly from the unfair competition which results from the prison contract system. To illustrate: Approximately 40 per cent of all work shirts now sold on the markets of this country are prison made; 35 per cent of the work pants are prison made; and 10 per cent of the overalls are prison made. Such garments are manufactured exclusively by women outside the prison and both their opportunity for steady work and their wages are seriously affected. Women workers are repeatedly appealing to club women for help against this unfair competition.

The blind also suffer from the commercial exploitation of the prisoners by private business interests. Broom making is the best industry for the blind, but unfortunately it is also a favorite industry of the prison contractor, and large quantities of prison-made brooms are sold on the public markets, destroying the opportunity for the blind.

The prisoner is another victim of the prison contract system as he does not receive training in a trade he can use when released and in many instances he has full knowledge of deceit and unfair practice used in selling the products of his labor—or as James J. Davis, Secretary of Labor, has stated:

"The prisoner who sews a false label in a prison-made garment, indicating that it was made by an outside manufacturer, knows he is forced to become a liar and a cheat. If our jails and penitentiaries teach a man to lie, what can we expect of that man when we set him free?"

To attempt to meet the objections of public-spirited citizens to the prison-contract system some of the States have resorted to what is known as the "public-account" system, under which the State operates the prison industries, furnishes the raw materials, and sells the products on the general markets, either directly or through an agent.

The situation that has resulted was summed up in the following way by Mr. A. F. Allison, who represented the manufacturers' viewpoint before the National Crime Commission in Washington, November, 1927:

"As to the present situation in some of the 25 States which have more or less commercialized their prison industries—poor business management; admitted lack of proper facilities and methods of vocational training; cut-throat competition with free industry apparently are characteristic of these governmental attempts to enter the field of private business."

STATE USE OF PRISON-MADE PRODUCTS OVERCOMES THESE OBJECTIONS

President Coolidge in his first message to Congress made the following clear and explicit statement of what should be done in regard to the employment of Federal prisoners, and which is equally applicable to State prisoners:

"The National Government has never given adequate attention to its prison problems. It ought to provide employment in such forms of production as can be used by the Government, though not sold to the public in competition with private business, for all prisoners who can be placed at work, and for which they should receive a reasonable compensation available for their dependents."

Massachusetts, New York, New Jersey, Pennsylvania, and Ohio employ their prisoners in the production of commodities for consumption in State institutions and departments, and it is noteworthy that these States are making real progress toward the rehabilitation of prisoners through honest work.

These States, however, are the dumping ground for the prison products of other States. To protect their markets from cheap prison products, New York, Ohio, and some 14 other States have enacted laws providing that prison-made goods must be branded "prison made" whenever offered for sale on their general markets.

These laws have been held unconstitutional whenever tested by the courts on the ground of their interference with the provisions of the interstate commerce law. The Hawes-Cooper bill will overcome this difficulty and give State rights to States which wish to enforce branding laws.

The branding or labeling laws are intended to insure to the consumer-buyer:

1. Right to choose between prison and free made goods.
2. Right to a fair buying price.

The prison contractors are opposed to the Hawes-Cooper bill for these two reasons. If it passes they will refuse to continue the contracts and the States will be forced to produce commodities for Government use.

The General Federation of Women's Clubs at the biennial convention at Atlantic City indorsed the principles of the Hawes-Cooper bill for the following reason:

"The passage of the Cooper bill will force prison authorities to a speedy cooperation along the lines already agreed on in the conferences on the allocation of prison industries, while the manufacturers and labor organizations are at present demonstrating that their advice and assistance can be secured toward the effective working out of this program."

THE RESPONSIBILITY OF ALL CITIZENS

The prison officials should not be held solely responsible for providing employment for prisoners. In the State of Pennsylvania it is being demonstrated that the way to solve the prison-labor problem is for manufacturers and representatives of organized labor to assist the managers of the prison industries in developing these industries so that conditions are as nearly as possible parallel to the conditions the prisoners will find in outside industries. The passage of the Hawes-Cooper bill will hasten the nation-wide development of a system of employing prisoners which is just to the State, the prisoner, the prisoner's family, and the free workingman and woman.

The constructive State-use program which must follow the passage of the Hawes-Cooper bill was approved by the following resolution adopted by the general federation in biennial convention assembled in Los Angeles in 1924:

RESOLUTION BY GENERAL FEDERATION OF WOMEN'S CLUBS AT SEVENTEENTH BIENNIAL CONVENTION HELD AT LOS ANGELES, CALIF., 1924

Whereas official representatives of the States of Colorado, Idaho, Montana, Nevada, New Mexico, Wyoming, Washington, and Utah held a conference on the allocation of prison industries, in Salt Lake City, Utah, April 9, 1924, and the representatives of the States of North Carolina, South Carolina, Georgia, Alabama, and Mississippi held a similar conference at Atlanta, Ga., May 28, 1924, and adopted the following resolutions:

1. That all able-bodied, physically fit, mentally competent male and female prisoners should be employed and not maintained in idleness.

2. That as soon as practicable all work-competent prisoners be employed under the State-use system, including public work, as the fairest method of employment alike to the taxpayers, to capital, to free labor, and to the prisoners themselves, it being recognized that the basic considerations that govern the selection of State-use industries are:

(a) The selection of those industries whose products will find a ready, stable, and adequate market among the State and local government agencies, within or without the State, and for which adequate materials are obtainable at reasonable prices.

(b) The selection of industries in which the class of prisoners in the institution can be most effectively employed.

3. That all prisoners should receive such compensation as their conduct and efficiency warrant, to be paid out of the earnings of the prison industries after all costs of prison maintenance have been deducted. That earnings be applied to families of such prisoners who are dependent on them.

4. That the services of the Association of Government Service (Inc.) be utilized whenever needed as a medium for the exchange of surplus products between the States.

5. That it is the sense of the Industrial Allocation Conference that the several States, with the United States Government, together constitute the State-use system: Be it

Resolved, That the General Federation of Women's Clubs, having thoroughly investigated the program of the allocation committee and the aims and purposes of the associates for Government service, indorse this program and extend to the governors of the States enumerated above its congratulations and its sincere hope that the prisons' industrial systems may develop along the lines contemplated and urges State federations to cooperate in every way; and be it further

Resolved, That State federations where similar conferences will be held at a later date are also urged to cooperate in making these conferences successful.

BRIEFS ON CONSTITUTIONALITY OF PROPOSED LAW

1. By Donald R. Richberg.
2. By Breed, Abbott & Morgan.
3. Statement of Hon. Albert C. Ottinger, attorney general, State of New York.

OPINION CONCERNING CONSTITUTIONALITY OF A BILL TO SUBJECT PRODUCTS OF CONVICT LABOR TO THE OPERATION OF STATE LAWS

The bill in question, introduced in the Senate by Mr. HAWES (S. 1940)—and an identical bill introduced in the House by Mr. COOPER (Ohio)—provides in full as follows:

"That all goods, wares, and merchandise manufactured, produced, or mined, wholly or in part, by convicts or prisoners, except paroled convicts or prisoners, or in any penal and/or reformatory institutions, transported into any State or Territory of the United States and remaining therein for use, consumption, sale, or storage, shall upon arrival and delivery in such State or Territory be subject to the operation and effect of the laws of such State or Territory to the same extent and in the same manner as though such goods, wares, and merchandise had been manufactured, produced, or mined in such State or Territory, and shall not be exempt therefrom by reason of being introduced in the original package or otherwise."

In considering the validity of the proposed legislation, attention is naturally first directed to the law which, in almost the same terms, devested liquor shipments of their interstate character, which law was repeatedly sustained by the Supreme Court of the United States.

I

On August 8, 1890, an act of Congress was approved, since commonly described as the Wilson Act, which provided in full as follows:

"That all fermented, distilled, or other intoxicating liquors or liquids transported into any State or Territory or remaining therein for use, consumption, sale, or storage therein shall, upon arrival in such State or Territory, be subject to the operation and effect of the laws of such State or Territory enacted in the exercise of its police powers, to the same extent and in the same manner as though such liquids or liquors had been produced in such State or Territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise." (26 Stat. 313.)

The act just quoted is substantially the same in language and general purposes as the bill now under discussion. The constitutionality of the Wilson Act was approved by the Supreme Court of the United States in the case entitled Wilkerson *v.* Rahrer (or Re Rahrer) (140 U. S. 545). The Supreme Court held, in brief, that this act was not an attempt to delegate the power to regulate commerce, nor to grant a power not possessed by the States, nor to adopt State laws. But the court held that Congress "has taken its own course and made its own regulation applying to these subjects of interstate commerce one com-

mon rule whose uniformity is not affected by variation in State laws in dealing with such property." The court further ruled:

"No reason is perceived why, if Congress chooses to provide that certain designated subjects of interstate commerce shall be governed by a rule which devests them of that character at an earlier period of time than would otherwise be the case, it is not within its competency to do so."

* * * * * * *

"The framers of the Constitution never intended that the legislative power of the Nation should find itself incapable of disposing of a subject matter specifically committed to its charge. The manner of that disposition brought into determination upon this record involves no ground for adjudging the act of Congress inoperative and void."

* * * * * * *

"Congress did not use terms of permission to the State to act, but simply removed an impediment to the enforcement of the State laws in respect to imported packages in their original condition, created by the absence of a specific utterance on its part. It imparted no power to the State not then possessed, but allowed imported property to fall at once upon arrival within the local jurisdiction."

It will be borne in mind in reading the opinion of the Supreme Court in the Rahrer case that commerce in intoxicating liquors was, at this time, legitimate and that in this case the Supreme Court did not overrule, but, in fact, affirmed its opinion in Leisy *v.* Hardin (135 U. S. 100), wherein the court held that a State law which prohibited the sale of liquors in the original package was unconstitutional as an interference with the freedom of interstate commerce.

The doctrine of the Rahrer case was frequently affirmed by the Supreme Court in later opinions, among which the following may be cited:

Rhodes *v.* Iowa (170 U. S. 412).

American Express Co. *v.* Iowa (196 U. S. 133).

Pabst Brewing Co. *v.* Crenshaw (198 U. S. 17).

Rosenberger *v.* Pacific Express Co. (241 U. S. 48).

However, it was also held that the right to receive liquor by an individual purchaser for his own use was not affected by the Wilson Act. See Vance *v.* W. A. Vandercook Co. (170 U. S. 438). Therefore the so-called Webb-Kenyon Act was passed in 1913, prohibiting the shipment of intoxicating liquor into any State where it might be sold or used in violation of the law of such State.

The Webb-Kenyon Act was also sustained by the Supreme Court of the United States in the case entitled James Clark Distilling Co. *v.* Western Maryland Railroad Co. (242 U. S. 311). The court again affirmed the doctrine of the Rahrer case in the following language (p. 330):

"As we have already pointed out, the very regulation made by Congress in enacting the Wilson law to minimize the evil resulting from violating prohibitions of State law by sending liquor through interstate commerce into a State, and selling it in violation of such law, was to devest such shipments of their interstate commerce character and to strip them of the right to be sold in the original package free from State authority which otherwise would have obtained. And that Congress had the right to enact this legislation making existing and future State prohibitions applicable was the express result of the decided cases to which we have referred, beginning with Re Rahrer (140 U. S. 545)."

From the cases heretofore cited, it is clear beyond argument that, so far as the Wilson Act provides a precedent for the proposed act, the constitutionality of the Wilson Act has been repeatedly sustained. Therefore the doctrine is thoroughly established that, as a measure of regulation of interstate commerce, Congress may pass a law devesting goods of their interstate character upon arrival in a State in such manner as to subject those goods immediately to the operation of the laws of the State, whether still contained in the original package or not.

II

The conclusions reached in the first section of this opinion, based on the Wilson Act and the opinions of the Supreme Court sustaining the constitutionality of that act, might be presented as a sufficient answer to the question of the constitutionality of the act now under discussion. In addition, however, it may be well to anticipate a possible effort to distinguish the opinions heretofore cited on the ground that the regulation of the liquor traffic is not comparable with the regulation of traffic in other commodities. It should be freely admitted at once that the exercise of power in the regulation of commerce in intoxicating liquors has been justified by the courts at times upon reasoning which would not apply to the regulation of commerce in other commodities.

For example, in a case previously cited, James Clark Distilling Co. *v.* Western Maryland Railroad Co. (242 U. S. 311), the opinion of the court (p. 332) reads as follows:

"The fact that regulations of liquor have been upheld in numberless instances which would have been repugnant to the great guaranties of the Constitution but for the enlarged right possessed by Government to regulate liquor has never that we are aware of been taken as affording the basis for the thought that Government might exert an enlarged power as to subjects to which, under the constitutional guaranties, such enlarged power could not be applied. In other words, the exceptional nature of the subject here regulated is the basis upon which the exceptional power exerted must rest and affords no ground for any fear that such power may be constitutionally extended to things which it may not consistently with the guaranties of the Constitution embrace."

When the regulation of the liquor traffic was cited in the Supreme Court as a basis for sustaining the Federal child labor law (the law prohibiting interstate transportation of certain child-labor products), the Supreme Court, in holding the child labor law to be unconstitutional, quoted the last sentence above quoted from the Clark Distilling Co. case and continued with the following comment:

"In each of these instances the use of interstate transportation was necessary to the accomplishment of harmful results. In other words, although the power over interstate transportation was to regulate, that could only be accomplished by prohibiting the use of the facilities of interstate commerce to effect the evil intended." (Hammer *v.* Dagenhart, 247 U. S. 251, 271.)

On the basis of the principles announced in the two opinions last quoted it may be urged that convict-made goods are not in themselves evil and that Congress would not have the same power to prohibit absolutely the transportation of convict-made goods, as it was held in the Clark Distilling Co., case that Congress had to prohibit the transportation of intoxicating liquors. Therefore it may be urged that Congress may not devest convict-made goods of their interstate character by such legislation as now proposed.

There are two principal reasons why the argument above anticipated is not well grounded. These reasons may be considered under two hearings: First, the reason why the Wilson Act decisions do apply, and, second, the reason why the child-labor decision does not apply.

THE WILSON ACT DECISIONS SUSTAIN THE PROPOSED LEGISLATION

It was not until the Supreme Court was asked to sustain the Webb-Kenyon law that the court found it necessary to hold that on account of "the exceptional nature" of intoxicating liquors, Congress could exercise "the exceptional power" of completely prohibiting interstate transportation. The Webb-Kenyon law not merely subjected liquor to the operation of State laws as a matter of intrastate commerce, but it prohibited the interstate transportation of liquor from a State into a State which prohibited the sale or use of liquor. Therefore the court found it necessary to uphold the power of Congress to prohibit absolutely the interstate transportation of liquor. The previous law (the Wilson Act) was not sustained upon the ground of the power of Congress to prohibit interstate transportation of liquor. On the contrary, the law essentially authorized such transportation, but provided that upon arrival, the goods transported should be immediately subject to the operation of the laws of the State of consignment. As the Supreme Court held in the concluding paragraph in the opinion of Wilkerson *v.* Rahrer, supra, "Jurisdiction (of the State) attached not in virtue of the law of Congress, but because the effect of the latter was to place the property where jurisdiction could attach." In other words, by the Wilson Act Congress did not prohibit interstate commerce. Any person could order liquor goods transported to him for his personal use. Any merchant could order liquor goods transported to him for sale. The law merely provided that, after interstate transportation had ceased, intrastate commerce should begin at once and be subjected, as all other intrastate commerce, to the laws of the State. The law merely provided that because goods might remain in the original package they should no longer retain that protection of interstate commerce which would permit of commercial transactions in violation of the laws of the State.

It will be seen at once that a far different question was presented when Congress, in the Webb-Kenyon Act, specifically provided "that the shipment or transportation" of liquors into States for use in violation of the laws of such States "is hereby prohibited."

THE CHILD LABOR DECISION DOES NOT APPLY TO THE PRESENT QUESTION

When the Supreme Court considered the Federal child labor law it had presented to it a question similar to that under consideration in its review of the Webb-Kenyon Act. But the child labor law went further than the Webb-Kenyon Act, because the child labor law prohibited all interstate commerce in the products of child labor produced under certain conditions. The Webb-Kenyon law only prohibited interstate transportation into certain States where the goods were to be sold or used in violation of the State laws. The child labor law prohibited interstate transportation absolutely without regard to whether the resultant intrastate commerce would be in accord with or in violation of the State laws.

It was argued in the child labor case that Congress had absolutely prohibited interstate commerce in lottery tickets, in impure foods and drugs, and in the transportation of women for immoral purposes; and, that in the Clark Distilling Co. case, the power of Congress had been sustained to forbid the transportation of intoxicating liquors. But the court held that in all these instances the power of Congress rests on "the character of the particular subjects dealt with" and "that the authority to prohibit is, as to them, but the exertion of the power to regulate." Then the court held that the products of child labor were "of themselves harmless"; that they were legitimate subjects of com-

merce and that the evil sought to be reached lay in the processes of production, which were "a matter of local regulation."

The fundation of the opinion of the majority in the case of Hammer *v.* Dagenhart, supra, holding that the products of child labor could not be excluded from interstate transportation is found in the following two paragraphs:

"The grant of power to Congress over the subject of interstate commerce was to enable it to regulate such commerce, and not to give it authority to control the States in their exercise of the police power over local trade and manufacture.

"The grant of authority over a purely Federal matter was not intended to destroy the local power always existing and carefully reserved to the States in the tenth amendment to the Constitution."

Thus it will be seen, particularly from the quotations just made, that the opinion of the Supreme Court holding the child labor law to be unconstitutional proceeded on the ground that Congress was seeking to interfere with the operation of State laws and was attempting to regulate by Federal law matters wholly within the authority of the individual States. Such an opinion and decision clearly can have little application to the reverse situation which is here presented, where Congress is seeking to relieve the States of any impediment to their exercise of an admitted power to regulate and control commercial transactions within the State and to pass laws necessary and proper in the exercise of the State police power.

III

One further principle may be briefly discussed in support of the proposed legislation. It may be suggested that convict-made goods are of such an "exceptional nature" that perhaps the prohibition by Congress of all interstate transportation might be justified. In the first place, it should be pointed out that the Federal child labor law was held unconstitutional by a majority of five justices against the vigorous dissent of four justices, and it is not to be assumed that the principles of that case, if hereafter maintained, will be further extended. The evils to be reached by the Federal child labor law were regarded primarily as evils in manufacture; that is, the employment of children at too early an age in dangerous industries and at unhealthful hours. The dissenting opinion of Mr. Justice Holmes appeals to the present writer as better law than the majority opinion, because evil may be found not merely in the quality of a thing but in the use to which it is put; and the evil may also be found in a thing which in itself may be good, because of the manner of its production. So that anyone with a fine moral sense may desire not to use a thing, good in itself, for the purpose of discouraging an evil method of production. In its regulation of interstate commerce it seems, therefore, that Congress may well prohibit the interstate transportation of goods when such interstate transportation is an aid to an evil in the sale, or an evil in the production.

But in any event it is clear that the Federal child labor law dealt with a production of goods by labor which in itself was not proscribed by public policy.

When we consider the question as to whether the facilities of interstate transportation should be open to the products of convict labor, we are dealing with goods of "an exceptional nature," because the labor which produced them is not free labor and there are no inherent rights of men in such labor subject to the normal protections of the Constitution. The Constitution prohibits the existence of involuntary servitude except as a punishment for crime. The provisions against deprivation of life, liberty, or property without due process of law found in the fifth and fourteenth amendments do not preserve for the convict any liberty to contract, or any right of property in his labor or the products of his labor. Other persons can not contract with the convict for his labor and thereby acquire rights of property.

It could hardly be questioned, if the labor of convicts was so utilized as to destroy the property of free men in their labor, or the property of others in the products of free labor, that prohibitions upon the use of convict labor could be imposed by any governmental power established and functioning to preserve the freedom of labor.

"There is no more important concern than to safeguard the freedom of labor upon which alone can enduring prosperity be based." (Bailey *v.* Alabama, 219 U. S. 219, 245.)

Without going into the subject exhaustively, it may be suggested that Congress, in exercising its power to regulate interstate commerce, can exercise the power to prohibit, following the minority opinion in the child-labor case. Also, Congress has the power to prohibit interstate commerce in articles which in themselves may be harmless (such as lottery tickets), but which are used in the promotion of an evil business. (Champion *v.* Ames, 188 U. S. 321.) This last statement follows the doctrine of the majority in the child-labor case, from which it seems to follow that Congress may protect interstate commerce in the products of free labor from the demoralizing influence of the competitive products of convict labor and may utilize prohibition as a means of preventing the development of interstate commerce in the products of what Congress may regard as an evil business; that is, the sale of convict-made goods.

It is not necessary to pursue this line of reasoning further, because we are not here considering a law to prohibit all interstate transportation of convict-made goods. It is merely pertinent to point out that since the precedents favor the constitutionality of such a drastic law there is an additional ground thus presented for holding that the proposed legislation now under consideration is entirely within the constitutional powers of Congress.

CONCLUSION

Having reviewed, with some care, the leading cases concerning the extent and proper exercise of the authority of Congress in the regulation of interstate commerce, it is my opinion that the pending bill proposes a valid exercise of that authority. The precedents established in the Wilson Act and in the cases referred to, wherein the Supreme Court of the United States sustained the constitutionality of that act, seem to me to be conclusive upon the question. In further support of this opinion, quotation may be made from an opinion of the Supreme Court of the State of Ohio on precisely the question now under consideration.

In holding an act of the Ohio Legislature void, which sought to regulate the sale of foreign convict-made goods, the supreme court of that State in Arnold *v.* Yanders (56 Ohio State 422), held in part, as follows:

"It is not competent for a State legislature to declare that convict-made goods are not articles of traffic and commerce, and then to act upon such declaration, and discriminate against such goods, or exclude them from the State by unfriendly legislation. Whatever Congress, either by silence or by statute, recognizes as articles of traffic and commerce, must be so received and treated by the several States. There is no act of Congress declaring that convict-made goods are not fit for traffic and commerce, and it therefore follows that such goods are the subject of commerce, and when transported from one State to another for sale or exchange, become articles of interstate commerce and entitled to be protected as such; and any discrimination against such goods in the State, where offered for sale is unconstitutional. That convict-made goods are articles of traffic and commerce is not only shown by the failure of Congress to legislate on the subject, but is conceded by the act in question; * * * As the act in question provides that it shall not affect products of the prisons of this State, the license fee of $500 is a tax or duty imposed by this act upon such goods when imported from another State, and is clearly a regulation of commerce among the States, and an attempt to exercise a power which belongs to Congress alone * * *. The mere silence of Congress is not sufficient to authorize a State legislature to legislate upon a subject vested by the Constitution in Congress, but such silence is to be regarded as evincing the intention of Congress that the power shall remain where the Constitution has placed it. To give a State legislature power to legislate in such cases, requires an act of Congress to that effect. (Leisy *v.* Hardin, 135 U. S. 100, 10 Sup. Ct. 681; Welton *v.* Missouri, 91 U. S. 275.)"

* * * * * * *

"But if we are in a condition to acquire such protection, the appeal for relief must be made to Congress, which body alone has the power to legally grant such relief. In re Rahrer, 140 U. S. 545, 11 Sup. Ct. 685."

Respectfully submitted.

DONALD R. RICHBERG.

FEBRUARY 7, 1928.

(William C. Breed, Henry H. Abbott, George W. Morgan, Dana T. Ackerly, James McV. Breed, Sumner Ford, Paris S. Russell, William J. Quinn, and John B. Nash)

NEW YORK, *June 7, 1928.*

Mr. PERRY S. NEWELL,
Secretary Association of Cotton
Textile Merchants of New York,
70 Worth Street, New York City.

Re: Hawes-Cooper convict labor bill.

DEAR MR. NEWELL: We write in reply to your letter of May 28, requesting an opinion as to the constitutionality of the measure known as the Hawes-Cooper convict labor bill (H. R. 7729). After a careful examination of the pertinent decisions of the United States Supreme Court we have reached the conclusion that this bill is clearly within the constitutional powers of Congress.

That court, in the case of In re Rahrer (140 U. S. 545), had under consideration an act almost identical in language, relating to transportation of intoxicating liquors in interstate commerce, and held it to be a valid and constitutional exercise of the legislative power conferred upon Congress. That ruling was not based upon the fact that the commodity involved was of an inherently vicious character but was broad enough to apply to any subject of interstate commerce. At page 562 the court said:

"No reason is perceived why, if Congress chooses to provide that certain designated subjects of interstate commerce shall be governed

by a rule which divests them of that character at an earlier period of time than would otherwise be the case, it is not within its competency to do so."

And at page 564 the court said further:

"Congress did not use terms of permission to the State to act, but simply removed an impediment to the enforcement of the State laws in respect to imported packages in their original condition, created by the absence of a specific utterance on its part. It imparted no power to the State not then possessed, but allowed imported property to fall at once upon arrival within the local jurisdiction."

That decision has been cited with approval in many subsequent Supreme Court cases and we do not find that its authority has been shaken in any way.

Another act of Congress in which substantially identical language was employed was the Lacey Act, which was designed to assist the States in *enforcing their* laws for the protection of game birds and animals and song birds. This act provided that the bodies of such birds and animals, when imported into a State, should become subject to the State laws upon arrival therein. The constitutionality of the act was attacked in a case which came before the New York Court of Appeals, and that court held it to be constitutional, which decision was affirmed by the United States Supreme Court, although the latter court did not find it necessary to pass upon the constitutional question. (People *v.* Hesterberg, 184 N. Y. 126; affirmed 211 U. S. 31.)

The only effect of a statute of this character, as was pointed out in Rosenberg *v.* Pacific Express Co., (241 U. S. 48, 51), is to subject the commodity in question to State control immediately after delivery to the consignee, instead of regarding it as still in the process of interstate commerce so long as it remains in the original packages in the hands of the consignee.

We think that this is clearly such a regulation of commerce among the several States as Congress is authorized to make under Article I. section 8, of the Federal Constitution, regardless of the character of the commodity affected, and that the Hawes-Cooper Act, if brought before the Supreme Court, would be held to be a valid exercise of the constitutional power of Congress.

Yours very truly,

BREED, ABBOTT & MORGAN.

STATEMENT OF HON. ALBERT C. OTTINGER, ATTORNEY GENERAL, STATE OF NEW YORK, 1928

The fact that large quantities of prison-made goods manufactured in the prisons of States adjacent to New York State are sold in the New York market despite the fact that none of our prison-made goods are sold on the open markets compels an official interest on the part of our State in the Hawes-Cooper bill now pending in Congress.

I consider as axiomatic the unfairness of this competition and the disastrous effect upon certain industries and many workers in our State from the dumping of these prisons' goods on the New York market. We have in this the precedent and the authority of what was formerly the department of labor of New York State which participated in the movement to bring similar legislation before Congress in 1910. Our State commissioner of labor at that time felt that he had an added sanction in participating in this movement in that the legislature in forming the bureau of labor statistics, out of which the department of labor grew, had had placed upon it as its primary duty the study and elimination of the unfair convict-labor competition, and it was as his advisor that Attorney General O'Malley was called in to assist in finding a legal solution to the problem.

Our participation at this time is to explain, first, the policy of New York State as enunciated by constitution and statute, and, second, to point out the bearing of this proposed legislation in the light of litigation which our department has conducted to ascertain the constitutionality of the statute requiring branding and licensing of convict-labor products.

The history of the provisions in the constitution and statutes of New York State is so comprehensive and in a way a basis for the consideration of the subject in other States that we take the liberty of submitting herewith a brief summary of such legislation.

This summary shows a continuous recognition of two somewhat conflicting principles which were ultimately harmonized into the present public policy of our State. The first of these is to attempt to provide work for the prisoners and revenue for the State for such work; the second, is the effort to prevent this work from interfering with or debasing free labor or free institutions. As early as 1808 we find that the legislature authorized the labor of convicts in the construction of fortifications. (Ch. 155, Laws 1808, 5 Webst. 336; and ch. 20, Laws 1809, 5 Webst. 445.) In 1822 it appointed a special committee to frame a comprehensive plan for convict labor. As a result of the scheme which was adopted by this committee, the mechanics of New York City, in 1831, complained of the construction of several buildings with stone from Sing Sing Prison where the polishing was done at a fraction of the cost of such work in the city. (Assem. Doc. 1831, No. 279.) By 1833 the State prison at Auburn, under its system of contract labor, was not only paying the expenses of its own maintenance but leaving a clear profit of over $8,000 to the State. (Assem. Doc. 1834, No. 352.) But this result was the cause of strenuous complaint from free labor, which took the form of petitions from associations of mechanics and manufacturers from every city and many other places in the State, showing the disastrous effects of competition with prison labor and submitting evidence in support of this contention. (Assem. Doc. 1834, No. 39.)

The result of these complaints was soon shown in legislation. In 1842 the legislature provided that when convicts were convicted and sentenced to State prisons, the court should ascertain whether they had learned any mechanical trades, and it was further provided that no convict should be permitted to work except at such mechanical trade as he had previously learned, or, "in the making or manufacture of articles for which the chief supply for the consumption of the country is imported from without the United States." (Ch. 148, Laws 1842.) This is an early recognition of the danger to free domestic labor from competition with convict labor.

By chapter 245, Laws of 1844, it was provided that a new State prison should be established for the purpose of employing convicts in mining and the manufacture of iron. This law contained the provision that there should be "no manufacture in said prison except of iron, and such articles therefrom as are imported from foreign countries, and not manufactured by mechanics of this State," with certain exceptions.

On the other hand, 20 years later, by chapter 458, Laws of 1866, it was provided that the inspectors of State prisons might employ convicts "in such manner and in such branches of industry and at such kind of labor as in the judgment of said inspectors shall be most advantageous to the interests of the State and not inconsistent with the health and welfare of said convicts or the good order and discipline of said prison." This seems to be a general grant of power to employ convicts in all branches of manufacture, subject only to the discretion of the inspector.

In 1876 a constitutional amendment was adopted creating the position of superintendent of State prisons, taking effect January 1, 1877 (Art. V, sec. 4, of the constitution). The duties of this official were specifically prescribed by the legislature in chapters 107 and 253 of the Laws of 1877, the latter chapter authorizing contracts for convict labor "at any kind of work or trade which shall be approved by the superintendent for the sale of property manufactured at the prisons," to be entered into by the agent and warden, subject to the approval of the superintendent. This was amended by the legislature by chapter 83, Laws of 1883, so as to provide that no contract for convict labor to be used for the manufacture or finishing of fur or wool hats should be made.

The next year, by chapter 21, Laws of 1884, the whole State policy was reversed by providing that no new contracts should be made and no old ones renewed or extended. In 1887, by chapter 323, the first act was passed requiring the branding of convict-made goods offered for sale. This law applied only to goods made in other States, but does not appear to have ever been attacked.

In 1888, by chapter 586, the policy of the State was again completely changed and all existing prison industries wiped out except where performed by hand labor. In the same law it was provided that the articles manufactured in the penal institutions of the State should be purchased by the other State institutions and that they should not be sold in the open market. A protected market for these goods was assured by providing that State institutions could not purchase from any other source articles which could be furnished by these penal institutions. The purpose of this law was apparently to prevent competition by prison labor with any of the organized free labor of the State, and this was sought to be accomplished by restricting the field of convict labor to hand labor in which women and children alone were largely engaged.

The very next year, by chapter 382, Laws of 1889, the entire plan was again overturned. It was provided by this law that although no contracts for letting out the labor or time of any prisoner at a price per day or any other period of time should be entered into, yet they should be permitted to labor either under the so-called public-account system or the piece-price system. Apparently no prohibition of the penal institutions to discontinue such employment if it appears that the total number of prisoners employed in such manufacture exceeds 5 per cent of the total number so employed within the State.

Following this, in 1894, a clause was inserted in the new constitution (art. 3, sec. 29, taking effect January 1, 1896) prohibiting the sale of prison-made goods in the State except for State institutions. The wording of this—

"SEC. 29. Prison labor; contract system abolished: The legislature shall by law provide for the occupation and employment of prisoners sentenced to the several State prisons, penitentiaries, jails, and reformatories in the State; and on and after the 1st day of January, 1897, no person in any such prison, penitentiary, jail, or reformatory shall be required or allowed to work while under sentence thereto at any trade, industry, or occupation, wherein or whereby his work, or the product or profit of his work, shall be farmed out, contracted, given, or sold to any person, firm, association, or corporation. This section shall not be construed to prevent the legislature from providing that convicts may work for and that the products of their labor may be

disposed of to the State or any political division thereof, or for or to any public institution owned or managed and controlled by the State or any political division thereof."

In the meantime, by chapters 698 and 699, Laws of 1894, two additional acts had been passed in reference to dealing with convict-made goods. By the former chapter it was made a misdemeanor to deal in goods made by convicts in any State other than New York without having the goods branded or marked with the words "convict made" and the date and place of making. Chapter 323, Laws of 1887, was repealed, this act being a substitute for its provisions.

By chapter 699, Laws of 1894, it was provided that the sale in this State of convict-made goods without a license constituted a misdemeanor. It contained almost the same provisions as continue to-day in the law, applying generally to all convict-made goods, and requiring an annual license fee of $500 to be paid to the State, which should be credited to the maintenance account of the State prisons.

In 1896 chapter 931 of the laws of that year amended the act requiring such goods to be branded or marked by leaving out the discrimination against other States and making it apply equally to the goods of this State. It had previously been held unconstitutional in the case of the People *v.* Hawkins (85 Hun. 43), and the amendment was intended to obviate the objections there held fatal by the court, to wit, the interference with interstate commerce.

In 1897, by chapter 415, the labor laws were codified and in section 50 the requirements of a license and the payment of a license fee were reenacted and amended so as to apply equally to goods manufactured within or without the State. These various laws have been incorporated in the consolidated labor law with virtually no further changes.

The purpose of this résumé of legislation has been to point out that throughout the century the State was confronted with two conflicting purposes—to earn revenue to support the penal institutions by the labor of convicts and to prevent such labor from competing injuriously with free workmen and free industries.

The statutes show a long-continued recognition by the legislature and the people of the State that a clear distinction exists economically between goods made by convicts and those manufactured by free labor and in free institutions. The nature of prison-made goods, as shown partly from an analysis of statutes already considered and partly from matters of judicial knowledge, is dangerous to the free manufacture of similar goods. Prison labor is a species of slave labor. By the fourteenth amendment to the Federal Constitution slavery and involuntary servitude are not prohibited when enforced as a punishment for crime. The economic situation, therefore, is identical with that which would arise in reference to slave-made goods. It is true that in many States now a system of remuneration for convicts is in vogue, but it is also true that this is not sufficient to make the products of their labor compete equally with those of free labor.

The principle, therefore, in the light of which all these statutes must be considered is that convict-made goods differ from similar articles manufactured by free labor not merely in that they have a different origin, but that they differ fundamentally in that they are virtually a product of slave labor. If this is borne in mind it will seem more justifiable than might appear at first glance that under the police power of the State the dealing in such goods should be limited and restricted for the protection of the labor of our free citizens and the capital invested in our free industries.

It will likewise be apparent that in the exercise of the taxing power of the State a proper classification would distinguish between dealers in these two classes of goods and compel those handling the products of the degraded labor to pay a license fee not charged to other dealers. The cost of production being so much lower, it is certainly only a fair classification which would impose a greater burden of taxation upon them.

In 1910 the Phillips-Raney case, reported in 198 New York 539, the court of appeals confirmed the lower court on the basis of conflicting with the interstate commerce clause of the United States Constitution. This judgment was affirmed upon the authority of People *v.* Hawkins (157 N. Y. 1) without passing on any of the other questions involved in such appeal.

The extension of the principles of the police power, according to the adjudications of our court of appeals during the last 20 years, has been marked, and it is possible that more weight would be given to the above argument if the case were tried to-day. But the precedent in our State remains against this contention. On the other hand, it is definitely pertinent to your consideration of the Hawes-Cooper bill, which is an enabling act to provide directly for the contingency above outlined, that the then attorney general of our State upon receiving the decision of the court of appeals in the Phillips-Raney case wrote the State commissioner of labor that in his opinion a Federal act similar to that which has been passed in reference to the sale of intoxicating liquors and the sale of wild game would go far, at least, toward rendering these sections of the labor law constitutional. Whether or not they would still be held unconstitutional on other grounds can, of course, not be determined in advance. It is probable that the passage of this bill would meet the difficulties presented in the Phillips-Raney case and make possible the enforcement of such restrictive provisions as are on the statute books of New York State. It was this informal opinion of the attorney general which impelled the New York State Department of Labor to be represented at a hearing before Congress in 1910 and advocate the passage of a similar enabling act.

We believe that in the light of these facts and in the hope of protecting the best interests of labor and manufacturers in New York State that it is proper for us to encourage now the passage by Congress of this enabling act as outlined in the Hawes-Cooper bill.

LEGALITY OF H. R. 7729 AS STATED BY CONGRESSMAN WILLIAM F. KOPP, CHAIRMAN OF THE LABOR COMMITTEE OF HOUSE OF REPRESENTATIVES, SUPPORTING THE HAWES-COOPER BILL

Mr. KOPP. Mr. Chairman, the Committee on Labor had full and complete hearings on this bill. Many manufacturers and representatives of labor appeared before the committee in favor of the bill. The Federation of Women's Clubs, through their representatives, also appeared before the committee on behalf of the bill. Special opportunity was given to the opponents of the bill to be heard. The committee was particularly anxious to hear every objection that could be urged. Most of those who appeared against the bill were connected in some manner with the management of prisons.

In the consideration of this bill we are confronted by two major questions. First, is the policy of the bill sound? Second, is the bill constitutional? On account of my limited time I shall confine myself to the second question.

It is no doubt true that this bill, if enacted into law, will be assailed in the courts on the ground that it is unconstitutional. It was urged before the committee that the bill was unconstitutional, and I presume a similar claim will be made here on the floor. In my judgment, however, this bill is constitutional, and I fully believe that if it ever comes before the Supreme Court of the United States it will be sustained by that high tribunal.

Before proceeding further, however, permit me to suggest that simply because some one questions the constitutionality of a bill is not a sufficient reason for voting against it. True, no Member should vote for a bill which he himself regards as unconstitutional, but if a bill embodies your convictions and you believe it is constitutional, you should not hesitate to vote for it, whatever others may do. Nothing is conjured up more often or more readily by those opposed to a bill than a doubt as to its constitutionality. Practically every progressive piece of legislation has been attacked upon that ground. Bear in mind also that if a bill is defeated here there is no way in which it can be brought before the Supreme Court of the United States to have its constitutionality determined.

You are all familiar with what is known as the commerce clause of the Constitution of the United States. This clause provides that Congress shall have power—

"To regulate commerce with foreign nations and among the several States."

Many learned dissertations have been written on this clause. Numerous decisions have construed it, but it is still open to discussion and probably will be debated as long as our Government survives. I do not claim that I can throw any new light on this important and much-discussed subject. All I can hope to do is to call your attention to a few important decisions and indicate to you the bearing that these decisions, as it appears to me, have upon the bill now under consideration. First, permit me to call particular attention to the terms of this bill. It defines no crimes and provides no penalties. No appropriation is required to carry it into effect. It simply divests prison-made goods of their interstate character and makes them subject to the laws of the different States to the same exent and in he same manner as though such goods had been manufactured in such States.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. KOPP. Yes.

Mr. GARBER. Does the gentleman make any provision to disclose the identity of the goods? Is there any machinery set up in the bill to reveal the character of the goods?

Mr. KOPP. No. That all depends on State legislation. This is simply an enabling act.

As you are well aware, by the tenth amendment all powers not delegated to the United States nor prohibited to the States are reserved to the States, respectively, or to the people. This amendment has often been invoked in attacking the constitutionality of an act of Congress. Again and again it has been claimed that Congress has trespassed upon the reserved powers of the States. No such claim, however, can be made here. Under this bill Congress instead of taking away the reserved powers of the States protects them most fully. While the bill does not delegate any powers to the States, it does, in fact, give certain State laws a broader application. This bill, if passed, will be an enabling act for the States.

Quite a number of States have passed laws regulating the sale of convict-made goods. The most common requirement has been the marking or branding of convict-made goods before offering them for sale. All of these laws have been held unconstitutional as to convict-made goods shipped in from other States. Thus the only effect of these laws has been to restrict the sale of those convict-made goods manufactured in the

State where sold. The States have been, and are to-day, helpless against the convict-made goods shipped in from other States. This bill will enable the States to regulate the sale of prison-made goods shipped in from other States, as well as those manufactured or produced within their own borders.

The history of the enabling act upon which this bill is based is an interesting one. The question as to its constitutionality came before the Supreme Court of the United States in passing upon the Wilson law, which went into effect on August 8, 1890. Iowa had adopted prohibition by statute, but the Federal courts held that as long as intoxicating liquors were in the original packages they could nevertheless be sold within the State. Senator Wilson, of Iowa, introduced a bill to remedy the situation and this bill after being vigorously attacked as unconstitutional was passed and became a law.

The terms of this bill were as follows:

"*Be it enacted, etc.*, That all fermented, distilled, or other intoxicating liquors or liquids, transported into any State or Territory, or remaining therein for use, consumption, sale, or storage therein, shall upon arrival in such State or Territory be subject to the operation and effect of the laws of such State or Territory enacted in the exercise of its police powers, to the same extent and in the same manner as though such liquids or liquors had been produced in such State or Territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise."

The Wilson law was quickly attacked in the courts. Kansas at the time also had a prohibitory law. A citizen of that State made a sale of intoxicating liquors in original packages shipped from Kansas City, Mo. He was arrested under the State law and immediately applied to the United States Circuit Court for a writ of habeas corpus. The case went to the Supreme Court of the United States and there the law was fully sustained. (In re Rahrer, 140 U. S. 545.) Said the court:

"It does not admit of argument that Congress can neither delegate its own powers nor enlarge those of a State. This being so, it is urged that the act of Congress can not be sustained as a regulation of commerce. * * *

"Congress has not attempted to delegate the power to regulate commerce, or to exercise any power reserved to the States, or to grant a power not possessed by the States, or to adopt State laws. It has taken its own course and made its own regulation, applying to these subjects of interstate commerce one common rule, whose uniformity is not affected by variations in State laws in dealing with such property.

"The principle upon which local option laws, so called, have been sustained is that while the legislature can not delegate its power to make a law, it can make a law which leaves it to municipalities or the people to determine some fact or state of things upon which the action of the law may depend; but we do not rest the validity of the act of Congress on this analogy. The power over interstate commerce is too vital to the integrity of the Nation to be qualified by any refinement of reasoning. The power to regulate is solely in the General Government, and it is an essential part of that regulation to prescribe the regular means for accomplishing the introduction and incorporation of articles into and with the mass of property in the country or State. (12 Wheat. 448.)

"No reason is perceived why, if Congress chooses to provide that certain designated subjects of interstate commerce shall be governed by a rule which divests them of that character at an earlier period of time than would otherwise be the case, it is not within its competency to do so."

The bill we are now considering was patterned after the Wilson law. All it seeks to do is to divest convict-made goods of their interstate character earlier than would otherwise be the case. If the Wilson law was constitutional, why is not this bill constitutional?

After the Wilson law had been enacted and had been held to be constitutional the prohibition States found that one important difficulty in enforcing the prohibitory laws still remained. By reason of the Wilson law it was no longer legal to sell liquor in the original package in prohibition States, but it was still legal to ship liquor in the original package to residents of prohibition States.

In order to make that impossible the Webb-Kenyon bill was passed during the closing days of the third session of the Sixty-second Congress. This law entirely prohibited the shipment of liquor into prohibition States.

At the time the bill was passed William H. Taft, now Chief Justice of the United States Supreme Court, was President, and George W. Wickersham was Attorney General. When the bill reached President Taft, Attorney General Wickersham submitted to the President a strong opinion against the constitutionality of the bill and President Taft, after very full consideration, vetoed the bill upon that ground. The bill was passed over the veto of the President and became a law. In due time it was brought to the attention of the Supreme Court of the United States. By that body, through Chief Justice White, it was held to be constitutional.

I shall refer to the opinion itself, but before taking that up let me refer to the veto of President Taft. In his veto he anticipated what the law would be in case the Webb-Kenyon law was sustained. You will find this language in his veto message:

"If Congress, however, may in addition entirely suspend the operation of the interstate-commerce clause upon a lawful subject of interstate commerce and turn the regulation of interstate commerce over to the States in respect to it, it is difficult to see how it may not suspend interstate commerce in respect to every subject of commerce wherever the police power of the State can be exercised to hinder or obstruct that commerce."

Attorney General Wickersham also recognized that if the Webb-Kenyon law was sustained it would broaden the powers of Congress beyond his previous conception. The closing paragraph of his opinion was as follows:

"The proposition begs the whole question under consideration and can only be conceded if it be held that Congress can abdicate entirely its power over interstate commerce in an article which it does not itself declare to be 'an outlaw of commerce,' but which it leaves to the varying legislation of the respective States to more or less endow with qualities of outlawry."

The decision sustaining the Webb-Kenyon law was rendered in Clark Distilling Co. *v.* Western Maryland Railway Co. (242 U. S. 311). I have not the time to quote at length from the opinion of the court, but I do want to call your attention to one statement. Said the court:

"Reading the Webb-Kenyon law in the light thus thrown upon it by the Wilson Act and the decisions of this court which sustained and applied it, there is no room for doubt that it was enacted simply to extend that which was done by the Wilson Act; that is to say, its purpose was to prevent the immunity characteristic of interstate commerce from being used to permit the receipt of liquor through such commerce in States contrary to their laws."

President Taft became Chief Justice Taft, and in Brooks *v.* United States (267 U. S. 432), decided in 1925, as Chief Justice, he referred to the decision in Clark Distilling Co. against Western Maryland Railway Co. and thus interpreted that decision:

"In Clark distilling Co. *v.* Western Maryland Railway Co. (242 U. S. 311) it was held that Congress had power to forbid the introduction of intoxicating liquors into any State in which their use was prohibited in order to prevent the use of interstate commerce to promote that which was illegal in the State."

To my mind, the real question to be determined, if this bill is enacted into law, will not be whether it is constitutional but whether the State laws in reference to convict-made goods are constitutional. We have 48 States. Many different laws may be passed in the regulation of convict-made goods. At this time there are quite a number of such laws on the statute books of the States. Some States require a license to sell convict-made goods; others that a merchant selling convict-made goods must put up a sign in large letters advising the public of such fact. One State, I believe, provides that the goods made by convicts must be sold for not less than the wholesale price of similar goods. The most general provision is the one that requires convict-made goods to be marked or branded before being offered for sale. The Wilson law, though sustained, did not give life to an unconstitutional State law. It only made State laws, that were valid as to intrastate liquors, valid and effective as to interstate liquors. This bill, if enacted into law, can never make valid and effective as to interstate shipments of convict-made goods any laws which are not valid and effective as to intrastate convict-made goods. No one need fear that by this bill we can breathe life into an unconstitutional State law. No such result can possibly follow, for if a State law is invalid as to intrastate goods it will also be invalid as to interstate shipments of goods. The very language of this bill says that interstate shipments of convict-made goods shall be subject to the laws of any State "to the same extent and in the same manner as if such goods, wares, and merchandise had been manufactured, produced, or mined in such State or Territory." If this bill is passed the real battle will not be over its constitutionality but over the constitutionality of the different State statutes that may be passed on the subject of convict-made goods. If this bill is passed it will be held applicable to every constitutional State law and inapplicable to every unconstitutional State law.

It may be claimed that States can not pass any constitutional and valid statutes regulating the sale of convict-made goods and that, therefore, to pass this bill will prove to be useless and futile. I doubt whether anyone will take such an extreme position, but lest some one may do so I shall say a few words on this point.

That convict-made goods are a real problem has been recognized by Congress for many years. The importation of foreign convict-made goods is absolutely prohibited. Out statute on that subject provides that—

"all goods, wares, articles, and merchandise manufactured, wholly or in part, in any foreign country by convict labor shall not be entitled to entry at any of the ports of the United States, and the importation thereof is prohibited."

Though protected by a high tariff, we yet provide that under no circumstances shall foreign convict-made goods be permitted to enter

our markets. Why? Because we recognize that they are a menace to our people.

In State *v.* Hawkins (157 N. Y. 1) the Court of Appeals of New York passed upon a statute requiring that all convict-made goods, including those shipped in from other States, be branded before being exposed for sale. The defendant was convicted under this statute and his case finally reached the court of appeals. The particular goods which this defendant had exposed for sale had been made by convicts in Ohio and had been shipped into New York from that State. The New York court held that the statute was in conflict with and repugnant to the commerce clause of the Federal Constitution, and for that reason invalid.

Judge O'Brien, who wrote the majority opinion, personally went further and also held the statute to be unconstitutional on the further ground that it was an unauthorized limitation of the freedom of the individual to buy and sell articles of merchandise. No other judge, however, concurred in the latter view. One of the dissenting judges was Alton B. Parker, who was chief justice at the time, and who afterwards, as you all know, became a candidate for President. Judge Parker, in referring to the statute requiring the branding of prison-made goods before being exposed for sale, said in his dissenting opinion:

"It simply requires that prison-made merchandise shall be so branded that our citizens shall know where the goods they are buying were made. This they have a right to know."

Judge Bartlett also rendered a dissenting opinion, and, among other things, said:

"The precise question, then, is whether it is competent for this State, in the exercise of the police power, in order to promote the public welfare and prosperity, to impose the restriction, already pointed out, upon the sale of convict-made goods.

"I am of the opinion that it is for two reasons: (1) It is self-evident that the protection of free labor from competition with convict-made goods in our domestic markets will promote the public welfare and prosperity; and (2) it is competent for the State to protect its citizen from fraud or deception when any such goods are offered for sale, by advising him of the fact that they are convict made, so that he may act with full knowledge in the premises."

Only one of the seven judges then serving upon the Court of Appeals of the State of New York regarded this statute as unconstitutional because it restricted the freedom to buy and sell.

There seems to be an impression that the decisions in the child-labor cases in some way have a bearing upon this bill and make it probable that this bill, if enacted into law, will not be held constitutional. An examination of the child-labor cases will clearly show to anyone that they have no application whatever in this case.

The first child-labor decision is found in Hammer *v.* Dagenhart (247 U. S. 251). An act had been passed by Congress prohibiting the transportation in interstate commerce of goods made at a factory in which, within 30 days prior to their removal therefrom, children under 14 years of age had been employed or permitted to work, or children between the ages of 14 and 16 had been employed or permitted to work more than 8 hours in any day or more than 6 days in any week, or after the hour of 7 p. m. or before the hour of 6 a. m. A bill was filed by a father upon his own behalf and as next friend for his two minor sons, who were within the age limit fixed in the law, to enjoin the enforcement of the act on the ground that it was invalid. The act was held unconstitutional because it invaded the powers reserved to the States. That decision can have no application to this bill, for this bill certainly does not invade the powers reserved to the States. The decision in Hammer against Dagenhart teems with defenses of the reserved powers of the States. I quote briefly from the opinion written by Justice Day:

"In interpreting the Constitution, it must never be forgotten that the Nation is made up of States to which are intrusted the powers of local government and to them and to the people the powers not expressly delegated to the National Government are reserved * * *. The power of the States to regulate their purely internal affairs by such laws as seem wise to the local authority is inherent and has never been surrendered to the general movement * * *. To sustain this statute * * * would sanction invasion by the Federal power of the control of a matter purely local in its character."

The court was divided. The majority held that the articles manufactured by child labor were not at the time a part of interstate commerce, but were simply intended for interstate commerce, and for that reason subject only to local regulation. The majority, however, clearly recognized the complete control of Congress over interstate transportation.

Let me quote further from Justice Day:

"Over interstate transportation, or its incidents, the regulatory power of Congress is ample, but the protection of articles intended for interstate commerce is a matter of local regulation."

The dissenting opinion, written by the venerable Justice Holmes and joined in by three other justices, also clearly recognized the power of Congress over interstate commerce. Said Justice Holmes:

"Congress is given power to regulate such commerce in unqualified terms. It would not be argued to-day that the power to regulate does not include the power to prohibit. Regulation means the prohibition of something, and when interstate commerce is the matter to be regulated I can not doubt that the regulation may prohibit any part of such commerce that Congress sees fit to forbid."

What could be stronger than this language used by Justice Holmes?—

"When interstate commerce is the matter to be regulated I can not doubt that the regulation may prohibit any part of such commerce that Congress sees fit to forbid."

The opinion in the second child-labor case, known as the Child Labor Tax case (259 U. S. 20), was rendered in 1922, and was written by Chief Justice Taft. In order to avoid the constitutional question raised in the first child-labor case, a new law was enacted in 1919 imposing a tax on the employment of child labor.

Chief Justice Taft said that in this case, as in the previous child-labor case, Congress undertook to pass a law on a matter purely within the authority of the States, and therefore declared the law invalid. There was no suggestion in either of these child-labor cases that Congress could not make State laws applicable to interstate commerce; but both of the decisions were based upon an entirely different proposition, namely, that Congress could not take away powers from the States that were reserved to them by the Constitution.

In conclusion, I again ask you to bear in mind that the only effect of this bill will be to divest convict-made goods of their interstate character at an earlier period than would otherwise be the case. I again call your attention to the opinion of the Supreme Court of the United States in the Rahrer case, in which that court, speaking through Chief Justice Fuller, said unequivocally and without limitation:

"No reason is perceived why, if Congress chooses to provide that certain designated subjects of interstate commerce shall be governed by a rule which divests them of that character at an earlier period of time than would otherwise be the case, it is not within its competency to do so."

Congress can not reverse the Supreme Court; that body is the final authority on constitutional questions. It has spoken definitely and conclusively on the very matter now in issue here. Therefore I submit that this bill is constitutional and that it will be sustained if enacted into law.

Constitutional Argument of Congressman Hatton Sumners, of Texas, in Support of the Hawes-Cooper Bill

Mr. Sumners of Texas. Mr. Chairman, ladies, and gentlemen, it seems to me that there is considerable confusion as to just what is proposed by this bill. This bill does not deal with prison policy. It is not concerned with the working of prisoners at all, or with the policy which should control in the sale and use of prison-made goods. Congress has dealt with the subject in so far as the Federal prisons are concerned, and has provided that the products of Federal prisons shall be consumed by the Federal Government. The sole proposition contained in this bill is to give to each State the right to effectuate its policy with regard to prison-made goods by making prison goods shipped into each State subject to the same police regulation exercised by the State over its own prison productions. What is wrong with that? I agree with my friend from Wisconsin [Mr. Schafer] who has just spoken. I can not understand how one who, believing in the right and in the necessity of the State to govern in matters of domestic concern, can withhold his vote from a proposition which puts the power of control without discrimination within the States. If the State of Texas or the State of Alabama or the State of Massachusetts wants to admit convict-made goods, there is nothing in this legislation to prohibit it; but if a sovereign State, speaking through its legislature, fixes a domestic policy, I ask what right has citizens of another State, from beyond the borders of that State, to ship into the State and sell over the protest of the people of the State commodities which may not be sold under the same conditions if produced by citizens of that State? That is the proposition. All that ever could be asked under the home philosophy and the general plan of the Union is that no State discriminate in favor of its citizens against citizens of other States.

In my statements thus far I have been dealing with the question of governmental policy. The gentleman's question is addressed to the matter of power, and that is the next question that I want to discuss, the power of Congress to enact this bill into law. When we formed the Union there were 13 independent nations which had the power to do anything and everything within the province of government not prohibited by their respective constitutions. When those States met through their representatives in the Federal Constitutional Convention they created an agency, the Federal Government, to do certain things for them. All the legislative powers of government, including the broad police power of the States, are vested either in the legislatures of the States, the Congress, or reserved to the people.

No power now to be considered as related to that power is reserved to the people. All governmental power dealing with the transportation and the status of convict-produced articles lies either with the State legislatures or with the Congress. When the States in constitutional convention delegated certain powers to the Federal Government with reference to interstate commerce, a matter with reference to which the

States had full power before the delegation and which powers were to be exercised by the Congress they did not intend, nor did they, to use an expression, "hog tie" themselves or lose some of these powers in the transmission so that the will of the people of the States with regard to this matter can not be effectuated through the Congress and the legislatures of those States. We are dealing with the question of power now. This is not a naval proposition. Congress enacted the Wilson bill. When you examine the Wilson bill and examine this bill you will find that in principle, in policy, and in language they are almost identical. I shall incorporate the Wilson bill in my remarks at this point and also the bill under consideration.

"THE WILSON BILL—LAWS RELATING TO INTERSTATE SHIPMENT OF INTOXICATING LIQUORS

"Commerce in liquors between the States

"An act to limit the effect of the regulations of commerce between the several States and with foreign countries in certain cases

"*Be it enacted, etc.*, That all fermented, distilled, or other intoxicating liquors or liquids transported into any State or Territory or remaining therein for use, consumption, sale, or storage therein shall, upon arrival in such State or Territory, be subject to the operation and effect of the laws of such State or Territory enacted in the exercise of its police powers to the same extent and in the same manner as though such liquids or liquors had been produced in such State or Territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise.

"Approved, August 8, 1890."

The bill under consideration:

"*Be it enacted, etc.*, That all goods, wares, and merchandise manufactured, produced, or mined, wholly or in part, by convicts or prisoners, except paroled convicts or prisoners, or in any penal and/or reformatory institutions, transported into any State or Territory of the United States and remaining therein for use, consumption, sale, or storage, shall upon arrival and delivery in such State or Territory be subject to the operation and effect of the laws of such State or Territory to the same extent and in the same manner as though such goods, wares, and merchandise had been manufactured, produced, or mined in such State or Territory, and shall not be exempt therefrom by reason of being introduced in the original package or otherwise.

"SEC. 2. This act shall take effect two years after the date of its approval."

I want now to direct your attention to the decision of the Supreme Court on the Wilson bill. There are just two passages in that decision that I wish to direct your attention to. The Supreme Court in passing upon the Wilson bill said, in regard to Congress enacting the legislation:

"In so doing Congress has not attempted to delegate the power to regulate commerce or to exercise any power reserved to the States, or to grant any power not possessed by the States, or to adopt a State law."

And here is another significant statement of the Supreme Court with reference to the Wilson bill, and this is common sense and good law:

"The framers of the Constitution never intended that the legislative power of the Nation should find itself incapable of disposing of a subject matter specifically committed to its charge."

That is the point I make.

The court said further:

"The manner of that disposition brought into determination in this record involves no ground for adjudging the act of Congress inoperative and void."

If that was true as to the Wilson bill, it is true as to this bill.

The question here is not whether convicts should labor or not; it is not a question whether the several States should permit the labor of their own convicts to come into competition with free labor within their respective borders; it is not whether a sovereign State, willing to receive the products of the convicts of other States, may not do so if it wants to. It is solely a question as to whether a State shall be compelled to receive and have sold within its borders articles of commerce which its own citizens could not sell under the same circumstances. It is a question whether an outsider, over the protest of a sovereign State, shall be permitted to enter it with his goods and to defy and hold in contempt the public policy which the people of that State may have fixed for their government. The question is, Shall Members of Congress, professing to believe in the right of a State to govern its domestic affairs and fix its police policies, deny to the State the right to do it? That is the question. That is the only question.

REPORT OF THE FEDERAL TRADE COMMISSION AND CEASE AND DESIST ORDER OF THAT COMMISSION AGAINST THE COMMONWEALTH MANUFACTURING CO., A PRISON CONTRACTOR

UNITED STATES OF AMERICA BEFORE FEDERAL TRADE COMMISSION

At a regular session of the Federal Trade Commission, held at its office in the city of Washington, D. C., on the 25th day of June, A. D. 1927.

Present: C. W. Hunt (chairman), William E. Humphrey, Abram F. Myers, J. F. Nugent, Edgar A. McCulloch, commissioners.

In the matter of Commonwealth Manufacturing Co. and Harry Dushoff, doing business under the trade names and styles Harry Dushoff & Co. and Chicago Manufacturing Co. Docket No. 1367. Findings as to the facts and conclusion.

Pursuant to the provisions of an act of Congress approved September 26, 1914, the Federal Trade Commission issued and served an amended complaint upon the respondents Commonwealth Manufacturing Co., a corporation, and Harry Dushoff, doing business under the trade names and styles Harry Dushoff & Co. and Chicago Manufacturing Co., charging them with the use of unfair methods of competition in commerce in violation of the provisions of said act. Respondents having failed to file their answers herein to said amended complaint, hearings were had upon due notice thereof to respondents, and evidence and testimony were thereupon introduced in support of the allegations of said amended complaint before a trial examiner of the Federal Trade Commission theretofore duly appointed, upon which evidence and testimony respondents elected to stand without thereafter availing themselves of full opportunity which was given them to file briefs and present oral argument before the commission in opposition to the charges of said amended complaint.

Thereupon this proceeding came on regularly for decision; and the commission having duly considered the record and being now fully advised in the premises makes this its findings as to the facts and conclusions drawn therefrom:

FINDINGS AS TO THE FACTS

PARAGRAPH 1. Respondent Commonwealth Manufacturing Co. is a corporation organized in July, 1921, under and existing by virtue of the laws of the State of Illinois, with its branch office and place of business in the city of Chicago in said State. Its business is and has been the selling and distributing of prison-made products to wholesale and retail dealers and consumers throughout the United States. Said products and the respective periods during which respondent corporation marketed the same are as follows: Men's shirts, sold and distributed at all times since the date of respondent corporation's organization as aforesaid; binder twine, sold and distributed during the years 1921, 1922, and 1923; and shoes, sold and distributed for about three years next preceding July, 1925. In addition to carrying on business under its corporate name part of respondent corporation's shirt business is and for more than three years last past has been conducted under the trade name and style of "Chicago Manufacturing Co." The authorized capital stock of said corporation is $50,000, only $5,000 of which has been issued and is outstanding, all of which outstanding stock is held by respondent Harry Dushoff, its president, except two shares, one of which is held by each of two individuals for the purpose only of enabling them to qualify as directors of the corporation.

PAR. 2. Respondent Harry Dushoff is an individual having his office and place of business in the city of Chicago, State of Illinois, and has been engaged ever since prior to July, 1921, in the business of selling and distributing to wholesale and retail dealers and consumers throughout numerous States of the United States prison-made shirts; and during the years 1921 and 1922 prison-made binder twine. He also has since the date of its organization managed and controlled the affairs, business, and policies of respondent corporation, Commonwealth Manufacturing Co. Respondent Dushoff conducted his said unincorporated business of selling and distributing shirts and binder twine under the trade name and style "Harry Dushoff & Co." to and until June, 1922. Thereafter and for more than three years last past he conducted, and is still conducting, his said shirt business under the trade name and style "Chicago Manufacturing Co."

PAR. 3. At all times in the course and conduct of said businesses, respondents Commonwealth Manufacturing Co. and Harry Dushoff solicited trade and orders for their products through and by means of circular letters, price lists, and similar trade literature, which they mailed from time to time to their customers and prospective customers throughout several States; and also through and by means of traveling salesmen, about 10 in number, whom respondents employed on a commission basis, and who on behalf of respondents called upon and solicited trade from customers and prospective customers throughout numerous States and offered for sale and sold said products of respondents. In distributing and supplying said products to their customers, respondents caused said merchandise to be transported in commerce from Michigan City, Ind., the place of manufacture, through and into other States of the United States, to the respective purchasers thereof in such other States; and in so carrying on their business respondents are and were at all times herein mentioned in direct active competition with many other persons, partnerships, and corporations similarly engaged in selling and distributing similar products in commerce between and among various States, particularly those States into which respondents sold and distributed their products.

PAR. 4. Said businesses of respondent corporation, Commonwealth Manufacturing Co., and respondent Harry Dushoff are conducted jointly and as a single unit by and under the active management and control of respondent Harry Dushoff. The place of business, equipment, and employees of respondent corporation and of respondent Dushoff are identical. They occupy office space of about 15 feet by 20 feet and employ

two clerical assistants besides aforesaid traveling salesmen. Only one set of books is kept of the businesses of both respondents.

PAR. 5. Throughout the operation of their binder-twine business during the years 1921, 1922, and 1923, as aforesaid, respondents' combined sales of such binder twine amounted to 18,000 to 20,000 pounds per year, which was sold and distributed by them to dealers, farm organizations, and farmers throughout several States, particularly the States of Kansas and Minnesota. At all times in the offering for sale, selling, and distributing of said binder twine to their customers respondent Harry Dushoff, trading under the trade name and style Harry Dushoff & Co., and respondent Commonwealth Manufacturing Co., acting under the domination, management, and control of respondent Dushoff, used and carried on such business with order forms, letterheads, billheads, shipping tags, and other business stationery containing the following representations set forth in large and conspicuous lettering, to wit:

"Harry Dushoff & Co., manufacturers and distributors of binder twine. Manufacturers and distributors of standard and sisal twine. Mills, Michigan City, Ind.

"Commonwealth Manufacturing Co., manufacturers and distributors of binder twine. Manufacturers and distributors of standard and sisal twine. Mills, Michigan City, Ind. Buy direct. Commonwealth Manufacturing Co."

In truth and in fact neither of said respondents has ever manufactured binder twine, and in carrying on said binder-twine business they were in fact dealers or middlemen, and not the manufacturers thereof. Said binder twine was manufactured by the State of Indiana in the Indiana State Prison, Michigan City, Ind., and with the labor of the prisoners there incarcerated. Respondents purchased said twine from the State of Indiana and resold and distributed same to their customers. The aforesaid statements and representations on respondents' letterheads, order blanks, billheads, shipping tags, and other business stationery were and are false, and their use as set forth above had the capacity and tendency to mislead and deceive purchasers of said twine into the erroneous belief that said respondents were the manufacturers of said twine and that in buying from said respondents they were buying directly from the manufacturer and thereby eliminating and saving the costs and profits of middlemen; and to thereby cause said purchasers to purchase said twine in such belief.

PAR. 6. The shoe business of respondent Commonwealth Manufacturing Co. was carried on for the space of about three years next preceding July, 1925, under the management, domination, and control of respondent Harry Dushoff. Throughout said period respondent corporation's sales of said shoes were made in the name "Commonwealth Manufacturing Co." to jobbers, department stores, and so-called Army and Navy goods stores throughout numerous States of the United States at the rate of from 50 to 60 pairs per day. In offering for sale, selling, and distributing said shoes respondent corporation used letterheads, invoices, order forms, shipping tags, and other business stationery containing the following representations in conspicuous lettering, to wit:

"Commonwealth Manufacturing Co. Manufacturers and Distributors. Shoe Department."

Neither of the respondents has ever been the manufacturers of shoes. The shoes dealt in by respondent corporation as aforesaid were manufactured by the State of Indiana in the Indiana State Prison, Michigan City, Ind., and with the labor of prisoners there incarcerated by said State. Said shoes were sold by the warden of said prison to respondent corporation, which in reselling and distributing them to its customers as aforesaid was in truth only a dealer or middleman. The use by respondents of said corporate name Commonwealth Manufacturing Co. with or without said other representations and assertions, all as set forth in this paragraph above, was false and misleading and had the capacity and tendency to mislead and deceive the purchasing public into, and to cause said purchasers to buy said shoes in, the erroneous belief that respondent corporation was the manufacturer thereof and that in so buying from respondent corporation they were purchasing said shoes directly from the manufacturer and thereby eliminating and saving the costs and profits of middlemen.

PAR. 7. In carrying on and conducting said shirt business respondent Dushoff, trading under the name and style of Chicago Manufacturing Co., and respondent Commonwealth Manufacturing Co., acting under the management and control of respondent Dushoff, sold and are selling jointly from 40,000 to 50,000 dozen shirts per annum. At all times in conducting said shirt business both respondents held themselves out to their customers and prospective customers as the manufacturer of said shirts, and offered for sale, sold, and distributed said shirts in the corporate name "Commonwealth Manufacturing Co." and in the trade name "Chicago Manufacturing Co."; and in circular letters, pamphlets, leaflets, letterheads, billheads, invoices, and other business stationery respondents caused the following representations and assertions to be set forth prominently and conspicuously:

"Commonwealth Manufacturing Co. Manufacturers. Shirt department. Factory, Michigan City, Ind."

"Chicago Manufacturing Co. Not incorporated. Manufacturers of work shirts."

"Special offer of high-grade work shirts at a low price. Buy direct from the manufacturer, $6.50 per dozen, f. o. b. factory. Commonwealth Manufacturing Co."

Said shirts sold by respondents were manufactured by the State of Indiana in the Indiana State Prison, a penal institution of said State located at Michigan City, Ind. In a factory building owned by it, and within the walls of said prison, said State operates a shirt factory under its direct and absolute control and with the labor of the prisoners there incarcerated. Said State is and has been for many years last past engaged in manufacturing, in and by such factory and with such prison labor, large quantities of shirts. Said shirts are, in accordance with the laws of the State of Indiana, used primarily to supply the needs of the public institutions of the State of Indiana, numbering some 22. The surplus of the shirts so manufactured, above and beyond the requirements of said State institutions, is sold by the warden of said State prison in the open market, and the shirts dealt in by respondents are and were sold and supplied by said warden to respondents from such surplus. Respondents pay said State for their shirts a certain stated price in cash and furnish some sewing machines, which the State uses to augment its other manufacturing machinery, and also furnish some cloth and trimmings, which are manufactured by the State into shirts. Neither of respondents is nor has either ever been the manufacturer of the shirts sold by them as aforesaid. They do not own, control, or operate a shirt factory.

PAR. 8. Respondents' representations that they are the manufacturers of the shirts sold by them and their use of the names "Commonwealth Manufacturing Co." and "Chicago Manufacturing Co.," with or without said other statements and representations, all as set out in paragraph 7 hereof, are and were false and misleading and have and had the capacity and tendency to mislead and deceive the purchasing public into, and to thereby cause them to purchase said shirts in, the erroneous belief that respondents are and were the manufacturers of said shirts and that in buying from respondents they are buying and obtaining said shirts directly from the manufacturers thereof, thereby eliminating and saving the costs and profits of middlemen.

PAR. 9. The prison-made shoes dealt in and sold by or in the name of respondent Commonwealth Manufacturing Co., as aforesaid, were a type of heavy work shoe simulating in general appearance shoes which have for many years been used by and manufactured under the supervision and specifications of the War Department, a branch of the Government of the United States, large quantities of which were sold to the public by the Government after the close of the World War as surplus Government property, and which shoes so sold have been and still are quite extensively marketed as such among the trade and to the consuming public throughout the United States. Said shoes sold as surplus Government property are in great demand by the consuming public and are generally considered by the consuming public to be of high quality, sold at low prices, and to have been made for and under the supervision and specifications of the United States Government. Respondent corporation's shoes were never owned by or manufactured for or under the supervision or specifications of the United States Government but were greatly inferior to such shoes in quality and workmanship. Said shoes of respondent corporation when sold by it to its customers, and when purchased by the consuming public in the ordinary course of trade, contained branded and embedded on the soles thereof the letters "U. S." in large, conspicuous type surrounded by an outline of what is commonly known and recognized by the public as the shield of the United States, below which in smaller letters and less conspicuous appeared the brand "Munson Army Last." With the full knowledge and consent of respondents said brands and words were placed on the shoes under the direction of the warden of the Indiana State Prison, Michigan City, Ind., for the purpose of aiding the salability of said shoes to the consuming public. Said shoes were invoiced and billed by respondent to its customers as "United States Army Munson Last Work Shoes."

PAR. 10. The use by respondent corporation in connection with its shoes of the letters "U. S." under the circumstances and conditions set forth in paragraph 9 above was misleading and had the capacity and tendency to mislead and deceive the consuming public into, and to thereby cause them to purchase said shoes in, the erroneous belief that same were genuine Army shoes manufactured under the supervision and specifications of the United States Government. In selling its shoes with said brands, as set forth above, respondent corporation thereby placed in the hands of retailers the means by which such retailers could, with or without further representations, pass off said shoes to the consuming public as genuine Army shoes made under the supervision and specifications of the United States Government.

PAR. 11. Among the competitors of respondents mentioned in paragraph 3 hereof are many who manufactured and sold shoes, binder twine, and shirts in competition with respondents and who rightfully and truthfully represented themselves to be the manufacturers of such products. There are also many among said competitors who did not manufacture the shirts, binder twine, or shoes which they sold in competition with respondents and who in no wise represented themselves to be the manufacturers of said products. There are likewise many of said competitors who sold in competition with respondent corporation

and under truthful representations certain shoes which were and certain other shoes which were not owned by or manufactured for or under the supervision and specifications of the United States Government. The false and misleading practices indulged in by respondents as hereinbefore set forth tend to and do unfairly divert trade from and otherwise injure the business of said competitors and are to the prejudice of the public.

CONCLUSION

The acts and things done by respondents under the conditions and circumstances described in the foregoing findings are to the injury and prejudice of the public and respondent's competitors, and are unfair methods of competition in interstate commerce and constitute a violation of the act of Congress approved September 26, 1914, entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes."

By the commission.

C. W. HUNT, *Chairman.*

Dated this 25th day of June, A. D. 1927.

Attest:

OTIS B. JOHNSON, *Secretary.*

This proceeding having been heard by the Federal Trade Commission upon the amended complaint of the commission, the testimony and evidence; and the commission having made its findings as to the facts with its conclusion that respondents have violated the provisions of the act of Congress approved September 26, 1914, entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes,"—

It is now ordered, (1) That respondent corporation, Commonwealth Manufacturing Co., its officers, directors, agents, and employees, and respondent Harry Dushoff, his agents, representatives, and employees, cease and desist from carrying on the business of selling shirts, shoes, binder twine, or other merchandise in commerce among the several States of the United States under a trade name or corporate name which includes the word "manufacturing," or a word or words of like import, and from making representations through advertisements, letterheads, order forms, billheads, or other business stationery, or by any other means whatsoever in connection with such business; that respondents, or either of them are the manufacturers of said products, unless and until such respondent actually owns and operates, or directly and absolutely controls a factory in which the products so sold and distributed by such respondent are manufactured.

(2) That respondent corporation, Commonwealth Manufacturing Co., its officers, directors, agents, servants, and employees cease and desist from selling and distributing in interstate commerce any shoes which are branded or labeled with the letters "U. S.," or with letters or words of similar import, or with a simulation of what is commonly recognized as the shield of the United States, or any other device of similar import, unless all of said shoes so sold and distributed were made for and under the supervision and specifications of the Government of the United States.

It is further ordered, That respondents Commonwealth Manufacturing Co. and Harry Dushoff shall within 60 days after the service upon them of a copy of this order file with the commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist hereinbefore set forth.

By the commission.

OTIS B. JOHNSON, *Secretary.*

STATEMENT OF SENATOR HARRY B. HAWES BEFORE THE AMERICAN PRISON ASSOCIATION FIFTY-EIGHTH ANNUAL CONGRESS, KANSAS CITY, MO., OCTOBER 10, 1928

REFORM OF PRISON CONDUCT IN FUTURE RESTS UPON OFFICIALS—PASSAGE OF BILL NOW BEFORE UNITED STATES SENATE GIVES EACH STATE THE RIGHT TO WORK OUT PENAL PROBLEM

As coauthor in Congress of what is known as the Hawes-Cooper bill (S. 1940), it is a great pleasure and a great opportunity for me to discuss pending national legislation.

Upon the prison officials rests a great responsibility. In many ways I know of no officials in our civic life who have a greater one. There is an emergency presented to your body in the facts as they exist to-day.

I predict that at the coming short session of Congress there will be passed by the United States Senate with an overwhelming vote a bill calculated to open the way for great national prison reform.

It is the impending passage of this bill which presents to the prison officials of the Nation the immediate necessity of looking to the future conduct of American penal institutions.

For some 30 years far-sighted men among prison officials, as well as legislators, have sought to bring about betterments in prisons. Steps have been taken and much advancement has been made in the last quarter of a century. The whipping post and the slave driver are largely memories in our penal institutions. To a large extent you have obliterated inhuman cruelties and have established civilized conditions for the unfortunate inmates of these institutions.

I am not unmindful of all these advances. I will not recount them, but during all the period that this work has been going on there has existed a legal impediment to the completion of your betterment work.

THE LEGAL SITUATION

Many years ago because of popular criticism, the contract system, as it was formerly known, was abolished in many States as the first great step in prison reform. The public objected to the exploitation of the unfortunate criminal for private profit. To a large extent, therefore, the inhumanities of the old contract system have disappeared, but the contractor himself has not disappeared. The exploitation of prisoners is an easy road to wealth. At least it has been so. Many men of reasonable affluence owe their success to this system of penal servitude. It is not an easy matter to get rid of them. In many instances they have power and influence. They have money, and there is always a legal loophole through which to crawl. And so it was discovered that while popular disgust with the old contract system made it necessary that the system be abolished, it was also determined that under the Federal Constitution the regulation of interstate commerce rests with Congress.

Progressive States enacted legislation under which the prisoners of these States were not permitted to manufacture articles to be sold upon the open market. Other States did not enact such laws. Some enacted regulatory laws. The public-account system was established in some; the piece-price system in others, and the more progressive enacted the State-use system.

It was immediately found that what one State might do in order to protect itself from the prison contractor by refusing its own prisoners the right to manufacture goods for public sale, did not end the system at all, even for that State.

In Ohio, New Jersey, and New York, for instance, the prisoners of these three States are not permitted to manufacture products for sale upon the open market. Nevertheless, prisoners of some other States may manufacture articles for public sale, and actually do manufacture articles for public sale, and these articles are sent into the markets of Ohio, New York, and New Jersey, and each of the three States is powerless to interfere. It is not a matter of opinion, it is a matter of court decision. The court has held that Congress alone can regulate the matter of interstate commerce in this regard. The result is that to-day over the entire United States we have prison contractors still growing wealthy out of the labors of criminals, contracting for the sale of articles made by prisoners, taking these articles at a ridiculously low figure and sending them into legitimate markets often misbranded, or not branded, to be sold at a price just enough below the market, destroying that particular market and the private industry attempting to serve that market.

A few years ago an attempt was made to change this situation, and it was proposed that Congress enact legislation divesting prison-made products of their interstate character under certain conditions.

PRISON ASSOCIATION ACTIVITIES

As far as I have been able to learn, the National Prison Congress was organized in 1870 by President Rutherford Hayes.

In the declaration of principles of the National Prison Congress of that year I find the following resolution:

"While industrial labor in prisons is of the highest importance and utility to the convict, and by no means injurious to the laborer outside, we regard the contract system of prison labor, as now commonly practiced in our country, as prejudicial alike to discipline, finance, and the reformation of the prisoner, and sometimes injurious to the interest of the free laborer."

This organization later became the American Prison Association.

I have found the following resolution as of the date of October 20, 1919:

"Whereas the question of prison labor seems as yet to be an unsolved problem, though showing progress by discussion and by practical experiments:

"*Resolved,* That the special committee on prison labor be continued and that we reaffirm our disapproval of the lease and contract system of employing prisoners; be it further

"*Resolved,* That we commend the advancement made by the war labor policies board by proposing a program for the sale of such prison-made goods to the Government as are manufactured or produced under State control by prisoners who are paid the prevailing rate of wages less maintenance. We recommend the continuance of this policy following the proclamation of peace as enunciated in our original constitution, in the following language:

"'While industrial labor in prison is of the highest importance and utility to the convict and by no means injurious to the laborer outside, we regard the contract system of prison labor as now commonly practiced in our country as prejudicial alike to discipline, finance, and the reformation of the prisoners and sometimes injurious to the interest of free labor.'"

And under date of October 21, 1926, is the following resolution adopted by this body:

"Idleness in prison, as elsewhere, is destructive of morality, discipline, and good administration. Prisoners should therefore be employed; this as much in the interest of the public as the prisoner. Every State should solve its own prison-labor problem. While systems

of prison industry must necessarily vary, from State to State, the following fundamental considerations should obtain in any system:

"1. The work should be such as to teach the prisoner some self-sustaining occupation.

"2. It should be so arranged as to interfere as little as possible with free industry.

"3. Supplying the needs of the State and its political divisions is a perfectly defensible utilization of the labor of State charges.

"4. While it is realized that the prisoners owe the State the products of their labor, it is nevertheless clear that better and more production can be secured, lessons of thrift, perseverance, and self-reliance more readily taught, and the public better protected through the training for citizenship of the prisoners if a wage system properly safeguarded be installed in the prisons.

"5. Prison industries should be conducted under the best modern business standards of supervision and direction, including cost accounting, up-to-date machinery and equipment, clean and healthful surroundings, and workmen's compensation.

"6. Due consideration should be given to colony care for certain classes of prisoners to afford out-of-door activities."

SITUATION IN A NUTSHELL

The members of your organization are too well versed in the facts in connection with prison labor to require any discussion by me at this time. There has been much misrepresentation of these facts. The contractor has not been idle during the years in which reform has been sought. Honest men have been misled. Facts have been distorted. Motives have been impugned, but not even the contractor with all his influence and power has been able to stem the tide in favor of this character of legislation.

Last year the Hawes-Cooper bill was introduced in the Senate by myself and in the House by Mr. COOPER of Ohio, and it was found that back of this measure there were three great elements in our American life: First, the American Federation of Labor, which sought to protect its members from competition with prison labor; second, the General Federation of Women's Clubs, interested only in removing from the conduct of the prisons the influence of the prison contractor and placing the prisoner under State control, so that his labor may be coordinated with his reform; third, the manufacturers of the Nation, representing private capital invested in legitimate business, which has suffered at the hands of the contractor through ruinous competition in prison-made goods.

THE RESULT SPEAKS FOR ITSELF

Extensive hearings were held in the House and in the Senate on this bill. Every opportunity was given the opposition to present its views. The prison contractor did not openly appear. Honest prison officials were there, who stated the bill would make it very difficult for them to conduct their penal institutions profitably because it would probably make impossible the sale of prison products in the open markets and result in idleness among the prisoners. Prison officials were heard by both committees, and the proponents of the measure, representatives of the American Federation of Labor, the General Federation of Women's Clubs, and the manufacturers were heard. The men on these committees represented some 25 States. In the House the bill was reported favorably with but one dissenting vote. In the Senate the committee did likewise.

Any man who examines the vote in the House of Representatives on this bill will understand the widespread approval of the measure. The vote appears in the CONGRESSIONAL RECORD. The bill was passed on May 10, 1928, by a vote of 303 to 39. An analysis of this vote discloses the following:

The Representatives of 32 States cast a solidly affirmative vote for the bill, and in some of these States prisoners are at work making products which are sold by prison contractors in the markets of other cities. Forty States in all supported this legislation. Only six delegations voted solidly against the bill. There were only two States in addition to those six where the majority of Congressmen voted against the bill. The population of the congressional districts of the 39 Congressmen who voted against the bill was 9,500,000 as against the 118,000,000 population of the United States.

In other words, those voting against the bill represented 8 per cent of the people of this country. Politics played no part in the passage of this bill by the House. Democrats, Republicans, Conservatives, and Progressives united in its support. In New England, where a great deal of opposition to this measure springs as a result of a large sale of products through prison contractors, the Representatives of States with a population of 4,620,000 voted for the bill, while those voting against the bill came from States with a population of 2,780,000. In other words, in the House vote on this measure, even in New England, where the opposition was really the strongest, 60 per cent of the population of New England was represented by men who voted for the bill.

SITUATION IN THE SENATE

This bill will pass the United States Senate and will be signed by the President.

There are not more than 20 dissenting votes in the United States Senate. There are more than 60 favorable votes. The public is aroused. The prison contractor must go. The present subterfuge under which he is working has been disclosed. The markets are suffering at his hands. The prisoners are not benefited by his services. The men and women who labor for a daily wage find themselves in competition with prisoners. The system is archaic; it is wrong; it must be stopped.

The bill would have passed at the last session were it not for a filibuster which began against it at the last moment and which was made possible by the congested Senate calendar. The opponents of the measure at the time frankly admitted that its passage could probably not be blocked at the coming session. The proponents have no doubt as to its passage.

WHAT THE BILL DOES

All sorts of things have been stated about this simple bill. It has been called unconstitutional, although no brief of a serious character has ever been presented against its constitutionality. It has been stated that it will result in idleness, although many great experts on criminology and penal conduct appeared before the committee to deny this. It has been stated that it does many things which it does not do and which the men from 25 States who heard the testimony in this case decided it did not do. The plain fact is that the Hawes-Cooper bill makes it impossible for the prison contractor to hide behind the legal technicalities of Federal legislation.

The bill simply says that when prison products are sold in any State they must be sold under the laws of that State. At the present time they are not sold under the law of that State, but in any way the prison contractor decides that they shall be sold. This bill does not interfere in any way with the legislation of any State. It does not coerce any State into the passage of any legislation. It does not invalidate any State legislation.

In Indiana, for instance, if prison officials and the Indiana Legislature decide that prisoners may be used in the manufacture of products to be sold on the open market, prisoners may be so employed. These products will not be denied the facilities of transportation. When manufactured they will be placed upon a railroad train and sent to any market in the United States, but when they arrive at that market they must be sold in accordance with the laws of the State in which they are sold. In other words, they must be sold just as any other product must be sold. They can not be misbranded, mislabeled, or subjected to any other form of deceit or fraud.

The mention of Indiana recalls a very interesting phase of the Senate hearings on this bill. It was disclosed that fake Federal stamps were being placed on shoes manufactured in the Indiana prisons. These shoes were sold in the open market of other States falsely branded, falsely labeled. The entire sale was a fraud and a deceit. It was so declared by the Federal Trade Commission. It was discovered that in the very State where these fraudulent practices were going on the State law of that State prohibited the sale of prison products on the open market. Of course, when we inquired concerning this we were told the law was what they called a "dead letter." Very naturally it was a "dead letter," and all such laws under conditions as they now exist are "dead letters," because no State under present conditions can protect itself from the prison products of another State, and therefore a law protecting a State from its own prison labor is useless.

OFFICIALS' RESPONSIBILITY

The entire record of the hearings before the House and Senate is available to every member of your prison organization. All the facts concerning prison labor are available to your organization. All of the theories of prison conduct under the Hawes-Cooper bill are available for your study and your consideration. The proponents of this legislation, the American Federation of Labor, the General Federation of Women's Clubs, and the manufacturers of the Nation, have openly and repeatedly stated that they will assist prison officials in bringing about the reform made possible by the Hawes-Cooper bill. You will have much aid and wise counsel is available. Your own experts and experts from other fields may be called in, and as the bill will pass with what is known as a 3-year clause, you will have ample time to readjust your prison affairs to meet the new order of things as established by this legislation.

You might just as well meet the situation squarely. The advisability of this legislation is no longer in question. This bill will become a law. The prison contractor, as at present constituted, is to be removed as a factor in our prison conduct. The prison contract system will be abolished. The day of subterfuge is at an end, and you who have the problem of the conduct of these institutions before you should take steps at once to meet the new responsibility and the new system.

In some States the problem will not be difficult. In others, readjustments will have to be made. New systems will have to be inaugurated. New industries established to meet State needs, and reorganization will have to take place in prison management.

This legislation has been before Congress for some 20 years; you are, of course, fully acquainted with what it will mean to you. In the respective States your prison officials will know their own problems and will know how to meet them. The public in those States will look to you for the proper reorganization of your institutions along the lines which the public, through Congress, has already approved.

The time has come for counsel, cooperation, and coordination. Opposition to the new system will be useless. As prison officials you should not be misled.

Mr. BRUCE. Mr. President, is there any proposition pending now? There is a subject with regard to which I should like to make a few observations.

The PRESIDENT pro tempore. The Senate is acting under general orders, discussing the calendar under Rule VIII. The Senator from Missouri was recognized to ask unanimous consent for the insertion of certain papers in the RECORD. That having been ordered, it is the pleasure of the Senate to determine what procedure it will follow.

Mr. BLEASE. Mr. President, on the subject now before the Senate to which the Senator from Missouri [Mr. HAWES] has referred, I ask unanimous consent to have printed in the RECORD a telegram from Leslie Rudolph, warden of the Missouri Penitentiary, a telegram from the Virginia State Prison Board, of Richmond, Va., a telegram from George C. Erskine, president of the American Prison Association, a letter from the Indiana Truck Corporation, of Marion, Ind., and a protest signed by the wardens and superintendents of numerous prisons, all in opposition to the bill. I ask unanimous consent that they may be printed in the RECORD at this point.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

JEFFERSON CITY, MO., *May 23, 1928.*

Hon. COLEMAN L. BLEASE,
Senate Office Building, Washington, D. C.:

Missouri Prison Board earnestly protest against enactment of Hawes-Cooper prison labor bill and asks you to consider fact that abolition of prison industries will result from this law and will cost millions to taxpayers. Will increase Missouri taxes one and one-half millions per year and create serious problems of handling our 3,800 convicts.

LESLIE RUDOLPH,
Warden Missouri Penitentiary.

RICHMOND, VA., *May 20, 1928.*

COLE L. BLEASE,
United States Senate, Washington, D. C.:

Hawes bill 1940 defeat urgently requested. Bill detrimental to taxpayers, penal institutions, inmates, and their families. Proponents have not offered constructive plan to completely occupy all inmates. States that have had State use for number of years still have many idle. This bill will indirectly place many in idleness. Not humane thing to do. Believe, as public officials, our duty to express our strongest opposition.

VIRGINIA STATE PRISON BOARD.

CHESHIRE, CONN., *December 13, 1928.*

Senator C. L. BLEASE,
Washington, D. C.:

Practical penologists throughout the country believe passage Hawes-Cooper bill contrary to wise public policy, and will very likely be found unconstitutional.

GEORGE C. ERSKINE,
President American Prison Association.

INDIANA TRUCK CORPORATION,
Marion, Ind., May 19, 1928.

Senator COLEMAN LIVINGSTON BLEASE,
Senate Office Building, Washington, D. C.

DEAR SENATOR BLEASE: The passage of the Hawes-Cooper bill virtually stops the manufacture of prison-made goods, and from some angles might be good legislation.

The bill should not pass in its present form, however, as no consideration is given to the institutions now engaged in this work.

If it is the general opinion that these institutions should get over on the so-called State-use system, their goods and wares to be absorbed by other State units supported with taxpayers' money, it can not be done on a 2-year notice. It takes time to build up a distributing system in any business, and you should extend that time to five years, at least.

To turn these goods made in these prisons over to other institutions supported by taxpayers' money within the State would not absorb 10 per cent of the production ability of our present prison population, and it would therefore seem perfectly proper to permit the sale and distribution of these products to any institution in the United States that is supported with tax money.

As a matter of fact, this whole proposition should be surveyed by the Director of the Budget, a study made by his department on the various kinds of materials made in all our State prisons, and the various Federal Government departments should secure their supplies from these institutions.

By proper distribution of prison-made products to the Federal Government departments and to all other institutions throughout the United States supported with tax money, a program might be worked out whereby the men in all our prisons would be employed.

The prison population throughout the country has doubled during the past 10 years, and legislation to provide work for inmates should be instituted rather than legislation to stop what work is now going on. Stopping the work simply increases the tax burden. Furthermore, it is an economic loss to permit men to sit idly in a prison cell, to say nothing of the demoralizing effect on the men.

We are dealing with people serving sentences which sooner or later returns them to civil life, and they should go out of prison better fitted mentally to make good citizens. You can not help them in this respect except by providing legislation that keeps them employed.

Yours very truly,

INDIANA TRUCK CORPORATION,
H. K. YORK, *Vice President.*

A PROTEST AGAINST THE PASSAGE OF HAWES-COOPER BILL—HOUSE BILL NO. 7729 AND SENATE BILL NO. 1940

To Members of Congress:

We respectfully petition you not to pass Senate bill No. 1940, introduced by Senator HAWES of Missouri, nor H. R. No. 7729, introduced by Representative COOPER of Ohio.

In our deliberate judgment these acts are not only unnecessary, unwise, and unconstitutional, but if passed will destroy the penal system built up in a large majority of the States of the Union, after years of experimenting with different systems and after the expenditure of millions of dollars by the various States.

In the Southern States cotton, grain, sugar cane, and livestock are produced on penal farms; in others, turpentine and lumber are produced by convict labor; in others granite and marble are quarried and dressed, and agricultural limestone is quarried and crushed by convict labor; in Missouri and other Central States sheep, hogs, and cattle are raised and slaughtered on penal farms and the surplus sold; in Oregon flax raised on farms is processed by convict labor; in many States fruits and vegetables are raised and canned on penal farms and gardens; in the great wheat-growing States of Minnesota, Wisconsin, Kansas, Indiana, Oklahoma, Missouri, and the two Dakotas for a great many years binder twine and farm implements have been manufactured by convict labor and sold to the farmers of those States; in other States scrub brushes, rat traps, rag rugs, and rag carpets are made by the criminal insane; in others work shirts, work clothing, overalls, work shoes, brooms, and mops are made by convict labor; in a few States coal is mined from State-owned coal mines by convict labor.

In some States, juvenile offenders, male and female, are committed to houses of correction, schools of reform, orphanages, or convents, and are employed making knit goods, embroidery, baskets, books, and a variety of other wares.

The effect, if not the purpose, of the Hawes-Cooper bill is to utterly destroy the market for all these "goods, wares, and merchandise manufactured, produced, or mined, wholly or in part by convicts or prisoners, or in any penal or reformatory institutions."

THE HAWES-COOPER BILL UNNECESSARY

There have been practiced in the United States in the past 130 years, six systems of prison labor, namely: The lease system, the contract system, the piece-price system, the public account, the State-use system, and the public works and ways system.

Each system has and has had its advocates and critics, each system has both its advantages and disadvantages. The two systems which encountered the greatest amount of criticism have been the lease system and the contract system. The former in the earlier history of the Republic widely prevailed, but to-day it does not exist in any State; the contract system, which was formerly in extensive use, has gradually been superseded by other systems and now exists in but few States, as the following table compiled by the United States Bureau of Labor Statistics, Bulletin No. 372, January, 1925, page 17, shows:

Per cent of convicts that were employed at productive labor under different systems in different years as shown by reports of this bureau

System	Year				
	1885	1895	1905	1914	1923
Lease	26	19	9	4	
Contract	40	34	36	26	12
Piece price	8	14	8	6	7
Public account	[1] 26	[1] 33	21	31	26
State use			18	22	36
Public works and ways			8	11	19
Total	100	100	100	100	100
Per cent of all convicts that were employed at productive labor	75	72	65	(2)	61

[1] Public account, State use, and public works and ways were inseparably combined.
[2] Not reported.

The individual States can be trusted to correct any defect in their penal systems, as the above table shows, and it is unnecessary for the Federal Government to attempt to coerce the States to adopt a particular system of penal management or labor.

THE HAWES-COOPER BILL UNWISE

All but four States of the Union utilize a combination of several systems of labor to meet their prison problems and have found the practice satisfactory and in entire harmony with the public opinion and legislative policy of the respective States. To illustrate, most States utilize the State-use system in making clothing and shoes for inmates, the public works and ways system to build roads or public buildings, and utilize the surplus inmate labor under the public account, piece price, or contract system to manufacture binder twine, produce cotton or livestock, or clothing which is sold.

Under this system a great many penal institutions are self-sustaining, and many more are nearly so. Inmates are given a share of their earnings, which in many instances amounts for each inmate to as much as a dollar and a half a day, which he may use for the support of his family.

Under this combined system, which prevails in more than 40 States, idleness in prison has been reduced to a minimum, inmates have been trained to habits of industry and thrift, prisoners have been rehabilitated and restored to society to live normal lives, and the taxpayers' burden has been lessened.

If the pending bill is passed and the States are compelled to adopt exclusively the State-use system of convict labor, we believe it will produce idleness instead of employment in prisons, chaos instead of order therein, will entirely destroy our markets and prison industrial organization, and will necessitate huge annual appropriations in the respective States, which heretofore have been unnecessary.

THE OSTENSIBLE OBJECTIVE OF THE HAWES-COOPER BILL

The proponents of the bill contend that the product of convict labor should not be sold in competition with outside labor and that this competition is overcome by having convicts work for the State, or subdivisions thereof, or manufacture articles to be used by the State, its subdivisions, or State institutions. In other words, they seek to compel the adoption of the State-use system of convict labor in every State.

The fallacy of this position is obvious. Do not school desks, chairs, blackboards, public printing and book binding, road signs, and automobile tags made by convict labor compete with outside labor just as truly as binder twine, work shirts, or overalls? The question answers itself.

The Hawes-Cooper bill seeks to divest prison-made goods of their interstate character and to subject them to the law of the State into which such goods may be transported.

Many years ago there were passed in 10 or 15 States acts requiring all goods made in penal institutions or produced by convict labor to be labeled "convict made" before being exposed for sale, and, in addition to this, most of these acts required that a merchant handling convict-made merchandise must first obtain a license from the secretary of state before he be permitted to sell such merchandise, and the cost of the license varied from $100 to $1,000 per year. In addition to this, the merchants handling convict-made goods in some of these States were required to keep a list of the persons to whom such goods were sold and to file such lists with the secretary of state.

These acts applied to merchandise produced by convicts, whether in factory, on farm, in the dairy, or elsewhere. These acts were intended to make the selling of convict-made goods so burdensome and so expensive that no merchant could qualify to handle them.

In several suits brought to test the constitutionality of these acts, they were held unconstitutional, as in violation of the commerce clause of the Federal Constitution.

However, these old acts in these 15 or 20 States are still on the statute books and have not been repealed. The manifest purpose of the Hawes-Cooper bill is to revitalize these old acts and to make effective similar acts, the passage of which is to be pressed in several of the States with the same purpose and effect as the earlier statutes; that is, to destroy as far as possible all market for produce or merchandise created by convict labor.

If the Hawes-Cooper bill or any similar legislation is passed and held constitutional, each State might pass as unreasonable and as burdensome legislation affecting the sale of convict-made goods as the whims of any particular State legislature might dictate, with the result that the laws in all 48 States might differ very materially, so that any State producing or trying to sell its merchandise would have to know and comply with the law in 47 other different States.

THE HAWES-COOPER BILL UNCONSTITUTIONAL

Under the Constitution of the United States the power to regulate commerce between the States is lodged exclusively in Congress, and Congress has no power to delegate to the several States the right to regulate commerce among themselves.

The only right the several States have to interfere with or interrupt interstate commerce is in the exercise of the police power reserved to the States when the interstate commerce is immoral or fraudulent in its nature or dangerous to the public health.

The proponents of the Hawes-Cooper bill make no claim, and can not justly do so, that goods made by convicts are injurious to the morals or the health of the States.

The proponents of the Hawes-Cooper bill contend that the pending legislation is a copy of the Wilson Act of August 8, 1890, which divested intoxicating liquors of their interstate character and subjected such shipments to the laws of the State into which they should be shipped. If you will read the Wilson Act you will see that the pending bill is not a copy of it, but that the Wilson Act expressly provided, "All fermented, distilled, or other intoxicating liquors, or liquids, transported into any State or Territory * * * shall upon arrival in such State or Territory be subject to the operation and effect of the laws of such State or Territory enacted in the exercise of its police powers."

We believe we express practically the unanimous opinion of prison wardens and prison boards in the United States in protesting against the passage of the pending bill or any legislation that inteferes with the respective States in handling their domestic prison problems.

There are approximately 100,000 convicts in the United States, and not more than 50,000 of them are engaged in productive labor whose products are sold on the open market. It is estimated that the amount of goods produced by convicts and sold represents not more than one-twentieth of 1 per cent of the products of outside labor—the amount of the competition is infinitesimally small.

We have the feeling that the pending bill was inspired by and its passage urged by a highly organized minority of manufacturers, who have adopted this method of stopping prison-made manufacture in only one or two lines.

We have spent years in the effort to handle the penal problems of our respective States, and we hope that our earnest opposition to this bill will arouse you to the seriousness of the situation which would result from its passage.

Very respectfully,

Louis H. Putnam, director State institutions, Providence, R. I.; R. M. Youell, superintendent Virginia Penitentiary, Richmond, Va.; Henry K. W. Scott, warden State prison, Wethersfield, Conn.; John B. Chilton, warden Kentucky Penitentiary, Eddyville, Ky.; J. W. Wheeler, warden State prison, Boise, Idaho; A. H. Harrison, director penal institution, Jefferson City, Mo.; George Ross Pou, superintendent State prison, Raleigh, N. C.; A. F. Miles, superintendent Indiana Reformatory, Pendleton, Ind.; Joseph E. Robinson, chairman board of charities and correction, Frankfort, Ky.; Thomas P. Hallowell, warden Iowa State Prison, Fort Madison, Iowa; John J. Hannon, president board of control, Madison, Wis.; W. R. Bradford, director South Carolina Penitentiary, Columbia, S. C.; M. F. Conley, commissioner of prisons, Frankfort, Ky.; A. G. Macauley, director South Carolina Prison, Columbia, S. C.; Oscar Lee, warden, Waupua, Wis.; John L. Moorman, chairman of the board, Indiana Prison, Michigan City, Ind.; T. E. Lukens, board of prison administration, Boise, Idaho; Ralph Howard, superintendent Penal Farm, Greencastle, Ind.; Levin J. Chase, secretary board of trustees, New Hampshire; A. M. Scarborough, former president Warden's Association, Columbus, S. C.; A. L. Deniston, treasurer board of trustees, Michigan City, Ind.; H. M. Beard, superintendent Kentucky Reformatory, Frankfort, Ky.; James N. Pearman, superintendent South Carolina Penitentiary, Columbia, S. C.; J. J. Sullivan, warden, Stillwater, Minn.; J. S. Blitch, warden, Raiford, Fla.; Walter H. Daly, warden, Michigan City, Ind.; A. F. Roach, warden, Rawlings, Wyo.; James A. Lakin, chairman prison committee, Moundsville, W. Va.; J. N. Baumel, warden, Anamosa, Iowa.; P. J. Brady, warden, Baltimore, Md.; J. I. Burnett, superintendent, Jefferson City, Mo.; E. T. Westerfelt, board of control, Lincoln, Nebr.

Mr. CURTIS. Mr. President, I understand one of the Senators desires to make a short speech on this subject this morning. I therefore ask unanimous consent that the unfinished business may be laid before the Senate.

The PRESIDENT pro tempore. Is there objection? The Chair hears none and lays before the Senate the unfinished business.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

Mr. KING. Mr. President, the Senator from Maryland [Mr. BRUCE], before we adjourn, desires the floor for a little while, and I hope there will be no objection.

MULTILATERAL PEACE TREATY

Mr. BRUCE. Mr. President, I desire to make a few preliminary observations in relation to the so-called Briand-Kellogg peace pact. The subject is, of course, intimately connected with the reservations which were offered yesterday by the present occupant of the chair.

Mr. CURTIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Maryland yield to the Senator from Kansas?

Mr. BRUCE. I do.

Mr. CURTIS. I did not hear the opening remark of the Senator; but if his speech is on the peace treaty it necessarily should be made in executive session. I do not want to move an executive session.

Mr. BRUCE. Still, I should think that my remarks might take such a range as to exempt them from that requirement.

Mr. CURTIS. I merely wanted to make the suggestion, and hope the remarks of the Senator may not call for an executive session.

Mr. BRUCE. I thank the Senator.

The PRESIDENT pro tempore. The Senator from Maryland will proceed.

Mr. BRUCE. Mr. President, if the face of grim-visaged war ever relaxes into a smile, it is, I am sure, when he reads some such empty, grandiose declaration as the Kellogg peace pact. As I see it, it is only in the great number of its signatories that it differs from the many treaties in which His Christian Majesty, His Most Catholic Majesty, or some other royal potentate has, in the past, plighted his solemn troth that he would never, so long as water ran or grass grew, wage war on some country with which his own country had lately been at war, and was soon to be at war again. To show how untrustworthy such engagements have ever been, we need go no further back than a few years ago, when one of the most powerful and enlightened countries on the globe—Germany—did not scruple, despite its explicit treaty obligation to respect the neutrality of Belgium, to open up with fire and sword, a pathway to France, across the violated soil of the former country. Then, as in a vast number of other similar instances, when a puissant and aggressive nation has found itself restrained by nothing stronger than treaty covenants from gratifying its lusts, the pact that was supposed to exempt Belgium from invasion was derisively tossed aside by Germany as a mere "scrap of paper."

If there is anything with which it would seem that the public conscience of the people of the United States should be sated, it is foolscap guaranties of peace between them and other nations. The benevolent instincts of the late William Jennings Bryan, when Secretary of State, fairly revelled in things of this sort, as we all know. Just as he fondly imagined that all that was necessary to keep men from drinking was to pass a law forbidding them to drink, so he appears to have thought that all that was necessary to keep nations from fighting was to induce them to enter into a little conciliation treaty with each other. He was not unlike the French poet, of whom Franklin tells us, who believed that if Franklin would only assist him to finish an epic poem against the English, General Howe would be off as soon as the poem appeared. Just how many conciliation treaties Mr. Bryan negotiated I do not remember; but it matters little, for a few dozen one way or the other would make no difference. I have, however, the authority of Mr. Kellogg, our present Secretary of State, for the statement that of these treaties 18 are still in force, and there is no reason why these 18 could not be multiplied at pleasure, for whoever heard of a modern nation declining to sign a peace pact that did not require it to disarm?

Even before Mr. Bryan became Secretary of State, his official predecessor, Mr. Knox, had tried his hand at a form of treaty which contained both conciliation and arbitration features, and, in 1923, the United States became a party to two conciliation treaties, one contracted at Washington on February 7, of that year, between it and the five Central American Republics, and the other contracted at Santiago on May 3, of that year, between it and 15 Latin-American countries. I might add the fact that the 21 American States, represented at the recent conference at Habana, of which 17 were members of the League of Nations, adopted a resolution unqualifiedly condemning war as an instrument of national policy in their mutual relations. Nor should we forget that France has recently reminded us that, in September, 1927, the members of the League of Nations adopted a resolution condemning aggressive war as an international crime; and this, notwithstanding the fact that all those nations had already, by becoming parties to the covenant of the league, even undertaken, under certain conditions, jointly to suppress aggressive warfare by force. In the light of all these international conventions and pronouncements, what real occasion is there for such a pacifist utterance as the Kellogg peace pact? If, after being visited with all this parchment opprobrium, the god of war is not by this time thoroughly ashamed of himself, there would seem to be but little likelihood of his ever being rendered so by another peace resolution. If the elemental passions that lurk in the human breast could be kept down by the benevolent aspirations merely of peace societies and foundations, if battles waged by international ambitions and animosities were fought with paper pellets instead of leaden bullets, he might grow weary of his calling, and betake himself to some more honest and useful field of employment. But, constituted as human nature is, and conducted as war is, it can be confidently predicted that he will never do this until men cease to believe that they can exorcise the fell spirit of war by sonorous peace vaporings, as vain, when unattended by punitive sanctions, as the fires and religious processions with which human beings, in the Middle Ages, sought to subdue the baleful breath of the black plague.

Not only has the United States become a party to innumerable conciliation and arbitration pacts already, but it can truly be said that there is not one of them that was, or is, not invested with a practical value of which the Kellogg pact is totally devoid. They, at least, sought by specific conciliatory and arbitral processes, which, within certain limits are by no means ineffective, to stay the uplifted hand of war. And, if the resolution of the recent Habana conference, condemning war as an instrument of national policy, in which 17 members of the League of Nations joined, and the 1927 resolution of the members of the League of Nations, condemning aggressive war as an international crime, do not render the Kellogg pact wholly superfluous, it is only because the United States is actuated by a selfish desire to ignore any steps taken by the league, or participated in by some of its members for the purpose of keeping war under the control of human civilization. The Kellogg peace pact contains no provisions designed to give practical effect to its condemnation of recourse to war for the solution of international controversies, its renunciation of war as an instrument of national policy, and its abjuration of all settlement or solution of international disputes or conflicts except by pacific means. It creates no court, arbitral commission, or conciliation agency. It contains no sanctions. It suggests no means by which its pacific intentions can be made good. It is a mere brutum fulmen, a stab in the air, a futile gesture, one of those things that begin and end in smooth words. Even if this were not so, and it could justly be claimed that the Kellogg pact has at least the moral value of an agreement between the parties to it that they will not go to war with each other under any circumstances, that value has been completely, or all but completely, destroyed by the reservations from the operation of the pact, insisted upon by signatories to it other than the United States, to which Mr. Kellogg has given his full assent; sometimes under circumstances which would appear to render this assent totally repugnant to the plain wording of the pact itself.

Let us take up the reservations in detail: In article 1 of the Kellogg pact, the high contracting countries, which now number 59 actual or proposed signatories, declare that they renounce war as an instrument of national policy in their relations with each other. In article 2 they agree that the settlement or solution of all disputes or conflicts of whatever nature, or of whatever origin they may be, which may arise among them, shall never be sought, except by pacific means. Clearly, if literally construed, these sweeping, unconditional covenants against war include defensive as well as offensive wars, the obligations of such of the parties to the pact as are likewise parties to the covenant of the League of Nations, to resort to war under certain circumstances mentioned in the covenant for the enforcement of its objects and the obligations of such of the parties to the pact, as are likewise parties to the Locarno treaties, to resort to war, under certain circumstances, mentioned in those treaties for the enforcement of their provisions.

For illustration, the covenant of the league contemplates the possibility of recourse to war by its members in the event of an infraction of article 10 of the covenant, by which the members of the league undertake to respect and preserve, as against external aggression, the territorial integrity and existing political independence of all members of the league, or in the event of an infraction of certain obligations as respects arbitration or otherwise imposed upon the members of the league by articles 12, 13, and 15 of its covenant. For further illustration by the security pact, one of the Locarno treaties, Germany agrees with France and Belgium that they will mutually abstain from all armed aggression, and England and Italy guarantee this agreement.

By other Locarno pacts, France and Poland, in the one case, and France and Czechoslovakia, in the other, undertake to resist German aggression under certain circumstances. When pressed by France and other signatories to the Kellogg pact, Mr. Kellogg experiences no difficulty in saying that there is nothing in the pact which restricts or impairs in any way the right of self-defense, and that the nation whose territory is invaded is alone competent to decide whether circumstances require recourse to war in self-defense. Mr. Kellogg also finds no difficulty in saying that there is no incompatibility between the military obliga-

tions assumed by England and Italy, France and Poland, and France and Czechoslovakia in the Locarno treaties just mentioned, and the promise of each of those countries in the Kellogg pact to renounce war as an instrument of national policy.

Mr. Kellogg reasons that wars of self-defense are not embraced in the Kellogg pact because the right of self-defense is inherent in every sovereign and implicit in every treaty. He reasons that there is no inconsistency between the league covenant and the Kellogg pact, because the prevailing interpretation is that the military obligations imposed by the covenant are not mandatory but discretionary. And he reasons that there is no inconsistency between the Locarno treaties, just mentioned, and the Kellogg pact, because if all the parties to those treaties become parties to the Kellogg pact, resort to war by any one of them, in violation of one of those treaties, would, as matter of law, release the other parties to the Kellogg pact from their obligations under it and leave them free to carry out their Locarno commitments.

By such special pleading—I will not say quibbling—does that eminent lawyer, Secretary Kellogg, seek to prop up his pact as it staggers under its grievous load of crushing reservations. Another reservation from the operation of the Kellogg pact, to which Mr. Kellogg has apparently, if not actually, given his assent is the claim of Great Britain that there are—

> certain regions of the world the welfare and integrity of which constitute a special and vital interest for its peace and safety, and that their protection against attack is to the British Empire a measure of self-defense.

What those certain regions are our British brothers, whose morning drumbeat circles the globe with one continuous strain of the martial airs of England, do not think it worth while to tell us. I should also add that the idea of Mr. Kellogg that the effect of a violation of the Kellogg pact by one of the parties to it would be to release the remaining parties to it from their obligations under it, with respect to the treaty-breaking State, did not originate with him but was likewise first suggested to him in the form of a reservation by the French Government; and then accepted by him.

The total effect of all these reservations in making the Kellogg pact an even feebler thing than it would appear on its face to be is almost too manifest for comment. They are so irreconcilable with the avowed purposes of the pact itself that it is not surprising that Mr. Kellogg should be so loath to have them fished out of the diplomatic correspondence, from which the pact finally emerged, and annexed as provisos to its text. A pallid abstraction, even when standing alone, that pact takes on an even more sickly and impotent aspect when read in the light of such debilitating reservations.

Since the day of ruthlessly barbarous conquerors like Genghis Khan and Tamerlane it would be hard to find a case in which any nation has ever waged a war that it did not claim to be a war of self-defense. In the life of a nation, as well as of an individual, it is often essential to self-protection that it should strike the first blow. If ever a war appeared to be an unprovoked one, it was the war waged by Germany upon us and our allies. If ever a country seemed to be indisputably the aggressor in a conflict, it was Germany in that war. But, though coerced into admitting in the Versailles treaty that she was responsible for the World War, Germany still insists that in invading France she was but countering an anticipated blow; and be her claim in this respect sound or unsound, not a few disinterested individuals who are not Germans have become convinced, after a careful study of all the documentary evidence relating to the initiation of the World War, that the responsibility of Germany for it is by no means certain.

Exclude from the Kellogg pact wars of self-defense or wars adjudged by the countries which initiate them to be such, wars conducted for the purpose of enforcing the covenant of the League of Nations, or the Locarno treaties, and wars carried on by Great Britain for the protection of "certain regions" which she has never named, and there would seem to be very little international warfare for the Kellogg pact to operate on.

The lack of reality which marks it is also, I hardly need say, accentuated by the failure which, if I am not mistaken, has overtaken all disarmament propositions, except those adopted by the Washington Naval Conference of 1921, since the creation of the League of Nations. The treaty of mutual assistance, signed in 1922 under the auspices of the League of Nations, came to nothing; so did the Geneva protocol, signed in 1924 under the same auspices; and so did the Geneva Naval Disarmament Conference of 1927, in which Great Britain, Japan, and the United States took part. After the adjournment of the Washington conference it was supposed that the reduction of battleships and other results effected by it, as between the parties to it, namely, the British Commonwealth, France, Italy, Japan, and the United States, denoted a distinct gain for disarmament, but the ill feeling engendered between Great Britain and the United States by the miscarriage of the Geneva Naval Disarmament Conference demonstrated that, so far as the admirals and naval experts of Great Britain, the United States, and Japan at that conference were concerned, the Washington conference did nothing but shift naval rivalry from one field of activity to another.

Nor should we overlook the fact that the circumstances in which the Kellogg pact originated are well calculated to excite our distrust of its efficacy. It will be recalled that this pact began with a suggestion from M. Briand, the French Minister of Foreign Affairs, that France and the United States should enter into such a pact with each other only. The unbroken peace which for more than a century had existed between the two countries and the absence of all irritating contacts between them made one feel that M. Briand's proposal looking to eternal amity between France and the United States was not unlike an agreement between an elephant and a whale that they will never attack each other. How little France, in making M. Briand's proposal, was disposed to commit itself to anything but lip service in the cause of universal peace is not only shown by the fact that M. Briand's proposal was limited to France and the United States but by the fact that about the time that it was made France refused to take part in the Geneva Naval Disarmament Conference of 1927.

One of the most noteworthy of the reservations annexed to the Kellogg pact, of course, is that which declares that its violation by any one of the parties to it shall have the effect of releasing all the other parties to it from their obligations under it. This recalls the famous dialogue between Dogberry and the Watch:

> DOGBERRY. You are to bid any man stand in the prince's name.
> WATCH. How if a' will not stand?
> DOGBERRY. Why, then, take no note of him, but let him go, and presently call the rest of the watch together and thank God you are rid of a knave.

A covenant renouncing war as an instrument of national policy may not be a bad thing but a covenant between the parties to the Kellogg pact reducing, to some reasonable extent, instruments of war, such as ships, warplanes, rifles, ordnance, caterpillar tanks, and the like, would be a far better thing. The only way really to renounce war is to renounce the instruments of war. There is nothing, however, to evidence the fact that national disarmament is keeping pace with the millenial yearnings for unweaponed peace, of which the Kellogg pact is the most grandiloquent expression. On the contrary, all the unceasing palaver that has gone on about national disarmament since the end of the World War has accomplished practically nothing. The last Armaments Yearbook of the League of Nations contains a detailed and authoritative survey of the armaments of the world at the present time and their cost.

This survey shows that the world is spending annually $3,500,000,000, or about one-sixth of its aggregate annual income, on armies and navies; that it is keeping approximately 5,500,000 men under arms, or 1 soldier for every 300 civilians; and that it maintains 5,000,000 tons of naval shipping on the ocean, or 1 ton of naval shipping for every 13 tons of mercantile marine. Only a few days ago the United Press reported Mussolini as having just said to the Italian Parliament:

> The truth is that the whole world is arming. The number of cannon and bayonets is increasing.

On the same day the United Press reported Lloyd George as having just said:

> Chaotic international relations are leading the world toward war. Since we signed the Kellogg pact armaments are increasing.

Under these circumstances it is not surprising that Mussolini should also have sarcastically said in the course of the speech to which I have just referred, amid much laughter from spectators and deputies:

> We all favor peace, and all of us signed for peace, the Kellogg pact, so sublime that we could characterize it as transcendental. If tomorrow similar pacts were in sight, we would hasten to sign. We should not, however, delude ourselves if others speak of peace.

President Coolidge, in his recent utterances advocating the ratification of the Kellogg pact, has played his part with decidedly more consistent gravity than Mussolini, but if the President has any real faith in the pacific virtue of that pact, why, pray, when Mr. Kellogg was cooing like a gentle dove, did the President set up such a jungle roar about more cruisers in his address on last Armistice Day? As I speak Bolivia

and Paraguay are clutching at each other's throats. The whole truth of the matter, I shrewdly suspect, is that the various peace projects that have been proposed by the Republican Party since the Lodge reservations kept us out of the League of Nations have been formed by that party far more for the purpose of subserving its own selfish aims and necessities than of advancing the cause of world peace. Realizing that ever since the shipwreck worked by those reservations there has been a powerful and widespread sentiment in this country in favor of our entry into the league, it has periodically cheated this sentiment with one deceitful peace lure or another. During the Harding presidential campaign the lure was the spectral association of nations which, with the election of Harding, disappeared like a ghost at cockcrow.

Then followed a profuse spawn of conciliation and arbitration treaties between the United States and Central and South American countries, which served to divert public attention from the larger peace movements of the world. Then followed our adhesion to the protocol of the World Court statute, so instinct with the spirit of arrogant reservation that Great Britain and other foreign powers, eager as they were to draw us into the World Court, felt that they could not accept our overture without a loss of self-respect.

And now comes along this anemic peace pact of our able and amiable Secretary of State, Mr. Kellogg, which is about as effective to keep down war as a carpet would be to smother an earthquake, but which, nevertheless, has worked up all the unsophisticated humanitarians of both sexes to a high state of excitement. When it shall, in its turn, have served its purpose, the Republican Party can confidently be expected to contrive another peace device equally plausible. If it does not, it will, if we may judge from recent press reports, not be for the want of the assistance of Hiram Evans, the supreme wizard of the Ku-Klux Klan, who, vexatiously mindful of the obligations that the Republican Party owes to the klan for its rabid assistance during the recent presidential campaign, is now asserting its right to shape the international as well as the domestic policies of that party.

I reach the conclusion, therefore, that as a direct, immediate agency for the repression of war the Kellogg pact has no practical value whatever. It is, as a weapon for such a purpose, imbelle telum sine ictu—that is to say, roughly, a weapon without a punch. Moreover, all such sanctionless resolves are open to the objection that they tend to foster the idea that peace is attainable by merely willing it, or by simply donning white robes and repeating over and over again in plaintive accents, "Peace! Peace! Peace!" Such an idea, if honestly carried to its logical consequences, could have no result except that of giving additional point to the old saying that it makes no difference to the wolf how many the sheep are.

The truth is, as I have so often said, there is no peace in the world, not even in our own domestic households, that is not commanded. In the last analysis, all peace rests on force. The fatal infirmity of most of the peace proposals of our time is their lack of all virile provision for their enforcement in the event of their being dishonored by some faithless State. No reasonable man imagines that the peace and order of any American city can be maintained unless they are properly policed. The same thing is true of the peace and order of any American State, or of the United States as a whole. The gunman, the robber, the thief, found in the bosom of even the most highly civilized societies, the large groups of men who, even in such societies, are deeply infected with socialistic, communistic, or other revolutionary ideas render the employment of the constable, the policeman, and the soldier indispensable for the preservation of social peace and political stability. If a person were to suggest that New York, Philadelphia, or Chicago should disband its police forces and rely wholly upon moral restraints, in one form or another, for the regulation of the criminal agencies which have made those cities such scandalous seminaries of crime in many respects, he would be set down as a madman or a fond old fool. Yet thousands of American men and women seem to think that international peace, the kind of peace that is perpetually threatened by the inherited animosities, the greed, the passions, and the rivalries of embittered or emulous States, and is the most difficult of all kinds of peace to be kept inviolate, need not be policed by anything except biblical texts and toothless peace pacts. Such was not the thought of the great Americans, Republican or Democratic, who were the chief inspiration of the peace movement in this country which led up to the establishment of the League of Nations and its court. It was of the League to Enforce Peace, a league formed before the creation of the League of Nations, that ex-President Taft was president. It was also before the creation of the latter league that Theodore Roosevelt used these words so truly characteristic of his practical intellect:

> What is needed in international matters is to create a judge and then to put power back of the judge. The policeman must be put back of the judge in international law just as he is back of the judge in municipal law. The effective power of civilization must be put back of civilization's collective purpose to secure reasonable justice between nation and nation.

As we all know, Woodrow Wilson gave such a robust approval to all the provisions of the covenant of the League of Nations, including those which look to the exercise of military power in certain contingencies, that, on one occasion, he pronounced the guaranty in that covenant of the territorial integrity and existing political independence of all members of the league its very "heart."

Far removed indeed from the views of these great men are the pithless statements made by Mr. Kellogg in his address before the council of foreign relations, in the city of New York, on March 15, 1928:

> The United States can not obligate itself in advance to use its armed forces against any other nation of the world. It does not believe that the peace of the world or of Europe depends upon or can be assured by treaties of military alliance, the futility of which as guarantors of peace is repeatedly demonstrated in the pages of history.

That is to say, applied to a concrete case, now in a state of acute inflammation, the statements expressed by Mr. Kellogg come to this: Bolivia and Paraguay are signatories to the Kellogg peace pact, renouncing war as an instrument of national policy and binding all its signatories to the obligation never to seek the settlement or solution of any kind of dispute or conflict between them except by pacific means. A dispute or conflict between Bolivia and Paraguay comes to a head just as delegates from those two countries, along with the delegates from other South and Central American States, are settling down in their seats at the pending Pan American conference in this city over which the spirit of the Kellogg peace pact is supposed to be brooding like a tranquillizing halcyon.

War between Bolivia and Paraguay appears to be imminent. The Bolivian delegates, forgetting to renounce the renunciation of war as an instrument of national policy to which Bolivia subscribes in the Kellogg peace pact, withdraw from the conference. The League of Nations, the only international agency in the world which has any real power of arresting by military or other means impending war between two nations, takes up the situation. Is Mr. Kellogg, then, finding that his peace pact is a mere puff of wind to notify the League of Nations that the United States can not only not undertake itself to interpose in the quarrel between Bolivia and Paraguay for the purpose of bringing hostilities between them to an end, but that, because of its time-honored Monroe doctrine, it can not permit the league to do so? Can anything be plainer than that under such circumstances the United States not only refuses to assume its share of responsibility for world peace, but selfishly refuses to permit civilized powers with more sagacious and generous ideas of international policy than its own to do so?

If we are to recognize our duty to make an effort in concert with the other great civilized commonwealths of the world to keep the scourge of war in check, to avert the tragic necessity of again sending our youth overseas to die in the lousy and blood-stained trenches of France, or some other land, and to avoid an addition to the oppressive burden of debt and military compensations which now rests upon our shoulders, we must have the courage to share all the noble risks that the other confederated members of the family of nations are taking for the purpose of enabling humanity to execute its divinely appointed mission without the bloodshed and the moral and economic disasters produced by war. We must remember that in Bunyan's immortal allegory, without the protecting sword of Greatheart, the innocence of Christiana and Mercy, and Christiana's children, even though as blameless as that which the Kellogg pact assumes to exist in the breasts of nations, would never have sufficed to safeguard their journey through the dread perils and tribulations of the world to the Eternal City.

The United States must abandon the unreal make-believe policies of peace which find their supreme expression in the Kellogg peace pact. It must enter the World Court; it must enter the League of Nations, which, with the accession of its enormous wealth, power, and humanitarian fervor and prestige, would become even more conspicuously than now, the most promising agency that human history has ever known for the restraint of war and its monstrous crimes and ghastly terrors, and is even now engaged in a resolute movement to bring about general disarmament.

When Thales once said that death and life were the same, some one asked, "Why, then, do you not kill yourself?" "Be-

cause," said Thales, "it is all one." Convinced that many thousands of kindly, worthy men and women in the United States earnestly wish for the ratification of the Kellogg peace pact, but that it will never prevent a single war, I feel that it is really all one whether I vote in favor of its ratification or not. However, it seems to me that the joint participation in it of the United States and the other great civilized powers of the earth might, in at least some appreciable degree, tend to hasten the entry of the United States into the World Court and the League of Nations; and I shall, therefore, under the determining influence of this thought, vote in favor of ratifying the mighty, multilateral Kellogg peace pact, which may the prayers of the pious induce heaven to prosper far beyond my present expectations!

CONSTRUCTION OF CRUISERS

Mr. GILLETT. Mr. President, inasmuch as I shall not be able to be here when the bill for the construction of cruisers comes before the Senate, I wish to address the Senate now for about 15 minutes upon the bill.

When the naval bill was before us two years ago I voted against the appropriation for cruisers. I hoped that the naval conference then impending might make their construction unnecessary, or that at any rate it would result in some agreement under which we could project a definite and permanent mutual program. I thought England needed an economical and reduced program more than we did, and would probably agree to reasonable restrictions. Moreover, I felt that a breach with England was almost as improbable as it was baneful; that despite our polyglot population there was a general harmony of our aims and purposes and instincts with those of Great Britain which would make war with her very unlikely and which would lead the two nations to stand together as a common bulwark for the peace of the world. I felt great sympathy with her economic and industrial condition and with her outlook for the future, burdened with a heavier load of taxation than any nation ought to carry; and I thought, although she bore it with marvelous grit, she would welcome the opportunity which the naval conference offered for a great and permanent tax reduction.

But I was mistaken. Apparently her traditional impulse that Britannia shall rule the waves was stronger than her economic necessities, and she preferred to excite our rivalry rather than our cooperation. Perhaps that ought not to surprise us. When a nation has for generations been saturated with the conviction that her safety depended on a navy superior to any other power, when the glorious exploits of that navy had furnished the proudest records of her military annals as well as the surest bulwarks of her defense, thus winning the support both of national sentiment and national interest, and when this very generation has owed its salvation to that historic naval policy, it would not be easy to renounce it, and it would be dangerous for any administration to openly discard it. I make allowance for those conditions, and I do not mean to permit myself to be influenced by pique or affront or to be driven from one extreme to another; but in calmly considering the whole situation and the probabilities of the future, I have concluded that I must revise the fundamental principles which have governed me and must favor a more extensive and formidable force at sea than I had hoped would ever be necessary. Much is said about not engaging in competitive building, but building only for our own needs. But our needs depend on our competitors. If no other nation had any vessels which could be used for making war our safety would require none. And while it is disagreeable to contemplate any war, and much more a war with any particular nation, yet so long as other nations persist in preparing for it we can not lie a mere unresisting and helpless booty for the first well-armed aggressor.

How much, then, do we need? If we can not by agreement with our chief rivals make ourselves secure, we must accomplish the same result by building up to substantial equality. For we can not forget that the principal nations fancy that they have a grievance against us, they will all be our debtors for generations, and our wealth makes us an attractive prey. Moreover, with some of them, notably with Great Britain, we are sure to have keen trade rivalries. Large foreign trade is essential to her industrial life; it has also become a large factor in our prosperity, so that competition and friction is sure to develop and increase. Some of her prominent men seem willing to inflame it. The dean of St. Paul's recently said that in a certain contingency—

> it is more than possible that the nations of Europe, enraged by the bloated prosperity and airs of superiority of "the man who won the war," would combine to draw Shylock's teeth.

When a high dignitary of the English Church and a professional follower of the Prince of Peace parades such provocative and belligerent sentiments, we can hardly rely upon the pacific and friendly attitude of all the rest of the English people. Her statesmen have always been far-seeing men, never blind to the material interests of their country; so while I do not doubt the sincerity of their professions of friendship and kinship, while they can not fail to see the certain disaster to the British Empire in this hemisphere which a war with us would entail, yet if they are unwilling to reduce down to naval equality with us, when they seem to be secure against any other nation, I see no safe course for us except to increase our armament.

At the Washington conference we were the Nation whose naval program under way was the largest and who sacrificed the most ships by the final agreement. I hate to believe that that is the only condition under which we can attain a successful conference for limitation of armament, and that when it is some other nation that has the temporary preponderance no sacrifice will be made and no agreement secured.

England insists that as she depends on importations for her food and very life she must have a sea force adequate to protect her trade lines. We can provide our own food. And yet our foreign trade is indispensable. In amount there is no great difference between us. And while without it we could probably live, it would require new adaptations. Our transportation systems, both railroad and automotive, would break down, and our eastern cities, housing many millions, have only 48 hours' food. Yet manganese is requisite for the steel of our railroads and rubber for our automobiles. And there are innumerable other foreign products which, while not essential to our existence, have become necessary to our comfort and our habitual mode of life.

The ocean lanes they travel are as long and as subject to attack as those leading to England. Moreover, while she has, all over the world, harbors for safe refuge and supplies, we have but few. I always like an excuse to quote Webster's beautiful description of this phase of England's greatness—

> a power which has dotted over the surface of the whole globe with her possessions and military posts, whose morning drumbeat, following the sun and keeping company with the hours, circles the earth with one continuous and unbroken strain of the martial airs of England.

This gives her stations for defense and coaling in every sea, while we have hardly any. Consequently, we need cruisers of large coal-carrying capacity, while smaller ones, which for us would be useless, meet all her needs. So there was a reason behind her willingness at the last conference to limit large, but not small, cruisers; and as England refuses any reductions or agreement which would make our cruiser strength comparable, I see for us no alternative except to build enough to be a safe protection. England has no navy in Europe to fear.

It is disagreeable to contemplate these hostile possibilities. It is still more disagreeable to speak of them. But it is dangerous to shut our eyes to them and lull ourselves with a false security. I thoroughly agree with the sentiment of the English statesmen who say that war between the two countries is unthinkable. It would be a crime against statesmanship, against humanity, against civilization, against self-interest. Indeed, according to Benjamin Franklin, all war is against self-interest. But all these arguments and reasons against war are sometimes forgotten and ignored in a sudden flame of passion. After the Revolution we had the strongest bonds of sentiment and interest with France, yet within 20 years the warships of the two countries were fighting each other, and a declaration of war was barely averted. I will stand for every rational effort to assure peace. By agreements against war, by agreements to arbitrate, or refer disputes to courts, which look now to be the most hopeful substitutes for war, I will seek to make war impossible. By reduction of armaments which both discourages war and saves expense and rivalry, I would strive for peace, but until our rivals will agree to limit their sea power, we must not be so far behind them as to be defenseless—and that is all, it seems to me, which this naval program contemplates.

But, it is said, why increase our Navy just as all the nations have agreed to renounce war? Are these peace pacts meaningless? Do they not enhance the prospects of peace and lessen the prospects of war? Ought they not to mean an increase of friendships instead of warships? Should they not be followed immediately by a large reduction instead of increase of armaments? With the spirit of these complaints and criticisms I am in hearty and complete accord. I think they are very natural and logical. To be sure, we have not yet ratified the Kellogg pact, but I am confident that we will.

It seems to me that, considering our station in the family of nations to-day, it is our plain and imperative duty to speedily

ratify that treaty as it stands, and I would take great risks before I would see my country reject or modify what all the rest of the world, under the sponsorship of the United States, seems likely to accept.

I consider these treaties a great achievement, a substantial step toward universal peace. They vastly reduce the chance that any dissatisfied or ambitious nation will dare to affront public opinion by resort to war. And it does seem inconsistent with one and the same breath to vote a renunciation of war and an increase of warships. A great reduction of armament should be the first fruit of these treaties. That would be the best evidence that the nations were sincere and earnest in their renunciation of war. And this country with its strength and isolation ought to be most forward and urgent in pressing such reduction. But it must be by joint action of the great powers. No nation will venture to abandon its defenses if its rivals give no evidence except by words of their purpose to disarm. For agreeing not to fight does not guarantee eternal peace. There have been many formal agreements of everlasting friendship which have not endured. This is, I think, the most hopeful and promising of such agreements ever made, because it voices the sentiment of peoples whose opinions and utterances have more weight in determining national action than ever before. But under stress it may be broken. No nation is yet so assured as to throw away its arms. That must come gradually, by mutual agreement, as confidence grows with experience and cooperation.

Indeed, I think one danger of the treaties is that the people will feel that they are self-executing, that we have done our full duty to the world by ratifying them, and will feel no responsibility for further effort toward peace. But we must still provide some substitute for war, although these treaties lessen its probability. They ought to facilitate and hasten disarmament agreements among the nations. That is the method by which we should seek a general and radical and progressive diminution of navies and not by an improvident and quixotic reduction by ourselves alone. With our wealth we ought to be most zealous in urging and adopting such agreements. We ought to be willing, as we were in 1921, to make the largest sacrifices.

But we ought to be met part way, and the mutual sacrifices ought to be discussed frankly and aboveboard. And until such disarmament can be consummated by compact with other nations we must continue to make the insurance of our national security by the navy commensurate with the risk, and I do not feel that we are exceeding that by the pending naval program. I hope agreements may soon be made under which it can be greatly retrenched.

I do not wish it to appear from these remarks that I belong to that not inconsiderable class of Anglophobists. The exact contrary is true. I confess to more sympathy and good will toward the British Empire than toward any other nation. I think our ideals, our spirit, and even our prejudices are much alike. I do feel that she snubbed our advances at the last disarmament conference, but I hope our offended pride will not prevent our renewing such advances, for I think our cooperation provides the best chance for the peace and progress of the world. We are not so engrossed in our material advancement as to leave no room for a spirit of altruism. The great body of our people are eager to do their share for the peace and prosperity of the whole world and are ready to make sacrifices for it and will demand that of their leaders. And while the two nations will often provoke each other, will often be keen trade rivals, will often feel envy and jealousy, and prominent spokesmen of both will often be indiscreet and irritating, yet I hope the genuine kinship and community of ideals which I believe permeates both will bring them constantly back into cordial amity and cooperation. But a Navy is our insurance. While there is risk we must insure. Yet our constant endeavor ought to be to reduce both the risk and the insurance. That certainly will be my aim, and the fact that we of late years have so increased in power and wealth—and as some nations think at their expense—instead of making us self-willed and arrogant, ought to make us the more considerate and yielding, so that this enormous outlay by all the nations for instruments of war, which everyone hopes will never be used, can by mutual agreement soon be radically abridged.

ARMY PROMOTIONS

Mr. BLACK. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Washington Times of December 14, an editorial from the Washington Post of yesterday, and an editorial from yesterday afternoon's edition of the Washington Evening Star, all bearing on the subject of Army promotions.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

[From the Washington Times, December 14, 1928]

REVISION OF ARMY PROMOTION LIST TO CORRECT INJUSTICES

On the calendar of the present Congress are two measures, known as the Black bill in the Senate and the Wainwright-McSwain bill in the House, which provide for the revision of the Army promotion list to correct injustices done certain groups of World War emergency officers now in the Regular Army.

These injustices were caused by a War Department interpretation which, in effect, ignored the grades of captain, first or second lieutenants for which these officers had been recommended by examining boards and "scrambled" them together indiscriminately solely in accordance with length of commissioned service.

Both Military Affairs Committees of Congress, by their favorable action in reporting out the legislation, are agreed that the present arrangement is wrong, and the Times is in complete accord with such views.

The clause in question reads that "captains and lieutenants shall be arranged in accordance with length of commissioned service," and, as Maj. Gen. Peter C. Harris, former Adjutant General of the Army, testified, this was generally understood to mean that captains would be placed among captains, first lieutenants among first lieutenants, and second lieutenants among second lieutenants. Such was the method used in placing the colonels, lieutenant colonels, and majors appointed as a result of the examinations, but the War Department did not follow that procedure in the lower grades.

By its ruling, men found qualified for no grade higher than second lieutenant were, if they had one day's more service, moved ahead of others who had been found qualified for appointment as captains, and these second lieutenants were then immediately promoted to captains and took rank above the original captains.

Why the War Department made such a ruling is now immaterial, but the fact remains that with the present list every regular officer has a chance to be retired as a colonel, while less than 450 of the more than 2,500 former emergency officers in the lower grades have this opportunity. Likewise the questioned interpretation enabled the sudden elevation of over 1,000 Regular Army first lieutenants to the grade of captain and the placing of them ahead of hundreds of emergency officers appointed captains. This is particularly unfair, as these regular lieutenants average about 10 years younger than the emergency captains, and therefore will forever act as a block on promotion.

Of course, such an interpretation, general in its terms, included in its results some emergency officers who profited equally with the regulars at the expense of their emergency brethren, but the records show them to be in the minority.

The House Military Committee is convinced that a "grave injustice was done and that a correction of this error can disturb no vested rights"; further, that "the obvious remedy is to place officers on the promotion list as they should have been placed in 1920–21." This is the viewpoint of Representative FRANK JAMES, a recognized impartial expert on military matters, who stated that he never thought the law could be interpreted as it was.

[From the Washington Post, December 14, 1928]

ARMY PROMOTIONS

Two measures affecting the important matter of Army promotions are before Congress. Each seeks to provide a remedy for the so-called hump that stands in the way of the promotion of many able officers. Although there is some sentiment in the Army against changing the existing status of the promotion list, justice to a large group of officers and maintenance of morale demand that this legislation be enacted.

Only officers of the company grade—lieutenants to captains—are affected by the legislation. Following the World War, examinations were held to fill vacancies created by the national defense act, as a result of which former emergency officers were appointed to all grades from colonel to second lieutenant. Those appointed colonel, lieutenant colonel, and major were placed among Regular Army officers of corresponding grades, but captains, first lieutenants, and second lieutenants, by an arbitrary interpretation of an act of Congress, were listed in accordance with length of service. Thus a man found qualified by examination for a grade no higher than second lieutenant, if he had served one day longer than a man found qualified to be a captain, was jumped from second lieutenant to captain, and will be a major before the captain. As a result, at the present time every Regular Army officer has a chance to become a colonel before he is retired, but relatively only a few of the younger emergency World War officers who elected to follow Army careers have similar opportunities.

The legislation before Congress proposes that the Army promotion list be arranged as it should have been in 1920, with captains placed among captains, first lieutenants among first lieutenants, and second

lieutenants among second lieutenants as originally appointed. In general, older men will be placed above younger men, but those who profited by the War Department interpretation will not be deprived of the grade and pay benefits thus obtained. The list will be so arranged that former emergency officers will have equal opportunity with Regular Army officers to reach the rank of colonel before they are retired.

For eight years the question of Army promotion has been dragging along. Congress now has an opportunity to right a wrong. It should enact the bill clarifying the promotion situation.

[From the Washington Evening Star, December 14, 1928]

ARMY PROMOTION

Revision of the Army promotion list, coupled with an alteration of the present promotion system, forms the subject matter of the Black bill in the Senate and the Wainwright-McSwain bill in the House. These two measures, which have been reported favorably by both Military Affairs Committees, are designed to correct an injustice done to certain former emergency World War officers who are now in the Regular Army by the War Department's interpretation of a portion of the national defense act of 1920. It seems to the Star a matter of simple justice that this legislation be enacted into law without further delay.

After the World War Congress provided that all temporary officers could take examinations for appointment in the Regular Army in all grades from second lieutenant to colonel and set forth the method by which they would be placed among those who were already in the Army. No confusion arose in the placement of the colonels, lieutenant colonels, and majors, but when it came to the captains, first lieutenants, and second lieutenants the War Department proceeded, in effect, to disregard the grades to which they had been appointed and to arrange them solely on length of service. The effect of this was that men who had been found not fitted to hold a grade higher than second lieutenant were placed over men who had been appointed captain as a result of the same examinations, and such second lieutenants were at once promoted to captaincies, a grade for which they had just failed to qualify.

The portion of the national defense act which was misinterpreted to produce such an incongruous hodgepodge reads as follows: "Captains and lieutenants shall be arranged among themselves according to length of commissioned service." Certainly one at all familiar with military matters would be entitled to assume that this meant that captains would be arranged among captains, first lieutenants among first lieutenants, and second lieutenants among second lieutenants; and Maj. Gen. Peter C. Harris, who was The Adjutant General of the Army at that time, has testified that he was greatly surprised to find a contrary interpretation placed on the clause and that he believed that the overwhelming majority of the Army never anticipated such an arrangement as the War Department produced.

Not only was the ruling considered a peculiar one in Army circles but both Military Affairs Committees of Congress have determined that the action taken was contrary to the majority intent of Congress itself. Representative FRANK JAMES, who was on the military committee at the time of the passage of the law and who is a recognized unbiased authority on military matters, has said: "I never thought that that law could be so construed that the man who is incompetent to pass an examination for first lieutenant, incompetent to pass an examination for captain, should outrank a man by several thousand files who had passed before you gentlemen a very satisfactory examination for captain. Now, if members of the committee, like myself—Members of Congress, like myself—think the language was not interpreted by somebody in the War Department as we intended at that time, and think injustice was done, we would be justified in trying to remedy that condition and having the law interpreted as we thought it was to be interpreted at that time, would we not?"

The Star finds itself in complete accord with the House Military Committee, which stated in its report recommending passage of the bill, "because the committee is convinced that a grave injustice was done, it is the sense of the committee that a correction of this error can disturb no vested rights" and further that "having determined that a wrong has been done, the obvious remedy is to present interpretative legislation which will result in placing officers on the promotion list as they should have been placed in 1920–21."

ADDRESS BY HON. ANDREW W. MELLON, SECRETARY OF THE TREASURY

Mr. CAPPER. Mr. President, on October 18, 1928, the Secretary of the Treasury, Hon. Andrew W. Mellon, made a notable address at the Founders' Day celebration of the Carnegie Institute, in Pittsburgh, Pa.

The address dealt in a most interesting and enlightening way with the development of the National Capital from its very beginning in the administration of President Washington.

Every American citizen should be interested in the plans for the beautification and ultimate development of the National Capital, and this applies particularly to Members of Congress who are charged with the sole responsibility for legislating for the District of Columbia.

Washington, the National Capital, should represent all that is best and finest in the development and progress of the United States. Every American who reads Secretary Mellon's address will gain a better understanding of what the National Capital is and should be. I ask, therefore, that Mr. Mellon's address be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

DEVELOPING THE NATION'S CAPITAL, AN ADDRESS BY SECRETARY OF THE TREASURY MELLON, OCTOBER 18, 1928, AT THE ANNUAL FOUNDERS' DAY EXERCISES OF THE CARNEGIE INSTITUTE, PITTSBURGH, PA.

Mr. MELLON. I want to speak to you on a subject somewhat different from those usually associated with the work of government at Washington. It has to do with the beautifying of the Nation's Capital and the carrying out of the original plan whereby the city of Washington shall become not only one of the most impressive capitals in the world but one which shall be representative of the best that is in America. The importance of the work was stressed by President Coolidge in his last annual message to Congress, in which he said:

"* * * If our country wishes to compete with others, let it not be in the support of armaments but in the making of a beautiful Capital City. Let it express the soul of America. Whenever an American is at the seat of his Government, however traveled and cultured he may be, he ought to find a city of stately proportion, symmetrically laid out and adorned with the best that there is in architecture, which would arouse his imagination and stir his patriotic pride. * * *"

Congress has made the necessary appropriation to initiate this work and to carry out the most important features of that long neglected plan of Washington and L'Enfant for the development of the city. The responsibility for carrying out this plan, by the purchase of sites and the erection of buildings, was placed by Congress on the Secretary of the Treasury and has become, therefore, an integral part of Treasury activities.

Before entering upon a discussion of what is to be undertaken, it is necessary to have a clear understanding of the historic background against which this work must be done. Washington, as you know, was founded for the express purpose of being the Nation's Capital. There have been only two other world capitals so founded—the former Russian capital of Petrograd and the newly created city of Canberra in Australia. To me there has always seemed something heroic about the early beginning of Washington. When we remember that at that time the entire country had a population of less than 6,000,000, that communication was difficult and the Government almost without financial resources, we marvel at the courage and vision of men who proceeded to build a city in a wilderness and to project it along lines so magnificent that even to-day we do not find it easy to carry their plans to completion.

The new capital was established in accordance with a provision inserted in the Constitution; and it thus became one of the first duties of the newly formed Government to carry this provision into effect. You remember how both the Northern and the Southern States desired that the Federal Capital should be located in their territory. The final decision was made in a way that settled another question then agitating the public mind. Alexander Hamilton, as Secretary of the Treasury, had succeeded in having the Federal Government assume the payment of all debts incurred by that Government in the prosecution of the Revolutionary War. But the assumption of the debts incurred by the States was another matter. The States with small debts felt that it was unfair to ask them to help discharge the larger debts incurred by other States, and opposed assumption by the Federal Government. As it happened, the States with small debts were mostly in the South, where it was ardently desired that the capital should be located. Hamilton felt that assumption of the debts was a vital part not only of his financial policy for establishing the public credit but of that larger purpose involved in tying the States together in a firm and indestructible union. He determined, as some one has remarked, to resort to the expedient of "giving a civility in exchange for a loaf of bread." He asked Jefferson, who represented the southern party, to give a dinner. At this dinner party, it was arranged that the capital city should be located in the South and in return the South agreed to support assumption of the State debts by the Federal Government.

Subsequently Congress authorized the capital to be established on the Potomac River and that President Washington be allowed to select the exact spot. He did so, with the aid of Jefferson and Madison; and these two with the three commissioners appointed to prepare the new seat of government, gave to the city the name of Washington and to the District the name of Columbia. Washington himself, throughout his life always modestly referred to the new capital as "The Federal City."

The President's next step was to secure the services of a man who should design the city. He chose Maj. Pierre Charles L'Enfant, a young French engineer officer, who had served in the Army during the Revolutionary War. L'Enfant was eminently suited for the task. He knew

Europe and was undoubtedly familiar with landscape architecture as practiced there by that greatest of all landscape architects, Le Nôtre, whose designs at Versailles and elsewhere have been followed throughout the civilized world.

L'Enfant threw himself into the work with enthusiasm. With Washington and Jefferson he worked out a plan for a splendid city, with a system of streets running from north to south and east to west. Superimposed upon this rectilinear arrangement were those diagonal avenues radiating from the Capitol and the White House, as do the spokes from the hub of a wheel. He sought to locate all public buildings in appropriate landscape settings and with especial regard to preserving the axial treatment, which is an outstanding feature of Le Nôtre's work. These buildings were to be grouped along a beautiful park a mile long, connecting the Capitol Building with the President's park south of the White House. A great avenue was to border this park, flanked on one side by public buildings; and at the point where the axis of the White House intersected the axis of the Capitol was to arise the monument to Washington already voted by the Congress. It was a noble plan, and if carried out will give to the city of Washington that sense of unity and grandeur which so impresses one to-day in Paris.

During the first hundred years the city of Washington suffered many vicissitudes. It struggled into existence as best it could with little regard for the plan of L'Enfant or any other plan. On the removal of the Federal Government from Philadelphia in 1800 the new city was almost as much of a wilderness as it had been a little earlier when the Indians of the Powhatan Tribe held their councils at the foot of Capitol Hill. Fortunately the Capitol Building and the White House had been started before the death of Washington, and so the main axes of the new city had been fixed. Both buildings were badly burned during the British raid on Washington in 1814, but were soon restored in accordance with the original designs, and in the case of the Capitol the wings and dome were added a few years later. During this same period of good taste the Patent Office was built and also the present Treasury Building, two of the architectural glories of Washington.

I would like to say a word about the Treasury. The building in which it was originally housed was destroyed by the British in 1814. The new building, erected in its place, was destroyed by fire in 1833, and finally in 1836 the present building was begun on the site designated by President Jackson. It was commonly reported that, becoming wearied of the delay in selecting the location, General Jackson planted his cane one morning at the northeast corner of the present site and said, "Here, right here, I want the corner stone laid." And it was laid there, notwithstanding the fact that, when finally completed in 1869, the south wing was interposed between the Capitol and the White House, and thus shut off the vista at that end of Pennsylvania Avenue.

Before leaving this subject I would like to say a word also about the White House. It is so perfect in proportion and design that it merits special comment. But what has seemed to me remarkable is that a building which was planned for a small and struggling Nation and situated in what was at that time a backwoods capital should have proved adequate for the needs of one of the greatest and most powerful nations in the world to-day. Such things do not come about by accident. It was surely due to the extraordinary foresight of some one, and that person, it is interesting to know, was Washington himself. Following the adoption of Hoban's plan for the White House, Washington directed that the size of the building be enlarged one-fifth over the original plan, notwithstanding the difficulty of meeting the increased cost involved. The President's reason shows his intensely practical mind. He said: "I was led to this idea by considering that a house which would be very proper for a President of the United States for some years to come might not be considered as corresponding with other circumstances at a more distant period; and, therefore, to avoid the inconvenience which might arise hereafter on that subject, I wished the building to be upon the plan I have mentioned." Washington's views were carried out; and so we owe one more debt to that great man, who, more than any other single individual, gave us not only our country but our National Capital as well.

Unfortunately, after his death there was no driving force, either in Congress or elsewhere, which could carry out his plans for the city's development. The end of the Civil War found it a badly built, straggling town, largely unpaved, with a few streets lighted by oil lamps, and the areas reserved for parks overgrown and neglected. Later President Grant induced Congress to give the city a Territorial form of government; and under Alexander R. Shepherd, a man of extraordinary energy, courage, and vision, who became commissioner of public works, the city was transformed. He succeeded in grading, paving, and lighting the streets; the old Tiber Creek was inclosed in a sewer; and thousands of trees were planted, thus laying the foundation for that growth of trees which is now one of the glories of Washington. During this period one great work, the half-built Washington Monument, was carried to completion in 1884. But the Mall, on which it was placed, had never been properly developed, and throughout the entire city the effect for which Washington and L'Enfant strove was entirely lacking.

Such was the condition of the Nation's Capital in 1900, when the one hundredth anniversary of the establishment of the seat of government in the District of Columbia was celebrated. At the invitation of President McKinley a meeting was held in the White House attended by many high officials of the Government and by the members of the American Institute of Architects then meeting in Washington. Interest in the L'Enfant plan was revived; and shortly afterwards Senator McMillan secured authority from Congress for the appointment of a special commission of experts, who should recommend a plan for the beautification and development of Washington.

That commission included Daniel H. Burnham and Charles F. McKim, architects; Augustus St. Gaudens, sculptor; and Frederick Law Olmsted, landscape architect. It was a notable group, such as has seldom been brought together in one undertaking. Burnham, McKim, St. Gaudens, and the father of Olmsted had brought about those beautiful architectural and landscape effects at the Chicago World's Fair in 1893, which gave an impulse to city planning and to the rebirth of beauty and good taste in this country.

After a careful study of Washington and its possibilities, these men presented a report, known as the plan of 1901. In it they recommended a return to the original plan of Washington and L'Enfant, with such extension of it as might be required to meet modern conditions and the city's growth. After submitting their report the commission passed out of existence, but its members were consulted unofficially by Presidents Roosevelt and Taft with regard to the location of public buildings and memorials. Later Mr. Burnham and Mr. Olmsted, who were the only members then living, were made members of the Commission of Fine Arts, a body created by Congress in 1910 to serve in an expert and advisory capacity regarding questions affecting the development of Washington. This commission, which was established during the administration of President Taft, owes much to the backing which he gave it and also to the interest and understanding of Mr. Root. Under the chairmanship of Mr. Charles Moore, it is now doing splendid work for Washington and the country.

The commission has adhered to the plan of 1901 as a restatement of the authority of the L'Enfant plan and has insisted that this plan must continue as fundamental in the development of Washington. In more than a quarter of a century since the plan of 1901 was presented much has been accomplished. The unsightly railroad tracks have been removed from the Mall; and, due largely to the cooperation and public spirit of a distinguished son of Pennsylvania, President A. J. Cassatt, of the Pennsylvania Railroad, a great Union Station has been built in accordance with the plans of the commission. The station and also the beautiful city post office adjoining it, have been placed in a position subordinate to the buildings on Capitol Hill, but in a harmonious and vital relation to them. In this way a traveler arriving in Washington gazes first across a beautiful plaza to the great dome of the Capitol and the Library of Congress beyond. To-day this station stands like a great city gate at the entrance to the city; and, while much remains to be done in clearing off the space intervening between it and the Capitol, the Union Station, itself, in its architectural and landscape treatment, has already helped to establish a precedent by which railroad stations in this country have come to be recognized as public buildings of the first importance.

The plan of 1901 considered the Capitol as the dominating feature to which all structures in the legislative group must be subordinated. The Library of Congress, facing the Capitol, had been built in 1897; but in the later structures, such as the white marble office buildings for the use of Senators and Congressmen, the principle of subordination in grouping has been observed. It will be carried out in the erection of a building for the Supreme Court in the vacant space facing the east front of the Capitol and flanking the Library of Congress.

At the foot of Capitol Hill, looking toward the Treasury and the White House, the plan of 1901 contemplates that there shall be a great open plaza with monuments and fountains somewhat like the Place de la Concorde in Paris. It was intended that this space should provide a dignified entrance to Pennsylvania Avenue and also into the Mall leading westward to the Washington Monument a mile away. The memorial to General Grant has been located in this space in accordance with these plans, but there progress has stopped.

The development of the Plaza and the Mall has been delayed until arrangements could be made for the removal of the Botanic Gardens to larger and more suitable quarters on land to be acquired on the west front of the Capitol. The State of Pennsylvania has erected a memorial to Gen. George Gordon Meade, as a companion to the Grant Memorial, and in doing so has also provided for suitable landscape setting in accordance with the Mall plan. Thus these two memorials will stand in the great Union Plaza at the head of the Mall and the way will be open at last, under plans now being made by the National Capital Park and Planning Commission, to complete the developments required to make the Mall into a beautiful park.

First, it will be necessary to demolish the temporary buildings and the smokestacks erected during the war. Then a great avenue of greensward, bordered by drives and lined with four rows of stately trees, will be projected through the Mall, leading westward from the Capitol and the Union Plaza to the Washington Monument and the Lincoln Memorial beyond. Along this avenue, at intervals, will be such buildings as the Agricultural Department, the Freer Gallery, the National Museum, and the Smithsonian Institute. This avenue will end at the Washington Monument; and, beyond the monument, at the point where the new axis meets the Potomac, has been placed that beautiful white marble structure, the memorial to Abraham Lincoln.

From the foot of the Lincoln Memorial a great bridge, commemorating the union of the North and South, is now in process of building. When completed it will lead across the Potomac to the slopes of Arlington, where, surrounding a mansion once the home of Gen. Robert E. Lee, are the graves of those who died in their country's service, including that newly erected national shrine, the Tomb of the Unknown Soldier. From Arlington a boulevard will stretch to Mount Vernon, the home of Washington; and all of this region and the section known as Potomac Park, with its river drives and famed cherry trees, will be joined, under plans now being carried out, with Rock Creek Park and that section of the city where the great Gothic cathedral is rising on the wooded heights of Mount St. Alban.

Now, I must ask you to return for a moment to a consideration of another vast project which will eventually realize L'Enfant's dream for a great avenue bordering the Mall and leading from the Capitol to the White House. You are familiar with the distressing spectacle which Pennsylvania Avenue presents to-day. It is perhaps our most important street, and certainly there is no avenue of corresponding importance in any capital which can compare with it in sheer ugliness or lack of architectural dignity. It is the street over which our great processions pass in triumph to the Capitol. Yet never, in the days of either the ancient or the modern world, has anyone seen before a great triumphal way bordered, throughout much of its length, by gasoline stations, lodging houses, and Chinese laundries.

This state of affairs, I am glad to say, will soon be remedied. Congress has determined that the Capitol shall be approached by an avenue commensurate in dignity with its importance. Senator SMOOT, who has such a clear conception of the future possibilities of Washington, has taken the lead in this work; and he has been ably seconded by Senator SWANSON, Senator BRUCE, Congressmen ELLIOTT, LANHAM, and others. An appropriation of $50,000,000 has been made, supplemented last winter by an additional $25,000,000, and other amounts will be forthcoming as the work progresses. The amounts already appropriated will be used to initiate the most important features of the plans for Washington's development, with special regard for the Mall and for improving Pennsylvania Avenue.

The Secretary of the Treasury was authorized to use this money in the purchase or condemnation of land and the erection of public buildings. It is intended to carry through, as rapidly as possible, the most pressing needs as regards housing of Government departments and activities. These will include a new and larger building for the increased activities of the Department of Commerce; a Supreme Court building; a building for the Bureau of Internal Revenue; an archives building; a building for the Department of Agriculture; another for the Department of Justice; still another for the Department of Labor; and several others besides. One of these buildings, that for the Supreme Court, will be placed on Capitol Hill for reasons already given; but, as regards the others, advantage will be taken of this opportunity to group them together in such a way as to contribute in the greatest measure possible to the beauty of Washington. The placing of these buildings is a great responsibility, for on the proper determination of this question largely hinges the city's future development.

Before coming to a decision, the Secretary of the Treasury consulted with Mr. Edward H. Bennett of Chicago, who has had so large a part in bringing to completion the extensive plans for beautifying that city. Mr. Bennett was appointed consulting architect to the Secretary of the Treasury; and, under his advice, and also in consultation with the Fine Arts Commission, Col. U. S. Grant, 3d, of the Office of Public Buildings and Public Parks, and Assistant Secretary of the Treasury Schuneman and Supervising Architect of the Treasury Wetmore, the general principle has been established that no large departmental buildings are to be placed in the Mall, as was at first proposed, but that the Mall is to be preserved for park purposes and as a site for buildings of a museum-like character.

Departmental buildings are to be placed along the south side of Pennsylvania Avenue from the Treasury to the Capitol. In addition to facing on Pennsylvania Avenue, these buildings will face also on a grand boulevard, which is to be cut through the city, bordering the Mall and stretching from the Capitol to the new Memorial Bridge on the Potomac near the base of the Lincoln Memorial. Plans are now being made to secure a comprehensive treatment of this entire area between Pennsylvania Avenue and the new boulevard both as regards the location and the grouping of the various buildings. A group of the leading architects of the country has been formed to study this problem and to submit designs for all the buildings in this area. It is intended that these buildings, while having each a separate and distinctive architectural treatment, shall be of harmonious design and grouped around two large interior courts or plazas somewhat after the arrangement of the Louvre in Paris.

It is easy to see what the effect will be. As one proceeds down Pennsylvania Avenue toward the Capitol, on the south side will be a succession of beautiful and harmonious buildings, all of a design in keeping with the semiclassical tradition so well established in Washington. On the north side vistas will be opened up, so that groups of buildings, such as the beautiful District of Columbia courthouse on John Marshall Place, shall be brought into the general plan of Pennsylvania Avenue. At the same time the Mall will present the spectacle of a great park bordered on one side by the new boulevard lined with beautiful buildings, and on the other side by a wide parkway of greensward with its four rows of trees, its drives and walks, statues, and reflecting pools, arranged in such a way that long vistas will be opened up for views of the Capitol in one direction and the Washington Monument and Lincoln Memorial in the other.

All of this will take time, of course. But Rome was not built in a day, nor for that matter was Paris. Paris has passed through many stages, each distinct from the other. The Gothic Paris is as different from the Paris of the Renaissance as the Paris of Louis XIV differs from that of Napoleon III. Go about in modern Paris and it is with difficulty that one can trace the landmarks of the past. Yet, somehow, in spite of her vicissitudes and of having no fundamental plan from the beginning as Washington had, Paris possesses that sense of unity and completeness so rare in any great and growing city. All its principal buildings seem to fit into the landscape and to be part of a general plan so magnificent in conception and execution that it makes one wonder whether an effect equally satisfactory and on a scale and design suited to our needs can ever be produced in Washington.

And yet, Washington has many advantages in so far as its future development is concerned. Its life centers around the Government, as those who planned the city intended it should do. There is no manufacturing; and the engineering and industrial problems, which have to be met at such expense and effort in great industrial centers like Pittsburgh and Chicago, are entirely absent. Washington is still a city of moderate size, notwithstanding the fact that its population has grown from 75,000 at the time of the Civil War to about half a million to-day. But so long as it remains chiefly a seat of government it will retain its unique character among the cities of the country. More and more it will be visited by people who will go to Washington because of its beauty and their feeling of pride and personal ownership in the Nation's Capital. With the rapid growth in the use of automobiles and of airplanes, larger and larger numbers will visit Washington each year. As it becomes more beautiful and its fame grows, people will visit it from all parts of the world and Washington will find, as Paris has done, that architectural and landscape beauty can be a source of profit, as well as pride and satisfaction, to a city.

But there are weightier reasons than these why we should give our support to the effort to rebuild our National Capital. Until recently, America has been in the frontier stage as nations go. We were too busy about the hard realities of existence to have much time for the amenities. But now we have the opportunity and we have also the resources to raise the standard of taste in this country; and the extent to which this is being done has no parallel at present in any country in the world. Nowhere are the arts of architecture and landscape engineering being practiced more extensively and successfully than in America.

It has been said that in evolving the skyscraper we have made the only original contribution to architecture since the Gothic. Certainly in adapting architecture to the needs of modern conditions and crowded spaces we have produced something that is expressive of human aspiration and human need. Judged by that standard, the Woolworth Building is a work of art, both because it is beautiful in itself and because it expresses the needs and aspirations of a great people. If we can give to our office buildings something of the beauty of Gothic cathedrals and model our banks and railroad stations after Greek temples we shall in time provide a magnificent setting for the requirements of modern civilization.

But we must remember that just as these things are architectural expressions of the Nation on its commercial side, so should the city of Washington, as President Coolidge has said, express the soul of America. We do well, therefore, to give to it that beauty and dignity to which it is entitled. In doing so we are not only carrying out those plans which Washington made so long ago for the city which he founded, but at the same time we are justifying that faith which he had from the beginning in the future greatness of America.

ADJOURNMENT

Mr. CURTIS. I move that the Senate adjourn.

The motion was agreed to; and (at 1 o'clock and 20 minutes p. m.) the Senate adjourned until Monday, December 17, 1928, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

SATURDAY, *December 15, 1928*

The House met at 12 o'clock and was called to order by Hon. William Tyler Page, its Clerk, who read the following communication from the Speaker:

THE SPEAKER'S ROOMS,
HOUSE OF REPRESENTATIVES, UNITED STATES,
Washington, D. C.

I hereby designate Hon. JOHN Q. TILSON to act as Speaker pro tempore to-day.

NICHOLAS LONGWORTH.

Mr. TILSON assumed the chair as Speaker pro tempore.

The SPEAKER pro tempore. The House will be in order. The Chaplain will offer prayer.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Thou who art the Lord of life and light, conquering sin and doubt, sorrow and despair, we thank Thee that there is nothing that stands in the way of Thy perpetual care. In the days when winter cold blights the bloom of summer and we can no longer commune with field and flower, Thou dost blossom in the garden of the human heart and light up the firmament of the soul. At the turn of each day a bountiful Providence meets and greets us on the stairway of human need. There is no fartherest limit to the richness and the blessedness of our Heavenly Father. Way down beneath all finite measures, making as secure as time, the sleepers of the old earth, lie the loving, abiding purpose and plan of Almighty God. Oh, let the beauty of the Lord be upon us this day. Amen.

The Journal of the proceedings of yesterday was read and approved.

AMENDMENT OF THE WORLD WAR VETERANS' ACT

Mr. GARBER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the subject of the administration of the Veterans' Bureau, incorporating therein a resolution by the American Legion of Oklahoma.

The SPEAKER pro tempore. The gentleman from Oklahoma asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

Mr. UNDERHILL. What is the gentleman's request?

Mr. GARBER. To extend my remarks on the subject of the administration of the Veterans' Bureau.

Mr. UNDERHILL. The gentleman's own remarks?

Mr. GARBER. Yes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. GARBER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following resolutions:

Resolutions

Whereas many disabled veterans of the World War are complaining of the unsatisfactory attitude and decisions of the claims and rating boards, and that the claims and rating boards are disregarding the spirit and the provisions of the World War veterans' act governing such boards; and, in view of the fact that the Veterans' Bureau rules provide that a claimant shall receive the benefit of a doubt existing it is alleged that the claims and rating boards in a great many instances fail to give the claimant any such benefits; and

Whereas regulation 74, of August 12, 1924, provides that the regional managers designate who the members of the claims and rating boards shall be, and it is provided further that such designation must be confirmed by the director; and

Whereas it has come to the attention of many ex-service men that this ruling or law of the bureau is entirely ignored by central office; and

Whereas the attention of the American Legion is directed to the fact that many claimants' folders are taken from the regional office to the central office without the claimants' knowledge, and many decisions are reversed without the claimants being given a hearing or a reason for the reversal; and

Whereas the American Legion's policy advocating decentralization is well known, in so far as it might expedite the proper adjustment of a disabled veteran's claim: Therefore be it

Resolved by the joint meeting of the post officers, American Legion, Department of Oklahoma, in session assembled, That we recommend to the Members of the Oklahoma congressional delegation that an amendment be made to the World War veterans' act providing that the director may appoint members of the claims and rating boards from a list submitted by the regional manager; and providing further that the assignment of such board members shall be made by the regional manager, and that any member may be removed by the regional manager where a disregard of Veterans' Bureau laws and rulings is shown; and be it further

Resolved, That a copy of these resolutions be immediately mailed to each Congressman and Senator representing the State of Oklahoma in Congress, and that a copy be immediately mailed to each of the members of the department executive committee of the American Legion of Oklahoma.

The above resolutions, approved by unanimous vote of Argonne Post, No. 4, Enid, Okla., and the contents of which were embodied in the resolution approved by a meeting of the officers of all American Legion posts in Oklahoma at Oklahoma City, December 3, 1928.

INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. MORROW. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the bill passed by the House yesterday upon the subject of the Carlsbad Cave.

The SPEAKER pro tempore. The gentleman from New Mexico asks unanimous consent to extend his remarks in the RECORD upon the bill passed yesterday. Is there objection?

There was no objection.

Mr. MORROW. Mr. Speaker, I make reference to H. R. 15089, a bill making appropriations for the Department of the Interior for the fiscal year 1930, and for other purposes. This bill carries an appropriation for the Carlsbad Cave National Monument, N. Mex., in the sum of $100,000; the amount will afford the carrying on, development, and preservation of the caverns. The bill likewise carries the acceptance by the Secretary of the Interior of a parcel of land in the town of Carlsbad, N. Mex., which has been tendered to the United States of America in fee simple. This is the donation of a site for the construction of a residence for the superintendent of the monument. The bill also carries an appropriation of $5,000 for the construction of the home for the superintendent.

The $100,000 appropriation provides specifically the following improvements:

Operation of a motor-driven passenger car for the use of the superintendent and employees in connection with the work of the monument	$800
Construction and improvement of the caverns	59,000
Addition to the office building	1,500
Power house	4,000
Additional water supply and water storage	12,000
Disposition of sewerage	2,000
Construction of a garage	500

The people of New Mexico in general, and of Carlsbad in particular, should be very appreciative of the time given by, and the complete investigation made by, the subcommittee of the House Appropriations Committee for the Interior Department. This subcommittee made an inspection of the national monuments and other Government-controlled properties in my State in the summer of 1927. The possibilities for developing the Carlsbad Caverns were seen, and as a result the Appropriations Committee was most fair in its appropriation for the caverns for the fiscal year 1930. The personnel of the subcommittee [Mr. CRAMTON, of Michigan; Mr. TAYLOR of Colorado; and Mr. FRENCH, of Idaho] should have the appreciation of the State of New Mexico, and especially of the eastern part of the State. The broad view taken by the committee in permitting the fees received from the tourists who visit the caves, to be placed in a fund to be used for the development of the caverns, is indeed commendable.

Most assuredly a vast forward step has been taken by the Government in exploring and developing the Carlsbad Caverns, N. Mex. When the Interior Department appropriation bill for the fiscal year 1926 was being considered on December 6, 1924, I offered the first amendment in behalf of the Carlsbad Caverns. That bill carried an appropriation of $21,980 for all national monuments. The amendment I offered to that provision is of record, as follows:

Amendment by Mr. MORROW: Page 97, line 12, after the comma strike out the word "and" and in line 13, page 97, after the comma insert "and $20,000 for constructing a tunnel into Carlsbad Caves, N. Mex.," and change the figures "$21,980" to "$41,980."

Let us note the appropriations for Carlsbad Caverns from the year 1924 to the fiscal year 1930 and we will see how the subcommittee has realized the importance and grandeur of the caverns. Figures from the National Park Service show the following appropriations:

1925	$5,000
1926	25,000
1927	15,000
1928	30,000
1929	70,000
1930	100,000

At the time I offered the first amendment, Congress had perhaps never heard of the caves. Publication of pictures of the caverns had been made by the National Geographic Society, but the caverns were little known. To-day all who visit these caves term them a world wonder. The beauty of the caves is hard to conceive, and one must visit the caverns to secure a picture of

this fairyland. The cave is so large that all of the known caverns of the world could be placed into one of its large rooms

The little town of Carlsbad has been placed on the map with the advertisement and development carried on in the past four years; the town has become the attractive tourist city of the Southwest, and it is rapidly growing into a modern city, with large and well-equipped modern hotels and rooming houses, paved streets, and graveled and oiled roads leading into the city and to the caverns. So great has the tourist travel increased that the receipts from tourist fees have mounted each year as follows:

1926	$3,718
1927	32,628
1928	55,682

And it is estimated that the same will exceed $100,000 for the year 1929.

The method pursued by the committee in dealing with the caverns has been most generous; the splendid cooperation given by the National Park Service has been gratifying, and the fine service given by the superintendent of the caverns in caring for and satisfying the visitors is all a great record of achievement which means that thousands, indeed very soon it will mean 100,000 visitors will pass through the developed caverns each year.

The Carlsbad Caverns at this time mean more toward advertising our great Commonwealth than any other attraction the State has to offer. New Mexico has ideal mild climate; splendid highways have been built. The tourist may be lured to New Mexico by the wonders of the Carlsbad Caves, but going through the State the visitor is brought directly in view of the many other resources the State has to offer.

Carlsbad, with its incomparable caverns, is already known on every continent. One writer has said:

> When the world learns of it—Carlsbad Cavern—nothing will prevent the world coming to see it. It rivals all the magnificent scenic places in America and is utterly unlike any of them.

That the world is learning of the cave—and going to see it—is amply shown by the increase in tourist travel in five years. Note the tabulation of visitors to the caverns for the following years:

1924	1,280
1925	1,794
1926	10,904
1927	26,436
1928	46,335

The appropriation of $100,000 for the fiscal year 1930 means that the National Park Service can assure the public of easy accessibility to the Carlsbad Caverns, and of proper service on their visit to this underworld. The tourist will never forget the thrill of a visit to this wonderful underground chamber where electrical facilities enable him to view the glittering universe of beauty before him.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed with amendments, in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 5773. An act to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

AGRICULTURAL DEPARTMENT APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 15386) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes. Pending that, if we can, I would like very much to reach an arrangement with the gentleman from Texas [Mr. BUCHANAN] to fix the time for general debate. Has the gentleman from Texas any suggestion to make?

Mr. BUCHANAN. I am listening for the gentleman's suggestion.

Mr. DICKINSON of Iowa. I suggest that we limit the general debate to two hours, one-half to be controlled by the gentleman from Texas and one-half by myself.

Mr. BUCHANAN. That is satisfactory to me.

Mr. DICKINSON of Iowa. Mr. Speaker, I ask unanimous consent that the general debate be limited to two hours, one-half to be controlled by the gentleman from Texas [Mr. BUCHANAN] and one-half by myself.

The SPEAKER pro tempore. The gentleman from Iowa asks unanimous consent that general debate upon this bill be limited to two hours, one half to be controlled by himself and the other half by the gentleman from Texas [Mr. BUCHANAN]. Is there objection?

There was no objection.

The SPEAKER pro tempore. The question now is on the motion of the gentleman from Iowa that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the Agricultural appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 15386) making appropriation for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes, with Mr. TREADWAY in the chair.

The Clerk read the title of the bill.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 15 minutes to myself.

I wish to call attention to only two or three outstanding facts with reference to this appropriation bill. In the first place, the committee has shown a very friendly disposition toward the items of research. We have again increased the item for research. We have heard the various complaints from all over the country in respect to the pests and diseases and we have been very liberal in making an effort to have the department reach out and, so far as possible, help people in different localities to combat these various pests that are affecting crop production. This is true with reference to the larch canker in your forests, and it is true with reference to the wireworm, and also with reference to the production of bulbs and the pests affecting the production of bulbs. It is true with reference to research in the matter of preparing fruits for shipment in export. It is true with reference to an effort to find out what the flour weevil is that is affecting the shipment of flour from southern ports to European ports. We have gone along with these items and have been very friendly in granting additional sums, so that for departmental work this bill carries $1,700,000 more than the 1929 bill.

With reference to tuberculin tests, we are carrying on the tuberculin tests with increased indemnities, as provided in this bill. We are reaching out as far as possible to eradicate tubercular cattle that are producing milk that is being fed to the human family in the United States.

With reference to the corn borer, which is one of our old items, we are carrying on the matter of research to try to eradicate the corn borer, and we are carrying on quarantine limitations and making every effort to prevent its spread, but we are not carrying on an eradication or clean-up program as many people understood.

Next, with reference to the barberry bush, there has been much interest in that.

The department cut the item approximately $30,000. We restored that item and we are carrying the barberry eradication item at the amount carried in the bill in previous years in order that there shall be no curtailment of the work. On top of that, we are going out to make an effort under the $30,000 item for rust-resisting wheat. I am simply citing a few points in the bill.

Mr. TILSON. Will the gentleman yield?

Mr. DICKINSON of Iowa. I will.

Mr. TILSON. Is it still the opinion of experts that the rust is caused from the barberry?

Mr. DICKINSON of Iowa. Oh, yes. The hearings are very complete in reference to that, and the evidence given the committee seems to be indisputable.

Mr. TILSON. How is it carried from the barberry bush itself to the seat of infection?

Mr. DICKINSON of Iowa. It is carried by birds, and it is carried by winds and in all different ways. For instance, they find where there is a barberry bush rust will spread within a radius of miles.

Mr. COLE of Iowa. Is there any hope of ultimate eradication of the barberry bush? Are they making any progress?

Mr. DICKINSON of Iowa. They are making splendid progress; but the trouble is, one digging does not clean up the bush. They will grow back in some form—unbeknown sprouts will grow up—and the experts find on those farms where they clean up it is recurrent by reason of that sprouting within that radius. It is very important to resurvey it from time to time. However, they are making progress.

Mr. KETCHAM. If the gentleman will yield, in reference to the corn borer clean-up, will the gentleman state what is contemplated as to the conducting of a clean-up campaign?

Mr. DICKINSON of Iowa. There has been no representation to us as far as a clean-up campaign is concerned.

Mr. KETCHAM. If that is done, then a supplemental appropriation will be made?

Mr. DICKINSON of Iowa. Will go into this bill.

Mr. KETCHAM. Will the gentleman be kind enough to compare the appropriations made previously for the corn borer with the present appropriation?

Mr. DICKINSON of Iowa. It is an increased amount through the research work in the bill. One way they are endeavoring to meet the ravages of the corn borer is through parasites, by different resistants, to determine whether or not the corn borer is going to be able to destroy it.

Mr. KETCHAM. What did the testimony bring out in regard to the development of parasites?

Mr. DICKINSON of Iowa. They are developing them, but they are not able to say that they are a cure.

Mr. LEAVITT. If the gentleman will yield, the farmers in Montana will be particularly interested in this question of the eradication of the barberry. Can we be assured that that campaign will be carried through?

Mr. DICKINSON of Iowa. We find they are all absolutely in favor of the barberry item being carried out to a point where the barberry bush is extinguished. That is, the kind of barberry bush that produces rust. In reference to the wheat proposition, I want to go one step further. We put in this bill $29,900, an item of research in rust-resistant types of wheat. Now, this campaign is being advocated by the extension department of the agricultural colleges in four or five of these States out there which produce so much wheat.

We had before us the presidents of the various agricultural colleges which have been inaugurating this campaign. That includes Minnesota and the two Dakotas and Montana. They are very anxious that experiments be carried on to ascertain whether they can develop a rust-resistant wheat. They are very hopeful of success, and we have given the Budget estimate for that work.

Mr. STEVENSON. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. STEVENSON. Referring to the barberry matter, may I ask the gentleman whether it is the barberry that we put out?

Mr. DICKINSON of Iowa. No. That is the Japanese barberry.

Mr. STEVENSON. We have had rust with our barberry to my knowledge all my life.

Mr. DICKINSON of Iowa. I can not answer with absolute accuracy, but it is my impression that the barberry productive of rust is the old barberry that grows wild in the forest areas. It is not the cultivated Japanese barberry that produces the little red berry.

Mr. STEVENSON. That is not the same variety?

Mr. DICKINSON of Iowa. No.

Mr. COLTON. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. COLTON. There is provision made here for research and investigation of range problems in the public-land States, in which we are very much interested. I noticed in the hearings last year that the Chief Forester said that it was one of the most important items, in his judgment, in the bill. This year an application was made for a $25,000 increase in that item. The Budget allowed a little more than $17,000 increase. The committee seems not to have changed that as I notice in this bill there is only a little over $17,000 allowed.

Mr. DICKINSON of Iowa. My impression is that we increased the item known as the forestry survey, and we increased the item of forestry economics. It is my thought that that is one of the items you referred to, the forest survey.

Mr. COLTON. No. The item that we are particularly interested in is for range research. In that the department asked for an increase of $25,000, but the Budget has allowed, as I recall, only about $14,000, and something over $2,000 is allowed under the Welch Act for adjustments. We are interested in this item for range research. It means very much to those who are using the public domain. I am referring to that in contradistinction to the forest reserves. We are anxious to get ways of increasing the forage on the public domain. Thus far comparatively little work has been done along that line. We want an increase for range research. It is vital to the intermountain region.

In the McNary-McSweeney Act there was an appropriation authorized for this work totaling $275,000, and it was the intention to increase the amount this year by $25,000.

Mr. DICKINSON of Iowa. We reached the conclusion that the research on the public domain should abide the legislation where the Government would supervise and control these ranges, and the committee finally reached the conclusion that we ought to wait until that legislation was enacted.

Mr. COLTON. Under section 7 of the McNary-McSweeney Act provision was made for research work on the forest reserves and on the adjacent public domain.

Mr. DICKINSON of Iowa. In the public domain the Government has no control over the range. If you increased your range it would mean simply that some one would come in there and take possession of it. It was our belief that we should have legislation covering the public control of those areas.

Mr. COLTON. We have a bill now pending before the Committee on the Public Lands for public control, but in the meantime this is for research on range projects, which are on the forest reserves and on the adjacent public domain. I am very much disappointed that the amount has been reduced.

Mr. LANHAM. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. LANHAM. In the prosecution of the study of root rot, which is very destructive of our southern cotton crop, is the gentleman prepared to state to us to what extent the research thus far made in this regard has been successful, and whether any remedy has been discovered that would indicate that they will reach the solution of this problem?

Mr. DICKINSON of Iowa. Some members of our subcommittee have gone into that very carefully. I understand they are very much encouraged with the investigation thus far made. I regret I could not give a detailed description of what has been done.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. KINCHELOE. The Committee on Agriculture has had hearings for the last week on the question of amending the packers and stockyards act, and it was developed there that there is a great deal of dissatisfaction among the commission men as to the operations of the packers and stockyards act. In one case the Secretary of Agriculture was enjoined by the Cudahy Co. in the United States circuit court as to the examination of the books. The Government lost in that action, but seemed to be content to rest there, and did not go to the Supreme Court at all. In another department of activity, in a case between the Department of Agriculture and the packers, the Attorney General advised that he had no jurisdiction, and he rested on that. It seems that the highest court has not been resorted to to set out the rights of the parties unequivocally.

The CHAIRMAN. The gentleman from Iowa has consumed 15 minutes.

Mr. KINCHELOE. They seem to have relied on the Daugherty opinion only. I was wondering whether the gentleman's committee in the preparation of this bill had been given any knowledge of that, as to why they had not gone into the Supreme Court instead of relying merely on the opinion of the United States circuit court or the Attorney General.

Mr. DICKINSON of Iowa. I may say to the gentleman that there was no mention of that in our committee.

Mr. KINCHELOE. There has been a great deal of dissatisfaction. One man by the name of Montgomery, at the head of these commission men, testified that in his judgment the packers and stockyards act had accomplished nothing. I would like to have the gentleman investigate that at his leisure some time, because if the law is not operative we had better repeal it.

Mr. HOWARD of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. HOWARD of Nebraska. I have not had opportunity to examine the bill carefully, but has the committee done anything with reference to a reprint of two books that are very desirable for circulation—one entitled "Diseases of the Horse" and the other "Diseases of Cattle"? Every Member coming from the agricultural zone is flooded with requests for these books.

The CHAIRMAN. The two additional minutes yielded by the gentleman to himself have expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield myself two additional minutes.

Mr. HOWARD of Nebraska. And our only reply to those requests is that they are out of print.

Mr. DICKINSON of Iowa. Let me suggest to the gentleman that in this appropriation bill we could allow the money, as discussed before our committee by the gentleman from Texas [Mr. JONES], who has been interested in this reprint for a number of years, but we have not the authority to determine the method by which they can be distributed. It was ruled out of the bill on what Mr. JONES would say was a close point of order, but nevertheless it was ruled out, and until there is legislation which will provide for the distribution of those

books this money that we appropriate lies in the Treasury and has never been used, as I understand.

Mr. JONES. Why does it remain in the Treasury? The appropriation was made three years ago, and why does the department refuse to print them?

Mr. DICKINSON of Iowa. I could not tell the gentleman, except they say there is no proper legislative authorization for their distribution and no way by which they could be used.

Mr. JONES. The department could distribute them, for that matter, but in the meantime, if they had printed them, we would have had the legislation to distribute them.

Mr. DICKINSON of Iowa. It is a question whether or not we should make the appropriations and wait for the legislation, or whether we had better get the legislation first.

Mr. JONES. I appreciate the gentleman's position, but I do not think the department had a right to decline to print them when the House and the Senate determined they should be printed by the appropriation of the money.

Mr. DICKINSON of Iowa. Well, the situation is that there is a tie-up there on the question of authority for distribution. Now, with reference to the other items, the details will come out under the 5-minute rule, and I do not suppose there will be an item which will not be discussed. [Applause.]

Mr. Chairman, I reserve the balance of my time.

Under extension I am adding hereto statement of various amounts for specific purposes carried under separate subheads:

Certain projects involving more than one appropriation

	Allotment, 1929	Increase, 1930, in House committee bill
Biological abstracts:		
Library (salaries and expenses)	----------	$5,000
Office of Experiment Stations (general administration)	----------	5,320
	----------	10,320
Blister rust:		
Bureau Plant Industry (blister rust control)	$445,020	----------
Plant Quarantine and Control Administration (preventing spread of white pine blister rust)	26,500	----------
	471,520	----------
Bulb work:		
Bureau Plant Industry: Horticultural crops and diseases—		
Bulb culture	20,400	----------
Bulb diseases	16,000	----------
Entomology (tropical and subtropical insects)	15,000	7,500
	51,400	7,500
Cattle grub:		
Bureau Animal Industry (diseases of animals)	50,000	----------
Entomology (insects affecting men and animals)	27,500	----------
	77,500	----------
Cotton-deterioration studies:		
Bureau Plant Industry—		
Alkali and drought resistant plants	[1] 24,600	----------
Western irrigation agriculture	[2] 1,000	----------
Agricultural economics (marketing and distributing farm products)	[3] 10,000	----------
	35,600	----------
Cotton root rot and wilt:		
Bureau of Plant Industry (cotton production and diseases)	26,600	9,373
Chemical and soils (soil fertility)	29,590	13,000
	56,190	22,373
Erosion, soil:		
Chemical and soils (soil survey)	10,085	----------
Roads (agricultural engineering)	9,000	2,150
	19,085	2,150
Forest research (McNary-McSweeney Act):		
Weather Bureau—out of Washington (forest-fire weather)	25,000	----------
Bureau of Plant Industry (forest pathology)	98,500	----------
Forest Service—		
Forest products	505,000	32,404
Range investigations	49,755	14,320
Silvical investigations	354,300	35,598
Forest economics	----------	25,000
Forest survey	----------	40,000
Entomology (forest insects)	185,000	----------
Biological Survey—		
Food habits of wild animals and birds	5,700	----------
Biological investigations	4,400	7,957
	1,227,745	155,274

[1] All of alkali and drought resistant plants item.
[2] Cotton work at Yuma.
[3] Cotton-ginning studies.

Certain projects involving more than one appropriation—Continued

	Allotment, 1929	Increase, 1930, in House committee bill
Fruit and vegetable utilization:		
Bureau Plant Industry (horticultural crops and diseases)	$38,190	----------
Chemistry and Soils (agricultural chemistry)	44,610	[4] $5,000
	82,800	5,000
Marine meteorology:		
Weather Bureau—		
In Washington	21,690	10,260
Out of Washington	26,810	20,000
	48,500	30,260
Naval stores:		
Chemistry and Soils (naval stores research)	15,000	4,160
Food, Drug, and Insecticide Administration (enforcement of naval stores act)	37,825	----------
	52,825	4,160
Poultry work:		
Bureau of Animal Industry:		
Animal husbandry	111,650	[5] 15,000
Animal diseases	7,065	[6] 4,685
Entomology (insects affecting man and animals)	1,000	----------
Agricultural Economics—		
Marketing and distribution	12,000	----------
Crop and livestock estimates	5,000	----------
Market inspection of farm products	12,000	----------
Market News Service	50,000	15,240
Food, Drug, and Insecticide Administration (enforcement of food and drugs act)	10,000	[7] 27,924
	208,715	62,849
Spray residue work:		
Bureau of Plant Industry (horticultural crops and diseases)	20,300	----------
Chemistry and Soils (insecticide and fungicide investigations)	10,000	35,000
Entomology (deciduous fruit insects)	5,000	----------
Food, Drug, and Insecticide Administration (food and drugs act)	25,000	----------
	60,300	35,000
Strawberry work:		
Bureau of Plant Industry (horticultural crops and diseases)	19,000	----------
Chemistry and Soils (soil fertility)	----------	4,800
Entomology (truck crop insects)	1,200	2,000
Agricultural Economics—		
Farm management and practice	4,500	----------
Market inspection of farm products	9,500	----------
Market News Service	3,000	----------
	37,200	6,800
Sugar beets:		
Bureau Plant Industry (sugar plants)	91,945	49,348
Chemistry and Soils—		
Agricultural chemistry	9,000	----------
Soil fertility	10,000	----------
Entomology (truck crop insects)	30,111	18,000
Roads (agricultural engineering)	1,500	5,000
	142,556	72,348
Sugar cane:		
Bureau Plant Industry (sugar plants)	114,310	----------
Chemistry and soils—		
Agricultural chemistry	15,000	----------
Sirup and sugar investigations	20,000	----------
Soil fertility	20,000	----------
Entomology (cereal and forage insects)	21,640	----------
Roads (rural engineering), investigation of drainage of sugar-cane soils	----------	10,000
Agricultural Economics—		
Enforcement of warehouse act	100	----------
Crop and livestock estimates	2,500	----------

[4] Sulphur dioxide content of dried fruit.
[5] Standard breeding.
[6] Pathological diseases.
[7] Inspection of poultry for canning and preparation of food products.

Mr. BUCHANAN. Mr. Chairman, I yield 30 minutes to my colleague from South Carolina [Mr. HARE].

Mr. HARE. Mr. Chairman and gentlemen of the committee, my purpose in rising at this time is to give notice to the House that at the proper time and place I will offer an amendment to the pending bill increasing the appropriation for what is known as the market news service in the Department of Agriculture. My purpose to-day is to show that the market news service in the United States is not only a very valuable service but that the appropriations annually made are entirely inadequate to meet the needs of those for whom it is intended to serve. My reason for asking for this increased appropriation is based upon

sound policy, a precedent already established by the Government and because of its fairness toward the producers of farm crops in this country, thereby placing the assistance rendered by the Government on a parity with that rendered to industry.

I can best illustrate the justification of such aid by pointing out just what the Government is doing to aid and stimulate American industry and enlarging its activities in foreign countries. You are all familiar with the activities of the Bureau of Foreign and Domestic Commerce in the Department of Commerce. You are familiar with its purposes. You know it was established primarily to serve as an agent for industry in this country in locating and finding markets for manufactured products of the United States in foreign countries. It is not my purpose here to criticize the activities of this bureau or to criticize the work of the department, of which it is a part, but, on the contrary, I want to emphasize its importance, its significance, and its value to industry, and in doing so, I want to show conclusively that our Government ought to use a similar or a corresponding agency in promoting the business of agriculture.

I am going to read for the information of the House a part of the report of the director of this bureau, as found in the Annual Report of the Secretary of Commerce. On page 94 of the report for the past year I find the following:

> The trade-promotive work of the bureau, of both its staff abroad and its organization within the United States, has been a vital factor in the steady expansion of American exports during the recent years. The expansion has been particularly great in the case of manufactured goods, the class in which the selling efforts counts most. American exports of finished manufactures last year reached the huge total of $2,061,000,000 and, notwithstanding the lower prices than had prevailed in any other postwar year, were 4 per cent larger than in 1926–27 and 70 per cent larger than in 1921–22. Particularly conspicuous have been the gains during recent years in the exportation of motor vehicles, machinery, chemicals, and other highly elaborated factory products.

I want to emphasize the statement made by the director where he shows that the American exports of finished manufactures increased 70 per cent in the five years from 1922 to 1927. Mr. Chairman, I am anxious that this point should be made clear, that through the instrumentality and through the agency of this bureau of the Government, the foreign exports of manufactured goods have increased 70 per cent within five years. Think of it, 70 per cent within five years. I emphasize the statement because it shows the possibilities of a governmental agency in increasing the trade of this country, and it shows, on the other hand, what the Government could do in increasing, expediting, and making more efficient the marketing facilities within the United States if the same or corresponding efforts were made in behalf of agriculture. On page 100 the director says:

> To place a dollars and cents value on many of the bureau's services obviously is impossible, so intangible are they and so indirect the returns; even the firms aided can not themselves always trace accurately the proportion of their exports attributable to bureau assistance.
>
> Foreign commerce officers last year reported known sales and savings amounting to $45,000,000, this figure covering only a very small percentage of the clients served by the bureau's 51 offices abroad.

In this connection I want to cite just a few illustrations or examples from the report already referred in order to show the activities of the bureau in behalf of industry. I will incorporate the most of them in my remarks.

Mr. JONES. Will the gentleman yield?

Mr. HARE. Yes; I gladly yield.

Mr. JONES. I am very much interested in what the gentleman is saying, and I think the gentleman is striking at the real problem of agriculture, and that is marketing. I found in a hurried glance through this bill that the department is securing some $6,000,000 to be applied on the marketing and distributing end of the business and over $60,000,000, exclusive of roads, on the various problems of production. Does not the gentleman think this is a rather unbalanced way to strike at the problem, when we have already mastered production to a far greater extent than we have mastered distribution?

Mr. HARE. I can say that, in my opinion, the problem of marketing is the one great problem within the near future not only for agriculture but for every other industry in the United States.

Mr. JONES. Is not that the main problem we have been trying to solve here all along with reference to agricultural problems—the marketing problem?

Mr. HARE. That is absolutely true.

Mr. JONES. And considerably less than 20 per cent of the appropriations carried in this bill, which are for the Department of Agriculture, are in any way touching or relating to the problem of distribution or marketing.

Mr. HARE. I think the gentleman is absolutely correct, because, as a member of the Committee on Agriculture, I know he is as well posted or well advised on this point as any man in Congress, and I am glad to have an expression from him on the subject.

As I have just stated, I want to point out a number of particular instances where this bureau through its agents and employees has contributed wonderfully toward the sale of manufactured products of the United States. I will not make reference to all of them, but will quote a number of illustrations given in the report:

> Bookkeeping machines: Trade-promotion work of the Prague office included the establishment of an agency in Czechoslovakia for a New York manufacturer of accounting machines, which placed orders approximating $100,000.
>
> Bridge plates: Over a year ago the Habana office called the attention of purchasers in Cuba to the value of a patented steel plate for bridges manufactured by a firm in the United States, and as a result this device is now being bought in Cuba by the carload.
>
> Camp cots: Assistance given to a New York manufacturer of camp cots by the bureau's Calcutta office increased this firm's yearly business in India from $800 to $40,000.
>
> Canning machinery: An order for $7,000 worth of Illinois canning machinery was directly traceable to the Brussels office.
>
> Compressed gases: A report dealing with the marketing of compressed gases in the United Kingdom prepared by the bureau's London office gave information that enabled a Massachusetts firm to sell $10,000 worth of sulphur dioxide.
>
> Druggists' supplies: Services rendered by the bureau's Cairo, New York, and Chicago offices are acknowledged by an Egyptian druggist to have resulted in $200,000 worth of business with American manufacturers of divers products.
>
> Electrical equipment: The commercial attaché in Ottawa received a request from a firm in western Canada interested in electrical refrigerators and radio equipment. United States manufacturers of these articles have now sold at least $75,000 worth of this material to this Canadian concern. Installation difficulties were cleared away for a Wisconsin manufacturer of electric refrigerators by the bureau's office in Manila.
>
> Excavator parts: Assistance to a New York firm by the Calcutta office brought about the conclusion of contracts for excavator parts totaling $25,000.
>
> Fertilizers: Trade-mark difficulties which prevented a New York manufacturer of fertilizer chemicals from placing his products on the Korean market were cleared away by the Tokyo office and brought $72,000 during the year.
>
> Fish meal: New York and Maryland exporters of fish meal have obtained $70,000 worth of business from a Hamburg concern with which they were put in touch by the trade commissioner there.
>
> Flash lights: The Bogota office obtained a business connection for a New York manufacturer of flash lights, resulting in $23,000 worth of orders for shipment to Colombia.
>
> Grease cups: Through the Berlin office a New York manufacturer of grease cups found a buyer whose orders last year amounted to $500,000.
>
> Heating equipment: Information transferred by the Ottawa office has enabled a Kentucky manufacturer of heaters and fireplace furniture to place $35,000 worth of Canadian business in 10 months.
>
> Insecticides: A New Jersey manufacturer has sold $10,000 worth of insecticides to Denmark, Germany, China, and Mexico through agency arrangements made by bureau offices in those countries.
>
> Lawn mowers: Information furnished by the London office enabled a New York manufacturer to sell $50,000 worth of his lawn mowers in England.
>
> Linoleum: The recently opened Singapore office of the bureau referred a Pennsylvania maker of linoleum to a firm that placed a $25,000 order.
>
> Locomotive supplies: The Vienna office assisted a Delaware firm in negotiating with Austrian railways contracts that involved locomotive supplies which amounted to $550,000.
>
> Paints: An American firm dealing in pigments, white lead, etc., received last year a total of $70,000 in orders from the South African agency which was arranged with the help of the bureau's Johannesburg office.
>
> Public-works contracts: A Massachusetts firm obtained street-paving contracts from Argentine municipalities amounting to $1,500,000 as a result of recommendations made by the bureau's Buenos Aires office, which office also facilitated the obtaining by two New York firms of a municipal building contract approximating $2,700,000.
>
> Road-making machinery: Twelve American concrete mixers and six gasoline-driven shovels, worth approximately $150,000, were sold in Spain for a Wisconsin manufacturer by an agent whose appointment had been arranged by the bureau's Madrid office. This office was also helpful in the booking of orders for 60 dump cars by an American manufacturer of industrial equipment.
>
> Shovels: Advice from the Montreal office to the effect that the city of Montreal expected to be in the market for steel shovels enabled firms in the United States to quote for this business and a Pennsylvania corporation secured the order, amounting to $24,500.

Steel: A Pennsylvania steel company about to terminate its operations in Argentina was induced to stay in the market by the commercial attaché in Buenos Aires, who pointed out the favorable turn of affairs coming in Argentine trade, and shortly afterwards the company obtained $1,000,000 worth of business. In China another representative of a Pennsylvania steel company, whose stop in Shanghai was limited to a few hours, was placed in touch by the trade commissioner with an importer who gave orders amounting to $30,000.

Storage batteries: A $19,000 Canadian contract resulted when the bureau's office in Toronto brought an inquiry for storage batteries to the attention of United States manufacturers.

Tractors: Assisted by the bureau's Melbourne office in making connections with Australian firms, manufacturers in Illinois, Iowa, and Wisconsin sold $72,000 worth of tractors in that Commonwealth. The Bucharest office helped a California manufacturer of tractors in concluding agency arrangements that resulted in $36,000 worth of sales.

Traffic lights: The following of recommendations made by the Sao Paulo office enabled a New York manufacturer of traffic-signaling equipment to obtain a $240,000 contract from a Brazilian city.

Trucks and busses: An agent in Uruguay obtained for the manufacturer by the bureau's Montevideo office disposed of a bus and placed an initial order for three trucks.

Vacuum cleaners: A Minnesota manufacturer of vacuum cleaners was aided by the Wellington office in establishing a sales organization to cover New Zealand, which has done $70,000 worth of business in three months.

Woodworking machinery: Recommendations made by the Stockholm office and other assistance have been responsible for $127,000 worth of additional sales for a New York exporter of woodworking machinery.

Yarn: A North Carolina yarn spinning and finishing concern gave its agency to a British firm with which it was placed in touch by the bureau's London office. In the 12 months ended May 30, 1928, the British firm sold $97,000 worth of yarn in this very difficult market.

Zinc products: The Paris office assisted an American manufacturer of zinc products in establishing connections with several French consumers, and goods to the value of $14,000 have been sold thus far.

As I said at the outset, it is not my purpose to criticize the activities of this bureau but to show that with the proper assistance, its agents and employees are in a position to locate markets and enlarge the marketing opportunities for various industries of our country.

These illustrations are sufficient to show us conclusively that the agents of this bureau are in a position to enlarge and do enlarge the marketing possibilities of American products in foreign countries, and the point I am endeavoring to emphasize is the contrast between what the Government is doing to assist industry in marketing its products and how little it is contributing toward helping the farmer in marketing his crops, particularly perishable crops. In other words, as I see it, you appropriated for this bureau last year approximately $3,000,000 for the purpose of finding markets for our manufactured products and you see from the above illustrations the manufacturer gets the advantage of it, but when a farmer goes up to the Department of Agriculture and asks to be advised as to the number of carloads of watermelons in the city of Detroit to-day, the number in Pittsburgh, the number in Boston, the number in New York, or the number in any other city of the United States and the probable number that will be in each to-morrow, he is confronted with the statement, "We may have the information but we are unable to give it to you until you pay the cost of getting it." In other words, you have appropriated millions of dollars to enable the Bureau of Foreign and Domestic Commerce to find a market for the products of the manufacturer, get in touch with the purchaser and bring them together in such a way as to increase the sales of the former to the extent of $45,000,000 or more annually, and the manufacturer is not called upon to pay one penny of the expense incident to the transaction, but when the farmers of this country have produced a perishable farm crop and they want to find a market for it, a market that is the least congested, a market where the price will probably be the highest, the Federal Government says in effect, "We can not do it unless you pay the cost incident to securing the information."

Mr. CRISP. Will the gentleman yield?

Mr. HARE. Gladly.

Mr. CRISP. What does the gentleman mean by that statement? Has the department the information, but refuses to give it out, or have they not the information because the Congress has not appropriated sufficient money for them to obtain it?

Mr. HARE. My information is they have the information in many instances and furnish it to those sections that are willing to go down in their pockets and put up the money for the cost of securing it. In my State I have inquired as to whether or not the department would be able to furnish to the truck growers of the State such information, and have been told that it was not possible to do so with funds available.

Just here I want to insert in the RECORD a letter from the Acting Chief of the Bureau of Agricultural Economics of the Department of Agriculture which explains itself:

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF AGRICULTURAL ECONOMICS,
Washington, D. C., December 6, 1928.

Hon. B. B. HARE,
House of Representatives.

DEAR MR. HARE: In answer to your telephone request for information relative to market-news service on fruits and vegetables given in the State of South Carolina, I regret to advise that no office for the collection and distribution of such information has been maintained in that State since the spring of 1926. That year and during previous seasons a market-news office was operated at Charleston during the white-potato shipping season. A great many growers and shippers in the State receive market reports on various commodities, but since that time such reports have been mailed from offices located in other States and from Washington, D. C.

With the increasing popularity of the market-news service on fruits and vegetables, it has been impossible to satisfy all of the demands placed upon the service. An indication of this popularity is evidenced by the willingness of State or local organizations, growers, and shippers to pay part of the cost of the service in particular localities. This practice has enabled the service to operate at a considerable saving at the various points, which saving has been utilized to open offices in other districts where a real demand existed and where similar financial cooperation was available. This practice has been followed until the cost of all but one such office is paid for in part by State or local organizations or groups of local individuals. Neither the State of South Carolina nor the local factors at Charleston were willing to support financially an office at that point. Therefore, in justice to other territories, the money formerly expended there was utilized elsewhere. The kind of offices above referred to are operated each year for varying periods of from three weeks to seven months.

Very truly yours,

C. W. KITCHEN, *Acting Chief of Bureau.*

It is not my purpose here to offer any criticism of the Department of Agriculture, because I believe its agents and employees are doing the best they can with the funds available for the market news service, but the point I am making is that Congress has been very liberal in its appropriations to be used in assisting industry in marketing its products, but seems to expect the farmer to bear the entire burden of marketing his crops. It is an unfair discrimination in favor of the former that should be removed.

There are 25 illustrations set out in the report already referred to, 25 particular instances, 25 individual manufacturers who, according to the report, through the efforts, through the instrumentality, through the agency of this bureau, were enabled to increase their sales last year to the extent of $7,457,000, or an average of $298,300 for each concern or business enterprise. In other words, a careful study of the report forces one to the conclusion that the agents, representatives, or employees of the Government have in effect acted directly or indirectly as salesmen for individual American manufacturers or manufacturing enterprises. Let me read again what the report says:

Assistance given to a New York manufacturer of camp cots by this bureau's Calcutta office increased this firm's yearly business from $800 to $40,000.

Through the Berlin office a New York manufacturer of grease cups found a buyer whose orders amounted last year to $500,000.

The Vienna office assisted a Delaware firm in negotiating contracts which involved locomotive supplies amounting to $550,000.

As a result of recommendations made by the bureau's Buenos Aires office a Massachusetts firm obtained street-paving contracts from Argentine municipalities amounting to $1,500,000.

As I have already stated, I am not charging any irregularity on the part of Government agents or employees in bringing the manufacturer and the purchaser of his products together, because they are simply discharging the duties placed upon them, but I simply want to emphasize the fact that when the producers of farm crops ask the Government to provide for them a similar service they are told they will have to bear the expense, yet I am unable to find where the manufacturers have been called upon to pay for the services rendered them.

Mr. BLAND. Will the gentleman yield?

Mr. HARE. I will.

Mr. BLAND. To what extent would the gentleman's amendment increase the appropriation?

Mr. HARE. My idea is to increase the appropriation $1,000,000.

Mr. BLAND. I am heartily in accord with the gentleman, because of my interest in the proposition. I wanted to know

whether the amendment would take care of the various localities throughout the country.

Mr. HARE. My idea is to increase the appropriation $1,000,000. I know the gentleman is interested, because his State to-day is a great producer of perishable farm crops.

Mr. BLAND. I appeared before the committee in advocacy of this matter.

Mr. HARE. Every State in the Union will reap an advantage. In my State the truck and fruit growers last year produced 21 different varieties of fruits and vegetables to such an extent that they were shipped in carload lots, not mentioning those shipped in smaller quantites. My idea is that the Government ought to be in a position every evening to advise any locality in this country how many carloads of a perishable farm crop there are in any particular market.

It ought to be able to tell whether in Chicago there are 5, 10, or 50 carloads, and how many have been directed or are on the way to the city. If the producer has that information, he is in a position to know whether to make his consignment to Chicago or whether he should send it to St. Louis, New York, Pittsburgh, Boston, or some other market where the supply is limited. The carload shipments as a rule are not directed to any particular city when they leave the shipping point, but are directed to some central point and consigned from there. For example, nearly every carload of perishable crops from the South first goes to the Potomac Yards and is directed from there to some particular market.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. HARE. I yield to the gentleman from New York.

Mr. LAGUARDIA. This summer I investigated that matter, and in Berlin they have a central office and receive telegrams every night from every section of the country, and also the position of the railroad cars. They distribute their perishable products in that way. They have a perfect system in Germany working along these lines.

Mr. HARE. I am glad the gentleman is familiar with the subject, because he should be of considerable assistance in getting this appropriation.

Mr. GARBER. Will the gentleman yield?

Mr. HARE. I yield.

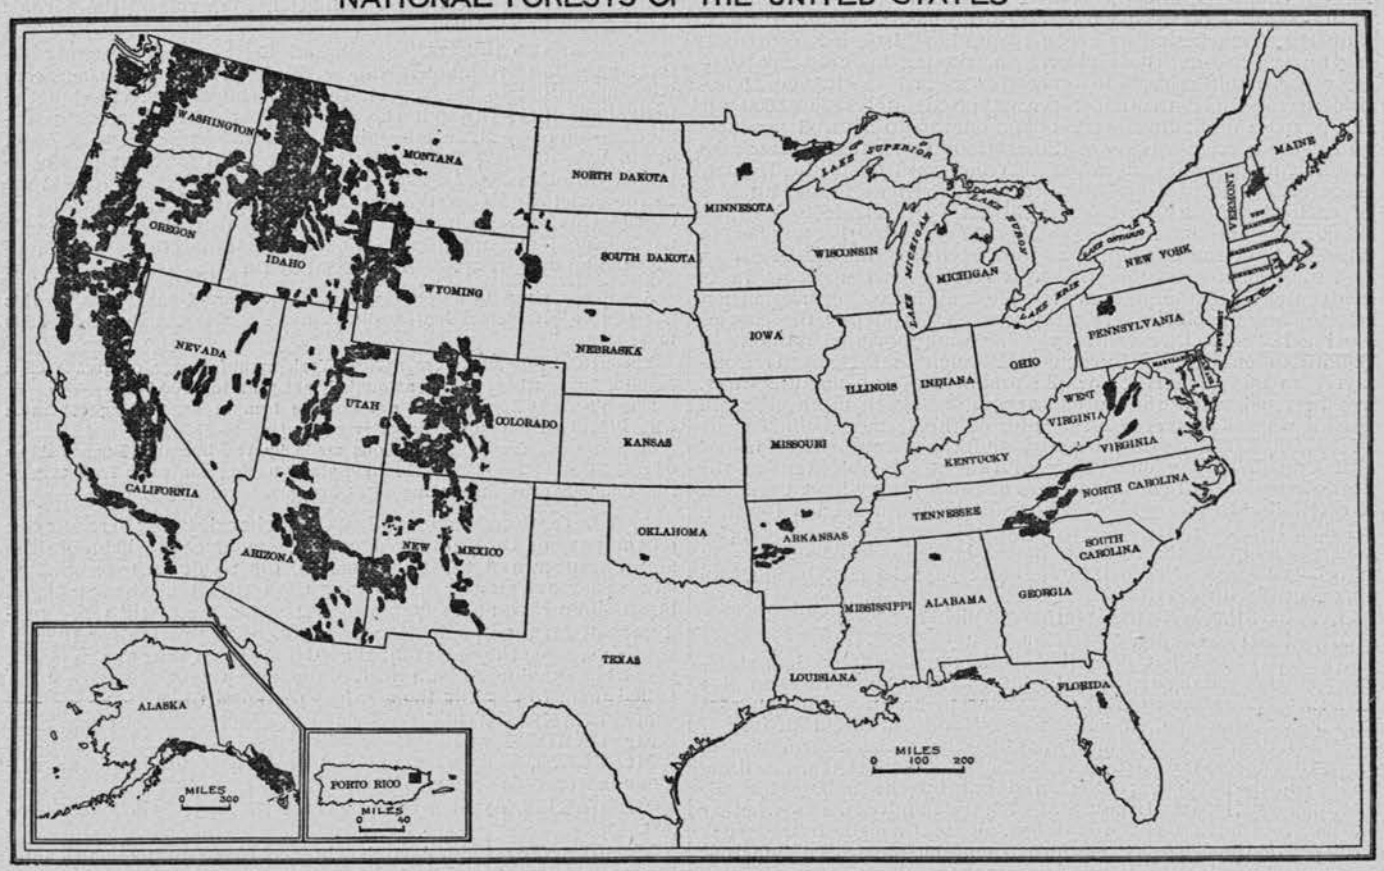
Mr. GARBER. It is my understanding that the Department of Agriculture has a daily news service. Does not that include daily reports on all farm products throughout the United States?

Mr. HARE. My information is that the department has the information, but will not impart it until the producers of a locality or a municipality or the State advances funds necessary to defray the expense in securing the information and forwarding it to them.

Mr. GARBER. I have been informed that such information is broadcasted over the radio.

Mr. HARE. To some extent that is true.

Mr. LAGUARDIA. Is not the great difficulty the fact that the distribution of market reports are not conducive to the best interests of the consumer and producer? They are based on the actual market price, but we do not know what is back of the conditions that make that price. The gentleman will run afoul of the middlemen.



Mr. HARE. If I am furnished with the information every evening at 5 or 6 o'clock as to the number of carloads of watermelons, for example, in the city of New York, the gentleman's home, and the number of carloads that are on the way to that city, I will know whether or not to ship my carload of melons there or to some other market. That is the kind of information the farmer wants. It is simple; it is easy. Of course, it will take some time and some money, but I contend that in all fairness, in all justice, this Government should lend such aid to agriculture as it is lending to industry in the marketing of its products. It is an easy matter and a simple matter, and at the proper time in the consideration of this bill I hope to offer an amendment increasing the appropriation for the Marketing News Service as much as $1,000,000, and I hope to have sufficient support to insure its passage.

I yield back the remainder of my time.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 20 minutes to the gentleman from Washington [Mr. SUMMERS].

Mr. SUMMERS of Washington. Mr. Chairman and gentlemen, the timber supply of the United States will measure our Nation's progress in the centuries of to-morrow. The Pilgrim Fathers chopped and burned their way in from the Atlantic; their descendants are lashing the Pacific with spruce and fir and hemlock—the growth of centuries. Erosion depleting the soil twenty times faster than the farmers' crops is following in the wake. We imitate the Chinese of old in our timber prodigality. They now carry soil in wheelbarrows to build their farms on rocks left bare by timber removal and erosion. Billions in farm products and millions of citizens depend on our forests for a

NATIONAL FORESTS OF THE UNITED STATES

graduated water supply. The playgrounds and the game preserves of a nation are at stake. American industry, present and future, depends on timber. Federal administrators, some private owners and some legislators, see and consider the handwriting on the wall. Let us survey the situation and plan wisely for to-morrow.

The map before you shows the national forests of the United States. You will observe some small ones located in the East and South and in the central part of the country, but most of them are located in the West. If these national forests were condensed into a single area, starting in the northeast tip of our country, they would cover the areas of the six New England States and New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia, and North Carolina. However, there are some privately owned lands embraced within these forests which, if deducted, would exclude the area of North Carolina, leaving 13 other States as representing the solid area of the national forests, distributed through 25 States, Alaska, and Porto Rico. Alaska is drawn on a greatly reduced scale. It contains 20 per cent of our national forests.

The three charts before you graphically tell the story of a century of timber slaughter.

The third chart to which I call your attention shows with black dots the different States that are consuming more lumber than they are producing. The dot in Illinois represents about 2,000,000,000 board feet that that State is consuming in excess of the amount produced in that State. I wonder if you have any idea what 2,000,000,000 board feet means? I have tried to reduce it to something a little easier to comprehend. The amount of lumber consumed in Illinois in excess of what that State produces would build a 3-foot sidewalk five times around the world. The State of New York, once the lumber-production center of the United States, is now consuming enough lumber, produced outside the State, to build a 3-foot walk four times around the earth. The State of Pennsylvania, once the source of the Nation's lumber supply, is now consuming enough lumber, produced outside of that State, to build a solid board fence 12-feet high around the globe.

You have represented here a great stretch of States extending from Massachusetts in the Northeast through the former lumber-producing areas of New York and then later of Pennsylvania, and through Ohio, Indiana, Illinois, and on to California; all consuming very much more lumber than they are producing. The light circles with the barred lines represent States that are

CHART NO. 1

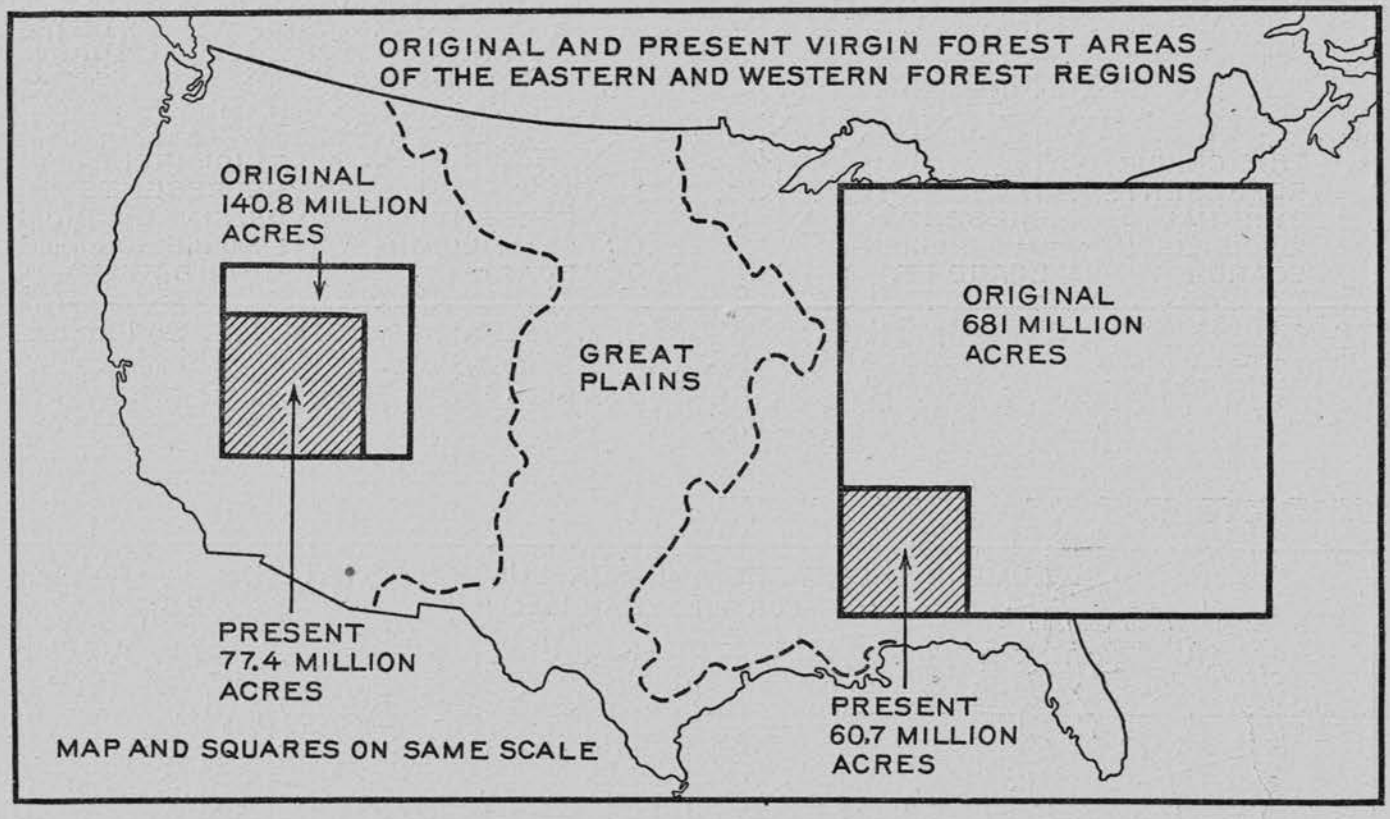


Chart No. 1, to which I now refer [pointing], shows the original and the present virgin areas of the eastern and the western forests. By acres it shows that originally there were 681,000,000 acres east of the Great Plains. That is now reduced to 60,700,000 acres. West of the Great Plains the original area was 140,800,000 acres. This area is now reduced to 77,400,000 acres.

Chart No. 2 [pointing] is perhaps more descriptive. The circles to which I point represent the original and the present timber supply of the eastern and western forest areas, expressed in board feet of standing timber. Originally we had 3,400,000,000,000 board feet east of the Great Plains, which is now reduced to 855,000,000,000 board feet. In other words, one-fourth of the eastern forests remain and three-fourths have been consumed. In the western area originally there were 1,800,000,000,000 board feet, of which 1,360,000,000,000 remain. Approximately one-fourth of the western forests have been consumed and three-fourths are standing. The eastern forests originally contained about two-thirds of the stumpage of the entire country. However, there is in the western forests at this time approximately twice as much standing timber as is found in all of the eastern forests.

producing more lumber than they are consuming. You will note that in the State of Washington, the State of Oregon, and the State of Idaho there is a large excess production. In Montana a small excess, and in Texas also, with a large excess in Louisiana and Mississippi; and then smaller in Alabama, Georgia, South Carolina, North Carolina, Virginia, and Maryland, and perhaps a few other States; but 27 of our States are consuming more timber than they are producing.

Mr. LEATHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. Yes.

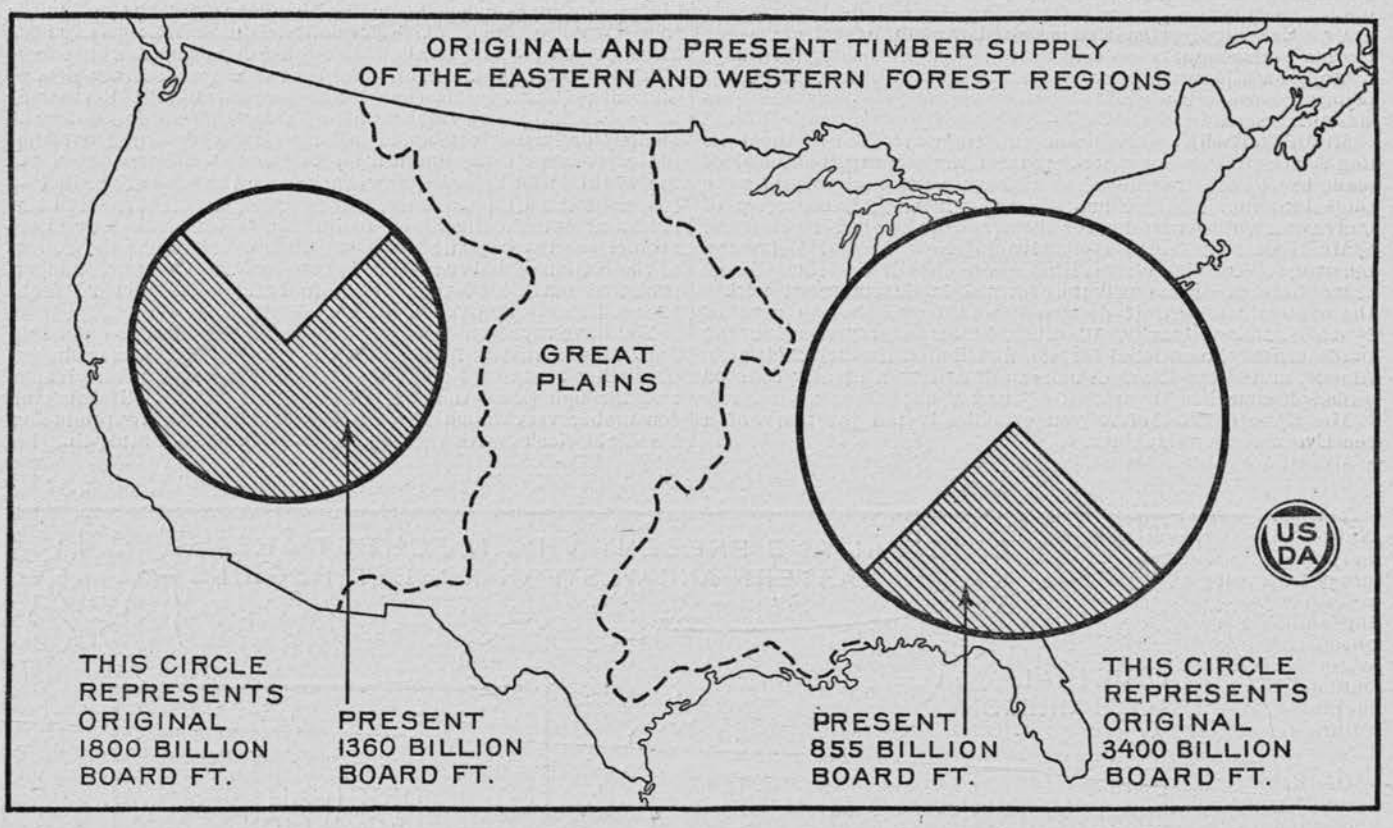
Mr. LEATHERWOOD. Mr. Chairman, I think the gentleman stated what he did not intend to state. He spoke of the State of Washington and some others producing more timber than they were consuming. Did not the gentleman mean that they are producing more lumber?

Mr. SUMMERS of Washington. Yes; they are producing more lumber.

Mr. LEATHERWOOD. As a matter of fact you are reducing your timber.

Mr. SUMMERS of Washington. Yes; we are reducing our timber supply, but we are producing great amounts of lumber.

CHART No. 2



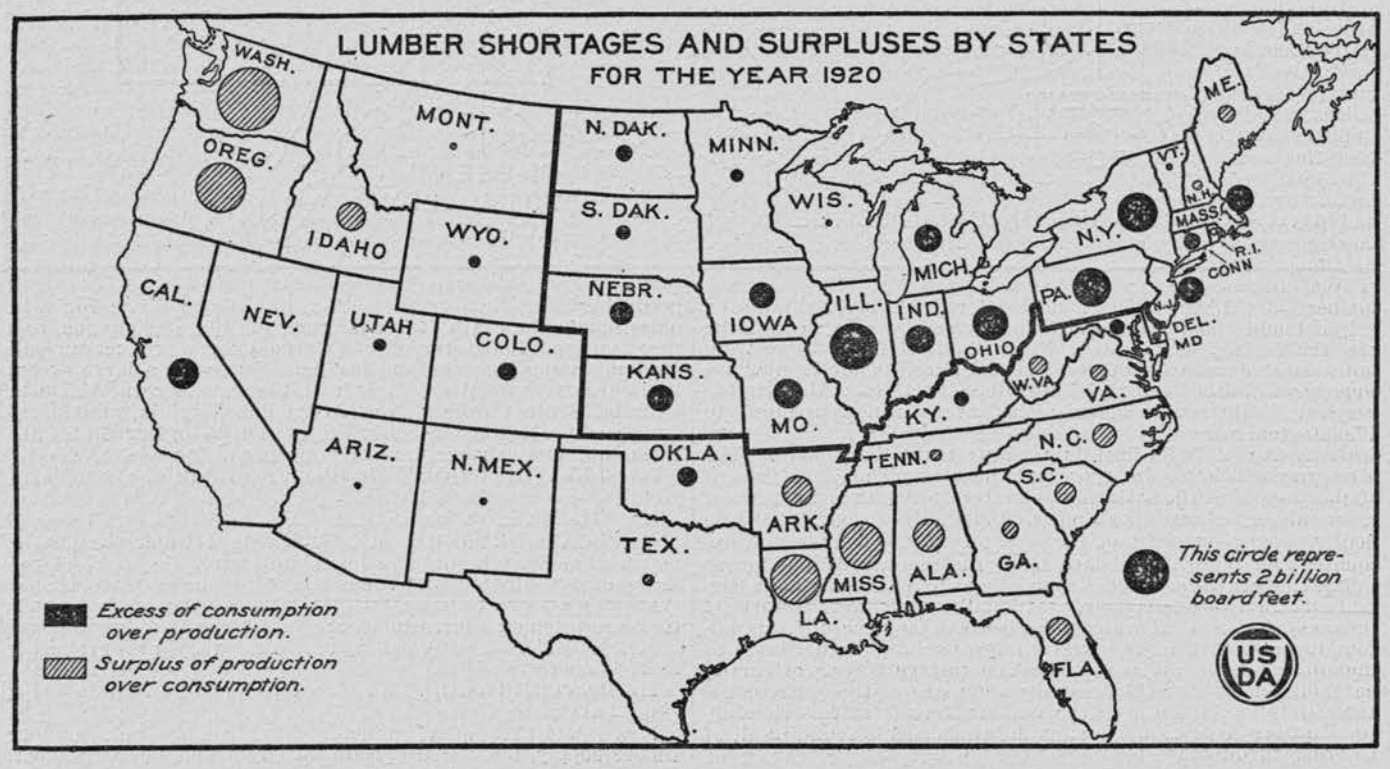


CHART No. 3

Perhaps at some points I have said timber when I meant lumber.

Mr. KINDRED. Are your great forests of redwood in Oregon being rapidly reduced?

Mr. SUMMERS of Washington. Yes; the supply of timber is being reduced. The charts I have here represent the total standing timber.

Mr. KINDRED. May I ask the gentleman one more question? Has the gentleman given any attention to the suggestion made by the bill introduced by Senator FLETCHER providing for the taking over of the Everglades of Florida for the purpose of increasing the timber supply?

Mr. SUMMERS of Washington. Timber does not grow extensively in the Everglades.

Mr. KINDRED. Is that true of all parts of the Everglades—the western and northern?

Mr. SUMMERS of Washington. I think there is some in parts of the Everglades of Florida, but there is very little timber in the Everglades proper, although there is some on adjacent land.

Mr. KINDRED. But in western and northwestern parts of the Everglades?

Mr. SUMMERS of Washington. There is some timber there.

OUR NATIONAL FORESTS

The national forests of 158,000,000 acres are one of the Nation's best investments. They are paying present dividends in present public service and at the same time they are a great reservoir of timber, forage, water, and recreational resources for the future. At the present time they are furnishing annually range forage for nearly 8,000,000 cattle, horses, sheep, and other livestock, over a billion board feet of timber, water for irrigated crops valued at more than $600,000,000, and outdoor recreation for about 18,000,000 people. And this remarkable present use is obtained without any mortgage on the future productivity of the forest lands under administration.

VANISHING TIMBER RESOURCES

Of timber it is estimated that the national forests contain about 552,000,000,000 board feet, approximately one-fourth of the standing timber in the United States. This is a timber reservoir that we may well contemplate with satisfaction, for it promises to be a big factor in tiding us over the period now foreseen between the cutting out of the last of the privately owned virgin timber and the maturing of second-growth supplies. The forests of the West, in which most of the national-forest timber is located, contain the last great body of virgin timber in the country.

The lumber industry of the past has moved the center of its activities from region to region, cutting the timber as it went and making no adequate provision for a new crop on the cut-over lands. Of our 470,000,000 acres of forest land more than 250,000,000 acres that have been cut over are only partially productive and millions of acres are without valuable tree growth. Moving at great and increasing speed as logging and milling machinery has increased in efficiency and tempo, the industry has left a plain trail from the white-pine forests of New England south and west to the Gulf and the Pacific Ocean.

In 1860, Pennsylvania on the Atlantic, led the Union in lumber production. In less than half a century the State leadership had passed to Washington on the Pacific. Pennsylvania now must go outside its boundaries for more than three-quarters of its timber requirements, and in 1926 imported from the State of Washington alone more than 167,000,000 feet of softwood lumber.

The lumber leadership began at the far northeastern tip of the Union, Maine leading in production in 1819. Ten years later the leadership had moved to New York; in 1859 it reached Pennsylvania; in 1869 the Lake States; and by 1905 it had reached the far northwestern tip of continental United States in Washington, where it has remained except for the year 1914 when Louisiana led. From Maine to Washington in less than a century is a dizzy speed for the shifting of the center of one of the most important industries of the Nation depending upon a renewable natural resource. Lumbering in the past has evidently been essentially nomadic. It can be so no longer in this country; for there is no longer any place to which it may move.

The timber that we have in forest regions now being exploited and what we can raise as a crop is all we can look to for our future supplies. In the country as a whole we are cutting timber four times as fast as we are growing it; on the national forests the annual cut is balanced by the annual growth. Furthermore, national forest timber sales are made conservatively and with a view to maintaining permanent industries and permanent communities dependent on those interests. No cutting is done in order to liquidate an investment, as is often the case with privately-owned timber, without regard to the need for the product or the permanency of the operation. The timber output of the national forests could be more than doubled to-day; but the Government being under no necessity to liquidate is not in a hurry to sell and will put the timber on the market only in accordance with actual needs and for the stabilization of industry.

Mr. GARBER. Will the gentleman yield?

Mr. SUMMERS of Washington. I will.

Mr. GARBER. What are the restrictions on the cutting of timber in the national forests?

Mr. SUMMERS of Washington. It is all under the direct control of the Bureau of Forestry. Ripe and fallen timber is always cut first.

Mr. GARBER. As I understand it, there are no restrictions in regard to privately owned property?

Mr. SUMMERS of Washington. There are none.

Mr. GARBER. And no requirement as to future growth?

Mr. SUMMERS of Washington. Except there may be some restrictions in different States that have enacted such laws. A few years ago the Congress enacted legislation cooperating with private owners, to encourage reforestation but nothing mandatory.

Mr. GARBER. Take the gentleman's own State, the principal industry of which is the manufacture of lumber. Now, what steps has the State of Washington taken to preserve and conserve the forest resources so as to provide for a new growth?

Mr. SUMMERS of Washington. Our State is cooperating with the Federal Government and acting independently to a certain extent in behalf of reforestation, and some private owners are engaged in reforestation, but all of these agencies should be speeded up.

Mr. WILLIAMSON. If the gentleman will permit, the thought occurred to me in connection with this matter in which I have been very much interested for a good many years, whether or not the Government would have authority under the Constitution to step in and make a regulation which would control the cutting of timber on privately owned lands. Has the gentleman had opportunity to investigate that question?

Mr. SUMMERS of Washington. I have not. I doubt, however, the constitutional authority to do that.

Mr. GREEN. If the gentleman will yield, I would like to know if our bill provides for the purchase of additional lands within or adjacent to the national forests?

Mr. SUMMERS of Washington. There is an inclusion of $1,900,000 for that purpose. There are a great many forest-reserve items in the bill. I can not recall the details, but I am taking occasion to lay some facts before the House at this time to quicken interest in our national forests and our privately owned forests.

Mr. SCHNEIDER. The National Forest Commission has authority under the law to extend the areas of the national forests. The Forest Service commission has that authority under the law to extend the areas.

Mr. SUMMERS of Washington. Legislation was enacted a few years ago which makes it possible to acquire areas practically surrounded by national forests.

Mr. GARBER. Is that by purchase of cut-over land?

Mr. SUMMERS of Washington. It is by purchase or exchange or gift. The lands may or may not be cut over.

Mr. GARBER. What appropriations, if any, have been made for that purpose? Does this bill carry an appropriation for that purpose?

Mr. SUMMERS of Washington. It does. All lands exchanged or purchased are appraised. The exchanges are made on the appraisal value and not acre for acre.

Mr. LEATHERWOOD. Will the gentleman yield?

Mr. SUMMERS of Washington. I will yield.

Mr. LEATHERWOOD. The gentleman touched upon the question. If the Forest Service has power to regulate public lands covered by forests, why is it some of the choice districts are all slaughtered at this time?

Mr. SUMMERS of Washington. It would be very interesting if the gentleman would present to the House at a later date any information he has along that line. I do not have such information.

Mr. LEATHERWOOD. Presumably the gentleman from Washington has traveled in the Northwest, and the gentleman knows as well as I know that many districts have been slaughtered at this time.

Mr. SUMMERS of Washington. Within national forests?

Mr. LEATHERWOOD. Yes.

Mr. SUMMERS of Washington. I am not in possession of that information.

NATIONAL FORESTS CONSERVED

Through this conservative policy to which I have referred, the cutting of virgin timber on the national forests is spread over a long period of time; timber that would be wasted because of overmaturity and decay is utilized, and provision is made for full yields in the future at a time when they will be badly needed.

To make the national forests of greatest value for the present and future timber supply of the United States they have been studied for many years. As opportunity arises they are being organized into a large number of timber farms, each managed under definite plans for permanent wood production.

Plans for the management of these timber farms are made as they are needed to guide operations on parts of the forests where transportation facilities make the cutting and removal of timber feasible. They give definite answers to such questions as what shall be the area unit from which a "continuous supply of timber" is to be obtained; how much timber can be cut from that area annually or by decades and still have the growth on the whole unit replace the amount cut; what conditions must govern the cutting in order to obtain the best crops of timber for future cutting; what bodies of overripe or deteriorating timber need cutting promptly; how the greatest aid can be given to local industrial and community stability through the provision of employment in woods work and of raw material for the manufacture of forest products; and, finally, what definite areas of timber are to be offered for sale during the next 10 or 20 years.

Under such plans the future availability of definite quantities of timber is assured and business enterprises can depend upon it. Further, the administration of each area can be organized on a permanent basis, since the amount of timber to be cut during each year or other period is known. On the Harney National Forest, in South Dakota, for example, the cutting and manufacturing of timber is the chief business of several small towns, each of which knows that the timber tributary to it is being cut no faster than it is being replaced and therefore that it need not fear the fate of most sawmill towns of the past. Only some major disaster, such as a series of large forest fires or a great epidemic of tree-killing insects, will imperil the continuous output of timber from a national forest thoroughly organized under sound timber-management plans.

The limiting of the output to the quantity that can be sustained not only leads to stability and permanence of industries and communities but also tends to prevent the overproduction of lumber and other products. The lumber industry has tended to be concentrated in regions or localities, each of which is stripped of its usable timber in turn. To an increasing extent the example of continuous yield from the national forests is inducing lumbermen to study their own holdings to see if they can not be managed on the same basis; sometimes in connection with adjacent national-forest areas. Thus the national forests are fulfilling their objects both as timber-producing units and as demonstration areas for the production of timber in private ownership.

Though the national forests now supply less than 3 per cent of the lumber consumed annually in the United States, their influence on the handling of forests generally, the stability which they give to the present situation, and the provision which they make for the future, are of immense importance to everyone who uses wood; and that means all of us—men, women, and children—who live in this country.

FOREST RANGES VITAL FACTOR

The national forests have a great stabilizing influence also on the range-livestock industry, which obtains from the ranges 70 per cent of all the feed consumed by livestock in the 11 far Western States. Over 80,000,000 acres of land in the national forests now furnish forage to permitted livestock. Last year 27,000 permittees, owning over 4,500,000 acres of improved ranch land and 20,000,000 acres of grazing land, grazed 6,394,844 sheep and goats and 1,459,823 cattle, horses, and swine on national-forest forage.

I should say at this point that the forest management is making leases now or at least giving preference to men who own some land privately on which they can raise or feed stock during other periods of the season than those in which they use the national range or national forests.

This resource is vital to the prosperity of many dependent communities which must have available a permanent and plentiful supply of forage for the season of the year when the local livestock can not be maintained on the ranches.

Increased productiveness of the range benefits the community. On the other hand, if overgrazed ranges necessitate reductions in numbers or in the period of use, the dependent ranch properties have their earning power curtailed proportionately. The Forest Service system of management aims to meet the best needs of the range itself, of the related timber, game, water, recreation, and other resources, and of the dependent ranch property. Experience and investigations have shown clearly how the forage plants can be used without loss of range productiveness and often with its increase. They have shown, too, that observing the needs of the range itself minimizes if it does not entirely eliminate damage to other resources. In other words, it is now generally recognized that good range management is good forest, game, and watershed management.

The system of grazing on the national forests is directed by grazing experts, men who combine practical knowledge of the range livestock industry with scientific training. The condition of each range is closely watched and reported annually. The kind of forage, its palatability, and the effect that grazing has upon it are considered. More than 5,000 species of range plants on the forests have been identified. The livestock have their preferences in regard to these and their choice changes as the advancing season alters the menu, as early plants mature and later ones spring up. The grazing animals may crop the seeds for their concentrated food value or the tender foliage of an early stage of growth. Their hoofs cut, trample, pack. Always there is an effect on the forage crop. Plans are made, in cooperation with the users of each allotment of range, covering the essentials of good range practice—that is, the right class and number of stock for the right season of the year, properly distributed so as to prevent overgrazing of portions of the allotment and to get even utilization of the forage crop on the whole. From year to year decision is made on the basis of the careful annual inspection of the range as to whether changes can be made to better the plan of management.

It is generally recognized that range productiveness should be measured in terms of quality and quantity of meat and wool, not quality and quantity of forage merely. The production of meat and wool depends upon many factors over which the Forest Service has no control, but in which it is extremely interested. The Forest Service, therefore, encourages, through its contact with individuals and livestock associations, the adoption of better practices in all lines of livestock production. Class, breed, and care of livestock when not on forest ranges are of sufficient importance to merit the careful consideration of all progressive stockmen. "More feed, more care, and better livestock" is still a slogan which might be followed with profit to the industry. The increased interest and response of permittees in the development and application of better practices is notable. It is because of this that the Forest Service has been able to complete plans on 4,415 out of a total of 7,064 range allotments.

Range regulation governed by economically sound principles and based on the authority of the Government as owner of the land to prescribe how it shall be used, together with the development by the Government of the technical knowledge essential for a right handling of the range resources, has made it possible to promote conditions of community welfare that, in the absence of regulation, could have been attained only through a long and painful struggle for economic adjustment. And during that struggle both the productivity of the resource and the personal fortunes of almost numberless individuals and families would have suffered greatly. But for the system of grazing control applied on the national forests many a western livestock producer would long ago have had to go out of business for lack of forage.

WATERSHEDS SERVE MILLIONS

The protection of national-forest watersheds has proved equally vital to the irrigation farmer and to the towns, cities, hydroelectric developments, and to all interests dependent on a steady supply of water from the mountain watersheds. Municipalities to the number of 782 with a population of 3,750,000 depend for their water on watersheds wholly or partly in the national forests. For water power 529 permits and licenses issued by the Department of Agriculture and the Federal Power Commission were in force at the close of the last fiscal year. More than 50,000 independent irrigation enterprises embracing 165,000 farms, with an aggregate irrigated area of 15,800,000 acres, are served by national-forest watersheds. The crops from these farms amounted at the time of the last census to more than $600,000,000. A map of the irrigated lands of the West would show practically all of them adjacent to or intermingled with national-forest lands. Irrigated land in the valleys of the West means almost inevitably national forests on the adjacent mountains. The irrigation water from the mountains in the national

forests may make the difference between almost valueless land and land worth from $100 to $1,000 an acre when developed.

Though timber, forage, and water are the principal resources there are many others, like recreational areas, game and fish, and lands, suitable for a multitude of special uses under permit. Of these the recreational resource is the most important.

THE NATION'S PLAYGROUND

Americans turn naturally to the mountains and the woods for their outdoor recreation. In the national forests they find both, for the forests are located mostly along the mountain ranges. They find also a measure of freedom of action that is agreeable to American taste, for it is limited only by the requirements for protecting the resources of the forests, the beauty of the scenery, and the health of the visitors themselves. Furthermore, the Forest Service, recognizing that recreational opportunities are a resource like timber, forage, and water, uses its best efforts to see that recreational use makes the greatest returns in national welfare consistent with the chief purposes for which the forests were established. More than 1,500 camp grounds, on 919 of which improvements have been made, are now being heavily used by the public. The fact that nearly $45,000 in cash, material or labor, or about a fifth of the total outlay, has been contributed by municipalities, associations, and other cooperators toward camp grounds and other recreational improvements is some indication of the interest which neighboring communities and others take in the recreational use of the forests.

The national forests embrace parts of every mountain system and almost every forest region in the United States; they form the natural outlet of large populations, to which they are logical, near by, economically enjoyed fields for outdoor sport and recreation. To millions of people they are the natural and sometimes the only available playgrounds other than city parks. And in these days of motors and good roads even the inhabitants of regions remote from the national forests have a direct personal interest in them as recreation grounds where they can feel free to camp or enjoy themselves in their own way, so long as they obey the rules of good sportsmanship and good citizenship in the woods.

The national forests have thus become a constructive influence in providing resources and protection to several of the major industries of the Nation, in promoting community stability and welfare, and in fostering the health and happiness of the people. They are a paying investment, returning large dividends in economic and social welfare, and at the same time putting into the United States Treasury each year $5,000,000 toward the cost of their own maintenance.

FIRE MENACE

The protection of these great properties from fires and other destructive influences is an immense task requiring a large provision of equipment, supplies, and works of control, a trained and public-spirited personnel, and the means of mobilizing large emergency forces and enlisting the cooperation of whole communities. The task becomes larger and larger each year as more people go into the woods carrying with them the menace of the lighted match, the burning cigar or cigarette, and the camp fire.

It is in the West that the worst fires occur. There, to add to the man-made fires, electric storms with little or no rain are common and one such storm may start from a dozen to 30 fires within an hour or two. In the West also, particularly in the Pacific Coast States and in northern Idaho and western Montana, the forests normally face a dry season each year, the summer drought being frequently severe and prolonged. Other circumstances combine with them to make fire protection difficult. The timber stand is of conifers; the country is very mountainous and broken, often little settled and lacking in means of communication and transportation; the areas to be protected are immense; and the funds available for the work of protection are inadequate.

To combat the fire danger the Forest Service personnel puts in long hours of work and planning to strengthen the mechanism of fire protection and to find ways and means of making every dollar of appropriation cover as much as possible of the enormous task. Insufficient improvements is one of the greatest problems encountered in this work. A recently completed survey of fire-control requirements showed 12,000 miles of telephone, including replacements, to be urgently needed. There are also needed 205 new lookout towers and 73 replacements, as well as many other improvements to house and make effective the fire-control forces and their equipment.

The protective forces of the Government are without the means of making the attack on forest fires by assault and are compelled to use siege methods. Season by season telephone lines, lookout stations, roads, and trails, and similar permanent works are carried farther into the mountains as the funds are available and the foe is pressed gradually back, the men employed on these works being used in the meantime as fire fighters when occasion demands. In the score of years that the national forests have been in existence great advances have been made by the siege method and by continued effort to perfect organization and technique. There is a deal of ground still be gained, however, and the victory depends not only on Forest Service efforts but on the support and backing which that effort receives from Congress, from the communities immediately interested, and from the general public.

RESEARCH OPENS NEW FIELDS

One of the chief methods used by the Forest Service to improve its fire-protection work is research. This method is applied not only to specific problems of forest management, weather conditions, and the effect of such factors as topography, moisture content of forest fuels, and inflammability, but also to administrative practices, organization, equipment, and so forth. It is a method used in the attack upon unsolved forest problems of many kinds. Silvicultural and other forest studies are undertaken at 11 forest experiment stations, research in range management is carried on at 3 range experiment stations, and studies of the utilization of forest products are made at the Forest Products Laboratory at Madison, Wis., and by forest products offices in the various national-forest districts. All these investigations are of assistance to forest officers in working out ways and means of handling the national forests, as well as to the industries involved and to the consumers of forest products. For instance, the Forest Products Laboratory's studies of pulp and paper manufacture and of American species suitable for paper making, of the relation of rate of growth and other factors to density and strength of wood, and of the influence of biological factors generally on the use of the product of the forest, of the use of Sitka spruce for airplane parts, and so forth, have a direct bearing on plans for cutting and for growing timber on the national forests.

The passage during the past session of Congress of the McNary-McSweeney Act authorizing a national program for forest research was a recognition of the urgent need for expansion of this activity. The most critical need now is financial resources to put the program in operation. Of all the phases of the forestry problem—and this applies to the national forests as well as to privately owned land—forest research is the most difficult and the most exacting in its requirements. It is also the most intangible, but it has often made returns of immense importance altogether out of proportion to the expenditure involved to need any defense. In forestry the field of research is large, the problems varied, and the results urgently needed for the right handling of Government, State, and private forest lands and their products.

A NEW ERA

Two important steps, in addition to the legislation for forest research, have been taken recently by Congress in planning for the solution of the forest problems of the Nation. The Clarke-McNary Act, for cooperation with the States in fire protection, distribution of tree-planting stock to farmers, forestry extension work, and an enlarged program of forest-land acquisition, has resulted in notable progress in the four years that it has been in operation. The McNary-Woodruff Act passed last April sets up a definite program of expenditure for the acquisition of land for national forests. The extension of the national forests is desirable for a number of important reasons. Self-preservation demands that the public acquire rough broken lands where the destruction of forests or failure to maintain good forest conditions means severe erosion, rapid run-off of precipitation, and irregularity of stream flow. Many areas of forest and cut-over land are suitable only for public management, Federal, State, or local, and the Federal Government has a definite responsibility to carry and manage its proportion of such forest land for timber production. More demonstration forests are needed as centers for the teaching of forest management by example. And the present national forests need to be consolidated and to be extended over the remaining public-domain land that is valuable chiefly for timber production.

The national forests in the past quarter of a century have gradually become recognized as one of the most important activities carried on by the Government for the economic and

social welfare of the people. They occupy a large place in the life of a great number of communities. They have given large returns for the comparatively modest investment we have made in them. They have arrived at a stage of development at which they are ready to increase enormously those returns for a proportionately small increase in the care and attention that we give to them and the provision we make for their management. It is the part of wisdom, economy, and statesmanship to provide more generously for their protection, enlargement, and improvement, and for the research necessary to make them and our forests generally most useful to the Nation.

Mr. SANDLIN. Mr. Chairman, I yield 10 minutes to the gentleman from Kansas [Mr. HOCH].

The CHAIRMAN. The gentleman from Kansas is recognized for 10 minutes.

Mr. HOCH. Mr. Chairman and gentlemen of the committee, I realize that it is Saturday afternoon and that it is difficult to get your attention. But if you will give me your attention for just a few moments, I believe I can present to you a matter in which you are all interested. I want to make a few observations on one of the features of the question of reapportionment.

The gentleman from Ohio [Mr. BURTON], in his splendid speech to us yesterday, said he was opposed to increasing the size of the House. I have always shared in that opinion. I would even favor a reduction in the membership of the House. What I am going to say now is not intended in any way to obstruct or to delay the reapportionment measure. I favor bringing the reapportionment measure promptly before the House for action, believing that it is our duty to reapportion.

I shall oppose, as I have hitherto opposed, the increase of the membership of the House, in spite of the fact that my State of Kansas would lose one Member under the reapportionment.

But there is one phase of the present law which I think is unjust, and it is to that feature that I wish to call your attention. The first sentence of section 2 of the fourteenth amendment reads as follows:

> Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed.

To this section I have introduced a proposed amendment. My amendment simply adds these two words to that sentence: "and aliens," so that it will read, "excluding Indians not taxed and aliens."

Now, I have had furnished to me through the courtesy of the Census Bureau a reapportionment of this House under the 1920 census, preserving the same number of 435, and showing the number of Representatives that would be given to each State if we did not count the aliens in each State. By an alien I mean, of course, a foreign-born person who has not become naturalized. This table raises this question, whether it is right that aliens in this country, foreign born and unnaturalized, should be counted in determining the number of Representatives which a State should have; and I submit that in all justice they should not be counted.

Mr. FORT. Mr. Chairman, will the gentleman yield there?

Mr. HOCH. In a moment. I ask this question: If foreign-born people come to this country and do not think enough of America to become naturalized Americans, and therefore citizens, should the State in which they live be permitted to count them to increase the number of Representatives from that State?

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. HOCH. I will yield first to the gentleman from New Jersey [Mr. FORT].

Mr. FORT. The original provision that the gentleman referred to includes the words "Indians not taxed."

Mr. HOCH. Yes.

Mr. FORT. That is because at the time of the adoption of the amendment the Indians were not taxed. Should not the gentleman's proposal contemplate the fact that some Indians are now taxed?

Mr. HOCH. I do not care just now to go into that, for it is not the matter I am discussing. I am simply raising the inquiry as to whether the unnaturalized foreigner should be included.

Mr. SCHAFER. The alien must be here five years before he can be naturalized. Would you not count those who have not been here five years.

Mr. HOCH. I say there is no justice in permitting the foreign-born unnaturalized to be counted to determine the number of Representatives that a State should have.

This table shows that under the 1920 census a reapportionment on the basis of 435 Members would affect 16 States, and 32 States of the Union would not be affected. Let me read you a list of the 16 States that would be affected under the 1920 census. I read:

> Arkansas, instead of retaining its present number of Congressmen, would gain one.
> California, instead of gaining three, would gain two.
> Connecticut, instead of gaining one, would remain the same.
> Georgia, instead of remaining the same, would gain one.
> Indiana, instead of losing one, would remain the same.
> Kansas, instead of losing one, would remain the same.
> Kentucky, instead of losing one, would remain the same.
> Louisiana, instead of losing one, would remain the same.
> Mississippi, instead of losing one, would remain the same.
> Massachusetts, instead of remaining the same, would lose two.
> Missouri, instead of losing two, would lose one.
> Nebraska, instead of losing one, would remain the same.
> New Jersey, instead of gaining one, would remain the same.
> Oklahoma, instead of remaining the same, would gain one.
> Pennsylvania, instead of remaining the same, would lose one.
> New York, instead of remaining the same, would lose four.

Mr. LAGUARDIA. Is that the purpose of the gentleman's amendment?

Mr. HOCH. The gentleman from New York asks what is my purpose? My purpose is to apply the same rule to all the States.

On every vote I have voted against increasing the membership of this House, but it makes quite a strain upon human nature for any Member to go to his State and say that he votes to take one Member away from his State when if your aliens, Mr. LAGUARDIA, in New York, were not counted, his State would not lose one and your State would lose four.

Mr. LAGUARDIA. So, as I say, that is the purpose of the gentleman's amendment.

Mr. HOCH. Let me call this to the attention of the gentleman from New York: The amendment which I have offered is no new proposition. I have before me the constitution of the State of New York and I shall read the provision which has to do with the apportionment of members of their State legislature, their State assembly. I read:

> The members of the assembly shall be chosen by single districts and shall be apportioned by the legislature at the first regular session after the return of every enumeration among the several counties of the State, as nearly as may be according to the number of their respective inhabitants, excluding aliens.

[Applause.]

The constitution of the State of New York does precisely the same thing that I propose for the United States.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. HOCH. Yes.

Mr. LAGUARDIA. Would the gentleman also exclude persons who are disfranchised?

Mr. HOCH. I am now only seeking to exclude this one class. But if the gentleman wants to exclude some other people that he has in New York I might join him in that effort.

Mr. LAGUARDIA. I am talking about other States.

Mr. HOCH. Let me call your attention to the fact that North Carolina, in its constitution, has precisely the same language that I propose in this amendment, excluding aliens and Indians not taxed. California excludes persons not eligible to citizenship. Understand, that when I say "exclude," I mean simply that they exclude them from the count determining the apportionment of members of their State legislatures.

Mr. ABERNETHY. Will the gentleman yield?

Mr. HOCH. Yes.

Mr. ABERNETHY. Why pick on New York in view of what happened there during the last election?

Mr. HOCH. Well, I think the question is a very proper question which calls for sympathy. But if these official figures pick on New York I am not responsible for that. There are other States. Tennessee apportions the members of its State legislature according to qualified voters. It goes much further than the proposal here; it not only excludes aliens but it limits the count entirely to qualified voters.

Mr. LEAVITT. Will the gentleman yield?

Mr. HOCH. Yes.

Mr. LEAVITT. Does the gentleman think there is any longer any reason for excluding Indians because they do not pay taxes, since they have all become citizens of the United States?

Mr. HOCH. The gentleman is familiar with the situation with reference to the Indians and I do not want to be diverted in discussing them. If the gentleman thinks they ought not to be excluded let him introduce a resolution.

Mr. LEAVITT. But in the amendment the gentleman is continuing the discrimination against Indians because they are not taxed. Would not the gentleman be willing to put the Indians, who are now in the same situation as to citizenship, on a parity with the whites?

Mr. HOCH. I had thought, with all due deference to the gentleman, that I might confine this to the one question I have raised. If the gentleman, who is interested in the affairs of the Indians, thinks the Constitution ought to be changed as to their status, certainly he is in a position to give the matter attention, but I am confining myself to the question I have raised.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. SANDLIN. Mr. Chairman, I yield the gentleman three additional minutes.

Mr. HOCH. I will ask the House this question, since the gentleman has talked about the Indians: Is there any reason that can be given as to why we should exclude Indians in determining apportionment which does not apply with more force to the aliens in this country?

Mr. SMITH. Indians are not citizens; they are simply given the voting privilege by an act of Congress.

Mr. SCHAFER. Will the gentleman yield?

Mr. HOCH. I can not yield further, because my time is limited. However, I will yield to any man who will suggest any reason why a man who comes to this country, born in a foreign country, and does not think enough of America to become an American citizen by taking out naturalization papers, should be counted in determining the apportionment of Representatives; who will give any sound reason why the States in which those men live should be permitted to count them in order to get more Members in the House of Representatives.

Mr. LAGUARDIA. This is a representative government, and the very purpose of making an apportionment according to population was to have everyone represented in the Federal Congress. That was the fundamental purpose of the provision in the Constitution.

Mr. HOCH. If such people come here and do not become citizens and yet want some representation, let them hire good lawyers to represent them.

Mr. LAGUARDIA. They do want to become citizens; but when you have the Ku-Klux Klan administering the naturalization department, they never can become citizens. That is your answer.

Mr. SCHAFER. And many of them have not been here long enough.

Mr. HOCH. The gentleman takes the position that the 1,600,000 aliens in his State are not citizens for the reason that somebody kept them from becoming citizens?

Mr. LAGUARDIA. A good many of them; yes. I take that stand.

Mr. BARBOUR. Will the gentleman yield?

Mr. HOCH. Yes.

Mr. BARBOUR. Do I understand that the gentleman proposes to postpone all apportionment until the Constitution has been amended as he suggests?

Mr. HOCH. If the gentleman had been here at the beginning of my statement he would have heard me say that I am not seeking to delay reapportionment in any way; that I had always voted for reapportionment, and I voted with the gentleman against increasing the size of the House.

Mr. BARBOUR. I remember that.

Mr. HOCH. Yes; and I will call attention to the fact, since the gentleman from California has spoken, that if we cut out the aliens in the State of California, California instead of gaining three Members here would only gain two, and I think it ought to be satisfied with gaining two more Members.

Mr. SCHAFER. Would not a good reason against the gentleman's proposition be that you would have taxation without representation?

Mr. HOCH. Then I presume that in the State of New York and in the other States I have referred to, they have a terrible situation where the members of their State legislatures are apportioned on a basis which means taxation without representation. [Applause.]

Mr. SCHAFER. The record apparently so indicates.

The CHAIRMAN. The time of the gentleman from Kansas has expired.

Mr. HOCH. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by inserting the table to which I have referred.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

The table follows:

Table showing a reapportionment of 435 Representatives in Congress on the basis of the total population as compared with a reapportionment based on the population exclusive of the foreign born who have not become naturalized. It is based on the census of 1920 and the method of "major fractions" was used

State	Present membership	Reapportionment on basis of—	
		Total population	Total population excluding aliens (unnaturalized foreign born)
Total	435	435	435
Alabama	10	10	10
Arizona	1	1	1
Arkansas	7	7	8
California	11	14	13
Colorado	4	4	4
Connecticut	5	6	5
Delaware	1	1	1
Florida	4	4	4
Georgia	12	12	13
Idaho	2	2	2
Illinois	27	27	27
Indiana	13	12	13
Iowa	11	10	10
Kansas	8	7	8
Kentucky	11	10	11
Louisiana	8	7	8
Maine	4	3	3
Maryland	6	6	6
Massachusetts	16	16	14
Michigan	13	15	15
Minnesota	10	10	10
Mississippi	8	7	8
Missouri	16	14	15
Montana	2	2	2
Nebraska	6	5	6
Nevada	1	1	1
New Hampshire	2	2	2
New Jersey	12	13	12
New Mexico	1	1	1
New York	43	43	39
North Carolina	10	11	11
North Dakota	3	3	3
Ohio	22	24	24
Oklahoma	8	8	9
Oregon	3	3	3
Pennsylvania	36	36	35
Rhode Island	3	2	2
South Carolina	7	7	7
South Dakota	3	3	3
Tennessee	10	10	10

Mr. SANDLIN. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. JONES].

Mr. JONES. Mr. Chairman, I rise for the purpose of asking some member of the committee the purpose of the last proviso on page 61 of this bill, where it says:

Provided further, That no part of the funds herein appropriated shall be available for the preparation of mid-monthly reports of cotton estimates for the months of July, August, and November.

Mr. DICKINSON of Iowa. That is the same provision that was put in last year in the matter of giving cotton estimates, and I presume it is to prevent the Government from publishing the estimated crop reports.

Mr. JONES. I will state to the gentleman that a year or more ago we enacted a law which forbids mid-monthly estimates and leaving simply the one monthly estimate in the early part of the month. The existing law abolishes all mid-monthly reports on estimates.

Mr. DICKINSON of Iowa. These are crop estimates and are not price forecasts.

Mr. JONES. I understand that. The law to which I refer has nothing to do with price forecasts, but abolishes all mid-monthly estimates. It so happens that I am the author of the existing law on this subject, and naturally, therefore, recall the incident.

Mr. DICKINSON of Iowa. Will the gentleman give us a reference to the statute?

Mr. JONES. It was passed by the House a year or more ago and we had quite a discussion about it. I can give the gentleman the reference to it. The bill was passed and was approved, abolishing the first-of-the-month estimate and all mid-monthly estimates and reducing the number of estimates from 11 to 5. I would not care about this being in here except that the proviso forbids the mid-monthly reports of cotton estimates for the months of July, August, and November, which might inferentially authorize them to give the mid-monthly estimates in other months.

Mr. DICKINSON of Iowa. On page 3 the gentleman will find the limitation which the gentleman has in mind, as follows:

Provided further, That no part of the funds appropriated by this act shall be used for the payment of any officer or employee of the Department of Agriculture who, as such officer or employee, or on behalf of the department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast with respect to future prices of cotton or the trend of the same.

Mr. JONES. No; I have no reference whatever to that proviso. I think that is a fine provision, and I secured its adoption or a very similar one during the last session, as the gentleman remembers, and I am very glad to see the gentleman is again including it in the bill, and I compliment him and the committee for doing so. This other provision refers not to the prices of the crops but to the forecasts of production. We had quite a discussion here as to the effect on the market of having these predictions every two weeks, and I supposed the gentleman was familiar with that act. I will say for the gentleman's information that I will secure a copy of the act and present it to him.

Mr. DICKINSON of Iowa. There was no intention of including anything in the bill that would nullify anything that has been passed heretofore.

Mr. JONES. I am sure of that; and what I fear is that this might be construed as legislative authorization, as a rider on an appropriation bill, authorizing the going back into getting out midmonthly reports during the months not named as being excluded.

Mr. DICKINSON of Iowa. There was no such intention.

Mr. JONES. The gentleman, of course, is familiar with the rule of law that by excluding some you include the others?

Mr. DICKINSON of Iowa. There was no such intention on the part of the committee, and I will be glad to look up the statute, and if it is necessary to make this plainer, I shall be pleased to do it.

Mr. JONES. I thank the gentleman.

I want to state while I am on my feet, that I was very much interested in the discussion of the gentleman from South Carolina [Mr. HARE], on the question of marketing.

I notice in looking through the bill that exclusive of the provision for roads, there are some sixty-odd million dollars appropriated. Of that sixty-odd million dollars, some $6,000,000 are appropriated for the problems of marketing and distribution and nearly $60,000,000 are appropriated for other uses dealing mostly with the questions of production. In other words, more than 80 per cent of the work being done by the Department of Agriculture is being done on the program of production and less than 20 per cent of the funds in connection with the work being done by that department are apparently used in connection with the problems of marketing and distribution.

I want to make this suggestion in connection with the work, not so much to the committee, although somewhat to them, but more to the department—we have in this country mastered the machinery of production to a far greater degree than we have the machinery of marketing and distribution. The problems we have in this country, as is noticeable in the discussion of the farm question, do not pertain so much to the problem of production as they do to how to dispose of the crops to the best advantage. I would like to see a reverse English put on that. I would like to see the Secretary of Agriculture who is in charge of this department, recommend a program by which he would devote 75 or 80 per cent of his efforts, and 75 per cent of all the money appropriated for his department, to a solution of the real problems of the farm. I think that would be much better than to have the greater portion of his efforts and appropriation devoted to the problems much less acute.

Mr. BLANTON. Will the gentleman yield?

Mr. JONES. I will.

Mr. BLANTON. I agree with the position the gentleman takes. I commend him for the fight he has been making several years for better marketing facilities. Is it not true that the farmers will take care of the production if the Government will assist them in securing better distribution and marketing?

Mr. JONES. I think that is largely true. I think it is a question for serious thought on the part of those in charge of the work being done by this department. We have had discussion and agitation over the country of farm relief, and the whole problem has been girdled about with propositions of distributing and marketing these products; yet this department that was created primarily for the interest of agriculture is devoting more than 80 per cent of the funds put in its hands on a line of work that does not touch the condition of the marketing system. I think that is a matter that should be given serious thought, and I think there should be a readjustment all along the line.

I am not criticizing; I am simply commenting. Some wonderful work has been done by the department, notably in finding new outlets and uses for cotton and in other matters pertaining to marketing. I would like to see this branch of the work enlarged. That is the purpose for which I rose.

I do not quarrel with the work that has been done. But I do think it would be wise to devote a larger portion of whatever money is appropriated to the marketing side of the farmers' problems.

For many years the farmers have marketed their products largely on the terms of those who handle the commodities after they leave the farm. In that field a great work lies, and I would like to see this phase of the department's work receive a larger share of their attention. [Applause.]

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. COLE].

Mr. COLE of Iowa. Mr. Chairman and Members, while the agricultural appropriation bill is under consideration I want to occupy a few moments of the time of the House to present a new kind of hero. From time to time we exhibit here, in words and also in the flesh, various kinds of heroes. A few days ago there was presented to us from the Speaker's gallery a lady from England, Lady Heath, who has an altitude flying record. We can recall how we welcomed Col. Charles A. Lindbergh.

But my hero is different, and in my opinion also important. He is a 12-year-old boy named Clarence Goecke, of State Center, Iowa. He appeared on the scene of what has become national fame in the International Livestock Show and Exposition in Chicago last month. His picture has appeared in all the papers of the country, together with his sister, Emma, who helped him exhibit his product.

That product was a sample of "baby beef" on the hoof, affectionately named "Dick." This "Dick" was to Clarence Goecke what his "We" was to Colonel Lindbergh. In July, 1927, the father of this boy, a noted breeder of fine stock, presented him with a Hereford calf. The boy accepted it and fed it with all the care that a boy can bestow on a pet animal. He followed scientific methods of feeding, with the result that in November, 1928, he exhibited the calf, with a weight of 1,160 pounds, for championship honors. The animal won all the honors. It was the first time in the history of International Livestock Show that a club calf was made grand champion of the open fat steer show. The modest and blushing boy was overwhelmed with honors. In addition to winning more than a thousand dollars in prizes, he received a check for $8,049.10 when the animal was sold at auction to Mr. J. C. Penney at $7 a pound—dollars instead of cents per pound. Of these sums he gave $2,000 to his sister and the balance of it he has placed in a bank—may he later invest it in a farm.

Clarence Goecke and his sister, Emma Goecke—for she is closely identified with his victory—are members of farm clubs, known as 4-H Clubs. It is to these organizations for the boys and girls of the farms that I want to call especial attention in this connection. These boys and girls are studying farm processes and problems in their youth. They are learning all they can about what will be the scientific farming of the future.

I am told that there are now 640,000 boys and girls in such club memberships and activities. They are scattered through all the agricultural States. I do not know of any organizations in the land that are more worthy of praise, even here on the floor of the House of Representatives. They are preparing themselves for intelligent industry in an age that pessimists think is largely devoted to frivolities and inanities. These boys and girls are part of the answer to those who despair of the future. They not only hold meetings, but they practice what they learn. It is applied education.

These 640,000 boys and girls—and may their tribes increase—are important when we have in mind the fact that every 16 years we have a new population on the farms. That is to say, the average time of those on the farms is only 16 years. Many, of course, remain on their farms much longer, but many more do not tarry even that long. With 640,000 youths in training

we can visualize a new kind of agriculture, an agriculture of science and of business methods. Instead of returning to peasantry, as some pessimists have tried to make out, I think we are more apt to turn to a superagricultural population. We have "master farmers" now, but we will have many more in the future. On the farms, as well as elsewhere, it is going to be a survival of the fittest.

The boy whom I am presenting as one of our new heroes is only one of many who are doing such things. Clarence Goecke has simply succeeded a little better than others. He has succeeded so well in his efforts that he has achieved the highest honors.

Fortunately we are encouraging such efforts by giving them recognition. The boy from the district which I represent was the guest of honor, together with his sister, at a public dinner given in Marshalltown, Iowa, under the united auspices of the chamber of commerce of that city and of the farm bureau of Marshall County. No public dinner was ever given more worthily.

I think we need not despair of the future. [Applause.]

Under leave to extend these remarks in the RECORD, I am going to reprint here what the Iowa Homestead, published at Des Moines, one of the greatest of all farm journals, said in its issues of December 13, of this boy hero and his achievement, as follows:

The most important event at the big stock show in Chicago last week, which is already known all over the United States, was the placing of the purple on the yearling purebred Hereford club steer, Dick, fed by Clarence Goecke, State Center, Iowa, a boy only 12 years old. While Clarence had shown the steer himself at other fairs he decided to let his more experienced 18-year-old sister, Emma, show him at the International and to her belongs the credit of doing as fine a job as any expert showman.

It should be mentioned here that the judge who made the Goecke steer grand champion of the show was none other than Walter Biggar, of Dalbeattie, Scotland, who judged the fat steer classes at the International for the fourth time this year. Mr. Biggar is considered to be one of the best fat cattle judges in the world. And in this connection let it also be mentioned that this year's show of individual fat steers—purebreds, grades, and crossbreds—was the strongest ever seen at Chicago. In fact Judge Biggar stated that Dick was one of the greatest steers he had ever seen anywhere.

The one thing coveted most by breeders and feeders all over the United States and Canada is to win grand champion steer honors at Chicago. Expert feeders by the score all over the international field try their skill year after year in an endeavor to win this prize and this year a club boy challenged the most skillful feeders in the two countries and won.

What did winning this prize mean? Did it mean merely success and honor to Clarence and his sister, Emma? Not at all. It meant much more. It gave dignity and standing to 4–H club work in general and to the livestock feeding projects in particular. The millions of boys who will hear about it all over this great country of ours will become ambitious and desirous of seeing what they can do in the way of feeding calves. Millions of fathers who up until now may have been in doubt as to the practical value of feeding projects for club boys will change their minds and become ambitious to give their boys an opportunity to lead a grand champion into the show ring at the county, State, or a still greater show.

We congratulate Clarence and his sister Emma. It was a wonderful achievement to win this great prize. Let them realize, however, that with great success comes great responsibility. Let them remember the fine club motto, "Win without bragging and lose without squealing." The management of the International may well feel proud over this grand championship winning. It is additional proof to them that they did a wise thing when they encouraged the boys and girls of the country to bring their club calves to the exposition and permitted them to show in the open classes and compete for the highest honors. May the results of this year's grand champion steer award bring about a great increase in club work all over the country. May it double the present membership in the next two years.

Mr. BUCHANAN. Mr. Chairman, I yield 10 minutes to the gentleman from Kentucky [Mr. GILBERT].

Mr. GILBERT. Mr. Chairman, yesterday the House was debating an appropriation for St. Elizabeths Insane Asylum. The leader of the House had just complimented the Committee on Appropriations for its splendid service, and the several members of the Appropriations Committee in turn complimented one another. I think that in the main was justified; but there is one subject about which those in power do not seem to want any information, and that is St. Elizabeths Hospital. I did not care again to bring this matter to the attention of the House. When the bill was under consideration under general debate I asked for no time, but after the gentleman from Idaho [Mr. FRENCH] had made such an unjust vindication of this institution I asked him certain questions.

I call the attention of the committee now to how little he knew by his own confession about that hospital. I asked him how many employees they had, and he correctly gave the number at more than a thousand and the number of patients at more than 4,000, admitting that one person was employed to every four patients. I have here two telegrams from institutions of the same kind, hospitals for the insane, where they conduct farms and are doing the same work that they do at St. Elizabeths. One is from the Eastern Kentucky Hospital for the Insane, at Lexington, Ky.:

We have 1,599 patients and 170 employees.

That is 1 to 9. The other is from the Central Kentucky Asylum for the Insane, at Lakeland, Ky.:

We have 1,823 inmates and 205 employees.

Again, 1 to 9. That is the proportion of employees to patients over the United States, with some few having as many employees as 1 to 7. Here they have 1 to 4. But the gentleman from Idaho [Mr. FRENCH], after giving that information to the House, strengthened his position very much by saying that the per capita expense at the institution was $300 per year. That is very small. I concede that for a moment I was disarmed, but that information is not correct. Under the leave to revise his remarks, the gentleman from Idaho, after telling the House that the per capita expense was $300 per patient, changed his remarks to read $2 per day.

Mr. FRENCH. Mr. Chairman, will the gentleman yield?

Mr. GILBERT. Yes.

Mr. FRENCH. My first remarks had reference to the Government appropriation. I find, however, that including the moneys that are received by the institution, moneys not appropriated by the Government, it brings the figure up to that which I placed in my corrected remarks—less than $2 per day. The figures that I inserted in the RECORD are the correct figures. The figures I used last night would be the correct figures as applied to Government appropriations, but I felt that the House would prefer to have the latter figures, which give a proper picture of the situation.

Mr. GILBERT. I am not criticizing the gentleman for changing the figures. Under the leave to revise and extend his remarks he did the proper thing, but it shows instead of it being $300 a year it is $2 a day, $730 a year for each patient there, several hundred dollars greater than the average over the United States. For some reason I do not know why the Committee on Appropriations can not or will not get the facts in reference to this institution. I repeat, and am prepared to vindicate my assertion, that the hospital in its management is the most extravagant, the most inefficient, and the most outrageously conducted hospital for the poor unfortunate insane in the United States, and to continue to keep Doctor White in charge after sworn testimony has been produced of changing records, of extravagant abuses, mistreatment, including the death of one man under correction, is a blot upon the administration and another illustration of where Government institutions are conducted more for the interest of those in charge than in the interest of the inmates for whose benefit they are supposed to be conducted.

Mr. WILLIAMSON. If the gentleman will yield, I may say that the Committee on Expenditures has already ordered an investigation of St. Elizabeths Hospital, starting next week.

Mr. GILBERT. Mr. Chairman, I would not have made these remarks had it not been for the very enthusiastic defense made by the gentleman from Idaho, who more than doubled his own figures yesterday after giving the House information. That committee, frankly, does not know the facts about this institution. That is a strong statement to make, but I stand prepared to verify any statement I have made. I am sick and tired of having to take this floor upon this matter every session. I have said all I ever intend to say about it, but they are the facts. I feel justified in repeating them. [Applause.]

Mr. BUCHANAN. Mr. Chairman, I yield the balance of my time to my good Republican colleague [Mr. KNUTSON].

Mr. KNUTSON. Mr. Chairman, for several years the lawyers of the country, and more particularly the lawyers of the House, have been working on our agricultural problems in an endeavor to find a solution for them, but they have not progressed very far. Now the newspaper men of Minnesota come forward with a plan that embraces a number of measures. I desire to call this plan to the attention of the House. The sponsors of this plan are all men of standing, and if there is no objection I am going to ask to have the so-called Minnesota plan made a part of my remarks in the RECORD. I yield back the balance of my time.

The article referred to is as follows:

SUGGESTIONS FOR CONCRETE EFFORTS BY CONGRESS IN BEHALF OF FARM RELIEF—THE MINNESOTA PLAN

Believing that much can be gained by developing concrete, workable, and just proposals out of the general sentiment for national policies more favorable to agriculture, and believing that now is the time for such concentration of thought, rather than for mere assertion and protest or political maneuvering, we, the undersigned, suggest attention to the following program, and we hope for such general approval that it may be held up to the country as the Minnesota plan. We do not assume to include all that might be practical, and we welcome suggestions for amendment.

1. Development of Mississippi and St. Lawrence waterways within limits that can be approved by disinterested engineers and business men. Delegation of power to the Interstate Commerce Commission to permit northwest railroads to compete with the Panama Canal for western traffic.

2. Retention of the flexible feature of the Fordney-McCumber Tariff Act—a vital need to prevent maladjustment between acts of Congress and rapidly changing world conditions.

3. Amendment of the tariff laws to provide for the following:

(a) Revival of the potato-starch industry in Minnesota and in other potato-growing States. A higher tariff on flax and on any other farm products that can be produced in our country and which have foreign competition in the home market.

(b) Such tariffs on vegetable oils as will make corn oil and other vegetable oil production here pay, and such as will end the advantages these foreign vegetable oils have as substitutes for animal and dairy fats.

(c) A better dairy schedule designed to put other dairy products on a basis equivalent to that of butter and to protect milk and its by-products, such as cream and milk powders and casein, against foreign competition.

(d) There should be no competing meat and poultry imports, and the various animal by-products should be so protected that their prices will help to sustain the farm prices for the whole animal. In this connection we suggest consideration of a bonus on exports of animal products, to the end that the livestock industry be stimulated, thereby becoming a factor in consuming a surplus of grain and in the process keeping fertility on American farms instead of shipping it abroad as would be the case if grain exports are stimulated instead of livestock products. We suggest, however, that in case of grain surplus emergency, provision for an export grain bonus be considered, but with suitable penalties for continued overproduction.

(e) All cereals should bear such high rates of protection that threat of imports can not interfere with prices set by domestic demand and supply.

(f) There should be a sugar policy, perhaps one of gradual increase in protection over a series of years, with the end in view that the continental United States shall be practically self-sufficient in sugar. Public security as well as farm welfare demands such a policy.

(g) Executive actions on tariff rates should be made acts of Congress, so that in the future the Executive may be free to render further aid under the flexible clause.

(h) Farm-product protection should be accompanied by such compensating duties for products manufactured therefrom that no such industry shall suffer in the home market.

4. Provision for two lines of research to be projected at once under congressional authority: The one to discover means of replacing imported farm products with native products so far as possible; the other to survey the possibilities of drawing increased raw materials for our industries from American farms.

5. Consideration of the problems arising from the fact that the Philippines, Hawaii, Porto Rico, and supervised countries such as Haiti, San Domingo, and Nicaragua are and will continue to be agricultural countries, tending to compete unfairly with our continental farming. Development of our inland empire we suggest to be the wiser policy.

6. Consideration of immediate steps to shift Government activity from reclamation of land to reforestation and grazing.

7. Provision for continued efforts to reduce costs of farm production so that prices to consumers can be held down while at the same time careful farmers get fair returns, and also that our export farm markets may be held so far as possible. Along this line there should be increased support of farm schools and colleges, county extension agents' boys' and girls' club work, and all those other agencies calculated to improve business management of the farms.

8. Creation of a Federal farm board with wide powers to assist and advise, but without power to determine prices or to make sumptuary rules. Such board to be established at once.

9. Consideration in all such legislation that general credit policies be framed with relation to the length of turnovers in farm production and the need of steady or slightly ascending price levels.

10. Provision for continued support and aid in the development of cooperative marketing as a means of increasing the net returns to farmer producers and at the same time reducing the cost of food to the consumers.

11. Recognition of the growing need of large supplies of cheap fertilizer if American farms are to produce at low costs and acceptance of the idea that aid in securing such supply is to be a part of our national farm policy.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield two minutes to the gentleman from Idaho [Mr. FRENCH], the balance of my time.

Mr. BUCHANAN. I yield the one minute remaining of my time.

The CHAIRMAN. The gentleman is recognized for three minutes.

Mr. FRENCH. Mr. Chairman, it was not my thought to have anything further to say upon this subject until this moment, but since the gentleman from Kentucky has referred to the question I shall make a few further observations. Doctor White is the head of one of the greatest institutions in the world of its kind. He is a man who was appointed by the late President Roosevelt and has served during the administrations of every President since that time, including that of President Wilson, of the gentleman's own party. Criticism has been made against him which is often made against officers holding such position as that of Doctor White. So far as the members of our committee are concerned, we are not charged with the selection of the manager or superintendent of that institution. The position is an appointive one, under the administration, and if there is anything seriously wrong with an officer such as Doctor White there are ways in which he can be reached in the orderly processes of the law.

Within this Chamber careless statements are constantly made; sometimes statements that would not be made by Members of Congress on the outside or off the floor. Members here, I think, ought to have that privilege. On the other hand, it ought to be a challenge to Members of this House rather to regard the fact that they are immune on account of statements made here as a challenge to them to be very definite and accurate in statements that reflect on persons who do not have the opportunity of replying in this forum, who have no recourse against a person who makes a statement on this floor, and must simply abide the consequences of the statements that are made, no matter how derogatory they may be, no matter how far away from accuracy they may be, no matter how much they may reflect upon efficiency in public service or even character itself. On the other hand, it is the duty of the Members here to be critical. It is one of the saving features of our Government that there

is a body where wrongs can be pointed out, and even if wrongs are not wholly known but believed, at any rate the situation can be a subject matter of debate and discussion. Good comes from it. But on the other hand, as was well said upon yesterday by that most distinguished Member of this House, who was sworn in to-day as a United States Senator [Mr. BURTON], Members of this House ought to measure their words when their words involve criticism of those who can not answer back. [Applause.]

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

OFFICE OF THE SECRETARY

SALARIES

For Secretary of Agriculture, $15,000; Assistant Secretary and other personal services in the District of Columbia, including $7,294 for extra labor and emergency employments, and for personal services in the field, $712,450, in all, $727,450, of which amount not to exceed $699,450 may be expended for personal services in the District of Columbia: *Provided*, That in expending appropriations or portions of appropriations, contained in this act, for the payment for personal services in the District of Columbia in accordance with the classification act of 1923 as amended (U. S. C., pp. 65–71, secs. 661–673, 45 Stat., pp. 776–785), the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, as amended, and in grades in which only one position is allocated the salary of such position shall not exceed the average of the compensation rates for the grade except that in unusually meritorious cases of one position in a grade advances may be made to rates higher than the average of the compensation rates of the grade, but not more often than once in any fiscal year, and then only to the next higher rate: *Provided*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed, as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade, in the same or different bureau, office, or other appropriation unit, or (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by the classification act of 1923 as amended, and is specifically authorized by other law: *Provided further*, That the Secretary of Agriculture is authorized to contract for stenographic reporting services, and the appropriations made in this act shall be available for such purposes: *Provided further*, That the Secretary of Agriculture is authorized to expend from appropriations available for the purchase of lands not to exceed $1 for each option to purchase any particular tract or tracts of land: *Provided further*, That no part of the funds appropriated by this act shall be used for the payment of any officer or employee of the Department of Agriculture who, as such officer or employee, or on behalf of the department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast with respect to future prices of cotton or the trend of same.

Mr. JONES. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. JONES. Mr. Chairman, apropos to the last proviso on page 3, I want to call the attention of the chairman to Public Law 740, in connection with what we were talking about a few moments ago. Section 5 of that act, which was approved on March 3, 1927, referring to estimates of cotton production, says:

> Only five shall be issued: One August 1, another one September 1, another October 1, another November 1, and one on December 1.

The effect of that was to abolish all semimonthly reports. I think, therefore, this provision ought not to be allowed to stay in the bill. The department might infer, and with plausible grounds, that it was indirectly authorized to make the other semimonthly reports not specified in the bill. For that reason I think the proviso should be stricken out entirely, and I am sure the chairman will agree with me.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The gentleman from New York moves to strike out the paragraph. The gentleman is recognized for five minutes.

Mr. LAGUARDIA. I ask unanimous consent to speak out of order for five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LAGUARDIA. Mr. Chairman, I regret to be compelled to ask to speak out of order, but it is the only opportunity I will have to reply in part to the suggestion made by the gentleman from Kansas [Mr. HOCH] on his proposed constitutional amendment.

I am sure the distinguished gentleman, whom we all recognize as a great authority on interstate and foreign commerce and on certain features of the railroad law, does not claim any original authorship of this proposed plan, the plan that is known all over the country as the "Evans plan."

Now, it would appear, in reading the remarks of the gentleman from Kansas, that all aliens had a vote in the selection of Representatives. Of course, everyone knows that aliens are not permitted to vote and that the count of aliens in the enumeration is simply for the purpose of fixing the apportionment of representation to the several States.

Mr. HOCH. Mr. Chairman, will the gentleman yield there?

Mr. LAGUARDIA. Yes.

Mr. HOCH. Of course, the gentleman misunderstood me. He certainly misquotes me. I said nothing whatever about aliens being permitted to vote.

Mr. LAGUARDIA. No; I did not misunderstand the gentleman. I am simply making it clear for a certain type of people who may misunderstand the gentleman. Especially that type of citizens who is unlettered and gullible and apt to be a follower of the Evans school of thought. Hence the necessity of making the record clear.

Mr. HOCH. The gentleman undertakes to inject something here that is entirely irrelevant. The alien is entitled to the protection of American laws, but is he entitled to be counted in the selection of those who make the laws?

Mr. SCHAFER. Is the gentleman referring to Evans, the imperial supreme wizard of the Ku-Klux Klan?

Mr. LAGUARDIA. Yes. The Constitution of the United States—and I am sure the gentleman is familiar with what took place at the convention at the time this particular provision was adopted—intended that we should have direct representation, that there should be a representative form of government, and that all persons should be counted in the enumeration and in fixing the proportionate representation of the various States in the lower House of Congress. If the gentleman will take the statistics of that day and study them, he will find that the proportion of aliens then in the United States was not any greater than it is to-day. The National Government has jurisdiction in certain specified cases only, such as national defense, interstate and foreign commerce, foreign relations, and taxation, which affect directly every man and woman in the country.

Take them one at a time. In the question of national defense aliens are counted, and in the selective service act passed by Congress aliens were not exempt from being drafted into the military service.

Mr. SCHAFER. And they fought and died, too, did they not?

Mr. LAGUARDIA. Yes. In matters of interstate and foreign commerce they are as vitally affected as are all the residents of the gentleman's district. In matters of taxation they are as directly concerned as any citizen in the country. Representation while fixed by population is also established on the principle of locality. The entire make-up of the congressional district is just as important as its geographical location and the number of people who may vote therein. All of that was thoroughly considered by the framers of the Constitution.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. LAGUARDIA. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. LAGUARDIA. But aside from all that, gentlemen, there is no need for any such amendment at this time, and for this reason: In 10 years from now and by the time of the next census the condition complained of by the gentleman from Kansas—this large number of aliens—will no longer exist. Following the restrictive immigration policy adopted by Congress the number admitted each year is very small and its percentage to the citizen population so indifferent and is so distributed as to be ineffective in controlling the number of Representatives in the various States. So that in a very few years the conditions will be changed entirely.

These aliens are rapidly becoming citizens; their children are native born and are growing into splendid American citizens. The suggestion thrown out by the gentleman from Kansas that if these aliens do not think enough of the United States to become citizens they should not be counted—permit me to say that 99 per cent of these aliens do think enough of this country and do want to become citizens. It is at times

difficult for an applicant to qualify. Take a man past middle age, who has worked from morning until night digging ditches, or any hard-working man toiling at manual labor, who has not the time or opportunity to get much schooling, and then have him go before a narrow-minded, bigoted, and prejudiced examiner, who will ask him such questions—and if the gentleman from Kansas can on the spur of the moment answer all of these questions that have been asked of aliens in New York City, I will vote for his amendment—such questions as: "Who was the Governor of New York during Lincoln's second administration?" "Who was the Secretary of State during Harrison's administration?" "Where is Grant's Monument?" Such questions as that. "What is a trust company?" This actually happened. An alien was given a newspaper to test his ability to read English. The item given him by this fool judge was an advertisement of the New York Trust Co.

The applicant read it, and was then asked, "What is a trust company?" Now, the gentleman is a pretty good lawyer, but I do not think he could give me a proper legal definition on the spur of the moment.

It is only fair to take all conditions into consideration. Perhaps the exclusion of aliens is only the first step in getting away from popular and constitutional government of free men. There is a tendency on in this country by a certain minority against our representative form of government. Perhaps this is only the entering wedge—first to exclude aliens from the count. And then the next step will be to exclude those who do not own property; and then the next step will be to exclude all those who do not own real property, until government will be controlled entirely by a small privileged class, as it was in England at the time of the American Revolution. Why, this question came up in the Constitutional Convention. The same line of thought that the gentleman is presenting appeared in the Constitutional Convention, but it was overwhelmingly defeated.

Mr. HOCH. Will the gentleman yield?

Mr. LAGUARDIA. Certainly.

Mr. HOCH. Does the gentleman favor a change in the provision of the State constitution of New York, which excludes aliens in apportioning the members of the Legislature of the State of New York?

Mr. LAGUARDIA. The gentleman speaks about one provision in the constitution of the State of New York that I do not approve. I am not in favor of that provision, but the gentleman does not know that it was the same kind of bigotry and the same kind of ideas that brought about that provision of the constitution of my State that is now back of the Evans plan. It was the up-State people trying to cut down the representation from New York City that brought about that provision in the constitution, and we are ashamed of it.

Mr. HOCH. The gentleman is ashamed of the provision which excludes aliens from the count in the State of New York for providing the apportionment of members of the State assembly?

Mr. LAGUARDIA. Yes, I am; and the conditions which brought it about.

Mr. HOCH. Does the gentleman think it is fair to permit the State of New York to refuse to count aliens in determining the members of its own State legislature, but insist upon counting them for the purpose of telling how many Members of Congress that State should have?

Mr. LAGUARDIA. Why, two wrongs are not going to make one right. Of course, there is nothing selfish in the gentleman's purpose at all. It is only incidental that my State would lose four Representatives and his would retain the present representation.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. GREEN. Mr. Chairman, I rise in opposition to the pro forma amendment. I wanted to ask my colleague from New York a question, but as he has taken his seat I will not ask it. The question I had in mind was this: The main trouble in naturalizing aliens, I believe, is in the fact that so many of them have unlawfully entered this country and then when they go before an examiner they can not qualify; therefore, they refrain from going before an examiner as often as they can and then when they do go before an examiner they find themselves unable to qualify. I do not believe our examiners are narrow-minded and warped individuals, as they have been styled. I think the examiners who represent the Department of Immigration, as a usual thing, are men of integrity and men of high type who are there to protect our institutions and our country from an influx of a horde of aliens, who, if entered, would lower the economic structure of our country and thus cause our wage earners to earn less money. These foreigners would then thrust themselves upon our society for us to maintain and take care of. I commend our immigration officials for holding the bars up high and strictly enforcing our laws, and I would like to see the laws more rigidly enforced.

Mr. SCHAFER. Will the gentleman yield?

Mr. GREEN. Yes.

Mr. SCHAFER. Did not the gentleman's forefathers immigrate to this country, and were they not aliens?

Mr. GREEN. I am glad to acknowledge that all of our forefathers immigrated to this country. Mine did, some from Spain and England, I believe. But they came in the early stages and for noble purpose; they made our Nation and our Nation's Government, and we as their descendants are here to-day protecting it and endeavoring to prevent an influx of foreign hordes which are of a different type and who have not progressed and advanced industrially, economically, morally, and otherwise, in a large measure, as we have and as have the gentleman and his ancestors.

Mr. SCHAFER. Will the gentleman yield for a further observation?

Mr. GREEN. Yes, sir.

Mr. SCHAFER. I will say to the gentleman that many of these aliens coming through our immigration ports at the present time will be better American citizens than many members of the Ku-Klux Klan and imperial wizards who are supporting the apportionment plan which will not permit the counting of aliens.

Mr. GREEN. Of course, many immigrants make splendid citizens, but they are the ones that come in according to law. They are the ones who abide by the laws of our country when they come here and accept and defend our laws and institutions as their own. They lawfully and in due course of time become naturalized, but they are not the ones who are bootlegged across the American border or through the great ports of our country. I do not acknowledge, however, that all of them make good citizens, and the gentleman from Wisconsin well knows that many of them have as their aim in life to breed contempt for American laws and institutions.

Mr. SCHAFER. If the gentleman will permit the observation, the discussion to-day has not been about those who have come here in violation of law, but those who have come here legally.

Mr. GREEN. I think those who have come here legally and are fit for citizenship are always accorded citizenship, but I for one do not believe in letting down the bars or in permitting them to come in here and destroy our wage-earning status, get all they can out of society and then thrust themselves back upon society to be maintained, and in so many instances breed within and without their own perverted herds and hordes, disobedience to law and constituted authority. The population in our institutions, which detain criminals and those provided for the indigent and for the insane, is largely foreign and the population in them of the foreign-born I believe is increasing. Do you mean to tell me that as lawmakers we should come here and give vent to statements which accuse our immigration officials of being warped, one-sided, narrow-minded officials when they ask pertinent questions of the future citizens of America relative to the history of our Nation? We must maintain the majesty of the law and uphold the integrity of our Nation's constituted officials if American institutions are to survive.

Mr. SCHAFER. Will the gentleman yield?

Mr. GREEN. Always, to my friend from Wisconsin.

Mr. SCHAFER. If the gentleman will look into the records, he will see that many thousands of foreign-born citizens and aliens lost their lives, health, and minds in the service of our country in time of war.

Mr. GREEN. Oh, I admit that a number of those men went to war. Some of our splendid soldiers were men of foreign birth. We do not deny any of that, I would say to my friend from Wisconsin, and we do not reflect upon them. "Render unto Cæsar the things which are Cæsar's." I would not detract one bit from valor of soldiers and sailors of foreign birth who have done their part in time of the Nation's need; but, my friends, they were men of moral and spiritual integrity, men who would have done service and honor to any country or individual in need. We can not, however, overlook the fact that undesirable aliens are flocking to our country and here entering faster than they can be assimiliated and Americanized. There are to-day in the United States probably 16,000,000 persons of foreign birth, possibly 7,000,000 of whom are not American citizens. Instead of becoming Americanized they are in some instances foreignizing our American institutions, and this should cease; our immigration doors should be slammed in the faces of these predatory hordes and thus save our beautiful America for Americans; this must be done if we are to maintain

our leadership and prowess in the affairs of nations. [Applause.]

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. HOCH. Mr. Chairman, I move to strike out the last two words, and ask unanimous consent to speak out of order for five minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. HOCH. Mr. Chairman, the gentleman from New York [Mr. LAGUARDIA] and the gentleman from Wisconsin [Mr. SCHAFER] have sought to create the impression that what I have advocated is a part of some propaganda that Mr. Evans or somebody else has started. So far as I am concerned, I have not received any propaganda from anybody, and I do not know anything about any propaganda, and I am discussing this question solely upon its merits.

I made no attack upon the aliens. If I may say a personal word, my own grandfather came from across the water. I know that from these people of foreign birth have come many of our great citizens in America. They have contributed much that is fine in American civilization. I am not seeking to take any rights away from the alien. I am not seeking to take any protection of the law away from him. I am not here seeking to change his status in any way whatever, although I am in hearty sympathy with every movement which leads to the naturalization of proper people of foreign birth who are legally in this country. The only question I raise is this: Whether it is fair that a man who is foreign born and does not become naturalized should be counted to determine the number of Representatives in Congress to which that State is entitled? [Applause.]

I am still waiting for my gentle friend from Wisconsin, who seems so concerned about the aliens of his State particularly, to give me some reason why, on the merits of it, we should take from one State a Member of Congress and give four Members to the State of New York because they have 1,600,000 unnaturalized aliens in that State.

Mr. SCHAFER. I will give the gentleman a few reasons.

Mr. HOCH. All right; I will be glad to hear the gentleman.

Mr. SCHAFER. One is we would have taxation without representation; another is that we would not count these aliens, so far as reapportionment legislation is concerned, but are willing to draft them and let them fight and die in time of war; and another reason is——

Mr. HOCH. Wait a minute. Let me answer the gentleman.

Mr. SCHAFER. And another reason is that in many of these cases the aliens are not to blame because they are not citizens at the time the census is taken for apportionment purposes, because they have to be here five years before they can become naturalized.

Mr. HOCH. No; some of them can not help it; but we can help it if we do our duty in determining representation regardless of the number of aliens in a State.

The gentleman speaks about taxation without representation. Is the gentleman in favor of permitting a foreign-born citizen who does not become naturalized to vote in this country?

Mr. SCHAFER. I am not.

Mr. HOCH. Then the gentleman is in favor of taxation without representation, if his argument is correct.

Mr. SCHAFER. Oh, no; he has representation if you count him in determining the number of Representatives.

Mr. HOCH. Yes; but it is representation of somebody else's choosing. Representation means representation of one's own choosing, and not representation of somebody else's choosing. If a man comes here to live, he is entitled to all the protection our laws give him. As an alien, he is entitled to all of that, and I am not proposing to take any of it away from him. But the gentleman can not befog this issue by his talk about the Anti-Saloon League or any other organization which the gentleman seems to have so much on his mind to the exclusion of the merits of this proposition.

Mr. SCHAFER. The Anti-Saloon League and the Ku-Klux Klan have both been advocating this proposition.

Mr. HOCH. I will say to the gentleman that even if the Association for the Repeal of the Eighteenth Amendment would be for it, I would still be for it in spite of that fact.

Mr. WYANT. Will the gentleman yield?

Mr. HOCH. Yes; I yield to the gentleman.

Mr. WYANT. I am very much interested in the gentleman's discussion, and if the gentleman has investigated the matter I would like to know how the operation of his theory would affect the representation of the different States in the Congress.

Mr. HOCH. I am sorry the gentleman was not here when I spoke earlier in the day. I put in the RECORD a table furnished by the Census Bureau which shows what the representation of each State would be if we reapportioned to-day under the 1920 census by excluding the aliens. Of course, what the showing would be under the 1930 census is speculative and I have sought to confine myself solely to the known facts.

Mr. KETCHAM and Mr. BURTNESS rose.

Mr. HOCH. I yield first to the gentleman from Michigan.

Mr. KETCHAM. Has the gentleman given any thought to the question of how this would affect the interests of the alien in becoming a citizen of the United States at the earliest possible moment?

Mr. HOCH. It would encourage the State where the aliens live, if they are proper candidates for citizenship, to lead them to become American citizens, and I think even my friend from Wisconsin would be in sympathy with such a movement.

Mr. BURTNESS. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended one minute; I want to ask him a question.

The CHAIRMAN. The gentleman from North Dakota asks unanimous consent that the time of the gentleman from Kansas be extended one minute. Is there objection?

There was no objection.

Mr. BURTNESS. I am sorry I did not hear the gentleman's opening statement. Does his resolution relate to the vote in the electoral college?

Mr. HOCH. I do not touch that section directly, but only the section which provides for apportionment of representation in the House. Of course, the gentleman understands that the electoral college is determined by the number of Representatives in the House and the Senate. That adds strength to my argument that the aliens should not be included.

The CHAIRMAN. The time of the gentleman from Kansas has again expired.

Mr. DICKINSON of Iowa. Mr. Chairman, we have had quite a field day, and I hope we may now proceed with the consideration of the bill.

The Clerk read as follows:

For salaries and compensation of necessary employees in the mechanical shops and power plant of the Department of Agriculture, $101,000.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word. I want to ask the chairman of the subcommittee what has been done, if anything, since the last discussion of the appropriation bill concerning the forecasting of future prices of cotton. If I remember correctly, that was quite a live subject last year. Owing to what happened through a mistake, intentional or otherwise, in the forecast of the price of cotton, I understand the entire cotton situation was disturbed. A discussion came up when the appropriation bill was before the House and it was then stated—I am speaking from memory—that there was no need of writing any proviso into the appropriation bill because the matter would be attended to by proper legislation. I would like to know whether any progress has been made along those lines, and what is being done among the cotton producers?

Mr. DICKINSON of Iowa. Legislation was passed. The law has been referred to by the gentleman from Texas [Mr. JONES]. There has been no forecast since then so far as I know. I think if there had been you would have heard of it from the other side of the House. The silence on that side answers the gentleman's question.

Mr. CRISP. Mr. Chairman, I have tried to keep posted so far as the cotton crop is concerned. There has been no statement given out by the Department of Agriculture this year that would in any way contravene the position taken on the floor of the House.

This year the cotton crop as a whole in the country is short, and prices have ranged from 18 to 19 cents. The incident referred to by the gentleman occurred last year when cotton was selling at 23 cents, and in one day the price dropped $8 a bale. The price afterwards went back to 16 or 17 cents, but it never did get back above 18 cents.

Mr. LAGUARDIA. But the present favorable condition is due to natural causes?

Mr. CRISP. It is under the natural law of supply and demand.

Mr. JONES. Mr. Chairman, I want to state, in all fairness, that three years ago, notwithstanding the natural laws, the effect of the forecast was disastrous to the Southern cotton growers, for it cost them many millions of dollars. They did not regain the price. The department has complied in every respect with the provisions of law.

Mr. LAGUARDIA. And aided by a short crop.

Mr. JONES. I am talking about the upset of the market. As the gentleman from Georgia [Mr. CRISP] has told you, in one day when there was no increase or decrease in the condition of the crop by a simple prediction of a lower price in the future, the prices broke $7 to $8 a bale and did not recover for a long period of time.

Mr. RANKIN. Mr. Chairman, what the gentleman has referred to has no application to the forecast of the number of bales of cotton that the farmers are supposed to be making. The present forecast of the Department of Agriculture has been, it seems to me, very disastrous to the cotton growers. I did not want to leave the impression that we are satisfied with the present status of that situation.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Total, office of information, $1,242,000, of which amount not to exceed $375,000 may be expended for personal services in the District of Columbia.

Mr. HILL of Alabama. Mr. Chairman, I move to strike out the last word for the purpose of asking some questions. As I understand it, there are about 200 soil surveys that have been prepared by the Department of Agriculture which the department is now having to hold on account of the fact that it has no money with which to have them printed. Has the committee made any provision to take care of that situation?

Mr. DICKINSON of Iowa. We made some investigation in regard to that printing. There are a number of soil surveys, research items, and a number of bulletins that the department has not had sufficient funds to print under the printing allowance. They made their request for an increase to the Budget Bureau, and after hearings the Budget Bureau allowed them an increase of $50,000. After going over the situation, the committee was impressed that they needed more money than that, and we have given them an additional $50,000 for the year 1930, so that for that year they will have $100,000 more money than they have had for 1929 to make an effort to catch up on that printing. After that is used the committee hopes to make a sufficient survey of the situation to be able to reach some conclusion as to what ought to be done with reference to a regular printing item. The department has done a good deal of research work. This research work always results in findings. There is no use in having research and having findings unless we can print the findings, and we are making an effort here to start along and rectify that situation.

Mr. HILL of Alabama. How much will it take to rectify the situation?

Mr. DICKINSON of Iowa. I think the original estimate was $150,000 and possibly $200,000 more than we have allowed them.

Mr. HILL of Alabama. And the committee has allowed them $100,000 additional?

Mr. DICKINSON of Iowa. Yes. We have allowed them $100,000 over and above that of last year.

Mr. KETCHAM. Mr. Chairman, will the gentleman from Iowa yield?

Mr. DICKINSON of Iowa. Yes.

Mr. KETCHAM. Will the gentleman state whether or not in the hearings there was any testimony developed as to the kind and number of those soil surveys and other matters not published?

Mr. DICKINSON of Iowa. There were three different matters that we discussed—soil survey, farm bulletins, and research findings.

Mr. KETCHAM. I am particularly interested in soil surveys.

Mr. DICKINSON of Iowa. Those are emphasized more than any other class of publication.

The Clerk read as follows:

For investigating the diseases of tuberculosis and paratuberculosis of animals, for their control and eradication, for the tuberculin testing of animals, and for researches concerning the causes of the diseases, their modes of spread, and methods of treatment and prevention, including demonstrations, the formation of organizations, and such other means as may be necessary, either independently or in cooperation with farmers, associations, or State, Territory, or county authorities, $6,061,000, together with $300,000 of the unexpended balance of the appropriation for this purpose for the fiscal year 1928, of which $1,190,000 shall be set aside for administrative and operating expenses and $5,171,000 for the payment of indemnities: *Provided, however,* That in carrying out the purpose of this appropriation, if in the opinion of the Secretary of Agriculture it shall be necessary to condemn and destroy tuberculous or paratuberculous animals, if such animals have been destroyed, condemned, or die after condemnation, he may, in his discretion, and in accordance with such rules and regulations as he may prescribe, expend in the city of Washington or elsewhere such sums as he shall determine to be necessary, within the limitations above provided, for the payment of indemnities, for the reimbursement of owners of such animals, in cooperation with such States, Territories, counties, or municipalities, as shall by law or by suitable action in keeping with its authority in the matter, and by rules and regulations adopted and enforced in pursuance thereof, provide inspection of tuberculous or paratuberculous animals and for compensation to owners of animals so condemned, but no part of the money hereby appropriated shall be used in compensating owners of such animals except in cooperation with and supplementary to payments to be made by State, Territory, county, or municipality where condemnation of such animals shall take place, nor shall any payment be made hereunder as compensation for or on account of any such animal if at the time of inspection or test, or at the time of condemnation thereof, it shall belong to or be upon the premises of any person, firm, or corporation to which it has been sold, shipped, or delivered for the purpose of being slaughtered: *Provided further,* That out of the money hereby appropriated no payment as compensation for any animal condemned for slaughter shall exceed one-third of the difference between the appraised value of such animal and the value of the salvage thereof; that no payment hereunder shall exceed the amount paid or to be paid by the State, Territory, county, and municipality where the animal shall be condemned; that in no case shall any payment hereunder be more than $35 for any grade animal or more than $70 for any purebred animal, and that no payment shall be made unless the owner has complied with all lawful quarantine regulations.

Mr. DICKINSON of Iowa. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. DICKINSON of Iowa: Page 20, line 13, after the word "indemnities," insert "of which $250,000 shall be immediately available: *Provided, however,* That payments from the appropriation of May 16, 1928, for this purpose for animals condemned after date of the approval of this act shall be upon the same basis as hereinafter provided."

Mr. McLAUGHLIN. Mr. Chairman, I reserve the point of order against the amendment.

Mr. DICKINSON of Iowa. Mr. Chairman, the purpose of this amendment is to make the higher compensation rates available at an earlier date. There will be a time when we must reach a period when we are going to start the new compensation and pay the higher rate of condemnation. The program for eradication of this disease starts usually in the spring. It seems a little unfair to have most of those who are in on the spring test compelled to accept compensation for their condemned cattle at a lower rate, so, after taking up the matter with the department, I offer this amendment upon the theory that the compensation for the year will be upon the same rate throughout the entire year, and will be equitable to all of those concerned in the test. I think it should be done.

Mr. McLAUGHLIN. Mr. Chairman, I move to strike out the last word, and reserve the point of order on the paragraph on page 21.

The CHAIRMAN. Is the point of order on the amendment offered by the gentleman from Iowa or to some part of the bill as read?

Mr. DICKINSON of Iowa. Mr. Chairman, the gentleman is too late with his point of order upon the entire paragraph, because that has been read. The point of order was made on the amendment.

Mr. McLAUGHLIN. I made the point of order on the amendment, and that is what the gentleman discussed. My point of order still stands.

The CHAIRMAN. The gentleman is correct. He made the point of order on the amendment.

Mr. McLAUGHLIN. My point of order on that still stands. There has been no discussion of the paragraph on page 21. I made the point of order properly at the proper time upon that also, although I am not going to insist upon it. I have made it more for the purpose of getting the floor to make some inquiries as to how this work is progressing. The work was begun pursuant to legislation enacted when I was a member of the Committee on Agriculture—a very important work. It has, I believe, been well done and with highly satisfactory results.

I notice the bill proposes to amend the amount of indemnity to be paid for animals destroyed. The amounts carried in the law which passed several years ago were $25 for a grade and $40 for a purebred animal. I always thought that those amounts were much too low, but they were all we could obtain approval of at the time the law was enacted.

I should favor even larger increases of amounts now provided by law than the committee has here recommended. As I understand, the department itself, the chief of the bureau and the others whose duty it is to carry on this work have recom-

mended larger increases than the committee has been willing to put into the bill. Why did the committee refuse the recommendation of the bureau as to these amounts?

Mr. DICKINSON of Iowa. We have been carrying along this work for many years on a 25-50 basis. Cattle have been getting dearer, but in equity to those who have gone through the test heretofore we thought if we gave 40 per cent increase we were giving an increase which was equitable, and for that reason we gave an increase from $25 to $35 and from $50 to $70. It is my recollection the department recommended an increase of from $25 to $40 and from $40 to $80, 50 per cent.

We did not want to get this amount to a point where people would be eager to sell cattle to the department for the amount they got for condemnation.

Mr. McLAUGHLIN. As a matter of fact, one serious difficulty in the administration of this law has been that the amount available for payment for the destruction of a purebred animal is too small. The bureau recommend $80, and the committee recommends $70. Certainly $80 is not an excessive amount. As I have said, the greatest difficulty, or one of the serious difficulties in enforcing this law, is the small amount paid for the destruction of purebred animals, some of which are of great value, running into thousands of dollars, the actual market value of the animals. It seems to me the amount to be paid should be still higher. I make that suggestion; I do not know that I shall offer an amendment.

Mr. DICKINSON of Iowa. We went over that very carefully and I think we have done the equitable thing.

Mr. McLAUGHLIN. Another question I wish to ask in regard to this work is whether or not there is any occasion for the feeling or opinion that while the test applied is effective generally in determining whether or not an animal is affected with tuberculosis, in many cases the worse the animal is, the more general, deep-seated the infection is, the less likely the test is to be successful. It often happens, I am told, that where an animal, determined by the test to be free of tuberculosis, is slaughtered soon after the test has been applied it is actually found to be seriously affected. That is, whereas there is little, if any, difficulty in discovering the presence of the disease where the animal is slightly affected, the test is, in fact, not a test, because it fails to disclose the presence of the disease if the animal is seriously affected. What are the facts? Is there reason or foundation for that opinion?

Mr. WASON. There is. I can answer that because I have had experience in my own herd. And the reason why the test is not effective in an animal which is very seriously diseased is that the resistance of the disease in the animal overcomes the fluid they use to make the test.

Mr. McLAUGHLIN. In other words, the worse off the animal is the more resistance it has?

Mr. WASON. Absolutely; against this fluid. I have had this happen in my own herd.

Mr. McLAUGHLIN. Is the bureau making any progress in finding a test that will not be, we may say, defective or ineffective in that respect?

Mr. WASON. They are working over it, but I do not think they have got it perfected along that line.

Mr. McLAUGHLIN. They admit there is that trouble?

Mr. WASON. Oh, of course, but there are only two animals in many years in my own herd who turned out that way.

Mr. McLAUGHLIN. How general is that condition?

Mr. WASON. Very slight as compared with the number of animals tested.

Mr. McLAUGHLIN. I am pleased to know that the work is going along so nicely. When it was first suggested we were told it would be impossible to eradicate tuberculosis, to check its spread, or even materially to reduce it. Officials of the bureau insisted it could be done, and from the first appropriation under the law the bureau has done splendid work and has made splendid progress.

Mr. WASON. They are doing so in my part of the country.

Mr. McLAUGHLIN. I withdraw the reservation of the point of order.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

The question was taken, and the amendment was agreed to.

Mr. DICKINSON of Iowa. Mr. Chairman, I think there is a second amendment there, to carry out the same purpose.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. DICKINSON of Iowa: Page 20, line 13, strike out the word "however" and insert the word "further."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Total, Bureau of Dairy Industry, $649,800, of which amount not to exceed $302,000 may be expended for personal services in the District of Columbia.

Mr. DICKINSON of Iowa. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. TILSON as Speaker pro tempore having assumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 15386) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes, had come to no resolution thereon.

TEACHING THE CONSTITUTION

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent to extend my remarks on the subject of teaching the Constitution of the United States and to insert in connection therewith 10 specimen questions and answers that have resulted from this method that I have discussed.

The SPEAKER pro tempore. The gentleman from South Carolina asks unanimous consent to extend his remarks in the RECORD in the manner indicated by him. Is there objection?

There was no objection.

Mr. McSWAIN. Mr. Speaker, the American people have a deep-seated veneration for our Federal Constitution. We have wisely been taught that it is the sheet anchor of our civilization. But, unfortunately, it is a blind sort of worship among nearly all of our people. We have assumed that nobody could understand the Constitution except a few great lawyers and the Supreme Court. Especially was this view enhanced by the fact that so often the Supreme Court itself was divided by five to four opinions upon the proper interpretation of the Constitution. It occurred to our people that if the learned judges, having given the larger part of a lifetime to the study of the Constitution, could not agree among themselves as to its proper meaning, then it would be futile for a mere layman to commence its study.

But, on the contrary, we have courses in our schools, high schools, and colleges including the study of the Constitution itself. Having tried to teach the Constitution and having failed to satisfy myself with any success, I set about, many years ago, to devise a manner of approach to the study of the Constitution, and a method of instruction, that would make it both interesting and understandable. Accordingly, I was greatly pleased with the opportunity to try out my experiment with one of the law classes at Furman University, at Greenville, S. C., during the months of September, October, and November, 1928. I did not begin the course by a direct study of the text of the Constitution because that is dry and fruitless without the proper foundation of comparative history. I sought to catch the spirit of our Constitution and especially of our constitutional system by a brief review of the systems of Government then prevailing in the leading civilized nations of the world; and especially in England herself. This entailed a hasty review of the rise and development of the British constitutional system as it existed in 1776. Add to that the fact that feudal absolutism still prevailed in France, Germany, and Spain, and that what we now know as civil liberty and self-government were found only in the Swiss Cantons and in a nascent form in England herself, and we have the picture set for a proper appreciation of the shock that the Declaration of Independence must have given to the nerves of the smug and self-complacent aristocrats of that day. With this framework, all of us can understand, easily, the innovations contemplated by the Declaration of Independence. We are now prepared to understand that the American Revolution was a conflict of ideas of democracy and autocracy just as the World War was. The ideals of popular government having prevailed and finally triumphed at Yorktown, with the later acknowledgment of independence of the 13 American States, it became necessary for the revolutionary fathers to make democracy safe in and for America. If democracy should then show her efficiency and her power to maintain and advance civilization, then she might, 140 years later, proclaim and extend her power to make the whole world safe for democracy.

Therefore John Fiske truly described the period commencing with the end of the Revolution and culminating with the formulation and adoption of the Federal Constitution as the "critical period of American history." Therefore it was necessary to study this period of about seven or eight years with great particularity. The lack of power in the Federal Government,

seeking to function under the Articles of the Confederation, to defend our frontiers, to maintain domestic tranquility, to provide for the common defense, to prevent conflicts between the several States, to raise money by taxation, and soldiers by draft, all explain the confusion and chaos that clear-headed patriots saw were about to obscure and, perhaps, destroy the bright hopes of those who believed in, and fought to make good, the Declaration of Independence. Especially did we study the reasons and motives calling for the great convention that finally met in Philadelphia in May, 1787. We followed, minutely, the deliberations of that convention. We saw the conflict of ideas between the extreme views voiced by Alexander Hamilton, on the one hand, and Luther Martin, on the other hand. We traced the collision of interests between the large States and the small States. We observed the first threatening murmurs of sectional strife that grew until they finally thundered in the struggle over secession and eventually died away at Appomattox. Especially did we note the groping for, the difficulty in arriving at, what is now universally conceded to be the triumphant marvel of our American constitutional system, to wit, a dual system of government, both operating directly upon the same population at the same time, each within a separate and distinct sphere, and each maintained in the exercise of its proper powers by that wonderful regulatory agency, the balance wheel of our whole system—the Supreme Court of the United States.

Thus, Mr. Speaker, we have the material at hand for the proper comprehension of our Federal Constitution. Thus are we enabled to grasp the spirit of our Constitution. Thus we clothe the mere skeleton of dry-as-dust language with flesh and nerves, and breathe into this body the breath of governmental life. We behold a new beauty in the Constitution. We realize as never before why the Nation has grown in territory, in population, in wealth and in power, having multiplied itself in these respects many times, and yet the Constitution fits each new phase of our development. There is nothing like it elsewhere in the world. It is rigid enough to maintain order and historic continuity. It is elastic enough to permit of orderly progress. Through the provisions for amendment it is capable of expansion or contraction, and justifies the hope that it shall continue to bless countless generations of the American people; and, through them, the other peoples of the world.

Below follows a specimen of the questions and answers of an examination held on November 27, 1928. This is the paper of Mr. Hugh Beasley:

1. Question. Contrast the political ideas promulgated by the Declaration of Independence with those prevailing generally throughout the world.

1. Answer. The political ideas advanced by the Declaration of Independence were far ahead of the political ideas of the rest of the world at that time, and in some cases were in direct opposition to them. The idea as expressed by the Declaration of Independence that in order for a people to be taxed, they must have a share in the Government doing the taxing was very novel. Previous to this time in English history, the power to raise money had passed from the King to the Parliament, but no territory or colony had questioned the right of Parliament to levy taxes, because it had no representation.

Another idea advanced was "that all men are created equal." This may be taken to mean socially and politically. Who had ever heard of the idea that one man, no matter how low his station in life, had equal rights before the courts or in casting his ballot, as any other man in the community, no matter how prominent?

The proposition was also put forth that the people have the right to abolish any government that interferes with certain inalienable rights. This was contrary to the idea that prevailed at that time throughout the rest of the civilized world. However, many nations had successfully overthrown the rule of a certain king or dynasty, but not for a principle as was done in this case.

2. Question. Explain fully the expression "constitutional morality" and give some arguments for and against a written constitution as contrasted with an unwritten constitution?

2. Answer. The essence of "constitutional morality" is a spirit of self-restraint which enables men to lay aside their passions, prejudices, momentary interests, and other things which at the time seem necessary, but which is against the fundamental higher law, which is supreme. Thus "constitutional morality" may mean, following strictly the fundamental law as expressed in the constitution, and letting it be a gage and fountain head, and also a restraint on all laws which might be offered after that time.

The advantages of a written constitution over an unwritten one may be compared to the advantages of a contract which has been reduced to writing over one which has been agreed upon orally. The unwritten one is more flexible and more likely to be changed to fit the idea of the people at the time. The written constitution is like a monument. A certain formality of proceedings has to be carried through before it can be changed. Before this proceeding may be carried through and the constitution changed, the people have had time to think it over, and thus there is less likelihood that a mistake will be made. An unwritten constitution will be changed whenever the people, or practically speaking the lawmakers, feel that it stands in the way of legislation needed at the moment. Thus it is something intangible. Unless the people are very conservative, it might be as well not to have any constitution, as to have it in unwritten form.

The written constitution stands out like a landmark. It is not necessary for anyone to be skilled in civics or law in order to get a general idea about it. On the other hand, the unwritten constitution is vague and indefinite. It is more subject to change. The English nation probably use the unwritten constitution with as much efficiency as they would were it reduced to writing. But, as I have mentioned, they are conservative, and what would suit them would not suit us. We are composed of a mixture of races, and by nature we are more progressive, straining at the leash more than the English. Our citizenship is composed of people to a large extent who are not more than one or two generations removed from their native country. Thus they have not had the opportunity to have grounded in them the traditions of the Government of this country as the average English citizen has had. Government in England is more of a profession than it is in this country. They go about preparing for public office like we go about preparing for a profession, and in a lot of cases more seriously and thoroughly.

3. Question. Explain the term "American Constitution" and contrast with the Federal Constitution.

3. Answer. By the term "American Constitution" we mean the fundamental ideas of government as expressed in the Federal and in the State Constitutions combined. Of course most of the State constitutions are modeled after the Federal, but they usually go more into detail. They do not conflict with the Federal Constitution in any way. The Federal Constitution is only a part of the American Constitution, but it is the model for all of them. It is the expression of a higher law. As mentioned somewhere in our course, it is the link which pledges the living to the dead and to the unborn.

4. Question. Explain fully the weak features of the Articles of Confederation, and why we were inadequate to insure life, liberty, and the pursuit of happiness.

4. Answer. The weak features of the Articles of Confederation may be mentioned under two heads:

1. The inability of the Federal Government to reach out and take men from its citizenship when needed. The central government could only ask the States to send so many men, but it couldn't reach out personally to each man and in effect say, "You are needed for the defense of your country; come!" If the States chose to they could send the men, but if they did not choose to there was no way to force them. For a government to exist it must have men and money.

2. The inability of the Federal Government to levy taxes upon its citizenship. As in the case of men all the central government could do was to ask the States for so much money. Thus the State, if it chose to, might levy a tax upon its citizenship and raise the revenue. The whole defect may be summed up in a few words. The citizen owed allegiance first to the State and then to the Federal or central Government. Under our present system the citizen owes allegiance to both the Federal and the State Government, and where there is a conflict the Federal Government prevails. Under the Articles of Confederation, the central government had power, but only as expressed through the State, and then only as as the State chose to obey. It was more like the League of Nations of to-day. Each State was an independent sovereign and might do anything unrestrained, only as the other States might step in individually and restrain her.

5. Question. Explain the conflicting views and interests of groups in the Convention of 1787 in Philadelphia, and how they were finally compromised.

5. Answer. The two main groups in the convention were the Federalists and the State Rights Party. The first plan submitted was the Virginia plan, closely followed by the Pinckney plan, which was the model for the future Federal Government. However, the Virginia plan was considered first. One of its features which brought on a battle royal proposed that "the rights of suffrage in the National Legislature ought to be apportioned to the number of free inhabitants." This was opposed by the smaller States, notably Delaware and Rhode Island, on the ground that the smaller States would be swallowed up. This was compromised in the latter part of the convention by providing that the number of Members in the Lower House should be determined by population of their respective States, but that each State, no matter how large nor how small, should have two representatives in the Upper House, or the Senate. The business men of the convention wanted a strong central government, because it could protect business interests at home and abroad. Other men of the same type which promulgated the Declaration of Independence wanted an ideal government which would let each State have absolute power and the central government subordinate to the States. Fortunately, men of this type were few in the convention.

6. Question. Point out the novel and original feature of the Constitution of the United States.

6. Answer. The novel features of the Constitution may be expressed in a few subheads:

1. The proposition that the right of the Government depends upon the will of those who are governed, and those who are governed have the right to change the form of government which is over them.

2. The proposition that every man has the same rights before the law. Thus the social or financial position of a man, theoretically speaking, is not of help to a man when he comes into a court.

3. The proposition that law shall be general and shall not favor a particular class.

4. The proposition that, in case of a suit, reasonable notice shall be given and a reasonable time given to defend in a fair court of law. This is known as the "due process clause."

5. The dual system of government, whereby each man owes direct allegiance to both the State and the Federal Governments.

6. The system of "checks and balances," whereby one department of the Government is set off against another. Thus the judiciary restrains the legislative, and executive, and vice versa. Each is dependent upon the other for its power.

7. The agreement that the will of the majority shall prevail. Thus, when the majority elect a President, the minority concur in the election, and instead of the President being the President of the majority he is the President of all.

8. The right of every person to have individual freedom. That is, that he shall have the right to advance according to his ability, and not according to who he is.

Probably the most novel feature of the Constitution is the provision made for a duel form of government. There are in reality two governments governing the same people in the same territory harmoniously together. I owe one allegiance to the Federal Government and another allegiance to my State government. Both may put their hands into my pocket for taxes. Both may call me to their defense. In case of a conflict, it is agreed that the call of the Federal Government shall prevail. The Federal Government is concerned mostly with questions of national importance, while the State government deals only with local matters, relatively speaking.

7. Question. Show what part of the United States Constitution embodies the spirit of the Declaration of Independence, the "most American feature," and why.

7. Answer. Articles I, II, and V of the Constitution most embody the spirit of the Declaration of Independence. Article I provides that all legislative powers shall be vested in a Congress, which shall consist of the two respective Houses. It provides the manner of electing them and what their duties shall consist of. This section provides in effect that government shall be by the people. This carries out the thought embodied in the first part of the Declaration of Independence that the people must have a share in the government over them.

Article II provides for the office of President and how he shall be elected and removed if the people care to do so. This section in effect provides the manner in which all civil officers of the United States may be removed from office upon certain causes.

Article V expresses the idea which pervades the Declaration of Independence; that is, the power of the people to change the government which is over them. Thus provision is made for the alteration or for amending the Constitution of the United States. The Declaration of Independence expresses the idea that the people shall have the power at any time to change their government.

Of course, the first 10 articles of the Constitution are usually called the Bill of Rights, and they enlarge upon the thought expressed in the Declaration of Independence.

8. Question. Compare in detail the plan proposed by Alexander Hamilton and that adopted by the convention.

8. Answer. Alexander Hamilton's plan was to have a legislature composed of two branches, which is like the present system. The lower branch, called the assembly, was to consist of persons elected for three years as against two years at the present time. The Senate was to compare to the House of Lords of Engand and be elected for an indefinite term of office by electors chosen by the people for that purpose. The plan adopted by the convention proposed that the Senators should be elected for a term of six years, and then by the legislature of the State which are represented by them. The supreme executive authority of the Nation was to be vested in a governor chosen for life and to be elected by electors. The system adopted by the Constitutional Convention provided that the President should be elected by electors chosen for that purpose, for a term of four years. Washington established the precedent that no man should run for the office and be elected more than two terms. The judicial system was about the same as actually adopted which provided that it should be vested in judges who would serve for life. But the important difference in the Hamilton plan was that he provided for the appointment of the governor of each State by the General Government. Both the President and governor of each State was to have the negative on the laws passed by the respective legislatures of the Nation and the State. Under the system adopted by the convention the Executive had the veto power but the legislature could override the veto.

9. Question. Explain fully the powers, purposes, and services of the Supreme Court as the balance wheel.

9. Answer. The judges of the Supreme Court are elected for life, and they hold their office during good behavior. Thus they are not mixed up in politics, and they are free to decide questions as their sense and conscience may dictate. The Supreme Court has the power to declare any statute passed by Congress or by any State legislature as unconstitutional and of no effect. They do not nullify the statute but disregard it. Thus it has the power to check legislatures, and it checks the powers of the Executive by interpreting the laws as passed by the legislature. The Supreme Court may be called the measuring rod of the Nation. They take a law or act which has been passed and see if it comes up to the standard as set forth by the Constitution or decide whether it is against the standard.

10. Question. Explain fully the reasons for the tendencies toward enlarging Federal powers, and give examples and evidence of such enlarging tendencies.

10. Answer. Transportation and commerce has made large and important strides and advances within the past century. Communication has likewise progressed. Thus the people of the country are having the same interests in common, and they more nearly live the same kind of lives. The same kind of cars are driven in California and the same styles are worn there as are worn in the far Eastern or Southern States. The same kind of people live there. They think about the same things that we do. The people of South Carolina and those of California or Washington State are more nearly alike and have more things in common now than did the people of the upper and lower sections of South Carolina at the time of the adoption of the Constitution. Thus State lines are gradually being erased except as political boundaries. It is but natural that the Federal Government should enlarge and expand its authority. The people are living closer together and have the same interests in common. Due to the large volume of interstate travel, commerce, and communication, it is but natural that this trend should prevail. Very few things are done in one State at the present day that do not affect the people in another State.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President, for his approval, a joint resolution of the House of the following title:

H. J. Res. 346. Joint resolution authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month.

ADJOURNMENT

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 25 minutes p. m.) the House adjourned until Monday, December 17, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Monday, December 17, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

War Department appropriation bill.

COMMITTEE ON AGRICULTURE

(10 a. m.)

To amend the packers and stockyards act, 1921 (H. R. 13596).

COMMITTEE ON INDIAN AFFAIRS

(10.30 a. m.)

A meeting of the subcommittee to consider a bill for the relief of J. F. McMurray (H. R. 10741).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

687. A communication from the President of the United States, transmitting supplemental estimate of appropriations for the Treasury Department for the fiscal year 1929, pertaining to the Bureau of the Mint, $6,780 (H. Doc. No. 477); to the Committee on Appropriations and ordered to be printed.

688. A letter from the Secretary of War, transmitting letter from the Chief of Ordnance, United States Army, dated the 14th instant, covering statement of the cost of manufacture, for the fiscal year ended June 30, 1928, at the armory and arsenals therein named; to the Committee on Expenditures in the Executive Departments.

689. A communication from the President of the United States, transmitting deficiency estimates of appropriations for the Post Office Department for the fiscal years 1927 and prior years (H. Doc. No. 478); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. KIESS: Committee on Insular Affairs. H. J. Res. 352. A joint resolution for the relief of Porto Rico; without amendment (Rept. No. 1957). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. COLE of Maryland: A bill (H. R. 15425) authorizing Cornelius V. Roe, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Patapsco River at or near or south of Lazaretto Point, Baltimore, Md., and a point opposite thereto in Baltimore, Md.; to the Committee on Interstate and Foreign Commerce.

By Mr. McKEOWN: A bill (H. R. 15426) prohibiting the transportation of intoxicating liquors with firearms or explosives, and the sale of intoxicating liquors to minors, and for other purposes; to the Committee on the Judiciary.

By Mr. BULWINKLE: A bill (H. R. 15427) authorizing and directing the Secretary of War to lend to the Governor of North Carolina 300 pyramidal tents, complete; 9,000 blankets, olive drab, No. 4; 5,000 pillowcases; 5,000 canvas cots; 5,000 cotton pillows; 5,000 bed sacks; and 9,000 bed sheets, to be used at the encampment of the United Confederate Veterans to be held at Charlotte, N. C., in June, 1929; to the Committee on Military Affairs.

By Mr. GRIFFIN: A bill (H. R. 15428) allowing the withdrawal of the proceeds of the salvage of the U. S. S. *Piave*, improperly covered into "Miscellaneous receipts" in the United States Treasury instead of being paid to the underwriters of the cargo of said ship; to the Committee on Claims.

By Mrs. KAHN: A bill (H. R. 15429) to provide a suburban residence for the President of the United States; to the Committee on Public Buildings and Grounds.

By Mr. WHITE of Maine: A bill (H. R. 15430) continuing the powers and authority of the Federal Radio Commission under the radio act of 1927, and for other purposes; to the Committee on the Merchant Marine and Fisheries.

By Mr. DAVILA: Joint resolution (H. J. Res. 354) authorizing the appropriation of the sum of $871,655 as the contribution of the United States toward the Christopher Columbus Memorial Lighthouse at Santo Domingo; to the Committee on Foreign Affairs.

By Mr. COLE of Iowa: Joint resolution (H. J. Res. 355) authorizing the appropriation of the sum of $50,000 to enable the Secretary of State to cooperate with the several Governments members of the Pan American Union in the undertaking of financing and building an inter-American highway or highways; to the Committee on Foreign Affairs.

By Mr. LEHLBACH: Resolution (H. Res. 265) to amend House Resolution 232; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ZIHLMAN: A bill (H. R. 15431) to protect the title of motor vehicles within the District of Columbia; to provide for the issuance of certificates of title and evidence of registration thereof; to regulate purchase and sale or other transfer of ownership; to facilitate the recovery of motor vehicles stolen or otherwise unlawfully taken; to provide for the regulation and licensing of certain dealers in used and secondhand vehicles as herein defined; to prescribe the powers and duties of the director of traffic hereunder; and to provide penalties for violations of the provisions hereof; to the Committee on the District of Columbia.

By Mr. ARNOLD: A bill (H. R. 15432) granting an increase of pension to Rosa A. Bower; to the Committee on Invalid Pensions.

By Mr. BACHMANN: A bill (H. R. 15433) granting an increase of pension to Kate Thomas; to the Committee on Pensions.

By Mr. BULWINKLE: A bill (H. R. 15434) granting an increase of pension to Synthia Freeman; to the Committee on Invalid Pensions.

By Mr. EDWARDS: A bill (H. R. 15435) granting a pension to Julius P. Martin; to the Committee on Pensions.

By Mr. ELLIOTT: A bill (H. R. 15436) granting a pension to Almira M. Mitchell; to the Committee on Invalid Pensions.

By Mr. HULL of Tennessee: A bill (H. R. 15437) granting a pension to Roscoe Morrow; to the Committee on Pensions.

Also, a bill (H. R. 15438) granting a pension to Horace Stephens; to the Committee on Pensions.

By Mr. KEARNS: A bill (H. R. 15439) granting a pension to Mary Lawson; to the Committee on Invalid Pensions.

By Mr. LEAVITT: A bill (H. R. 15440) for the relief of Frank Yarlott; to the Committee on Indian Affairs.

By Mr. LEECH: A bill (H. R. 15441) for the relief of Isabelle Moody; to the Committee on Military Affairs.

Also, a bill (H. R. 15442) granting a pension to Evilene Williams; to the Committee on Invalid Pensions.

By Mr. LOZIER: A bill (H. R. 15443) granting an increase of pension to Isaac N. Cook; to the Committee on Invalid Pensions.

By Mr. McSWEENEY: A bill (H. R. 15444) granting a pension to John G. Hall; to the Committee on Invalid Pensions.

By Mr. MONTAGUE: A bill (H. R. 15445) granting a pension to Alfred Ernest Watts; to the Committee on Pensions.

Also, a bill (H. R. 15446) for the relief of Carl Halla; to the Committee on Claims.

By Mr. ROWBOTTOM: A bill (H. R. 15447) granting an increase of pension to Mary E. Gudgen; to the Committee on Invalid Pensions.

By Mr. SNELL: A bill (H. R. 15448) granting a pension to Frankie A. Willis; to the Committee on Invalid Pensions.

By Mr. STALKER: A bill (H. R. 15449) for the relief of Joel Townsend; to the Committee on Military Affairs.

By Mr. SWING: A bill (H. R. 15450) granting an increase of pension to Walter C. Burris; to the Committee on Pensions.

By Mr. UPDIKE: A bill (H. R. 15451) granting an increase of pension to John J. Lillis; to the Committee on Pensions.

By Mr. VESTAL: A bill (H. R. 15452) granting a pension to Mary E. Brock; to the Committee on Invalid Pensions.

By Mr. VINCENT of Michigan: A bill (H. R. 15453) granting an increase of pension to Sarah A. Baker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15454) granting an increase of pension to Nellie Thompson; to the Committee on Invalid Pensions.

By Mr. VINSON of Georgia: A bill (H. R. 15455) granting a pension to Louise Wing; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15456) granting an increase of pension to Clark Brown, to the Committee on Pensions.

By Mr. WELSH of Pennsylvania: A bill (H. R. 15457) granting a pension to Caroline W. Hayes; to the Committee on Pensions.

Also, a bill (H. R. 15458) granting a pension to James A. Quinn; to the Committee on Pensions.

Also, a bill (H. R. 15459) granting a pension to Mary E. Schmidt; to the Committee on Pensions.

Also, a bill (H. R. 15460) granting a pension to Eugene J. Hatterer; to the Committee on Pensions.

Also, a bill (H. R. 15461) granting a pension to Elizabeth B. Hertzler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15462) granting a pension to Louemma Scott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15463) granting an increase of pension to Emma B. Fleming; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

8006. By Mr. ADKINS: Petition of residents of the city of Decatur, Ill., asking for a protective tariff on brick being manufactured in Europe and shipped to our eastern seaboard; to the Committee on Ways and Means.

8007. By Mr. CRAIL: Petition of the Department of California, United Veterans of the Republic, favoring necessary legislation granting to recipients of the congressional medal of honor an honorarium of $50 per month; to the Committee on Military Affairs.

8008. By Mr. GARBER: Petition of the Immigration Study Commission, urging opposition to repeal of the national origins clause of the immigration quota act; to the Committee on Immigration and Naturalization.

8009. By Mr. JOHNSON of Texas: Petition of W. P. Allen, president of the American National Bank, of Terrell, Tex., urging continuance of national-bank circulation; to the Committee on Banking and Currency.

8010. By Mr. McCORMACK: Petition of Boston League of Women Voters, Mrs. Willard Dana Woodbury, president, 3

Joy Street, Boston, Mass., recommending passage of the Newton bill, which provides for the creation of a child welfare extension service in the Children's Bureau; to the Committee on Education.

8011. By Mr. YATES: Petition of Le Seure Bros., jobbers and retailers of cigars and tobaccos, Danville, Ohio, protesting Senate bill 2751; to the Committee on Ways and Means.

8012. Also, petition of H. M. Voorhis, of the law offices of Maguire & Voorhis, of Orlando, Fla., urging passage of the Sears bill (H. R. 10270); to the Committee on the Judiciary.

8013. Also, petition of W. T. Alden, of the law offices of Alden, Latham & Young, Chicago, Ill., urging passage of Senate bill 3623, amending section 204 of the transportation act of 1920; to the Committee on Interstate and Foreign Commerce.

8014. Also, petition of the legislative committee of the Railway Mail Association, Illinois Branch, Chicago, urging passage of the following bills: The retirement bill (S. 1727), the 44-hour week bill (S. 3281), and the steel car bill (S. 2107); to the Committee on the Civil Service.

8015. Also, petition of office of the Quartermaster, First Cavalry Division, Fort Bliss, Tex., urging support of the Black bill in the Senate and the Wainwright-McSwain bill in the House; to the Committee on Military Affairs.

SENATE

MONDAY, *December 17, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

O Thou whose word, hidden in the framework of the world, is revealed in the mind of man, speak to us in loving accents as we keep our solemn tryst with Thee.

We thank Thee for the dimmest consciousness of Thy presence; for the trail of a seamless robe about us, the burning of our hearts, the whisper in our minds; but do Thou pour Thy glory forth, that we may see the majesty of our daily path crowded with helpfulness and broadened with opportunity until it becomes a highway through the desert; and may every heart that watches with us see the Sun of Righteousness arise with healing in His wings for all the nations of the earth. Grant this for the sake of Him who is our peace, Jesus Christ our Lord. Amen.

The Chief Clerk proceeded to read the Journal of the proceedings of Saturday last, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	La Follette	Simmons
Barkley	Frazier	Larrazolo	Smith
Bayard	George	McKellar	Smoot
Bingham	Gerry	McLean	Steck
Blaine	Gillett	McNary	Steiwer
Blease	Glass	Moses	Stephens
Borah	Glenn	Neely	Swanson
Bratton	Goff	Norris	Thomas, Idaho
Brookhart	Greene	Nye	Thomas, Okla.
Bruce	Hale	Oddie	Trammell
Burton	Harris	Phipps	Tydings
Capper	Harrison	Pine	Vandenberg
Caraway	Hastings	Ransdell	Walsh, Mass.
Couzens	Hawes	Reed, Mo.	Walsh, Mont.
Curtis	Hayden	Reed, Pa.	Warren
Dale	Heflin	Robinson, Ind.	Waterman
Deneen	Johnson	Sackett	Watson
Dill	Jones	Schall	Wheeler
Edge	Kendrick	Sheppard	
Edwards	Keyes	Shipstead	
Fess	King	Shortridge	

Mr. GERRY. I desire to announce that my colleague the junior Senator from Rhode Island [Mr. METCALF] is absent on account of illness.

I wish also to state that the senior Senator from New York [Mr. COPELAND] is absent by reason of illness in his family.

Mr. SHEPPARD. I wish to announce that my colleague [Mr. MAYFIELD] is detained from the Senate on account of illness.

Mr. NORRIS. I desire to announce that my colleague the junior Senator from Nebraska [Mr. HOWELL] is detained from the Senate by illness.

Mr. HEFLIN. I desire to announce that my colleague the junior Senator from Alabama [Mr. BLACK] is absent from the Senate attending, as a member of the committee on the part of the Senate, the unveiling of the Wright Brothers Monument at Kitty Hawk, N. C.

The VICE PRESIDENT. Eighty-one Senators having answered to their names, a quorum is present.

MESSAGE FROM THE HOUSE—ENROLLED BILL SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the enrolled bill (H. R. 13990) to authorize the President to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased, and it was signed by the Vice President.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a petition of sundry citizens of St. Petersburg, Fla., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

He also laid before the Senate a resolution adopted by the Rotary Club, of Fargo, N. Dak., favoring the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

Mr. FLETCHER. Mr. President, I present a communication from the manager of the Chamber of Commerce of Titusville, Fla., with some resolutions adopted by Titusville Post, No. 1, of the American Legion. I request that the resolutions may be printed in the RECORD and lie on the table.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Resolutions adopted by Titusville Post, No. 1, Department of Florida, of the American Legion

Whereas there is pending in the United States Senate a bill providing for increase in the strength of the Navy, authorizing the construction of 15 cruisers and 1 aircraft carrier (H. R. 11526); and

Whereas the President of the United States has declared that the measure should be passed in order to eliminate a deficiency in the Navy and to meet our needs for defense; and

Whereas the American Legion has repeatedly declared in favor of adequate preparation in time of peace for ample protection should war arise: Therefore be it

Resolved by Titusville Post, No. 1, Department of Florida of the American Legion, That the speedy passage of the measure by the Senate and its enactment into law will subserve the best interest of the Nation and give notice to the world that a "Navy second to none" is America's interpretation of the 5–5–3 ratio decided upon at the Washington Conference. Be it further

Resolved, That a copy of this resolution be forwarded to the Senators and Representatives in Congress from Florida and to the headquarters of the Department of Florida of the Legion at Palatka.

R. E. L. NIEL,
J. W. HANSON,
IRA NOBLES,
Committee.

This is to certify that the foregoing is a true and correct copy of a resolution unanimously adopted by Titusville Post, No. 1, Department of Florida, the American Legion, at its regular meeting held December 12, 1928.

THOS. E. APPLE, *Commander.*
CHAS. I. GUINN, *Adjutant.*

Mr. SHEPPARD presented a petition of members of the Tyler Street Methodist Church, of Dallas, Tex., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

Mr. SIMMONS presented a petition of members of the Young Men's Christian Association, of Durham, N. C., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

Mr. BARKLEY presented petitions numerously signed by students of Asbury College, members of the Young Women's Christian Association Bible Classes, of Louisville, and sundry citizens, all in the State of Kentucky, praying for the prompt passage of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. JONES presented petitions of sundry citizens of Seattle, Spokane, Tacoma, Port Angeles, Leland, Dungeness, Carlsborg, Raymond, Yakima, and Colville, all in the State of Washington, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. KEYES presented resolutions adopted by the Improvement Club, of Candia; the Twentieth Century Club, of Bethlehem; the Fortnightly Club, of Chester; the Review Club, of Manchester; the committee on international relations, League of Women Voters, at Concord; the Business and Professional Woman's Club, of Newport; the Parent-Teacher Association, of Hillsboro; the North Church Guild, of Portsmouth; the Woman's Alliance of the Federated Church, of Greenland; the Dailey Circle of King's Daughters, of New Castle; the Whitefield Study Club, of Whitefield; the Unity Club, of Lancaster; the Woman's Home Missionary Society of the Methodist Episcopal Church, of Manchester; the Outlook Club, of Manchester; the Portsmouth district conference, New Hampshire Federation of Women's Clubs; the Plymouth district conference, New Hampshire Federation of Women's Clubs; the Keene district conference, New Hampshire Federation of Women's Clubs; the North County Conference of Friends in Council; the Silver Lake Woman's Club, of Madison; the Fortnightly Club, of West Lebanon; the Current Events Club, of Manchester; the New Hampshire School Mistresses' Club, at Concord; the New England Regional Conference of Congregational Churches, at Manchester; the Current Events Club, of Winchester; the League of Women Voters, of Greenland; the New Hampshire Smith College Club, at Rye Beach; the Unity Club, of Stratham; the directors' meeting of the District Young Woman's Christian Association, at Concord; the Woman's Community Council, of Portsmouth; the Carroll County Farm Bureau, at Moultonboro; the annual meeting of the Sullivan County Farm Bureau, at Claremont; the College Club, of Portsmouth; the New Hampshire A. A. U. W., at Concord; the Fall conference, New Hampshire League of Women Voters, at Portsmouth; the Millville Woman's Club, of Concord; the Granite Club, of Manchester; the Woman's Literary Society, of Suncook; the Wednesday Club, of Mont Vernon; the Council of Jewish Women, of Portsmouth; the Young Woman's Christian Association, of Portsmouth; the Winnicutt Grange, of Stratham; the Ladies' Benevolent Society of Smith Memorial Church, of Hillsboro; the Business and Professional Woman's Club, of Manchester; the State convention, Woman's Christian Temperance Union, at Woodsville; the Woman's Christian Temperance Union, of Lancaster; the civics committee of the Zeta Alpha Club, Middle Street Baptist Church, of Portsmouth; the Greenleaf Civics Club, of Franconia; the Woman's Civic Club, of Raymond; the Fortnightly Club, of Hudson; the field meeting of the New Hampshire Federation of Women's Clubs, at Durham; the Manchester district conference, New Hampshire Federation of Women's Clubs, at Milford; the Concord district conference, New Hampshire Federation of Women's Clubs, at Franklin; and the Woman's Clubs, of Rochester, Sunapee, Hinsdale, Woodstock, Berlin, Windham, Wolfeboro, Newmarket, Groveton, Contoocook, Conway, North Conway, Durham, New Hampton, New London, Gorham, Acworth, Winchester, Lebanon, Dover, Centre Ossipee, Penacook, West Concord, Dover, Colebrook, East Jaffrey, Laconia, Wentworth, and Union, all in the State of New Hampshire, favoring the ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. McLEAN presented a letter in the nature of a petition from the Connecticut State Association of Letter Carriers, Waterbury, Conn., praying for the passage of the so-called Dale-Lehlbach bill, providing for the retirement of postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented letters in the nature of petitions from Local Union No. 11, International Union of American Bakery and Confectionery Workers, and Hod Carriers' Local No. 623, both of New Haven, Conn., praying for the adoption of Senate Resolution 258, directing the Federal Trade Commission to reinstate the complaint against the Continental Baking Corporation, which were referred to the Committee on the Judiciary.

He also presented a letter in the nature of a petition from P. E. Mathias, of Whitneyville, Conn., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, and opposing adoption of the naval construction program, which was ordered to lie on the table.

He also presented petitions of the Hartford Council of Churches, members of the faculty of Hartford Seminary Foundation, and the minister of South Congregational Church of New Britain, all in the State of Connecticut, praying for the adoption of the so-called Gillett resolution, suggesting a further exchange of views relative to the World Court, which were referred to the Committee on Foreign Relations.

He also presented petitions of the Woman's Foreign Missionary Society of the First Methodist Episcopal Church of Ansonia and sundry citizens of New Haven, Hartford, Roxbury, and New Milford, all in the State of Connecticut, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. BLAINE presented petitions and papers in the nature of petitions from the Woman's Club, of Green Bay; the Monday Music Club, of Manitowoc; the annual conference of the Wisconsin Federation of Branches of the American Association of University Women, at Oshkosh; of the Educational Meeting, Women's Organization National Association Retail Druggists, of Milwaukee; the Mayville Woman's Club; the Woman's Foreign Missionary Society Auxiliary, of Linden; the Clara Swain Auxiliary of the Woman's Foreign Missionary Society of the First Methodist Episcopal Church of Beloit; the Woman's Foreign Missionary Society of the First Methodist Church of Madison; the Woman's Foreign Missionary Societies of La Crosse, Mazomanie, and Lancaster; the Woman's Club, of Deer Park; 41 members of the faculty of the State Teachers College, of Milwaukee; members of the Young Woman's Christian Association, of Beloit; members of the congregation of the First Baptist Church, of Green Bay; and sundry citizens of Madison and Milwaukee, all in the State of Wisconsin, and the Annual Convention of Chapter Officers of the Unitarian Laymen's League, at Lenox, Mass., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

He also presented a letter in the nature of a petition from members of the faculty of Milwaukee-Downer College, of Milwaukee, Wis., praying for the adoption of the so-called Gillett resolution, suggesting a further exchange of views relative to the World Court, which was referred to the Committee on Foreign Relations.

He also presented a resolution adopted at a meeting of District No. 4, Wisconsin Cooperative Creamery Association, at Barron, Wis., favoring the imposition of a tariff duty of at least 5 cents per pound on casein, which was referred to the Committee on Finance.

He also presented the petition of officers of the Deutscher Krieger-Bund von Wisconsin, Inc., of Madison and Kiel, Wis., praying for the adoption of the so-called Shipstead resolution, being the resolution (S. Res. 242) inquiring as to the appropriateness of amending article 231 of the Treaty of Versailles for the purpose of establishing the World War guilt, which was referred to the Committee on Foreign Relations.

HON. FRANK L. SMITH

Mr. DENEEN. Mr. President, by request I present a paper in the nature of a memorial from the Illinois Commerce Commission, which I ask leave to have printed in the RECORD.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

CHICAGO, ILL., *March 27, 1928.*

Hon. FRANK L. SMITH,
Dwight, Ill.

DEAR SENATOR: We who served with you on the Illinois Commerce Commission, either as commissioners, assistant commissioners, or on the staff, have noted the attacks which, during the past months, have been made against your service while upon the commission. As we have analyzed these attacks one feature stands out as common to all, viz, a wholly malicious distortion of facts and a reliance upon insinuations and sly inferences to detract from your reputation for probity and honesty. We who have served with you feel that if these false attacks are not effectively challenged the public may be misled not only to your injury but to the detriment of its own interest.

The things which these attacks seek to suggest to the public are that the Illinois Commerce Commission, during your administration as chairman, was under your personal domination and that you arbitrarily controlled the public utilities of the State to your own advantage without regard to law, justice, or the public welfare. We of the membership and staff of the commission voluntarily, and as a duty we owe to the public and in justice to yourself, make this statement that it may be clear to everyone that you could not and did not dominate the commission either for good or evil and that in the five years you served as chairman you never once tried to do anything of the kind. Inasmuch as almost two years have elapsed since you severed your connection with this commission we can hardly be accused of still being under your domination. Further, for general public information it may be said that with the exception of the secretary of the commission all members of the staff, and particularly those who are classified as technical experts, have been with the commission since its organization in 1914 and have served under Governors Dunne, Lowden, and Small. Every decision of the commission is evidenced by a written order and

every order of the commission is spread at large upon its records. A copy of each order is served on all interested parties, including municipalities when the public interest is involved, and upon the attorney of record or local representative of the parties to the action. A copy of every order is retained in the files of the commission, is a public document, and is available at all times to representatives of the press and public. The commission consists of seven members and a majority of the entire membership is required by law for a decision upon any question. The chairman of the commission, like each member, has one vote. A stenographic record is made of the vote of each commissioner as recorded on every commission action. It is apparent that no action could be "dictated by the chairman" without the concurrence of at least three other members of the commission.

The authority delegated to the commission by the Legislature of the State of Illinois relates to the rates, service, public convenience and necessity, public safety, capitalization, accounting, valuation, and related subjects of all intrastate public utilities. In case of petition or complaint concerning any public utility, notice is required by law to be sent to all interested parties of a public hearing, to be held where all evidence in transcribed by a court reporter and preserved in the record. Every municipality interested in any hearing is permitted by law to intervene in behalf of its citizens. After all evidence has been heard and arguments made by counsel the practice of the commission is that the orders shall be prepared either by the supervisor of opinions and orders of the commission, if the matter in question is one of a general nature, or by one of the assistant commissioners, if heard by the assistant commissioner, or by one or the other of the technical sections of the commission if the matter in question involves valuation, financing, or the like. In all instances the tentative drafts are predicated upon the evidence produced in the public hearing. When tentative orders are presented to the commission for action in conference it is the practice of the commission to have present all assistant commissioners, all examiners, and the technical members of the staff, the secretary or assistant secretary of the commission, and a shorthand reporter. The evidence in each case is discussed in detail, and if changes in the tentative order are deemed necessary such change is ordered by a majority of the whole commission. Therefore, all of us know that at no time in the more than five years you were chairman did you vary one iota from the accepted practice of the commission in the consideration of cases before that body nor did you in one single instance make any suggestion which in the widest stretch of imagination could be deemed or considered as affecting the interest of any person or corporation concerning the action to be taken by the commission in regard to any matter.

Two years have elapsed since wide publicity was given to the insinuations of the character of service rendered by you. We submit that had there been the slightest basis for a single one of these insinuations concerning any action of yours or of the commission while you were its chairman the particular act would necessarily be of record in some one of the commission's orders; some particular order would have been found which would furnish some evidence that you had been unfair or that some action of the commission had been favorable to some one or other of the many public utility concerns doing business in Illinois. The fact stands unchallenged that no single act of yours or of the commission has ever been found upon which any one dared base an insinuation that under your administration as chairman any utility was given an unfair advantage or that the public interest was not strictly safeguarded in every instance.

Had it been true that you or the commission had shown favors to any utility interests in the matter of rates or financing, the people making these insinuations would have aroused public indignation. It would have brought a clamor for rate reduction and service improvements and the like throughout the State. It is, however, a fact that in the past two years there has not been the slightest protest concerning any utility rate, and it is also true that in that time no community of citizens or any municipality has made a single application for reduced rates, also it is a fact that in that time there has been no complaint that during your administration on the commission any utility was authorized to issue any securities for any improper purpose. During your term as chairman you voted upon rate reductions in utility service in Illinois which have resulted in a saving of more that $100,000,000 to the subscribers and consumers of Illinois. In the main these reductions were accomplished as a matter of mutual analysis of the facts without recourse to litigation in the courts.

In closing we feel that the impromptu remarks made of record upon the occasion of your last visit to the commission are pertinent to the statements of fact hereinabove contained. There were present in the hearing room of the commission, among others, Harry P. Weber (representing Chicago surface lines), James G. Condon (representing Chicago Motor Coach Co.), Clarence B. Cardy (representing various shippers), Ben P. Alschuler (representing the Illinois Gas Association), Commissioners Wright, Trovillion, and Moynihan, and Assistant Commissioner Kuhn, all of whom spoke of record in the highest terms of your fairness, and, as Mr. Weber well said, "You held the scale of justice with an even hand."

Yours very truly,

J. PAUL KUHN, *Assistant Commissioner.*	H. E. WOOD, *Supervisors of Orders and Opinions.*
WM. J. SMITH, *Commissioner.*	JAMES R. CLARK, *Assistant Commissioner.*
HAL W. TROVILLION, *Commissioner.*	C. G. BENNETT, *Chief of Engineering Section.*
ALEX J. JOHNSON, *Commissioner.*	F. D. AYERS, *Assistant Commissioner.*
P. H. MOYNIHAN, *Commissioner.*	H. M. SLATER, *Chief Rate Making Section.*
EDWARD H. WRIGHT, *Commissioner.*	JULIUS JOHNSON, *Secretary.*
W. M. HAMMOND, *Chief of Accounting Section.*	FRANK A. HEERMANS, *Assistant Secretary.*

REPORTS OF COMMITTEES

Mr. PINE, from the Committee on Military Affairs, to which was referred the bill (S. 2192) for the relief of Lemuel Simpson, reported it without amendment and submitted a report (No. 1350) thereon.

He also, from the same committee, to which was referred the bill (H. R. 6377) for the relief of John Shannon, submitted an adverse report (No. 1351) thereon, and moved that the bill be indefinitely postponed, which was agreed to.

Mr. ROBINSON of Indiana, from the Committee on the Judiciary, to which was referred the bill (H. R. 11859) for the relief of B. C. Miller, reported it with an amendment and submitted a report (No. 1352) thereon.

Mr. WATERMAN, from the Committee on the Judiciary, to which was referred the bill (S. 3590) to amend section 110 of the Judicial Code, reported it without amendment and submitted a report (No. 1354) thereon.

Mr. DENEEN, from the Committee on the Judiciary, to which was referred the bill (H. R. 13645) to establish two United States narcotic farms for the confinement and treatment of persons addicted to the use of habit-forming narcotic drugs who have been convicted of offenses against the United States, and for other purposes, reported it without amendment and submitted a report (No. 1353) thereon.

FUNERAL EXPENSES OF THE LATE SENATOR GOODING

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported back favorably without amendment the resolution (S. Res. 275) submitted by Mr. BORAH on the 5th instant, which was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the Vice President in arranging for and attending the funeral of the Hon. Frank R. Gooding, late a Senator from the State of Idaho, upon vouchers properly approved.

LILLIAN T. OYSTER

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported back favorably without amendment the resolution (S. Res. 278) submitted by Mr. TYDINGS on the 10th instant, which was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the contingent fund of the Senate to Lillian T. Oyster, widow of Guy H. Oyster, late an assistant clerk in the office of Hon. MILLARD E. TYDINGS, a Senator from the State of Maryland, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

LUCY A. VAN DEMAN

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported back favorably without amendment the resolution (S. Res. 273) submitted by Mr. WATSON on the 5th instant, which was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the contingent fund of the Senate to Lucy A. Van Deman, mother of Faye E. Van Deman, late an assistant clerk to the Committee on Interstate Commerce, a sum equal to six months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

SARAH E. KAEDING

Mr. DENEEN, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported back favorably with an amendment the resolution (S. Res. 277) submitted by Mr. SCHALL on the 6th instant, and ask for its present consideration. The Senate by unanimous consent proceeded to consider the resolution.

The amendment was, in line 3, before the word "of," to strike out "wife" and insert "widow," so as to make the resolution read:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay from the contingent fund of the Senate to Sarah E. Kaeding, widow of Edward H. Kaeding, late an assistant clerk to Senator SCHALL, a sum equal to six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

The amendment was agreed to.

The resolution as amended was agreed to.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. REED of Pennsylvania:

A bill (S. 4954) authorizing refund of certain illegally collected taxes; to the Committee on Finance.

By Mr. NEELY:

A bill (S. 4955) granting a pension to Peter H. Frankford; to the Committee on Pensions.

By Mr. SWANSON:

A bill (S. 4956) to remove the charge of desertion and grant an honorable discharge to Marion M. Clark; to the Committee on Military Affairs.

A bill (S. 4957) granting the consent of Congress to the Danville & Western Railway Co. to rebuild and reconstruct and to maintain and operate the existing railroad bridge across the Dan River in Pittsylvania County, Va.; to the Committee on Commerce.

A bill (S. 4958) granting a pension to Sarah A. Faris; and

A bill (S. 4959) granting a pension to Ralph P. Bell (with an accompanying paper); to the Committee on Pensions.

A bill (S. 4960) to extend the benefits of the employees' compensation act of September 7, 1916, to Solomon J. Oliver;

A bill (S. 4961) for the relief of Martha C. Booker, administratrix of the estate of Hunter R. Booker, deceased; H. H. Holt, and Annie V. Groome, administratrix of the estate of Nelson S. Groome, deceased (with an accompanying paper); and

A bill (S. 4962) for the reimbursement of R. H. Quynn, lieutenant, United States Navy, for loss of property by fire at the naval operating base at Hampton Roads, Va. (with accompanying papers); to the Committee on Claims.

By Mr. DENEEN:

A bill (S. 4963) for the relief of James McGourty; to the Committee on Claims.

By Mr. GILLETT:

A bill (S. 4964) to authorize the erection of a suitable statue of Maj. Gen. George W. Goethals within the Canal Zone; to the Committee on the Library.

By Mr. ROBINSON of Indiana:

A bill (S. 4965) granting a pension to Florence J. Frazier;

A bill (S. 4966) granting a pension to Annah E. Core;

A bill (S. 4967) granting a pension to Bertran C. Hayner; and

A bill (S. 4968) granting a pension to Maria Allen; to the Committee on Pensions.

By Mr. WATSON:

A bill (S. 4969) granting an increase of pension to Margaret A. Carey; and

A bill (S. 4970) granting an increase of pension to Martha J. Griner; to the Committee on Pensions.

By Mr. McKELLAR:

A bill (S. 4971) granting a pension to Mary F. Gross; and

A bill (S. 4972) granting an increase of pension to Polie Hamby; to the Committee on Pensions.

By Mr. GLASS:

A bill (S. 4973) for the relief of the Consolidated Awning & Tent Co., of Newport News, Va., and the United States Fidelity & Guaranty Co., of Baltimore, Md.; to the Committee on Claims.

By Mr. BRATTON:

A bill (S. 4974) granting an increase of pension to Alpha W. Felter; to the Committee on Pensions.

By Mr. FESS:

A bill (S. 4975) to create a commission on establishing a country summer White House; to the Committee on Public Buildings and Grounds.

By Mr. CARAWAY:

A bill (S. 4976) granting the consent of Congress to the counties of Lawrence and Randolph, State of Arkansas, to construct, maintain, and operate a bridge across the Spring River, at or near the town of Black Rock, Ark.; and

A bill (S. 4977) granting the consent of Congress to the counties of Lawrence and Randolph, State of Arkansas, to construct, maintain, and operate a bridge across the Spring River, at or near Imboden, Ark.; to the Committee on Commerce.

By Mr. NORRIS:

A bill (S. 4979) to authorize the city of Niobrara, Nebr., to transfer Niobrara Island to the State of Nebraska; to the Committee on Public Lands and Surveys.

By Mr. BROOKHART:

A bill (S. 4980) authorizing the Secretary of Agriculture to acquire toll bridges and maintain them as free bridges, and for other purposes; to the Committee on Commerce.

By Mr. MOSES:

A bill (S. 4981) to include in the credit for time served allowed substitute clerks in first and second class post offices and letter carriers in the City Delivery Service time served as special-delivery messengers; to the Committee on Post Offices and Post Roads.

A bill (S. 4982) granting an increase of pension to Lydia F. Smith (with accompanying papers); and

A bill (S. 4983) granting an increase of pension to Leila A. Steele (with accompanying papers); to the Committee on Pensions.

By Mr. STEIWER:

A bill (S. 4984) to extend the benefits of the employees' compensation act of September 7, 1916, as amended, to George Walther; to the Committee on Claims.

A bill (S. 4985) granting a pension to Emma P. Patterson;

A bill (S. 4986) granting a pension to Wesley Adcock;

A bill (S. 4987) granting a pension to Charles Larsen;

A bill (S. 4988) granting a pension to E. A. Hart;

A bill (S. 4989) granting a pension to Silas Newton Todd;

A bill (S. 4990) granting a pension to Robert Harms;

A bill (S. 4991) granting a pension to Tollifer D. Ferguson; and

A bill (S. 4992) granting a pension to Lizzie E. Kizer; to the Committee on Pensions.

By Mr. McKELLAR:

A bill (S. 4993) to amend subsection 3 of section 322 of the Revised Statutes, as amended, relating to claims for refunds of taxes; to the Committee on the Judiciary.

By Mr. CAPPER:

A joint resolution (S. J. Res. 179) entitling all employees of the United States Government in the District of Columbia to pay for Monday, December 24, 1928, the same as any other holiday; and

A joint resolution (S. J. Res. 180) authorizing the granting of permits to the committee on inaugural ceremonies on the occasion of the inauguration of the President elect in March, 1929, and for other purposes; to the Committee on the District of Columbia.

DECLARING A LEGAL HOLIDAY IN THE DISTRICT

Mr. BLEASE. I introduce a joint resolution which I ask may be referred to the Committee on the District of Columbia. I want to call the attention of the chairman of that committee to a like resolution on December 18, 1925, at pages 1066 and 1067 of the CONGRESSIONAL RECORD of that date.

The joint resolution (S. J. Res. 181) to declare December 24, 1928, a legal holiday in the District of Columbia, was read twice by its title and referred to the Committee on the District of Columbia.

PROPOSED COUNTRY WHITE HOUSE

Mr. GOFF. I introduce a bill and ask to have it read from the desk and referred to the Committee on Public Buildings and Grounds.

The bill (S. 4978) to provide for establishing a country White House was read the first time by its title, the second time at length, and referred to the Committee on Public Buildings and Grounds, as follows:

Be it enacted, etc., That the Director of Public Buildings and Public Parks of the National Capital is authorized and directed, at a cost not to exceed $500,000, to acquire, on behalf of the United States, by purchase, condemnation, or otherwise, suitable grounds in the State of West Virginia, together with the buildings thereon, and to alter, repair,

and furnish such buildings for the use of the President of the United States as a country White House; or, in his discretion, to acquire, on behalf of the United States, by purchase, condemnation, or otherwise, a suitable site in the State of West Virginia, and to provide for the construction, furnishing, and equipment thereon of such building or buildings as may be suitable for use by the President of the United States as a country White House.

SEC. 2. For the purposes of this act the Director of Public Buildings and Public Parks of the National Capital is authorized to enter into contracts, to purchase materials, supplies, equipment, and accessories in the open market, to employ the necessary personnel, including professional services without reference to section 35 of the act approved June 25, 1910, and to make such expenditures, including expenditures for advertising and travel and the purchase of technical and reference books, as may be necessary.

SEC. 3. The laws relating to the public property and furniture in and belonging to the Executive Mansion in the District of Columbia, and to the protection of the Executive Mansion and grounds in the District of Columbia, shall apply to the country White House provided for in this act.

SEC. 4. There is hereby authorized to be appropriated the sum of $500,000, or so much thereof as may be necessary, to carry out the provisions of this act.

AMENDMENT TO AGRICULTURAL APPROPRIATION BILL

Mr. FLETCHER submitted an amendment proposing to increase the appropriation for investigations, experiments, and demonstrations in reference to insects affecting tropical, subtropical, and ornamental plants and including research on the Parlatoria date scale and the Mediterranean and other fruit flies from $130,500 to $145,500, intended to be proposed by him to House bill 15386, the Agricultural Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

PROPOSED FARM RELIEF COMMITTEE

Mr. THOMAS, of Oklahoma, submitted the following concurrent resolution (S. Con. Res. 27), which was referred to the Committee on Agriculture and Forestry:

Whereas it appears that, at an early date, legislation directly affecting agricultural interests is to be considered by the Congress, either in regular or special session; and

Whereas the agricultural problem is one which affects directly every citizen as well as every group of our people, and affects, directly or indirectly, every interest and institution of the Republic. In seeking a solution and in providing relief for agriculture all our people, individually and in groups, and all our interests and institutions must be taken into consideration, to the end that no avoidable injury and no injustice may be done any citizen or group of citizens, or any interest or institution or group of interests or institutions; and

Whereas the 35,000,000 of our citizens residing upon and securing substance upon which they exist from farm lands are not, as a whole, organized so as to furnish recognized and accredited representatives to speak and act for agriculture in connection with the formation and enactment of legislation for the best interests of agriculture; and

Whereas to the end that agriculture may be specially and directly represented in connection with the suggested farm relief and tariff legislation. Now therefore be it

Resolved by the Senate (the House of Representatives concurring), That the Chairman of the Senate Committee on Agriculture and Forestry and the chairman of the House of Representatives Committee on Agriculture be, and they are hereby, authorized and requested to extend, by proclamation, an invitation to the several farm organizations to select delegates to meet at a time and place to be fixed in such proclamation for the purpose of selecting, naming, and commissioning 10 delegates to represent agricultural interests before the Congress and the committees thereof in connection with the formation and enactment of farm relief and tariff legislation hereinbefore referred to. If and when said delegates are selected and commissioned, as provided for herein, it is suggested that they shall organize by the selection of a chairman, vice chairman, and secretary, and such committee, when so organized, shall be known and referred to as the farm relief committee.

EXECUTIVE REPORTS

Mr. BORAH. I ask permission, as in executive session, to submit reports for the Executive Calendar.

The PRESIDENT pro tempore. Without objection, the reports will be received and go to the Executive Calendar.

ADMINISTRATION OF INDIAN BUREAU

Mr. PINE. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Los Angeles Times of November 27, 1928, which relates to the administration of the Indian Bureau.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A NATIONAL DISGRACE

If there were any who doubted that the treatment accorded American Indians by their supposed protector and guardian, the Indian Bureau, is now and has been for a generation a national disgrace, the testimony so far taken before the Senate Committee on Indian Affairs ought to convince them. No party and no national administration has differed from any other in this respect; the administration of the Indian Bureau has been uniformly bad, no matter who has been in charge at Washington. It is time—it has been time for years—to take appropriate action. Appropriate action in this case is the abolition of the Indian Bureau and the complete divorcement of its personnel, in whole and in part, from any connection with Indians and their property.

Mere reorganization is not enough. There must be a clean out from top to bottom and the adoption of an entire new policy, to be carried out by an entirely different set of men and women, with a different viewpoint and ideals.

The evidence brought forth in the California hearings of rotten meat and weevily bread and beans served to children in Indian schools, with a sauce of brutality and mistreatment, is of a piece with the evidence taken elsewhere. Everywhere the committee goes it gets the same sort of facts. It has been proved before that the Indian Bureau has 1 employee for every 45 Indians, and that consequently its funds are largely absorbed by its overhead; it has been shown that the death rate among reservation Indians has risen to the scandalous figure of nearly 30 per 1,000 because of starvation and lack of sanitary and medical care; it has been shown that the tribal property held in trust by the bureau is being dissipated by mismanagement or worse, whereas the general history of trust estates is that they increase in value; that Indians have been despoiled of good land and given worthless land; that they are hampered and hindered in their efforts toward self-improvement; and that in general they seem to be considered nuisances instead of wards, vermin instead of human beings.

Any change which Congress might make in such a situation could hardly fail to be an improvement. Various remedies have been proposed at the hearings. The California Indian Defense Association contends that the care of the Indians should be returned by the Federal Government to the various States in which they are domiciled. Another proposal is to substitute for the Indian Bureau a commission on which is to be represented the Smithsonian Institution, the Department of Agriculture, and the Attorney General. Still another is that the Indians be granted full citizenship and treated precisely like other elements of the population; this is the solution offered by Dr. George P. Clements, of the Los Angeles Chamber of Commerce. A suggestion worth consideration has not yet been laid before the committee, that it might be possible to revive the Iroquois Confederacy and extend its plan of organization to the other Indians. Certainly the Iroquois, who have never been under Indian Bureau control, have fared better than the Indians who have. The Iroquois Confederacy, incidentally, is still nominally in existence, with rights guaranteed it by a treaty which antedates the Federal Constitution.

Whether turning the Indians over to the tender mercies of the various State governments would be a wise move may be doubted in view of the attitude of one or two of the States whose inhabitants have lost no opportunity to poach on Indian preserves. Several grabs and steals of which the Indians would have been victims have been stopped in Congress within the last few years—not by the Indian Bureau, which has generally acquiesced in them, but by the vigilance of friends of the Indians. It is to be feared that in the greater obscurity in which State legislatures work it would be easier to put over such unrighteous measures.

Two things to which stops should be put at once are officious meddling with the affairs of the Pueblo Indians, whose greatest need is to be left alone to take care of themselves as they have been doing efficiently for 2,000 years or more, and the practice of taking Indian children from their homes and putting them into Government boarding schools. This breaking up of homes and family life is good neither for the children nor their parents; it is cruel and unnecessary, and would be so even if the children were well treated and well educated—and they are neither. Day schools must be provided.

In addition to the Iroquois, and the Indians who have been incorporated into the general population, there are about 225,000 Indians on reservations or otherwise in Indian Bureau control, and who thus come under the scope of the present investigation. These people, it is now generally admitted by candid ethnologists, are not inferior in natural capacity to any race on earth. If they are here and there degraded, the degradation is almost invariably to be traced to white exploitation and injustice. They are entitled to a reversal of the process which, through generations, has tended to thrust them into less and less desirable environments, and will, if it continues, end in their extermination.

The principal instrument of their oppression is the United States Indian Bureau. It is now apparent that this bureau was conceived in mistake and is maintained in ignorance and indifference. It is time to put it out of existence and to substitute for it an enlightened and humane policy.

TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATIONS—CONFERENCE REPORT

Mr. WARREN. Mr. President, I submit a conference report on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and I move its adoption.

The VICE PRESIDENT. The conference report will be read.

The Chief Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 3, 5, 6, 8, and 20.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 4, 9, 10, 11, 12, 13, 14, 15, and 16, and agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$186,000,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$19,400,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$59,300,000"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$4,300,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$5,100,000"; and the Senate agree to the same.

The committee of conference have not agreed on amendment numbered 7.

F. E. WARREN,
REED SMOOT,
GEO. H. MOSES,

Except amendments 5 and 6.

LEE S. OVERMAN,
WM. J. HARRIS,
Managers on the part of the Senate.

WILL R. WOOD,

Except on amendment No. 8.

M. H. THATCHER,

I concur except on Senate amendment No. 5,

JOSEPH W. BYRNS,
Managers on the part of the House.

Mr. HARRIS. Mr. President, as one of the conferees on the Treasury Department appropriation bill I could not agree with the other members of the committee. The Senator from North Carolina [Mr. OVERMAN], one of the Senate conferees, who is ill, telephoned me that he wished to join with me, and declined with me to sign the report, so far as it relates to the prohibition enforcement.

Mr. President, the Senator from Maryland [Mr. BRUCE] proposed an amendment to the bill when it was pending here. What was his motive in submitting that amendment is not the question. There is not any Senator here but knows that prohibition enforcement of to-day is a farce. The bureau has not had one-tenth enough money to enforce the law, and it will never be a success until we appropriate sufficient funds to employ more men. I sincerely hope, Mr. President, that the Senate will vote down the conference report and notify the House of Representatives that we are in favor of an appropriation of a reasonable amount to enforce the prohibition law. The official of the Government in charge of prohibition enforcement has stated that it would take over $200,000,000 to enforce the law. If that amount can not be wisely spent, we certainly ought to appropriate an amount sufficient to enforce the law, for at present it is a farce.

Mr. BRUCE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Maryland?

Mr. HARRIS. If the Senator will pardon me for just a moment, until I can finish my statement, I shall then yield to him.

Mr. BRUCE. I merely wished to ask the Senator from Georgia a question.

Mr. HARRIS. It will be claimed that there is no recommendation here from the department and that they are not prepared for a large increase in the appropriation. They will have seven months in which to get ready before this appropriation shall be available, and in that time they could have an organization ready to make, at least, an attempt at the law's enforcement.

I know, Mr. President, that the country favors prohibition and the enforcement of the law. I also know that we can not enforce it with the amount of the present appropriation. I know that in my State we can not get all the good men we need with the salaries which are paid them, and that we can not under the present appropriation get one-tenth the number which the department ought to have to enforce this law. I hope a sufficient amount may be appropriated for the purpose and that the Senate will not agree to the conference report. I ask for the yeas and nays on the motion to adopt the report.

Mr. TRAMMELL. Mr. President, I will ask the Senator from Georgia what is the amount of the appropriation now carried in the bill?

Mr. HARRIS. It is practically the same amount that has been carried heretofore. The amendment of the Senator from Maryland [Mr. BRUCE], if adopted, would increase it to $270,000,000. While that amount may be too large to begin with, I believe that we ought to appropriate a reasonable amount in order to enforce the law as far as possible, and increase this amount if necesary to enforce the law.

Mr. BRUCE. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Maryland?

Mr. HARRIS. I yield.

Mr. BRUCE. I simply wish to correct a misapprehension into which the Senator from Georgia appears to have fallen. He has stated that the head of the prohibition unit has said that it will take $200,000,000 to enforce prohibition in this country. What that official said was that it would take $300,000,000 to enforce prohibition in the United States, and that, moreover, it would be necessary to cover—I use his language—this country with Federal courts in order to accomplish that result. So I took Mr. Doran—for it is to him that I am referring—at his word, as I had a right to do, and I deducted from $300,000,000 the amount carried in the Treasury Department appropriation bill for the purposes of the Coast Guard, leaving the net sum approximately of $270,000,000.

So, if the Senator's idea is to secure some paltry appropriation of $50,000,000 or $60,000,000 for the purpose of enforcing prohibition in the United States, he is off the track; he is out of touch with the authority that he is quoting.

I should like to ask the Senator another question. A good many other propositions of this sort are pending at this time. Is the Senator from Georgia in favor of making it a felony to buy a glass of liquor as well as to sell one?

Mr. HARRIS. Mr. President, the views of the Senator from Georgia are so far apart from those of the Senator from Maryland that it would be a waste of time for us to discuss the question at this time, when there is much pressing business before the Senate, and I should like to confine my remarks to the appropriation under discussion and not to go outside of that.

Mr. BRUCE. I will ask the Senator's pardon.

The VICE PRESIDENT. The Senator from Wyoming [Mr. WARREN] has moved that the Senate proceed to the consideration of the conference report. The question is on that motion.

Mr. CARAWAY. Before there is a vote on that question, I desire to say a word.

Mr. HARRIS. I have asked for the yeas and nays on my motion.

Mr. CARAWAY. I will take only a few moments.

Mr. President, I do not know, for I have not read all the testimony, how much money it will require to enforce prohibition, but there ought to be no two questions about whether we should enforce the law. It is on the statute books; it is the law. I have never had any doubt but that the majority of the people in the country are in favor of prohibition; whether for themselves or their neighbors I am not prepared to say, but they

are in favor of prohibition. If we are to have prohibition, we ought to have it. Is it because of lack of money that we have had no enforcement? I have not thought so. I have thought we have had no enforcement because those charged with it had no sympathy with it. That is my belief.

I believe prohibition can be made effective; I believe we can enforce the law; I have no doubt about it. I believe it would be a good thing to enforce it. If it shall require $300,000,000 to enforce it, let us appropriate that sum and enforce it. Let us give the officials charged with enforcement every instrumentality for which they ask, and then hold them responsible for the enforcement of the law. Do not let us give them an alibi. I do not think they need that much money to enforce the law, but if they need it, let us give it to them and let them enforce the law. Then when we shall have honestly enforced it, if the people want to continue with the law, they will do so. I believe they will. I know that the way the law is being enforced is destroying the respect for law in America. I have no apologies for those charged with the enforcement of the law who say the law can not be enforced. Any honest man in office who can not accomplish the purpose for which he accepted office should resign. Any man who stays in office charged with a duty and then says he can not discharge it, is the wrong man in that place and ought to be discharged.

If it is the belief of the department that it will require the sum of money mentioned to enforce prohibition, I honestly and earnestly hope that we will give it to them, if by so doing the law can actually be enforced. Let us not give them an alibi; do not let them say, "If we had $300,000,000 we could enforce the law, but with $50,000,000 we can not enforce it." It is a crime, Mr. President, to have a law on the statute books and not enforce it. Such a condition breeds contempt for law; it breeds crime.

Let us give the enforcement officials what they ask for in money and instrumentalities with which to enforce the law and see that they do enforce it. There is something wrong somewhere, so let us end alibis and find out just what is wrong with prohibition enforcement.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. CARAWAY. I yield.

Mr. McKELLAR. Is it not true that during the last election many of the very best people in this country voted the Republican ticket——

Mr. CARAWAY. No; possibly good people did that.

Mr. McKELLAR. I think some very excellent but misguided people voted the Republican ticket——

Mr. CARAWAY. I accept that.

Mr. McKELLAR. Because they thought they were voting this country dry.

Mr. CARAWAY. Yes.

Mr. McKELLAR. They did it honestly and fearlessly in every State in the Union; there is no doubt about that.

Mr. CARAWAY. I accept that statement.

Mr. McKELLAR. It was held by many that the result of the recent election meant a dry country, meant a prohibition country, meant a law-enforcement country. Now, when the officers of the Government ask for money, why should we not give it to them to make the country dry?

Mr. CARAWAY. I agree with the Senator. We had a referendum—I think it was said to be a solemn referendum—on prohibition, and if I remember they won.

Mr. McKELLAR. That side won.

Mr. CARAWAY. And now I want to give every instrumentality they ask for and see if they were joking. I do not think they meant to enforce prohibition; I do not think they wanted to enforce prohibition; I do not think this administration has ever desired to do that. I think the evidence is overwhelming that the head of the department having enforcement in charge is entirely out of sympathy with it; and I think the law has been violated more flagrantly the nearer the approach has been to the place where he registers and votes, and, therefore, where his influence is the greatest.

I am in favor honestly and seriously of giving the instrumentalities and the money to enforce the law, and then, so help me, Almighty God, I want Congress to see that the law is enforced. It can be done. I know that prohibition can be enforced; I know it has not been done, because the enforcement authorities have not had sympathy with it.

I am not going to pretend that it would not be a difficult task; I am not unmindful of the lack of sympathy upon the part of a very large and respectable element of America that does not want the law enforced; but it is the law, and now let us give the enforcement officials the means to enforce it and then see that they do it.

Mr. McKELLAR. Mr. President——

Mr. CARAWAY. I yield to the Senator.

Mr. McKELLAR. I will ask the Senator if he does not believe that whenever the administration has the courage to enforce the prohibition law and asks and receives from Congress the money with which to enforce it, the law will be enforced?

Mr. CARAWAY. Two-thirds of the difficulty in enforcing the law is the knowledge upon the part of the violators that there is no sympathy with the punishment inflicted.

Mr. McKELLAR. I agree with the Senator.

Mr. CARAWAY. If violators are punished at all, it is reluctantly done. If Congress should serve notice upon this element that we are going to have enforcement and are going to give every instrumentality necessary to enforce the law, that would be half the battle, and more than half the battle, and we could enforce it.

Mr. REED of Missouri. Mr. President, may I ask the Senator how much money he thinks ought to be appropriated for this purpose.

Mr. CARAWAY. I have not studied that question. I understood that the Director of the Prohibition Bureau said that it would take $300,000,000. But if it requires $300,000,000, let us give him $300,000,000 and let us say, "We expect results and if you can not get them, let some honest man try and see if he can not do so."

Mr. BRUCE. Mr. President——

Mr. CARAWAY. Does the Senator wish to interrupt me?

Mr. BRUCE. No; I thought the Senator had concluded.

Mr. CARAWAY. Very well.

Mr. BRUCE. Mr. President, the Senator from Arkansas [Mr. CARAWAY], like the Senator from Georgia [Mr. HARRIS], has not stated all that Mr. Doran said. I beg leave to remind the Senator from Arkansas that Mr. Doran said, not only that it would take $300,000,000 annually to enforce prohibition in this country, but that the States would have to be covered with Federal courts for this purpose. Of course when he said that he was——

Mr. CARAWAY. Mr. President, I should like to ask the Senator a question in regard to the statement he has made. I should like to ask the Senator if he believes there are insufficient courts to enforce the law? Does the Senator believe that?

Mr. BRUCE. At the present time, yes; and if those courts were multiplied not a few times over they would still be insufficient.

Mr. CARAWAY. Then, let me ask the Senator why did he move to appropriate $300,000,000, if he thought the law could not be enforced?

Mr. BRUCE. I will tell the Senator why. This law can be enforced——

Mr. CARAWAY. I think so.

Mr. BRUCE. Drinking in this country can be suppressed, as Protestantism was suppressed in Spain by the crushing enginery of the inquisition. Lay aside all of our cherished constitutional ideas and ideals and push merciless arrogance and tyranny from one extreme to another, and prohibition can be enforced, but at the price of our liberties.

Mr. CARAWAY. Does the Senator want the law enforced?

Mr. BRUCE. I do.

Mr. CARAWAY. Then, is he willing to go to whatever length is necessary to enforce it?

Mr. BRUCE. As much as I abominate prohibition, I would prefer that it should be enforced rather than that the disgraceful conditions which prevail in this country at present should be continued.

The United States reeks with crime, notwithstanding the promise that was made to us when the eighteenth amendment was adopted that criminality would be greatly reduced as one of its results. Never in the history of the country were the gunman, the robber, the thief, the murderer, the ravisher, the political corruptionist, the bribed public servant so in evidence as they are at the present time; and I believe with Mr. Collins the chief of police of that great city, Chicago—which has lately suffered more, perhaps, from general lawlessness than any other city in the Union—that the criminal conditions which prevail in the city of Chicago are primarily due to the evils and abuses bred by prohibiton.

Mr. CARAWAY. If the Senator will let me ask him a question, the Senator believes that this larger appropriation will be a step in the right direction?

Mr. BRUCE. I believe this, and I will ask the Senator to give me a little time to develop my idea:

One of three things must happen in relation to prohibition in the United States: Either the present condition of nonenforcement will continue, and prohibition will be a mockery hereafter, as it has been in the past; or prohibition will sink into what Grover Cleveland was in the habit of calling "innocuous desuetude"; or it will be enforced. Now, I do not hesitate to say

that much as I detest prohibition, keenly alive as I am to the calamities that it has brought upon our people, I would rather see it enforced than continue to be nonenforced as it is being nonenforced at the present time. I say, however, that it can not be enforced unless the people of this country are willing to pay the price that is necessary, not only in money but in the surrender of their civil freedom to enforce it.

When I offered the amendment to the Treasury Department appropriation bill making an appropriation of $300,000,000 for the enforcement of prohibition I was laying the foundation for a detailed repressive system under which prohibition, as I apprehended, could better be enforced or be proven conclusively to be unenforceable. First of all, you must take Mr. Doran at his word. You must give him the $300,000,000 for which he asks. He is in a better position than anybody else to know just what pecuniary amount must be appropriated for the enforcement of prohibition. Moreover, he should be taken at his word when he says that it is also necessary to cover the face of the United States with Federal courts in order to enforce prohibition. When Mr. Doran said that he was simply following in the footsteps of Mr. Buckner, one of the ablest United States district attorneys ever charged with the enforcement of Federal law in the State of New York, when Mr. Buckner declared before a subcommittee of this body that in order to enforce prohibition in the southern district of the State of New York alone there would have to be 12 additional Federal judges appointed for that district and there would have to be an appropriation by Congress likewise of some $50,000,000 a year for enforcement, and that, besides, there would have to be a large addition made to the staff of the United States district attorney for the southern district of New York and some 1,500 more prohibition officers, too. I am speaking from memory, but I think with substantial accuracy.

Such is the tremendous machinery of repression that you must have when you come to battle with human nature; when you come to contend with instincts almost as old as the base of the Alleghenies; when you come to violate the human reason; to affront human nature and to attempt to extinguish a human appetite wholly legitimate and innocent—when not carried to excess.

I for one am growing tired of our fruitless efforts to modify and repeal this law. Let it repeal itself. Let us act upon the principle of Gen. Ulysses S. Grant, that the best way to get rid of a bad law is rigidly to enforce it. Let us not only appropriate this $300,000,000 for the enforcement of prohibition, let us not only cover the face of the land with additional Federal courts, but let us accept the suggestion that Major Hesse made in this city a few days ago—that is to say, that any purchase of liquor, however small, should be denounced by law as nothing less than a felony; and then let us also imitate the liberal, humane legislation of the State of Michigan and provide that when some individual has four times violated the prohibition law, even though it be a poor old crone of a widow with 10 children, she shall be committed to the penitentiary for life!

Even now there are languishing in prison in that State under the sentence of life imprisonment two individuals, one named Palm, whose fourth offense, as I am informed, consisted in being found to have in his possession a gill of liquor; and the other, the widowed mother of some 10 children, tempted by her dire necessities to violate the Volstead Act. I say that such legislation is a disgrace to the State of Michigan, and would be a disgrace to any other State of this Union, I care not what that State may be, but especially is it a disgrace to the State of Michigan when, as we all know, the Government only a few days ago announced that it was on the point of arresting for prohibition wrongdoing some 150 corrupt customs inspectors in the city of Detroit and elsewhere along the Canadian line.

Another thing that you must do, of course, is to pass the atrocious measure, as I see it, recently introduced here by the Senator from Washington [Mr. JONES]—that is to say, the bill known as the Jones bill, which proposes to wipe out all the time-honored, immemorial distinctions that the courts have always recognized between the heinousness of first offenses and subsequent offenses, to merge alternative provisions for fine and imprisonment in a single composite penalty, and actually to leave it in the power of some fanatical judge to inflict a fine of no less than $10,000 on some one who might be found transporting a half pint of liquor between the city of Washington and the city of Alexandria. To such fearful extremes has unbridled fanaticism brought the Legislature of this Union and the legislatures of many of the States of this Union. And then, by all means, enforce your Stalker law, providing that an alien in this country who violates the Volstead Act, no matter how relatively trivial the violation may be in point of gravity, is to be deported from this country. Pass that law, too. While you are doing your work, do it completely. Do it with all the minute and systematic elaboration that has always been characteristic of highly organized systems of tyranny.

And then, by all means, pass the bill which the Senator from Iowa [Mr. BROOKHART] believes to be of sufficient importance to divert his attention even from the cruel grievances of the farmer; that is to say, his bill which proposes, notwithstanding the Cramton Act, which sought to bring within the Federal classified service all the field agents of the prohibition service, to empower the prohibition authorities to cover into that service all the prohibition agents who were in the prohibition field force when the Cramton bill became a law. And who, pray, are those men that are to be dealt with in this tender manner? The Senator from Michigan [Mr. COUZENS] knows, because he was a member of the Senate Civil Service Committee when the Cramton bill was reported from that committee to the Senate. Why, I venture to say that they constituted part of a body of men with a shadier record as a whole than any body of Federal employees that was ever covered into any branch of the civil service of the United States.

General Andrews himself testified before a Senate subcommittee in the spring of 1926 that out of a small force of a few thousand prohibition agents no less than 875——

Mr. REED of Missouri. One thousand five hundred.

Mr. BRUCE. That out of a small force of some 1,500 prohibition agents, some 875 graceless scamps—for that is what they were—were dismissed for either violations of the Volstead Act or for downright rascality in some other form.

After General Andrews testified to that effect some 600 more of the members of the prohibition field force were made to walk the plank for similar offenses. Indeed, I am sure the Members of this body will recollect the fact that shortly after General Andrew's successor, Mr. Lowman, came in, the latter said that his wrist was fairly tired with inditing dismissals of delinquent prohibition agents.

I said a few moments ago that prohibition could be enforced if the effort were made to enforce it in the same ruthless manner in which the Catholic Church in former ages successfully stamped out Protestantism in Spain and in other European countries; but I ought to annex a qualification to that statement, that is to say, provided prohibition enforcement does not develop so much corruption that it will perish in its own stench. We all know that we can use a mop for the purpose of mopping up a dirty floor until it becomes so foul that it loses its efficiency altogether. The same thing might well be true of agencies of prohibition enforcement, however multiplied or invigorated. Those who are charged with enforcing become so corrupted as they go along in their work that finally they become ineffective to do their work.

Just now the prohibition fanatics in my own State are clamoring for a State prohibition law, which our legislature has always been wise enough to refuse to pass. It has refused to pass any such State enforcement law because it knew that if it did the demoralization of our brave and honorable police force, one of the finest in the land, might follow. How wise have subsequent events proven the attitude of our people toward that subject to be!

I beg the Senate, if it can pluck up the courage not to avert its eyes, to look at Philadelphia, and to see what has been the result there of a liaison between the police department of that great city and the Prohibition Unit. The whole picture of the corruption worked by the connection between the two has not yet been disclosed, but enough has been revealed to show that, after all, the greatest obstacle in the way of the enforcement of prohibition is not lack of money, is not lack of courts, is not lack of law in any form, but the insidious, the ubiquitous corruption that is fostered in the human heart by such a statute as the prohibition statute, that is to say, an irrational statute that seeks to destroy innocent human happiness as well as excess, which insults the human reason, which wars on human nature, and has so far proved unenforceable because of its totally artificial and unnatural character, that makes it impossible for it to command the respect of even thousands of the most reputable men and women in the United States.

I heard the Senator from Tennessee say a few moments ago that prohibition was one of the truly effective agencies by which the success of Mr. Hoover was achieved in his State. If that is true, the conditions in his State were wholly exceptional, so far as my observation goes. In the State in which I live, I do not believe that a thousand wet Republicans voted the Democratic ticket, and there are many thousands of wet Republicans in the city of Baltimore and the counties of Maryland.

Mr. McKELLAR. Mr. President, if the Senator will permit me——

Mr. BRUCE. Just one moment, until I run my thought out. And why? Because those voters could not visualize any condi-

tions under which prohibition would ever be enforced, no matter who was President of the United States, whether it was Mr. Hoover or whether it was Governor Smith. They had no faith in its enforcement.

The trouble about enforcement at the present time is that the great mass of our people are not concerned about it one way or the other. The dry has the law, the wet has the liquor, and the prohibition agent has the boodle, and consequently more or less general contentment with the situation exists all around. But, all the same, this vile, mordant, depraving system of tyranny is undermining the foundations of our social life in the United States. That is what Dr. Horace Taft, a brother of ex-President Taft and the head of the Taft School in Connecticut, said a year or so ago, and when he said it, he was but speaking the truth.

I am not saying a thing that the overwhelming majority of this body does not know to be true. I challenge any man here to deny it. There are some men here, of course, who have never touched a drop of liquor in their lives or have ceased drinking, and they are sincere prohibitionists; but everybody knows that the main difficulty in extricating this country from the bog in which prohibition has landed it is the unwillingness of the majority of the Members of this body and of the other House to face any of the political risks that they might be called upon to face if they did anything, by voice or by vote, to alienate the good will of the prohibition fanatics of this country.

When a congressional ticket is named in our State we anti-prohibitionist Democrats vote for the candidate, if dry, because he is the party candidate and because we do not think that the prohibition issue has yet reached such an acute stage as to justify us in sustaining revolutionary relations to our party. But that is not what the dry Democrats in our State do. The great bulk of them refuse to support any candidate for Congress who happens to be an antiprohibitionist. They spare no effort to compass his defeat, even going so far, as the State superintendent of the Anti-Saloon League of the State of Maryland has frankly said, as to declare that they prefer an out-and-out wet who always votes dry to a "wishy-washy"—I use the very language of the superintendent—dry.

In my time the only dry Democrats who have ever been elected to Congress from the State of Maryland have been men who were wet in their habits, and every well-informed man in the State of Maryland knows it.

The truth is that this Anti-Saloon League is no moral organization; it is a political organization and, provided its minions vote as it desires them to do, it cares not what their personal habits are. Just as they are overjoyed to receive money from any source, whether it is from the purse of Sebastian Kresge or somebody else who enjoys a reputation different from his; with them it is always the end that justifies the means.

As long as the seats of the Members of Congress are kept more or less in jeopardy by the Anti-Saloon League it is idle to expect any modification or repeal of prohibitory legislation, until nonenforcement, and the oppression that nonenforcement produces, have reached such an extent that the stomach of the people of this country shall at last be turned and they shall rise up in such outspoken revolt or revolution as to strengthen the timid knees of the Members of this body and of the other House and make them feel that at any cost to their own political fortunes they must bring existing conditions to an end.

Now, before I take my seat I want to say just one thing more.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

Mr. BRUCE. I yield.

Mr. WALSH of Massachusetts. I understand the Senator to say that in his opinion the only effective way to enforce prohibition is to make it a penal offense to drink intoxicating liquor. Did the Senator say that?

Mr. BRUCE. I say that I think that we would have to organize a system of desperate tyranny in every respect to enforce it.

Mr. WALSH of Massachusetts. Is it not a fact that to make it a penal offense to drink intoxicating liquor would be very effective in enforcing the present law?

Mr. BRUCE. It may be; but, of course, juries under those circumstances might show the good sense that they have so often shown in their relations to excessively drastic criminal laws and refuse to bring in verdicts of guilty.

Mr. WALSH of Massachusetts. I want to ask the Senator if he ever knew of any sincere prohibitionist who has ever advocated making it a penal offense to drink intoxicating liquor?

Mr. BRUCE. Why, certainly. I turn to one of the Members of this body—I will not mention his name; he and I are very good friends—and, indeed, some of the men in this body for whom I entertain the highest measure of respect are prohibitionists, like my dear friend who sits beside me here, the Senator from Texas [Mr. SHEPPARD]. Several years ago I asked the Senator just mentioned, "Do you not believe that under some circumstances even capital punishment should be visited upon a violator of the Volstead Act?" Without one moment's hesitation he said, "Yes; I do." He was a prohibitionist of the strictest sort, and is doubtless ready now to make the taking of a drink of intoxicating liquor a penal offense.

Mr. WALSH of Massachusetts. I again ask the Senator if he knows of any proposal by any prohibitionist for a constitutional amendment or the enactment of a law that would make it a penal offense to drink intoxicating liquor?

Mr. BRUCE. It can not be done by legislation I imagine, under the eighteenth amendment.

Mr. WALSH of Massachusetts. Should not a person, sincerely in favor of prohibition, on the theory that intoxicating liquor is bad, a poison that ruins health and morals, to be consistent advocate legislation that would make it a criminal offense to drink intoxicating liquor for beverage purposes?

Mr. BRUCE. I think so; but I do not think that he could do it legally under the provisions of the eighteenth amendment, because I think that such a case falls outside of the pale of the eighteenth amendment. There is nothing in that amendment to authorize Congress to enact a law making the mere taking of a drink a criminal offense. Of course, to have liquor in one's possession is a criminal offense; to transport it is a criminal offense; to export it is a criminal offense, no matter how small the quantity.

Mr. WALSH of Massachusetts. Our Government does not forbid the making of many things that are notoriously harmful, such as firearms and even poisons. It does seek to regulate the distribution and sale of them. With intoxicating liquor it goes further than with all other harmful foods or liquids and forbids even the manufacture. It seems to me, if intoxicating liquors are so bad that they should not be manufactured, then the advocates of prohibition should go a step further and advocate the disuse by law of intoxicating liquors. Such a step would drive the hypocrites, who vote for prohibition and personally use intoxicating liquors, into the open and take from the propagandists for prohibition that support without which they could not maintain a majority vote in the country.

Mr. BRUCE. That brings back to my mind a thought that I was about to ignore. In point of fact the Government has never undertaken to break into the private home for the purpose of suppressing home brewing. Of course it may, with a search warrant, enter a private home if it has good reason to suspect that any wine or other liquor in it has fermented to such an extent as to exceed one-half of 1 per cent of alcoholic content. General Andrews disclaimed any intent to enter the private home, and said it should be done by State authority and not by Federal authority. Of course he did not want to burn his fingers with such a hot brick as entry into a private dwelling; but to my mind, everything points to the day, and no distant day at that, when as the last stage in the march of prohibition tyranny the Government will undertake to enter the private home for the purpose of bringing to an end home brewing or the possession of liquor in the home in any form.

Mr. EDGE. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. ROBINSON of Indiana in the chair). Does the Senator from Maryland yield to the Senator from New Jersey?

Mr. BRUCE. I yield.

Mr. EDGE. The Senator has referred several times to the statement of Doctor Doran, to which I also saw some reference in some newspaper articles. Has the Senator placed in the RECORD the actual statement of Doctor Doran and where it occurred?

Mr. BRUCE. The Senator from South Carolina [Mr. BLEASE] has saved me the trouble of doing it by a few days ago placing that statement in the RECORD, as I remember.

Mr. EDGE. I simply make the suggestion that we should have it in the RECORD.

Mr. BRUCE. I shall be very glad to have it placed in the RECORD if the Senator from South Carolina has not already done so, but I am sure that he has done so.

When I was summarizing the agencies to which the Prohibition Unit would have resort in order really to enforce prohibition, I neglected altogether to say that one that it must by no means eschew is the entry into the private home, especially, now, as I trust, that we are going to supply the Prohibition Unit with such a generous sum as $300,000,000. Just think how effectively a part of that sum could be used in bribing servants or in bribing estranged relations or in bribing dishonorable guests of the householder in whose dwelling wine is fermenting or beer is being brewed, to betray the householder.

Why, not a great many years ago we had a fire of unprecedented magnitude in the city of Baltimore, which swept out of existence a large part of the buildings in the business district of that city. It was really a most interesting thing to note the strange and unexpected objects of one sort or another which the ravages of that fire divulged. It requires no imagination to realize how interesting it would be if only all wine, beer, and other liquor containers were made of noninflammable material, should a great fire sweep over the residential portion of one of our great cities and lay bare the contents of the cellars of those residences. In the large percentage of them would be found barrels of fermented wine—wine which in many cases had been manufactured under the skillful supervision and direction of some gentleman from the State of California who had supplied the grape juice—and also beer and other intoxicating beverages.

I have said in this body over and over again that even should the Federal Government bring to an end the smuggling of liquor into the United States and the diversion of alcohol from business to bootlegging, and, indeed, succeed in staunching every other source of supply except the home, its work would not be half done. It would not be fully done until it had invaded the sanctity of the home and used congressional appropriations for the purpose of inducing the servants, relations, and guests, to say nothing of the personal enemies of the householder, to tell what they knew about the habits of the householder in his own home. That is what we are being led up to.

I predict now that the effort to enforce prohibition in the United States will finally culminate as similar efforts have done in Finland, one of the four remaining countries in the world that has not spewed prohibition out of its mouth. The day will come when prohibition agents, with search warrants, will be breaking down the outer and inner doors of private dwellings and opening up barrels, casks, bottles, and other containers in the cellars of their owners. That is what has already happened in Finland. There we have witnessed all the characteristic evils and abuses that have never failed to result from prohibition wherever it has been tried; and now, having endeavored in every other way, just as we have been endeavoring in almost every other way in the United States, to bring violations of prohibitory legislation to an end, the Finnish Diet has recently enacted a law authorizing prohibition agents in Finland on mere suspicion to break into the private home.

No, Mr. President, make no mistake, the Members of the Senate and of the other House as well are being slowly drawn into the jaws of one of the most detestable and monstrous systems of tyranny that the world has ever known, and are all the more detestable because it is so hopelessly repugnant to those constitutional principles which until recent years have been so sacred in the eyes of our people. The truth is that through political timidity or what not, the intelligence of Congress, the independence of Congress, the courage of Congress are gradually becoming enslaved, nothing less than enslaved, to the Anti-Saloon League. Here only a few days ago, emboldened by the election of Mr. Hoover—in my judgment from many points of view, one of the most lamentable events ever known to American history—all the prohibition organizations of one sort and another, the Anti-Saloon League, the Women's Christian Temperance Union, and the rest, some thirty or more in number, have come together in the city of Washington in the early stages of the present session of Congress, and have consolidated themselves into a single association known as the National Conference of Organizations Supporting the Eighteenth Amendment for the purpose of bullying and browbeating Congress whenever the occasion arises.

Take my word for it, the pressure to which we have been subjected by Wayne B. Wheeler and the Anti-Saloon League heretofore will be but as the pressure of a silken glove compared with the pressure of a steel glove when this new organization gets fairly down to its tasks.

Prohibition is bad enough in itself, but it is even worse in some of the collateral results that it produces. To it more than to anything else do I refer this hateful, this abominable recrudescence of sectarian bigotry, which was, after all, the determining influence in bringing about the election of Mr. Hoover at the recent election. Wounds were inflicted at that election which I fear will not cicatrize for generations to come. It implanted a spirit of rancor in the breasts of our people such as I have never known in all my life and which I have never known in American history except through my reading of the outrages perpetrated under similar proscriptive conditions on the eve of the Civil War by the Know Nothing Party. Sooner or later the people of this country will find that their acquiescence in the extreme demand for prohibition will not only cost them a large measure of their civil liberty but a far larger measure than any free people can afford to give up, of that measure of religious freedom which in the past has been perhaps our most precious possession.

However, it is time for me to bring these remarks to an end; I had no idea that I would say as much as I have; but, in taking my seat, I again repeat that either we must put up with the condition of prohibition nonenforcement that now prevails in this country, or we must allow prohibition to fall into a condition of lifeless neglect, or we must organize a vast, highly organized, despotic, merciless system of tyranny sufficient to cope with even the most devoted and enthusiastic measure of loyalty and attachment that the human breast has ever given to the cause of human liberty.

Mr. SHEPPARD. Mr. President, I appreciate beyond measure the kind personal references of the Senator from Maryland [Mr. BRUCE] to me, although I differ from him fundamentally on the subject of prohibition. I deem it but fair to the prohibition authorities to give the prohibition enforcement record for the past year. During the fiscal year ending June 30, 1928, there were 75,307 arrests of prohibition law violators.

Mr. BRUCE. Oh, yes.

Mr. SHEPPARD. Automobiles were seized to the number of 6,394, with a value of a little over $3,000,000. Eighty-one boats were seized, having a value of about $144,000. About 78,000 prohibition cases were concluded in the Federal courts. The convictions numbered 58,813. Jail sentences were imposed to the number of 15,793. The aggregate of all sentences imposed amounted to 5,631 years 6 months 24 days, while fines were exacted which reached the total of $7,031,109.66.

Mr. EDGE. Mr. President, will the Senator permit an interruption at that point?

Mr. SHEPPARD. Certainly.

Mr. EDGE. Does the Senator attribute the increased fines or increased arrests, as I assume the figures indicate, to greater violations or more determined effort at enforcement?

Mr. SHEPPARD. It may be that both elements played a part. It is difficult to say in what proportion.

In addition to sentences already mentioned, 652 persons were placed on probation for five years each. There were 4,627 suspended, paroled, and probated sentences, totaling 2,665 years. Fines were suspended to the number of 1,359, totaling $381,049.50.

In comparison it will be interesting to recall the figures for the fiscal year ending June 30, 1927. There were 64,986 arrests in that fiscal year—the year preceding the last one. There were 7,139 captured automobiles, with a value of $3,529,296.70. There were 353 boats captured, with a value of $316,323. The prohibition cases in the Federal courts numbered 51,945, convictions 36,546. Of those convicted, 11,818 received jail sentences. The aggregate of sentences received was 4,477 years, and of fines, $5,775,223.48.

These figures show a more effective or extensive enforcement in the fiscal year ending June 30, 1928, than in the fiscal year ending June 30, 1927. To what extent the difference would be accounted for by increased violations—again referring to the inquiry of the Senator [Mr. EDGE]—I am, of course, unable to say. However, it is gratifying to know that the figures I have given indicate an increased and more comprehensive activity on the part of the prohibition enforcement authorities.

As to the matter of dismissals for corruption among prohibition officials, some months ago I discussed that matter in the Senate, showing that the total number of dismissals for all causes among the prohibition forces of the Treasury Department was 1,135 out of about 15,000 employees through a period of seven years. That amounted to about 8 per cent on the average, or a little more than 1 per cent a year.

Mr. REED of Missouri. Does that cover the turnover or the resignations?

Mr. SHEPPARD. That, as I understand, covers the turnover and the resignations. However, I do not want to be understood as insisting that my statement is absolutely accurate; it represents my understanding.

Mr. President, no matter what may be said as to deplorable conditions in connection with prohibition in certain sections of the country, I think it can not be denied that on the whole prohibition has been a tremendous blessing to this Republic. One of the most heartening statements as to the effect of prohibition comes from Evangeline Booth, a Salvation Army leader, in a recent issue of a prominent periodical. Evangeline Booth is a leader of an organization that is in touch with those elements of the American people who have been vastly helped by prohibition. She says that before prohibition there were eight licensed saloons in every block of a large notorious district in one of our greatest cities, and, in addition, numerous

speakeasies, brothels, questionable dance halls, and dives of every kind. Now, she says, the Salvationist in command in the district reports that, with the disappearance of licensed houses, the number of drinking places has been vastly reduced, the customers of which are practically all old men who are satisfying old cravings formed before prohibition. She adds that a young drunkard is now seldom seen among the homeless men in the district.

It is her further statement that in 1913, in another large city, more than——

Mr. BRUCE. Mr. President, may I interrupt the Senator for just a moment?

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Maryland?

Mr. SHEPPARD. Certainly.

Mr. BRUCE. Mr. Crabbe, the superintendent of the Anti-Saloon League in Maryland, states in the Baltimore Sun this morning that 85 per cent of the youth of Baltimore, young men and young girls, flout prohibition. That would hardly seem to square with the confident statement with which Evangeline Booth is credited.

Mr. SHEPPARD. I do not see that the statement of the Senator from Maryland contradicts what has been said here. What the Senator said refers to the opinion of certain young people; the statement here refers to habit.

Mr. BRUCE. Has not the Senator's experience shown him that opinion is pretty apt to be followed by conduct in accord with it?

Mr. SHEPPARD. I differ from that opinion. I do not think it necessarily follows that conduct throughout the country would conform with a statement of that kind. I think that, on the whole, the young people of the country are far soberer and far less addicted to alcoholic indulgence than they were before prohibition. The statement I am discussing had reference to a particular district, and Evangeline Booth says that what drinking is now done there seems to be confined to the older people who acquired the craving before prohibition and that it is very seldom that a young drunkard appears among the homeless men in that district. I think this is a very significant statement and that it is characteristic of conditions throughout the country in general.

Mr. BARKLEY. Mr. President——

Mr. SHEPPARD. I yield to the Senator from Kentucky.

Mr. BARKLEY. If the Senator from Maryland is correct in the statement that habit always follows opinion, it would be most unfortunate if that were true in his case, would it not?

Mr. BRUCE. There are exceptions to all rules. There are some men who have the supreme strength of character and intellect to lift themselves out of the enslaving influences of opinion.

Mr. BARKLEY. The Senator, then, is one of those who is not willing to act according to his own opinion.

Mr. SHEPPARD. Mr. President, the fact that so many thousands and millions did not have the strength of character to resist a habit-forming drug was one of the reasons for the adoption of prohibition.

Miss Booth says further that in 1913, in another large city, more than 80,000 men squandered their week's wages on Saturday nights in 1,200 saloons—the money needed for the upkeep and shelter of their impoverished families. Later in the night drunken men and women were to be seen everywhere. On some occasions as many as 25 or 30 would be brought into the Salvation Army quarters on stretchers and furnished coffee until sobered. Such scenes, she says, do not occur in any American industrial center to-day.

She says again that since prohibition "whisky row" in Packingtown, near the Chicago stockyards, containing about 15 saloons, has given place to the Packingtown day nursery, while other former saloon quarters have been turned into barber shops and automobile salesrooms.

She asserts that vice has not vanished in the country, but that it is less bold than it was before prohibition; that places for drunken women to sleep until sober existed in all the large cities before prohibition, but have now disappeared on account of the lack of patronage. Women degraded almost beyond regeneration by drink, clad in rags and tatters, still are sheltered, she says further, in Salvation Army homes in certain foreign cities. This type, she adds, can not now be found in America, although it existed before prohibition.

Drinking in America has tremendously lessened since the advent of prohibition. The Salvation Army has done away with its 10 and 15 cent lodgings since prohibition, because there are no longer men to occupy them. The so-called "bum" is becoming a thing of the past. Rooms and jobs provided by the Salvation Army are no longer sought by swarms of drunken wrecks. The Salvation Army now has more time to devote to helpless children—children helpless from some other cause than drink taken by themselves or their parents. She adds that less misery is to be found in the homes of the poor to-day than before prohibition, and that through prohibition tens of thousands of homes have been reestablished.

Mr. President, I am entirely willing to vote an additional amount for prohibition enforcement, any amount that may be needed; but I should not want my vote to that effect to be taken as an intimation that I consider that prohibition under the present degree of enforcement has not been of colossal benefit to this Nation.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

Mr. SHEPPARD. In a moment.

I want to make it clear also that it is not my information that the department, in its regular estimates, asked for the large amount added recently by the Senate. Can the Senator from Wyoming advise me as to how much was asked in the official estimates of the Budget?

Mr. WARREN. Thirteen million five hundred thousand dollars was asked directly. There is also $59,482,853 for the Coast Guard as reported now; while, in 1919, $7,533,335 was given the Coast Guard for all purposes. All of this amounts to about $67,000,000, without some smaller amounts coming in from other places in the other bills; so that we are a long way over $50,000,000 already in our expenses in support of prohibition.

Mr. SHEPPARD. There was no official request for the amount that was moved by the Senator from Maryland. As I understand, in the course of the hearings, Doctor Doran expressed it as his personal opinion that it would require something like $300,000,000.

Mr. WARREN. We had no official knowledge whatever of that. All we knew about it was that the other day, rather hurriedly, this amendment went into the bill on the floor of the Senate; but officially or privately, for that matter, as to the policy or as to the amount, we heard nothing from anybody, anywhere.

Mr. HARRIS. Mr. President——

Mr. SHEPPARD. I yield to the Senator from Georgia.

Mr. HARRIS. The Senator from Texas understands that when the head of a department or the chief of a bureau asks more than the President suggests he might get into trouble. The President gave instructions to that effect. Mr. Doran did say that it would take nearly $300,000,000 to enforce prohibition properly. He did not, however, request the appropriation of that amount, because he knew that the President might not approve.

Mr. BRUCE. Mr. President, may I interrupt the Senator?

Mr. SHEPPARD. Certainly.

Mr. BRUCE. Now that the words of Doctor Doran have been referred to, I should like to quote his exact language, as reported in the Washington Daily News and other papers immediately after they were uttered.

He said, under date of Wednesday, December 5——

Mr. REED of Missouri. Where did he say it?

Mr. BRUCE. He said it before the members of the House Appropriations Committee.

Mr. SHEPPARD. It was in the course of a hearing, was it not?

Mr. BRUCE. Yes; in the course of a hearing before the House Appropriations Committee in connection with the present bill, the Treasury and Post Office Departments appropriation bill. Doctor Doran said—and this is in quotation marks:

> It is a matter of policy whether Congress wants to embark in the police business with regard to prohibition. If it does, it will take $300,000,000 and a system of United States courts covering the land.

Mr. SHEPPARD. Does he say for what period of time the $300,000,000 is to be appropriated?

Mr. BRUCE. I do not know that he says so expressly, but inferentially it is impossible that he could have had in his mind anything except annual appropriations.

The text of this newspaper report says:

> Members of the House Appropriations Committee frequently expressed impatience as Prohibition Commissioner Doran told them his original estimate had been cut $106,000 by the Budget Bureau. Both Republicans and Democrats suggested that real enforcement would cost many more millions, and urged a survey of all Government activities to ascertain what the bill would be for a more effective enforcement.

Of course, he could not have meant anything but annual appropriations, because our fond prohibitionist friends believe that the prohibition law is going to last forever; and, making any reasonable estimate of what "forever" means, it is per-

fectly apparent that even if the annual appropriations were much less than $300,000,000, the total of $300,000,000 would be very soon arrived at.

Mr. SHEPPARD. What I wanted to make clear was that the official estimates through the Budget did not call for the amount which Doctor Doran stated in his opinion would be essential.

Mr. BRUCE. No; about $106,000 less.

Mr. REED of Missouri. Mr. President, that only emphasizes the fact that the Government has cut its official estimate far below the amount which the responsible officer says is necessary.

Mr. SHEPPARD. I wanted to make clear the exact manner in which this $300,000,000 statement had gotten into the record. It seemed to be the opinion of some that the official estimates called for that amount.

Mr. REED of Missouri. If the official estimate is deliberately cut below the necessities of the case that only aggravates the situation.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Massachusetts?

Mr. SHEPPARD. I yield to the Senator.

Mr. WALSH of Massachusetts. In view of the Senator's very sincere interest in the question of prohibition—and no man has given more attention to all aspects of the subject than he—in view of the closeness with which he has followed the attempts to enforce the law, I should like to ask him if, in his opinion, the enforcement at the present time is satisfactory?

Mr. SHEPPARD. I should not say it was entirely satisfactory.

Mr. WALSH of Massachusetts. So I assume the Senator would vote for an increased appropriation?

Mr. SHEPPARD. I said I should be entirely willing to vote for an increased amount, or any amount that would be found to be necessary, but I did not want my action in doing so to be construed as an intimation that prohibition had not, as a whole, been so enforced as to be of immense value to the country. If still better results will follow larger appropriations, by all means let us have such appropriations.

Mr. REED of Missouri. Is the Senator willing to vote for the $300,000,000 that Doctor Doran says is necessary?

Mr. SHEPPARD. Yes.

Mr. REED of Missouri. That is what I wanted to know.

Mr. BARKLEY. Mr. President, I have no desire to detain the Senate in a discussion of the merits of this law at this particular time, but inasmuch as I intend to vote against this conference report I desire to explain my attitude with reference not only to the suggestion of the Senator from Georgia [Mr. HARRIS] but another matter in which I am interested also.

I have always been taught somewhat to adhere to the old adage, "Beware of the Greeks bearing gifts," and I am afraid that the distinguished, scholarly, and charming Senator from Maryland [Mr. BRUCE] in this particular instance is a Greek. He has offered this amendment appropriating something like $300,000,000 for the purpose of enforcing prohibition, and he has consumed an hour of our time telling us that it can not be enforced except by the revival of the Spanish Inquisition. Therefore, I presume, logically, his amendment means that the $300,000,000 is to be spent for the purpose of reviving the Spanish Inquisition in the United States.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield to the Senator from Tennessee.

Mr. McKELLAR. The Senator talks about "the Greeks bearing gifts." Does he recall the fact that several years ago the distinguished Senator from Missouri [Mr. REED]—one of the ablest and finest men we have ever had in this body, but who, unfortunately, is an antiprohibitionist—introduced and passed a bill known as the anti-interstate shipment bill, which is one of the most valuable prohibition laws, I think, that we have ever passed?

Mr. BARKLEY. I recall that fact.

Mr. McKELLAR. So it strikes me that it makes no difference who introduces a measure; if it is a good measure, if it is a measure that will bring about a better enforcement of the law, I am going to be for it.

Mr. BARKLEY. I agree with that suggestion; but there are all sorts of Greeks.

Mr. REED of Missouri. Mr. President, let me ask the Senator if he ever saw two prohibitionists meet without thinking of the other old Greek adage?—

Whenever two soothsayers meet, they always smile.

Mr. BARKLEY. I am glad to have the suggestion of the Senator from Missouri that a prohibitionist may smile occasionally.

When this amendment was inserted in the Constitution it contained a provision which no other amendment to our Constitution contained, and that was that the States of the Union should have the power, concurrently with the power of Congress, to pass legislation for the enforcement of the eighteenth amendment. Whether that provision, exceptional as it was, was a wise provision may be open to very serious question, because it has been a habit of the people of the United States that whenever the Federal Government entered any field of law enforcement, the States themselves withdrew and left the field to the Federal Government. Although the eighteenth amendment carries with it the authorization, which I think includes also the obligation, on the part of each State to provide for the enforcement of it, some of them, like the State of Maryland, have not passed any law providing for State enforcement. It may be said also that some of the States which have passed statutes providing for the concurrent enforcement of the eighteenth amendment have not exercised very great diligence in the enforcement of their own laws; and, as a result, the Federal Government has borne almost alone the burden of attempting to enforce the eighteenth amendment.

If the States are to withdraw from their concurrent obligation, and leave the field entirely to the Federal Government, there is not any sort of question but that there is not enough money now being appropriated for the purpose of enforcing the prohibition law, and there are not enough enforcement officers in the country if the Federal Government is to bear the burden by itself.

Mr. REED of Missouri. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kentucky yield to the Senator from Missouri?

Mr. BARKLEY. I yield to the Senator.

Mr. REED of Missouri. I am interested in the Senator's statement that many of the States have practically ceased to attempt to assist in the enforcement of prohibition. Is that the condition in the State of Kentucky?

Mr. BARKLEY. No, sir; it is not; and I think also that in the State of Kentucky the law, as a general thing, is observed and enforced as completely as in almost any State of the Union.

Mr. REED of Missouri. With the qualifying statement, that may be correct. I was going to say that if the Senator had stopped before he put in the last clause it had not been my experience when I visited his State recently.

Mr. BARKLEY. Of course, I do not know what the Senator's experience was when he visited our State.

Mr. REED of Missouri. I met some of your most distinguished citizens.

Mr. BRUCE. And, Mr. President, may I say it does not accord with the last report of Mrs. Willebrandt, either, which says that one-third of all the stills and distilleries that were broken up in the United States last year were broken up in six or so of the Southern States, including Kentucky.

Mr. BARKLEY. That may be a tribute to the activity and the energy of our local enforcement officers. Moreover, it is a pleasure to learn that the distinguished Senator from Maryland finds himself in agreement with Mrs. Willebrandt on one occasion.

Mr. BRUCE. It is not a question of agreement; I accept her statement as being true. No; it was disappointing to me, because I knew that two or three years before 70 per cent of all the distilleries and stills broken up in the United States were broken up in the old 11 Confederate Southern States.

Mr. BARKLEY. That is no proof that there are more of them existing there. It may be proof of greater diligence on the part of the enforcement officers.

Mr. BRUCE. That diligence must be inspired by increased persistency of appetite.

Mr. BARKLEY. No, Mr. President; the enforcement officers do not break up a still by any increase in their appetite.

Mr. REED of Missouri. Mr. President, I wanted to follow what I was asking the Senator. I wanted to say to the Senator that if I have not been misinformed by far the largest number of convictions in the State of Missouri have been had in the State courts. Indeed, it was stated to me from one large rather representative county that the Government had, I think, prosecuted only one case and that the State had brought about a large number of convictions; I will not undertake to say the number.

As to this argument advanced by the Senator from Kentucky, and also advanced by the Senator from Texas, namely, that there has been an enormous number of convictions, that men have been sent to the penitentiary for aggregate sentences of thousands of years, and so on; the argument from that, then, is that prohibition is a success. That reminds me of the story of the two old Irish ladies who were sweeping out their back

doors, and one of them said, "Mrs. McGinnis, you see that I have the cleanest house; I have the largest pile of dirt"; entirely forgetting the fact that she had to get that dirt out of her house.

Mr. BARKLEY. It is a tribute to her that she made an effort to get it out, and I think it is more laudable to have gotten it out than to have left it scattered about her house.

Mr. REED of Missouri. But it proved it was there; and the fact that you made these arrests does not prove that you have at all minimized the evil.

Mr. BARKLEY. I am not making the contention that the increase in the number of arrests proves a satisfactory enforcement of the eighteenth amendment or the Volstead Act any more than I am making the argument that the increase in the number of arrests for murder in the city of Chicago is any proof of the fact that the law against murder is being more thoroughly enforced out there, or anywhere else, as far as that is concerned. We might make the same sort of argument against any law on the statute books, that because it is not being enforced completely, it therefore ought to be repealed and is not a success.

The distinguished Senator from Maryland, whose position on this question we all thoroughly understand, looks rather dolefully upon the outlook, because he says that in order to enforce this statute and this amendment to the Constitution we must destroy all of our liberty. I recall that after Patrick Henry had made probably the most fervent speeches in the Continental Congress, and in other assemblies held prior to the American Revolution, in favor of the Revolution, having uttered those words which have been memorized by every schoolboy, and which were no doubt the inspiration of every Continental soldier, "Give me liberty or give me death," when, after eight years of bloody war, independence had been won and the Constitutional Convention had met in Philadelphia and had submitted the Constitution, and that document, which Gladstone described as the greatest that ever fell from the mind of man at any given time, was submitted to the convention in Virginia, it was the same Patrick Henry who said that if that constitution were ratified, and a nation were formed under it, the people who had spent eight years winning their liberties would thereby lose all of them; but in spite of his doleful prediction we have lived under that Constitution for 150 years, and have become the greatest and most prosperous and most influential nation in the world; and, at the same time, the most liverty-loving and liberty-enjoying nation. So I am not at all disturbed or distressed by these doleful predictions of the loss of our liberty because some law that the people have demanded Congress or the legislature to enact is to be enforced or observed in this country.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. McKELLAR. In connection with the Patrick Henry incident, it will be recalled that Mr. Henry was elected a delegate to the Constitutional Convention, but did not attend, even after his wonderful speech in behalf of liberty.

Mr. BARKLEY. I cited that incident simply as an outstanding instance where the predictions of men as to the loss of human liberty by the observance of law have not been justified, and I do not think that the predictions of the Senator from Maryland will be any more justified than were those of Patrick Henry in the convention of Virginia.

Mr. BRUCE. Mr. President, the Senator from Kentucky will admit, however, that it was not until after all the bloodshed and ruin of the Civil War that Patrick Henry was deemed a false prophet in his State.

Mr. BARKLEY. That may have been due to the rancor and prejudice immediately following the Civil War, but I doubt if Virginia would go on record now as saying that Patrick Henry was a false prophet.

Mr. BRUCE. No; thank God, no. But, after all, the Senator from Kentucky must admit that if Patrick Henry was not a prophet, he was a near prophet, because, going back to my own boyhood, I recollect the time when very generally the feeling of the southern people, certainly of the people of Virginia, was that Patrick Henry had, with the eye of an Isaiah or Jeremiah, correctly prophesied the practical workings of the Federal Constitution as it was construed by the enemies of the South, as they were deemed at that time.

Mr. BARKLEY. That construction, however, is not the construction the American people now place upon the Constitution, and upon the very articles and provisions which Mr. Henry criticized so severely.

Mr. BRUCE. No; that is so, and I am glad it is so.

Mr. BARKLEY. Mr. President, I am not on my feet for the purpose of declaring my belief that the enforcement or the observance of the eighteenth amendment has been entirely satisfactory. I would not be frank with myself and with my constituents and with the people if I should make any such statement as that. But one of the troubles has not been necessarily a lack of money, although I do not think that enough money is being appropriated for this particular purpose. One of the things which has encouraged the violation of this law has been the attitude of outstanding public men, who, in their position in the public, have, probably unwittingly, but nevertheless effectively, discouraged the observance of the law, and have encouraged its violation by those who by nature are inclined to violate it.

It has been also intensified in some places by the character of men who have been appointed to enforce the law. Not only, in my judgment, do we need more money, although I do not think we need to jump from $13,000,000 to $300,000,000 overnight, as suggested by the Senator from Maryland; not only do I think we need more money, not only do I think we need more enforcement officers but we need a character of enforcement officer who is in sympathy with the law, and not appointed for political purposes, on the recommendation of some man whom he has helped elect to office. Whenever we have enough money to enforce the law to employ enough men who are more interested in the enforcement of the law than they are in serving some public officer to whom they may be under obligations, and who himself may not be in sympathy with it, I think the greater will be the enforcement, and the observance and respect of the people for it.

I am going to vote against this conference report not only on this ground, in the hope that a more adequate amount will be obtained, not the amount included in the Senator's amendment, because I am frank to say that I think if we were to give the enforcement department $300,000,000 now, they would not have the facilities with which to use it, and they would not know what to do with it, and a large amount of it would be wasted; but I do think there ought to be a larger amount appropriated than is now provided for in the bill as it comes back to us from conference.

Mr. HARRIS. The Senator understands the Prohibition Bureau would have six months and a half before this money would be available, and they could get ready for the expenditure of a reasonable amount.

Mr. BARKLEY. They could undoubtedly get ready for more money, but I do not know whether they could get ready for $300,000,000 or not. I doubt whether the Senator himself would be in favor of that much of an appropriation.

Mr. McKELLAR and Mr. REED of Missouri addressed the Chair.

The PRESIDENT pro tempore. Does the Senator yield; and if so, to whom?

Mr. BARKLEY. I yield first to the Senator from Tennessee.

Mr. McKELLAR. The Senator understands that if this conference report is voted down, then the conference committee could agree upon any amount between $13,500,000 and the $270,000,000 that was authorized in the bill, and for that reason it ought to go back to the committee.

Mr. BARKLEY. I understand that; but if the amount is to be increased—and I think it ought to be increased—the conference committee itself, and the Appropriations Committees of both Houses, possibly, would like to have some guide as to the actual amount of money needed over and above what is carried in the bill.

Mr. REED of Missouri. Mr. President——

Mr. BARKLEY. I yield.

Mr. REED of Missouri. It is a little late now, but I simply wanted to inquire of the Senator if he had ever known any department of this Government that did not manage to spend all of the money that was appropriated?

Mr. BARKLEY. Probably the Senator's question is entirely apropos, but sometimes money is spent unwisely, and if we give them more than they actually need, I think the tendency would be still stronger to spend it unwisely.

Mr. SACKETT. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield to my colleague.

Mr. SACKETT. I understand the Senator feels that the department is not prepared to spend this great amount of money, but the able Senator from Maryland has just disclosed a place in which we are well prepared. He has gone into great detail and shown that in the southern district of New York, if we had $50,000,000 and 12 courts and 1,500 prohibition officers, we could enforce the law there; that we are prepared there to make an experiment as to whether this could really accomplish the desired result. That is only $50,000,000, compared with $300,000,000, and it might be a very good thing for this Govern-

ment to undertake that experiment, which is already prepared, and reduce the amount from $300,000,000 to $50,000,000.

Mr. BARKLEY. I agree with my colleague, and I think it would be worth the money if we were to spend $300,000,000 in an honest effort, through the agency of honest men, fearless and courageous, to enforce this law; we would certainly be able to ascertain, as the Senator from Maryland says, whether it could be enforced.

Mr. REED of Missouri. I understand it is the implied agreement that this experiment is to be tried in some district in New York, not in my State.

Mr. SACKETT. That was the suggestion that appeared in the remarks of the able Senator from Maryland.

Mr. BARKLEY. I think there was another hint in the suggestion of the Senator from Maryland, that a considerable amount of this money would go for corrupt purposes. I would not want to be understood to approve the appropriation of $300,000,000, or any other sum, for any such purpose as that.

Mr. BRUCE. Not for corrupt purposes. I suggested it might be used in the employment of an additional corps of spies and informers and snoopers, such as now are being employed on a large scale by the Government.

Mr. BARKLEY. Am I to understand that the offering by the Senator of that amendment is an evidence of the fact that he is in favor of snoopers and spies?

Mr. BRUCE. Not at all; that I have gotten to the point where I am being swept away by an irresistible current of mad fanaticism which I am entirely unable to stem.

Mr. BARKLEY. The Senator offers the amendment, then, for the purpose of undertaking to accomplish a purpose with which he is actually not in sympathy?

Mr. BRUCE. Oh, no; I think this law should be enforced, if it is going to remain on the statute books.

Mr. BARKLEY. It is undoubtedly going to remain.

Mr. BRUCE. I do not think it can be enforced except by some such tyrannical means as this.

Mr. GLASS. May I ask the Senator, why waste $300,000,000 if it is going to bring about that result?

Mr. BRUCE. The Senator did not hear me some time ago.

Mr. GLASS. Yes, I did.

Mr. BRUCE. I admit you can organize repressive machinery——

Mr. GLASS. An inquisition.

Mr. BRUCE. Yes.

Mr. GLASS. But is the Senator in favor of the inquisition?

Mr. BRUCE. I would rather have it than this present condition, under which the country is simply reeking with crime and general lawlessness.

Mr. GLASS. I do not know anything that could be worse than the consequences of enforcing prohibition described by the Senator from Maryland. If those consequences are to ensue, why on earth would he favor wasting $300,000,000 to bring about a result of that kind?

Mr. BRUCE. My view was that it would not be wasted. With $300,000,000 a year, accompanied by courts covering the land, and by laws making the most trivial violation of the Volstead Act a felony, and by additional legislation providing that after four violations of the Volstead Act the violator should go to the penitentiary for life——

Mr. GLASS. Is the Senator in favor of all that?

Mr. BRUCE. Of course, I am not.

Mr. GLASS. Then why spend $300,000,000 to accomplish it?

Mr. BRUCE. Because you can enforce prohibition only by extinguishing the last spark of resistance in the human breast to its workings. The point I am making is you have to pay that price. I do not say that the thing is worth that price. It is not; but I say that you will have to pay that price to get it, and we will all come to that conclusion later on. In no other way, I am afraid, can public opinion in this country be sufficiently aroused to modify or repeal the eighteenth amendment.

Mr. GLASS. As it seems to me, the Senator is arguing against his own proposition.

Mr. BARKLEY. The Senator from Virginia has not just discovered that fact, I hope?

The PRESIDENT pro tempore. The hour of 2 o'clock having arrived, ordinarily the unfinished business would be laid before the Senate. Inasmuch as the motion made by the Senator from Wyoming is a privileged motion, the unfinished business, without prejudice, will not be laid before the Senate, and debate on the motion of the Senator from Wyoming will continue.

Mr. BARKLEY. Mr. President, there is one other reason why I am opposed to the adoption of the conference report. Last Friday I offered an amendment to appropriate an additional sum of $32,325 to the Public Health Service for the purpose of rural sanitation. The current year appropriation for that purpose is $417,000. That amount was largely increased because of the prevalence of disease and sickness and epidemic following the floods in the Mississippi and Ohio Valleys and in the valleys of other rivers throughout the country, particularly the valley of the Kentucky and the Cumberland and other rivers in eastern Kentucky. The Appropriations Committee of the House reduced that amount from $417,000 to $215,000. The Budget Committee entirely eliminated it. My information is that the President compelled a restoration of $85,000 of it, and that in the House the committee itself restored $130,500 more, making the appropriation as carried in the House bill $215,500.

When this estimate was made up it did not take into account the fact that in Kentucky the rivers that were flooded in 1927 were reflooded in 1928, and while the loss of life was not so great and the floods were not so spectacular in loss of property and in health conditions produced by the floods, nevertheless they were just as disastrous as the floods of 1927.

Mr. WARREN. Mr. President——

Mr. BARKLEY. I yield to the Senator from Wyoming.

Mr. WARREN. I may say to the Senator from Kentucky that I think he will have no difficulty in getting what is thought proper at a later date, but the House conferees take the ground that sufficient appropriations had been made to cover the ravages of the flood to which the Senator refers, and that appropriations relating to the later flood conditions should be brought in in a later bill. The committee was without knowledge concerning the existence of the later flood and the suffering involved; but if it is such an emergency as the Senator suggests, the place to take care of it will be in the urgent deficiency bill, which will be made up and which will reach this body some time before or immediately after the recess.

Mr. BARKLEY. Mr. President, I appreciate the statement of the Senator from Wyoming. I merely wanted the Senate to understand the reason why the amendment had been offered is that the floods which occurred in November and at other times during the recent fall in Kentucky were not taken into consideration by the Public Health Service in asking for the $130,000 additional appropriation. In some of the counties of east Kentucky to-day there are as many as eight diseases which are in epidemic form, and if this appropriation is cut off it means a loss of life to such an extent that it would be appalling, because not only have those flood conditions brought about those diseases but other conditions which I need not take the time of the Senate here and now to describe. Crops have been destroyed, industry has been paralyzed, and the people in those sections are not at this time in a position to meet the demands entirely by their own means and substance. Therefore, I feel compelled to vote against the adoption of the conference report in the hope that if it goes back to the conferees this item may be reinserted. If, however, we are unsuccessful in obtaining it, though it ought to be obtained now, I shall make every effort in my power to have it included in a subsequent bill.

Mr. EDGE. Mr. President, I have no desire to delay consideration on the part of the Senate of the conference report, but there seems to be no indication that a vote will be permitted. Certainly with several Senators now endeavoring to secure the floor the time seems to be quite indefinite for a vote. If I may have assurance that a vote will be taken at once, I will gladly yield the floor for that purpose. Otherwise, in view of the fact that I gave public notice that I proposed to address the Senate to-day on another subject, I desire to take this opportunity to do so unless, as I have already indicated, unanimous consent can be secured that we may vote upon the conference report immediately.

Mr. HEFLIN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from Alabama?

Mr. EDGE. I yield.

Mr. HEFLIN. I do not want to consume very much time in discussing the question which has been before the Senate during the morning hour, and I am willing to forego any discussion of it at this time in order to obtain a vote. I am in favor of the motion of the Senator from Georgia [Mr. HARRIS], because I would like to have the matter referred back to the committee, so that an agreement can be had as to the additional amount necessary for prohibition work. The authorities charged with prohibition law enforcement should have the necessary money to enforce the law; and with the hope that they may be given the additional amount necessary I shall vote to refer the conference report back to the committee.

Mr. McKELLAR. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from Tennessee?

Mr. EDGE. I yield.

Mr. McKELLAR. I shall want only 10 or 15 minutes to discuss the question which has been at issue.

Mr. EDGE. Under those circumstances, and knowing of another Senator who is desirous of discussing another subject at this time, I shall have to take advantage of the fact that I have the floor and also discuss another subject.

Mr. President, I always hesitate to bring to the attention of the Senate a subject not directly before the body. During my membership in this body I have endeavored, as far as possible, to assist in the desire to consider subjects in what might be properly termed, without offense, an orderly manner. However, I recognize that under the rules of the Senate when one who is sponsoring or interested in a pending measure desires to address the Senate upon it, it is almost essential or necessary if he desires to debate it or present arguments in the interest of such a measure that he must take time that would ordinarily be allotted to some other measure which happens to be the unfinished business.

Mr. HARRIS. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from New Jersey yield to the Senator from Georgia?

Mr. EDGE. I yield.

Mr. HARRIS. The Senator from New Jersey was kind enough to say he is willing to postpone his address if there are no other speeches to be made before we vote on the conference report. I do not believe any other speech will be made, and I ask if he will not now permit us to vote on the question before the Senate?

Mr. EDGE. I made such a proffer, and it was immediately answered by the Senator from Tennessee [Mr. McKELLAR] that he desired to make a speech.

Mr. McKELLAR. Mr. President, in order that we may have a vote I am willing to forego any remarks until a later time, when I will give my reasons for voting to send the conference report back to the conference committee.

The PRESIDENT pro tempore. The question is on agreeing to the conference report presented by the Senator from Wyoming [Mr. WARREN].

Mr. EDGE. With the understanding that I may have the floor when the conference report shall have been disposed of, I am willing that a vote may be taken at this time.

Mr. McKELLAR. I ask for the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. HEFLIN (when Mr. BLACK's name was called). My colleague the junior Senator from Alabama [Mr. BLACK] is absent on the mission announced by me earlier in the day. If present, he would vote "nay."

Mr. CURTIS (when his name was called). I have a general pair with the Senator from Arkansas [Mr. ROBINSON], who is absent. I transfer that pair to the Senator from South Dakota [Mr. NORBECK] and vote "yea."

Mr. MOSES (when his name was called). I have a general pair with the Senator from Louisiana [Mr. BROUSSARD]. He being absent, I transfer that pair to the Senator from Rhode Island [Mr. METCALF] and vote "yea."

Mr. SIMMONS (when Mr. OVERMAN's name was called). I wish to state that my colleague [Mr. OVERMAN] is detained from the Senate on account of indisposition. If he were present, I am advised that he would vote "nay." He is, however, paired with the senior Senator from Wyoming [Mr. WARREN].

Mr. McKELLAR (when Mr. TYSON's name was called). My colleague [Mr. TYSON] is unavoidably detained from the Senate to-day. If he were present, he would vote "nay."

Mr. WARREN (when his name was called). Did I understand the Senator from North Carolina to ask that I should pair with his colleague [Mr. OVERMAN]?

Mr. SIMMONS. I said that my colleague is paired with the Senator from Wyoming. If my colleague were present, he would vote "nay."

Mr. WARREN. It has not been usual in the case of conference reports to observe pairs, but I will refrain from voting and announce my pair in this instance, if the senior Senator from North Carolina deems that course proper.

The roll call was concluded.

Mr. GLASS. I have a general pair with the senior Senator from Connecticut [Mr. McLEAN], which I transfer to the Senator from Tennessee [Mr. TYSON] and vote "nay."

Mr. WARREN. I transfer my pair with the Senator from North Carolina [Mr. OVERMAN] to the Senator from Maine [Mr. GOULD] and vote "yea."

Mr. NORRIS. I wish to announce that my colleague [Mr. HOWELL] is detained from the Senate on account of illness.

Mr. GILLETT. I transfer my general pair with the Senator from New Mexico [Mr. BRATTON] to the Senator from South Dakota [Mr. McMASTER] and vote "yea."

Mr. JONES of Washington. I desire to announce the following general pairs:

The Senator from Connecticut [Mr. BINGHAM] with the Senator from New York [Mr. COPELAND]; and

The Senator from New Mexico [Mr. LARRAZOLO] with the Senator from Alabama [Mr. BLACK].

Mr. GERRY. I wish to announce that the Senator from Utah [Mr. KING] is necessarily detained from the Senate on official business.

Mr. SHEPPARD. I wish to announce that my colleague the junior Senator from Texas [Mr. MAYFIELD] is unavoidably detained from the Senate by illness.

The result was announced—yeas 39, nays 35, as follows:

YEAS—39

Blaine	Frazier	La Follette	Schall
Borah	Gillett	McNary	Shipstead
Burton	Glenn	Moses	Shortridge
Capper	Goff	Nye	Steiwer
Couzens	Greene	Oddie	Thomas, Idaho
Curtis	Hale	Phipps	Vandenberg
Dale	Hastings	Reed, Mo.	Warren
Deneen	Johnson	Reed, Pa.	Waterman
Edge	Kendrick	Robinson, Ind.	Watson
Fess	Keyes	Sackett	

NAYS—35

Ashurst	Fletcher	Jones	Stephens
Barkley	George	McKellar	Swanson
Bayard	Gerry	Neely	Thomas, Okla.
Blease	Glass	Norris	Trammell
Brookhart	Harris	Ransdell	Tydings
Bruce	Harrison	Sheppard	Walsh, Mass.
Caraway	Hawes	Simmons	Walsh, Mont.
Dill	Hayden	Smith	Wheeler
Edwards	Heflin	Steck	

NOT VOTING—21

Bingham	Howell	Metcalf	Smoot
Black	King	Norbeck	Tyson
Bratton	Larrazolo	Overman	Wagner
Broussard	McLean	Pine	
Copeland	McMaster	Pittman	
Gould	Mayfield	Robinson, Ark.	

So the conference report was agreed to.

Mr. JONES. Mr. President, I should like to say that I voted "nay," against the adoption of the conference report, because I believe that the amount for prohibition enforcement should be increased at least to $25,000,000 or $30,000,000, believing that when the next administration comes in we will have a better recommendation for the enforcement of the law in the way of adequate appropriation.

Mr. EDGE obtained the floor.

Mr. BRUCE. Mr. President——

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from Maryland?

Mr. BRUCE. I merely wish to ask the Senator from Georgia [Mr. HARRIS] a question.

Mr. EDGE. I yield to the Senator from Maryland.

Mr. BRUCE. I have been just informed that the State of Georgia has never made any appropriation for the enforcement of prohibition. Is that so?

Mr. HARRIS. The Senator has been misinformed.

Mr. BRUCE. Was any appropriation made last year for the enforcement of prohibition by the State of Georgia?

Mr. HARRIS. An appropriation was made to the sheriff and county officers.

PRISON-MADE GOODS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

PANAMA AND NICARAGUA CANAL

Mr. EDGE. Mr. President, as I indicated when the unanimous consent was gained for the vote on the conference report, it is with an apology that I take the time of the Senate right now to discuss the subject which I propose to discuss, merely, however, from the viewpoint that I much prefer to discuss public matters in the order of their actual consideration before the Senate. Under our rules, however, unless a bill or a resolution becomes the unfinished business it is impossible except during the call of the calendar to discuss it in order, no matter how important it may be; and, of course, no adequate discussion can be had under the 5-minute rule. Furthermore, during the morning hour, under our rules, we can not secure consideration of a measure, important or otherwise, except upon motion. So I want to give notice now before addressing the Senate on the subject of Senate Joint Resolution 117, which is on the calendar, that at a convenient time during the morning hour I will make a motion for the consideration of the joint resolution. Before making the motion and within the five minutes then allowed endeavoring or attempting to explain it, I am taking the time on another bill to speak upon this subject

the importance of which I am quite sure can not be questioned by a single Senator in the Chamber.

THE PENDING RESOLUTION

Mr. President, there is pending on the Senate Calendar, Senate Joint Resolution 117, authorizing a completed survey of the proposed Nicaraguan canal, as well as providing for further information as to the practicability of increasing the facilities of the Panama Canal.

This pending resolution likewise provides for further negotiations with other Central American countries which may have certain rights in the premises.

It is not my purpose to discuss to-day the wisdom and real necessity of such a survey. It seems perfectly obvious, with the facilities of the Panama Canal rapidly reaching a maximum, and with an investment already made by our Government of $3,000,000 for canal rights in Nicaragua, that as a matter of information, Congress and the country should be acquainted with existing conditions and the possibilities of the future. This can only be obtained through the agency of such a survey as proposed.

The pending resolution does not set up any new board or commission. It simply provides that the Army engineers secure the information necessary and report their findings to Congress. The sum of $150,000 is proposed for the expenses of the survey and has been approved by the Budget Director. This relatively small amount has been stipulated because much of the information has already been secured by the Isthmian Canal Commission and presented in their report in 1901.

The additional information desired is that which changed conditions and altered methods of construction would naturally make necessary after a lapse of 27 years.

This resolution was considered by the Committee on Interoceanic Canals and reported favorably to the Senate. Amendments proposed by the Senator from Tennessee [Mr. McKELLAR] have been adopted which in effect suggest further negotiations on the part of the President with the Central American countries concerned in a possible construction of the canal.

It is inconceivable that there should be any real opposition to the passage of this information-seeking resolution.

Time after time the Senate has passed, frequently without debate, a mere Senate resolution requesting information which sometimes costs thousands and thousands of dollars to complete. Much of this information is not even for the purposes of legislation while, on the other hand, the great constructive enterprise largely dependent upon the information sought by the pending resolution affects the commerce of the world.

CANAL HISTORY

Assuming that the survey to secure up-to-date information can not be seriously opposed, I propose to take advantage of this opportunity to discuss the advisability of a Nicaraguan Canal and enlargements to the Panama Canal from both an economic and a diplomatic standpoint.

I am convinced that a further survey will result, as have the various surveys heretofore undertaken, in demonstrating the entire practicability and desirability of a consummation of both projects. Therefore, I desire at this time to bring to the attention of the Senate and the country the situation as it appeals to me, I repeat, from the material and diplomatic points of view.

There has always existed considerable speculation as to why in the first instance the Panama Canal was constructed or completed rather than the proposed Nicaraguan waterway.

The Isthmian Canal Commission, to which I have heretofore referred, after an investigation and survey consuming more than two years transmitted their report to the Fifty-seventh Congress, first session, Document No. 54, dated November 16, 1901, with the following summary:

> After considering all the facts developed by the investigations made by the commission and the actual situation as it now stands and having in view the terms offered by the new Panama Canal Co. this commission is of the opinion that the most practical and feasible route for an isthmian canal, to be under the control, management, and ownership of the United States, is that known as the Nicaraguan route.

This report was signed and approved by Admiral Walker, chairman, and the entire commission of nine.

Previous to this report there had been at least five other investigations and in some cases surveys, the result of each being that the construction of an interoceanic canal across Nicaragua was adjudged as practicable, with general agreement as to the route the canal should take.

This route is generally described as entering from the Atlantic Ocean side by the San Juan River between Nicaragua and Costa Rica, proceeding into the interior of Nicaragua across the Lake of Nicaragua to Brito, on the Pacific side, a total length of 183 miles.

Notwithstanding these recommendations, Congress ultimately concluded to complete the Panama Canal, although at the time it was considered a more expensive operation. Later the price for the Panama route was reduced, treaty difficulties were overcome, and, as is well known, the Panama project was authorized and in due time completed. Its service to the United States and the world has been incalculable. Since it was opened to traffic the wisdom of its authorization has never been seriously questioned.

On the other hand the rapidly increasing business which the Panama administration has annually reported has brought us face to face with the responsibility of considering an increase of interoceanic canal facilities by further enlargement of the Panama Canal as well as the construction of a second waterway.

THE RECORD OF THE PANAMA CANAL

Permit me to present a brief summary of the business of the Panama Canal, together with the present mechanical facilities.

I append a table from the annual report of the Governor of the Panama Canal to June 30, 1928. This table gives complete the number of ships that have passed through the canal since its opening August 15, 1914, annually to June 30 of this year, likewise the net and gross tonnage and tolls received per year:

Statement showing the number of transits of vessels, aggregate Panama Canal net tonnage, tolls assessed, and tons of cargo carried through the Panama Canal by fiscal years from the opening of the canal, August 15, 1914, to June 30, 1928

Fiscal year	Number of ships	Panama Canal net tonnage	Tolls	Tons of cargo
Total traffic:				
1915	1,075	3,792,572	$4,367,550.19	4,888,454
1916	758	2,396,162	2,408,089.62	3,094,114
1917	1,803	5,798,557	5,627,463.05	7,058,563
1918	2,069	6,574,073	6,438,853.15	7,532,031
1919	2,024	6,124,990	6,172,828.59	6,916,621
1920	2,478	8,546,044	8,513,933.15	9,374,499
1921	2,892	11,415,876	11,276,889.91	11,599,214
1922	2,736	11,417,459	11,197,832.41	10,884,910
1923	3,967	18,605,786	17,508,414.85	19,567,875
1924	5,230	26,148,878	24,290,963.54	26,994,710
1925	4,673	22,855,151	21,400,523.51	23,958,836
1926	5,197	24,774,591	22,931,055.98	26,037,448
1927	5,475	26,227,815	24,228,830.11	27,748,215
1928	6,456	29,458,634	26,944,499.77	29,630,709
Total	46,833	204,136,588	193,307,727.83	215,286,199

The above table does not include vessels which are exempt from payment of tolls. In the past year there were 503 of these vessels. If a tonnage be assigned to each of these transits equivalent to the average for commercial transits (about 4,500 tons), then the total tonnage for the past year or to June 30, 1928, would be increased to above 31,000,000 tons.

A study of this report demonstrates that the business of the canal has approximately doubled every five years since its first year of full operation, and since that time has increased more than 500 per cent. Permit me to quote further from this same report:

> The growth of traffic has brought to the front considerations of the possibility of its exceeding the capacity of the canal, with the corollary of considering ways by which the capacity may be increased. Present traffic is considered to be between 45 and 50 per cent of that which the canal can handle as constructed at present.

From this statement it is clearly established, if the percentage of traffic continues for the next 5 or 10 years to increase along similar ratios as in the past, or even in somewhat decreased ratios, the capacity of the canal will have reached its maximum in less than 10 years.

Personally I do not believe the business of the canal can continue to double each five years, as, of course, this would require a very largely increased tonnage in the near future. However, computing it on the most conservative basis, the capacity of the present canal will certainly be reached between 1940 and 1960. I do not believe from the facts at hand that this statement can be successfully disputed.

This would mean that in 12 years the capacity of the existing Panama Canal would have reached or be nearing its maximum.

INCREASING FACILITIES

All kinds of estimates have been made as to the length of time which would be required to build a Nicaraguan canal. Adding to the actual time of construction, the time consumed for a further survey and for negotiations with Costa Rica, Salvador, and Honduras, as well as further detail plans with Nicaragua, I think it would be conservative to estimate that a new canal could not be completed and opened to traffic within 15 or 20 years.

Thus, it must be realized the necessity for deliberate consideration of this entire project is facing us immediately.

In this connection we must also consider how much the capacity of the Panama Canal could be increased, if suggested improvements were authorized.

Already authorization has been given to assure a supplementary water supply which, even with the present capacity of the canal, is found most necessary during the dry season.

To complete this so-termed Alhajuela project of water storage will require, it is estimated, about five years' time and a cost of approximately $12,000,000.

It must be understood, however, that this additional improvement is needed to assure maximum transits even with the existing facilities.

It has been further suggested that in order to increase the capacity a third flight of locks be constructed, these to parallel the present two flights, which when completed would increase the facilities of the canal, it is claimed, 70 per cent.

If, as has been reported by the Governor of the Panama Canal, present traffic represents 50 per cent of present capacity, then it will be seen that in round figures, if a third flight of locks should be authorized, together with an increased water supply, the absolute total maximum capacity of a high-level Panama Canal for all time would be approximately the transit of 100,000,000 tons per year.

It has been estimated roughly by competent engineers that the installation of this third set of locks, together with the construction of the Alhajuela Dam and considerable additional dredging work necessary, would cost from $125,000,000 to $150,000,000.

To further increase the capacity of the canal at any time would necessitate its transformation into a sea-level canal. Any estimate as to the cost of this would be merely a guess. I have never heard of an estimate under a billion dollars. Even a sea-level canal, with the great difference between the rise and fall of the tide in the Pacific and the Atlantic, would still require tidal locks, so that the lock system could not be entirely eliminated. As to the practicability of all this, the pending resolution requests official information.

I have gone into the above detail in order to present the picture of the possibilities of the Panama Canal in the future from every engineering standpoint. In presenting these details I have depended to a great extent upon the report of the Governor of the Panama Canal himself, supplemented by inquiry from other Army engineers familiar with the situation.

Demonstrating it is impossible to accurately predict how traffic will increase, I quote from Prof. Emery R. Johnson, who was a member of the Isthmian Canal Commission that made the report in 1901. At that time Doctor Johnson publicly predicted the Panama Canal traffic would total about 11,000,000 tons in 1924, 23 years later. In 1912 Doctor Johnson changed his predictions and stated the traffic would be about 17,000,000 tons in 1925. The actual tonnage in 1925 (including estimate for free transits) was about 24,000,000 tons, an increase over the original prediction of over 100 per cent. Doctor Johnson's studies were based on world trade and canal traffic in Europe, I believe principally the Suez Canal traffic.

In addition, Doctor Johnson estimated Panama Canal traffic would increase by 60 per cent from 1925 to 1935. If this is correct, then we could expect 38,000,000 tons in 1935. As a matter of fact, the traffic in the year just closed, as per the report, is, including free transits, about 31,000,000 tons, leaving but very little to go in the next seven years.

Doctor Johnson stated that his predictions were conservative, and they have certainly up to date proven to be so.

From a study of the foregoing, even though Congress authorized several hundred million dollars additional appropriation for Panama, there can be no question if the world and its commerce are to move on, that from any angle we approach the problem, the maximum of the facilities of the Panama Canal will be reached in a relatively short period of time. In any event, the problem presents a situation demanding immediate and serious consideration of the construction of another method of transportation between the Atlantic and the Pacific Oceans.

COMPARISON OF COSTS

I have already drawn attention to the fact that the various boards and commissions, before we undertook the completion of the Panama Canal, generally favored a construction of a Nicaraguan canal. Several reasons entered into this conclusion.

In 1901, when the Isthmian Canal Commission reported, basing the construction upon quite a different width and depth than that finally decided, they gave as their estimate for completing the Panama Canal $144,000,000. This was exclusive of the price asked by the French company as reimbursement for the work they had already done, as well as the rights they possessed. The estimate of cost, plus the asking price of the French company, made the total cost of a canal by the Panama route approximately $250,000,000.

On the other hand, the Isthmian Canal Commission estimated the cost of the Nicaraguan project, figured on a similar width and depth, as about $190,000,000. Thus it will be seen that the Panama route at the time of this report called for an expenditure of some $60,000,000 over and above the cost of the proposed Nicaraguan route.

I will not go into the detail that followed the final decision to complete the Panama Canal, but in 1909, after the organization was completed and all negotiations had been concluded, the Panama Canal was constructed, the final cost being in the neighborhood of $390,000,000.

Of this amount $275,000,000 has been set aside as representing the investment in a commercial sense, exclusive of the Panama Railroad Co., and approximately $115,000,000 including the $40,000,000 paid to the French has been charged off as expenditure for national defense.

With a net annual revenue of approximately $20,000,000 as reported in 1928, it will be seen that based on a commercial value of $275,000,000 the canal is now paying approximately 7½ per cent which, in itself, should demonstrate that canal investments are not, as most governmental activities, an actual drain upon the taxpayers.

As to the present cost of a canal across Nicaragua I would not hazard a guess. Although considerably longer than Panama, much of the distance is traversed through the San Juan River and Lake Nicaragua requiring relatively little dredging. Other engineering advantages of topography undoubtedly entered into consideration which justified the eminent commission of engineers in 1901 to favor its construction even over the completion of the Panama route.

ECONOMIC ARGUMENTS FAVORING A NICARAGUAN CANAL

At the outset I drew attention to the conviction that the construction of a Nicaraguan canal presented arguments from both the economic and diplomatic viewpoint. Permit me to first discuss the proposal from the economic or material point of view.

In the first place, the proposed Nicaraguan canal will materially shorten the trade routes between the Atlantic and Pacific ports of the United States.

The land distance from the entrance of the Panama Canal to the entrance of the proposed Nicaraguan canal is approximately 500 miles. However, calculating the distance by sea lanes, the saving would be slightly over 100 miles. It will thus be plainly seen that for ships trading between the Atlantic and the Pacific coast lines of the United States a material saving of time would be effected in a voyage in either direction.

For illustration, I am informed that the route which would be taken by vessels between New York and San Francisco is about 434 statute-miles shorter, by way of the proposed Nicaraguan canal, than by the Panama route. The authority for this figure of 434 miles is General Abbot in his book Problems of the Panama Canal, page 55. General Abbot quotes Commander Todd, of the Hydrographic Bureau of the Navy Department, as his authority. Approximately the same figure is deduced from Doctor Johnson's tables given in Appendix N. N. of the report of 1901.

Experts have computed that the average speed for ships is 10 knots or 11½ statute-miles per hour. Upon this basis it is readily seen that there would be a saving of about 40 hours, almost 2 days, in such a voyage.

On the other hand, the Panama Canal is 133 miles shorter from sea to sea than the proposed Nicaraguan route. The actual time of travel through the Panama Canal is eight hours. By the 1901 commission it was estimated to require 12 hours. At the same time, on the same basis, the time consumed for travel through a Nicaraguan canal was estimated at 33 hours. If this latter estimate is reduced in the same proportion as the actual time for travel through the Panama Canal, then the time consumed through a Nicaraguan canal would be approximately 22 hours.

Mr. WATSON. Mr. President, would it interfere with the Senator if I should interrupt him?

Mr. EDGE. Not at all.

Mr. WATSON. I would not interrupt the Senator except that I am compelled to attend a committee meeting, and I think he has been asked to attend the same meeting. I congratulate the Senator upon his alertness and vigilance in thus early sponsoring the construction of a Nicaraguan canal; but I wanted to ask this question, in all fairness, with no desire at all to appeal to sectionalism in any form, much less to stir up sectional animosity, and I do not think that I am doing so, because all of us from the Central West who were in Congress, and who voted

for the construction of the Panama Canal, did so freely and gladly. We think that when the Panama Canal was constructed, without intending it, of course, it did result in a discrimination in freight rates in favor of the East and the West as against the Central West, and at present I imagine that many of us of the Central West would very much like to see the proposed canal from the Lakes through the St. Lawrence to the Atlantic Ocean, or an all-American route, as the engineers may determine, before we construct the Nicaraguan canal, and thus further discriminate against the Central West in the matter of freight rates. Just as a matter of fairness, what does the Senator say to that suggestion?

Mr. EDGE. I think there is much logic in the Senator's suggestion. In presenting this picture as to the necessity in the near future of increased southern facilities I thoroughly realize I am visualizing, as it were, but not so far ahead at that, when 12 years will mark the maximum of transit than can be operated successfully with the present facilities. I thoroughly appreciate the pertinence of the Senator's question and personally am heartily in favor of one of the canals to which he has referred. Nevertheless, it is the duty of the Senate and of Congress, in my judgment, to secure all information leading up to a decision, just as it would be in the case of one of the northern canals.

Mr. WATSON. I quite agree with the Senator.

Mr. EDGE. I thank the Senator.

Subtracting the 22 hours from the 40 saved in distance would mean a net saving of at least 18 hours on every voyage of an average ship between New York and San Francisco in either direction.

The 1901 commission, however, estimated the saving from Atlantic ports to Pacific ports in the round figures as one day.

Mr. McKELLAR. Mr. President, may I interrupt the Senator?

Mr. EDGE. Certainly.

Mr. McKELLAR. In reference to the statement just made by the senior Senator from Indiana, certainly the condition of which he complains as existing in the Middle West did not grow out of the building of the Panama Canal but out of the legislation that was subsequently passed, which perhaps should not have been passed. I agree with him that the Middle West should not be discriminated against in the matter of railroad rates.

Mr. BROOKHART. What was the subsequent legislation that brought about this discrimination?

Mr. McKELLAR. Various legislation connected with the powers of the Interstate Commerce Commisison.

Mr. BROOKHART. The powers of the Interstate Commerce Commission were exercised by virtue of the new competition created through the Panama Canal—water competition with railroad rates.

Mr. McKELLAR. But the Interstate Commerce Commission had a perfect right to prevent the discrimination to which the Senator from Indiana referred. It is not a question of the building of the Panama Canal—the building of which I think was very proper—and I agree with the Senator from New Jersey that we should build the Nicaraguan canal, but I do not see how that will affect the question of freight rates.

Mr. BROOKHART. Has not the failure to develop the Mississippi waterway system contributed to that discrimination also?

Mr. McKELLAR. We ought to see that there is no discrimination. There is no reason why these improvements can not be made without discrimination. I agree with the Senator from Iowa that there should not be discrimination.

Mr. EDGE. Continuing, Mr. President, I just presented the picture of the time required, comparing the Nicaraguan route with the Panama route. I draw the attention of my southern friends to this: For all the Gulf ports in Louisiana, Mississippi, Florida, and Texas distances by way of Nicaragua would be shorter by approximately two full days, because of the location of the Gulf, and the sea lane that would naturally follow in reaching the entrance of the proposed Nicaraguan canal.

Mr. McKELLAR. That would apply also to all commerce going between the Atlantic coast and the west coast.

Mr. EDGE. Not entirely. It would not apply on commerce going from New York, because that would not go in that far. They would take a different sea route down. It would apply, as the Senator will see if he will consult a map very carefully, in ports like Galveston or New Orleans, going right around into the Panama Canal.

Mr. McKELLAR. It would not apply to the same extent, but on the Pacific coast it would apply to the same extent.

Mr. EDGE. Exactly. On the other hand, for commerce between North Atlantic ports and the west coast of South America the Panama route is shorter by about the same time.

It has been estimated that about 21 per cent of the Panama traffic is to or from the west coast of South America and 79 per cent elsewhere. This is an interesting comparison. Therefore, it will be plainly seen that a Nicaraguan canal would be shorter in time for about 79 per cent of all the traffic.

In these days overhead expense is the major consideration in administering any business, especially transportation by public carriers. Therefore, the saving of coal, oil, seaman labor, and so forth, for one or two days in every voyage, not to speak of the further economy of time, are items which would, in my judgment, almost pay interest on the construction investment.

In order to present a general idea of this practical saving I have consulted representatives of the United States Shipping Board and have been advised that the average operating expense per sea-day of cargo ships is $500.

Of course, this increases or decreases with the type or size of the ship. I repeat, however, that this is the average as presented by the statistical division of the Shipping Board in a chart issued November 24, 1928, only a few weeks back.

I have already drawn attention to the fact that it is estimated that 79 per cent of ships now using the Panama Canal are ships that because of destination could more advantageously use a Nicaraguan route, should one be available.

Referring again to the last report of the Governor of the Panama Canal for the fiscal year ending June 30, 1928—it appears that 6,456 ships of all types used the canal for commercial purposes during the year closing on that date. If the average of 79 per cent is correct, this would mean that approximately 5,100 ships would have utilized the shorter route had it been available.

As already pointed out such ships would save from one to two days, according to their port of embarkation. I have no method to accurately determine the percentage of these 5,100 ships that would save the one or the two days. However, in order to be very conservative let us estimate that one-third of these ships, through the construction of a Nicaraguan canal, would save two days, the remaining two-thirds one day.

Employing the cost schedule supplied by the Shipping Board this would mean an annual saving in operating expenses alone of $3,400,000. If the canal should cost, as has been estimated, $1,000,000,000, this one item of saving would mean almost 3½ per cent on the entire investment. Add to this the economy of time and we have full interest on the total cost, guaranteed in advance or before we appropriate one dollar.

It must likewise be remembered that the cost of $500 per day is calculated for a boat at sea. It is estimated that a boat in the canal would cost in operating expenses considerably less.

In view of the fact that passage through the proposed Nicaraguan canal would consume almost three times the number of hours as compared to the Panama, then, of course, this additional saving would be whatever is established as the difference between operating expenses in the canal and at sea. I will not attempt to compute it, but it would unquestionably add a considerable total to the $3,400,000.

It might be argued that the large percentage of business which would be lost to the Panama Canal would eventually put it out of business. This would be an absolutely incorrect assumption.

I am informed that the business, from both the east and west coasts of the United States to the west and east coasts of South America, is rapidly on the increase. If trade to and from South America is to be stimulated, this certainly must be true. In reaching either coast of South America from the opposite coast it would be an advantage to cargo or other ships to continue to utilize the Panama Canal.

Anyhow, I believe that I have clearly established the necessity of both canals, not in competition but in meeting the rapidly increasing commerce of the world.

Further, from the economic standpoint, there can be no successful argument opposing parallel systems of transportation, whether by water or rail. Admitting the near approach of a capacity traffic through the existing canal, should any serious accident happen to the Panama Canal the results would be calamitous.

While we are all striving for world peace, at the same time we have not yet reached that happy millenium or, at least, where such assurance can be supplied. If the United States were engaged in a war with another nation, it is not difficult to imagine that one of the first public works which the enemy would seek to destroy would be the Panama Canal. A modern bomb dropped on the Gatun Lock and it would be all over. While this might happen if the Nicaraguan canal was constructed, on the other hand, all will agree we would be better protected with two interoceanic canals than with one.

Also properly classified under economic arguments, is the commerce and trade with Central and South America. Such a canal

would unquestionably develop business that can never be secured with the Panama Canal alone. In fact, the history of the world demonstrates conclusively that with each additional system of transportation new commerce and trade beyond any original estimates always follows.

THE DIPLOMATIC POSSIBILITIES

A word as to the diplomatic possibilities.

As everyone who has followed the history of the Panama Canal must admit, when its proprietorship passed into the hands of Uncle Sam, our diplomatic troubles with Colombia and Panama were rapidly terminated. To-day Colon, old Panama City, and Cristobal are busy, thriving municipalities. Nationals of various countries are located there and engaged in retail and wholesale commerce and trade. The relationship is most friendly. Any questions that have arisen requiring diplomatic disposition have been or are being settled in a peaceful and friendly manner. In other words, the invasion of North American capital was not repulsed; it was invited and apparently appreciated. I repeat, the relationships from a diplomatic and contact standpoint have improved with this closer acquaintance.

Is it unreasonable to assume that a similar result would follow the determination of the United States to construct a Nicaraguan canal?

I will not attempt to refer to the history of the relations of Nicaragua and the United States for years past. I admit it does not present a picture that can be pleasing to any of us.

Through the administrations of both major political parties these difficulties, these uncertainties, perhaps these errors and mistakes have been made. No point, however, can be gained in this discussion by reviewing the record fairly familiar to all of us.

It is, however, a fact, emphasized in recent days, that the accredited leaders of both political parties in Nicaragua are desirous that the United States take advantage of the canal rights they have purchased and construct a Nicaraguan canal. All economic and material considerations lead to the same conclusion.

The recent visit of good will of the President elect of the United States certainly emphasized the local feeling in no uncertain manner. Permit me to quote from the New York Times of November 28, which article in effect appeared generally throughout the country:

> The construction of the Nicaraguan canal connecting the Atlantic and Pacific Oceans by the United States at the earliest possible time was advocated to-day by President Diaz and President-elect Moncada at Nicaragua, following a luncheon aboard the battleship *Maryland* with Herbert Hoover.
>
> The two Nicaraguan officials expressed this view to newspaper men in an interview in which they declared that the visit of the American President elect would aid the desire of all parties in Nicaragua for the closest and friendliest relations between their country and the United States.
>
> Both Nicaraguan officials declared the construction of the canal would be economically advantageous and also a bulwark to the liberties of the American Republics. Señor Moncada said that he had discussed the canal with Mr. Hoover and that he (Moncada) had long advocated its construction.
>
> The proposed canal was described by Señor Moncada as a project "which would bind your country and ours and be a bulwark of freedom and a demonstration of liberty."
>
> The Nicaraguan President elect declared that it was the duty of his country to contribute to the building of the canal, and therefore he felt that the United States-Nicaraguan treaty, under which $3,000,000 was paid by the United States to the Central American Republic for the canal and naval base rights, was just. He added that the United States naval bases at each end of the canal would be a necessary defense.
>
> "I would like to see the canal built to-morrow," Señor Diaz declared in concurring with the President elect.

I am quite ready to prophesy should the survey called for by Senate Joint Resolution 117 be authorized and the practicability and feasibility established by previous investigations confirmed, and that action be followed by the actual authorization of the construction of the canal, our diplomatic troubles with Nicaragua would cease, and at the same time the United States would have made a wise and profitable investment.

In reviewing the existing situation, in great part secured through a study of the efforts of the past, I would be unpardonably remiss should I fail to refer to the constructive and indefatigable efforts over a generation ago of the Hon. John T. Morgan, then Senator from Alabama.

The CONGRESSIONAL RECORD of 1899, 1900, and for years before and after is replete with eloquent appeals from this distinguished statesman. Before and following the report of the Isthmian Canal Commission, and as chairman of the Interoceanic Canals Committee, which post I now have the honor to fill, Senator Morgan was tireless in his efforts to have Congress authorize the construction of the Nicaraguan canal. More than a score of years ago he clearly and accurately visualized its possibilities and from some of his speeches which I have read his words in those days were indeed prophetic of the results which could be attained and the situation existing to-day.

On May 16, 1900, Senator Morgan in presenting a report to the Senate, used the following expression:

> Europe and parts of Asia and Africa have made a declaration as to the Suez Canal which dedicates it as an area in which war shall not exist; and the broad sweep of that decree includes all nations in its benefits and pledges the nations to its maintenance. It is the one great international act that stands in front of all others to mark the real progress of civilization. An isthmian canal in America to connect the same oceans has all the characteristics of the Suez Canal and demands like treatment. Whether we prefer it or not, this European decree will impress its just authority in time upon the American canal and we will applaud the result. Our children will assent to this though we may refuse.

This comity between nations prophesied by Senator Morgan has followed the construction of the Panama Canal. Can any man say it will not still further follow the construction of the Nicaraguan canal?

Again, on March 1, 1901, in a speech on the floor of the Senate, among many other references Senator Morgan, in pleading for the purchase of a right of way across Nicaragua, which was actually brought about 13 years later, had this to say:

> These countries—
>
> Speaking of Nicaragua and Costa Rica—
>
> are in possession of a very remarkably valuable piece of property—the route of the canal through Lake Nicaragua and San Juan River—which has no parallel anywhere on the face of the globe. To us, Mr. President, the Nicaraguan canal route is the most important piece of property in the world.

Although Senator Morgan pleaded eloquently for the accession of this right of way, I repeat, it was not until 13 years later when the Bryan-Chamorro treaty was entered into and ratified, requiring the expenditure of $3,000,000, that Senator Morgan's advice was put into reality. This very proper expenditure was authorized notwithstanding the completion, in the meantime, of the Panama route. Now 14 additional years have passed and I am pleading, not for the moment to commence the construction of a Nicaraguan canal, but that Congress be furnished the engineering and diplomatic facts in order to make a further study.

It may be interesting to quote from an article appearing in the New York Herald-Tribune as recently as last Sunday week, December 9.

Henry Cabot Lodge, special correspondent writing from Managua, capital of Nicaragua, in a comprehensive review of the canal possibilities starts his article with the following conclusion:

> The much-talked-of Nicaragua canal route—which narrowly missed being used instead of the Panama route a generation ago—would, if used now, so revolutionize Central America that on these grounds alone it might pay to build it.
>
> If the canal were built there would be no more revolutions in Nicaragua and there probably would be a rapid rise in the standard of living in the neighboring Republics. This state of peace in Central America would, of course, be sheer gain to the United States, apart from the undeniable advantages which such a canal would be to us, both commercially and from the standpoint of national defense.

In the construction of this canal, Costa Rica is likewise interested and, from all the information I can secure, in every way friendly to its completion.

Therefore, the diplomatic advantages applying to Nicaragua should extend to Costa Rica as well. Costa Rica has already entered into a convention with the United States dated December 1, 1900, which reads as follows:

> It is agreed between the two governments that when the President of the United States is authorized by law to acquire control of such portion of the territory now belonging to Costa Rica as may be desirable and necessary on which to construct and protect a canal of depth and capacity sufficient for the passage of vessels of the greatest tonnage and draft now in use, from a point near San Juan del Norte on the Caribbean Sea, via Lake Nicaragua to Brito on the Pacific Ocean, they mutually engage to enter into negotiations with each other to settle the plan and the agreements, in detail, found necessary to accomplish the construction and to provide for the ownership and control of the proposed canal.
>
> As preliminary to such future negotiations it is forthwith agreed that the course of said canal and the terminals thereof shall be the same

that were stated in a treaty signed by the plenipotentiaries of the United States and Great Britain on February 5, 1900, and now pending in the Senate of the United States for confirmation, and that the provisions of the same shall be adhered to by the United States and Costa Rica.

In witness whereof, the undersigned have signed this protocol and have hereunto affixed their seals.

Done in duplicate at Washington this 1st day of December, 1900.

JOHN HAY. [SEAL.]
J. B. CALVO. [SEAL.]

By the above it will be seen that no serious difficulty should be anticipated from this enterprising Central American Republic.

Anyhow, after all is said and done, the pending resolution does not commit the Senate beyond the securing of up-to-date information.

I repeat, it is beyond my conception to understand how, in view of all the circumstances, some of which I have endeavored to outline, there could be opposition to its adoption.

PRISON-MADE GOODS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ODDIE in the chair). The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Barkley	Fletcher	Kendrick	Sheppard
Bayard	Frazier	Keyes	Shortridge
Blaine	George	La Follette	Simmons
Blease	Gerry	McKellar	Smith
Borah	Gillett	McNary	Smoot
Brookhart	Glass	Moses	Steiwer
Bruce	Glenn	Neely	Stephens
Burton	Goff	Norris	Swanson
Caraway	Hale	Nye	Thomas, Idaho
Couzens	Harris	Oddie	Thomas, Okla.
Curtis	Harrison	Pine	Trammell
Dale	Hastings	Ransdell	Tydings
Deneen	Hawes	Reed, Mo.	Walsh, Mont.
Dill	Hayden	Reed, Pa.	Warren
Edge	Heflin	Robinson, Ind.	Waterman
Fess	Jones	Sackett	Wheeler

Mr. WATERMAN. I desire to announce that the senior Senator from Colorado [Mr. PHIPPS] has been called to his home in Colorado by reason of serious illness in his family and probably will not be able to return until after the Christmas recess.

Mr. NORRIS. I desire to announce that my colleague the junior Senator from Nebraska [Mr. HOWELL] is detained from the Senate by illness.

The PRESIDING OFFICER. Sixty-four Senators having answered to their names, a quorum is present.

RIVER AND HARBOR APPROPRIATIONS

Mr. HARRISON. Mr. President, I read an interesting statement in the morning newspapers, to which I wish to call the attention of the Senate, and especially the attention of the Senator from Washington [Mr. JONES], the chairman of the Committee on Commerce. The statement is as follows:

HARBOR BILL'S FATE IS UP TO PRESIDENT—HOUSE AND SENATE CHAIRMEN TO CONFER WITH PRESIDENT ON MEASURE SOON

Chairman DEMPSEY, of the House Rivers and Harbors Committee yesterday said that any action seeking the passage of the $48,435,415 rivers and harbors bill at this session of Congress depended largely upon President Coolidge's attitude toward the measure.

Chairman DEMPSEY and Chairman JONES, of the Senate Commerce Committee, will confer in the next few days with President Coolidge relative to the measure, the House chairman said. The future course of action by his committee, he added, would rest largely on that conference.

The committee, which reported the bill favorably at the last session, has before it a motion to push for action on the measure. In his annual message the President, however, expressed disfavor on the enactment of river and harbor improvement legislation at this session.

It will be recalled that during the World War period, for about six years, I think it was, from somewhere about 1914 to 1922, there was no river and harbor legislation; the harbors of the country were permitted to go without improvement through appropriations by the Federal Government. Then, in 1922 we passed a river and harbor omnibus bill and adopted about 45 new projects. In 1925 we passed another river and harbor bill, adopting some 52 new projects. In January, 1927, we passed another river and harbor bill, providing for about 52 new projects. It has been the policy of the Federal Government for many years, except for the lapse because of the World War, to pass omnibus river and harbor bills and adopt new projects as the demands of commerce necessitated. I sincerely hope—and I say this especially to the Senator from Washington—that the present Congress will not die without the passage by the House and the Senate and approval by the President of an omnibus river and harbor bill.

There are some projects in this country that demand immediate attention and adoption by Congress. There may not be many. I have scanned hurriedly the list prepared by the Board of Engineers and find there are some 41 projects, I believe, in that list, and the cost of those 41 projects totals $95,000,000. In that list, however, are two items alone that carry an appropriation of $76,000,000. If the river and harbor bill should pass, of course, it ought to include those two projects which call for a large outlay of money, namely, the Missouri River project and the Great Lakes connecting channel projects, but if, in the wisdom of the Congress, those two projects, because of their magnitude, should be postponed, that ought not to be any reason why the other projects which have been recommended by the Board of Army Engineers, and which have been reported favorably by the House Rivers and Harbors Committee shall not come up for consideration and be pressed for immediate enactment.

It has been suggested that the President stated in his message that there are many millions of dollars now unexpended for projects on which work has not been done. I submit that if this country keeps up with the demands of progress that constantly arise, the Government must increase the depth of certain harbors in this country. I know in my own State there are two projects that were recommended in the early part of 1927, just five days, I think it was, after the passage of the last river and harbor bill; and yet we are to be crippled because, for instance, the President says, "Let us not pass a river and harbor bill at this time." I submit that if the demands of commerce justify the enactment by Congress of a river and harbor bill, it is our duty to go ahead, give it fair consideration, and put it upon speedy passage. Therefore I hope that the chairman of the Committee on Commerce of the Senate and the chairman of the Rivers and Harbors Committee of the House of Representatives will press this matter so that the next two or three months will not pass without our giving to the country a rivers and harbors bill.

Mr. JONES rose.

Mr. HARRISON. I yield to the Senator from Washington if he wishes to ask me a question.

Mr. JONES. No; I did not wish to ask a question.

Mr. HARRISON. Then, I want to ask the Senator from Washington a question. The Senator, of course, is in favor of the passage of a river and harbor bill at this session of Congress?

Mr. JONES. I doubt that.

Mr. HARRISON. Then, I have not finished speaking.

Mr. JONES. I merely wish to insert something in the RECORD with reference to the matter on which the Senator is addressing the Senate.

Mr. BRUCE. Mr. President, with the permission of the Senator from Mississippi, I will say I was just a little amused to hear the question the Senator from Mississippi addressed to the Senator from Washington, as to whether or not he is ready to give his approval to the passage of a river and harbor bill at this session, because I have asked the Senator from Washington the question three times, not on the floor of the Senate when the Senate was in session, but I have asked the question of him three times, and I have never been able to get him to answer it.

I wish to say that I was asked by Mr. DEMPSEY, the chairman of the Committee on Rivers and Harbors of the House of Representatives, to ascertain how the chairman of the Senate Committee on Commerce felt about the matter, and also to ask that question of the ranking Democratic member of the Committee on Commerce, the Senator from Florida [Mr. FLETCHER]. I did ask the Senator from Florida the question, and he stated that he was most strongly in favor of the passage of a river and harbor bill at this session of Congress. I hope the Senator from Washington will be able to arrive at some definite conclusion on the subject and that his conclusion will be favorable to the enactment of such a bill. I have every reason to believe from actual contact with members of the House committee that a large number of that committee, and probably a majority of it, are strongly in favor of the enactment of a river and harbor bill at this session, and that if he could only assure Mr. DEMPSEY, the chairman of the House committee, that the Senate favors the enactment of such a bill, and have him communicate that fact to the members of the House committee, the bill would be passed by the House and sent here to be passed by the Senate.

I am deeply interested in this bill, as is the Senator from Mississippi. There are two or three projects of the very highest

degree of importance to the port of Baltimore, one increasing the anchorage facilities of that port and another providing for the deepening of the channel leading up to the port.

Mr. HARRISON. Mr. President, I yield to the Senator from Washington if he wishes to have something inserted in the RECORD.

Mr. JONES. Mr. President, the Senator from Maryland [Mr. BRUCE] has spoken to me two or three times about this matter, and I told him I was awaiting information from the Engineers' office in answer to a letter which I had sent to them with reference to the condition of the present projects. Just as the Senator from Mississippi arose I myself was rising to ask to have printed in the RECORD a copy of the letter which I have just received from the Chief of Engineers, giving the number of projects that are under way, the number of projects that have been adopted but not commenced, the amount of money that it will take to complete those projects, and so on. I will say that it will take, according to the figures, in round numbers, $243,000,000 to complete the river and harbor projects that have already been approved and adopted by Congress.

We will no doubt have an appropriation of $50,000,000 for river and harbor work. That is the amount we have been appropriating year by year for several years, but, at that rate, it will take almost six years to complete the projects which Congress has already adopted and which are now under way.

Mr. HARRISON. Mr. President, may I ask the Senator a question in that connection?

Mr. JONES. Certainly.

Mr. HARRISON. The Senator appreciates that there have been many projects for which authorizations have been made but for which appropriations have not been made to carry on the work; and they always mount up into the millions of dollars. The Senator, however, must also appreciate the circumstances surrounding various projects. For instance, I have a project in my State, in my own town, by which it is proposed to deepen the channel by about 3 feet, and it is stated that it will take very little more money. It is doubtful whether or not it will take any more money than is involved in the present project. I submit that the Congress ought to adopt a project in the interest of commerce so that vessels of deeper draft may enter a harbor. There are any number of projects, though perhaps not exactly like that, which ought to be adopted, and which do not call for any outlay of money. I submit a bill to that end ought to be enacted by Congress.

I have talked to the chairman of the Rivers and Harbors Committee of the House, and I have not any doubt that the sentiment of that committee is that river and harbor legislation ought to be passed. I have taken up the question with members of that committee for the last three sessions of Congress. I do not know why they have not acted. I have no right to criticize them and I am not going upon the floor to criticize them, but I submit that is bad practice for the Congress of the United States to sit by and say that it will do just what the President of the United States says with reference to this matter.

We are charged with the duty of making adequate appropriations to take care of the commerce of the country. In the last message of the President he referred to building up our commerce. We can not build up our commerce unless we take care of the rivers and harbors of the country. So I submit that we ought to carry on the practice of adopting river and harbor projects as they may be recommended to us, after full consideration, by the board of Army engineers. I have no sympathy with the suggestion that the chairman of the Commerce Committee of the Senate or the chairman of the Rivers and Harbors Committee of the House of Representatives, or any group of men in this great body here or at the other end of the Capitol, should have the power to say, "We are going to let the President decide what we shall do about river and harbor projects."

Does the Senator from Washington desire to put a statement in the RECORD?

Mr. JONES. If the Senator is through, I should like to have a letter inserted in the RECORD.

Mr. HARRISON. I thought, perhaps, the Senator wanted to ask me a question.

Mr. HAWES. Mr. President, I have been trying for some time to have the Senate proceed with the unfinished business.

Mr. JONES. I understand the Senator from Missouri desires to proceed with his bill, but I will ask to interrupt him for just a moment.

Mr. TYDINGS. Mr. President, will the Senator yield for just a moment?

Mr. HARRISON. I have the floor, but I will yield to the Senator from Maryland.

Mr. TYDINGS. Mr. President, I should like to ask the Senator from Washington if he will tell us whether or not there is any likelihood of the passage of a river and harbor bill? Baltimore is the second port of the country in exports and imports; the Rivers and Harbors Committee of the House are favorable to giving it a very much needed improvement; the Army engineers have recommended the project, which has been worked upon for three years; and we should like to know whether or not there is any use to contemplate an authorization for that project at this session of Congress, or whether we will have to abandon it and wait until another session?

Mr. JONES. Mr. President, if the Senator from Mississippi will permit me, I should like to say that I have not made up my mind definitely as yet. I received this letter from the Chief of Engineers only on Saturday, and want to put it in the RECORD so that all Senators may read it.

Mr. HARRISON. The Senator would not have us understand that the Chief of the Board of Army Engineers is opposed at this time to any rivers and harbors bill, adopting projects recommended by the Board of Army Engineers?

Mr. JONES. They have not been asked whether they are opposed or not. I simply asked for information, and that they have furnished without expressing an opinion as to what we should or should not do. I did not ask for their opinion; I asked them for certain facts. They give those facts in this letter and I want to put them in the RECORD, so that all Senators may see them.

Mr. HARRISON. I hope the Senator has more information there and more facts than he has given to us in answer to my question and in answer to the question of the Senator from Maryland.

Mr. JONES. I have stated just in a general way the information that is given here a little bit more in detail; but the substance of it is that the projects that have been adopted, that have been commenced but not completed, or that have not been commenced, amount to over $243,000,000.

Mr. HARRISON. Yes; but the Senator realizes that there are some 50 projects—I have a list of 41 here in my hand—that have been recommended by the Board of Army Engineers but not yet adopted by Congress; and consequently no appropriation can be made to carry on that work until they have been adopted by Congress.

Mr. JONES. Certainly; I know that; but we are not going to recommend an appropriation for that as long as there are $243,000,000 of projects that have been adopted but are uncompleted. We will appropriate $50,000,000 a year; but, in my judgment, unless there is something that is extremely emergent we will not abandon the projects that have already been adopted and pressed by Congress to take up something just lately adopted.

Mr. HARRISON. Then, as I understand the Senator, he is opposed to the passage at this Congress of a rivers and harbors bill adopting the new projects that have been recommended by the Board of Army Engineers?

Mr. JONES. No; I said that I had not yet definitely made up my mind with reference to the matter.

Mr. HARRISON. Does the Senator think he will make up his mind by the 4th of March, when this Congress adjourns?

Mr. JONES. Yes; I will make up my mind before very long.

Mr. HARRISON. I think everyone can see that the Senator from Washington is not very much in sympathy with the passage of a rivers and harbors bill.

Mr. JONES. Mr. President, I ask permission to have printed in the RECORD this copy of a letter from the office of the Chief of Engineers.

Mr. HARRISON. I should like to have it printed.

Mr. BROOKHART. Mr. President, will not the Senator have the letter read? It is an important letter. I am familiar with some of its provisions.

Mr. JONES. It does not name the particular projects.

Mr. BROOKHART. I will ask that the letter be read, however. It contains important matters.

The PRESIDING OFFICER. Without objection, the clerk will read the letter.

Mr. SWANSON. Mr. President, before the letter is read I should like to ask a question. Do I understand that there will be no cessation or reduction in the appropriations that are being made each year now for the projects that have already been adopted by Congress?

Mr. JONES. I can not speak authoritatively on that subject. It is my understanding and my judgment that we will make an appropriation. I have not looked up the matter to see what the average estimates were; but we have been appropriating $50,000,000 now each year for several years, and I take it we will continue that.

Mr. SWANSON. As I understand, there is no purpose to reduce that appropriation of $50,000,000 to be applied to existing projects that have been approved?

Mr. JONES. Certainly there is no purpose on my part.

Mr. SWANSON. And the Senator is satisfied that that will be done.

As to the additional projects referred to by the Senator from Mississippi, it does seem to me that the projects that have been examined and ascertained to be necessary for the commerce of this country and its development should be approved; and then, with those that have already been approved and those approved at this session, we can form an idea of the amount of money needed to complete what is necessary for the commerce and development of the country.

I simply want to suggest that no appropriation would be made for these projects immediately, but the matter would be settled at this time, while the evidence is fresh; the examinations have been made; the engineers are available for the committee to hear now. Very frequently their assignments are changed from one section of the country to another. This evidence would not be available next year as satisfactorily as it is now; and it does seem to me the wise thing to do would be to take the projects that have been examined, as to which the evidence is available to Congress now, have them approved, and then let Congress determine what is the fair amount of money available for the completion of the projects approved at this session and those already approved.

I do hope the Senator and his committee will take that view of the matter. I think it is a wise view, a just view, and a proper view. It does not mean any increased appropriation at this time, but it means the settlement of matters that have been the subject of investigation for years.

Mr. FLETCHER. Mr. President, the last river and harbor bill passed by Congress was passed in February, 1927. We have not had a bill since then. If we do not have a bill at this time the matter will go over until next session, and about three years will elapse between river and harbor bills.

Heretofore we have been pursuing the policy of having a bill every year; but even if this bill passes at this session, we can not have a bill before two years will have elapsed. February, 1929, is as soon as we could pass this bill. The bill has been reported in the House by the Rivers and Harbors Committee. It is pending there.

The impression has gotten abroad that the President is opposed to river and harbor legislation. I rather doubt that. I think, perhaps, the President is opposed to increasing appropriations, having in mind the idea that a new bill would call for additional appropriations at this time. That would not follow, however. This river and harbor bill is a legislative matter. In pursuance of that bill Congress legislates respecting projects that have been surveyed and reported on by the Chief of Engineers. After we legislate regarding these projects in the river and harbor bill, adopting certain projects and providing for further surveys, then we make appropriations later on as we see fit and as the money can be used. It is not necessary to appropriate $100,000,000 a year if the engineers tell us that they can not economically use more than $50,000,000; and we are governed very largely by their judgment as to the amount of money which they can profitably employ in completing the projects which Congress has adopted from year to year.

There would not be any danger of unbalancing the Budget if Congress should pass this bill providing for new projects and new surveys, because the appropriations under the bill would not be made until the next Congress; so I think we ought to go on and legislate respecting rivers and harbors and not wait three years between bills on the subject. Later on, after the legislation is passed and the projects have been adopted, we can attend to the matter of appropriations. That will be done at the next session. In other words, appropriations under this bill will not be charged to this session and will not interfere with the Budget that has been arranged for this session of Congress. This is merely a legislative matter, an authorization respecting certain projects. As I say, the last bill we passed was passed in February, 1927. We ought to have this bill by February, 1929, I think, in justice to the projects that are pending and that are worthy and have been favorably reported on by the Chief of Engineers.

I hope, therefore, that the legislation will proceed; and I am inclined to think that if it can be made clear to the President that the bill does not call for appropriations at this session of Congress he will not have any objection to it. I can see very well how the Chief of Engineers, impressed with this attitude on the part of the President, would be very careful about making replies to inquiries on this subject; and perhaps by reason of the fact that the engineers have a big job in connection with the Mississippi River he may feel that they have enough work to do without going on further with river and harbor improvements generally, and may hestiate to advocate any new work. I think, however, that if necessary we ought to add to the force of engineers and let the rivers and harbors be improved as they are needed over the country.

I hope this bill will be acted on favorably and come to the Senate, and that we will be able to pass it at this session.

Mr. RANSDELL. Mr. President, I think the statement made by the Senator from Florida [Mr. FLETCHER] is very wise. I do not think any of us have quite enough light on this subject to decide just exactly what we should do at this time. My understanding is that the Board of Engineers for Rivers and Harbors has approved quite a number of projects. If I am correctly informed, it is around some $50,000,000 worth. How we can proceed intelligently in making general appropriations for rivers and harbors, how we can act wisely on the $243,000,000 worth of approved projects which the Senator from Washington says we have before us until we know about these other projects is an enigma to me.

My long experience in these matters teaches me that the engineers frequently propose amendments to a river and harbor project. A harbor, say, has a depth of 26 or 28 feet, and they suggest that the project be changed so as to provide a depth of 28 or 30 feet. That would be in the nature of a new project; and yet to act intelligently, to appropriate money wisely, we ought to have before us the latest available information. In two years' time there may have been a great many changes; and, as the Senator from Florida suggests, we have not had a bill for two years. It will have been a little more than two years before we can have one; and certainly no harm can come from having the Commerce Committee call the engineers before them and see what light they can throw upon this subject.

I sincerely hope the Senator from Washington will not consent to doing away with a river and harbor bill unless he is obliged by the vote of his colleagues to do so. I hope we will have the matter investigated by the Commerce Committee and act with more information than any of us have now.

Mr. HAWES. Mr. President——

The PRESIDING OFFICER. The Senator from Iowa [Mr. BROOKHART] requested that the letter presented by the Senator from Washington be read. Does the Senator from Iowa insist on that request?

Mr. BROOKHART. Not if the Senator from Missouri desires to proceed.

Mr. HAWES. I should prefer to proceed, Mr. President.

Mr. BROOKHART. I withdraw the request.

The PRESIDING OFFICER. Without objection, then, the letter will be printed in the RECORD.

The letter is as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, December 14, 1928.

Hon. WESLEY L. JONES,
United States Senate, Washington, D. C.

MY DEAR SENATOR: 1. I have the honor to acknowledge receipt of your letter of the 7th instant, requesting certain specific information relative to the status of river and harbor projects.

2. In reply, I am pleased to advise you as follows concerning the questions propounded in your letter:

First. "How many harbor projects have been adopted by Congress that are under way but uncompleted?"—Answer: 146.

Second. "How many harbor projects have been adopted by Congress but not yet started?"—Answer: 9.

Third. "How many river projects have been adopted by Congress, started, but not yet completed?"—Answer: 112.

Fourth. "How many river projects have been adopted by Congress but have not yet been commenced?"—Answer: 9.

Fifth. "What is the estimated cost of all harbor projects heretofore adopted by Congress, not commenced or not yet completed?"—Answer: $117,583,192.

Sixth. "What is the cost of the river projects heretofore adopted by Congress not commenced or uncompleted?"—Answer: $125,520,460.

Seventh. "What amount is estimated to be necessary to complete all projects, both river and harbor, that have heretofore been adopted by Congress?"—Answer: $243,103,652.

Eighth. "What amount is estimated to be necessary to complete all river and harbor projects adopted by Congress that have not yet been commenced?"—Answer: $32,307,550.

3. In connection with the second and fourth questions, it is desired to state that the reasons why work on the projects in these categories has not been actually commenced, pertain to the failure of local interests to meet conditions of cooperation as imposed by Congress.

Progress is, however, being made along this line and is more advanced in some cases than in others. Funds aggregating $905,000 have been

either allotted or reserved for commencing work on the harbor projects. The harbor projects upon which work has not been commenced are as follows:

Project:	Appropriations to date
Westchester Creek, N. Y	None.
Flushing Bay Harbor, N. Y	None.
Glencove Creek, N. Y	None.
Channel connecting Gravesend Bay with Jamaica Bay, N. Y	None.
Great Kills, State Island Sound, N. Y	None.
Delaware River, Philadelphia-Trenton (held in reserve)	$500,000
Shipyard Creek, S. C	None.
Monterey Harbor, Calif	None.
San Joaquin River, Calif	405,000
Likewise $4,568,500 has been allotted or held in reserve for commencing work on the river projects. The projects in this category are—	
Inland waterway, Beaufort-Cape Fear River, N. C	800,000
Northeast (Cape Fear) River, N. C	None.
Intracoastal waterway, Jacksonville-Miami, Fla. (held in reserve)	500,000
La Grange Bayou, Fla	None.
Bayou Bonfouca, La	16,500
Little Caillou Bayou, La	85,000
Louisiana-Texas intracoastal waterway	3,100,000
Mill Creek and South Slough at Milan, Ill	67,000
Tolovana River, Alaska	None.

4. It is desired to point out that the data supplied above does not include the flood-control projects for Sacramento River and Mississippi River, which are estimated to cost $12,830,100 and $311,000,000, respectively.

Very truly yours,

HERBERT DEAKYNE,
Brigadier General, Acting Chief of Engineers.

GREETINGS FROM MEXICAN SENATE

Mr. LARRAZOLO. Mr. President, I have just this minute received a telegram purporting to come from the Senate of the Mexican Congress and transmitting greetings to this honorable body. I ask the clerk kindly to read it.

The PRESIDING OFFICER. Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

MEXICO CITY, *December 17, 1928.*

Hon. O. A. LARRAZOLO,
United States Senate:

Senate of Mexican Republic in extraordinary session to-day requested me to transmit their greetings and best wishes to United States Senate. Hope you will convey this message.

BRONSON CUTTING.

PRISON-MADE GOODS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

Mr. HAWES. Mr. President, this subject has been before the Congress of the United States for many years. Bills similar to this have passed the House of Representatives three different times, and have been approved almost without opposition in the committee hearings. Senate bill 1940 has been before the Senate since last February. It is such a simple matter, and I am so confident that Senators want to vote upon it that I hope there will be no great delay.

The United States Government prohibits the importation of convict-made goods into the United States, and foreign governments prohibit the sale of American convict-made goods in their countries. This bill does not direct any State to do anything. Each State is permitted to handle its own affairs. Unfortunately, however, no great reform along this line can be brought about in the United States if a few States immorally, as I believe, try to sell their convict-made products in a State that prohibits their sale; so all that this bill does is to preserve the sovereignty of the individual State.

When a State expresses, through its legislative branch, its opinion on this question it should be respected by other States. All this bill does is to divest the convict-made goods of their interstate character upon their arrival in a State where the laws prohibit the sale of same.

Mr. GOFF. Mr. President, will the Senator yield for a question?

Mr. HAWES. Yes.

Mr. GOFF. Do I understand that the bill which we now have before the Senate is amended in any particular or is it the bill that came out of the Committee on Interstate Commerce?

Mr. HAWES. The bill has been amended in one particular. In response to the request of certain Senators to permit time for the States to adjust themselves to changes, the time has been extended from two years in the Senate bill to three years in the House bill. That is the only change.

Mr. GOFF. Do I understand that the wording in the Senate bill, which is to prohibit from interstate commerce "all goods, wares, and merchandise, manufactured, produced, or mined," has in any way been changed or amended?

Mr. HAWES. It has not; but the Senator from Mississippi has an amendment which he has given to the clerk, taking out the word "produced," and I will say to the Senator that this bill was examined by the Attorney General of the United States, and he has made a suggestion which I have embodied in the form of an amendment. Another amendment is pending, suggested by the Senator from Wisconsin [Mr. BLAINE], and there is no objection on the part of the proponents of this bill to any of those amendments.

Mr. GOFF. Then, as I understand it from the Senator's statement, he would have no objection to eliminating from the bill the word "produced"?

Mr. HAWES. No.

Mr. GOFF. So that would confine the bill, then, as the Senator proposes it, to manufactured or mined products?

Mr. HAWES. Practically; yes.

Mr. GOFF. And would permit anything of an agricultural character or nature which might reach the finished product stage to enter interstate commerce without objection, as far as the bill is concerned?

Mr. HAWES. As far as this bill is concerned.

Mr. BORAH. Mr. President, does the Senator strike out the word "produced"?

Mr. GOFF. "Produced."

Mr. BORAH. Suppose you had a shirt factory; the shirts would be "produced."

Mr. HAWES. I will say to the Senator from Idaho that I do not believe it is necessary to strike out that word, but I yielded my interpretation at the request of certain Senators, so that it might be quite clear that raw materials raised in agriculture would not be covered by the bill.

Mr. BORAH. If the Senator will pardon me for the suggestion, I think that could not accomplish that by merely striking out the word "produced." A manufactured article and an agricultural article are not separated in their designation in that way, in my judgment.

Mr. GOFF. Mr. President, if the Senator from Missouri will yield again, I would like to have the attention of the Senator from Idaho, if I can, for just a moment. A manufactured article is, of course, produced, but a produced article is not necessarily a manufactured article.

Mr. BORAH. Still, it may be.

Mr. GOFF. It still may be. What I want to have clearly before the Senate as we begin this discussion is just what this bill is, what its limitations are, so to speak, and how far-reaching it is in its effect. I would thank the Senator from Missouri if he would have that clarified as he proceeds in his argument. I do not want to interrupt the Senator, or interfere with his presentation of the matter.

Mr. SACKETT. Mr. President, will the Senator yield?

Mr. HAWES. I yield.

Mr. SACKETT. I understand the Senator is willing to accept the House amendment as to time?

Mr. HAWES. Yes.

Mr. SACKETT. Three years?

Mr. HAWES. Three years. The lawyers on the House committee, I think some 9 in number, and some 13 lawyers on the Committee on Interstate Commerce of the Senate, passed on the constitutionality of this bill. In addition to that, there will be found in the record a brief by Mr. Donald Richberg, with an exhaustive study of the subject; one by a firm representing the textile manufacturers of America, and, so far as I am concerned, after consultation with other lawyers, and with the legislative drafting committee, I have no doubt as to the constitutionality of this bill. Certainly its proponents would not have presented it if any doubt had remained in their minds.

This bill comes before us, urged, if you please, by an unusual combination of citizenship. Union labor, representing 4,000,000 union men and women, representing 1,000 central trades-unions and 35,000 local labor organizations, is asking for the passage of this bill.

The bill is supported by the General Federation of Women's Clubs. That is an association of all the women's clubs in America. In the report Senators will find that these splendid women are supporting this measure, and have supported it for years, for humanitarian reasons, because they have believed the prison contractor should be driven from the control of the prisoner, and for the further reason that their efforts in individual States where they have urged reform legislation were set at naught because some State, trying to exploit its own products, heartlessly, to the detriment of other States, was breaking down the effort of every State to legislate for itself.

There is, first, free labor, both union and nonunion. There is, second, the Federation of Women's Clubs, and, third, manufacturers representing $2,500,000,000 invested in industry, supporting this bill.

Recently Members of the Senate received a telegram, dated from Washington, signed by prison representatives, asking for another hearing. When the bill was before the committee last February a national meeting was held in Washington of the prison officials, and at their request they were given a special hearing on this subject, and they were given a special hearing on the House side.

Senators also received a petition signed, or supposed to have been signed, by other prison officials, under the post-office mark of Louisville, Ky. I have taken the time to go over that list of men, and I find that of the long list not more than five or six have failed to appear and be heard before committees both of the Senate and of the House.

The bill is so plain, so easily understood, and amendments have been offered in line with all the suggestions that have been brought to me or to the other proponents of the bill, that I know of no objection to its passage except from the prison contractor who has grown rich and powerful and brutal in his wealth, and from another class of honest prison officials.

These prison officials know that readjustment in a few States will be necessary. They do not want it done in their particular State, but they demand the right of sending into other States products which the law of those States refuse to permit the penitentiaries of those States to put upon the market.

Mr. GOFF. Mr. President, will the Senator yield?

Mr. HAWES. Certainly.

Mr. GOFF. How many States are there that prohibit, by State law, the sale of prison-made goods in their States?

Mr. HAWES. I could find that in the record.

Mr. GOFF. Is it not approximately 13?

Mr. HAWES. The Senator is thinking of 13 States that have what is called the State-use system.

Mr. GOFF. I know that many States have the State-use system and other systems, but I wanted to know, if the Senator could tell us, for the information it would give, the number of States which by their State enactment prohibit the sale of prison-made goods in the States.

Mr. HAWES. I could stop and find the data; but I think the Senator will learn that as the debate proceeds.

Mr. WATERMAN. Mr. President, does the Senator propose to discuss the constitutionality of this measure further than he has done so?

Mr. HAWES. I do not. My own State is one of the chief offenders, and if I listened to the prison officials of my own State, I would not press the consideration of this bill. But Senators will find in the record one statement of a situation where on one occasion in one sale a million dollars worth of overalls were put upon the market at approximately $3 less than the cost of manufacture in the free industries.

There will be found in the record, and I say this without attempting to be offensive, a report from the Federal Trade Commission which discloses an amazing situation. The penitentiary of Indiana, while prohibited by the State laws of Indiana from selling convict-made goods in the markets of Indiana, were branding shirts and clothing with the brand of manufacturers and were turning out shoes with the Army last and the American eagle on the bottom of the shoes, and selling them in States other than Indiana.

Mr. GOFF. Mr. President, will the Senator yield?

Mr. HAWES. Certainly.

Mr. GOFF. I would ask if that state of affairs, which I do not, of course, question in view of the Senator's statement, was ever brought to the attention of those officials of the State of Indiana whose duty it would be to bring it to the attention of the legislative body of that Commonwealth?

Mr. HAWES. Yes. I brought it to their attention myself.

Mr. GOFF. Would the Senator state what action was taken by the State officials?

Mr. HAWES. Apparently no action, because I have a communication sent me by some convicts working in the penitentiary showing facts which are very interesting. Shirts are made and branded, for instance, "Cownie's dependable garments, Des Moines, Iowa," made in the Indiana Penitentiary. Here is the "American eagle" brand, showing men going to war, sewed on shirts sold in Army stores, which could not be sold under the law in the State of Indiana. So it goes. In the report made by the Federal Trade Commission is the statement that this concern, in a small room in Chicago, with great advertisements was proclaiming that its factory was in Indiana, and the factory was the penitentiary of Indiana.

Mr. GOFF. I do not understand the distinguished Senator from Missouri to impute the offenses of Indiana to other States that are innocent of any such charge?

Mr. HAWES. I think either directly or indirectly the law is generally violated. I will say to the Senator from West Virginia that, in my opinion, if his State, to the detriment of my State and other States, tries to sell its convict-made goods in States where public sentiment in that respect is opposed to it, it is doing an immoral thing.

Mr. GOFF. The Senator's State is just as guilty then as my State, according to the Senator's statement, is it not?

Mr. HAWES. Certainly.

Mr. GOFF. If my State does anything wrong, according to the standard of conduct which the Senator is drawing from the misconduct of Indiana, then the Senator's State is just as guilty as West Virginia.

Mr. HAWES. Exactly; and just as heartily condemned by me.

Mr. FESS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Ohio?

Mr. HAWES. I yield.

Mr. FESS. In my State there has been what we call a prison-reform movement in order to employ prison labor under restrictions. As the Senator knows, we have in Ohio a famous prison farm not very far from the capital city, on which the prisoners are permitted to work and to labor. We use them upon our road construction. But we do have a rigid law against prison-made goods going into competition with other goods. Yet in spite of all the efforts we have put forth on prison reform on behalf of the things that the opponents of the bill are claiming, to give them employment, and in spite of our efforts to reduce the evil which we prohibit in our State, other States or contractors in other States are flooding our State with goods that we would not permit to be manufactured at all in Ohio, and we are perfectly helpless and impotent. It seems to me that ought not to be permitted. The pending bill looks to a correction of that situation, does it not?

Mr. HAWES. The Senator illustrates the State that prohibits the sale of convict-made goods. Let me give the Senator the other side of the story. We will take the State of Connecticut. It has a very prosperous and successful shirt factory and some other factories in its prison. It can not use those goods within its own borders, but is opposing this bill because we are going to destroy its markets in Ohio, Pennsylvania, New York, and New Jersey, where the laws prohibit the sale of convict-made goods.

Mr. FESS. That is a concrete illustration of the condition from which we are suffering.

Mr. GOFF. Mr. President——

Mr. HAWES. I yield to the Senator from West Virginia.

Mr. GOFF. If the Senator from Missouri will permit me, I want to ask the Senator from Ohio a question. Am I to understand that in the State of Ohio there is a law which prohibits the sale to the people of Ohio of prison-made goods?

Mr. FESS. In the open market.

Mr. GOFF. Then the complaint, as I understand it, of the Senator from Ohio is that the officials of the State of Ohio are unable to enforce the law of that State which prohibits the sale of convict-made goods in that State?

Mr. FESS. No. Officials of the State of Ohio are impotent to prevent interstate business in convict-made goods made in the State of West Virginia, for instance, if it wanted to send them into our State. In other words, the officials of Ohio can not interfere with interstate trade. We can handle intrastate trade, but we can not prevent interstate traffic in such goods. What we are asking in this bill is power to control the latter situation.

Mr. GOFF. May I ask the Senator this concrete question: When goods are manufactured in Indiana or West Virginia and are shipped into the State of Ohio and received by the consignee, then their interstate-commerce character has ceased, has it not, and the laws of the State of Ohio would apply?

Mr. FESS. I do not so understand it.

Mr. GOFF. I will say to the Senator that when I come to discuss the constitutional features of the bill I will make clear that point under the decisions of the Supreme Court as well as the courts of the other States of the Nation. If that is the situation with which the State of Ohio is confronted, it would seem to me that Ohio can not enforce her own laws and is applying to the Federal Government for protection.

Mr. FESS. Oh, no; that is not the point in question at all. Ohio can enforce her own laws in matters over which the laws give her control, but Ohio can not go into the field of the Fed-

eral Government and enforce laws governing matters over which the State has no control.

Mr. HAWES. Mr. President, there is only one sound objection to the pending bill—I will not say that it is a sound objection but it is a reasonable objection. Prison wardens say that the passage of the bill will bring unemployment and idleness. We have in this body two Senators who were formerly governors of New Jersey. The senior Senator from New Jersey [Mr. EDGE] told me of an incident that illustrates what can be done if a State wants to do it. After his election as Governor of New Jersey he was congratulated by Mr. Dwight Morrow, now our ambassador to Mexico, who told him of the fine opportunity he had for public service. Governor EDGE thought about it and finally sent for Mr. Morrow and said, "I have a problem that should be solved. We must eliminate the prison-labor contractor, and yet we must keep the prisoners employed. Will you take charge of the work of reforming the New Jersey Penitentiary?" Mr. Morrow did so. Another governor of the State of New Jersey is the present junior Senator from that State [Mr. EDWARDS]. Both of these Senators will verify my statement that prisoners in the New Jersey Penitentiary are not idle but are employed, and that they are kept exclusively upon what is called State-use work.

There are some indications of unemployment in the statistics which come from the larger States, and yet New York, Pennsylvania, Ohio, and New Jersey have the State-use system, and any one of them has more prisoners to contend with than some 25 or 30 other States in the Union. Yet the four keep their prisoners employed. Their problem is more acute. It is more difficult of solution.

I do not want to occupy any further time now except to say just one thing further. There can be no prison reform in the penitentiaries of the States if certain States are permitted to send into the various other States their prison-made goods. The United States Government can control the situation, because the jurisdiction of our Federal prisons is all under one head. Let the union-labor people and the free manufacturer and the women work out their problems in the States. There is nothing in the bill that will compel any State to use its prisoners in any way other than in the manner in which the State wants it done, but it will keep the prison contractor of West Virginia and the prison contractor of Missouri, if it may please the Senator from West Virginia for me to place him there, from putting his prison-made goods on the markets of the States that have prison reform.

The bill does not interfere with the rights of States; but I am not going into the constitutional question now. That will be argued, I understand, by the Senator from West Virginia [Mr. GOFF]. I simply submit to Senators the primary facts in the case, supported by the briefs which I had placed in the record and which appeared in yesterday's RECORD. I submit the further fact that the lawyers of the House Committee on Labor and the lawyers of the Senate Committee on Interstate Commerce certainly would not have reported to the House or the Senate a bill about whose constitutionality there was any question in their minds.

Mr. President, all that the proponents of the bill want is a vote.

Mr. SACKETT. Mr. President, before the Senator from Missouri takes his seat will he yield to enable me to ask him a question?

Mr. HAWES. Certainly.

Mr. SACKETT. I would like to know whether the Senator has any figures to show what percentage of goods in general the convict-made goods amount to in interstate trade?

Mr. HAWES. Subject to review of the record, I would say approximately $40,000,000 to $50,000,000 a year.

Mr. SACKETT. Does the Senator know what percentage of the total amount that would be?

Mr. HAWES. A very small proportion.

Mr. SACKETT. About 1 per cent, is it not?

Mr. HAWES. Yes.

Mr. SACKETT. Can the Senator give us any statistics as to the States which have the no-employment system as to the amount of idleness in their penitentiaries?

Mr. HAWES. Yes, sir; I have those figures before me.

Mr. SACKETT. I should like to get that information.

Mr. HAWES. Mr. President, before concluding, let me say that the Senator from Kentucky has suggested another thought to me. In 1924 the complaint of union labor and the complaint of the manufacturers had become so great that the question of the sale of convict-made goods was taken to the office of Secretary Hoover, then Secretary of Commerce. He considered the matter of such grave importance that he appointed a commission, composed of the president of the American Federation of Labor, the president of the United States Chamber of Commerce, and the representatives of various industries, including a prison contractor. Only day before yesterday the report of that commission was completed, and Senators who are interested in an exhaustive study of the question will find it in the Department of Commerce report, which has not yet been made a public document but is in the RECORD this morning. There is no single question such as that propounded to me by the Senator from Kentucky that is not answered in to-day's RECORD at some place.

Without entering upon the constitutional argument which will follow, I should like to ask the Senator from West Virginia a question.

Mr. GOFF. Certainly.

Mr. HAWES. Does the Senator believe it is right and moral for his State and my State to dump prison-made goods into the State of Ohio, where the manufacture of such goods is prohibited?

Mr. GOFF. Is the Senator asking me about the moral right?

Mr. HAWES. Yes.

Mr. GOFF. I think it is the moral right of the penitentiaries and institutions of incarceration in any State of this Union, until there is a law prohibiting it, to sell their prison-made goods wherever they can find a market. If those goods are made in pursuance of the moral plan of furnishing employment to those who are confined in State institutions, I see nothing immoral in the making of prison goods. I see nothing more immoral in the making of prison goods than in the making of sweatshop goods. I think the sanitary conditions to-day in prisons are very much better than they are in many of the sweatshops of the United States which I have visited. The Senator is asking me the question strictly as a moral one?

Mr. HAWES. I am asking it as a moral question.

Mr. GOFF. And I have answered it strictly as a moral question.

Mr. HAWES. No; not as yet. The Senator has answered that his State has the moral right to have its prisoners manufacture goods. I ask the Senator whether a State has the moral right to buccaneer in another State, to act as a poacher in another State in violation of the wishes of that State, and in violation of the spirit of comity that ought to exist between States? That is the moral question.

Mr. GOFF. Now, I will answer that moral question by, of necessity, invading the legal field, which I am compelled to do. If the State of Missouri or the State of West Virginia manufactures an article by convict labor and attempts in the contract of sale to provide the market in which it must be shipped for sale, then the State so attempting violates the liberty of contract as that is insured in State and Federal constitutions to the citizens of the United States. I can not sell A an article, forcing him to buy that article and curtail its sale with a condition that limits and restricts the market in which he must sell it. Therefore, I say that it is immoral to violate a constitutional right, just as it is immoral to violate either a sanitary or a health regulation.

Mr. HAWES. So the Senator puts a violation of a constitutional right on the same plane as he puts the act of a legislature which is doing a thing which is objectionable and dangerous to other States?

Mr. GOFF. I will answer the Senator's question directly in this way: If the State of Missouri or if the State of West Virginia, in their respective sovereign capacities, sold prison-made goods directly outside of their States, and sold them to the States in their sovereign capacity, then, of course, the moral question would be eliminated. If the State of Ohio would not buy, then the question could not arise. If the State of Ohio has a law, as the Senator from Ohio says it has, against the sale of prison-made goods, then our respective States in their sovereign capacity could not sell to the State of Ohio. But I say it is an immoral thing for the State of Missouri or the State of West Virginia to offer to sell their prison-made goods and then say to the vendee of those goods, You can buy them solely upon the condition that you sell them in restricted markets.

Mr. HAWES. Now, let me state the exact situation. We will say that the State of Ohio, in order to protect the blind of that State from improper competition, does not permit the inmates of the Ohio penitentiary to make brooms, so that those blind people may proceed with their trade; and the State of Missouri sells its prison-made product of brooms in the State of Ohio and ruins the occupation of the blind by that act.

Mr. GOFF. May I answer the question there?

Mr. HAWES. Yes, sir.

Mr. GOFF. Why does not the State of Missouri pass a restrictive law in that regard, rather than asking the United States Government to attempt to invoke its interstate commerce

power to invade the rights of the sovereign States in the production and disposition of such goods which do not strictly fall within the prohibitions of interstate commerce?

Mr. HAWES. Because the State of Missouri knows that if it followed the example of New York and Ohio and New Jersey and Pennsylvania and other States and prohibited the sale of convict-made goods in Missouri, West Virginia, and Indiana would seek that as a market in which to sell the products of their penitentiaries. That is the reason this bill is suggested; so that each State may determine for itself a definite policy and not be interfered with in that policy by another State.

Mr. GOFF. Then, that whole argument comes down to this: Whether it be moral or immoral, legal or illegal, sovereign inability to accomplish certain things justifies the exercise of constitutional power by the Federal Government, if that power can be exercised.

Mr. HAWES. No; I do not think so. However, I will leave the constitutional question to others.

Mr. GEORGE. Mr. President, before the Senator from Missouri takes his seat, may I ask if he has agreed to accept an amendment making it clear that farm products produced by the prisoners of any State shall not be within the terms of this bill?

Mr. HAWES. I have. Such an amendment will be offered by the Senator from Mississippi [Mr. STEPHENS].

Mr. GEORGE. I so understood.

Mr. McNARY. Mr. President, will the Senator from Missouri yield for a question?

Mr. HAWES. Certainly.

Mr. McNARY. I could not hear the answer to the question propounded to him by the distinguished Senator from Georgia with respect to the elimination of agricultural products from the operation of this bill.

Mr. HAWES. The Senator from Mississippi [Mr. STEPHENS] and a number of other Senators were anxious that agriculture should not be interfered with in this bill. The Senator from Oregon has a similar situation in his own State. So by amendment the word "produced" will be stricken out, which will confine the inhibition to manufactured goods. In my opinion, it covers the situation in the Senator's State and all other States as to agricultural products.

Mr. McNARY. Probably so. I was interested in the Senator's answer to the query. Will the Senator accept the proposal offered by the Senator from Mississippi?

Mr. HAWES. Yes, sir.

Mr. McNARY. Very well.

Mr. CURTIS. Mr. President——

Mr. McNARY. I shall probably want to suggest to the Senator another matter in connection with this matter, but if the Senator from Kansas desires to have a recess taken, I will not do so at this time.

Mr. CURTIS. I will ask the Senator from West Virginia if he desires to proceed to-night.

Mr. GOFF. No; I prefer to go on to-morrow, because I expect to go into this subject exhaustively from my point of view and cover the constitutional phase of the question, and it will take me considerably over an hour, I think, to present it to the Senate in the way in which I think it should be presented.

Mr. TYDINGS. I should like to ask the Senator from Kansas if he can give us an idea as to when a vote will probably be had on the bill of the Senator from Missouri?

Mr. CURTIS. I am very sorry it is impossible for me to give the Senator any definite information on the subject. I hope, however, the bill will come to a vote to-morrow.

Mr. TYDINGS. I thank the Senator.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move the Senate take a recess until to-morrow at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 30 minutes p. m.) the Senate took a recess until to-morrow, Tuesday, December 18, 1928, at 12 o'clock meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 17, 1928

MEMBER OF FEDERAL BOARD FOR VOCATIONAL EDUCATION

Claude M. Henry.

COMMISSIONER OF IMMIGRATION

Thomas B. R. Mudd to be commissioner of immigration, port of Baltimore.

UNITED STATES CIRCUIT JUDGE

Smith Hickenlooper to be United States circuit judge, sixth circuit.

UNITED STATES DISTRICT JUDGES

Wayne G. Borah to be United States district judge, eastern district of Louisiana.

George P. Hahn to be United States district judge, northern district of Ohio.

Samuel H. West to be United States district judge, northern district of Ohio.

Nelson McVicar to be United States district judge, western district of Pennsylvania.

PROMOTIONS IN THE REGULAR ARMY

GENERAL OFFICERS

Casper Hauzer Conrad, jr., to be brigadier general.

Edward Albert Kreger to be Judge Advocate General.

AIR CORPS

To be second lieutenants

Elmer Perry Rose.
John Adams Austin.
Robert Coleman Ashley.
Jordan Frank Haney.
Ford J. Lauer.
Fay Oliver Dice.
Edward Lester Meadow.
Herbert Everett Rice.
Edward Harold Porter.
Joseph Hampton Atkinson.
Robert Leonard Schoenlein.
Frederick William Ott.
Homer Ceylon Munson.
Wentworth Goss.
James Leslie Daniel, jr.
Budd John Peaslee.
Lee Francis Duncan.
John Franklin Egan.
Edgar Russell Todd.
Arthur LaSalle Smith.
Donald Dewey Arnold.
Clarence Thomas Mower.
Louie Percy Turner.

APPOINTMENTS IN THE REGULAR ARMY

CORPS OF ENGINEERS

To be second lieutenants

Luke William Finlay.
James Laffeter Green.
Thomas Alphonsus Lane.
Frederick Jensen Dau.
Albert Lea Alexander, jr.
William Tell Hefley, jr.
Roland Clough Brown.
Samuel Roberts Browning.
Lyle Edward Seeman.
John Craig Banta.
Raphael Brill Ezekiel.
William Dixon Smith.
David Andrew Watt, jr.
Rudolph Ethelbert Smyser, jr.
Charles Daniel Curran.
Francis Howard Falkner.
Alan Johnstone McCutchen.
David William Heiman.
Robert John Fleming, jr.
David Peter Laubach.
Benjamin Smith Shute.
William Everett Potter.
Edmund Koehler Daley.
William Joseph Matteson.

SIGNAL CORPS

To be second lieutenants

Richard Morris Ludlow.
Edward Bernard Keller.
Edward Murphy Markham, jr.
Dwight Lewis Mulkey.
Charles Tileston Leeds, jr.
Frank Jerdone Coleman.
John Benjamin Allen.
Russell Alger Wilson.
Elmo Stewart Mathews.
Thomas Joseph Cody.
Carl Herman Sturies.

CAVALRY

To be second lieutenants

Theodore Scott Riggs.
Thomas Fraley Van Natta, 3d.
Nelson Jacob DeLany.
Nathan Bedford Forrest, jr.
Robert Frederick Tate.
John Paul Breden.
Henry Francis Beaumont, 4th, jr.
Mayer Henry Halff.
Clayton John Mansfield.
Walter Edgerton Johns.
Charles Franklin Born.
Roy Henry Guertler.
Leslie Haynes Wyman.
Thomas Joseph Brennan, jr.
David Raymond Gibbs.
Alvord Van Patten Anderson, jr.
Frederick Lewis Anderson, jr.
Samuel Leslie Myers.
Joseph Anthony Michela.
Ralph Edward Koon.
Douglas Glen Ludlam.
James Lowman Hathaway.
George Albert Brickman.
Walter Emerson Finnegan.
Charles Ralph Pinkerton.

FIELD ARTILLERY

To be second lieutenants

Robert Scott Israel, jr.
Paul Lester Sanders.
James Elbert Briggs.
John Stewart Mills.
George Morris Cole.
Duncan Sloan Somerville.
David William Traub.
George Warren Mundy.
Lyndon Gibson Pearl.
Roscoe Charles Wilson.

Walter Edwin Todd.
Bryant LeMaire Boatner.
Church Myall Matthews.
Richard Jerome Handy.
Karl Gustaf Eric Gimmler.
Samuel Robert Brentnall.
Harvey Weston Wilkinson.
Frank Fort Everest, jr.
Frank Quincy Goodell.
Garrison Barkley Coverdale.
Mercer Christie Walter.
Robert Loyal Easton.
Elmer Briant Thayer.
James Stewart Neary.
Norris Brown Harbold.
John Cogswell Oakes.
George Raymond Bienfang.
Roger Woodhull Goldsmith.
Charles Grant Goodrich.
Paul Amos Gavan.
Thomas Lynch Rich.
Leroy Cullom Davis.
Robert James Dwyer.
John Honeycutt Hinrichs.
Richard Perry O'Keefe.
Thomas Joseph Counihan.
Ephraim Hester McLemore.
James Easton Holley.
Frederick G. Spitzinger, 4th.
Robert Faligant Travis.
John Dabney Billingsley.
John Bourke Daly.
William Henry Tunner.
Verdi Beethoven Barnes.
Edward Cassel Reber.
Stuart Glover McLennan.
John Alexander Samford.

COAST ARTILLERY CORPS

To be second lieutenants

Alfred Rockwood Maxwell.
Paul Harold Johnston.
William Henry Hennig.
John James Earle, jr.
Paul Denver Peery.
Daniel McCoy Wilson.
John Jordan Morrow.
Theodore John Dayharsh.
Leslie George Ross.
Marion George Pohl.
John Archibald Sawyer.
Thayer Stevens Olds.
Lewis Adam Vincent.
Robert George Butler, jr.
Robert Tryon Frederick.
Oren Ranald Meacham.
Howard Graham Bunker.
Gordon Roe Williams.
Allison Richard Hartman.
Legare Kilgore Tarrant.
Arthur Richard Thomas.
Paul Anthony Leahy.
Montgomery Breck Raymond.
Joseph Lovejoy, jr.
Samuel Egbert Anderson.
Everett Davenport Peddicord.
James Gallagher Bain.
August William Schermacher.
Robert Franklin Tomlin.
Louis Test Vickers.
Joseph Arthur Bulger.
Cyril Harvey McGuire.
Truman Hempel Landon.

INFANTRY

To be second lieutenants

Donald Bertrand Smith.
Webster Anderson.
Harry Cromartie Kirby.
Thomas Jennings Wells.
William Ross Currie.
Peter Duryea Calyer.
Walter Godley Donald.
John Blanchard Grinstead.
Howard Hillman Hasting.
John Southworth Upham, jr.
Robert Albert Howard, jr.
Henry Leo Flood.
Harry Warren Halterman.

Forrest P. Brown.
Conrad B. Sprott.
Edmund G. Oelkers.
Paul J. Loegel.
Ferris P. Floyd.

Harry E. Yarnell to be engineer in chief and Chief, Bureau of Engineering.
Jacob E. De Garmo to be lieutenant (junior grade).

MARINE CORPS

Frank J. Schwable to be assistant quartermaster.

To be colonels

Eli T. Fryer.
Richard P. Williams.

To be lieutenant colonels

Clayton B. Vogel.
Henry N. Manney, jr.

Jeter R. Horton to be assistant quartermaster.

To be majors

Cecil S. Baker.
John F. S. Norris.
Samuel L. Howard.
Lyle H. Miller.
Anderson C. Dearing.

To be captains

Louis G. DeHaven.
John Kaluf.

To be first lieutenants

Merlin F. Schneider.
Kenneth L. Moses.
Ira L. Kimes.
George F. Good, jr.
William C. Lemly.
Merrill B. Twining.
Frank H. Lamson-Scribner.
William J. Scheyer.
William W. Davidson.
Robert H. Rhoads.
Lawrence T. Burke.
Thomas B. White.
Thomas J. Walker, jr.
Maxwell H. Mizell.
Charles W. Kail.

To be chief marine gunners

Charles H. Eurton.
Walter G. Allen.

POSTMASTERS

INDIANA

Myrtle A. Schreiber, New Palestine.

MISSOURI

Ida A. Sack, Bosworth.
Fred Fielder, Clarksville.
Delph C. Simons, Grant City.
Delphia Johnson, Jerico Springs.
Mattie A. Campbell, King City.
Maurice V. Smith, Laddonia.
Amos E. Jennings, Miami.
Thomas M. Fowler, Nelson.
J. Frank Wilson, Palmyra.

Clyde S. Jones, Polo.
George R. Hendricks, Rutledge.
Joseph A. Davis, Waynesville.

NEBRASKA

Jesse G. Fountain, Dunning.
Bertha J. Widener, Kennard.
Oscar L. Reed, Page.
George Axen, Pilger.
Roy L. Ericson, Stromsburg.
Mabel E. Bigelow, Ulysses.
Grant S. Mears, Wayne.
Charles E. Waite, Whitman.

OREGON

Thurston V. Morgan, Cochran.

HOUSE OF REPRESENTATIVES

MONDAY, *December 17, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Let all the earth keep silence before Him! Not in the fear of a sudden impulse, but in the rapture of abiding mercy, we come to Thee, our Father. The echoes of Thy promises are with us and are the consolation of humanity; by them may we be enriched and ennobled. They quicken the truest and the best in manhood; do Thou glorify Thyself in us. Help us to keep our souls unspotted by being at home with Thee. Give us strength and courage to hold on to ourselves. In our weakness sustain us, and in our need do not abandon us. Always direct us to lift up the standards that nourish and inspire human possibilities and human progress. Amen.

The Journal of the proceedings of Saturday, December 15, 1928, was read and approved.

ENROLLED BILL SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 13990. An act to authorize the President to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased.

PERMISSION TO ADDRESS THE HOUSE

Mr. GARNER of Texas. Mr. Speaker, I ask unanimous consent that on Wednesday morning after the reading of the Journal and the disposition of matters on the Speaker's table I may address the House for 40 minutes.

The SPEAKER. The gentleman from Texas asks unanimous consent that on next Wednesday, at the conclusion of the reading of the Journal and disposition of matters on the Speaker's table, he may address the House for 40 minutes. Is there objection?

There was no objection.

SOME IMPLICATIONS OF THE ANNEXATION OF HAWAII

Mr. HOUSTON of Hawaii. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER. Is there objection to the request of the Delegate from Hawaii?

There was no objection.

Mr. HOUSTON of Hawaii. Mr. Speaker, in the RECORD of Saturday, December 15, on page 702 there is an article quoted that was prepared by newspaper men from the State of Minnesota with respect to farm relief, and in paragraph 5 thereof there is the following language:

> Consideration of the problems arising from the fact that the Philippines, Hawaii, Porto Rico, and supervised countries, such as Haiti, San Domingo, and Nicaragua, are and will continue to be agricultural countries, tending to compete unfairly with our continental farming. Development of our inland empire we suggest to be the wiser policy.

Mr. Speaker, my purpose in rising is to see that the word "Hawaii" may be eliminated from such a program. Hawaii is not a part of the island empire. It is an integral part of the United States, part of the inland empire, and therefore the problems that apply to the mainland or the continental part of the United States apply in equal force to Hawaii. We feel that as Alaska is always recognized as part of the United States proper that the incorporated Territory of Hawaii be included also in all plans for agricultural relief. Hawaii and Alaska pay all Federal income and corporation taxes and should therefore receive equal treatment with the States. The island possessions do not have to pay such taxes and are therefore in a different category. In this connection, Mr. Speaker, I wish to have permission to extend my remarks by inserting extracts from an article upon the government of Hawaii prepared by Professor Leebrick, of the University of Hawaii.

The SPEAKER. Is there objection to the request of the Delegate from Hawaii?

There was no objection.

Mr. HOUSTON of Hawaii. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

SOME IMPLICATIONS OF THE ANNEXATION OF HAWAII

The exact relationship of Hawaii to the United States of America resulting from annexation has never been clearly determined. Questions have been settled by administrative orders and practice, by judicial decisions and by congressional legislation from time to time. As problems arise they will continue to be settled in the same way and occasionally relationships now apparently settled will be reopened and adjusted. This practice has been going on continually. Recently through the Hawaiian bill of rights, passed by our legislature and recognized in part by Congress, Hawaii has gained the right to participate in certain national financial legislation on equality with the States. Other changes are needed and results may be secured by the continued presentation of the case of the Territory.

One of the more interesting questions arising out of annexation is the exact nature of our political relationship to the Federal Government. We often hear that "the ultimate destiny of Hawaii is statehood," or "it will not be long before Congress must provide some type of commission government for Hawaii because of the coming preponderance of voters of oriental ancestry." The courts in many cases have dealt with the words "incorporated" and "unincorporated" and "integral part of the United States," and have by decision and dicta said what these terms mean in relation to the cases brought before the courts. The results have not been satisfactory even to judges and attorneys, and the average citizen of Hawaii finds it impossible to understand just what the relationship is between the Territory of Hawaii and the Federal Government; sometimes we seem to be a real part of the United States and again we seem to be a stepchild.

It may be interesting, therefore, to review briefly the story of annexation in order to see what was in the minds of the two Governments at the time annexation became a fact.

In the first place, the proposition that Hawaii become a part of the United States was discussed early in the nineteenth century. The protecting arm of the United States was thrown around Hawaii as early as 1820. Time strengthened the bonds rather than weakened them, although there were times when it seemed probable that these islands might become subordinate to some other power. The general attitude of all American Secretaries of State was that the United States had a special interest in Hawaii and would not permit the kingdom to go under the control of any other power.

* * * * * * *

Annexation was first officially attempted in 1854, when a treaty with that as its object was drawn up and signed by the officials of both nations, but failed of ratification by the United States Senate because it provided for the admission of Hawaii as a State. The drafts of the treaty show that attempts were made to get Hawaiian officials, especially the King, to accept the status of a Territory, but this they refused to do.

The treaty of 1854 proposed the incorporation (of Hawaii) thereof into the Union of the United States as the means best calculated to attain these ends (security, etc.) and "perpetuate the blessings of freedom and equal rights to himself, his chiefs, and people * * * and the United States * * * actuated solely by the desire to add to their security and prosperity, * * * have determined to accomplish by treaty objects so important to their mutua' and permanent welfare."

"ART. I. His Majesty * * * cedes to the United States all its territories, to be held by them in full sovereignty, subject to the same constitutional provisions as other States of the American Union."

"ART. II. The Hawaiian Islands shall be incorporated into the United States" (and states that the subjects of the Hawaiian Islands) "shall possess and forever enjoy all the rights and privileges of the citizens of the United States in terms of perfect equality in all respects with other American citizens."

It should be noted that "integral part of" and "incorporated" are here used to denote the complete admission of Hawaii as a State like the other States and that the citizens of Hawaii were to have all the rights, etc., of citizens of the States.

This treaty failed of ratification, but the project of annexation was kept alive. The United States often demonstrated its interest in and a protecting attitude toward Hawaii.

Abraham Lincoln said of Hawaii in 1864 in a letter to Elisha Allen, envoy extraordinary from the United States to Hawaii: "Its people are free and its laws, language, and religion are largely the fruit of our own teaching and example." This is a strong statement of the attitude of the United States toward the Government created by the people of

Hawaii. It certainly would not have occurred to President Lincoln to annex Hawaii and give it a less free government that it then had.

In 1875 a step nearer was taken by the two countries, a reciprocity treaty was signed that year which went into effect the following year. The United States had now taken a position from which she could hardly withdraw.

The revolution of 1893 renewed the question of annexation. Negotiations were at once opened along lines similar to those of the treaty of 1854.

President Harrison, in his message transmitting the treaty to the Senate, February 15, 1893, said:

"Only two courses are now open; one, the establishment of a protectorate by the United States, and the other annexation, full and complete. I think the latter course, which has been adopted in the treaty, will be highly promotive of the best interests of the Hawaiian people, and is the only one that will adequately secure the interests of the United States."

The treaty contained the following phrases, among others, regarding annexation:

"* * * especially in view of the desire expressed by the said government of the Hawaiian Islands, that these islands should be incorporated into the United States as an integral part thereof and under their sovereignty, in order to provide for and assure the security and prosperity of the said islands * * *."

"ART. I. The government of the Hawaiian Islands hereby cedes, * * * absolutely and without reserve to the United States forever, all rights of sovereignty * * * and henceforth said Hawaiian Islands * * * shall become and be an integral part of the territory of the United States."

"ART. III. Congress shall within one year from the exchange of the ratification of this treaty enact the necessary legislation to extend to the Hawaiian Islands the laws of the United States, respecting the duties upon imports, the internal revenue, commerce, and navigation."

These paragraphs are found in the report of the Committee on Foreign Affairs of the United States Senate, February, 1894:

"Hawaii is an American State, and is embraced in the American commercial and military system. This fact has been frequently and firmly stated by our Government, and is the ground on which is rested that peculiar and far-reaching declaration so often and so earnestly made, that the United States will not admit the right of any foreign government to acquire any interest or control in the Hawaiian Islands that is in any way prejudicial or even threatening toward the interest of the United States or her people. This is at least a moral suzerainty over Hawaii * * *."

* * * * * * *

"In the absence of a policy to establish a colonial system and of any disposition for territorial aggrandizement, the Government of the United States looked with approbation and gave encouragement to the labors and influence of their citizens in Hawaii, in laying the groundwork of a free and independent government there which, in its principles and in the distribution of powers, should be like our own and ultimately become republican in form. This has been the unconcealed wish of the people of the United States, in which many of the native Hawaiians have participated."

After his inauguration in March, 1893, President Cleveland withdrew the treaty from the Senate and made an unsuccessful attempt to restore the monarchy. The Republic of Hawaii succeeded the provisional government, to exist until annexation could be brought about. The new constitution provided that "the President, with the approval of the cabinet, is hereby expressly authorized and empowered to make a treaty of political or commercial union between the Republic of Hawaii and the United States of America, subject to the ratification of the senate."

Almost immediately after the inauguration of President McKinley in 1897 a new treaty was negotiated and signed June 16, 1897.

The treaty stated that: "Those islands should be incorporated into the United States as an integral part thereof, and under its sovereignty" (and to that end they) "have determined to accomplish by treaty an object so important to their mutual and permanent welfare."

"ART. I. * * * the Republic of Hawaii is hereby annexed to the United States of America under the name of the Territory of Hawaii.

"ART. II. The President shall appoint five commissioners, at least two of whom shall be residents of the Hawaiian Islands, who shall as soon as reasonably practicable, recommend to Congress such legislation concerning the Territory of Hawaii as they shall deem necessary and proper."

President McKinley's message to the Senate on the treaty of 1897, dated December 6, 1897, stated that:

"Hawaii has shown her ability as a sovereign contractant to enter upon a conventional union with the United States, thus realizing a purpose held by the Hawaiian people and proclaimed by successive Hawaiian Governments through some 70 years of their virtual dependence upon the benevolent protection of the United States. Under such circumstances, annexation is not a change; it is a consummation.

"What the conditions of such a union shall be, the political relation thereof to the United States, the character of the local administration, the quality and degree of the elective franchise of the inhabitants, the extension of the Federal laws to the territory or the enactment of special laws to fit the peculiar condition thereof, the regulation if need be of the labor system therein, are all matters which the treaty has wisely relegated to Congress.

"If the treaty is confirmed, as every consideration of dignity and honor requires, the wisdom of Congress will see to it that, avoiding abrupt assimilation of elements perhaps hardly yet fitted to share in the highest franchises of citizenship, and having due regard to the geographical conditions, the most just provisions for self-rule in local matters with the largest political liberties as an integral part of our Nation will be accorded to the Hawaiians. No less is due to a people who, after nearly five years of demonstrated capacity to fulfill the obligations of self-governing statehood, come of their free will to merge their destinies in our body politic."

The first paragraph quoted above was included in the President's message of July 7, 1898, which reviewed the history of the projects of annexation. The following sentences are quoted from this message:

"The incorporation of the Hawaiian Islands into the body politic of the United States is the necessary and fitting sequel to the change of events which, from a very early period in our history, has controlled the intercourse and prescribed the associations of the United States and the Hawaiian Islands."

"* * * Annexation is not a change; it is a consummation.'

"I can not doubt, when the function of the constitutional treaty-making power shall have been accomplished, the duty of the National Legislature in the case will be performed with the largest regard for the interests of this rich insular domain and for the welfare of the inhabitants thereof." This last paragraph replaces the last two in the quotation from the earlier message.

While the Hawaiian treaty was under consideration by the Senate the Spanish-American War broke out. Hawaii did everything within her power to aid the United States. The need of Hawaii to the United States became very evident. As a result Hawaii was annexed by a joint resolution of Congress approved July 7, 1898. The preamble to the resolution cited:

"Whereas the Government of the Republic of Hawaii having, in due form, signified its consent, in the manner provided by its constitution, to cede absolutely and without reserve to the United States of America all rights of sovereignty of whatsoever kind in and over the Hawaiian Islands" * * *.

The act states:

"*Resolved, etc.*, That said cession is accepted, ratified, and confirmed, and that the said Hawaiian Islands and their dependencies be, and they are hereby, annexed as a part of the territory of the United States and are subject to the sovereign dominion thereof."

William R. Day, of the State Department, in a letter of instruction to the American minister in Hawaii, Mr. Sewall, on July 8, 1898, said:

"These recitals, it will be observed, are made in the language of the treaty of annexation, concluded at Washington, the 16th day of June, 1897. They, as well as the other terms of cession which have not only been agreed upon by the two Governments, but which have also been ratified by the Government of the Republic of Hawaii. The joint resolution, therefore, accepts, ratifies, and confirms on the part of the United States the cession formally agreed to and approved by the Republic of Hawaii.

"As by the adoption by the joint resolution the cession of the Hawaiian Islands and their dependencies to the United States is thus concluded, it is assumed that no further action will be necessary on the part of the Hawaiian Government, beyond the formalities of transfer. Should that government, however, desire to take any further action formally confirmatory of what has been done, no objection will be interposed on the part of the United States.

"At the ceremony when the exchange of sovereignty took place in Honolulu, August 12, 1898, Minister Sewall said: 'This joint resolution ratifies and confirms the cession formally consented to and approved by the Republic of Hawaii.' In response President Dole, for the Republic of Hawaii, replied: 'A treaty of political union having been made, and the cession formally consented to by the Republic of Hawaii having been accepted by the United States of America, I now in the interest of the Hawaiian body politic and with full confidence in the honor, justice, and friendship of the American people yield up to you as representative of the United States the sovereignty and public property of the Hawaiian Islands.'"

It is evident from these treaty stipulations and from the statements made by the Presidents of the United States and several Secretaries of State that both Nations agreed that Hawaii if annexed was to become an "integral," "incorporated" part of the United States; that the people of Hawaii had demonstrated their ability to govern themselves, and that after annexation the people would be more free, secure, and self-governing than they had been in the past. Indeed, this was one of the objects of annexation. None but a republican form of government was thought of or intended for Hawaii after annexation. To repeat what President Harrison said in 1897, "The wisdom of Congress will see to it that—the most just provisions for self-rule in local matters with the largest political liberties as an integral part of our Nation

will be accorded to the Hawaiians. No less is due to a people who, after nearly five years of demonstrated capacity to fulfill the obligations of self-governing statehood, come of their free will to merge their destinies in our body politic."

This represents the nature and the spirit of the treaty negotiated by the two independent Nations; these were the conditions under which their sovereignties were merged and which should define the relationship to the United States of the incorporated Commonwealth of Hawaii.

The Hawaiian commission, provided for in the joint resolution, met and drew up the organic act, which provided for the present liberal form of government for the Territory of Hawaii. In their report to the President they in no uncertain terms stated that the people of Hawaii were capable of self-government. Congress accepted their point of view. The report in part says:

"Much has been said to the effect that the policy or scheme of government for the Hawaiian Islands will be taken and accepted as an index or precedent to be followed in the plan of government for Porto Rico and the Philippines. In view of this apparent expectation or belief on the part of many good people in the United States, the commission deem it proper to say that the people of Hawaii are capable of self-government, and have proven this by the establishment of the Republic of Hawaii and the adoption of a constitution and code of laws which will compare favorably with those of any other government, and under such constitution and laws have maintained a stable government for several years worthy of a free people. The people of those islands are more or less familiar with the institutions and laws of the United States, while the laws of the little Republic are largely taken from the laws of this country.

"It can not be said that either the Porto Ricans or the Philippines are at all familiar with our system of government, or with any other based on the principles of liberty.

"The underlying theory of our Government is the right of self-government, and a people must be fitted for self-government before they can be trusted with the responsibilities and duties attaching to free government.

"These remarks are made to negative the idea that because the people of the Hawaiian Islands can, in the judgment of the commission, be consistently given self-government to an extent almost equal to that given the people in the States, it can be safely inferred that other insular possessions which the United States have or may acquire by treaty with Spain can be granted equal freedom in government."

In this manner it was officially decided, in accordance with the spirit of the negotiations, and in the manner provided for in the joint resolution of annexation, that the people of Hawaii were capable of self-government and a form of government was agreed upon and accepted by Congress.

* * * * * * *

On the other hand, the whole tenor of the negotiations, and of the resolution, point toward a more perfect government as conditions make it possible. This can only mean qualified statehood or full statehood some time in the future.

From the standpoint of international law when a State approaches another as an equal and voluntarily offers to cede its territory and sovereignty without price there can be no objection from other States and the two parties have a right to make any agreement they choose. The nation which becomes sovereign is morally bound by the obligations it assumed when it accepted the sovereignty of the other State to the arrangement. There is no question but that the United States understood that she was getting valuable territory, essential to her from a defense viewpoint and of economic importance, and that the population had been self-governing and expected to have at least the same freedom and democracy in government as prevailed at annexation and that the people legitimately hoped for a better government and, as conditions warranted, a more responsible position in the American Union. They had proposed annexation as a State; this they were not able to obtain, but they had no idea of accepting anything short of complete incorporation into the United States and becoming an integral part of the Union and receiving the full protection of the American Constitution. This agreement is a moral obligation upon the Government of the United States.

The joint resolution provided that the islands were to be "annexed as a part of the territory of the United States" and "subject to the sovereign dominion thereof." Just how much a part of the United States the islands became and when they were incorporated has been the subject of much speculation and of several Supreme Court decisions.

There is no question that they are incorporated now and became so either upon annexation or when the organic act went into effect in 1900. In Hawaii *v.* Mankichi (1903, 190 U. S. 197) Justice Brown held that "all provisions of the Constitution were extended to the islands." He then went on to show that there was a transitory period during which local laws rather than congressional legislation or constitutional provisions applied. (See Coudert, F. R., The Evolution of the Doctrine of Territorial Incorporation, especially pp. 22–51.) The spirit of the agreement has been kept.

The annexation of Hawaii by joint resolution rather than by treaty was discussed in the Senate Committee on Foreign Relations, while the treaty of annexation was under consideration, upon the precedent established in the case of the annexation of Texas and upon the ground that the Hawaiian Government, having agreed to the terms of the treaty negotiated for its annexation, Congress might legislate on the basis of such a treaty. Texas was admitted as a State. The Constitution gives authority to Congress to admit new States. It says nothing about Congress acquiring new territory. In the case of Hawaii, where no further diplomatic dealings were necessary, it would seem to be within the power of Congress to take action by joint resolution for the annexation. The power of annexation certainly lies in the National Government and the President is the proper channel for the negotiation of treaties. It is by treaty that territory is generally acquired, but this does not necessarily mean that the same result may be achieved by Congress in another manner. So when negotiations have been completed looking toward annexation there seems to be no constitutional reason why Congress can not complete the procedure by a joint resolution. The annexation of Hawaii by joint resolution of Congress was within the power of Congress, namely, to do all that is necessary or proper to carry into execution its power over foreign commerce and its power to make war and, consequently, to make proper provision for national protection, even to acquire territory for that purpose.

It is doubtful whether Congress in annexing Hawaii by joint resolution had the power to alter the terms agreed upon in the preceding treaty negotiations. Be that as it may, it is clear that Congress did not intend to make any changes because they specifically accepted the treaty and the American and Hawaiian officials understood that the act of Congress "accepts, ratifies, and confirms on the part of the United States the cession formally agreed to and approved by the Republic of Hawaii," and that therefore "no further action will be necessary on the part of the Hawaiian Government, beyond the formalities of transfer." This would not have been the case if the nature of the agreement had been changed because both parties would have to signify their acceptance to the new conditions. The United States could not peaceably annex Hawaii by her own acts without the consent of Hawaii any more than Hawaii could annex the United States in the same manner, since both were sovereign nations. The joint resolution was only equivalent to the ratification of the treaty by the Senate.

In the Constitution of the United States there is no provision expressed giving any power to Congress to acquire new territory. Power is implied under the war and treaty making provisions. In the Dred Scott case, Chief Justice Taney seems to have thought that the Federal Government has only the right to acquire territory to be made into States later. There is certainly no such limitation to be found in the Constitution and the Supreme Court has frequently declared that it will not examine the object for which power is exercised. Certainly, several of the territories and possessions were not acquired with the intention of making them into States. This may or may not have been the intention of Congress in annexing Hawaii by joint resolution. The treaty of 1898 is silent on this point so it is doubtful if Hawaii has a claim to statehood based on any contractual right. Yet Chief Justice Brown, in Downes *v.* Bidwell (182 U. S.), said: "Incorporation has always been a step and an important one, leading to statehood."

The power of Congress over the Territory of Hawaii has been the subject of careful study. A former colleague in the department of history and political science at the University of Hawaii, Mr. Robert Littler, in his forthcoming book on the Government of Hawaii and in his first article of a series which were printed last year by the Honolulu Star-Bulletin and later published in pamphlet form under the title The Government of the Territory of Hawaii, dealt with these questions at considerable length. Mr. Frederic R. Coudert, of the New York bar, in an address at the annual meeting of the Iowa Bar Association, Davenport, Iowa, June 18, 1926, spoke upon the Evolution of the Doctrine of Territorial Incorporation. This address has been printed in pamphlet form and is perhaps the most complete and recent treatment of this topic.

Dr. W. W. Willoughby in his book, The American Constitutional System (Century Co., New York, 1919), also treats these questions at considerable length.

It seems to be agreed that Congress in acting as the national authority to govern the Territories acts in three distinct capacities:

(1) As a constitutional convention to set up Territorial government.

(2) As a local legislature.

(3) As a national legislature to pass laws effecting the entire territory of the United States.

In all these capacities Congress must act within the Constitution. In legislating for States Congress has only that power delegated to it by the Constitution; in relation to Territories it has all powers not expressly withheld from it and only has powers similar to a State legislature over citizens of a State.

(1) In setting up a government for a Territory Congress is limited only by its own discretion, since it is exercising implied power, unless there is a moral obligation arising from the agreement or treaty

made when the Territory was acquired, as there was in the case of Hawaii.

The guaranty of a republican form of government found in Article IV, section 4, of the Constitution applies only to States.

In Binns *v.* U. S. (194 U. S. 491) the Supreme Court said:

"It must be remembered that Congress, in the government of the Territories as well as of the District of Columbia, has plenary power, save as controlled by the provisions of the Constitution; that the form of government it shall establish is not prescribed and may not necessarily be the same in all Territories.

"We are accustomed to that generally adopted for Territories of a quasi State government, with executive, legislative, and judicial officers and a legislature endowed with the power of local taxation and local expenditure, but Congress is not limited to this form."

Even if we agree with this, it can still be maintained that the terms of the agreement by which Hawaii became a part of the United States were at least morally and probably legally binding upon Congress. Mr. Littler does not agree with this view. He wrote: "Congress has the same plenary power over Hawaii in respect to the form of territorial government as over all the other Territories under American sovereignty." The same writer goes on to state that he believes Congress has power to establish a "commission" form of government over the Territory. By a commission form of government he means a small appointed governing group. For reasons stated above I differ from my former colleague.

(2) As a legislative body for the individual Territories Congress has less power than when acting as a constitution-making body, but more than when it acts as a national legislature. There are certain regulations concerning personal relations included in the term "police power" which are reserved to the States and not to the Territories as against Congress.

Many disputes have arisen over the power of Congress over its national legislation effecting Territories. Mr. Coudert discussed this topic in detail in his address referred to above. The so-called insular cases are the best-known decisions upon the subject. In Downes *v.* Bidwell (182 U. S. 244) it was the opinion of five judges "that the Constitution is applicable to Congress, acting as a national legislature, effecting Territories, depending on whether a given Territory has or has not incorporated into the Union, and that Congress has certain liberties in legislating for unincorporated Territories that it does not have in passing laws for incorporated ones."

Congress, it would seem, is controlled in both cases by "those limitations which, either because they are protective of fundamental human rights which can not be transcended by any free government." Justice Brown in the case cited above gives examples of such human rights.

The class of limitations on the power Congress in relation to incorporated territories in addition to fundamental rights are in general "those which protect mere remedial rights or which, because of their wording, are clearly aimed at only the United States proper," writes Mr. Littler. He quotes Justice Brown again for examples of remedial rights—"the right to citizenship, to suffrage, and to the peculiar methods of procedure which are peculiar to Anglo-Saxon jurisprudence." Mr. Littler also includes as remedial rights trial by jury and "most of the rights enumerated in the fourth, fifth, sixth, and seventh amendments."

It thus appears that if these cases are not overruled by the Supreme Court of the United States, or nullified by other opinions which will more directly apply, that Congress does not have power to deprive the people of Hawaii of citizenship, suffrage, and "the peculiar methods of procedure which are peculiar to Anglo-Saxon jurisprudence." An appointed, not elected, "commission" form of government could not be established over Hawaii by Congress without violating these remedial and perhaps also fundamental rights which apply to Hawaii because by annexation the Republic of Hawaii became an "integral" part of the United States and thereupon or thereafter became an "incorporated" territory.

"Incorporation" has become part of our constitutional laws, and, while maintaining the doctrine of governmental powers everywhere limited, it has been sufficiently elastic to permit of a government which, while maintaining the essentials of modern civil liberty, has not attempted to impose upon new peoples certain ancient Anglo-Saxon institution for which their history had not adapted them.

"* * * The Constitution and the flag are inseparable, but that the particular circumstances of each constituent portion of the United States must be considered before we can reply as to which clauses of the Constitution limit the Federal Government in its action regarding any particular territory." (Coudert, supra, pp. 74–75.)

It has been hard for Hawaii to gain recognition as an incorporated Territory because the annexation took place at the same time as the acquisition of Porto Rico and the Philippine Islands, by treaty, purchase, and conquest. There is, therefore, a popular misconception that Hawaii was acquired in the same manner. Similar ideas have often been the basis for official decisions and conduct at Washington. It is only by continuous watchfulness and education that these opinions can be changed and obtain for Hawaii her proper position in national opinion and legislation. It is in part this same misconception which leads many of those who suggest "commission government" to think that Hawaii has no rights other than those which apply to possessions.

It is also worthy of notice that once a Territory has been incorporated into the United States the Constitution can not be withdrawn from it by Congress. (Downes *v.* Bidwell, 182 U. S. 244, and Rasmussen *v.* United States, 197 U. S. 516.)

This point is discussed by Dr. W. W. Willoughby in The American Constitutional System, in chapters 11, 12, 13, and 14. On pages 222–223 he says on the above decision: "If an act of legislation is required to extend the Constitution over a Territory it goes there not as a constitution but as a statute, and an irreparable statute is admitted by everyone to be an impossibility, every legislature necessarily possessing a power to repeal equal to its power to enact." This statement is debatable (Rasmussen *v.* United States, 197 U. S. 516–531).

The annexation of Hawaii, it seems, therefore implies that Hawaii became a very real part of the United States and that the people of the islands are protected by almost all the constitutional provisions which apply to citizens of the several States, and that there is little likelihood that any other than a republican form of government can or will be established here. Hawaii is also entitled to look forward to complete statehood if the people desire that position in the American Union. The question of how soon statehood should be requested merits a thorough study. The people of Hawaii are not agreed upon it, but they all desire a closer connection with and greater participation in the Federal Government.

I wish to acknowledge the assistance, criticism, and very material aid of my colleagues, Dr. K. D. Lum, Dr. Paul Bachman, Mr. Robert Littler, and the members of Social Science, especially those who lived through and participated in the stirring days of revolution and annexation, in the preparation of this paper.

University of Hawaii,
Acting Professor of International Affairs, Syracuse University.

FREDERICKSBURG AND SPOTSYLVANIA COUNTY BATTLE FIELDS MEMORIAL

Mr. BLAND. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an address delivered by President Coolidge at Fredericksburg, Va., on October 19, 1928.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. BLAND. Mr. Speaker, pursuant to leave this day granted to extend in the CONGRESSIONAL RECORD the address delivered by President Coolidge at Fredericksburg, Va., on October 19, 1928, in dedication of the Fredericksburg and Spotsylvania County Battle Fields Memorial, I insert the following:

My fellow Americans, no one who loves our country and is sufficiently interested to make even a slight examination of our history could visit this locality without feeling that he is close to great characters and great events. From early colonial times down to the present hour men who have lived and wrought in this section of Virginia have cast a mighty influence over the course of the affairs of this Nation. They have been a race who led in carving out this Republic and establishing its institutions, who believed in local self-government, and loved liberty.

The famous sons of this Commonwealth furnished the leadership for acquiring the territory which makes up the continental domain of the United States. Washington gave us the thirteen colonies, George Rogers Clark added the Northwest, Lewis and Clarke carried our jurisdiction to the Pacific, Jefferson made the Louisiana Purchase, Monroe secured Florida, Sam Houston brought in the State of Texas, Winfield Scott and Zachary Taylor won the California region. Your soldiers led the forces in the field and your statesmen directed the negotiations at the council table in bringing together that vast area stretching from the Atlantic to the Pacific which comprises our Federal Union. Their wisdom endowed our country with an empire.

But however important those achievements may be, this Nation is something vastly more than an expanse of territory. It has reached the high place which it holds in the world largely because of its institutions of government. Your devotion to their principles dates from your pioneer days. As early as 1676 Nathaniel Bacon was asserting with armed force the spirit of those rights which were to be established by the Revolution. That spirit never faltered in Virginia. It inspired the eloquent voice of Patrick Henry. It led to the decisive action of the Williamsburg Convention in May, 1776, when it unanimously resolved to instruct its delegates to the Continental Congress to declare the United Colonies free and independent States. Accordingly, it was Richard Henry Lee who moved a resolution to that effect, and Thomas Jefferson who embodied that action in the Declaration of Independence.

It was your great soldier, George Washington, who made that declaration effective. In his other capacity, as a statesman, aided by able

leaders in other colonies, but especially by Madison, he was the main influence in securing the adoption of the Federal Constitution. To make that Constitution a living, vital system of national government, Virginia contributed John Marshall, Chief Justice of the Supreme Court of the United States, who ranked as our greatest magistrate. When our Government had been established and given strength and direction under Washington, the great instrument which insured that it should forever remain dedicated to the voice of the people was again Thomas Jefferson. During the first 60 years of our Republic the presidential office was held for 36 years by Virginians. Among them was Monroe, who added to our own Declaration of Independence the doctrine against any further interference with the independence of the other countries of our Western Hemisphere.

After remembering all the contributions that were made by Adams and Hamilton and Franklin, and their Colonial associates, after giving due credit to all the inspiration and all the armed forces which came from outside the Old Dominion, it will forever remain to your glory that our territory was won, our republican institutions were put into form, and a government resting on the sovereignty of the people was permanently established under the leadership of the sons of Virginia. No other colony put more of itself into the Federal Union or had a greater influence in the early direction of its government.

But the historic interest of this locality is by no means confined to the creation and the formative years of our Republic. When the Nation became involved in the great tragedy which overtook it in 1861, the contending armies of the North and the South for long periods had opposing camps in this region where occurred some of the hardest-fought battles of the war. Near here lie the fields of Fredericksburg, of Chancellorsville, of The Wilderness, and of Spotsylvania Court House, where the heroic sons of the North and South met in mortal combat, each contending for what he thought was right as God gave him the power to see the right.

The first of these engagements occurred in December, 1862, when General Burnside, sending a force across the Rappahannock, made an attack on General Lee's position, which was well protected and amply supported by artillery. Assault after assault was made by seven divisions, the one after the other, with the greatest gallantry, only to be repulsed with the most disastrous losses. In the following May of 1863 General Hooker, then in command of the Union forces, marching upstream and crossing the Rappahannock and the Rapidan, met with such resistance at Chancellorsville that his losses were over 17,000. General Lee lost about 12,500. But among these was the ablest military leader of all his generals, Stonewall Jackson, who fell through the mistake of his own men. His loss was irreparable. Following this action General Lee led his forces north until he was turned back at Gettysburg. The next battle in this locality took place a year later, in May, 1864. General Grant was now in command of all the armies, with headquarters with General Meade, who led the Army of the Potomac.

Grant sent his army across the Rapidan at two points and the Battle of the Wilderness followed, which checked his advance. After resting a few days, Grant started the Spotsylvania campaign by attempting to turn the right flank of Lee. Three days of desperate fighting took place, in which the losses on both sides were very severe, the heaviest being around the struggle for possession of the bloody angle. It was during this battle that Grant sent his famous dispatch to Washington announcing his purpose "to fight it out on this line if it takes all summer." With the superior forces at his command, Grant began that campaign in these two battles, which he followed up until less than a year later it was all finally ended at Appomattox.

In these four important engagements Lee always had the smaller force. His being on the defensive and his brilliant leadership each time saved him from defeat. He always inflicted much the larger losses. On these four fields it has been estimated that the total number engaged on both sides was about 700,000. The entire casualties for both armies were close to 100,000 in about 10 days of actual fighting. Those who fell sleep here, near where sleeps the mother of Washington.

Because of their historic interest and their valuable military lessons, the Congress unanimously passed a bill last year, introduced by your distinguished Representative, Mr. BLAND, to make a military park and mark and preserve the important points on these battle fields. The unanimous action of the Congress and the joint participation of the people, both of the North and the South, in carrying into effect the law which it passed is another welcome demonstration in a long line of events, not only that the war is over but that reconciliation is becoming complete. The Union which this Commonwealth did so much to establish, the Union hallowed by the name of Washington, the Union which Jackson defended with a fervor no less pronounced than that of Lincoln, the Union which took a new place in the world under Wilson, is not accorded a loyalty in any other part of our Republic more devoted and sincere than that which is constantly manifest in the life of the people of Virginia.

As we look over the course of history, as we give it more and more consideration, our confidence in mankind can not but increase. The more we contemplate their actions, the more we learn of their motives, the more we are convinced that on the whole they attempt to do the best that they can under the circumstances in which they find themselves. The progress of the race has been long and hard and toilsome, marked by many mistakes and requiring many sacrifices. It never goes forward but one step at a time. When we set up our Republic on the foundation of liberty under the law much of the best thought both of the South and the North realized that the structure was incomplete. Almost immediately 10 articles of amendments were added to the Constitution. Certain obscurities still remained, certain powers were still disputed and undefined. The question of universal freedom and of whether the Constitution provided a temporary confederation or a permanent union were sure to arise. Their decision involved a most terrible and appalling sacrifice on the part of the two great contending forces.

The main reason why we can all join in the movement to commemorate the deeds of immortal valor which marked these battle fields is because we all realize that out of a common expiation our common country has been greatly blessed. In these advantages, as it has slowly risen from its prostration, the South has more than amply participated. Since 1900 that progress has been most marked. In the Southern States alone the wealth, the manufactured, the mineral, and the farm products, the banking resources, and the exports are of about the same value to-day that they were in the whole United States in 1900. The yearly production of the farms, the mines, and the mills exceeds $18,000,000,000, while construction contracts run about $1,000,000,000. If it is possible to judge anything of the importance which a people set on spiritual values, or make any estimate of their intellectual attainments by what they are expending in construction of places of worship and in the support of the public schools, some idea of the progress which the South is making is revealed by the fact that their school costs are twice as much as those of the whole country in 1900, while on the new church buildings that cost more than $10,000 they are expending $1,000,000 each week.

This day, however, is not to mark a local or sectional occasion. It is to mark a national occasion. The great deeds which we have recalled as among the glories of this Commonwealth were national deeds. The great questions which were at issue on these battle fields were national questions. Out of the decision to which they were finally brought there has been a common advantage and a common progress which has accrued to the whole Nation. Had the decision been otherwise, we should have all been robbed of a great part of the pride which we all feel to-day in our country. Her achievements of the past years would have been divested of much of their value and her prospects for the future would have been devoid of much of their hope. Instead of one great country enjoying domestic peace and progress, holding a commanding position in the world, we should have been a region of hostile factions, impotent at home and despised abroad. The service which we did for the cause of humanity in 1898, the world crisis in which we successfully performed our part in 1917, would all have been impossible. Long since our common heritage would have been dissipated, our glory would have departed.

The growth which our country has made since 1860 and the benefits it has brought all our inhabitants are unsurpassed. Our population, which was then about 31,500,000, has risen to about 118,000,000. Our wealth of about $16,000,000,000 is now conservatively estimated at $350,000,000,000. Our foreign trade of only about $785,000,000 has now become over $9,000,000,000. Our railroad mileage has increased from about 31,000 to about 249,000, and its revenues have grown from $153,000,000 to $6,250,000,000. Public-school enrollment has risen from about 5,000,000 to about 25,000,000. Our manufactured products have multiplied from less than $2,000,000,000 to nearly $63,000,000,000. In 1870 our farm products were less than $2,500,000,000, while they are now around $13,000,000,000. These figures illustrate our progress.

So great has been our enterprise and industry that with only 7 per cent of the land and 6 per cent of the population of the world we produce over 50 per cent of the grains and basic raw materials. Many different elements have contributed to this development, but they all rest on the fundamental fact that we are a large country furnishing a large market able to consume the output of mass production. This situation has encouraged the introduction of labor-saving machinery. As the wage earner became properly compensated, as he began to cost more, the incentive was increased to make him more skillful and more productive. One man can now take the seed from as much cotton as would have been done by 28,000 without the cotton gin, and he can make as much yarn as would have been produced by 45,000 women on the handwheels of colonial days.

The operation of machinery requires a supply of power. In 1869 our industries had 1.14 horsepower for each operator, who added to the raw materials furnished him less than $680 of manufactured value in a year. By 1925 these had risen to 4.3 horsepower and $3,200 of value. In the machinery industry this reaches about $5,200, which is about three and one-half times the best that is done in Europe. Mechanical power has been increased until it is equivalent to the work of 3,000,000,000 additional employees in our industries,

or more than 350 helpers for each of their wage earners. The scale of labor has constantly improved in importance and compensation.

A most important influence in our national progress has been the expansion and increased efficiency of transportation. Prior to 1860 railroads were in small and detached units, built on different gauges, and freight charges were rarely less than 2 cents per ton-mile. Beginning in 1869, consolidations were effected, gauges standardized, and uniformity of operation introduced, which have gradually reduced freight charges to about 1 cent per ton-mile. Business has so much increased that passenger traffic is three times and freight six times as large as they were in 1890. There has lately been a remarkable increase in railroad efficiency. In the five years prior to 1927 the average distance traveled by a freight car was increased four-twelfths, while the proportionate consumption of coal was reduced two-twelfths, and one-twelfth more employees moved four-twelfths more of freight. The movement from producer to consumer has increased 40 per cent in rapidity. The periodic car shortages have been entirely eliminated. Goods are handled with so much care that the cost of paying for damages has been reduced 70 per cent.

Our national expenditures and authorizations for inland waterways have run into hundreds of millions of dollars. Some of this in the Mississippi Valley has already been demonstrated to be commercially profitable. The water-borne traffic on the Great Lakes has reached the enormous total of 116,000,000 tons in a single season. Plans are being made for a deep channel waterway from the Great Lakes to the sea.

Within the past 10 years one of our most remarkable improvements has been in highway construction, the expense of which has been borne in part by the States and local units of government and in part by the National Treasury. More than 72,000 miles of improved highways have been constructed, with over 222 miles of bridges, at a cost of over $1,439,000,000, of which the Federal Government has paid $633,000,000. On rural highways as a whole over $1,000,000,000 is being expended annually. This movement for good roads, with the general use of the automobile, has greatly decreased the cost of the transporting of our production and given a mobility to our people that has expanded the whole horizon of life and brought beneficial results so great that they can not yet be enumerated.

In our airways commercial aviation already covers many thousand miles each day.

The great strength and soundness of our financial structure was demonstrated by the World War. Prior to that time we had been a debtor nation. During that crisis we not only furnished enormous sums to take up foreign investments here but we provided the funds for our own war expenditures, advanced nearly $10,000,000,000 to foreign governments, and have constantly sent capital abroad until the Federal Treasury and our private investors have credits there amounting to $25,000,000,000. When the currency system of other nations was rapidly crumbling our own remained perfectly stable and secure. The resources of our banks and our National Treasury, the strength of our Federal reserve system were so great that we not only kept our own currency on a gold basis and our own exchange at par but were able to furnish large credits to other nations to stabilize their currency and support their exchange.

These are some of the facts which indicate the progress and prosperity of the United States. While there are still some of our people who have not yet become participators to the extent of their merit in our material resources, and some lines which have fallen behind, we have striven to keep the door of opportunity open to all our inhabitants. It is true that the accumulations that are taking place would lose much of their value unless their benefits were widely distributed among the great mass of our people. We have individuals of great wealth, and shall continue to have so long as men are free and enterprise and ambition exist, but the large fortunes in this country are substantially all invested in different ways of serving the public. Some of the largest have all been transferred to charity.

The millions of our people who are investors in securities; the $27,500,000,000 of deposits in savings institutions, which have more than doubled in nine years; the $7,200,000,000 of assets of building and loan associations, which have more than trebled since 1919; the widespread individual ownership of homesteads; the possession of 23,000,000 motor vehicles, of which 20,000,000 are passenger cars; the general use of the telephone and radio; the constantly increasing rate of wages even when the price of commodities has been declining; and the general standard of living never before experienced by any people in human history all testify that under our free institutions and equality of opportunity the distribution of wealth is solving itself in accordance with natural laws.

These figures, which would be cold and uninteresting in themselves, when we realize that they illustrate the life and development of our country, can not fail to have a deep fascination. But those wonderful records would be of little avail if they were not accompanied by evidences of the moral power of the Nation. Education is on the increase. Our charities are lavish and world-wide. Our missionary efforts reach in every direction. Our actions in behalf of limitation of naval armaments have been of great benefit to all mankind. On influence in negotiating the recent treaty in behalf of peace is well known. It raises the greatest barrier against war that was ever created by the art of man. In his capacity as a ranking member of the Committee on Foreign Relations the State Department had the constant counsel and cooperation of your eminent Senator, Mr. SWANSON, in these negotiations. Our progress and prosperity at home, our standing and influence abroad could never have been secured unless they rested on a solid foundation of demonstrated integrity, high character, and abiding faith.

Such are some of the outlines of the mansion in which dwell the people of the United States. It is "a house not made with hands." Into it have gone the sacrifices and prayers of many generations. While it is by no means complete, it is already the most comfortable habitation which a nation ever enjoyed. Its prevailing atmosphere is marked by progress, peace, and tranquillity. Sectional animosities have disappeared. Industrial conflicts have almost ceased. Her territorial integrity is secure. Her constitutional liberties are protected by the eternal vigilance of her people. Our country is still worthy of those who have made such great sacrifices in its behalf, still determined to improve the opportunities which those sacrifices created, still loyal to the faith of the past, still inspired by the hope of the future.

KITTY HAWK, N. C.

Mr. KERR. Mr. Speaker, I ask unanimous consent to address the House for one minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. KERR. Mr. Speaker, there is a notable celebration in my State to-day, at which the Nation officially pays honor to the ingenuity, the adventure, and the achievement of our pioneers of aviation, the Wright brothers. I ask unanimous consent to extend my remarks and print in the RECORD an interesting bit of history concerning the place of this celebration, written by a most intellectual gentleman of my State, Mr. Ralph Pool.

The SPEAKER. The gentleman from North Carolina asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. KERR. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following article from the News and Observer, Raleigh N. C., Sunday, December 16, 1928:

EASTERN BANKS HISTORY LADEN—WRIGHT BROTHERS NOT ONLY ONES WHO HELPED MAKE COUNTRY FAMOUS—ISOLATION IS SOON TO BE THING OF PAST—ROADS AND CONTEMPLATED BRIDGE WILL CARRY MOTORISTS ON HARD SURFACE TO VERY SCENE WHERE WRIGHT BROTHERS MADE THEIR FAR-REACHING EXPERIMENTS

By Ralph Pool

ELIZABETH CITY, December 15.—Nowhere, perhaps, on the Atlantic seaboard is there a region richer in historic and romantic associations than that about Kitty Hawk, midway between Cape Henry and Cape Hatteras, where an internationally distinguished assemblage will gather Monday to celebrate the silver anniversary of the Wrights' first flight.

Not alone did Kill Devil Hills, great twin dunes at Kitty Hawk, stand sponsor at the birth of aviation 25 years ago. More than three centuries before that event they saw the passage of the Walter Raleigh colonists, bent upon founding a great English empire in the New World; and perhaps, too, they witnessed the enactment of that last tragic drama of the Lost Colony, whose fate is unrecorded on the pages of history.

But a little way to the south of Kitty Hawk—possibly not more than half a mile—there lay an inlet, bordered by a deep cove, when Sir Walter Raleigh's colonists came to America in 1586–87. It was through this inlet that Capt. John White, Raleigh's colonial governor, sailed with the Lost Colony, to land on the shore of Roanoke Island, some 4 miles away. The inlet and cove are shown on the John White maps, the cove being christened Trinity Harbor; and it is recorded that the colonists stopped in Trinity Harbor for a while, to refit their sloops and to take aboard fresh water.

Many years ago old Trinity Harbor and the inlet were swallowed up by the shifting sands, though there is a current belief in the coast country that they have survived, in part, in the Fresh Ponds, some 20 small fresh-water lakes, lying immediately to the south of Kill Devil Hills. These lakes have neither inlet nor outlet, unless far in the depths of the earth, and the water is fresh and sweet, despite the fact that to the east lies the salt Atlantic and to the west is the almost equally saline Roanoke Sound.

The Fresh Ponds are peopled with black bass, several varieties of perch, and other fresh-water fish, and annually they are visited by hundreds of anglers for the excellent sport they afford.

Old Fort Raleigh, on Roanoke Island, whence the Lost Colony vanished after Capt. John White left in the late summer of 1587, to return to England for added supplies, was situated on the east shore of the island, scarce half a dozen miles from Kitty Hawk. A star-shaped mound is all that remains of the fort to-day.

Since the Raleigh attempts at colonization, though unsuccessful, paved the way for the more happily augured Jamestown colony 20 years later, it may be said that, besides witnessing the dawn of aviation, towering Kill Devil Hills saw, in fact, the beginnings of that great British domain in America, which Raleigh envisioned, and therefore the birth of the United States.

Deftly hand-wrought silver and bronze shoe buckles picked up by summer visitors in the vicinity of old Trinity Harbor recently are thought likely to attest to the short stay of the Lost Colony there. Numerous Indian arrow heads have been found there also.

Records of the early permanent settlers of the Albemarle Colony, in Northeastern North Carolina, reveal that the end of the old Indian trail extending from the mountains to the seaboard lay at the tip of the Currituck Peninsula, at what is now Point Harbor, 3 miles across Currituck Sound from Kitty Hawk. Traditions of the region relate that the Indian from the uplands made annual pilgrimages to Point Harbor, to exchange furs, grain, and other commodities for fish and other products of the coast country, especially for quantities of youpon leaves.

The youpon is a bush indigenous to the sandy beach strip on which Kitty Hawk is situated. Its dried leaves, when steeped, make an excellent substitute for tea—a substitute that was used by all classes during the dire days of the Civil War, and that still is popular. Youpon tea is credited also with medicinal properties, and legend records that the Indians visiting Point Harbor many years ago, drank huge quantities of it to cleanse themselves of fevers and other ills.

The name of the brilliant and ill-starred Aaron Burr, who almost won the Presidency of the United States, later killed Alexander Hamilton in a duel, and finally sank into utter discredit when his scheme for founding a great new empire in the Southwest collapsed, is linked inseparably with the legendry of the Kitty Hawk coast land. Burr's daughter, the beautiful Theodosia, married Governor Alston, of South Carolina, and in 1813, accompanied by her small son, she embarked from Charleston for New York aboard the small sloop *Patriot* to visit her father.

The *Patriot* never reached New York, and the fate of Theodosia Burr Alston and the others aboard is a mystery to this day. In the years that followed a small summer colony came into being at Nags Head, 3 miles south of Kill Devil Hills, patronized chiefly by the families of planters living in the Albemarle County in North Carolina. Fifty years after the disappearance of the *Patriot* Dr. William G. Pool, of Elizabeth City, N. C., while spending the summer at Nags Head with his family, was summoned to the bedside of a very old woman, a native of the coast country.

On the wall of the humble cabin, and utterly out of keeping with its surroundings, Doctor Pool was amazed to observe a painting of a beautiful young woman. Asked whence it had come, the woman told him that it was in the cabin of a richly furnished sloop that had come ashore at Nags Head many years before with not a soul aboard. The picture, she said, had been part of her husband's share of the ship's cargo, which also had included silks of surpassing richness, beautiful silverware, and other articles indicating that persons of wealth and culture had been passengers on the vessel.

Lacking money to pay for her treatment, the old woman offered Doctor Pool the picture in recompense for his services; and he eagerly accepted it, meanwhile speculating interestedly upon its origin. Some years later in the course of his reading he ran across an account of the disappearance of Theodosia Burr Alston, and being struck with the possibility of a connection between it and the old woman's story he immediately took steps to get in touch with descendants of the Burr and Alston families.

Relatives of the beautiful Theodosia later viewed the picture and declared it undoubtedly a portrait of her. The painting now hangs in a gallery in New York City. (Note.—The Metropolitan, I think.)

The very name of the resort, Nags Head, suggests tragic possibilities as to the vanishing of Theodosia Burr Alston. The region was populated in the main by castaways from ships wrecked on that stormy coast, and these were dependent largely upon the bounty of the sea that had dropped them there. They regarded the cargoes of wrecked ships as rightly theirs, and according to a legend that has persisted for nearly a century occasionally they helped old ocean lavish her gifts upon them by spurring the fates that hover over ships destined for doom.

The legend relates that on stormy nights the bankers, as the folk of the region were called, hung a ship's lantern to the head of a horse, or nag, and slowly patrolled the beach with the animal, to give the impression to passing skippers that a vessel was riding in easy harborage close inshore. Those who foolishly ventured in, it is told, swiftly struck treacherous shoals and their ships were pounded to pieces or grounded so deeply that they and their cargoes were at the mercy of the land pirates.

Some such fate, it is declared, may have befallen the lovely Theodosia, who, with her companions, may have been compelled to walk the plank so that no trace might be left of the crime. Or, on the other hand, persons familiar with the coast country explain those aboard the *Patriot* may have abandoned the ship in a storm in a vain attempt to reach shore safely in their small boats.

Coast guards now regularly patrol the length of the North Carolina banks with modern equipment for salvaging lives, and the dire toll of Diamond Shoals, off Cape Hatteras, and the rest of the perilous coast has been reduced greatly in recent years; but the mighty Atlantic in her angry moods even yet occasionally shows her contempt for man and his puny works, as occurred scarcely a year ago, when two steamers went ashore scarcely 60 miles apart in a terrific gale.

These were the Greek tanker *Paraguay*, which grounded and broke in two close by the shore within sight of Kill Devil Hills, and the Norwegian fruit steamer *Cibac*, which stranded off Hatteras Inlet, a dozen miles south of Cape Hatteras. These twin disasters occurred December 4, 1927. Coast guards, risking their own lives, went out in their boats and safely brought ashore all aboard both ships—a total of 24 seamen. The press of the Nation extolled their heroism.

Visitors at the air memorial celebration at Kitty Hawk Monday may view the wreck of the *Paraguay* if they wish by walking down the beach a mile or so from the scene of the festivities. Also, if they stroll along that once dreaded shore, they may observe the rotting skeletons of many other once gallant ships that similarly met doom there.

Kitty Hawk and Kill Devil Hills are little changed to-day from the community that Wilbur and Orville Wright chose for their experiments in aeronautics a quarter of a century ago. The community of Kitty Hawk lies in a woodland on the landward side, near the convergence of Currituck and Albemarle Sounds. The visitor finds a maze of winding sandy roadways, scarce wide enough for two automobiles to pass abreast, with here and there a neat cottage.

Some 3 or 4 miles of driving along the roadway leading to the southward brings one abruptly to a great clearing—an immense level, sandy plain, sparsely carpeted with tough sand grasses. At the southerly border of the tract loom Kill Devil Hills, the taller of which is 92 feet high. It was at the foot of this dune, with the level, unobstructed sand plain before them, that Orville and Wilbur Wright launched successfully a tiny, unstable airship on December 17, 1903, and thereby ushered in a new era in man's conquest of the forces of nature.

That isolation which was one of the attractive features of Kitty Hawk when the Wrights carried on their work there soon will have become utterly a thing of the past. North Carolina's remarkable highway system, developed in the last decade, is stretching out an arm toward Kill Devil Hills, and a concrete road already is under construction from Currituck Courthouse, present northeasternmost terminus of the hard surfacing, down to Point Harbor, nearest mainland point to Kitty Hawk.

Private interests have obtained a franchise for a highway bridge to stretch 3 miles from Point Harbor to Kitty Hawk. Approval of the War Department has been procured for the project, and bids are being considered this month for construction of the bridge, which is to be of steel, concrete, and creosoted timber. Barring eventualities it should be possible within another year for a motorist to drive in comfort and security to the scene of the first air flight and the other points on the coast land that hold hallowed place in the history and legendry of America.

CONSENT CALENDAR

The SPEAKER. The Clerk will call the Consent Calendar.

BRIDGE ACROSS MISSISSIPPI RIVER AT BATON ROUGE

The first business on the Consent Calendar was the bill (S. 2449) to authorize the construction of a bridge across the Mississippi River at or near the city of Baton Rouge, in the parish of East Baton Rouge, and a point opposite thereto in the parish of West Baton Rouge, State of Louisiana.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. COCHRAN of Missouri. Mr. Speaker, I ask unanimous consent that this bill may go over without prejudice.

Mr. LaGUARDIA. Mr. Speaker, in order not to clutter up the calendar, I will say to the gentleman that this is to a State agency.

Mr. COCHRAN of Missouri. It does not show that in the title.

Mr. LaGUARDIA. It is the Louisiana Highway Commission, a State agency.

Mr. COCHRAN of Missouri. I withdraw the request, Mr. Speaker.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLACK of Texas. Mr. Speaker, at the request of a Member I ask that the bill may go over without prejudice.

The SPEAKER. The gentleman from Texas asks unanimous consent that this bill may be passed over without prejudice. Is there objection?

There was no objection.

EMPLOYMENT OF LABOR ON PUBLIC WORKS OF THE UNITED STATES

The next business on the Consent Calendar was the bill (H. R. 11141) to require contractors and subcontractors engaged on public works of the United States to give certain preferences in the employment of labor.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLACK of Texas. I object, Mr. Speaker.

OSAGE INDIANS OF OKLAHOMA

The next bill on the Consent Calendar was the bill (H. R. 13407) relating to the tribal and individual affairs of the Osage Indians of Oklahoma.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. CRAMTON. Mr. Speaker, there are provisions in this bill which may occasion some controversy. The committee will have a day very soon, and if the gentleman from Montana will agree that this may go over——

Mr. LEAVITT. I do not like to have it go over. It has the approval of the Indian Bureau and it is urged by the Osage Indians. The committee has given it a great deal of consideration, the Senate has passed it, and my judgment is that it should be passed at this time.

Mr. CRAMTON. My information is that there are some amendments that have been urged by the Council of the Osage Indians.

Mr. HOWARD of Oklahoma. Mr. Speaker, this is a measure asked for by the Osage Council. After the 1st of January the Osage Council is coming to Washington for the purpose of a conference relative to this legislation. Our committee worked on it four months in subcommittee and several days in full committee, and we would like to have the bill go through, so that when the council comes it can take it up with the Indian Committee of the Senate and work out some amendments that the Indians and department will suggest. This is a very important measure.

Mr. CRAMTON. The situation as I understand it is this: Practically this same bill is on the calendar twice—once in a Senate and once in a House bill. I do not see any occasion for passing the bill to-day if the council wishes to talk with the Senate committee when they arrive.

Mr. HOWARD of Oklahoma. I do not understand that the bill is in the Senate.

Mr. CRAMTON. The bill is on the calendar, and I shall be obliged to object.

Mr. LEAVITT. Mr. Speaker, I ask unanimous consent that the bill may go over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

AMENDING AND CONSOLIDATING THE ACTS RESPECTING COPYRIGHT

The next bill on the Consent Calendar was the bill (H. R. 13452) to amend the act entitled "An act to amend and consolidate the acts respecting copyright," approved March 4, 1909, as amended in respect of mechanical reproduction of musical compositions, and for other purposes.

The Clerk read the title of the bill.

Mr. VESTAL. Mr. Speaker, I ask unanimous consent that the bill be passed without prejudice and retain its place on the calendar.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

ROAD DRAINAGE AND OTHER IMPROVEMENTS

The next business on the Consent Calendar was the bill (H. R. 10657) to authorize the assessment of levee, road drainage, and other improvement district benefits against public lands and lands heretofore owned by the United States.

The Clerk read the title of the bill.

Mr. DRIVER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. The gentleman from Arkansas asks unanimous consent that the bill be passed over without prejudice. Is there objection?

There was no objection.

COTTON FUTURES

The next business on the Consent Calendar was the bill (H. R. 13646) for the prevention and removal of obstructions and burdens upon interstate commerce in cotton by regulating transactions on cotton-futures exchanges, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. CLARKE. I object.

FEDERAL POINT LIGHTHOUSE RESERVATION, N. C.

The next business on the Consent Calendar was the bill (S. 4302) to authorize the Secretary of Commerce to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the Battle of Fort Fisher.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, I have two amendments that I think should be adopted. A reversion is sometimes troublesome if the contingency happens. I suggest that on page 1, line 3, after the word "convey," there should be inserted "subject to conditions contained in section 2 of this act." On page 2, line 20, after the word "proceeding," insert "such conditions to be recited in deed or instrument of conveyance."

Mr. MERRITT. That is agreeable, and I accept the amendments.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of Commerce is authorized to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., for improvement and maintenance as a memorial to commemorate the Battle of Fort Fisher. The property to be transferred under this act was conveyed to the United States by deed of April 7, 1817, from Charles B. Gause, registered in the records of New Hanover County in Book P, page 305, and is described therein as "a certain piece or parcel of land situate, lying, and being in the State of North Carolina and county of New Hanover on Federal Point near the new inlet of Cape Fear River, whereon the beacon erected by the United States now stands, to contain 1 square acre of land, the beacon being the center of said square acre," together with "the use and privilege of the most convenient and usual landing place on said point from the river and from said landing place free egress and regress over the said point of land."

SEC. 2. In the event the city of Wilmington should fail to improve or to maintain the said property in the manner contemplated by this act the Secretary of Commerce may at any time by letter addressed to its chief executive officer or officers notify the city of Wilmington that the property conveyed will revert to the United States, and if the city of Wilmington does not begin or resume the performance of such improvement or maintenance within a period of six months from the date of such notice, the said property shall, upon the expiration of such period, revert to the United States without further notice or demand or any suit or proceeding. The United States reserves the right to resume ownership, possession, and control for Government purposes of the said property so conveyed at any time and without the consent of the grantee.

The Clerk read the following amendment:

Page 1, line 3, after the word "convey" insert: "Subject to conditions contained in section 2 of this act."

Page 2, line 20, strike out the period after the word "proceeding," insert a comma and the following: "Such conditions to be recited in the deed or instrument of conveyance."

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider the vote whereby the bill was passed was laid on the table.

BRIDGE ACROSS BLACK RIVER, JONESVILLE, LA.

The next business on the Consent Calendar was the bill (H. R. 13687) authorizing H. M. Wheeler, his heirs, legal representatives, and assigns to construct, maintain, and operate a bridge across the Black River at or near Jonesville, La.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, I call the attention of the House to these bridge bills that are coming up. Several Members, and I was one of them, served notice at the last session of Congress that all bridge bills would be carefully scrutinized. The same policy that held 50 or 60 years ago can not be followed to-day. States all over the country are spending millions of dollars for roads. This bill is typical of the kind of bill that should be objected to. While it is true that the bill provides for recapture at the end of a certain period, and also provides, if the State should take the bridge over, for amortization of the cost and a sinking fund; yet while the bridge is being operated by the permittee, under the bill there is no provision for amortizing the cost or creating a sinking fund to pay for the bridge. In other words, the permittee may operate this bridge for a period of 20 years, charging toll, and then under the provisions of the bill the community would come in and be required to pay the full value of the bridge, less depreciation. The proper method is to compel the

amortization of the cost of the bridge during the time it is being operated by the permittee. Then it may be taken by the State or community and operated as a free bridge or with slight nominal tolls to pay for maintenance. This bridge concession is getting to be too much of a good thing. It is simply ridiculous for a State to spend millions for public roads, then permit a private person to come along, get a right to build the bridge, connect two public roads, and charge exorbitant tolls; then, after 20 years of enjoying the privilege of mulcting the traveling public, to sell the bridge to the community and get all of his investment back. I object to this bill and shall object to every bill of its kind.

Mr. COCHRAN of Missouri. Mr. Speaker, I object.

Mr. ARENTZ. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. ARENTZ. Mr. Speaker, I had occasion to study somewhat this toll bridge situation. In a recent number of the American Highways Magazine, volume 9, No. 1, there appeared an article which I think Members of the House should consider. I think they should consider this whole situation before giving any more franchises to toll bridges to be constructed by private interests. The highway engineer of Kentucky has this to say in the article to which I have referred:

[From the American Highways]

TOLL BRIDGE FRANCHISES GRANTED TO PRIVATE INTERESTS

There is much confusion in the public mind on this question. In all sincerity many have indorsed the private toll bridge franchise on the theory that it is desirable to have bridges, and if the public funds are not sufficient or available, rather than do without, it is better to grant a toll franchise to private interests. This is not the issue. The real issue is much simpler—too simple, apparently—and, of course, there is widespread propaganda directed toward keeping the wrong idea in the public mind. The real question is the very simple one of whether it is sound public policy to grant the right to collect a private profit from the user of the highway. The answer ought to be a vigorous and authoritative "no." There is no place on the public highway to-day for the privately owned toll bridge.

The need for capital for highway improvement is so large that it is not only necessary but, in many States, desirable to provide large bridges through toll collections. Where this situation exists, however, it can and should be met by the public in its own interests.

The public can finance and build at lower costs, and the largest bridge undertakings in the country to-day are being financed on the basis of their earnings. Two methods are being used: First, municipal bond issues, to be retired from earnings; and, second, revenue bonds issued against the earnings, but not a municipal obligation in the sense of adding to the constitutional indebtedness.

The Port of New York Authority is engaged in building bridges of unusual size and cost. Four bridges will cost, it is estimated, $100,000,000, and the cost will be met with the income. In this area a number of the most remarkable and most costly public works in the world are being provided without adding to the taxes on the property owner and with the profits devoted to freeing the projects from debt.

One of the projects financed on most favorable terms recently is the new Ohio River bridge at Louisville, Ky. Here is a splendid example of public financing by direct dealing with a strong financial house on the basis of a banking and not a stock-promotion project. The terms are eminently fair to the public. The city will build the bridge and completely control the whole project. Revenue bonds are issued against the earnings of the bridge and they are not a debt liability against the property of the city. The constitutionality of the contract has been passed upon favorably by the supreme court of the State, and within a reasonable time the city will own a magnificent bridge costing upward of $6,000,000 without cost to the taxpayers.

The States of Alabama, Tennessee, Kentucky, Louisiana, Arkansas, and perhaps others have within recent months provided for the building of bridges, the costs of which are to be paid from tolls and then made free.

Private toll-bridge interests are becoming bolder and obstructing the public's business. They are attempting to defeat legislation unfavorable to themselves and are obstructing the efforts of highway departments to carry on State projects. Seventy-five Federal authorizations to build toll bridges have been granted to private interests by the present Congress. The terms of these authorizations are wholly inadequate to protect the public's interest, and bills now pending on this subject are even more favorable to the private toll-bridge promoter than existing legislation. Incidentally, the proposal is carried to turn over the fixing of values and regulation of tolls to the Interstate Commerce Commission for bridges over navigable waters and over which interstate commerce is carried.

Basically, all bridges on the main highways have become valuable property because of the construction of highways. The bridges are only a part of such highways and should be legally treated as such. The Bureau of Public Roads made a survey of the situation, but was without legal authority and consequently could not obtain the records of costs, earnings, investments, and other essential facts from private interests. A full investigation of the toll-bridge situation is needed as a basis for remedial legislation to safeguard the public in their use of the roads and to protect the public which invests in securities. It is a field from which the shoestring promoter should be excluded, and he will be if a thorough investigation is made.

BRIDGE ACROSS OUACHITA RIVER AT HARRISONBURG, LA.

The next business on the Consent Calendar was the bill (H. R. 13705) authorizing H. M. Wheeler, his heirs, legal representatives, and assigns to construct, maintain, and operate a bridge across the Ouachita River at or near Harrisonburg, La.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. COCHRAN of Missouri. Mr. Speaker, reserving the right to object I am pleased to note the interest shown by so many Members in the present policy of the Congress with respect to privately owned toll bridges. It is plainly evident no additional bills granting permission to private individuals or private corporations will be passed until the present bridge act is either amended or a substitute for existing law is favorably acted upon by Congress.

I desire to invite the attention of the Members to the American Highways Magazine delivered to our offices this morning. Some 20 pages are devoted to privately owned toll bridges. The Director of the United States Bureau of Public Roads presents an able article on the subject as does the chief engineer of the Kentucky Highway Commission. One bridge is referred to by this Kentucky official that is earning 2,100 per cent annually upon the investment due solely to the States of Kentucky, Ohio, and Tennessee expending millions of dollars in the construction of modern highways. This bridge, known as the Clay Ferry Bridge, was sold for $4,755 in 1907 and this year over $100,000 will be realized above expenses from tolls. An amazing situation presents itself in connection with the DeValls Bluff (Ark.) Bridge. Only last week the United States district engineer at Memphis held a public hearing demanded by indignant public officials because of excessive tolls. Testimony was submitted showing the official records of the State disclose the bridge cost $302,111. The chief highway engineer of Arkansas testified he found an average of 5,527 motor vehicles passed over the bridge daily. The toll to tourists is $1 a round trip, but the tickets must be used within 24 hours from date of sale. Ninety-five per cent of the tourists never use the return ticket. Round-trip tickets are sold in books of 10 for $2.50. About 3,500 tourists use the bridge daily. This toll bridge, costing $302,111, is shown by competent witnesses to be earning over $1,000,000 annually. It was brought out that a straight 25-cent toll would bring annually, on the basis of present traffic, $504,000. The toll-bridge owners appeared in opposition to a reduction in tolls.

I have maintained the promoters have issued securities far in excess of the actual cost of construction. The Kentucky engineer points out in his statement a bridge actually cost $214,240 to construct. There was no supervision. The cost of promotion, engineering, attorney fees, and so forth, on this same bridge was $105,441.

Until there is a general investigation of this entire subject the real facts will not be disclosed because the owners of toll bridges decline to give the information either to the United States Bureau of Public Roads or the various State highway officials. There are no provisions in the law under which they were constructed that requires them to do so.

Senator ODDIE, of Nevada, has introduced a resolution now pending in the Senate providing for an investigation by a joint committee of the House and Senate. This resolution should be passed without delay.

On Friday, December 7, I introduced a bill in the form of a substitute for the general bridge act. I also published in the RECORD on that date a synopsis of the bill. When the reports are received from the departments I propose to ask the Committee on Interstate and Foreign Commerce for a hearing.

Numerous bills have been introduced since this session convened which provided for privately owned toll bridges connecting National and State highways. None should be passed, nor none will be passed, if I can prevent it, until the present law is properly revised or a substitute for existing law is enacted.

When I first called the attention of the House to this matter I had few supporters, but I am pleased to say almost 50 per cent of the Members have advised me the present policy should be discontinued, and I hope it will be. [Applause.]

Mr. Speaker, I object to the consideration of this bill, and I will continue to object to all such bills without exception. I have no objection to the passage of any bill granting authority

to a State or any subdivision thereof for the construction of a bridge nor to a railroad constructing a railroad bridge.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I object.

Mr. COCHRAN of Missouri. I object.

JOHN SMITHS LAKE, IDAHO

The next business on the Consent Calendar was the bill (H. R. 13144) to cede certain lands in the State of Idaho, including John Smiths Lake, to the State of Idaho for fish-cultural purposes, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the lands hereinafter described be, and the same are hereby, ceded to the State of Idaho for fish-cultural purposes, and the President is hereby authorized to execute and deliver to the State of Idaho a proper conveyance or grant of such lands for the purposes stated.

The lands hereby ceded are situate in the county of Custer, in the State of Idaho, and are more particularly described as follows, to wit:

Lot 1, section 24; lots 1, 2, 3, 4, 5, and 6, section 25, township 10 north, range 17 east, Boise meridian, containing about 192 acres, including John Smiths Lake.

With the following committee amendment:

Page 1, line 7, after the word "stated," insert "upon payment to the United States of $1.25 per acre therefor, and with a reservation to the United States of all coal, oil, gas, and other minerals, together with the right of the United States, its grantees, or permittees to prospect for, mine, and remove the same."

The committee amendment was agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

RELIEF FOR GRAIN ELEVATORS

The next business on the Consent Calendar was Senate joint resolution (S. J. Res. 59) authorizing the President to ascertain, adjust, and pay certain claims of grain elevators and grain firms to cover insurance and interest on wheat during the years 1919 and 1920, as per a certain contract authorized by the President.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the consideration of the joint resolution?

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that this joint resolution be passed over without prejudice.

Mr. BURTNESS. For the day?

Mr. LAGUARDIA. Yes; but I am going to object to it eventually.

Mr. STRONG of Kansas. Would not the gentleman like to have some explanation?

Mr. LAGUARDIA. Oh, the gentleman from Kansas has been explaining this bill to me now for eight or nine months, and even his eloquence has not convinced me.

Mr. STRONG of Kansas. I thank the gentleman for the compliment, but the bill has not been pending that long.

Mr. LAGUARDIA. But the gentleman has been talking to me about it that long.

Mr. STRONG of Kansas. Oh, no; I did not know of it until six months ago.

Mr. BURTNESS. If the gentleman is really taking the position that he eventually will object——

Mr. LAGUARDIA. I would be glad——

Mr. BURTNESS. There is no use trying——

Mr. LAGUARDIA. I will be glad to accommodate the gentleman. It will take three objections next time.

Mr. BURTNESS. If the gentleman is going to object next time, and gives notice he will object next time, it occurs to me he had better object now.

Mr. LAGUARDIA. I will be glad to do so. I object.

LANDS HELD UNDER COLOR OF TITLE

The next business on the Consent Calendar was the bill (S. 3776), to authorize the Secretary of the Interior to issue patents for lands held under color of title.

The Clerk read the title of the bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That whenever it shall be shown to the satisfaction of the Secretary of the Interior that a tract of public land, not exceeding 160 acres, has been held in good faith and in peaceful, adverse, possession by a citizen of the United States, his ancestors or grantors, for more than 20 years under claim or color of title, and that valuable improvements have been placed on such land, or some part thereof has been reduced to cultivation, the Secretary may, in his discretion, upon the payment of not less than $1.25 per acre, cause a patent to issue for such land to any such citizen: *Provided*, That where the area so held is in excess of 160 acres the Secretary may determine what particular subdivisions, not exceeding 160 acres, may be patented hereunder: *Provided further*, That coal and all other minerals contained therein are hereby reserved to the United States; that said coal and other minerals shall be subject to sale or disposal by the United States under applicable leasing and mineral land laws, and permittees, lessees, or grantees of the United States shall have the right to enter upon said lands for the purpose of prospecting for and mining such deposits: *And provided further*, That no patent shall issue under the provisions of this act for any tract to which there is a conflicting claim adverse to that of the applicant, unless and until such claim shall have been finally adjudicated in favor of such applicant.

SEC. 2. That upon the filing of an application to purchase any lands subject to the operation of this act, together with the required proof, the Secretary of the Interior shall cause the lands described in said application to be appraised, said appraisal to be on the basis of the value of such lands at the date of appraisal, exclusive of any increased value resulting from the development or improvement of the lands by the applicant or his predecessors in interest, and in such appraisal the Secretary shall consider and give full effect to the equities of any such applicant.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

LIVESTOCK IN CONNECTION WITH IRRIGATED LANDS IN WYOMING

The next business on the Consent Calendar was the bill (S. 1131) to encourage and promote the production of livestock in connection with irrigated lands in the States of Wyoming, Montana, and New Mexico.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. COLTON. Mr. Speaker, I ask unanimous consent that this bill may be passed without prejudice.

Mr. BLACK of Texas. Mr. Speaker, reserving the right to object, I would like to ask a question. I notice this bill deals with only three States, and the Secretary of the Interior suggested to the committee that instead of the bill under consideration providing for the sale of this land that the committee substitute a bill providing for the leasing of lands in all the States where there are these irrigation projects. It seems to me that would be the better thing to do.

Mr. COLTON. I will say that this is a matter of tremendous importance. The Public Lands Committee is working on that very problem now, and there is a bill in reference to grazing upon the public domain pending, and we want to consider it in connection with this bill and take time to go over the whole question.

The SPEAKER. Is there objection to the request of the gentleman from Utah? [After a pause.] The Chair hears none.

DIVERSION OF THE WATERS OF THE NORTH PLATTE

The next business on the Consent Calendar was the bill (H. R. 13420) to provide for the storage and diversion of the waters of the North Platte River and construction of the Casper-Alcova reclamation project.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. SIMMONS. Mr. Speaker, I object.

DIVERSION OF THE WATERS OF THE NORTH PLATTE RIVER AND CONSTRUCTION OF RECLAMATION PROJECT

The next business on the Consent Calendar was the bill (H. R. 13421) to provide for the storage and diversion of the waters of the North Platte River and construction of the Saratoga reclamation project.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. SIMMONS. Mr. Speaker, I object.

APPORTIONMENT OF WATER TO THE CIMARRON RIVER

The next business on the Consent Calendar was the bill (H. R. 6496) granting the consent of Congress to a compact or agreement between the States of New Mexico and Oklahoma with respect to the division and apportionment of the waters of the Cimarron River and all other streams in which such States are jointly interested.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, a certain amendment to this bill was presented at the last session which I shall expect to offer if consent is given for the consideration of the bill.

Mr. HASTINGS. What is the amendment?

Mr. CRAMTON. I will read it if the gentleman desires.

When the bill was up on the calendar the last session this matter was suggested at that time, agreeable to the gentleman from New Mexico [Mr. MORROW], and the amendment was to this effect:

Other than the compensation and expenses of such representative, the United States shall not be liable for any expenses in connection with such negotiations, compact, or agreement. The payment of such expenses of such representative are authorized to be paid from the appropriations for cooperative and general investigation for the Bureau of Reclamation.

Mr. HASTINGS. I think there will be no objection on the part of the Representatives from Oklahoma and New Mexico. It only applies to two States.

Mr. CRAMTON. There are several bills of a similar character, and I hope to have the same amendment adopted as to each of them.

Mr. JOHNSON of Texas. I see that this affects the Rio Grande. This is in Mr. HUDSPETH'S district, and——

Mr. HASTINGS. It does not affect the Rio Grande—only the Cimarron.

Mr. GILBERT. Mr. Speaker, I would like to ask the gentleman from New Mexico a question. I see he has reported several of these bills. I am opposed to increasing the tillable area of lands in the United States. Will this bill do that?

Mr. MORROW. It will affect the water applying to the States. The water will be protected by a compact between the States using it. It has nothing to do with the development of any immediate land for the purpose of crop production.

Mr. GILBERT. The latter part of the gentleman's explanation answers my question.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

Be it enacted, etc., That the consent of Congress is hereby given to the States of New Mexico and Oklahoma to negotiate and enter into compacts or agreements providing for an equitable division and apportionment between such States of the water supply of the Cimarron River and of the streams tributary thereto and of all other streams in which such States are jointly interested.

SEC. 2. Such consent is given upon condition that a representative of the United States from the Department of the Interior, to be appointed by the President, shall participate in the negotiations and shall make report to Congress of the proceedings and of any compact or agreement entered into.

SEC. 3. No such compact or agreement shall be binding or obligatory upon either of such States unless and until it has been approved by the legislature of each of such States and by the Congress of the United States.

SEC. 4. The right to alter, amend, or repeal this act is hereby expressly reserved.

The SPEAKER. Does the gentleman from Michigan desire to offer an amendment?

Mr. CRAMTON. Yes. I offer the following amendment.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. CRAMTON: Page 2, line 6, after the word "into," insert the following: "Other than the compensation and expenses of such representatives, the United States shall not be liable for any expenses in connection with such negotiations, compact, or agreement. The payment of such expenses of such representative are authorized to be paid from the appropriations for cooperative and general investigations for the Bureau of Reclamation."

Mr. LAGUARDIA. May I ask the gentleman, What is that compact? Does that necessitate the compact going back for legislation?

Mr. CRAMTON. This is not a compact between the States. This is a consent given to them to negotiate a compact. Now, in the negotiation it is expedient to have the representative of the Bureau of Reclamation cooperate with them. Without this no money would be available for that purpose.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

The SPEAKER. The Clerk will report the next bill.

APPORTIONMENT OF WATERS OF THE RIO GRANDE, PECOS, AND CANADIAN OR RED RIVERS

The next business on the Consent Calendar was the bill (H. R. 6497) granting the consent of Congress to compacts or agreements between the States of New Mexico and Texas with respect to the division and apportionment of the waters of the Rio Grande, Pecos, and Canadian or Red Rivers, and all other streams in which such States are jointly interested.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby given to the States of New Mexico and Texas to negotiate and enter into compacts or agreements providing for an equitable division and apportionment between such States of the water supply of the Rio Grande, Pecos, and Canadian or Red Rivers, and of the streams tributary thereto, and of all other streams in which such States are jointly interested.

SEC. 2. Such consent is given upon condition that a representative of the United States from the Department of the Interior, to be appointed by the President, shall participate in the negotiations and shall make report to Congress of the proceedings and of any compact or agreement entered into.

SEC. 3. No such compact or agreement shall be binding or obligatory upon either of such States unless and until it has been approved by the legislature of each of such States and by the Congress of the United States.

SEC. 4. The right to alter, amend, or repeal this act is herewith expressly reserved.

Mr. CRAMTON. Mr. Speaker, I offer an amendment.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 2, line 6, after the word "into," insert the following: "Other than the compensation and expenses of such representative the United States shall not be liable for any expenses in connection with such negotiations, compact, or agreement. The payment of such expenses of such representative are authorized to be paid from the appropriations for cooperative and general investigations for the Bureau of Reclamation."

The SPEAKER. The question is on agreeing to the amendment.

Mr. HASTINGS. Mr. Speaker, I would like to ask the author of the bill why Oklahoma was not included in the bill, inasmuch as the Red River or Canadian River affects Oklahoma as well as New Mexico and Texas?

Mr. MORROW. I suppose it is because it is not intended by Oklahoma to use it for irrigation.

Mr. HASTINGS. I do not think it would do any harm. It might come in as a matter of flood control. I would not care if the gentleman from New Mexico would offer an amendment including Oklahoma. I do not have the bill before me.

Mr. LAGUARDIA. Mr. Speaker, I can not hear the gentleman from Oklahoma.

Mr. HASTINGS. Mr. Speaker, after line 4, on page 1, after the word "Mexico," I offer an amendment to insert a comma and the word "Oklahoma."

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

Line 4, page 1, after the word "Mexico," insert a comma and the word "Oklahoma."

Mr. HASTINGS. And amend the title.

The SPEAKER. The question is on agreeing to the amendment offered by the gentleman from Oklahoma.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote whereby the bill was passed was laid on the table.

The title was amended.

The SPEAKER. The Clerk will report the next bill.

APPORTIONMENT OF WATERS OF THE RIO GRANDE, SAN JUAN, AND LAS ANIMAS RIVERS

The next business on the Consent Calendar was the bill (H. R. 6498) granting the consent of Congress to compacts or agreements between the States of New Mexico and Colorado with respect to the division and apportionment of the waters

of the Rio Grande, San Juan, and Las Animas Rivers and all other streams in which such States are jointly interested.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. MORROW. Mr. Speaker, I ask unanimous consent that this bill go over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

The SPEAKER. The Clerk will report the next bill.

APPORTIONMENT OF WATERS OF THE GILA AND SAN FRANCISCO RIVERS

The next business on the Consent Calendar was the bill (H. R. 6499) granting the consent of Congress to compacts or agreements between the States of New Mexico and Arizona with respect to the division and apportionment of the waters of the Gila and San Francisco Rivers and all other streams in which such States are jointly interested.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby given to the States of New Mexico and Arizona to negotiate and enter into compacts or agreements providing for an equitable division and apportionment between such States of the water supply of the Gila and San Francisco Rivers and of the streams tributary thereto and of all other streams in which such States are jointly interested.

SEC. 2. Such consent is given upon condition that a representative of the United States from the Department of the Interior, to be appointed by the President, shall participate in the negotiations and shall make report to Congress of the proceedings and of any compact or agreement entered into.

SEC. 3. No such compact or agreement shall be binding or obligatory upon either of such States unless and until it has been approved by the legislature of each of such States and by the Congress of the United States.

SEC. 4. The right to alter, amend, or repeal this act is hereby expressly reserved.

Mr. CRAMTON. Mr. Speaker, I offer an amendment which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 2, line 6, after the word "into" insert the following: "Other than the compensation and expenses of such representative the United States shall not be liable for any expenses in connection with such negotiations, compact, or agreement. The payment of such expenses of such representative are authorized to be paid from the appropriations for cooperative and general investigations for the Bureau of Reclamation."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

The SPEAKER. The Clerk will report the next bill.

APPORTIONMENT OF THE WATERS OF THE RIO GRANDE, SAN JUAN, AND LAS ANIMAS RIVERS

The next business on the Consent Calendar was the bill (H. R. 7024) granting the consent of Congress to compacts or agreements between the States of Colorado and New Mexico with respect to the division and apportionment of the waters of the Rio Grande, San Juan, and Las Animas Rivers and all other streams in which such States are jointly interested.

The title of the bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the consent of Congress is hereby given to the States of Colorado and New Mexico to negotiate and enter into compacts or agreements providing for an equitable division and apportionment between such States of the water supply of the Rio Grande, San Juan, and Las Animas Rivers and of the streams tributary thereto and of all other streams in which such States are jointly interested.

SEC. 2. Such consent is given upon condition that a representative of the United States from the Department of the Interior, to be appointed by the President, shall participate in the negotiations and shall make report to Congress of the proceedings and of any compact or agreement entered into.

SEC. 3. No such compact or agreement shall be binding or obligatory upon either of such States unless and until it has been approved by the legislature of each of such States and by the Congress of the United States.

SEC. 4. The right to alter, amend, or repeal this act is herewith expressly reserved.

Mr. CRAMTON. Mr. Speaker, I offer an amendment, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. CRAMTON: Page 2, line 6, after the word "into," insert the following: "Other than the compensation and expenses of such representative, the United States shall not be liable for any expenses in connection with such negotiations, compact, or agreement. The payment of such expenses of such representative are authorized to be paid from the appropriations for cooperative and general investigations for the Bureau of Reclamation."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

COMPACTS OR AGREEMENTS BETWEEN THE STATES OF COLORADO AND KANSAS

The next business on the Consent Calendar was the bill (H. R. 7025) granting the consent of Congress to compacts or agreements between the States of Colorado and Kansas with respect to the division and apportionment of the waters of the Arkansas River and all other streams in which such States are jointly interested.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the consent of Congress is hereby given to the States of Colorado and Kansas to negotiate and enter into compacts or agreements providing for an equitable division and apportionment between such States of the water supply of the Arkansas River and of the streams tributary thereto and of all other streams in which such States are jointly interested.

SEC. 2. Such consent is given upon condition that a representative of the United States from the Department of the Interior, to be appointed by the President, shall participate in the negotiations and shall make report to Congress of the proceedings and of any compact or agreement entered into.

SEC. 3. No such compact or agreement shall be binding or obligatory upon either of such States unless and until it has been approved by the legislature of each of such States and by the Congress of the United States.

SEC. 4. The right to alter, amend, or repeal this act is hereby expressly reserved.

Mr. CRAMTON. Mr. Speaker, I offer an amendment.

The SPEAKER. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 2, line 6, after the word "into," insert the following: "Other than the compensation and expenses of such representative, the United States shall not be liable for any expenses in connection with such negotiations, compact, or agreement. The payment of such expenses of such representative are authorized to be paid from the appropriations for cooperative and general investigations for the Bureau of Reclamation."

The amendment was agreed to.

Mr. HASTINGS. Mr. Speaker, I offer an amendment: On page 1, line 4, after the word "Colorado," insert a comma and the word "Oklahoma."

The SPEAKER. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HASTINGS: Page 1, line 4, after the word "Colorado," insert a comma and the word "Oklahoma."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

The title was amended.

COMPACTS OR AGREEMENTS BETWEEN THE STATES OF COLORADO AND WYOMING

The next business on the Consent Calendar was the bill (H. R. 7026) granting the consent of Congress to compacts or agreements between the States of Colorado and Wyoming with respect to the division and apportionment of the waters of the North Platte River and other streams in which such States are jointly interested.

The Clerk read the title of the bill .

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent that this bill and the next bill on the calendar be passed over without prejudice but retain their places on the calendar.

The SPEAKER. The gentleman from Colorado asks unanimous consent that this bill and the one following may be passed over without prejudice but retain their places on the calendar. Is there objection?

There was no objection.

COMPACTS OR AGREEMENTS BETWEEN THE STATES OF COLORADO AND UTAH

The next business on the Consent Calendar was the bill (H. R. 7028) granting the consent of Congress to compacts or agreements between the States of Colorado and Utah with respect to the division and apportionment of the waters of the Colorado, Green, Bear or Yampa, the White, San Juan, and Dolores Rivers and all other streams in which such States are jointly interested.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LEATHERWOOD. Mr. Speaker, paragraph 2 of this bill is objectionable to the State of Utah. I have had a consultation with the gentleman from Colorado [Mr. TAYLOR], the author of the bill, and he has agreed that the same may be stricken out. If he consents to that, I have no objection to the consideration of the bill.

Mr. TAYLOR of Colorado. I have no objection.

The SPEAKER. Is there objection?

Mr. CRAMTON. Mr. Speaker, the paragraph to which I would offer an amendment is to be stricken out. Before I give consent to the consideration of the bill I would like to have a chance to see the effect of the gentleman's amendment. As I understand it, the gentleman from Utah wants the bill amended so that no representative of the Federal Government would take part in the negotiations.

Mr. LEATHERWOOD. I propose to strike out paragraph 2.

Mr. CRAMTON. Well, could the gentleman advise me as to the effect of that?

Mr. LEATHERWOOD. Mr. Speaker, the effect would simply be this: Under the Constitution and the law it is not necessary for States to come to Congress and get consent in advance to enter into such agreements or compacts. However, the custom is that they usually do ask for the consent of Congress in advance. In any event, after a compact or agreement has been reached by and between the States they must then have a ratification by Congress. We feel that the sovereign States of Colorado and Utah are capable of conducting this negotiation and entering into this compact without any third party sitting in. We realize that if we need any information it will be the duty of the Secretary of the Interior to inform us or to give us that information, but we feel we are perfectly competent to reach an agreement without any interference by a third party. That is our position exactly.

Mr. CRAMTON. Mr. Speaker, if the gentleman's statement is entirely correct, there is no occasion whatever for the passage of the bill at all, because he says they already have the authority provided in the bill. Therefore I object.

Mr. LEATHERWOOD. I join in the objection.

Mr. TAYLOR of Colorado. Will the gentleman from Michigan withhold his objection for a moment?

Mr. CRAMTON. Yes.

Mr. TAYLOR of Colorado. Mr. Speaker, these five bills came up, as you know, last session, and the gentleman from Utah reserved the right to object and I asked that the bills be passed over until this time. There are some five or six large streams that run from Colorado into Utah, and I feel that I can not pass a bill affecting the two States, one as much as the other, with the opposition of the Representatives from one of the States. However, we have had so much litigation between some of these Western States, if Colorado and Utah could get together between themselves, even with section 2 out of the bill, and agree upon what their respective claims should be in those streams, it would be better to have that much and avoid if possible that much litigation rather than not to have any compact at all. These bills simply give the consent of Congress to these States to get together and agree on an apportionment of the waters of these streams that run from one State into another, and avoid litigation and the retarding of development and strife between the people of those States.

Mr. CRAMTON. If my friend from Colorado will yield, let me suggest that the bill as proposed by the gentleman from Utah [Mr. LEATHERWOOD] means that these two States could get together without consultation with the Federal Government, without any showing of the interests of the Federal Government or possibly its wards, the Indians, and make an agreement and that compact comes to the Congress for approval. The Congress then can only approve or disapprove of it. I believe before we get to that stage there should be a presentation and a protection of the interests of the Federal Government, if any, in such negotiations, and that is what the bill as introduced and as reported by the committee provides.

The gentleman from Colorado [Mr. TAYLOR] knows that the Federal Government is responsible for the protection of the interests of its wards, the Indians, and they are often interested in this matter of the division of waters. The two States of Utah and Colorado could get together and divide everything that belongs to them, and possibly something that does not, and then come to the Congress and give no opportunity to the Congress except to accept the compact as a whole or to disapprove of it, and I believe that is not good practice.

I think these two States can get along just as well as other States with a representative of the Government sitting in their conferences, assisting with any information he has, and then reporting to the Congress the results of the conferences.

Mr. TAYLOR of Colorado. Will not the gentleman permit the bill to retain its place on the calendar for further consideration?

Mr. CRAMTON. Yes; I think it ought to stay on the calendar and ought to be passed as reported.

Mr. TAYLOR of Colorado. I think so, too, but my colleague from Utah over there does not think so. Out of deference to both of you gentlemen I will ask that the bill go over without prejudice and retain its place on the calendar, if the gentleman is going to object.

The SPEAKER. The Chair understands the gentleman from Colorado to ask that the bill be passed over without prejudice.

Mr. TAYLOR of Colorado. And retain its place on the calendar.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

CARE OF INSANE CITIZENS OF ALASKA

The next business on the Consent Calendar was the bill (H. R. 170) to provide for the care of certain insane citizens of the Territory of Alaska.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, at the request of the gentleman from Washington [Mr. JOHNSON] I ask unanimous consent that this bill may be passed over without prejudice, retaining its place on the calendar.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

ADDITIONAL JUSTICE FOR THE SUPREME COURT OF THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (H. R. 13116) to provide an additional justice of the Supreme Court of the District of Columbia, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

Mr. GRAHAM. Mr. Speaker, I ask unanimous consent that the Senate bill, S. 4127, may be substituted for the House bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That the President, with the advice and consent of the Senate, shall appoint an additional justice of the Supreme Court of the District of Columbia, who shall have the same tenure of office, pay and emoluments, powers, and duties as the present justices of that court. It shall be a duty of the Chief Justice of the Supreme Court of the District of Columbia to appoint from time to time, and for such period or periods as he may determine, one of the judges of the said Supreme Court of the District of Columbia to hear cases involving the condemnation of land in the District of Columbia, and it shall be the primary duty of such judge so appointed to preside at the hearing of

such cases involving the condemnation of land in the District of Columbia, and that only when not engaged in such cases shall he be subject to assignment to the other business of the court. The chief justice may assign for service in condemnation cases any justice of said court in case of disability of the justice so serving or for any other reason.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill was laid on the table.

HALF HOLIDAYS FOR CERTAIN GOVERNMENT EMPLOYEES

The next business on the Consent Calendar was the bill (S. 3116) providing for half holidays for certain Government employees.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLACK of Texas and Mr. WOOD objected.

CHIPPEWA INDIANS OF MINNESOTA

The next business on the Consent Calendar was the bill (H. R. 12414) authorizing the classification of the Chippewa Indians of Minnesota, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill.

Mr. HOOPER. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EMPLOYEES OF THE PUBLIC-SCHOOL SYSTEM OF THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (H. R. 12531) to exempt the public-school system of the District of Columbia from the $2,000 salary limitation provision of the legislative, executive, and judicial appropriation act, approved May 10, 1916, as amended.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. I object, Mr. Speaker.

DEGREE-CONFERRING INSTITUTIONS

The next business on the Consent Calendar was the bill (S. 2366) to amend subchapter 1 of chapter 18 of the Code of Laws for the District of Columbia relating to degree-conferring institutions.

The Clerk read the title of the bill.

The SPEAKER. Is there objection?

Mr. LAGUARDIA. Reserving the right to object, I have an amendment which should be offered.

Mr. NELSON of Wisconsin. Mr. Speaker, this is a very important bill and should be given careful consideration, and I therefore object to its being considered on the Consent Calendar.

RIGHTS IN LAND FOR PARK PURPOSES AND LEASE OF BUILDINGS ON PARK LAND IN THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (S. 4126) authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved, and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances.

The Clerk read the title of the bill.

The SPEAKER. Is there objection.

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, the general purpose of the bill is not objectionable, but one can readily see that it is possible to establish a business and get a suitable park all around that business. It occurred to me that there should be an amendment on page 2, line 5, after the word "grantor" by inserting "except for business purposes."

Mr. ZIHLMAN. I have no objection to that.

Mr. COOPER of Wisconsin. Reserving the right to object, I would like to ask the gentleman from Maryland if, in line 5, page 3, after the word "lease," there ought not to be inserted "subject to the approval of the said commission"? This allows him to renew the lease himself.

Mr. ZIHLMAN. In section 2, line 2, it says:

The Director of Public Buildings and Public Parks of the National Capital is authorized, subject to the approval of the National Capital Park and Planning Commission, to lease for a term of not exceeding five years—

And so forth.

Mr. COOPER of Wisconsin. "And to renew said lease for an additional term not exceeding five years."

Mr. ZIHLMAN. I have no objection to that. I am sure the Park Commission would not object to that. I might say to the gentleman from New York that the Park Commission have had several opportunities to have land dedicated for park purposes, the owners not caring to give up the title, but they could not accept it. They were unable to accept it, and this bill is to give them the power.

Mr. BLACK of Texas. Reserving the right to object, the Director of the Budget in a letter dated April 12 says:

BUREAU OF THE BUDGET,
Washington, April 12, 1928.

Lieut. Col. U. S. GRANT, 3d,
Executive and Disbursing Officer,
National Capital Park and Planning Commission,
Washington, D. C.

DEAR COLONEL GRANT: Under date of January 20, 1928, you were advised that the draft of proposed legislation which you transmitted to this office on November 25, 1927, to authorize your commission to acquire future estates and rights in land, and to lease land or buildings for limited periods in certain cases, was in conflict with the financial program of the President.

With respect to the draft of proposed legislation which accompanied your letter of April 10, 1928, however, relative to the same subject matter, you are advised that this proposed legislation would not be in conflict with the financial program of the President if the words "future estates and" were stricken from the title of the draft.

Very truly yours,

H. M. LORD, *Director.*

Does this bill grant any authorization to purchase estates in futurity—where the title is vested in the future?

Mr. ZIHLMAN. I do not so understand it; I may be in error. The National Park and Planning Commission have the power to acquire lands for park purposes, but they have no power to lease lands, and that is the object of this bill.

Mr. BLACK of Texas. In reading the bill I think the objection of the Director of the Budget has been removed. I do not see anything in this bill that would permit them to purchase land on some future contingency.

Mr. ZIHLMAN. I do not so understand it.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the authority of the National Capital Park and Planning Commission, established by the act approved April 30, 1926 (Stat. L., vol. 44, p. 374), is hereby enlarged as follows:

Said commission is hereby authorized to acquire, for and in behalf of the United States of America, by gift, devise, purchase, or condemnation, in accordance with the provisions of the act of June 6, 1924 (Stat. L., vol. 43, p. 463), as amended by the act of April 30, 1926 (Stat. L., vol. 44, p. 374), (1) fee title to land subject to limited rights reserved to the grantor: *Provided,* That such reservation of rights shall not continue beyond the life or lives of the grantor or grantors of the fee: *Provided further,* That in the opinion of said commission the permanent public park purposes for which control over said land is needed are not essentially impaired by said reserved rights and that there is a substantial saving in cost by acquiring said land subject to said limited rights as compared with the cost of acquiring unencumbered title thereto; (2) permanent rights in land adjoining park property sufficient to prevent the use of said land in certain specified ways which would essentially impair the value of the park property for its purposes: *Provided,* That in the opinion of said commission the protection and maintenance of the essential public values of said park can thus be secured more economically than by acquiring said land in fee or by other available means: *Provided further,* That all contracts for acquisition of land subject to such limited rights reserved to the grantor and for acquisition of such limited permanent rights in land shall be subject to the approval of the President of the United States.

SEC. 2. The Director of Public Buildings and Public Parks of the National Capital is authorized, subject to the approval of the National Capital Park and Planning Commission, to lease, for a term not exceeding five years, and to renew such lease for an additional term not exceeding five years, pending need for their immediate use in other ways by the public, and on such terms as the director shall determine, land or any existing building or structure on land acquired for park, parkway, or playground purposes.

Mr. LAGUARDIA. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. LAGUARDIA: Page 2, line 5, after the word "rights," insert the words "but not for business purposes."

The amendment was agreed to.

The Clerk read as follows:

Amendment by Mr. LAGUARDIA: Page 3, line 5, after the word "lease," insert the words "subject to such approval."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

PERSONAL LIABILITY OF MEMBERS OF BOARD OF EDUCATION

The next business on the Consent Calendar was the bill (H. R. 12530) to amend Public Law No. 254, approved June 20, 1906, known as the organic school law, so as to relieve individual members of the Board of Education of personal liability for acts of the board.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BLANTON. Mr. Speaker, I reserve the right to object. It occurs to me that this bill is useless. The present law does not make the school-board members personally liable for official acts; and in no State is there any law that makes a public official liable for official acts performed in good faith, however improper they may be. What is the use of passing this bill just to satisfy some real-estate manipulator as to the title to one piece of property belonging to one member of the school board that happens to be in jeopardy, as he imagines?

Mr. ZIHLMAN. We are advised by the Commissioners of the District of Columbia that in several instances judgments carrying costs have been rendered against members of the school board in actions brought against them in respect to official acts.

Mr. BLANTON. If you sue a man and he does not have proper legal counsel and does not make a proper defense, improper judgments are sometimes rendered in courts, but they ought to have counsel, and they have plenty of counsel here in the District to represent them, and if the law is presented to the court, no judgment could be rendered against them personally.

Mr. LAGUARDIA. Oh, yes; it could under existing law.

Mr. BLANTON. There is no such law that authorizes a personal judgment against an official for an official act unless it is malicious. Is there any such law in the State of New York?

Mr. LAGUARDIA. Yes. I have had some experience with that. There are some cases still pending against me and some of my colleagues for official acts while on the Board of Estimate and Apportionment of New York City.

Mr. BLANTON. Where the acts are committed in good faith——

Mr. LAGUARDIA. Yes; in good faith.

Mr. BLANTON. Of course, there could be malicious acts performed by officials that would make them personally liable, but where there is no malice, where it is merely want of good judgment, then I know of no law in any State which would permit a personal judgment against an official for the performance in good faith of an official act.

Mr. LAGUARDIA. As I understand the law, if a judgment is obtained against the Board of Education, of course the District of Columbia pays for it.

Mr. BLANTON. Yes; of course it does, and always has.

Mr. LAGUARDIA. But, in the meantime, the judgment is of record, pending appeal, or something of that kind, and that is a cloud on the title to the property of the individual members.

Mr. BLANTON. I will tell why they want this change. There have been some acts performed that were in a way malicious. They are trying to relieve themselves of all responsibility so that they can do just exactly what they please.

Mr. LAGUARDIA. This bill does not relieve them of responsibility for malicious acts.

Mr. BLANTON. It would deter people who had had their rights abused from bringing suits against them. Mr. Speaker, for the present I object.

VAGRANCY IN THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (H. R. 7911) to define and punish vagrancy in the District of Columbia.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. SNELL). Is there objection to the present consideration of the bill?

Mr. SCHAFER. I object.

RETIREMENT OF EMPLOYEES IN THE CLASSIFIED CIVIL SERVICE

The next business on the Consent Calendar was the bill (H. R. 13565) to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved July 3, 1926.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved July 3, 1926, is hereby amended by adding a fourth paragraph to section 2 of said act, as follows:

"In all cases where an employee otherwise eligible for continuance has been retained beyond retirement age without prior authority the Civil Service Commission may issue certificate of continuance legalizing the service of such employee and authorizing his further continuance as provided in paragraph 1 of this section, upon being satisfied that the retention was due to erroneous or incomplete records of age or service or to faulty administration on the part of the department or office concerned and not to any attempt or desire by the employee to deceive for the purpose of defeating any provision of this act."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

FEDERAL FARM LOAN ACT

The next business on the Consent Calendar was the bill (H. R. 14000) to amend section 29 of the Federal farm loan act, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. SCHAFER. I object.

ORGANIC ACT OF PORTO RICO

The next business on the Consent Calendar was the bill (H. R. 7010) to amend the organic act of Porto Rico, approved March 2, 1917.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the proviso contained in section 35 of an act entitled "An act to provide a government for Porto Rico, and for other purposes," approved March 2, 1917, be, and the same is hereby, amended to read as follows: *Provided,* That no property qualifications shall ever be imposed upon or required of any voter: *And provided further,* That the right to vote shall not be denied or abridged on account of sex.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

RANK, PAY, AND ALLOWANCES OF PERSONAL PHYSICIAN TO THE PRESIDENT

The next business on the Consent Calendar was the bill (H. R. 13784) allowing the rank, pay, and allowances of a colonel, Medical Corps, United States Army, to the medical officer assigned to duty as personal physician to the President.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, we passed a bill last session giving the rank of admiral to a doctor. Are we going to surround him with admirals and colonels?

Mr. WAINWRIGHT. Mr. Speaker, it has always been considered the privilege of the President to appoint an officer of the Army and Navy whom he desired——

Mr. BLANTON. On that point——

Mr. WAINWRIGHT. I prefer not to yield until I have finished a very brief explanation. President Coolidge appointed a Major Coupal. At the last session we passed a bill allowing that officer the pay and allowance of a colonel, as a man in that position has certain expenses, certain obligations resting upon him which he has to meet and which are very onerous for a man who has that rank and pay.

Now, the Committeee on Military Affairs concluded in the consideration of this bill that it was advisable, under the privilege the President exercises, to provide that where an officer is appointed with a lower rank than colonel, to obviate the coming to Congress for future special legislation of the kind, and if the next President wants to appoint somebody of less

rank than colonel, that there should be general legislation of this kind, and therefore——

Mr. SCHAFER. Will the gentleman yield?

Mr. WAINWRIGHT. I yield to the gentleman from Texas.

Mr. BLANTON. I want to ask the gentleman a question. As the gentleman well knows in times past, President Harding brought the poor old grandfather physician here from his local town and made him a brigadier general.

Mr. WAINWRIGHT. That was a different matter.

Mr. BLANTON. It is not; because any President can do what President Harding did, the gentleman's own President, and the President elect (Mr. Herbert Hoover) can do the same thing.

Mr. JAMES. Under this bill they have to take him from the Army.

Mr. BLANTON. No; they can take him from anywhere, place him in the Medical Corps of the Army as a lieutenant, and then make him a general.

Mr. JAMES. He would have to be an officer of the Medical Corps.

Mr. BLANTON. He could first put him in and then raise him. I object.

INTERNATIONAL JURIDICAL CONGRESS ON WIRELESS TELEGRAPHY

The next business on the Consent Calendar was H. J. Res. 316, authorizing an appropriation in the sum of $12,350 to pay for the expenditures involved in the participation by the United States in the International Juridical Congress on Wireless Telegraphy to be held at Rome in 1928.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, this convention was held. Now, what we want to know is whether the delegation was sent over there contrary to the law, especially when the State Department is so sensitive about Congress encroaching upon their prerogative as to foreign affairs? Now, this convention took place last summer, and if a delegation was sent over without authority of Congress we ought to know.

Mr. COLE of Iowa. Is the gentleman sure the convention has been held?

Mr. LAGUARDIA. I only know what is in the bill where it says in 1928, and if it is going to be held in the next few days——

Mr. COLE of Iowa. The chairman of the Committee on Foreign Affairs [Mr. PORTER] is absent, and he gave me no further information.

Mr. BLANTON. After these gentlemen have had their nice travel and summer trip abroad they do not want us to make them pay their own expenses.

Mr. LAGUARDIA. Well, I think it very wholesome that the executive department——

Mr. BLANTON. I think the gentleman ought to object.

Mr. LAGUARDIA. I am going to.

Mr. COLE of Iowa. This is not a pleasure trip. It is an important international conference.

Mr. LAGUARDIA. The question is whether the State Department sent out these delegations without authority of Congress. The head of the State Department is especially jealous of his rights in regard to department affairs.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

INTERNATIONAL TELEGRAPH CONFERENCE

The next business on the Consent Calendar was the resolution (H. J. Res. 317) authorizing an appropriation in the sum of $19,800 to pay for the expenditures involved in the participation by the United States in the international telegraph conference to be held at Brussels in 1928.

The title of the resolution was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. LAGUARDIA. Mr. Speaker, I make the same objection to this as to the preceding measure.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS

The next business on the Consent Calendar was the bill (H. R. 13345) to amend section 4826 of the Revised Statutes of the United States, as amended.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

Mr. SCHAFER. Mr. Speaker, will the gentleman withhold his objection a moment?

Mr. CRAMTON. I will reserve it.

Mr. SCHAFER. Mr. Speaker, we have 11 National Homes for Disabled Volunteer Soldiers. I think it is a good policy from the veterans' standpoint for each State having one of these branch homes to have a representative on the board of managers, so that the interests of that home may be properly taken care of. The expenses involved are very trivial.

Mr. CRAMTON. At the present time, Mr. Speaker, I understand that there is under consideration legislation proposing a change in the system of management of these homes and a consolidation with the activities of the Veterans' Bureau. Until that is done it seems undesirable to appoint more of these officials.

Mr. SCHAFER. That may be a long time.

Mr. CRAMTON. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

ADDITIONAL LAND OFFICES IN MONTANA, OREGON, SOUTH DAKOTA, IDAHO, NEW MEXICO, COLORADO, AND NEVADA

The next business on the Consent Calendar was the bill (S. 1794) establishing additional land offices in the States of Montana, Oregon, South Dakota, Idaho, New Mexico, Colorado, and Nevada.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

MAMMOTH CAVE NATIONAL PARK

The next business on the Consent Calendar was the bill (H. R. 13694) to authorize the Secretary of the Treasury to prepare and strike a medal, with appropriate emblems, devices, and inscriptions thereon, commemorative of the enactment of the act of Congress, approved by the President on May 25, 1926, providing for the establishment, in the State of Kentucky, of the Mammoth Cave National Park.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. I object.

The SPEAKER pro tempore. The gentleman from Michigan objects. The Clerk will report the next bill.

Mr. THATCHER. Mr. Speaker, will the gentleman from Michigan withhold a moment?

Mr. CRAMTON. Yes. But there is no bill on the calendar against which I have more objections than this. This bill is without excuse. I will withhold my objection if the gentleman wants to discuss it.

Mr. THATCHER. The people of the State of Kentucky have made up, by subscriptions and in donations of property, about one and a quarter million dollars toward the acquisition of the land embracing the Mammoth Cave project. In order to facilitate or aid in the raising of further funds it would be a help to us if we could have a medal struck in the manner provided in this bill. It will cost the Government nothing. It will involve the Government in no expense whatever, and these medals will be sold and the proceeds utilized in the prosecution of this project.

Mr. LAGUARDIA. Will the mint be able to strike these medals without cost?

Mr. THATCHER. We have to pay the cost of them. The arrangement proposed is perfectly satisfactory to the mint officials.

Mr. LAGUARDIA. Under the law, as I understand, the association would have no power to do it. They can only devise a plan.

Mr. CRAMTON. Mr. Speaker, if the gentleman will permit, my information is that the Mammoth Cave in Kentucky is not of national-park caliber. In the act for the Great Smoky and Shenandoah Parks the Mammoth Cave was forced into the bill. They have not been able to raise the money after forcing this cave into the situation, and now they seek to have the Congress of the United States authorize them to peddle medals around the country in order to put into the park system something that is not of a national park standard, and I object.

Mr. THATCHER. It is of a national park status, and the committee appointed under authority of Congress, headed by the gentleman from Pennsylvania [Mr. TEMPLE], recommended it as a national park enterprise, and, based on that report, it was included in an act, and the act was signed by the President.

Every school child in the country knows of the great Mammoth Cave region.

Mr. CRAMTON. It is now traveling on its reputation. Its walls are begrimed with the smoke coming from torches carried by visitors for many years. The cave has not been properly cared for. As to the Great Smokies and the Shenandoah, one has been financed without any such catchpenny scheme and the other is about to be financed. I do not believe we should give any preference in requirements to the least desirable one of the three.

Mr. THATCHER. I do not agree with the gentleman. I do not suppose he has ever seen this national park, and, therefore, does not know about that which he is trying to speak.

Mr. CRAMTON. I have never visited it and I have never heard anything about it that made me want to do so.

Mr. THATCHER. So the gentleman argues himself unknown.

The SPEAKER pro tempore. Objection is heard, and the Clerk will report the next bill.

DIVISION OF THE LANDS AND FUNDS OF THE OSAGE INDIANS IN OKLAHOMA

The next business on the Consent Calendar was the bill (S. 2360) to amend section 1 of the act of Congress of March 3, 1921 (41 Stat. L. 1249), entitled "An act to amend section 3 of the act of Congress of June 28, 1906," entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes."

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that this bill go over without prejudice.

The SPEAKER pro tempore. Is there objection?

There was no objection.

FEDERAL FARM LOAN ACT

The next business on the Consent Calendar was the bill (H. R. 13936) to amend the second paragraph of section 4 of the Federal farm loan act, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HOOPER. Mr. Speaker, by request of the chairman of the Committee on Banking and Currency, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. Mr. Speaker, I object to the request and I object to the bill.

KANSAS OR KAW TRIBE OF INDIANS

The next business on the Consent Calendar was the bill (H. R. 8901) to amend and further extend the benefits of the act approved March 3, 1925, entitled "An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any and all claims, of whatever nature, which the Kansas or Kaw Tribe of Indians may have or claim to have against the United States, and for other purposes."

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I have two amendments. One I feel I would have to insist on and the other I think ought to be adopted. The one which I think ought to be adopted provides for the cutting out of the language in italics on page 4 that permits a fee of $50,000 instead of one of $25,000. The one which I think I would want to insist on is to insert at the end of line 12, on page 4, language similar to that which was in the California Indians' bill, which provides for the use of the money for specific purposes instead of per capita payments.

Mr. WILLIAMSON. If the gentleman will yield, I have no objection myself to that sort of an amendment. In this particular case, however, I think a fee of $25,000 is too small for attorneys. This is a very involved case; a tremendous amount of work has already been done in the case and much more will have to be done, so that I do not think a fee of $25,000 is sufficient in order to get the right kind of attorneys in a case of this character.

Mr. CRAMTON. I have not studied the case and having confidence in the gentleman's judgment on that, I shall not urge that amendment, but I think the other amendment should be accepted.

Mr. HUDSON. I shall object unless the gentleman from South Dakota accepts the amendment cutting the fee.

Mr. WILLIAMSON. I do not know how much the gentleman knows about this particular case and the merits of it.

Mr. HUDSON. I have spent some years on the Indian Affairs Committee and I shall object to the fee going above $25,000.

Mr. WILLIAMSON. Let me make this statement. This is a case that our subcommittee went into pretty thoroughly. I think I know what is involved in this case and I know there is a tremendous amount of work that will have to be done. I believe the case is of such importance that a fee of $50,000 is not too much.

Mr. HUDSON. I would be very glad at some other time to take this matter up with the gentleman and I will ask that the bill be passed over for to-day.

The SPEAKER pro tempore. The bill has once been objected to, and it will take three objections to take it off the calendar.

Mr. CLARKE. Mr. Speaker, I object.

Mr. LEAVITT. Mr. Speaker, before these objections are made, and there are only two up to this time, I want to say that the Committee on Indian Affairs refers every one of these jurisdictional bills to a subcommittee headed by Judge WILLIAMSON, and the merits of each bill are thoroughly gone into.

Mr. BLANTON. Will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. BLANTON. This is the kind of a bill to which I expect the gentleman from Michigan to stop by objection.

Mr. LEAVITT. He is not insisting on the one amendment.

Mr. BLANTON. But he is one of the objectors.

Mr. LEAVITT. He has not objected.

Mr. BLANTON. The Bureau of the Budget has disapproved this bill.

Mr. LEAVITT. The Bureau of the Budget has disapproved all bills of this kind.

Mr. BLANTON. I will be the third objector.

Mr. CRAMTON. Will the gentleman withhold his objection to let me explain to him the importance of the matter?

Mr. BLANTON. Yes.

Mr. BLACK of Texas. Mr. Speaker, I renew the objection for the present.

Mr. LEAVITT. Mr. Speaker, I ask unanimous consent that this bill——

Mr. O'CONNOR of Louisiana. Regular order, Mr. Speaker.

The SPEAKER pro tempore. Regular order is demanded. The Clerk will report the next bill on the calendar.

UMPQUA NATIONAL FOREST, OREG.

The next business on the Consent Calendar was the bill (H. R. 9770) authorizing the construction of a road in the Umpqua National Forest between Steamboat Bridge and Black Camas in Douglas County, Oreg.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON, Mr. BLACK of Texas, and Mr. HASTINGS objected.

Mr. HAWLEY. Mr. Speaker, I ask unanimous consent that the bill may go to the foot of the calendar.

The SPEAKER pro tempore. There have been three objections, which removes it from the calendar.

SISKIYOU NATIONAL FOREST, OREG.

The next business on the Consent Calendar was the bill (S. 3162) authorizing the improvement of the Oregon Caves in the Siskiyou National Forest, Oreg.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON, Mr. BLACK of Texas, and Mr. HASTINGS objected.

VOCATIONAL EDUCATION

The next business on the Consent Calendar was the bill (S. 1731) to provide for the further development of vocational education in the several States and Territories.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I am in favor of the bill, but I do not think a bill of this character ought to be on the Consent Calendar. This bill ought to have some consideration, and for that reason I object to it, although I am in favor of the bill.

ADDITIONAL JUDGE FOR THE SOUTHERN DISTRICT OF FLORIDA

The next business on the Consent Calendar was the bill (S. 1275) to create an additional judge for the southern district of Florida.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BLANTON and Mr. SCHAFER objected.

Mr. GRAHAM. Mr. Speaker, I ask unanimous consent that this bill may be passed over until the next call of the calendar, for the reason that there may be action taken in the House that will cover the matter of judicial appointments.

Mr. BLANTON. Will the Chair permit a parliamentary inquiry in connection with this request?

The SPEAKER pro tempore. The gentleman will state it.

Mr. BLANTON. If this consent is granted, will one objection take the bill off the calendar the next time?

The SPEAKER pro tempore. That is correct.

Mr. BLANTON. I have no objection to the request.

The SPEAKER pro tempore. Without objection, the bill will be passed over without prejudice, and the Clerk will call the next bill on the calendar.

There was no objection.

LABELING FOREIGN PRODUCTS

The next bill on the Consent Calendar was the bill (H. R. 13071) to amend section 8 of the food and drugs act, approved June 30, 1906, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GIBSON, Mr. CLARKE, and Mr. LAGUARDIA objected.

NANCY HART

The next business on the Consent Calendar was the bill (H. R. 7452) for the erection of a tablet or marker to be placed at some suitable point at Alfords Bridge, in the county of Hart, State of Georgia, on the national highway between the States of Georgia and South Carolina, to commemorate the memory of Nancy Hart.

The Clerk read the title of the bill.

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I objected to this bill at the last session and I still think the policy is wrong, the Federal Government building monuments for such trivial occasions as this. As I understand, the gentleman from Georgia [Mr. BRAND] is very keenly interested and it has been intimated that both Georgia and South Carolina may go Republican if this bill does not pass. Hence, I am disposed to withhold my objection if certain amendments can be made.

In the first place, in justice to the reputation of the chairman of the committee, the gentleman from Massachusetts [Mr. LUCE]: The language is a maze of "whoses" and "whichs" and "wheres" and "whens," so that it is quite bewildering. I would like to straighten out the language and then I think we will do enough if we spend $500 for a tablet and the local people erect the tablet and maintain it. If that is agreeable to the gentleman I will offer those amendments when the bill is read.

Mr. BLANTON. Is the gentleman doing that for the benefit of the people or to keep those States regularly Republican?

Mr. CRAMTON. To keep them regularly Democratic. We want an irreducible minimum left.

Mr. BRAND of Georgia. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BRAND of Georgia. I have a bill prepared which is an exact copy of the pending bill except the elimination of the adjectives that the gentleman objects to.

Mr. CRAMTON. All that is necessary is to strike out the word "erect" on page 1 and say "furnish for erection" and then in order to correct the grammar, on page 2, in line 3, strike out the words "when and where."

Mr. BRAND of Georgia. Yes; I am willing for the proposed corrections to be made, but I do not admit that the language objected to is not proper English.

Mr. CRAMTON. Well, it may be all right in Georgia but not elsewhere. And in line 4, strike out the word "she" and then later insert "$500" for "$1,000" and at the end of the paragraph insert "and bear all expenses of the erection of such marker or tablet."

Mr. BRAND of Georgia. Does the gentleman mean to reduce the amount from $1,000 to $500?

Mr. CRAMTON. I thought that was probably more generous than we ought to consider, but I was willing to compromise with the gentleman.

Mr. BRAND of Georgia. If the gentleman will permit, I think this statement will appeal to the gentleman's sense of fairness. This is the only bill ever reported out for a marker by the Library Committee for less than $2,500.

Mr. CRAMTON. It is the only bill, I will say to the gentleman, I know of——

Mr. BRAND of Georgia. I have not finished my statement, if the gentleman will permit. This bill was reported favorably with an authorization for an appropriation of only $1,000; and in addition to this the committee put on an amendment to the bill which requires the Daughters of the American Revolution of Hartwell, Hart County, Ga., to furnish at their expense the stone for the marker. So the gentleman can understand that there will not be but about $500 remaining for the Government to pay. If we are to furnish the stone and take $1,500 less than has been given for all other markers, I think the gentleman ought to withdraw his amendment.

Mr. CRAMTON. I do not charge anything for correcting the grammar. I think the Committee on the Library has been pretty liberal. I have never known them to authorize any other marker for so small and unimportant occurrence as this.

Mr. BULWINKLE. Mr. Speaker, being one of the members of the Committee on the Library I want to say to the gentleman from Michigan that this is a very important event, or was a very important event. This woman did more than any one man in the Revolutionary War.

Mr. CRAMTON. Let me ask the gentleman from Georgia if my amendment will be agreeable to him?

Mr. BRAND of Georgia. I can not consent to the reduction of the amount to $500. I hope the House will give me a few additional minutes to call the attention of the gentleman from Michigan to different historians who have written at length in regard to this woman.

Mr. CRAMTON. Will the gentleman accept the other corrections that I have mentioned?

Mr. BRAND of Georgia. Yes.

Mr. CRAMTON. All right.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

A bill (H. R. 7452) for the erection of a tablet or marker to be placed at some suitable point at Alfords Bridge in the county of Hart, State of Georgia, on the national highway between the States of Georgia and South Carolina, to commemorate the memory of Nancy Hart

Be it enacted, etc., That the Secretary of War is hereby authorized to erect and maintain at some suitable point at Alfords Bridge, which crosses Savannah River in the county of Hart, State of Georgia, on the national highway between the States of Georgia and South Carolina, a tablet or marker to commemorate the memory of Nancy Hart who during the American Revolution when a party of British Tories came to her home, which was located on what was then known as Fish Dam Ford or Broad River, when and where, single-handed and alone, she captured these Tories, killing one, wounding another, the others surrendering, and the living ones thereafter hanged by Nancy Hart and a few of her neighbors.

SEC. 2. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $1,000, or so much thereof as may be necessary, to carry out the provisions of this act.

The following committee amendments were read:

Page 1, line 4, strike out the words "and maintain." Page 2, line 10, after the word "act," insert: "*Provided*, That the stone for such marker or tablet shall be furnished by the Hartwell Chapter, Daughters of the American Revolution, of the town of Hartwell, Hart County, Ga."

The committee amendments were agreed to.

Mr. CRAMTON. Mr. Speaker, I offer the following amendments:

The Clerk read as follows:

Page 1, line 3, strike out the word "erect" and insert the words "furnished for erection."

The amendment was agreed to.

Amendment by Mr. CRAMTON: Page 2, line 13, at the end of the committee amendment, after the word "Georgia," insert a comma and add the following: "And bear all expense of erection of said marker or tablet."

The amendment was agreed to.

Amendment by Mr. CRAMTON: Page 2, line 3, after the word "river," strike out the words "when and where"; page 2, line 4, after the word "alone," strike out the word "she."

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. BRAND of Georgia. Mr. Speaker, under the leave to extend my remarks in the RECORD on the life and character and war activities of Nancy Hart, one of the most remarkable women of the American Revolution, I submit excerpts from the following histories:

GOV. GEORGE R. GILMORE'S HISTORY OF GEORGIA, 1855

In Governor Gilmore's History of Georgia he has this to say, among other things, in regard to Nancy Hart:

"In the contest between the Whigs and Tories, in the Revolutionary War, she proved herself every inch a Whig. Nancy Hart's confident courage stirred into patriotic action many vacillating, British-fearing men of the times. When the Whigs of upper Georgia were flying from the murdering and plundering of the Tories and their superiors she stood her ground, ever disposed and ready to defend herself and hers from her country's foes.

"Nancy Hart was one of the North Carolina emigrants. She was a tall, muscular, red-headed, cross-eyed woman.

"The restless temper and fearless spirit which had urged Nancy Hart to fight for liberty made her the best backwoods woman after the war ended. She traced the bee to its tree and the deer to its lair, among snakes and wild beasts, with unequaled success.

"When civilization began to extend its gentle influence over the frontier people of upper Georgia, Nancy Hart left her accustomed haunts for the West. She settled for a while on the Tombigbee.

"On one occasion she captured three Tories, and after doing so, with these Tories she waded the Broad River, her clothes tucked up under one arm, a musket under the other, and the three Tories ahead, on her way to the camp of the Whigs, to deliver them up to the tender mercies of Col. Elijah Clarke."

THE LIFE AND TIMES OF WILLIAM H. CRAWFORD

By J. E. D. Shipp, A. B., 1909

THE STORY OF NANCY HART

In The Life and Times of William H. Crawford it is stated: "On the north side of Broad River at a point about 12 miles from the present city of Elberton, Ga., was situated the log house in which Benjamin Hart and his wife, Nancy Morgan Hart, lived at the commencement of the Revolution. This house is near a small and romantic stream, known as War Womans Creek, the name given to it by the Indians in honor of Nancy Hart, whom they admired and feared. Benjamin Hart was a brother to the celebrated Col. Thomas Hart, of Kentucky, who was the father of the wife of Henry Clay.

"Nancy Hart, along with six boys and two girls, presents a unique case of patriotic fervor, courage, and independence of character unparalleled in history. Rough, 6 feet tall, spare, big boned, and exceedingly strong, she was high spirited, energetic, and shrewd, and delighted in her prowess and physical strength. The Whigs all loved her—she was hospitable and kind to them. The Liberty Boys called her 'Aunt Nancy.' The Tories feared and hated her unrelentingly.

"When General Clarke moved the women and children away from Broad River settlement to a place of safety in Kentucky most of them were anxious to go, but Nancy refused and remained alone with her children after her Whig neighbors had departed. Her life was in constant danger, but she was resolute, and inspired the Tories with a wholesome dread, and for a long dismal period she stood her ground. Her house was a meeting place for her husband's company. She aided as a spy and kept him informed of the movements of the enemy.

"One day very near her dwelling 'Aunt Nancy' met a Tory. She engaged in conversation with him, and after a while diverted his attention and seized his gun. There was a lively wrestle over the weapon, but her superior strength gained the mastery and she marched him down the river a mile and a half to a fort known as the Old Block House and turned him over as a prisoner of war to its commander.

"All through Georgia and the Carolinas Nancy soon became famous. Her courage and confidence rekindled the smoldering sparks of liberty in hearts that were weary and ready to faint.

"She was possessed of considerable property, and her descendants were well provided for by her.

"In 1787, when the two Virginia preachers, Thomas Humphreys and John Majors, were holding a great camp meeting in Wilkes County, Ga., many of the inhabitants were moved by their teachings to embrace the doctrine of John Wesley. She was among those who fervently espoused the cause and became a staunch adherent of the new faith.

"She made several changes of residence—one to St. Marys, Ga., and other places—and finally, with her family, moved to Kentucky, where her relatives, the Morgans, lived. Hart County is the only one in Georgia named for a woman. Hartwell was named in her honor. The town of Hartford, which in 1810 was the county seat of Pulaski County, was also named in her honor. Many of her descendants reside in Georgia and treasure with pardonable pride her virtues and fondly relate the traditions of her great name."

MEMORIALS OF DIXIE LAND

By Lucien Lamar Knight, M. A., LL. D.

It was during the troublous days of Toryism in upper Georgia that Nancy Hart performed the courageous feat which has since carried her name to the ends of Christendom. There is perhaps no exploit in our annals richer in the thrilling elements of the drama. It was staged in a little cabin of the backwoods. Both Savannah and Augusta had become the strongholds of the British, and all the frontier had commenced to swarm with Tories. Preparatory to waging warfare against these scalawags of the Revolution Gen. Elijah Clarke had transported most of the women and children of the Broad River settlement to a secure asylum beyond the Blue Ridge Mountains. But Nancy Hart had not traveled in the wake of the noted rifleman. There was work for her at home.

The Hart family into which she married, an aristocratic one, gave a wife to the illustrious Henry Clay; while it flowered again in the great Thomas Hart Benton, of Missouri. Her own maiden name was Nancy Morgan, a name which honorably connects her with one of the best families of the Old Dominion. She has left us no mound to bedew with our tears, to bedeck with our garlands; but she has left us an immortal memory.

HISTORICAL COLLECTIONS OF GEORGIA

By the Rev. George White, M. A., 1855

This author says:

"One among the most remarkable women that any country has ever produced resided in Elbert County.

"She was most remarkable for her military feats. She professed high-toned ideas of liberty. Not even the marriage knot could restrain her on that subject.

"The clouds of war gathered and burst with a dreadful explosion in this State. Nancy's spirit rose with the tempest. She declared and proved herself a friend to her country, ready 'to do or die.'

"She was ignorant of letters and the civilities of life, but a zealous lover of liberty and the 'Liberty Boys,' as she called the Whigs. She was awkward in manners, but having a woman's heart for her friends. She was well known to the Tories, who stood in fear of her revenge for any grievance or aggressive act, though they let pass no opportunity of worrying and annoying her when they could do so with impunity.

"On one occasion, when information as to what was transpiring on the Carolina side of the river was anxiously desired by the troops on the Georgia side, no one could be induced to cross the river to obtain it. Nancy promptly offered to discharge the perilous duty. Alone, the dauntless heroine made her way to the Savannah River; but finding no mode of transport across, she procured a few logs and, tying them together with a grapevine, constructed a raft upon which she crossed, obtained the desired intelligence, returned, and communicated it to the Georgia troops.

"Once more when Augusta was in possession of the British, the American troops in Wilkes, then under the command of Col. Elijah Clarke, were very anxious to know something of the intentions of the British. Nancy assumed the garments of a man, pushed on to Augusta, went boldly into the British camp, pretending to be crazy, and by this means was enabled to obtain much useful information, which she hastened to lay before the commander, Colonel Clarke."

GEORGIA—HISTORICAL AND INDUSTRIAL

By O. B. Stevens

One of the most remarkable women that any country has ever produced resided in Elbert County. This was Nancy Hart, whose maiden name was Morgan. Her husband was a brother of Col. Thomas Hart, of Kentucky, who married a Miss Gray, of Orange County, N. C., and who was father-in-law of Henry Clay and maternal uncle of the Hon. Thomas Hart Benton. Nancy Hart removed with her husband to Georgia before the Revolution and settled on Broad River in Elbert County. She was an ardent patriot in whose untutored bosom dwelt the heart of a hero.

On one occasion she defended successfully a small fort against the attack of a band of Tories and savages.

THE STORY OF GEORGIA AND THE GEORGIA PEOPLE

By George Gillman Smith, D. D., 1900

In her old age the governor says she became a shouting Methodist and was recognized by all as a good woman. She married an uncle of Thomas Hart Benton, the famous Senator, and the sterling old statesman was always proud of his connection with her. It is certain she was a woman of integrity, and her family was among the best.

WOMEN OF THE REVOLUTION

(Vol. 11, ch. 43)

By Elizabeth F. Ellett

NANCY HART

At the commencement of the Revolutionary War a large district in the State of Georgia, extending in one direction from Newsons Ponds to Cherokee Corner, near Athens, and in the other from the Savannah

River to Ogeechee River and Shoulder-bone, had been already organized into a county which received the name of Wilkes, in honor of the distinguished English politician. At the commencement of hostilities so great a majority of the people of this county espoused the Whig cause that it received from the Tories the name of the "Hornet's Nest." In a portion of this district, near Dyes and Webbs Ferries, on Broad River, now in Elbert County, was a stream known as "War Womans Creek"—a name derived from the character of an individual who lived near the entrance of the stream into the river.

This person was Nancy Hart, a woman entirely uneducated and ignorant of all the conventional civilities of life, but a zealous lover of liberty and of the "Liberty Boys," as she called the Whigs. She had a husband whom she denominated a "poor stick," because he did not take a decided and active part with the defenders of his country, although she could not conscientiously charge him with the least partiality to the Tories. This vulgar and illiterate, but hospitable and valorous female patriot could boast no share of beauty; a fact she would herself have readily acknowledged, had she ever enjoyed an opportunity of looking in a mirror. She was cross-eyed, with a broad, angular mouth—ungainly in figure, rude in speech, and awkward in manners—but having a woman's heart for her friends, though that of a tigress or a Katrine Montour for the enemies of her country. She was well known to the Tories, who stood somewhat in fear of her vengeance for any grievance or aggressive act, though they let pass no opportunity of teasing and annoying her when they could do so with impunity.

On the occasion of an excursion from the British camp at Augusta a party of loyalists penetrated into the interior, and having savagely massacred Colonel Dooly in bed in his own house, proceeded up the country with the design of perpetrating further atrocities. On their way a detachment of five from the party diverged to the east and crossed Broad River to examine the neighborhood and pay a visit to their old acquaintance Nancy Hart. When they arrived at her cabin they unceremoniously entered it, although receiving from her no welcome but a scowl, and informed her they had come to learn the truth of a story in circulation, that she had secreted a noted rebel from a company of "King's men" who were pursuing him and who, but for her interference, would have caught and hung him. Nancy undauntedly avowed her agency in the fugitive's escape. She had, she said, at first heard the tramp of a horse and then saw a man on horseback approaching her cabin at his utmost speed. As soon as she recognized him to be a Whig flying from pursuit she let down the bars in front of her cabin and motioned him to pass through both doors, front and rear, of her single-roomed house—to take to the swamp, and secure himself as well as he could. This he did without loss of time, and she then put up the bars, entered the cabin, closed the doors, and went about her usual employments. Presently some Tories rode up to the bars, calling vociferously for her. She muffled up her head and face and, opening the door, inquired why they disturbed a sick, lone woman. They said they had traced a man they wanted to catch near to her house and asked if anyone on horseback had passed that way. She answered, "No," but she saw some one on a sorrel horse turn out of the path into the woods, some two or three hundred yards back.

"That must be the fellow," said the tories, and asking her direction as to the way he took, they turned about and went off. "Well fooled," concluded Nancy; "in an opposite course to that of my Whig boy; when, if they had not been so lofty minded—but had looked on the ground inside the bars they would have seen his horse's tracks up to that door as plain as you can see the tracks on this here floor and out t'other door down the path to the swamp."

This bold story did not much please the Tory party, but they would not wreak their revenge upon the woman who so unscrupulously avowed the cheat she had put upon the pursuers of a rebel. They contented themselves with ordering her to prepare them something to eat. She replied that she never fed traitors and King's men if she could help it—the villains having put it out of her power to feed even her own family and friends by stealing and killing all her poultry and pigs, "except that one old gobbler you see in the yard." "Well, and that you shall cook for us," said one who appeared to be a leader of the party; and raising his musket he shot down the turkey, which another of them brought into the house and handed to Mrs. Hart to be cleaned and cooked without delay. She stormed and swore awhile—for Nancy occasionally swore—but seeming at last disposed to make a merit of necessity, began with alacrity the arrangements for cooking, assisted by her daughter, a little girl 10 or 12 years old, and sometimes by one of the party, with whom she seemed in a tolerably good humor, now and then exchanging rude jests with him. The Tories, pleased with her freedom, invited her to partake of the liquor they had brought with them, an invitation which was accepted with jocose thanks.

The spring—of which every settlement has one near by—was just at the edge of the swamp; and a short distance within the swamp was hid among the trees a high snag-topped stump, on which was placed a conch shell. This rude trumpet was used by the family to convey information, by variations in its notes, to Mr. Hart or his neighbors, who might be at work in a field, or "cleaning" just beyond the swamp; to let them know that the "Britishers" or Tories were about—that the master was wanted at the cabin—or that he was to keep close, or "make tracks" for another swamp. Pending the operation of cooking the turkey, Nancy had sent her daughter Sukey to the spring for water, with directions to blow the conch for her father in such a way as should inform him there were Tories in the cabin; and that he was to "keep close" with his three neighbors who were with him, until he should again hear the conch.

The party had become merry over their jug, and sat down to feast upon the slaughtered gobbler. They had cautiously stacked their arms where they were in view and within reach; and Mrs. Hart, assiduous in her attentions upon the table and to her guests, occasionally passed between the men and their muskets. Water was called for; and our heroine having contrived that there should be none in the cabin, Sukey was a second time despatched to the spring, with instructions to blow such a signal on the conch as should call up Mr. Hart and his neighbors immediately. Meanwhile, Nancy had managed, by slipping out one of the pieces of pine which form a "chinking" between the logs of a cabin to open a space through which she was able to pass to the outside two of the five guns. She was detected in the act of putting out the third. The whole party sprang to their feet; when quick as thought Nancy brought the piece she held to her shoulder, declaring she would kill the first man who approached her. All were terror stricken, for Nancy's obliquity of sight caused each to imagine himself her destined victim. At length one of them made a movement to advance upon her, and true to her threat she fired and shot him dead. Seizing another musket, she leveled it instantly, keeping the others at bay. By this time Sukey had returned from the spring; and taking up the remaining gun, she carried it out of the house, saying to her mother, "Daddy and them will soon be here." This information much increased the alarm of the Tories who perceived the importance of recovering their arms immediately; but each one hesitated, in the confident belief that Mrs. Hart had one eye at least on him for a mark. They proposed a general rush. No time was to be lost by the bold woman; she fired again and brought down another of the enemy. Sukey had another musket in readiness, which her mother took, and posting herself in the doorway, called upon the party to surrender, "Their d—— Tory carcasses to a Whig woman." They agreed to surrender, and proposed to "shake hands upon the strength of it." But the victor, unwilling to trust their word, kept them in their places for a few minutes till her husband and his neighbors came up to the door. They were about to shoot down the Tories but Mrs. Hart stopped them, saying they had surrendered to her; and her spirit being up to boiling heat, she swore that "shooting was too good for them." This hint was enough, the dead man was dragged out of the house, and the wounded Tory and the others were bound, taken out beyond the bars, and hung.

ADDITIONAL CIRCUIT JUDGE FOR THE SECOND JUDICIAL CIRCUIT

The next business on the Consent Calendar was the bill (S. 1976) for the appointment of an additional circuit judge for the second judicial circuit.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BLANTON and Mr. SIROVICH objected.

Mr. GRAHAM. Will gentlemen withhold the objection and let me say a word in explanation. This is on a different basis altogether from the appointment of a district judge. This is the appointment of a judge for the circuit court of appeals of that district. Judge Hand, Senior Justice, has written urging that the bill be passed. Judge Hand has written several times earnestly requesting that this be passed, and I do hope the gentlemen will withdraw their objection and let the House consider the bill because it is unusually imperative.

Mr. BLANTON. Will the gentleman mind answering a question?

Mr. GRAHAM. No.

Mr. BLANTON. Does the gentleman think that these judges work five hours a day?

Mr. GRAHAM. Oh, yes; 10, 12, and sometimes 14.

Mr. BLANTON. And sit oftener than three days in the week?

Mr. GRAHAM. Oh, yes; and they work in their chambers. I want to say that the council of judges have earnestly recommended this legislation. The Department of Justice has indorsed it fully and the court itself is asking for it.

Mr. BLANTON. Does the gentleman know of any case where the Department of Justice has turned down a proposition to create a new judge?

Mr. GRAHAM. Oh, yes; a great many.

Mr. BLANTON. They are always in favor of creating new members of the judiciary.

The SPEAKER pro tempore. Objection is heard.

DRY VALLEY ROAD

The next business on the Consent Calendar was the bill (H. R. 12662) to provide for the paving of the Government road, known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, there are certain amendments that I have suggested to the gentleman from Georgia [Mr. TARVER] that are entirely in accord with bills of a similar character that have heretofore been passed by the gentleman. If the gentleman could accept those amendments, requiring local cooperation, I would have no objection.

Mr. TARVER. Mr. Speaker, this is a part of an approach road to Chickamauga National Park, which leads from St. Elmo, in the State of Tennessee, to the park. Congress at the last session passed a bill authorizing an appropriation of $20,000 per mile for about half of the road, lying in the State of Tennessee. That appropriation has been made and is being expended. There is no requirement that there should be any matching of that sum by the local authorities. This is the remainder of the road which is provided for in this bill. The bill carries only $15,000 per mile. There is no more reason for a matching provision here than there was in the bill of the gentleman from Tennessee [Mr. MCREYNOLDS], which provided for the first portion of the road. The Government of the United States is not interested in the matching provision, the War Department is not interested in it. They desire to get rid of the road. Why treat my district differently from the district of the gentleman from Tennessee?

Mr. CRAMTON. The gentleman from Tennessee got his bill through before I realized that it was a road that was going all of the way to the Gulf of Mexico.

Mr. TARVER. The gentleman can not realize that now, because it is only 4 miles farther.

Mr. CRAMTON. I am suggesting the same language as appears in Public Act 356, passed at the last Congress. These roads are used more for local than for Federal purposes, and I think there should be an equal contribution by the local authorities.

Mr. TARVER. The bills to which the gentleman has made reference, passed at the last session of Congress, were bills having to do with two great through highways, portions of the Dixie Highway, where it was hoped that matching might be secured from the State highway commission. This is no such road. It is on the same basis as the road in the district of the gentleman from Tennessee [Mr. MCREYNOLDS], for which we provided an appropriation in excess of this, without any matching provision. Why make fish of one and fowl of another? Why appropriate for part of the road lying in Tennessee without a matching provision and require it in the State of Georgia, especially when it is of no interest to the Government of the United States, which only desires to get rid of the road?

Mr. CRAMTON. Then the gentleman is not willing to accept the amendments?

Mr. TARVER. No.

Mr. CRAMTON. Mr. Speaker, I object.

The SPEAKER pro tempore. It takes three objectors.

Mr. SCHAFER. Mr. Speaker, I object.

Mr. LAGUARDIA. I object.

CAUSES OF POULTRY DISEASES

The next business on the Consent Calendar was the bill (S. 2030) to provide for research into the causes of poultry diseases, for feeding experimentation, and for an educational program to show the best means of preventing disease in poultry.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BLACK of Texas. Mr. Speaker, reserving the right to object, in reading the report on this bill from the Committee on Agriculture, I see in this report that the department states it already has ample authority to do this work, and, moreover, it evidently has already exercised its authority, because I have here a list of farm bulletins which shows that the department is now issuing 22 bulletins on the subject of poultry raising, poultry diseases, and other things dealing with poultry. In view of the fact that the department now has ample authority to do this work, I object.

OFFICIAL BONDS

The next business on the Consent Calendar was the bill (H. R. 13978) to amend section 5 of the act of March 2, 1895, relating to official bonds.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the fourth paragraph of section 5 of the act of March 2, 1895, chapter 177 (28 Stat. 808; U. S. C. title 6, sec. 3), and the proviso added to such section by the act of March 8, 1928, are amended to read as follows:

"Hereafter, any officer whose duty it is to take and approve official bonds may at any time, in his discretion, require the renewal of any such bond, and the new bond, when accepted and approved, shall be in lieu of the prior bond in respect of liability accruing subsequent to the date of approval of the new bond. In the case of official bonds executed by individual sureties, there shall be filed quarterly a certificate, upon a form prescribed for the purpose by the Secretary of the Treasury, as to the sufficiency of such individual sureties. The liability of the principal and sureties on all official bonds shall continue and cover the period of service ensuing until the appointment and qualification of the successor of the principal. The nonperformance of any requirement of this section on the part of any official of the Government shall not be held to affect in any respect the liability of principal or sureties on any bond made or to be made to the United States, and nothing in this section shall be construed to repeal or modify section 3836 of the Revised Statutes of the United States (U. S. C. title 39, sec. 38)."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

INDIAN TRUST ESTATES

The next business on the Consent Calendar was the bill (H. R. 7204) to authorize the creation of Indian trust estates, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection?

There was no objection.

BATHING POOLS IN THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (H. R. 5758) amending the act approved May 4, 1926, providing for the construction and maintenance of bathing pools or beaches in the District of Columbia.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I object.

Mr. SIMMONS. Mr. Speaker, I object.

Mr. BLANTON. Mr. Speaker, I object.

OLEOMARGARINE

The next business on the Consent Calendar was the bill (H. R. 10958) to amend the definition of oleomargarine contained in the act entitled "An act defining butter; also imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine," approved August 2, 1886, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. COCHRAN of Missouri, Mr. ALDRICH, Mr. TAYLOR of Colorado, Mr. LAGUARDIA, Mr. HUDSON, Mr. SPROUL of Illinois, and several other Members objected.

Mr. O'CONNOR of Louisiana. Mr. Speaker——

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. O'CONNOR of Louisiana. For a parliamentary inquiry. Has the Chair announced, in view of the number of objections made to this bill, that it takes it permanently off the calendar?

The SPEAKER pro tempore. No; the Chair simply said that objection is heard.

Mr. O'CONNOR of Louisiana. Is not the method I have suggested in accordance with the rules?

Mr. LAGUARDIA. Three objections takes it off.

Mr. BLANTON. Is there anybody in the House who did not object?

CIVIL AIR FIELD

The next business on the Consent Calendar was the bill (H. R. 8300) to provide for the acquisition, improvement, equipment, management, operation, maintenance, and disposition of a civil air field and any appurtenances, inclusive of repairs, lighting and communication systems and all structures of any kind deemed necessary and useful in connection therewith.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HOLADAY. Mr. Speaker, I object.

Mr. SIMMONS. I object.

DEATH BENEFITS BY FRATERNAL BENEFICIAL ASSOCIATIONS IN THE DISTRICT OF COLUMBIA

The next business on the Consent Calendar was the bill (S. 3844) amending the fraternal beneficial association law for the District of Columbia as to payment of death benefits.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That section 749 of Subchapter XII of the Code of Law for the District of Columbia is hereby amended so as to read as follows:

"SEC. 749. Fraternal beneficial associations defined: A fraternal beneficial association is hereby declared to be a corporation, society, order, or voluntary association, formed or organized and carried on for the sole benefit of its members and their beneficiaries, and not for profit, having a lodge system with ritualistic form of work and representative form of government, making provision for the payment of benefits in case of death. Each such association may make provision for the payment of benefits in case of sickness, temporary or permanent physical disability, either as a result of disease, accident, or old age: *Provided*, That the period in life at which physical disability benefits on account of old age commences shall not be under 70 years, or the age of expectancy from the time of entering, subject to their compliance with its laws. Any such association may create and maintain a reserve, emergency, or benefit fund in accordance with its laws. Any such association having a reserve, emergency, or benefit fund may, in addition to the benefits hereinbefore named, pay withdrawal benefits, not exceeding the contributions of such member, to a member unable or unwilling to continue membership, provided such membership shall continue not less than three successive years. Such association may also, after 10 years of membership, apply its funds and accumulations as its laws provides or the association and members agree. The fund from which the payments of such benefits shall be made and the fund from which the expenses of such association shall be defrayed shall be derived from assessments, dues, and other payments collected from its members or otherwise. The payment of death benefits shall be to the families, heirs, blood relatives, affianced husband, affianced wife, father-in-law, mother-in-law, son-in-law, daughter-in-law, brother-in-law, sister-in-law, stepfather, stepmother, stepchildren, stepbrother, stepsister, children or parents by legal adoption, member's estate, a charitable, benevolent, educational, or eleemosynary institution, or to persons dependent upon the member or upon whom the member is dependent. Such association shall be governed by this subchapter, and shall be exempt from the provisions of insurance laws of the United States relating to the District of Columbia, and no law hereafter passed shall apply to them unless they be expressly designated therein: *Provided, however*, That the fact that any such association has outstanding agreements with its members for the payment of benefits other than those hereinbefore specified, if it is making no new contracts of that character and is retiring those already existing, shall not exclude such association from the operation of this subchapter."

SEC. 2. All acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

The bill was ordered to be read the third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

ACQUISITION OF LAND FOR COAST DEFENSE

The next business on the Consent Calendar was the bill (H. R. 14152) to authorize the acquisition of two tracts of land required in connection with the coast defense of the Atlantic seaboard.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. The report accompanying this bill is clothed with a certain amount of mystery as to the secret nature of the land to be acquired. If this is a matter of strategic tactics it ought to be kept secret. I want to ask the gentleman, the chairman of the Committee on Military Affairs, if that committee has received information and has satisfied themselves as to the character and nature described in the secret?

Mr. JAMES. I have received and shown it to the subcommittee, and that committee has unanimously agreed on the bill. I will be glad to tell any Member of the House to call up the office of any Member of the House who wants to get further information, which I will be glad to give to them.

Mr. LAGUARDIA. I think in a case of this kind all we can possibly do is to take the assurance of the committee in reference to this matter.

Mr. WOOD. Mr. Speaker, further reserving the right to object, what is the purpose of this?

Mr. JAMES. It is to improve the national defense, and we want to get it through in time to submit it to the subcommittee of the Committee on Appropriations having charge of the War Department appropriation bill.

Mr. WOOD. How much land is involved in this?

Mr. JAMES. Not a very large piece—two pieces, in fact—and we desire the bill to pass to-day. It is not a large tract of land.

Mr. WOOD. Has the gentleman any idea what it will cost?

Mr. JAMES. It will not cost $20,000.

The SPEAKER pro tempore. Is there objection to the present consideration? [After a pause.] The Chair hears none.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of War is hereby authorized to acquire, by purchase or otherwise, two tracts of land on the Atlantic seaboard with necessary rights of way as may, in his discretion, be necessary in the proper defense of the Atlantic coast, and the sum of $20,000 is hereby authorized to be appropriated from any funds in the Treasury not otherwise appropriated, which sum shall remain available until expended.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

PAVING GOVERNMENT ROAD, ROSSVILLE, GA., TO CHICKAMAUGA NATIONAL PARK

Mr. TARVER. Mr. Speaker, with the consent of the gentlemen objecting to 993 a while ago, I ask unanimous consent to return to that number.

The SPEAKER pro tempore. Is there objection?

Mr. SCHAFER. Mr. Speaker, I object. I will reserve the objection. What is the purpose of returning?

Mr. TARVER. Because an agreement has been affected in reference to the objections made to the bill.

Mr. CRAMTON. I withdraw my objection to considering the bill in a modified form.

Mr. SCHAFER. I will not object.

The SPEAKER pro tempore. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 12662) to provide for the paving of the Government road, known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park.

Mr. TARVER. Mr. Speaker, I ask unanimous consent that Senate 3881, which is an exact duplicate of the House bill, be considered in lieu of the House bill.

The SPEAKER pro tempore. Without objection, the Senate bill will be considered.

There was no objection.

The Clerk read as follows:

A bill (S. 3881) to provide for the paving of the Government road, known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park

Be it enacted, etc., That the Secretary of War is authorized to improve and pave the Government road, known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, in the length of approximately 4 miles, for which an appropriation of not to exceed $60,000 is hereby authorized out of any money in the Treasury not otherwise appropriated: *Provided*, That should the State of Georgia or any county or municipality or legal subdivision thereof, or any State or county or municipal highway commission, or equivalent public authority desire that the position of said road be in such manner as would involve an expenditure of more than $60,000, the Secretary of War is hereby authorized to expend such sum as may be contributed by said local interests concurrently with the appropriation herein authorized in the improvement and pavement of said road: *Provided further*, That should the State of Georgia or any county or municipality or legal subdivision thereof, or any State or county or municipal highway commission, or equivalent public authority desire that the position of said road be changed in any particular from the

present Government-owned right of way, and should such local interests acquire title to the land necessary to effect such changes, the Secretary of War may expend the funds herein authorized for the improvement and pavement of such road as changed: *And provided further,* That no part of this appropriation shall be expended until the State of Georgia, or the counties or municipalities thereof concerned, have obligated themselves in writing to the satisfaction of the Secretary of War that they will accept title to the present Government-owned road known as the Dry Valley Road and will maintain said road as built under the provisions of the act approved March 3, 1925 (43 Stat. L. 1104), immediately upon the completion of such improvements as may be made under this appropriation.

The SPEAKER pro tempore. Without objection, the Senate bill will be considered, read the third time, and passed, and a motion to reconsider laid on the table.

Mr. CRAMTON. Mr. Speaker, I offer an amendment to the Senate bill which has been agreed upon. On page 1, line 9, strike out "$60,000" and insert "$40,000."

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 1, line 9, strike out "$60,000" and insert "$40,000."

Mr. TARVER. Mr. Speaker, I do not believe the gentleman from Michigan sent his amendment to the Clerk's desk in time. The bill had already been passed; but I will withdraw that point.

Mr. CRAMTON. I think the gentleman ought to.

The amendment was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 2, line 7, strike out "$60,000" and insert "$40,000."

The amendment was agreed to.

The SPEAKER pro tempore. The Clerk will report the committee amendment.

The Clerk read as follows:

Strike out lines 20 and 25, on page 2, and all of page 3, and insert in lieu thereof the following: *"And provided further,* That no part of the appropriation herein authorized shall be expended until the State of Georgia, or the counties or municipalities thereof concerned, have obligated themselves in writing to the satisfaction of the Secretary of War that they will accept title to the present Government-owned road known as the Dry Valley Road and will maintain said road as built under the provisions of the act approved March 3, 1925 (43 Stat. L. 1104), immediately upon the completion of such improvements as may be made under this appropriation.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider the last vote was laid on the table.

The House bill was laid on the table.

Mr. GREEN. Mr. Speaker, I ask unanimous consent to return to Calendar 989.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. SCHAFER. I reserve the right to object.

Mr. LAGUARDIA. I object.

The SPEAKER pro tempore. Objection is heard. The Clerk will report the next bill.

HOSPITAL ANNEX, MARION BRANCH, NATIONAL SOLDIERS' HOME

The next business on the Consent Calendar was the bill (H. R. 14153) to authorize an additional appropriation of $150,000 for construction of a hospital annex at Marion Branch.

The title of the bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FISH. Will the gentleman from Michigan [Mr. JAMES] explain the necessity for this?

Mr. JAMES. The architect said $100,000 would not be enough. One hundred and fifty thousand would be required.

Mr. FISH. What is this hospital?

Mr. JAMES. It is the one at Marion, Ind., the old soldiers' hospital.

Mr. FISH. I want to take this opportunity to say to the gentleman and to the House that I think the House is making a very serious mistake by appropriating large sums of money for Veterans' Bureau hospitals that may not be needed. You have appropriated for four hospitals. I can not see where you will need them. If this has anything to do with a Veterans' Bureau hospital I will object now.

Mr. SIMMONS. We can take care of the men.

Mr. FISH. Ten thousand of these uncompensated veterans who are unable to prove that the war was the origin of their disabilities are in the hospitals at the present time.

Mr. LAGUARDIA. Reserving the right to object, the gentleman from Michigan has several bills of this kind that are placed on the Consent Calendar. We should have some system about this matter and not permit bills to come here without notice.

Mr. JAMES. One hundred thousand dollars was authorized at the last session of Congress. It can not be used. This bill has been pending for several years. Unless it goes through now and a supplemental estimate is sent up to the Committee on Appropriations we shall have to wait another year.

Mr. LAGUARDIA. Is the gentleman going to press his bill for $190,000?

Mr. JAMES. That may not be reached.

Mr. LAGUARDIA. Does the gentleman expect to have another Calendar Wednesday this session?

Mr. CRAMTON. Reserving the right to object, Mr. Chairman—which I do not intend to do—I notice this bill specifies the exact amount to be appropriated. I think it is highly desirable for purposes of economy that the Committee on Appropriations, when an estimate comes before them, shall have some discretion to examine whether the whole amount of money asked for is needed. If the bill were so drawn that authorization were made of "not more than" $150,000, the committee might cut the amount if it seemed to be the best policy.

Mr. JAMES. I think my colleague is absolutely correct. If he will look at the next bill, he will see it has used that language, and as far as I am concerned I am willing to accept an amendment to that effect, and I will recommend to the War Department that all future bills contain that language.

Mr. CRAMTON. So that the appropriating committee may make an examination as to the propriety of appropriating so large an amount as is authorized. I offer an amendment to that effect.

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, who made the original estimate of $100,000?

Mr. JAMES. The gentleman from Indiana [Mr. HALL], the Congressman from that district.

Mr. LAGUARDIA. It was not an estimate based on plans or anything?

Mr. JAMES. No. He introduced a bill, which went to the Committee on Public Buildings and Grounds, and then the bill got to our committee. The Committee on Public Buildings and Grounds held extensive hearings, and then when an investigation was made it was found that $100,000 was too small an amount.

Mr. LAGUARDIA. With all due deference to the gentleman's committee, I say this is not a very good way to report such a bill to the House and have it passed on the Consent Calendar.

Mr. JAMES. It did not come originally out of our committee; it came out of the Committee on Public Buildings and Grounds.

Mr. BARBOUR. Mr. Speaker, reserving the right to object, may I ask the gentleman from Michigan whether his committee has had any definite estimate for this building, based on plans and specifications, so that some definite idea of the cost might be arrived at?

Mr. JAMES. The War Department stated that the Supervising Architect went out there and said it would take $250,000, and General Wood, president of the home, has also told me the same thing, that the Supervising Architect had been out there and said it would take $250,000 to build a 50-bed hospital.

Mr. BARBOUR. I want to say to the gentleman from Michigan that information I have received lately is to the effect that many of the estimates which go to the Committee on Military Affairs are not accompanied by any definite plans or specifications, but that an estimate is arrived at, as it was stated, by the rule of thumb. Then the Committee on Military Affairs authorizes the appropriation of a certain amount of money for a certain piece of construction. That goes to the Bureau of the Budget and all the Bureau of the Budget has to act upon is the amount carried in the bill reported by the Committee on Military Affairs. It has appeared to me that before authorizing these amounts for specific construction the Committee on Military Affairs should have definite plans and specifications before it so that the committee might test the estimates that are submitted to it.

Mr. JAMES. When the War Department asks for any money for public buildings and soldiers' homes the bill goes to the

Director of the Budget before it reaches our committee. I understand that the president of the soldiers' home, General Wood, and one or two members of his board, have been before the Director of the Budget about it and told him the necessity of having this authorization increased from $100,000 to $250,000. That was done before the bill was sent to our committee.

Mr. BARBOUR. My understanding is that in many of these cases estimates are not based on any plans or specifications that have been prepared, but are merely guesswork, a rough estimate, or an estimate, as they say, based on the rule of thumb. I would suggest that it might be an excellent idea for the Committee on Military Affairs, before authorizing or specifying an amount that only fixes the maximum, to go into those estimates and find out just what the construction is going to cost.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. BARBOUR. Yes.

Mr. WAINWRIGHT. Is not that really a subject for the Committee on Appropriations? When it comes to the Committee on Military Affairs we simply have before us the general proposition involving the construction of a building of a certain kind and, as we all know, there is usually a rough estimate given of so much a cubic foot, and then the detailed plans and specifications would more appropriately come before the Committee on Appropriations.

Mr. BARBOUR. The Committee on Appropriations will be very glad to go into that feature of these appropriations, but the amount is fixed by the bills reported by the Committee on Military Affairs. Now, if the Committee on Military Affairs simply brought in a bill authorizing the construction of a certain building then the Committee on Appropriations could go into the estimates and determine the amount, but these bills provide the limit and some of them even go so far as to fix the exact amount that is to be expended.

Mr. WAINWRIGHT. Would not the suggestion made by the gentleman from Michigan [Mr. CRAMTON], that these appropriations should be no more than a certain amount, meet the gentleman's objection.

Mr. BARBOUR. I think that will help very materially.

Mr. HUDSON. Did the original authorization call for $100,000?

Mr. BARBOUR. That is my understanding.

Mr. HUDSON. And now they come in for an additional authorization of $150,000?

Mr. JAMES. The $100,000 estimate did not come from the soldiers' home. It came from the Congressman from that district.

Mr. HUDSON. I do not know whether the gentleman from California will care to answer this or the gentleman from Michigan.

The House passed legislation here for certain construction for military purposes on the assumption it was an authorization of $100,000. We come back at another session and find they have more than doubled that amount. It seems to me that is not a fair proposition to the House.

Mr. CHINDBLOM. If the gentleman will yield, that is not all. As I understand it, the original bill of $100,000 was referred to and reported out by the Committee on Public Buildings and Grounds.

Mr. JAMES. And then referred to our committee, and we took the hearings that had been held before their committee.

Mr. CHINDBLOM. Did the committee act on the bill authorizing $100,000?

Mr. JAMES. We acted on the $100,000 authorization and had the hearings that had been held by the Committee on Public Buildings and Grounds.

Mr. CHINDBLOM. I will say to the gentleman that when I was a member of the Committee on Public Buildings and Grounds that committee had jurisdiction of building matters relating to the Home for Disabled Soldiers of the Civil War at Marion and legislated on them.

Mr. HUDSON. If the gentleman will yield further, I am not inclined to object to this legislation at this time, but it seems to me there ought to be a different procedure on the part of the gentleman's committee in bringing in original authorization bills.

Mr. JAMES. Let me ask the gentleman a question. Suppose the gentleman introduced a bill authorizing $100,000 for Flint, Mich., and came before our committee and said he had investigated the matter personally and that the $100,000 would complete the work. Should we go out and look at it ourselves or should we take the gentleman's word for it?

Mr. HUDSON. I would not want the committee to take my word for it. I think it ought to be investigated and that no one person's word ought to be taken in the matter of an authorization and then come back here for more than double the amount originally authorized.

Mr. LAGUARDIA. Mr. Speaker, in view of the confusion and the misunderstanding with respect to the bill, I ask unanimous consent that it may be passed over without prejudice, so that we may give it some intelligent study in the next two weeks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

ARMY MEDICAL CENTER, WASHINGTON, D. C.

The next business on the Consent Calendar was the bill (H. R. 14154) to authorize appropriations for construction at the Army medical center, District of Columbia, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. I make the same request, Mr. Speaker.

Mr. BLANTON. I object, Mr. Speaker, to the request and to the consideration of the bill.

CONSTRUCTION AT MILITARY POSTS

The next business on the Consent Calendar was the bill (H. R. 14155) to authorize appropriations for construction at military posts, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PICATINNY ARSENAL

The next business on the Consent Calendar was the bill (H. R. 14156) to authorize an appropriation for the construction of a cannon powder-blending unit at Picatinny Arsenal, Dover, N. J.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, are the estimates here anywhere within reason?

Mr. JAMES. We are informed by the War Department that the building can be built for this amount. This replaces a building that was burned down last July.

Mr. LAGUARDIA. This is not the estimate of any one man and is not a guess, but these are figures given after mature study?

Mr. JAMES. Yes; by the Ordnance Department.

Mr. LAGUARDIA. And the committee is not coming in here at the next session and ask for $175,000 more?

Mr. JAMES. The gentleman understands that the estimate of $100,000 was not an estimate of the War Department.

Mr. LAGUARDIA. But these are War Department figures?

Mr. JAMES. Yes; these are War Department figures submitted by the Ordnance Department.

Mr. McSWAIN. Mr. Speaker, if the gentleman will permit, I can not see the point of the criticism that the original estimate was for a sum that proved to be utterly inadequate to accomplish the purpose. If our original estimate had been double the amount of money necessary to accomplish the purpose, we would have been subject to criticism, but inasmuch as we undertook, and it seems that we did, out of a spirit of conservatism and proper business prudence, to underestimate so as to hold down the maximum of expenditure, it seems to me there is no point in the criticism.

Mr. LAGUARDIA. Permit me to reply to the gentleman that it is not conservatism, it is not prudence, to come into the House on consent and say, "Here, pass this bill; all that it will cost is $100,000," and get your bill through, and then come back at the next session and say, "We were so conservative we want $150,000 more." That is not conservatism; that is darn poor business.

Mr. McSWAIN. If the gentleman will yield for another statement, the one or two minutes necessary to decide whether or not the gentleman from New York or some one else will object is not worth the $150,000 we might have saved.

Mr. BLANTON. If the gentleman will yield, here is the point: All of these bills come in here with the approval of the Director of the Budget and with the statement that it is not in contravention of the President's program. If he knew that each one of these sums was going to be doubled, they might not come

with the statement that it is not in conflict with the President's program. Therefore it does cut quite a figure as to whether the estimate is correct or not.

Mr. O'CONNOR of New York. Reserving the right to object, Mr. Speaker, do I understand that this takes the place of a plant which did exist there?

Mr. JAMES. It was burned last July.

Mr. O'CONNOR of New York. Was the subject taken into consideration as to whether or not it is now advisable to continue this plant there or put it somewhere else?

Mr. JAMES. They figure it should go there, because it is the only plant of the kind in the United States.

Mr. O'CONNOR of New York. How long has it been there?

Mr. JAMES. A good many years; I do not know how many.

Mr. O'CONNOR of New York. And from a military standpoint it is considered the proper place for it?

Mr. JAMES. Yes. Will the gentleman from New York yield?

Mr. LAGUARDIA. Yes.

Mr. JAMES. So far as the House Committee on Military Affairs is concerned, we have never come in here with a bill for $100,000 and said that it was enough and then at the next session come back for $150,000 more. This was a bill that was introduced in Congress by a Member and referred in the first instance to another committee.

Mr. ACKERMAN. Mr. Speaker, this matter is one that affects my district, and I think the bill ought to be passed over without prejudice.

Mr. O'CONNOR of New York. I was not going to object. I wanted to know if we ought to still have it there.

Mr. ACKERMAN. I think we ought to investigate this a little more, and I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

MESS HALL, UNITED STATES MILITARY ACADEMY

The next business on the Consent Calendar was the bill (H. R. 14813) to authorize an appropriation for completing the new cadet mess hall, United States Military Academy.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BLANTON. Reserving the right to object, the War Department reports that the bill is made necessary by reason of an underestimate of $136,000 to begin with. They say also there was a clerical error, too, of $161,000 more. That is quite an error for officials of West Point to make on a little building of this kind. It does occur to me that our officials at West Point, who are supposed to teach Army officers to be accurate, ought to be a little more careful in their estimates, and I object.

Mr. MORIN. Mr. Speaker, I ask unanimous consent that the bill go over without prejudice.

The SPEAKER pro tempore. Is there objection?

There was no objection.

AUTHORIZING BOARD OF MANAGERS OF THE NATIONAL HOME FOR DISABLED VOLUNTEER SOLDIERS TO ACCEPT TITLE TO THE STATE CAMP FOR VETERANS AT BATH, N. Y.

The next business on the Consent Calendar was the bill (H. R. 15013) to amend an act entitled "An act to authorize the Board of Managers of the National Homes for Disabled Volunteer Soldiers to accept title to the State camp for veterans at Bath, N. Y., approved May 26, 1928."

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. FISH and Mr. SCHAFER objected.

AMENDING SECTION 279 OF THE JUDICIAL CODE

The next business on the Consent Calendar was the bill (H. R. 14150) to amend section 279 of the Judicial Code.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. O'CONNOR of New York. Reserving the right to object, will the gentleman tell us what this bill does?

Mr. GRAHAM. This bill changes the present law so as to permit the summoning of jurors under the direction of the court by mail. To-day they must be served by a marshal and in one instance where they sent a message by registered mail and got the jury to come in, costing 80 cents, the Comptroller General—and properly—said there was no law to permit them to do it, and he could not pass the 80-cent bill. This changes the law in that respect. The venire summoning the jury remains the same and they may be summoned in the regular way. But when there is inconvenience or where the juror to be served is at a great distance they may be served under the direction of the court by mail.

Mr. CHINDBLOM. Where summons is sent by mail contempt proceedings should not be had unless personal service was actually obtained.

Mr. GRAHAM. Contempt proceedings would be based on actual personal service. This is a department bill carefully considered in our committee and reported out unanimously.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 279 of the Judicial Code (sec. 416, title 28, U. S. C.) be, and it is hereby, amended to read as follows:

"Writs of venire facias, when directed by the court, shall issue from the clerk's office, and shall be served and returned by the marshal or by his deputy; or, in case the marshal or his deputy is not an indifferent person, or is interested in the event of the cause, by such fit person as may be specially appointed for that purpose by the court, who shall administer to him an oath that he will truly and impartially serve and return the writ. Any person named in such writ shall be served by the marshal mailing a copy thereof to such person commanding him or her to attend as a juror at a time and place designated therein, which copy shall be registered and deposited in the post office addressed to such person at his or her usual post-office address. And the receipt of the person so addressed for such registered copy shall be regarded as personal service of such writ upon such person, and no mileage shall be allowed for the service of such person. The postage and registry fee shall be paid by the marshal and allowed him in the settlement of his accounts."

With the following committee amendment:

On page 2, line 4, after the word "writ," strike out the word "shall" and insert the words "by direction of the court may."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

ADDITIONAL JUDGES FOR THE DISTRICT COURT OF THE EASTERN DISTRICT OF NEW YORK

The next business on the Consent Calendar was the bill (H. R. 14659) to provide for the appointment of two additional judges of the District Court of the United States for the Eastern District of New York.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. I object.

UMATILLA RAPIDS IN THE COLUMBIA RIVER

The next business on the Consent Calendar was the bill (H. R. 306) to provide for the protection and development of the Umatilla Rapids in the Columbia River.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. CRAMTON. I object.

Mr. BUTLER. Will the gentleman withhold his objection?

Mr. CRAMTON. Yes.

Mr. BUTLER. Mr. Speaker, this is a bill introduced by my distinguished predecessor, Mr. Sinnott. It is of the greatest importance, not only to my district and my State but to the entire northwestern country. I ask unanimous consent to extend my remarks in the RECORD and also to insert a statement made by Marshal N. Dana, associate editor of the Portland Journal. [Applause.]

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. BUTLER. Mr. Speaker, the bill under consideration (H. R. 306) for the protection and development of the Umatilla Rapids in the Columbia River states its purpose of utilizing the flow of the Columbia River at the Umatilla Rapids by improving navigation, providing for the delivery of water for reclamation of public and private lands, and for the generation of electrical energy as the means of making the project self-supporting and financially solvent.

The bill authorizes the Secretary of the Interior to advance to the fund established by the act such amounts as he may deem necessary to carry out its provisions, not exceeding the sum of $45,000,000, interest at 4 per cent per annum, accruing upon said advancements to be paid annually out of the fund.

The Secretary of the Interior would be authorized to make provisions for revenues by contract, adequate in his judgment to insure payment of expenses of operation incurred by the United States, and the repayment within 50 years from the date of the completion of the project of all amounts advanced under the provisions of the act; and it is provided that such provisions shall be made by contract, for revenues for operation and repayment of advancements before any construction work shall be done or contracted for, and before any money is appropriated,

thus practically insuring the United States against any loss of money on account of any sums so advanced.

The proposed development has a fourfold purpose:

First. Development of navigation.

Second. Reclamation of arid lands.

Third. Bridging the Columbia River and connecting the States of Washington and Oregon.

Fourth. Development of electrical energy.

The Congress has heretofore appropriated funds for a survey and investigation which has been made and reported, under the direction of the Bureau of Reclamation, from which it appears feasible and practicable; and the bill by its terms saves the Government any danger of loss.

The great Columbia River should not continue to wind its burden to the sea without yielding something toward the prosperity and happiness of the people of the territory drained.

President-elect Hoover said in 1926:

The time has come when we must take an enlarged vision of their future. We have arrived at a new era in this development. We have need that we formulate a new and broad national program for the full utilization of our streams, our rivers, and our lakes * * *. Every drop of water that runs to the sea without yielding its full commercial returns to the Nation is an economic loss and that loss in all its economic implications can be computed in billions.

Marshall Dana, associate editor of the Oregon Journal, of Portland, Oreg., during hearings held by the Committee on Irrigation and Reclamation on this bill on January 10, 1928, made the following statement:

Mr. DANA. Mr. Chairman and gentlemen of the committee, the chairman of this committee and a number of its members stood on a morning of last summer at the shore of the Columbia River and looked upon the falls of the Columbia known as the Celilo. They saw there a specimen of the water power of the Columbia River, and are doubtless prepared from their eye vision to believe that the Columbia River represents at Umatilla Rapids a similar location of very great power assets. It is my desire to go directly into what may be considered more practical phases of this project, but it seems to me desirable that the members of this committee should see clearly first of all the central location of the Umatilla Rapids project with respect to the Pacific Northwest States and to understand that a radius of 200 or 250 miles will include the larger communities of Seattle, Tacoma, Portland, Spokane, Walla Walla, Pendleton, and even across the Blue Mountains, and penetrate almost to Klamath Falls and Roseburg that might be served with electric power. I also hope that the view which the committee had of the Columbia must have demonstrated the impossibility of feasible navigation on that river without artificial works in aid of navigation and likewise that the fruits of the orchard and the products of the field that they enjoyed while they were guests of Oregon show that the yield of that region in food products covers a sufficient variety and attractiveness and of value to warrant not only an argument in behalf of the reclamation of land but an argument for the establishment of homes in that vicinity—homes that shall be aided by the factors of which the Umatilla Rapids project represents, I think, a unique group among the development projects of the United States.

Moreover, the construction of the proposed dam presents no silt-deposit problem whatever, as the Columbia is not a silt-bearing stream in any large degree.

You have heard Congressman Sinnott and Mr. Baer make references to the cost of generating power. It is my desire to emphasize particularly the substantial value represented not alone by reclamation but by the power element and by navigation. I would like to call your attention to the fact that the cost of generating power is estimated at 1.2 mills plus eight-tenths of a mill as a necessary margin, reaching a sale price of 2 mills. This is the estimate of the acting chief engineer of the Reclamation Service. It represents, I believe, a new low level for generated power in this country. The sale price of 2 mills would retire in 42 years a capital investment of $45,000,000 in the dam and power plant, maintenance, and operation of that plant at $1 per installed kilowatt—$16,000,000 for reclamation works, plus reclamation maintenance and operation costs in excess of $5 per year per acre. The cost of a navigation lock at one and a quarter million dollars, the relocation of railroads at one and a quarter million dollars plus, and the acquiring of lands adjacent to the river that would be flooded, at a cost of about $220,000, and the bridge over the dam, for which no separate figure is available, and I believe is considered by the engineer as an integral part of the dam.

The sale price of power at Umatilla Rapids represents, at 2 mills per kilowatt-hour, coal at $4 a ton, whereas the cost of coal in our region, bringing it from Utah or Wyoming, is $16 per ton or more. If the reclamation features of this project should be deferred, awaiting demand, and we withdrew from the capital account the $16,000,000 item for that purpose and the interest, it would be possible, on the estimates prepared by the engineers of the Government, to sell power at Umatilla Rapids at a reduction of half a mill or more, or at 1½ mills per kilowatt-hour at the bus bar, and that would represent coal at $3 a ton.

The sale price of power at Boulder Canyon, as I understand, is estimated at 3 mills per kilowatt-hour. That is 1 mill more than the sale price estimated at Umatilla Rapids. That difference of 1 mill on the basis of the total output of 2,720,000,000 kilowatt-hours would represent per year a value of $2,720,000, or more than 2 per cent of the investment estimated for Boulder Canyon of $125,000,000, and more than 5 per cent of the estimates of the dam and power works at Umatilla Rapids.

I do not make a comparison between the cost of the two projects in order to derogate the Boulder Canyon project, because it represents a very low cost, and I merely desire to emphasize the exceedingly low cost estimate of the Umatilla Rapids project. Now, if we say that there will be 300,000 kilowatts for sale per year as a commercial surplus at Umatilla Rapids, the question of a market is of high importance in order to establish for this project a businesslike character. Estimates gathered for the Umatilla Rapids Association by the city engineer of Portland, based upon a report received by him direct from the utilities and communities affected, indicates an increased consumption of 63 per cent in electric energy in the Pacific Northwest by 1932. That increase of 63 per cent would represent an increased consumption of approximately 1,000,000,000 kilowatt-hours.

Now, when we speak in these large units of power production and consumption, it seems to me necessary in reference to the market to make the statement that this project would not be developed in a way that would flood the market with a great wave of power for which there would be no immediate demand. I find by consulting the specimen plan of organization which is opposite page 72, and indicated on column 7 of the statement in the brief, that we would be prepared to offer a commercial surplus of 595,000,000 kilowatt-hours only in 1936, or that we would be prepared to offer only 235,000,000 kilowatt-hours in 1935; that we would go from that to a total commercial surplus for sale of 1,083,000,000 kilowatt-hours not until 1938, and not to the total of 2,628,000,000 kilowatt-hours until 1943. That would be based upon the sale of 300,000 kilowatts per annum on 100 per cent load factor, and at that time, when the project was brought to its completion, it would represent a gross annual income of $5,256,000, and in 1977, when it is estimated that on the basis of the 2-mill selling price the plant would be paid for, the chart will show that the surplus or working balance would be $7,923,600.

Gentlemen of the committee, it seems to me that these figures, unless successfully challenged—these figures which are the estimates of the engineers of the Government—go far to show that this from the power standpoint is a desirable and a businesslike proposal.

The superintendent of the Seattle light and power department has estimated, based upon the latest available figures of 1924, that the electrical consumption of Oregon, Washington, and Idaho was 789,300 horsepower, and that by 1929, based upon the increase of the preceding five years there would be additional need for 1,180,000 horsepower.

Mr. DOUGLAS. In how many years?

Mr. DANA. In 1929. In making this statement the superintendent of the Seattle light and power department stated that he had no confidence that that increased capacity would have been provided; that the need would exist without the facilities to serve it.

Mr. ALLGOOD. You say in 1929?

Mr. DANA. Yes; 1929.

Mr. SWING. That was a prediction made in 1924.

Mr. DANA. A prediction made in 1925.

Mr. SWING. What has happened up to date?

Mr. DANA. There has been an expansion of facilities, both of private utilities and of municipalities which have gone into the business of generating and distributing power. What the total increase is I am not in a position to state.

I have submitted the statement of the city engineer of Portland, based upon the direct information from municipalities and utilities, and of the superintendent of the light and power department of Seattle, to indicate that there is a substantial market existing in the Pacific Northwest. I might say, to indicate that ours is a populated country in which enterprises are active and needs are large, that the commerce of the ports of the Pacific Northwest aggregate a billion and a half dollars a year; that the yield of the farms of the three States—Oregon, Washington, and Idaho—probably is in the neighborhood of a billion dollars a year; that the movement of staple tonnage, foods, and other products runs into the hundreds of thousands of tons; and already, partly explained by effective promotion and partly explained by the remoteness of other sources of light and energy, the per capita consumption of electric current in the Pacific Northwest is greater, I believe, than in any other corresponding area of the United States at this time.

Mr. ALLGOOD. Might I ask there, the power companies have their own distribution lines, have they not?

Mr. DANA. Yes; I might say that the Pacific Power & Light Co. has a 60,000-volt high-transmission line which crosses the Columbia River right over the Umatilla Rapids and serves power which is generated by the Oregon-Washington Water Power Co. at Spokane, 200 miles away, to the city of Pendleton, 40 miles from the site of Umatilla Rapids. It is a great deal like carrying coal to New Castle in that case.

The question might be asked as to the cost of transmitting the power within the radius indicated as feasible. We have an estimate that was prepared for us by the superintendent of the light and power department of Seattle. It is indicated on page 96 of the brief. His minimum estimate of the cost of that transmission line to Seattle is $3,000,000. And, by the way, the distance to Seattle or Tacoma or Portland or Spokane with a transmission line would be almost the same in each instance.

Mr. ALLGOOD. Now, these private companies, have they charters now that serve those municipalities?

Mr. DANA. In many instances; yes. For instance, the city of Portland is my home, and it is entirely served by private utilities, and their attitude toward this project I will be prepared to discuss in just a moment.

I was stating that the minimum cost of the transmission line is estimated by the superintendent of the Seattle light and power department at $3,000,000, the maximum estimate is $6,650,000.

Mr. DOUGLAS. What distance is that?

Mr. DANA. About 200 miles.

Mr. DOUGLAS. The minimum cost for a transmission line 200 miles long?

Mr. DANA. Yes, sir.

Mr. DOUGLAS. Is $3,000,000?

Mr. DANA. That is the minimum. The maximum is $6,650,000.

Mr. DOUGLAS. Isn't that tying in with other lines along the way?

Mr. DANA. Nothing is said about tying in with other lines.

Mr. DOUGLAS. No high-transmission line can be constructed 250 miles for $3,000,000.

Mr. DANA. I did not say 250 miles; I said 200 miles.

Mr. DOUGLAS. Well, even 200.

Mr. DANA. I am not enough of an engineer, Mr. Douglas, to quarrel with the engineer who prepared this estimate. I am giving it as his estimate. It would have no validity if I gave it as of my own origination.

Mr. SWING. He estimates from three to six million dollars.

Mr. BAER. His figures are based on $6,680,000.

Mr. DANA. Yes. He gives as a minimum $3,000,000, and he gives a maximum of $6,650,000, and states that the latter estimate plus 6 per cent interest and amortization at 3⅓ per cent would make 9⅓ per cent of fixed cost, plus maintenance and operation would represent a total of 11 per cent, or a sum of $731,500 per year. This would represent a transmission cost of 0.4 of a mill plus. Power delivered in Seattle would cost 2.413 mills per kilowatt-hour.

Mr. SINNOTT. How does that compare with what they are paying now in Portland?

Mr. DANA. The price of power in Portland? It is materially higher than the price of power in Tacoma. I have here a record of the prices charged for minimum or average residence consumption in both cities, and the first is Portland; 13 kilowatt-hours costs $1, the next 7 at 7 cents, or 49 cents, the next 50 at 3 cents, and the rest at 2 cents.

Mr. DOUGLAS. That does not apply at the low side, the low-tension side of the receiving station?

Mr. DANA. No.

Mr. DOUGLAS. The figure you have just quoted on Umatilla Rapids power applies to the low side of the receiving station without the additional cost of distributing to the actual ultimate consumer?

Mr. DANA. Yes.

Mr. DOUGLAS. And may I just say this, that on the face of it, this power under the terms of this bill, if the estimates are correct, seems to be economical, but I just wanted to clear up in my own mind this cost of transmission.

Mr. DANA. I did not intend to drop this estimate until I had gone a little further with it.

Mr. DOUGLAS. I beg your pardon then.

Mr. DANA. The estimate on the basis of 2.413 mills per kilowatt-hour was $12.68 per kilowatt-year. Add 10 per cent for profit would represent 2.65 mills. Add all local costs of distribution, profit, etc., and the service cost to the average consumer in Seattle was estimated at 7.5 mills. The Seattle rates to the minimum average consumer at the present time are 5½ cents for the first 40 kilowatt-hours, 2 cents for the next 200 hours, and 1 cent for all over 240 kilowatt-hours. In other words, the price to the consumer, indicated on the basis of this transmission cost, would be less than the least price now charged on the basis of the rates for residence consumption in the city of Seattle.

The rates in Portland on the smaller blocks of residence consumption are considerably higher than those in Seattle and very much higher than those in Tacoma, which are the lowest in the United States.

Mr. SINNOTT. Why are they so?

Mr. DANA. Because in Tacoma the municipal power plant makes a very low price, based upon a theory of service, not of profit.

Mr. SINNOTT. Have they a municipal plant in Seattle?

Mr. DANA. They have a municipal plant in Seattle, and the same theory obtains there.

Now, the question might be asked as to the attitude of the power companies in this situation. I have interviewed the president of the Portland Electric Power Co., the head of the largest electric utility in our region. He has the knowledge that I would expect to repeat what he said to me, and that was that his company would be willing to buy power from the Government if the Umatilla Rapids project were authorized, and to include consideration of this resource in their plans for the future.

Mr. SWING. Did he say at what rate he would be willing to purchase?

Mr. DANA. No, sir; he said he would want to get on a bargaining basis.

Mr. HILL. How do they generate their power there now?

Mr. DANA. The power is generated largely on the Clackamas River and they have supplemental steam plants.

Mr. WHITE. It was pointed out here the other day by a lawyer from New York, Mr. Cohen, that under this plan embodied in the Swing bill for Boulder Dam, that when the power left the place of manufacture, if it was leased to one distributor, there would be no control over the price that was charged to the consumer.

Mr. DANA. I asked that question this morning and was told that this being an interstate distribution it would be subject to interstate Federal regulation.

Mr. WHITE. Well, that might obviate that point.

Mr. DANA. I might say, Mr. Chairman, that there has been no proposal at any time to develop the power feature of the Umatilla Rapids project in conflict with the private utilities that serve this region; that it has never been proposed to do other than install the dam and the power plant and sell the current generated at the switchboard at a price which would not represent a profit particularly, but would be sufficient to retire the indebtedness incurred. There is no conflict between the Umatilla Rapids Association and the power utilities so far as I have knowledge. I can predict, with a measurable degree of certainty, that if this project is authorized, a conference of the utilities of this Pacific Northwest region will follow very promptly to consider what terms might be made for the purchase of the power.

Our concept of the power phase of the Umatilla Rapids project is that it would create a pool of power that would flow into the interconnected systems of the Pacific Northwest and augment the available supply for all communities, industries, and interests that are within the zone of that development.

Mr. ALLGOOD. Have you a State compact for its development?

Mr. DANA. Between Oregon and Washington?

Mr. ALLGOOD. Yes.

Mr. DANA. No.

Mr. WHITE. Referring back to the suggestion I made a while ago, I hardly believe that the suggestion you made would be applicable to the suggestion I made, because there would have to be a measuring point where the electricity is delivered, and wherever that would have to be it would not be an interstate matter at all, it would be generated at a point in one or the other of the States. And of course I think this, that unless there was an assurance that the Government was aiding in this project so that it would help the ultimate consumer instead of the intermediate agency that delivered it, it would present a very serious objection.

Mr. DANA. I am glad that you mentioned that last matter, because the benefit of the ultimate consumer is the objective of the Umatilla Rapids Association and the genesis of this project; and were it not with the belief that we could serve the ultimate consumer with cheap power for all purposes and navigation and add reclamation, we should not be presenting or pressing this measure here at this time.

Mr. MORROW. Just there, wouldn't that reach the same point again that is raised by the gentleman from Colorado, that if it is disposed of at the switchboard without restriction on the part of the Government, wouldn't the consumer have to pay practically what he is paying now?

Mr. DANA. We did not anticipate, Mr. Morrow, that it would be available without restriction or regulation.

Mr. WHITE. The point was made—I am not saying this is my belief; I am just asking for information—the point was made that when the electricity passes from the manufacturing point, then there is no control over it; the Federal Government can not control it, nor can it place limitations on water sold for private use.

Mr. HILL. It can control it through contract, but not by regulation.

Mr. WHITE. But that contract, according to Mr. COHEN, must be embodied in the bill itself.

Mr. SINNOTT. We have a public utility commission in my State that could be made to control.

Mr. WHITE. But the public utilities commission, I think, Congressman, would have power only based upon the returns—that is, the reasonable returns on the investment.

Mr. SWING. Based upon capitalization.

Mr. WHITE. Based on capitalization and reasonable return.

Mr. ARENTZ. You spoke of interstate commerce. Where did you get that information?

Mr. DANA. From Senator MCNARY.

Mr. ARENTZ. Well, according to an article in the Saturday Evening Post of last year, it spoke about superpower in the New England States, and mentioned the fact that without State compacts regulation from the viewpoint of interstate commerce would not be effective, because the power company handling power in Pennsylvania, receiving it from New York, could buy it at a fixed price regardless of whether it paid an exorbitant price or favorable price, and then it could sell it to the consumer over the line in Pennsylvania without any regulatory arrangement whatsoever on an interstate-commerce commodity.

Mr. WHITE. You are right in that.

Mr. ARENTZ. So the interstate power as yet, according to this statement, does not enter the realm of interstate commerce. Now, I may be entirely wrong in my premise, but that was the argument.

Mr. DANA. It seems to me, Mr. Chairman, that the statements by the gentlemen from Colorado and Nevada indicate a necessity to provide a regulation if the same does not exist to-day rather than to suggest a weakness in the argument for this particular project.

Mr. WHITE. We are not making any objection at all along that line. We are talking for the benefit of our people.

Mr. LANKFORD. Mr. WHITE, didn't Mr. COHEN'S argument the other day go to the extent that neither the Federal regulatory power nor a State regulatory power could control this commodity after it was sold?

Mr. WHITE. Absolutely.

Mr. LANKFORD. And it must be regulated by contract before it passes on, otherwise they could recapitalize their investment, recapitalize their contract, their good will, and make a general advance in electricity and electric power, and could base their charges upon that recapitalization.

Mr. ARENTZ. You have a peculiar situation in the Northwest. You have the cities of Tacoma and Seattle selling power at the lowest rate found anywhere in the United States by the municipalities.

Mr. LANKFORD. I realize that.

Mr. ARENTZ. And you would have a set-up there which could easily be compared with any price at which electricity was sold by a private corporation, and the industrial commission, or whatever you wish to call it—regulatory commission—could easily see whether it was a fair or unfair price.

Mr. MORROW. You mean where the cities own their own plants?

Mr. ARENTZ. Yes.

Mr. SINNOTT. We could easily amend the bill to provide for it in the contract.

Mr. LANKFORD. I think that in the South and East, away from that great amount of power, they might provide the contract feature more so than in the Northwestern States.

Mr. DANA. I suppose it should be stated, Mr. Chairman, that the Oregon Public Service Commission, the Washington Department of Public Works, and the California Railroad Commission prescribe the maximum rate at which power can be sold and issue the tariffs governing the prices and terms for the sale of power. State regulation, in other words, exists to-day.

Mr. SINNOTT. The term of contract under the bill is limited to 50 years, too.

Mr. WINTER. The point is made, however, that State regulation, under the decisions of the United States Supreme Court, could not effectually protect the ultimate consumer, for the simple reason that they would be entitled to a certain return on their investment as they are able to establish it.

Mr. LANKFORD. Not on the investment, but any enhancement of value that may come about in addition to the investment.

Mr. WINTER. In other words, they are permitted under the Constitution, we will say, to have a return of 7 or 8 per cent on their investment, and the investment might be enhanced and pyramided unless some regulation prevented it.

Mr. SINNOTT. We can provide by statute for what shall be considered the capital account of the transmission lines, good will, and all that, and reach it in that way.

Mr. WHITE. We could get the argument from the record of the hearings last Saturday before this committee on the Boulder Dam proposition, simply as a matter of assistance to enable us to get a correct view of this. Mr. COHEN'S argument was a very profound argument, I thought.

Mr. DANA. I would like to ask, Mr. Chairman, if there is any phase of the matter affecting regulation that I could amplify or clarify at this moment? It is a consideration that has not matured in my mind.

Mr. WHITE. Well, I understand what your position is, and Mr. ARENTZ also called attention to the fact that you have a municipal plant that might keep the price to the consumer down. But I recognize that what you want is a cheap power to the consumer, and that is the way I feel about it. I know that is what I would like to have if I am going to favor a bill along these lines. I would want it so that the real benefit that is given by our action might inure to the ultimate consumer instead of to the middle people—while I do not want to put the middle people out of business; we want to be fair all around.

Mr. LANKFORD. And in time put them out of business so far as they are unnecessary.

Mr. DANA. Mr. Chairman, the navigation of the Columbia River has been one of the most romantic and historic features in all the experience of the Pacific Northwest. The dream of an open river from Lewiston to the sea antedates any man here present. It has engaged the ambition, it has involved the dreams of the pioneer citizens and builders of the Pacific Northwest for generations. The navigation feature of the Umatilla Rapids project is one of the utmost importance. On November 5, 1896, there was completed the Cascade Locks Canal. On May 5, 1915, there was completed the Celilo Canal. That has had the effect of opening transportation by river boat to a point immediately below the Umatilla Rapids. The construction of the Umatilla Rapids Dam at a height of 57 feet would complete the canalization of the Columbia River to the confluence of the Columbia with the Snake. The Columbia from Pasco and Kennewick at the mouth of the Snake, to Priest Rapids is navigable.

Mr. WHITE. What distance would that be navigable?

Mr. DANA. The distance thus canalized to the mouth of the Snake River from the mouth of the Columbia would be 330 miles. It would add a navigable mileage directly of some 40 miles. To say that that represents, say, 10 per cent of the total distance and hence is immaterial overlooks one feature which I might parallel by saying that if a railroad started to tunnel under a mountain and stopped only 200 feet from the farther exit the tunnel would be of very little use to the railroad, and that is precisely the condition on the Columbia River. The canalization of the Columbia River or the improvement of the navigability of the Columbia River has proceeded so spasmodically, so irregularly, that a real development of water transportation on the Columbia has been impossible, and yet every improvement to navigation, Celilo Canal, Cascade Locks, the blowing out of rocks in the channel, has had its reflection in lowered costs of rail transportation along the shores of the Columbia, so that every dollar that the Government has spent has been represented by at least $2 in savings to the people who do business in that region.

The canalization of the Columbia River to the mouth of the Snake would represent an opportunity in the event of the authorization of the Columbia Basin project of barging the products of that district down the Columbia to ship-side in the ports of the Columbia, Portland or Vancouver, Longview or Astoria, and represent a very material economy in the movement of freight.

I have been told by the traffic manager of a railroad that bulk commodities, in which time is not the essence, can be moved by water more cheaply, and that, indeed, rail transportation can not compete with water transportation in that class of commodity movement, and it would be a material aid in increasing the feasibility of the Columbia Basin project if this canalization feature were incorporated, due to the construction of the dam at Umatilla Rapids.

I have here a group of indorsements which represent the body of favorable public opinion which exists in the Pacific Northwest for this project, either in its direct contribution to the balancing of our development in the Pacific Northwest, and on the Pacific coast as a whole, or in working the Pacific Northwest in with the mosaic of greater national interest.

I have a letter here from the Hon. George L. Baker, mayor of Portland, in which he says:

PORTLAND, OREG., *December 29, 1927.*

Mr. MARSHALL N. DANA,
The Journal, Portland, Oreg.

DEAR MR. DANA: I am glad you are to appear before the Committees on Irrigation and Reclamation of the House and Senate in behalf of the Umatilla Rapids project as I believe you will be able to present this important matter in a manner that will demonstrate that the people of this part of the country are vitally interested.

This is a new and undeveloped country and one which is adequately provided with resources which to date have been practically untouched. Vast development opportunities await the touch of capital and energy. Such capital at the present time seems beyond reach from private sources as it has always been at the inception of a vast new undertaking and it must have the backing therefore of the people of the country as represented by their Federal Government. The region lacks some of the common forms of energy, but is bounteously supplied with water power which needs only the mechanical harness to convert it into electric energy, easily transferable to the districts where resources may then be put to practical use in the upbuilding of the district.

The people here feel keenly the need of this development and are united behind a movement to obtain the leadership and support of the Government. By this means alone do they see any possibility of the country utilizing resources of almost unlimited extent and the upbuilding of a vast fertile and productive region which should and will become a great asset to the Nation. Private interests can go only so far, and subsidy from the people as a whole is necessary if we are to go beyond that point.

My only purpose in writing this is to give substantiation to you of the interest felt in this part of the country in this subject.

Wishing you well in your mission, I am

Very truly yours,

GEO. L. BAKER, *Mayor.*

And from the Portland Chamber of Commerce, the record of an official action which reads:

PORTLAND CHAMBER OF COMMERCE,
Portland, Oreg., January 3, 1928.

To the IRRIGATION AND RECLAMATION COMMITTEES
OF THE SENATE AND HOUSE,
Washington, D. C.

GENTLEMEN: We ask your consideration of the proposal to be submitted by the Umatilla Rapids Association for Federal aid to the Umatilla Rapids project for the following reasons:

1. The plan provides for building a dam in the Columbia at or near Umatilla Rapids, thus providing for irrigation, navigation, and power development, and is properly conditioned on a sufficient market for the power being obtained in advance of construction.

Development of America's latent hydroenergy is accepted as one of the most important phases of the great industrial-expansion plan for the Nation's future. This type of power saves fuel consumption, and if sufficient power can be sold at the outset to use the major portion of the potential output promises the cheapest kind of energy that may be made available. The power aspect of the water-resources program suggested from national administration quarters is accepted by us as one of the most important features proposed. Where this type of a development may be undertaken in close relationship with improved transportation and irrigation on an economic basis it is important that the same be fostered.

2. It is believed that this power development will make it possible to pump water from the Columbia to approximately 100,000 acres of irrigable land. Irrigation of the lower lands along the Columbia by pumping water from the stream through use of the river's own power has been done for years on a very small scale; and we believe the time has come when this great potential of agricultural production should be proven by a major development, such as that proposed at Umatilla Rapids, where conditions are very favorable for such work. Here there are considerable areas of good lands, situated at low levels offering heavy crop yields, and with transportation under most favorable conditions.

3. This improvement would improve navigation for a considerable distance in the Columbia. Navigation of inland streams is an essential step in the industrial, agricultural, and commercial development of this country, and the time has come when the Columbia, the greatest river on the western slope of the continent, should be given a strong, forward impetus in the direction of safe, economical navigation in order to bring to the whole of the inland empire of the Pacific Northwest the cheapest and most effective form of transportation.

We therefore commend the Umatilla Rapids project to your careful and sympathetic consideration in order that its economic feasibility may be fairly determined, recognizing that in any act submitted for adoption by Congress the interest of the Government and the taxpayers of the country should be amply protected through the Federal Power Commission set up by the Congress to regulate and control work of this nature.

Very truly yours,

FRANK L. SHULL, *President.*

And I have here many letters of a similar nature. A letter of indorsement from the Spokane Chamber of Commerce, signed by J. A. Ford, managing secretary, representing the action of their board; the Yakima Chamber of Commerce, signed by F. O. Hagie, their secretary; the Walla Walla Chamber of Commerce, Walla Walla, Wash., signed by F. M. Lowden, jr., its president; the Ontario Commercial Club, signed by H. C. Boyer, its president; by the Lebanon Chamber of Commerce, signed by Forest V. Rycroft, its president; by the Hillsboro Chamber of Commerce, signed by Ed. L. Moore, secretary; by the Salem Chamber of Commerce, signed by U. S. Page, its president; by the Forest Grove (Oreg.) Chamber of Commerce, signed by C. A. Brodersen, secretary; the Astoria Chamber of Commerce, signed by Leo R. Merrick, secretary; the Dalles-Wasco County Chamber of Commerce, signed by W. S. Nelson, executive manager; Seaside Chamber of Commerce, signed by Thomas A. McKay, president; the Myrtle Creek Chamber of Commerce, Myrtle Creek, Oreg., signed by the secretary, J. R. Bruce; the Canby (Oreg.) Chamber of Commerce, signed by A. S. Markee, secretary; and the Lewiston (Idaho) Commercial Club, signed by O. M. Mackey, its president. And one of the statements made by Mr. Mackey in his letter of indorsement of the Umatilla Rapids project is:

"Lewiston and the inland empire are deeply interested in navigation of our waterways and as this damming and locking of the river for the Umatilla project at Umatilla Rapids creates dead water from the rapids to the mouth of Snake River, a distance of about 34 miles, it is one more step toward canalizing the Columbia and Snake River for the movement of the agricultural, mineral, and timber products from our district to the Pacific coast which we all know will be a relief to our people by having water freight rates for our products.

"The people of the Northwest are deeply interested in power and land development. This power development should give to the settlers of the land irrigated by this project a low rate of power lighting and heating that will be an economic saving to the colonizing of the land.

"Idaho with its vast resources and only half a million people needs encouragement by development of the Northwest so that her natural resources will be developed from the reflection of other great projects that should come to the Northwest.

"Again I repeat the Umatilla Rapids project has the indorsement of the governing board of this club."

I might say in general and in conclusion, Mr. Chairman, that the area we are talking about here is roughly measured by some 500 to 600 miles. It is the old Oregon territory. It has fertility, it has beauty; it has not coal; it has not oil; it has water power in a greater amount potentially than can be found in any other similar area in the United States. Indeed, the estimate shows that the Columbia Basin with its tributaries represents half the potential hydroelectric horsepower that can be developed by all of the other stream systems of the United States combined. We have excellent ports. We produce west of the Rocky Mountains about two-fifths of the wheat and about two-thirds of the wool, and just to indicate that our lack of energy in the Pacific Northwest handicaps the expansion of manufactures, we produce two-thirds of the wool, yet we manufacture but 1 per cent of it.

We carry cargoes of silk through the port of Seattle valued at millions of dollars, and they are hurried by the fastest freights known across the continent for manufacture in the East.

The conditions for balanced development, for industrial expansion, for that contribution to the welfare and the happiness of living that makes for prosperity and makes for the production of the highest type of men and women can only be created by the utilization of the resources with which we offer the equivalent of coal and of oil. In other words, Mr. Chairman, if we are to mine coal in the Pacific Northwest we must do it at the water fall, and if we are going to drill for oil in that region we must drill in the cascades of the streams. That is our opportunity. That is our necessity. We need cheap power and that power exists. It is there. It is actual. The project is economic. The sites belong to the Government. The Government is the major owner of property in the Northwest, as it is in the 11 Western States. We desire that the ownership of the great power sites shall be inalienable in the Government. We desire that it shall be used and for public benefit. We feel, Mr. Chairman, that we have a right to ask the Government for the authorization of this bill and for this step forward in the utilization of a great natural resource that is essential to our well-being. And I may say, too, that we feel that it is the duty of the Government to grant this request. If we had under Government ownership in the Pacific Northwest great seams of coal or great reservoirs of oil, it would be considered a perfectly normal thing that steps should be taken toward making that energy available to us. It seems to me that this infinitely preferable form of energy and illumination, and, in some instances, of heat, should be made equally available to us and be considered fully as a normal undertaking.

That, Mr. Chairman, completes the presentation that I had planned for this time, and I thank you very much for the opportunity of doing so.

Mr. CRAMTON. Mr. Speaker, I recognize the importance of the project involving some $45,000,000. Because it is so important I feel that I must object to its consideration at this time when there is no opportunity for debate.

OFFICIAL PAPERS OF THE TERRITORIES

The next business on the Consent Calendar was the bill (S. 1168) to amend an act entitled "An act to authorize the collection and editing of official papers of the Territories of the United States now in the national archives," approved March 3, 1925.

The Clerk read the title of the bill.

Mr. BEERS. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection?

Mr. CRAMTON. Mr. Speaker, reserving the right to object, I wish the committee would check up a little bit on its report on this bill. The report says that these copies are for distribution by the Department of State, whereas the bill provides that only 50 out of 1,950 are to be distributed by the Department of State.

Mr. BEERS. That is a Senate report that the gentleman is reading from.

Mr. CRAMTON. I am reading the House report that came to me accompanying the Senate bill, and I hope before we meet again that the House committee will make a report upon it that is in accordance with the facts.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMPACTS BETWEEN NEW MEXICO AND COLORADO

Mr. MORROW. Mr. Speaker, I ask unanimous consent to return to Calendar No. 891, H. R. 6498, granting the consent of Congress to compacts or agreements between the States of New Mexico and Colorado with respect to the division and apportionment of the waters of the Rio Grande, San Juan, and Las Animas Rivers and all other streams in which such States are jointly interested, for the purpose of moving that the bill do lie on the table because by agreement with the gentleman from Colorado [Mr. TAYLOR] an identical bill was passed.

The SPEAKER pro tempore. Without objection, the bill (H. R. 6498) referred to by the gentleman from New Mexico will lie on the table.

There was no objection.

Mr. MORROW. Mr. Speaker. I ask unanimous consent to extend my remarks in RECORD upon the compact bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. MORROW. Mr. Speaker, it is with some degree of satisfaction that I note the passage of this legislation at this session of Congress. I am referring to the compact bill (H. R. 6498), which is the bill I have moved to lay on the table indefinitely, as it is identical with M. R. 7024 introduced by the gentleman from Colorado [Mr. TAYLOR], and which bill has passed and meets the conditions in my State. I also refer to H. R. 6496, 6497, and 6499.

These bills virtually protect, if the compacts are entered into, the entire waters—except the Colorado—of my State, New Mexico. The rivers of interest to my State, as well as to the States of Colorado, Oklahoma, and Texas, are the Cimarron, the Red or Canadian, Pecos, and the Rio Grande.

I am a firm believer that compacts between all intermountain States that have interstate streams and where the arid land is found which will require water for future development, will protect the water that falls and flows within each particular State of the arid region of our country.

Nature intended that these streams should be harnessed and the waters impounded for the purpose of reclamation and utility. The time is approaching and it will not be longer than a quarter of a century when much of this land of the Western States will be required to be utilized for the production of food; this means that our waters must be protected and impounded.

The history of irrigation in the West has been a history of litigation. An example of this is the Arkansas River, the waters of which flow through the States of Colorado and western Kansas; this stream has been a subject of litigation for a period of more than 25 years, and it is still in litigation in the courts. Litigation has occurred on other streams of the western country.

These streams are nearly all interstate streams. This fact brings the matter within the purview of Congress to pass upon legislation approving the compacts, when they have been ratified by the legislatures of the States involved.

When this is accomplished, each State of the arid West, where compacts have been entered into, will know what volume of water it has for future use and development.

It has been my purpose during the six years I have been in Congress to strive for the passage of this legislation. It is therefore with a great deal of satisfaction that all the bills introduced by me have been passed by this body, and they will now go to the Senate for consideration.

It is hoped that the State of New Mexico, through its proper authorities, will immediately, upon the passage of the legislation in the Senate and its final enactment into law, provide the necessary method in conjunction with the adjoining States to bring about the purposes of this legislation. In so doing, the State of New Mexico will protect the water which nature has provided in its great watershed of the high mountains and in its timber reserves for the use of the people of the State.

It is said that many of the States of the arid region, in which my State is included, have not yet applied water to beneficial use upon more than 2 per cent of the land to be utilized for crop purposes, and New Mexico alone can, by the conservation of its waters, reclaim at least 2,000,000 additional acres of land.

During the recent campaign I pledged to the people of New Mexico that I would endeavor to pass this legislation at the short session of Congress. To-day is the first Consent Calendar day of the session; my bills have been approved by this body. It is a matter of gratification to me and I hope the various regions of the State, through which the rivers flow, will appreciate the same in the spirit in which the legislation has been enacted.

THE RECENT ELECTION AND THE DEMOCRATIC PARTY

Mr. GILBERT. Mr. Speaker, I ask unanimous consent to address the House for 25 minutes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. GILBERT. Mr. Speaker, these remarks will possess one virtue—frankness. Several months before the convention I warned my colleagues that Governor Smith's nomination meant disaster in Kentucky, including the defeat of at least four Congressmen. At the Lexington convention, unaided and alone, I sought in vain to prevent that catastrophe. At that time the sentiment in Kentucky was overwhelming against Governor Smith, even in the Democratic Party, and yet the leadership in that convention instructed for his nomination. They have suffered the rebuke that always follows when politicians attempt to force their will upon the people.

Kentucky is overwhelmingly Protestant, is overwhelmingly dry, has the smallest per cent of aliens, and even her wets are opposed to wines and beer. As the leaders of Smith's national campaign foolishly emphasized these false issues, it took no prophet to foretell what was in store for us. [Laughter.]

The Democratic platform was very generally approved. It advocated both prohibition enforcement and immigration restriction. Frequent statements of Chairman Raskob, however, could not be reconciled with the obvious purpose of the platform and Governor Smith's interpretations were not reassuring.

It would be difficult to find one with less political judgment or one with so little national vision or one in every way so unfitted for the situation as Chairman Raskob. His every utterance brought embarrassment to us. [Applause and laughter.]

The eighteenth amendment is in the Constitution. There was no issue upon that. As Charles Evans Hughes truly said, that issue was merely a "sham battle."

The truth is that neither party nominated a dry. The Democrats nominated an outspoken wet and the Republicans a "speakeasy" dry. [Laughter.]

Perhaps the greatest number of the country's sincerest champions of the eighteenth amendment, including its author, supported Smith because the real liquor issue, if any, was not legislation but enforcement. Since coming here I have tried to rid the Nation's Capital of bottlegging, without noticeable cooperation from Mr. Mellon, the head of prohibition enforcement in the United States.

The tale of two cities—Washington and Pittsburgh—is the same. They both have the same uncrowned king. Is it a mere coincidence that these two cities—the city of Mr. Mellon's home and the city of his activities—have become known as the wettest cities in the United States? Will it not be a shock to the country to learn that Mr. Mellon's department admits that there are 3,000 bootleggers infesting the Nation's Capital? Such a lack of enforcement is a betrayal of the confidence of the people.

As a sincere dry, personal as well as political, throughout the years, one who believes the law can and should be enforced, I can find no reason for enthusiasm in Mr. Hoover.

Political exigencies produce some astonishing results. Mr. Hoover became dry when election to the Presidency required it. Mr. Walker became dry when election to Congress required it. Ex-Gov. Edwin P. Morrow became dry when political expediency demanded it.

They are the dry leaders now, neither because they have ever rendered the cause one bit of service nor because they have ever practiced what they are now preaching, but solely by vote of the people.

While openly opposing the views of Governor Smith on prohibition and immigration, I supported the Democratic ticket, because through the Democratic Party lay the only hope of remedying certain dangerous and deplorable conditions. A caloused public conscience seems to condone lawlessness among citizens and dishonesty among public officials. The crimes and follies of our foreign policies are actually threatening the peace of the world. Our domestic policies are destroying small business, while agriculture is on the brink of despair. Honest people so engaged are in distress, while gamblers are indulging in a wild orgy of speculation. Mr. Hoover's election emphasized this condition and widened the difference. The day after election industrial stocks on Wall Street went up. Sinclair oil reached its highest peak. Sinclair is the man whom the Supreme Court of the United States said conspired with certain Republican Cabinet officers to defraud and steal this oil from the United States.

That same day farm products went down. Hogs, the farmers' main source of revenue at this time of the year, on the Louisville market dropped 10 cents and 15 cents more the day after. They have continued a steady downward course. The day before the election they sold for $9.50 per hundred. When Presi-

dent Coolidge read this message on December 4, one month later, they sold for $8.65 per hundred. That part of the President's message that stated that farm commodities have reached a greater purchasing value is not true. The recent statement of the Secretary of Agriculture flatly contradicts it. [Applause on the Democratic side.]

A sound economic condition reflecting true prosperity must include agriculture. Such is not the case. The Republican Party admits it. It promises to call a special session for farm relief. What additional power will it then have that it has not now? It has had the President, the Senate, and the House for eight years. It can have nothing more next year. In fact, the same leaders will control legislation. If they have not had an idea in eight years, why expect them to find one next year? [Laughter.] Why put it off until next year, anyway? Is there anything else more important?

The relief, it seems, is going to be the McNary-Haugen bill without the equalization fee, which is the hunter without a gun. That relief will not only fail to relieve but will not even serve to deceive.

The next few years will convince the western farmer of what the last few years have almost persuaded him that a high tariff on manufactured articles and agricultural prosperity are incompatible. The suggested Republican remedies are only aspirins to relieve the pain and not remedies to remove the cause. I declined to indorse the Raskob tariff telegram sent Democratic Members. It was a foolish effort to commit the party to an unnatural alignment. I reaffirm my faith in the time-honored Democratic principles of low tariff except to foster a necessary infant industry.

A high tariff, always unjust, becomes disastrous when a country's production so far exceeds its consumption as to necessitate competition in foreign fields.

After eight years of Republican tariffs, together with Republican manipulation of the Federal reserve banking system, the farms in my district will not bring the mortgages upon them.

But of far more consequence even than these is the unrest existing over the world caused largely by the crimes and follies of our selfish foreign policies. I am heart and soul for the Kellogg treaties. I hope the President is right when he refers to them as giving great promise for world peace, yet Lloyd George, Benito Mussolini, and other statesmen of Europe are referring to them in sarcasm and ridicule. Lloyd George has just said, "While we sing the hallelujah chorus the world is arming and heading straight for war." Mussolini has just said, "We would hasten to sign similar pacts but are not deluding ourselves; the whole world is arming."

When the President is at the same time asking for peace and a bigger Navy, faith in our own peace proposals seem lacking, and foreign statesmen discredit our sincerity.

The Republican Party in 1920 preyed upon the ignorance, prejudice, and fear of the people and bartered away the world's greatest opportunity for service. It was willing to sell the future peace on earth, good will to men, like it sold the naval oil reserves for a miserable mess of pottage.

For eight years I have heard Presidents' messages of prosperity, of dollars and cents, until materialism has become nauseating. Not once has ever been mentioned education, refinement, the arts, the sciences, honesty, morality, patriotism, or Christianity. Think of the President confining an entire address on George Washington to his farms, his slaves, his business ability, and material prosperity!

Is money the only thing worth striving for? No!

> Ill fares the land to hastening ills a prey,
> Where wealth accumulates and men decay.

I am opposed to the President's increased Navy program, unless it is true that another war is near, as Europe seems to think. Otherwise it will be used only for imperialistic demonstrations, trade intimidation, and may get us into war. The people of the world do not want war. The people's Representatives in Congress should take this in hand with the civil authorities of other lands and all could agree, but leave it to the diplomats and war experts and they will get us into war.

Neither do I approve of Mr. Hoover's peace mission on a battleship. At an enormous expense to the American taxpayer this private citizen is calling his vacation a good-will voyage. We learn that the American Fleet is to follow; just why, is not clear. When the Prince of Peace came on earth to preach good will, he neither rode a war horse nor had an army in his wake. [Applause.]

While I, as a patriot, wish Mr. Hoover an administration promoting world peace, helpful to all our people in material, moral, and spiritual progress, I see nothing to warrant great optimism. He has displayed neither courage nor ideals; he has had no fixed opinions; he has merely reflected the wishes of stronger men who surround him. Under Woodrow Wilson he was a Democrat; he sought the Democratic nomination for President; he sought the return of a low-tariff Congress. Under Harding and Coolidge he was a Republican; he sought the Republican nomination for President; he sought the return of a high-tariff Congress.

I love the Democratic Party, its principles, its traditions, its history. For 16 years it has furnished my meat and bread. Although I warned against its leadership and refused to follow them into strange and winding paths, I would not forsake it in its hour of trial. [Applause on the Democratic side.]

It is sad that this party lies prostrate when it has always proven honest and true. For wise legislation, honest administration, and patriotic devotion, its last eight years of office is unparalleled in the history of our Government. Its rival is now entrenched in power, arrogant and hateful, although for eight years it has not enacted a single piece of progressive legislation; it has betrayed the enforcement of every law and has revelled in dishonesty and graft both nauseating and disgusting. [Applause on the Democratic side.]

The Democratic Party even in the minority furnishes the strength and guidance of this Government. The only boast of achievement of the past eight years is tax reduction accomplished upon a plan devised by JOHN GARNER, a Democrat, and substituted for the Mellon plan by even a Republican Congress. The greatest calamity that could ever befall our country would be the disintegration of the Democratic Party. [Applause.]

For these reasons and many more, I stuck by the old Democratic ship of state. I saw its crew steering it into the storm. They seemed unmindful of the rocks toward which they were driving. Seeing my distress, I was invited to join those who abandoned it for a less worthy ship, more adroitly managed, and even promised safety in reward for my cowardice, but I owed more allegiance than they. I was an inferior officer; they were only passengers. Had it come safely into port, it would have been better for the country even though there was much undesirable on board; so I have no regrets nor apologies for sticking to the ship.

The Democratic Party has a great future. Its proper alignment is nearer that of 1916 when the South and West united and were victorious without carrying any Eastern States. I am not advocating sectionalism. The Democratic Party is national in scope. Its policies are best for the people generally in the North, South, East, and West, but so long as protected interests dominate the policies of some of the Eastern States and exact an unjust tribute from every other section, the Democratic Party can not sacrifice its principles as an inducement for their electoral vote, however tempting such a betrayal may be.

The coming four years will demonstrate that agriculture, small independent business, honest dignified labor, and the ordinary self-respecting citizens have nothing in common with exorbitant tariffs, great combinations of industries, and vast accumulations of wealth.

Let us now look to the future. Naturally we do not want to follow the same leaders who have just brought such disaster upon us. [Applause.]

The recent election demonstrated, as all previous elections have indicated, that the country approves of the eighteenth amendment and wants it honestly enforced. Chairman Raskob during the campaign, by the use of such expressions as "damnable prohibition" alienated a large and sincere following. [Laughter.] We should consider the country as dry, insist upon honest enforcement, and cease agitating that issue. Wet leadership, therefore, would be most unwise. Governor Smith, with his many admirable qualities, with his humanity and his ability, commands our admiration and respect, but over the Nation his environment causes apprehension and the prominence given by him to certain issues obscures the splendor of Democratic achievement in greater fields. In view of the recent proof of this, so unhappily experienced, his renomination in 1932 is unthinkable. [Applause.]

Should an effort be made to continue the Democratic Party, under the leadership and policies that have just wrecked it, I give warning of protest. After March 4 I shall be a private citizen, but I shall fight for the principles set out here and as a candidate, if need be, carry them to the people in my State. At Houston the Democratic Party was taken upon a mountain and tempted by the prospect of power to be had by holding out a false inducement to those opposed to a constitutional amendment, and it was tempted by the lure of gold to be contributed by high-tariff protected monopolies and it yielded and fell.

It shall rise, purged and strengthened by this experience.

The Republican Party, however, must suffer from the disappointment and the disintegration of so large a majority.

Drunken with power, it will ruthlessly prove its own unfitness and finally bring about its own destruction. [Applause.]

It would be fortunate if inspiring leadership should hail from the West. Under an able leader, a wise statesman, a friend of agriculture and country life, the South would become solidly Democratic again; so would the border States and the West.

I submit these views not in the egotism of "I told you so" nor in the bitterness of disappointment but for the consideration of those who like I love their country and believe that its greatest opportunity for peace, uprightness, prosperity, and inspiration is in the Democratic Party. [Loud applause.]

RELIEF OF PORTO RICO

Mr. KIESS. Mr. Speaker, I move to suspend the rules and pass House Joint Resolution 352, for the relief of Porto Rico, which I send to the desk and ask to have read.

The Clerk read as follows:

Whereas the island of Porto Rico is suffering from the effects of a violent hurricane of extraordinary intensity, unusual in duration, and unexampled violence which visited the island on September 13 and 14, 1928; and

Whereas no part of the island escaped suffering some damage; and

Whereas the total number of people affected by the hurricane was 1,454,047, of whom, according to the report of the American Red Cross, more than one-third, or 510,161, were absolutely destitute and without food; and

Whereas the coffee and fruit crops were almost totally destroyed, and the coffee plantations so injured that it will be at least five years before they can be restored to normal conditions; and

Whereas a very large part of the shade trees which are essential for the successful functioning of a coffee plantation were destroyed and more than five years will be required for their replacement or recovery; and

Whereas more than 140,000, or about one-third, of the trees in the coconut plantations were destroyed and it will be at least seven years before the new trees to be planted in their place will be bearing fruit; and

Whereas the damage to all the insular industries has been so great as to make it impossible for the insular government to give adequate relief in the emergency: Therefore be it

Resolved, etc., That there is hereby created a commission, to be known as the Porto Rican Hurricane Relief Commission (hereinafter referred to as the commission), and to consist of the Secretary of the Treasury, the Secretary of War, and the Secretary of Agriculture, of whom the Secretary of War shall be the chairman. It shall be the duty of the commission to assist in the rehabilitation of agriculture in the island of Porto Rico, particularly on the coffee plantations and on the coconut plantations, to encourage a more general planting of food crops needed by laborers on the plantations, especially of root crops, to aid in the repair and restoration of schools and roads, and to assist in providing employment for unemployed and destitute laborers. The commissioners shall receive no compensation for their services under this resolution.

SEC. 2. (a) The commission is authorized (1) without regard to the civil service laws to appoint and, without regard to the classification act of 1923, as amended, to fix the compensation of a secretary and such clerical and other assistants; and (2) to make such expenditures (including expenditures for personal services and rent at the seat of government and elsewhere) as may be necessary in carrying out the provisions of this resolution. The commission may, to the extent deemed advisable by it, utilize the facilities and the clerical and other personnel of the Department of the Treasury, the Department of War, and the Department of Agriculture, and may request and accept the cooperation of the insular and municipal governments of Porto Rico in carrying out the provisions of this resolution.

(b) There is hereby authorized to be appropriated the sum of $50,000 for administrative expenses incurred in carrying out the provisions of this resolution.

SEC. 3. For the purpose of carrying out the provisions of this resolution the commission shall have power to make loans to any individual coffee planter, coconut planter, fruit grower, or other agriculturist in the island of Porto Rico in such amounts and upon such terms and conditions as the commission shall by regulation prescribe, including an agreement by the borrowers to use the loan for the purposes specified by the commission; except that no such loan shall be made for a period of more than 10 years or in an amount in excess of $25,000 to any one individual. The rate of interest upon each such loan, beginning with the fourth year, shall be 5 per cent per annum, but the commission may, in its discretion, defer the payment of interest upon any such loan for such a period of time as the commission shall deem necessary. All such loans shall be made by the commission itself or through such agencies as the commission shall designate. For carrying out the purposes of this section there is hereby authorized to be appropriated the sum of $6,000,000, of which $3,000,000 shall be made immediately available, $2,000,000 shall be made available on January 1, 1930, and $1,000,000 shall be made available on January 1, 1931. All money received during a period of five years from the date of the approval of this joint resolution as repayment of any loan or interest on loan made under the provisions of this joint resolution shall be held by said commission as a revolving fund, which may be loaned on applications for the purposes and upon the terms and conditions herein provided, and all money received thereafter as payments of interest and principal on all loans made under the provisions of this joint resolution shall be covered into the Treasury as miscellaneous receipts.

SEC. 4. There is hereby authorized to be appropriated the sum of $2,000,000 to be used for the rebuilding and repair of schoolhouses damaged or destroyed by the hurricane in the small towns and rural districts of Porto Rico and for the employment of labor and the purchase of materials for repairing insular and rural municipal roads. The sum hereby authorized to be appropriated shall be expended in such manner and in such amounts as the commission shall approve.

SEC. 5. There is hereby authorized to be appropriated the sum of $100,000 to be expended by the commission in the purchase and distribution within the devastated area of Porto Rico of seeds and seedlings, particularly of food and root crops, in such manner as it deems advisable.

SEC. 6. The commission shall make an annual report to Congress at the beginning of each regular session, giving a complete account of its activities in carrying out the provisions of this resolution.

The SPEAKER. Is a second demanded? If not, the question is on suspending the rules and passing the joint resolution.

The question was taken; and, in the opinion of the Chair, two-thirds having voted in favor thereof, the rules were suspended and the joint resolution was passed.

Mr. CHINDBLOM. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CHINDBLOM. Do the whereases remain in the joint resolution?

The SPEAKER. The Chair thinks that the whereases remain as a part of the resolution.

Mr. CHINDBLOM. Are they essential?

Mr. KIESS. We thought so. They state the purpose of the legislation very clearly.

Mr. CHINDBLOM. We never do state the purpose of legislation, and if the resolution can stand without the whereases, I think in the interest of good legislation they ought to be omitted.

The SPEAKER. The Chair has already put the question on the joint resolution as read, with the whereases.

Mr. KIESS. Mr. Speaker and gentlemen of the House, I hope, in the short time allotted to me to discuss the merits of this legislation, that I will be able to convince you, as I have been convinced by personal investigation, of the urgent necessity for the passage at this time of House Joint Resolution 352.

The relief measures provided for in this joint resolution are made necessary by the effects of the destructive hurricane that swept across the island of Porto Rico on September 13 and 14, 1928, spreading devastation in its pathway, leaving in its wake not less than half a million persons in a state of destitution, and destroying crops and reducing to wreckage homes, tobacco barns, and warehouses, fruit-packing plants, and sugar centrales.

It was without doubt the worst hurricane in the history of the West Indies, and the island of Porto Rico was one of the chief sufferers. Had I not visited the island I would not have believed so much damage could have been done in such a short time. The last severe hurricane before this occurred in 1899. At that time the excessive winds lasted about three hours while this time the hurricane's excessive winds lasted for nearly 12 hours. In 1899 the wind reached a velocity of between 90 and 100 miles an hour and this year it was estimated by the best of authority that the wind at one time reached a velocity of 180 miles or more. With a wind of this force, and lasting over such a period of time, practically nothing escaped some harm.

In so far as I know there never has been in the United States, or any of the insular possessions of the United States, a hurricane of this intensity and which lasted so long. It was during the last few hours of the hurricane that so much of the damage was done. There never has been a calamity that affected the people so much in the area involved, or damaged so great a part of the industries in that territory.

At the urgent request of Governor Towner, of Porto Rico, Senator BINGHAM, chairman of the Senate Committee on Territories and Insular Possessions, and I, as chairman of the House Committee on Insular Affairs, visited Porto Rico last month and made a study of conditions in the island. During the 10 days we spent there we traveled approximately 600 miles by automobile over the island and therefore have a personal knowledge of the destruction caused by the hurricane. We talked with the representatives of the Sugar Producers Associa-

tion, the coffee planters, the tobacco growers, the fruit growers, and officials of the Agricultural Association of Porto Rico. We also interviewed representatives of the Red Cross, representatives of the Bankers Association, and the manager of the Federal Farm Loan Bank of Porto Rico, which is a branch of the bank in Baltimore. We talked with the officers of the Chamber of Commerce of Porto Rico, the commissioner of education, commissioner of the interior, commissioner of agriculture, the insular auditor, the attorney general, the insular treasurer, and many others.

The need for immediate employment is very great. If we do not enact some legislation in the very near future for their relief, there will be an enormous amount of suffering inflicted upon these people.

The American Red Cross, which went immediately to the relief of the island, reports that the total number of people affected by this hurricane to be 1,454,457, of whom more than one-third, or 510,161, were destitute, without food, without shelter, and with only the clothing they had on their backs. In the hurricane of 1899 there were 3,000 people killed chiefly by floods. The rainfall during that hurricane was about 23 inches. Although there was a rainfall this time of 29 inches in 24 hours, there were less than 300 people who lost their lives. This was due to the fact that the hurricane moved slowly and was anticipated by two days. Warnings were sent to every part of the island. Persons were warned to leave the valleys and to go up into the hills, so that, although, in some places the roads were 5 or 6 feet under water and the dwellings of half a million people were destroyed, fortunately, the loss of life was small. The fact that the severest part of the storm occurred in the daytime was also a factor in preventing the loss of life.

As soon as possible a central survey committee was appointed by Gov. Horace M. Towner. Maj. C. S. Ridley, of the United States Army, was chairman of the committee, which was composed of the commissioner of interior, the commissioner of agriculture, and four prominent citizens of Porto Rico. The survey was supervised by officers of the Sixty-fifth Infantry, which is stationed in Porto Rico. The graded schools all over the island were closed for three weeks and the school-teachers used in making the survey. Every one of the houses in the devastated section of the island was visited by members of the survey. The complete and comprehensive report of that committee as to the damage and destruction wrought leaves no question as to the devastating effects of the hurricane. I quote in part from this report, as follows:

The destructive effects of the hurricane extended to all parts of the island. The total material damage determined by the survey amounts to $85,312,120. Because of the reconstruction that took place immediately after the hurricane and continued up to the time of the survey the damage existing at the time of the survey is less than the above figure and amounts to $77,981,134.

On account of the general character of construction of the dwellings in rural areas the destructive effect of the hurricane on dwellings in these areas was more marked than in the towns, with the possible exception of one or two towns on the southeast coast. About 247,728 rooms in rural dwellings were totally destroyed and 192,444 partially destroyed. By the date of the survey, 41 per cent of these rooms had been rebuilt complete with roof. In 25,596 dwellings, 83,679 persons were found temporarily living with other families on account of destruction of their homes.

Coffee is grown in the central or mountain portion of the island. On the coffee farms, 49 per cent of the coffee trees and 59 per cent of the shade trees protecting the coffee are lost, amounting to $8,716,925. It will require three to five years to replace this loss if the work is undertaken promptly. However, 6,368 farmers reported they were not rehabilitating their farms on account of lack of funds. In addition to this loss, about 80 to 90 per cent of this year's coffee crop that was on the trees is lost, amounting to $9,465,225. There are 49,818 families living on farms over 1 cuerda in area on which the major crop is coffee. This is about 25.5 per cent of the total rural population of the island.

Sugar cane is grown on the seacoast and in the valleys. It suffered from the hurricane in two ways, viz, by loss of weight and by loss of sugar content. The former loss, which is due to breakage, inundation, and retarded growth, may be more closely determined than the latter. The loss in sugar content can not be definitely known until the cane is harvested, as it will probably change up to maturity. The total combined crop loss is now about 32.6 per cent of the crop which was anticipated prior to the hurricane, or a money loss of $17,337,180. There are 34,316 families living on farms over 1 cuerda in area on which the major crop is sugar. This is about 17 per cent of the rural population.

No tobacco was growing at the time of the hurricane. About 25 per cent of the seed beds, however, had been planted and practically all cloth had been installed. All of this was a total loss. Practically all of the tobacco barns were totally destroyed. There was also loss of tobacco leaf in storehouses awaiting disposal. These losses were the most important ones to the tobacco farmers and amount to $11,979,114. There are 15,462 families living on farms over 1 cuerda in area on which the major crop is tobacco. This is about 8 per cent of the rural population.

The citrus-fruit industry covers a relatively small portion of the island. Only about 5 per cent of the trees are destroyed but a large part of the growing fruit was lost. The total existing tree and crop loss is $2,713,866.

There are only a few important areas on the island containing coconut farms. These are located along the seacoast and are relatively small in area, about 14,340 cuerdas. On these farms, 32.77 per cent of the trees were destroyed and the entire crop of fruit was lost. The total crop and tree loss amounts to $1,650,829, which is relatively high for such a small industry.

Such conditions as outlined, calls for speedy and effective relief. One of the greatest needs is long-term credits, whereby the planters can rehabilitate themselves and at the same time afford employment to the thousands of persons now without work as a result of the disaster.

Identical measures were prepared and introduced in the House and Senate. Joint hearings by your committee and the Senate Committee on Territories and Insular Possessions were conducted. The extent of the havoc wrought in the island was clearly set forth by Porto Rican officials and others who had first-hand knowledge of the situation. Included among the witnesses were: Gov. Horace M. Towner, of Porto Rico; Manager E. B. Thomas, of the Porto Rican branch of the Federal Land Bank of Baltimore; F. J. Holcomb, auditor of Porto Rico; Commissioner Carlos E. Chardon, commissioner of agriculture; Hon. FELIX CORDOVA DAVILA, Resident Commissioner of Porto Rico; Gen. Hugh A. Drum, who was dispatched by the War Department to the island to investigate the situation resulting from the hurricane; Col. W. L. Patterson, Acting Chief of the Bureau of Insular Affairs, War Department, and others. All gave testimony to the devastation and the need of help from the United States Government and all urged the prompt passage of this resolution. It was pointed out that Porto Rico was doing everything in its power to recuperate itself, but that the magnitude of the catastrophe called for aid from the United States Government to enable the planters and growers of the island to get on their feet.

The Secretary of War, in a letter, places the department on record as favoring the resolution and sets forth that the Director of the Budget advises that this proposed legislation is not in conflict with the financial program of the President.

While the resolution follows in general terms measures which have been passed by Congress in great catastrophes, it is in a way a new proposal. This resolution is also somewhat similar to those passed by Congress in recent years appropriating money for the purchase of seed for the farmers.

In 1903 we appropriated $3,000,000 for the relief of distress in the Philippine Islands, and in 1906, $2,500,000 was appropriated to sufferers from earthquake and fire in San Francisco.

Under act of December 22, 1921, the President was authorized, through such agencies as he might designate, to expend for food a sum not exceeding $20,000,000 for the relief of the distressed and starving people of Russia and for spring planting in areas where seed grain had been exhausted. Of the total amount authorized it is understood there was expended over $18,000,000. This was apparently intended as an outright gift, and no obligations were taken for the supplies distributed.

Under the act of January 20, 1922, we transferred medical and hospital supplies to the amount of $4,000,000 for the stricken people of Russia.

In 1922 Congress authorized the Secretary of Agriculture to make loans or advances to farmers of the United States for the purchase of seed grain, and $1,500,000 was made available for this purpose.

Briefly stated, House Joint Resolution 352, now before the House, creates the Porto Rican hurricane relief commission, consisting of the Secretary of the Treasury, the Secretary of War, and the Secretary of Agriculture, of whom the Secretary of War shall be chairman.

Section 2 authorizes the appropriation of the sum of $50,000 for administrative expenses incurred in carrying out the provisions of this resolution.

Section 3 provides that the commission shall have power to make loans to any individual coffee planter, coconut planter, fruit grower, or other agriculturist in the island of Porto Rico in such amounts and upon such terms and conditions as the commission shall by regulation prescribe, except that no such loan shall be made for a period of more than 10 years or in an amount in excess of $25,000 to any one individual.

For the purpose of carrying out the provisions of this resolution there is authorized to be appropriated the sum of $6,000,000, of which $3,000,000 shall be made immediately available, $2,000,000 shall be made available on January 1, 1930, and $1,000,000 shall be made available on January 1, 1931.

Section 4 authorizes to be appropriated the sum of $2,000,000 to be used for the rebuilding and repair of schoolhouses damaged or destroyed by the hurricane in the small towns and rural districts of Porto Rico and for the employment of labor and the purchase of materials for repairing insular and rural municipal roads. The sum hereby authorized to be appropriated shall be expended in such manner and in such amounts as the commission shall approve.

Section 5 authorizes to be appropriated the sum of $100,000 to be expended by the commission in the purchase and distribution within the devastated area of Porto Rico of seeds and seedlings, particularly of food and root crops, in such manner as it deems advisable.

Section 6 provides that the commission shall make an annual report to Congress at the beginning of each regular session, giving a complete account of its activities in carrying out the provisions of this resolution.

The people of Porto Rico deeply appreciate what has already been done for them by the American Red Cross. The prompt passage of this resolution, in addition to furnishing immediate relief by giving employment to thousands now out of work, will do much to create a closer bond of friendship between the people of Porto Rico and those of continental United States. It is my sincere hope that the resolution may be passed finally and signed by the President before Congress adjourns for the Christmas holidays.

SUPREME COURT BUILDING

Mr. ELLIOTT. Mr. Speaker, I move to suspend the rules and pass the bill (H. R. 13665) to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States, as amended, which I send to the desk and ask to have read.

The Clerk read as follows:

That there is hereby created a commission to be known as the "United States Supreme Court Building Commission" and to be composed of the Chief Justice of the United States, an associate justice of the United States to be designated by the Supreme Court of the United States, the chairman and the ranking minority member of the Committee on Public Buildings and Grounds of the Senate, the chairman and the ranking minority member of the Committee on Public Buildings and Grounds of the House of Representatives, and the Architect of the Capitol. Notwithstanding the expiration of a Congress, any Representative who is a member of the commission, if reelected, shall continue to serve thereon until a successor is selected by the House of Representatives. The Architect of the Capitol shall serve as executive officer of the commission and shall perform such services under this act as the commission may direct.

SEC. 2. The commission is authorized to procure, by contract or otherwise, preliminary plans and estimates of costs for the construction, and the furnishing and equipping, of a suitable building (including approaches, connection with the Capitol power plant, and architectural landscape treatment of the grounds), for the accommodation and exclusive use of the Supreme Court of the United States; such building to be erected upon the site heretofore authorized for that purpose, and such building to be so situated, and the exterior thereof to be of such type of architecture and material, as to harmonize with the present buildings of the Capitol group. The amount to be expended in procuring such plans and estimates shall be determined by the commission, but shall be within the limits of appropriations made therefor, and shall be disbursed by the disbursing officer of the Department of the Interior, under the direction of the executive officer of the commission. The commission shall make a report to the Congress on or before March 1, 1929, including a detailed statement of such plans and estimates of costs.

SEC. 3. There is authorized to be appropriated the sum of $10,000, or so much thereof as may be necessary to carry out the provisions of section 2.

The SPEAKER. Is a second demanded?

Mr. GARNER of Texas. Mr. Speaker, I do not care to ask for a second, but I would like to ask if this is a unanimous report of the committee?

Mr. ELLIOTT. It is.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

FIREPROOF OFFICE BUILDING FOR THE HOUSE OF REPRESENTATIVES

Mr. ELLIOTT. Mr. Speaker, I move to suspend the rules and pass H. R. 12897, to provide for the acquisition of a site and the construction thereon of a fireproof office building or buildings for the House of Representatives with amendments.

The SPEAKER. The gentleman from Indiana moves to suspend the rules and pass with amendments the bill which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 12897) to provide for the acquisition of a site and the construction thereon of a fireproof office building or buildings for the House of Representatives.

Be it enacted, etc., That there is hereby authorized to be appropriated the sum of $900,000, or so much thereof as may be necessary, for the acquisition of a site embracing one or more of the squares bounded by B Street SE. and B Street SW., C Street SE. and C Street SW., New Jersey Avenue SE., and Delaware Avenue SW., as the commission in control of the House Office Building shall determine.

Upon the acquisition of such land, buildings, and structures, all of the land, buildings, and structures contained in square No. 689 and square No. 636 in the District of Columbia, as such squares appear on the records in the office of the surveyor of the District of Columbia as of the date of the passage of this act, shall become a part of the new House of Representatives Office Building site and be under the control of the Architect of the Capitol, subject to the direction and supervision of the House Office Building Commission.

SEC. 2. There is hereby authorized to be appropriated the sum of $7,500,000, or so much thereof as may be necessary, for the construction, on the site selected, of a fireproof office building or buildings for the House of Representatives, to include necessary office rooms for Members, including committee rooms, folding rooms, and such other rooms as may be necessary and proper. Such building or buildings shall be constructed substantially in accordance with plans prepared under the direction of the Architect of the Capitol in accordance with the provisions of an act of Congress approved March 4, 1925, with such modifications as may be necessary or advantageous. For any part or all of the sum authorized to be appropriated by this section, contracts are authorized to be entered into. The construction of such building or buildings and the letting of contracts, including the necessary traveling expenses, advertising, purchase of material, supplies, equipment, and accessories in the open market, and the employment of all necessary skilled architectural and engineering personnel and other services, without reference to section 35 of the act approved June 25, 1910, and purchase of necessary technical and other books, shall be under the control of the Architect of the Capitol, subject to the direction and supervision of the commission in control of the House Office Building.

SEC. 3. The commission in control of the House Office Building shall, within 30 days after the date of the enactment of this act, determine which part or parts of the area described in section 1 shall be acquired and used for a site for the building or buildings herein provided for and shall proceed to acquire such site by purchase or by condemnation, and in the latter event, the condemnation proceedings shall be conducted in the same manner as provided in the act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1899, and for other purposes," approved July 1, 1898, for the acquisition of a site for an addition to the Government Printing Office. The appropriations made pursuant to this act shall be disbursed by the disbursing officer of the Department of the Interior, such officer being designated by law as the disbursing officer of the Architect of the Capitol.

The SPEAKER. Is a second demanded?

Mr. ESLICK. Mr. Speaker, I demand a second.

Mr. BLANTON. Is the gentleman against the bill?

Mr. ESLICK. I am.

Mr. ELLIOTT. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from Indiana? [After a pause.] The Chair hears none.

The gentleman from Indiana is entitled to 20 minutes and the gentleman from Tennessee to 20 minutes.

Mr. ELLIOTT. Mr. Speaker, I yield five minutes to the gentleman from Massachusetts [Mr. DALLINGER].

Mr. DALLINGER. Mr. Speaker, I do not think that it requires any long-extended statement from me to demonstrate the necessity for this legislation. As a matter of fact, when the present Senate and House Office Buildings were first planned the same reason existed for having two offices provided for each Representative as existed for having two offices provided for each Member of the Senate. The only reason why it was not done at that time, so far as I can ascertain, was the architectural reason that it was felt that the two buildings ought to be approximately the same size and height in order to maintain the symmetry of the Capitol Plaza. When they came to construct the buildings they found there was more than enough room to provide each Senator with a suite of offices and at the same time provide large and commodious committee rooms, for the reason that there were at that time only 92 Senators, which number has since been increased to 96; whereas there were 391 Representatives, which number has

since been increased to 435. Hence it came about that when the building was completed with the necessary committee rooms, it was found that only one room could be assigned to the great majority of House Members who were not chairmen of committees.

In the old days when Members had no clerical assistance and answered their correspondence in long hand, it might have been easier to get along with a single room. But since the advent of the typewriting machine the need for a private office for each Representative has become more apparent and more vitally necessary. It is manifestly impossible for a Member to do any satisfactory reading or to give any thoughtful attention to matters of legislation with two typewriting machines going in his office.

We all know that every third assistant chief of a bureau in the executive part of our Government has a private office. Moreover, every member of the legal profession, even in small rural communities, to-day has a private office where he can see his clients, and it is perfectly evident that this legislation is demanded not so much for the personal convenience of the Members but in order that the representatives of the people may properly transact the public business. As I said before, it ought to have been done at the beginning when the building was first constructed.

Not only is this all true, but we need more adequate committee rooms. With the exception of the rooms occupied by the Ways and Means Committee and the Judiciary Committee, there is no committee room in the present House Office Building that is even approximately adequate; and, in fact, even those two committee rooms are frequently not large enough when hearings are held on important matters of pending legislation and a large number of people come from different parts of the country to appear before those committees. The construction of a new building to be used in conjunction with the old building will not only give each Member what he ought to have, viz, two offices—one a workshop in which the routine business can be transacted by his secretary and stenographer, and the other a private office where he can meet his constituents and fellow Members and read and study—but it will also make it possible that every committee of the House which holds public hearings requiring the attendance of witnesses shall have a properly ventilated committee room large enough to accommodate the public.

This bill, Mr. Speaker, has the indorsement of the Speaker of the House, of the majority leader and the minority leader, and from conversations which I have had with individual Members of both political parties I know that it has the enthusiastic support of an overwhelming majority of the entire membership of this House. I trust that the motion to suspend the rules and pass the bill will prevail. [Applause.]

Mr. ESLICK. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

The SPEAKER. The gentleman from Texas is recognized for five minutes.

Mr. BLANTON. Mr. Speaker, we have just passed, under suspension, a bill to remove the Supreme Court from its present quarters in the Capitol to new quarters on the outside, at great expense to the people. I understand that at first the Supreme Court personnel were not in favor of that move, and I know that its present location in the Capitol is convenient to Members of Congress from every State in the Union, who introduce new practitioners.

Mr. ELLIOTT. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. I regret I have not the time to yield to the gentleman.

Mr. ELLIOTT. I just wish to correct a misstatement.

Mr. BLANTON. I yield.

Mr. ELLIOTT. The gentleman has made a misstatement and I want to set him right on it. The Supreme Court of the United States is in favor of this bill.

Mr. BLANTON. I do not yield further, Mr. Speaker. I understood they were not at first, but finally, through insistence and pressure upon them, they acquiesced.

All of the attorneys who practice before that court come here from our States. Many of them are not members of the Supreme Court at first and have to be introduced by some of us from the States. As it is now, we can go over there and find out when the introductions are made and make them with very few minutes' loss of time. With the Supreme Court located somewhere else we would have to leave our places for several hours, perhaps, because those introductions come at different times, and the attorneys back in the States depend upon us to do that.

Now, in our House Office Building we can have the present office building so arranged that we can have a private room in the offices now occupied. If this Congress should do what it ought to do and pass a reapportionment bill reducing the membership of this top-heavy House from 435 to 300 Members, you would have a better working body, and you would have better attendance here on the floor, and you would have legislation better considered and better passed for the people.

If you would do that you would have plenty of room and instead of costing over $8,300,000 it would save the people of this country, the overburdened taxpayers, on salaries and expenses alone a couple of million dollars every year.

When the Architect of the Capitol, who is a splendid man, one of the finest officials we have—when he first asked for estimates from architects on this proposal, a prominent firm of architects in New York sent him an estimate under which you could build on the present House Office Building 375 new office rooms, and all the things that go with them, for $3,000,000. If we need more room why would not that adequate enlargement suffice—to spend $3,000,000 and get 375 new office rooms in our present building, and have them all located together? But instead of accepting that proposition we must enlarge still further, and spend $900,000 for a new site, and when we do that we are going to commit waste for which the people must pay. We are going to tear down four good buildings that exist now and that are used by citizens here, to wit, Potomac Hotel, Congress Hall Hotel, Health Department, and the Geodetic Survey Building, and throw that money away, and the people, the taxpayers, will pay for it; and then instead of spending $3,000,000 for 375 new rooms, we are going to double the amount and expend $7,500,000 for new construction.

I know I can not stop this bill from passing by objecting to it. I know it will pass. But I do want to register my protest against it. I think it is a waste of money. There was a time when not a Member of this Congress had an office except such as he furnished himself, and such officers were scattered all over the city, and yet we had possibly as good statesmen here then as we have now, and the public business was transacted just as well for the people as it is transacted now. You are going to have such spacious and commodious offices that not many Members will then come on the floor here. The time will come when you will have only a little subcommittee of the Committee on Appropriations functioning here and passing bills involving hundreds of millions of dollars of expense. I shall vote against this unnecessary and wasteful expenditure of the public money.

Mr. ELLIOTT. Mr. Speaker, I yield five minutes to the gentleman from Texas [Mr. LANHAM].

The SPEAKER. The gentleman from Texas is recognized for five minutes.

Mr. LANHAM. Mr. Speaker, ours is a great country. We like to say it is the greatest country in the world; and I think it is. Ours is a great Government. We like to say it is the greatest Government in the world; and I think it is. By the organic law of our land this great Government is divided into three coordinate branches—the executive, the judicial, and the legislative.

In our estimation there is no office on earth comparable to that of the Presidency of the United States. In our judgment there is no judicial tribunal comparable to the Supreme Court of the United States. In our opinion there is no legislative organization comparable to the Congress of the United States.

If we believe in the greatness of our country and of our Government and of our organic law, we must believe that these three great branches should have the necessary physical equipment to function efficiently. What is the situation in this regard?

It seems that the President is provided with ample accommodations for his work. I have heard no complaint that the Executive offices are not sufficient for their purposes. For the executive departments we have already begun a comprehensive building program in the so-called Triangle. So the executive branch of our Government is being cared for.

We have passed to-day a bill providing for a commission for the construction of an adequate Supreme Court building upon a site recently acquired for this purpose. With reference to that bill I will say, in reply to my colleague from Texas [Mr. BLANTON], that the court is unanimously in favor of it.

Mr. BLANTON. At first there was some division of sentiment, was there not?

Mr. LANHAM. There was some division of opinion at first, largely upon sentimental grounds, but I am authorized to say that the court is now unanimous in approving the measure we have just passed. I think there is hardly a city of 150,000 people in the United States that has not a court building of more adequate quarters and better facilities than those now at the disposal of the Supreme Court of the United States, the

highest tribunal of the great judicial branch of our Government. We are now providing properly for them.

Now we come to the legislative branch. How are we, as members of it, equipped to function? My own situation is typical of the situation of practically all Members of the House who are not committee chairmen. I have no personal complaint to offer, but I make this statement as a Representative of the people trying to carry on the people's business. I have one room. It is an office; it is a filing room; it is a workshop; it is a consultation room; it is a library; it is a cloakroom; it is a lavatory; it is a storeroom. It is multum in parvo. There are three desks in this room and two typewriters going all the time. Such study as I am able to do in my office with reference to legislative questions must be done to the accompaniment of the clicking of these machines. Conferences are necessarily carried on under the same handicap. When individuals or groups come to see me at the same time about different matters of public business—and this occurs frequently in the experience of each of us—I have to ask some of them to step into the hall and walk up and down the corridor until I can hear the others. A private conversation is absolutely out of the question.

I repeat, gentlemen, that, not primarily for ourselves but for the good of the people whom we represent and the efficient handling of the legislative problems of this Government, we should have adequate quarters in which to work.

Something may be said about the expense of it. The cost of the necessary building is a matter for which, primarily, we are not responsible. A building costing much less than here provided for might serve our purposes just as well, but the governmental buildings of the National Capital are being constructed with reference to a well-considered architectural plan in order to insure a harmonious uniformity. And properly so. So the matter of the cost of the building is determined by the system which has been adopted for all Federal construction here in the District of Columbia.

Cost is a relative thing. Let us look at this prospective expenditure in its relation to other governmental expenditures. Here is an item designed to enable the legislative branch of our Government to operate efficiently.

I have heard the statement that from 75 per cent to 92 per cent of all our national expenditures have to do with wars—past, present, and prospective. I have never heard the figure set at less than 75 per cent, and I have heard it as high as 92 per cent.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. ELLIOTT. Mr. Speaker, I yield the gentleman two additional minutes.

Mr. LANHAM. In other words, less than one-fourth of all our expenditures have to do with the pursuits of peace. I must say that I have less uneasiness in my own mind about appropriations to carry on effectively the work of the United States Government in matters of peace than I have with reference to the enormous expenditures pertaining to war. Under this bill we are preparing to spend for a pursuit of peace, to carry on the people's business effectively in one of the three great coordinate branches of our Government, about one-seventh or one-eighth of the cost of a single battleship. So I say, gentlemen, that not merely for our convenience, but in behalf of the people of this country who deserve a proper opportunity to consult with their Representatives in Congress and a proper attention to matters which so vitally affect them, there is a responsibility upon us to make the legislative branch efficient by providing adequate quarters and suitable facilities for this work.

Mr. GREEN. Will the gentleman yield?

Mr. LANHAM. I yield.

Mr. GREEN. Why should we buy more land when the Government has plenty? Why should we buy all of those hotels and incur all that expense?

Mr. LANHAM. I will say in that regard that I am not particular as to where this building is located, except that it must necessarily be located in proximity to our present building. We can not put one-half of the Members of Congress in one part of the city and one-half in another. Clearly that would not be feasible. The accessibility of Members of Congress to the public and to one another and to the Capitol must be maintained. Otherwise our condition would be more chaotic than at present.

Mr. GREEN. Is there not sufficient space to erect a building on this end of that square?

Mr. LANHAM. I doubt that. I think if we should build on one part of that square and leave the other part for private construction we should be unable to get the additional space we need; and, besides, we should have something quite out of keeping with the architectural plan for the Nation's capital to which I have alluded. [Applause.]

The SPEAKER. The time of the gentleman from Texas has again expired.

Mr. ESLICK. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker and gentlemen of the House, the present bill is practically the same bill as passed by this body on the 1st day of March, 1928. If there has been any change in the building, or any reason why the cost should grow, it was not developed in the hearings. The bill that passed this body in March, 1928—H. R. 9009—called for $800,000 to buy the site and $6,500,000 to construct the office building, or a total of $7,300,000. The present bill calls for an increase of $100,000, or $900,000, to buy only a small part of the land upon which this building is to be constructed, and calls for $7,500,000 to construct the building, an increase of $1,000,000, or a total increase of $1,100,000, all without pointing out any change in the amount of land to be purchased or in the construction of the building itself.

Personally I am against this bill because I think the District of Columbia is getting more than its ratable or equitable share in the building program of the country. In the last two Congresses $120,000,000 has been appropriated for construction in the District of Columbia, while the Nation gets only $200,000,000, and this $200,000,000 is being expended in the larger cities. In six States the cities get about $118,000,000 and the smaller cities and towns get but a small part. You take districts like my own, with towns having a postal revenue of from $15,000 to $20,000 per year, and it will be 20 years under the present building program before they are reached. I think there should be a common fairness in which the country towns and smaller cities, as well as the District of Columbia and the larger cities, would be taken care of.

Judging by the passage of the former bill, this bill will pass the House.

I realize that every Member of Congress is the best judge of whether this bill should pass. I appreciate that every Member is the best witness of his own needs and his own requirements. I do not question but what there are Members of Congress who need two offices. I am in the same shape as the gentleman from Texas [Mr. LANHAM]. I have one office. I am perfectly satisfied with the one office. I can get along with that. I had rather my people back home had some of the blessings of public buildings than to have it here myself. The office here is for the benefit of the Representative, his clerical force, and the people who have business with him. The business back home is with our great constituencies, the people back there.

My friends, there is another thing I want to talk to you about just a moment which is a growing practice in the District of Columbia. I want to take up the question of the appropriation of $900,000 to buy the total privately owned property that is assessed at $545,010. The privately owned property for which this authorization is made is less than one-half the land in the two blocks in question. The Government already owns ample land to build on and then have plenty of vacant space. This authorization exceeds the assessed valuation of this privately owned property by $354,990, or 40 per cent above the assessed valuation. I understand in the District of Columbia property is assessed at its cash value. If this is true we are authorizing an appropriation of 40 per cent more than is required to buy the property at its cash value.

I further understand that in the District of Columbia when there is an authorization that means the price you are going to pay for the specific property. The value rises to the same amount authorized by Congress to be paid. The authorization becomes the fixed or market value.

Gentlemen of the House, I want to call your attention to another thing that was developed in the hearings on this bill. Mr. Lynn, the Architect of the Capitol, in discussing this matter spoke of the condemnation proceedings in respect to the Botanic Garden property. He said that the price there exceeded in one instance 573 per cent of the amount of the assessed valuation of the property. This, however, is being contested. The average above the assessed valuation was 207 per cent, and yet property in the District of Columbia is intended to be assessed upon its cash value.

The thing I especially wanted to say to the House is this: It is a wrong to the Government in this specific case and in the various cases in the District to make these authorizations above the assessed values just because it is the Government, or to make these large appropriations. There should be a law here, such as many States in the Union have, limiting the award in condemnation proceedings, providing that such awards shall not exceed the assessed valuation plus a stated per cent. In my own State of Tennessee we have such a law and it provides that it shall not exceed double the assessed valuation of

the property. In some States in the Union it is as low as 10 per cent above the assessment; that is, the assessed value plus 10 per cent.

I have never looked into the question from the Federal viewpoint, but I have had occasion to look into it from the State viewpoint, and a measure of this kind has been held constitutional in several States of the Union, and I know it has been held constitutional in my own State.

I think this is one of the cases where we are authorizing the appropriation of too much money, and when you authorize the appropriation of 40 per cent more than the assessed valuation of the property it is equivalent to saying that we are going to pay $900,000, or 40 per cent, more than the real value of the property acquired.

Mr. BLANTON. Will the gentleman yield?

Mr. ESLICK. I yield to the gentleman from Texas.

Mr. BLANTON. I predict that this is just a starter and the gentleman will find before the land is acquired, and before the building is finished, the committee will come back to Congress for more money.

Mr. ESLICK. I know that is usually the case, and I believe in this instance when you get through buying the land and constructing the office building and furnishing it, with 4 per cent upon the investment, it means probably one-half million dollars a year out of the taxpayers of the country.

For one I am against this bill. I opposed it before. I think we should go to the country with our building program, for we have appropriated a large amount of money for the District of Columbia, and I think the general program should be to take care of the country, because we have done an ample part for the District of Columbia. We could take the amount authorized by this bill and construct one hundred and eighty-eight $50,000 buildings in places throughout the country where they are badly needed, where rented buildings are costly and wholly inadequate.

Mr. BYRNS. Will the gentleman yield?

Mr. ESLICK. I yield to my colleague.

Mr. BYRNS. The gentleman has spoken of paying $900,000 for the site of this office building. My understanding is that the land to be purchased for that sum consists of less than one-half of the space that will be occupied. In other words, the Government now owns more than half of the square upon which the building is to be constructed.

Mr. ESLICK. This provides for the purchasing of the land west of Delaware Avenue not owned by the Government and also west of New Jersey Avenue not owned by the Government. The Government already owns more than half of these plots or blocks of land, and more land than is necessary for the construction of the building. The office building, as I understand, is to be constructed on a portion of the block immediately west of New Jersey Avenue, occupied by the Potomac Hotel and the Congress Hall Hotel, and the Government already owns more than half of this block, the north end nearest the Capitol.

Mr. JONES. I agree with the gentleman in his position.

Mr. BYRNS. The point I am getting at is that this $900,000, to which the gentleman refers, is intended only for the purchase of a part of the ground upon which this building is to be constructed, the Government already owning the balance.

Mr. ESLICK. Yes; it is only in part. In other words, it is all of the property owned by individuals west of Delaware Avenue and west of New Jersey Avenue, the Government owning portions of these subdivisions, amounting to more than half.

Mr. BLANTON. Will the gentleman yield?

Mr. ESLICK. Yes.

Mr. BLANTON. And what is to become of the two buildings occupied by the Geodetic Survey and the Public Health Service?

Mr. ESLICK. The act on the face of it provides full jurisdiction to take those buildings down.

Mr. BLANTON. They can be torn down and wiped out at the expense of the people.

Mr. ESLICK. Yes; at Government expense. [Applause.]

Mr. Speaker, I yield four minutes to the gentleman from Florida [Mr. GREEN].

Mr. GREEN. Mr. Speaker, it is not usually my policy to oppose appropriations for public buildings because I want my Government to make a creditable showing, but I believe the offices furnished for Members of Congress compare well with offices furnished members of other law-making bodies. However, I have not seen the quarters occupied by the foreign lawmakers.

But the thing I would like for the House to bear in mind is that the $900,000 appropriation is to purchase, as I understand it, approximately 40 per cent of the land to be occupied by the new building. At that rate this plot of land possibly would be valued at about $2,000,000, which is a rather high figure.

My colleagues, when I bear in mind the fact that less than a year ago I offered an amendment to the flood control bill providing for $10,000,000 for flood control in the Everglades of Florida and it was voted down; when I bear in mind the fact that the congressional district which I represent pays about $11,500,000 to the Federal Treasury annually, and that for four years I have been trying to get a little Federal building erected in that district at a cost of possibly $100,000, and have failed so far to get public assurance that the building will be granted, then it is impossible for me to vote for this large appropriation which is at this time not fully warranted.

If the membership of the House should be increased through reapportionment, then building could be done taking care of the addition, but it is unwise to build far in advance of necessity. I can not vote for unnecessary and extravagant appropriations when our Government is suffering under an $18,000,000,000 public debt.

My friends, we are going wild on appropriations. How many of my colleagues have better offices at home than you occupy here? How many when you retire from Congress will go back to a better equipped and larger office than you occupy here? I believe we need offices, but I would not expend this eight and a half million-dollar appropriation upon unnecessary buildings when the Government now owes $18,000,000,000; our people are taxed to pay these appropriations. I can not vote for this kind of an extravagance in view of the fact that you deny appropriations to go where the people back home actually need them. My constituents need Federal buildings, flood relief, river and harbor improvements, and other aid. Why not appropriate where and when needed?

I am willing to get along with the office space now allotted to me if you will just give necessary appropriations to my district and State of Florida, and I will be satisfied if you will do this. It is not the office you sit in that counts, my friends, it is the service you render your constituents and the Nation. [Applause.]

Mr. ELLIOTT. Mr. Speaker and gentlemen of the House of Representatives, I did not understand when I brought in this bill that I was bringing in anything of a political nature. I brought the bill in here because of the insistence of numerous Members of the House of Representatives upon both sides of the aisle who have been camping on my doorstep for the last four years asking that a building bill of this kind be brought in here so that they could vote it through and be enabled to take care of the business of their constituents for which they sent them here. [Applause.]

Now, we had three plans before the committee. One of them was a proposition to build a bird cage in the court of the present building and use up what little air and atmosphere there is in there now. That was about as foolish a proposition as could be conceived in the mind of man. [Laughter and applause.] Another proposition was to take the two ends of these two lots on either side of South Capitol Street and build a building on each one of them, with an archway over that street. The other is the proposition we have before us, which is to take all of that block on the west side of New Jersey Avenue opposite the present House Office Building, which includes the Congress Hall and Potomac Hotels, and erect thereon a modern office building. We concluded while we were at it that the proper thing to do was to take the remainder of the other lot west of South Capitol Street and have it for future use of the Government and keep anything else from getting in there.

It is necessary to take over the whole block and build a building covering the entire block if you want a building worth while. The committee has looked over this proposition and has come to the conclusion that that is the only feasible proposition that we have before us.

Now, so far as the value of these lots are concerned, it has been said that they are assessed for taxation at approximately $545,000. That is true, but it is not necessarily true that that is all that they are worth. You may go almost anywhere in the United States, look at the assessed value of a piece of property, and if you are able to buy it for less than twice the assessed value you can do better than I have ever been able to do, and it makes no difference whether it is in the District of Columbia or in any other part of the country.

There are on this lot two valuable hotels—one Congress Hall and the other the Potomac Hotel. These are paying businesses and have been for years, and if we take them over we had just as well make up our minds that we will have to pay for them. So far as I am individually concerned I have no interest in this bill, except to do my duty as chairman of the Committee on Public Buildings and Grounds.

After I heard all of these Members complain about the conditions they were working under, I made it my business to make a friendly call on a large number of Representatives to see under what conditions they are working. In almost every office I found at least two clerks with their typewriters clicking, three office desks, a lavatory, many times a number of constituents

all trying to talk to their Congressman about various matters vital to them, and many times I have noticed that the Member had to take a constituent out in the corridor to talk about matters which were more or less private.

I assert that there is not any lawyer in the country who could begin to transact his business under the conditions that you find over there in the House Office Building. This is all I care to say. Gentlemen, this is your business, not mine.

Mr. CONNERY. Mr. Speaker, will the gentleman yield?

Mr. ELLIOTT. Yes.

Mr. CONNERY. The gentleman from Tennessee [Mr. ESLICK] said the cost of this building would be $500,000 more than was provided in the previous bill.

Mr. ELLIOTT. This bill authorizes $100,000 more for the purchase of the land than the bill did that we passed heretofore, and $1,000,000 more for the construction of the building. This is the authorization, it is not the appropriation.

Mr. CONNERY. Will the gentleman make clear just why this million dollars is to be expended for the construction of the building?

Mr. ELLIOTT. I am not positive that it will be expended, but that is a matter that will be in the hands of the House Office Building Commission, and they will ascertain the amount necessary to construct a building sufficient to provide the facilities that the Members want and ask for appropriations accordingly within the limits of cost fixed in this bill.

Mr. CONNERY. I am in favor of the bill, but I wanted to find out why they need that extra million dollars.

Mr. ELLIOTT. They may possibly not need it at all.

Mr. DALLINGER. I understand that this public building commission consists of the gentleman as chairman of the committee?

Mr. ELLIOTT. Oh, no; I am not a member of that commission.

The SPEAKER. The question is on the motion of the gentleman from Indiana to suspend the rules and pass the bill as amended.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 195, noes 32.

Mr. BLANTON. Mr. Speaker, I object to the vote and make the point of order that there is no quorum present.

The SPEAKER. The count, just announced by the Chair, shows that a quorum is present.

Mr. BLANTON. Then, Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. Those in favor of taking the vote by the yeas and nays will rise and stand until counted. [After counting.] Twenty-one Members have risen, not a sufficient number, and the yeas and nays are refused.

So, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

PORTO RICAN HURRICANE RELIEF

Mr. DAVILA. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the relief of Porto Rico.

The SPEAKER. Is there objection?

There was no objection.

Mr. DAVILA. Mr. Speaker, I will briefly state that this legislative measure is the result of a personal investigation made by the chairman of the Committee on Insular Affairs of both House and Senate of the effects of the terrific hurricane which swept the island of Porto Rico last September. Although we tried to meet the situation to the best of our ability and in accordance with our resources, we have practically exhausted all our means and unless this legislation is enacted into law our farmers and laborers will face the most difficult situation that ever confronted them. If this bill is enacted into law, we will start immediately the work of rehabilitation and reconstruction in the coffee districts and will give employment to the thousands of destitute laborers who are craving for work. This is an emergency measure and as such should receive the immediate consideration of Congress. Delay in its enactment will only increase the gravity of the situation.

The population of Porto Rico is 1,500,000, being 430 per square mile, of which 70 per cent is rural, who must depend entirely upon agriculture for a livelihood.

The cyclone of September 13 brought such havoc to growing crops and agriculture that farmers do not have nor can they procure financial resources to rebuild and rehabilitate their devastated farms. Many thousands of peons are absolutely dependent upon labor on farms to care for their families, and unless landowners can procure funds to employ labor the resulting condition will be one of continuing hunger and want.

At one time, after the hurricane, the American Red Cross was giving food to 512,000 persons, and at the present time that organization is supplying food and clothing to 127,000 homeless persons.

The insular government is unable to procure the needed funds, because her borrowing capacity has been almost exhausted.

The commercial banks of Porto Rico are doing everything they can, and have borrowed from correspondent banks in the States because of insufficiency of their own deposits and capital to meet financial requirements of the island. Bills payable of commercial banks now amount to $11,000,000. It is evident that these financial institutions can not extend the long-time loans necessary to rehabilitate agriculture and furnish employment to labor.

With the population pressing upon means of subsistence and increasing at the rate of 25,000 per year, the problems of Porto Rico become each year more complicated and of greater magnitude. Those problems should be recognized as of national importance, because underlying them all is the question of human need. The resources of Porto Rico are insufficient to solve her pressing and growing problems.

The problem of overpopulation is of paramount importance to the people of Porto Rico. The Porto Rican peasant is living to-day in the same condition he lived 30 years ago before the American occupation. Porto Rico is an agricultural country. We have no industries to meet the exigencies of labor. It is true that there are three States in the Union, namely, Massachusetts, New Jersey, and Rhode Island, with a population exceeding that of Porto Rico, but these are industrial States, where laborers not only have the opportunity of employment, but derive reasonable and high wages. The problem of Porto Rico can not be solved until the standard of the peasant is raised, and this can not be done without a thorough study of their condition and the expenditure of large amounts of money. In this connection, I want to insert the following paragraphs from a recent editorial which appeared in the Porto Rico Progress, published in San Juan:

> In a few weeks Porto Rico will ask aid of Congress to help it recover from its hurricane damage.
>
> If Congress is to consider only the conditions resulting from the hurricane it should waste no time whatever in considering legislation for the island.
>
> Money will do no good—any number of millions—unless Congress realizes that Porto Rico is a social and economic problem that for the past 30 years has been solely a problem for the United States, and a problem that for 30 years has been deliberately avoided or neglected.
>
> If the United States holds Porto Rico as a duty, as the President says, what is the duty of the United States to her fellow American citizens here? How badly does the President want to preserve the high standards of living in the United States and how badly does he want those standards attained and maintained in Porto Rico?
>
> Millions of money may be appropriated for Porto Rico with scarcely more effort than that required to make the President's speech. If appropriated, every cent will be wasted, and worse than wasted, unless basic facts and conditions are studied and understood and a broad general plan developed for the physical, social, and economic rehabilitation of the largest group of American citizens anywhere outside of continental United States; rehabilitation required not because of a chance hurricane, but because of generations of malnutrition, disease, ignorance, and neglect.

The above paragraphs, written by Mr. Harwood Hull, a continental American, are not quoted by me in a sense of criticism. It is merely to call the attention of the Congress to the most vital and serious problem of Porto Rico. We are not unmindful of the benefits we have received from the American people. We deeply appreciate everything that has been done under the distressing circumstances caused by the hurricane. The approval of this resolution will undoubtedly be a great help to the Porto Rican farmers and to the laborers themselves; but let us not forget that we can not escape the responsibility of facing some day this problem of overpopulation and unemployment which constitutes in itself as great a calamity as the recent hurricane.

TREASURY AND POST OFFICE APPROPRIATION BILL—CONFERENCE REPORT

Mr. WOOD. Mr. Speaker, I present a conference report upon the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, for printing under the rules.

AIR CORPS PROMOTION LIST

Mr. JAMES. Mr. Speaker, I move to suspend the rules and pass Senate bill 3269, to provide for the advancement on the retired list of certain officers of the Army, to increase the efficiency of the Air Corps and of the Army, and for other pur-

poses, as amended, which I send to the desk and ask to have read.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of War shall cause to be prepared an Air Corps promotion list on which shall be placed the names of all officers of the Air Corps of the Regular Army below the grade of colonel. The names on this list shall be arranged in the same relative order that they now have on the Army promotion list and shall be removed from the Army promotion list, and no officer whose name appears on the original Air Corps promotion list shall be considered as having less commissioned service than any officer whose name is below his on this list. All officers commissioned in the Air Corps after the formation of the original Air Corps promotion list shall be placed thereon in accord with length of commissioned service. Any officer whose position on the Air Corps promotion list is changed by sentence of a general court-martial or by law shall be deemed to have the same commissioned service as the officer next below whom he may be placed by such change.

SEC. 2. Except as herein provided, Air Corps flying officers shall be promoted to the grade of first lieutenant when credited with 3 years' commissioned service; to the grade of captain when credited with 7 years' commissioned service; to the grade of major when credited with 12 years' commissioned service; to the grade of lieutenant colonel when credited with 20 years' commissioned service; to the grade of colonel when credited with 26 years' commissioned service. All flying officers of the Air Corps below the grade of colonel shall be promoted in the order of their standing on the Air Corps promotion list: *Provided*, That the number of Air Corps officers in the grade of colonel shall not be less than 4 per cent nor more than 6 per cent and the number in the grade of lieutenant colonel shall not be less than 5 per cent nor more than 8 per cent of the total number of officers on the Air Corps promotion list, and the aggregate number of Air Corps officers in the grades of colonel, lieutenant colonel, and major shall not be less than 26 per cent nor more than 40 per cent of the total number of officers on the Air Corps promotion list, and in so far as necessary to maintain said minimum percentage, air Corps flying officers of less than the required years of commissioned service shall be promoted to the grades of colonel, lieutenant colonel, and major, and only in so far as their promotion will not cause said maximum percentages to be exceeded shall officers who have completed the prescribed years of commissioned service be promoted to the grades of colonel, lieutenant colonel, and major. Nonflying officers of the Air Corps shall be promoted as provided for other branches of the Army.

SEC. 3. When an officer of the Air Corps has served 30 years either as an officer or soldier, he shall, if he makes application therefor to the President, be retired from active service and placed on the retired list: *Provided*, That, except in time of war, in computing the length of service for retirement, credit shall be given for one and one-half the time heretofore or hereafter actually detailed to duty involving flying, and credit shall also be given for all other time now counted toward retirement in the Army: *Provided further*, That the number of such voluntary retirements annually shall not exceed 6 per cent of the authorized strength of the Air Corps. When a flying officer of the Air Corps reaches the age of 54 years he shall, if he makes application therefor to the President, be retired from active service and placed on the retired list. Officers of the Air Corps who become physically disqualified for the performance of their duties as flying officers shall be eligible for retirement for physical disability.

SEC. 4. An officer of the Air Corps may, upon his own request, be transferred to another branch of the service, and when so transferred shall take rank and grade therein in accordance with his length of commissioned service as computed under existing laws governing the branch to which transferred.

SEC. 5. That hereafter the Chief of Staff of the Army, while holding office as such, shall have the rank and title of general, and shall receive the pay and allowances of a major general, and in addition thereto the personal money allowance prescribed by law for the officer of the Navy serving as Chief of Naval Operations. The Chief of Staff of the Army and the Chief of Naval Operations shall take rank between themselves according to dates of appointment as such.

SEC. 6. That the President is hereby authorized to place on the retired list of the Army as a major general, with the retired pay of that grade, the officer who was the first Chief of Finance of the Army, and who was placed on the retired list as a brigadier general while holding that office.

SEC. 7. That on and after the date of the passage of this act Hunter Liggett and Robert L. Bullard, major generals, United States Army, retired, shall have the rank of lieutenant general on the retired list of the United States Army, and shall receive pay and allowances determined as provided by law for other officers on the retired list.

SEC. 8. All laws or parts of laws in so far as they may be inconsistent herewith or in conflict with the provisions of this act are repealed.

The SPEAKER. Is a second demanded?

Mr. SNELL. Mr. Speaker, I do not desire to demand a second at this time, but I think some one ought to explain the bill.

Mr. BLANTON. Mr. Speaker, I demand a second, if no member of the committee does.

Mr. JAMES. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Michigan is entitled to 20 minutes and the gentleman from Texas to 20 minutes.

Mr. JAMES. Mr. Speaker, I yield 10 minutes to the gentleman from Minnesota [Mr. FURLOW].

Mr. FURLOW. Mr. Speaker, the importance of this bill can not be overly stressed. It is important because it has to do with promotion and retirement in the Air Corps. This question was gone into very fully during the last session of Congress by the Committee on Military Affairs of the House, and I am pleased to remind you that the Air Corps provisions which we are now considering were embodied in the so-called "Furlow bill" last session and passed by the unanimous vote of the Members of the House.

In order to expedite action on this measure your committee determined that it would make this bill a part of the Senate bill now before us, thereby making it possible for the Air Corps provisions to receive consideration during this session.

The necessity of Air Corps legislation has been brought to my attention very forcibly as the result of a 12,000-mile trip which I have just completed. I visited nearly every Army air field in the United States and had the privilege of meeting the majority of our officers in the Air Corps. My survey convinced me that unless something is done to correct the present situation during this short session of Congress we will find ourselves before another Congress convenes with nothing but the skeleton of our present Air Corps remaining because of resignations.

When Colonel Lindbergh was here at the air conference last week I talked with him about the Air Corps, and he was deeply concerned with its future. He gave me a statement, which appears in his own handwriting and bears his signature.

I want to read it to the Members of the House. It follows:

The Army Air Corps is facing a serious situation in regard to its commissioned personnel due to stagnation in promotion.

At present the average Army Air Corps officer is holding a command far above his rank. His prospects of promotion is discouraging, and the opportunities offered by commercial aviation are far greater than those of his Army life.

Military flying is more hazardous than commercial flying and will become more so as safety appliances are developed which can not be used in combat planes. Also the physical strain on an Army pilot in carrying out military missions is not comparable to that of commercial transportation.

It is of utmost necessity at the present time to take steps toward building up the morale of our Air Corps if we expect to maintain its past standard of efficiency.

Rank commensurate with command is of prime importance. A number of our best officers have already resigned and unless steps are taken to relieve the present situation we will lose many more in the near future.

In my opinion, a separate promotion list will accomplish much in building up an efficient Air Corps in the United States.

CHARLES A. LINDBERGH.

Colonel Lindbergh favors a separate promotion and this is provided for in this bill.

Now, why do we need a separate promotion list for the Air Corps? There are several reasons, and I desire to touch upon them briefly at this time.

On the Army promotion list there is what is known as the World War hump, and owing to the fact that during their training period the Air Corps officers averaged six months in training camp as compared with three months for officers in other branches, we find the younger Air Corps officers at the bottom of the so-called hump. The three months difference in training has been reflected by thousands of files on the promotion list.

With but one-twelfth of the officer personnel of the entire Army represented by the Air Corps, we find that 40 per cent of the casualties of the entire Army officer personnel take place during peace time within the Air Corps. Surely, a vacancy in the Air Corps should be filled by the promotion of an Air Corps officer, and this would be accomplished if we had a separate promotion list.

This Air Corps bill recognizes the degree of hazards of this particular branch of the service, and by its retirement features

it would reward long-time flying service by earlier retirement than provided for under existing laws. This retirement feature is important because it would keep our Air Corps files filled with comparatively young, active fliers all the time, and that is what the greatest per cent of our corps should be.

This bill also recognizes the justice of giving more rapid promotion during the early years of an officer's service and assures him of having rank commensurate with his command.

On the whole, I am convinced that the provisions of this bill, as we have it before us to-day—and it is identical with the original Air Corps bill which passed the House last session—will do much toward increasing efficiency of the Air Corps. I know from observation that something must be done without delay, and I feel confident that by giving our pilots this recognition which they deserve that we will keep the majority of them in the service.

In this trip which I took around the various camps I was surprised and amazed to find World-War pilots still serving as first lieutenants, charged with responsibilities normally given to captains, majors, lieutenant colonels, and even colonels.

Mr. CONNERY. Will the gentleman yield?

Mr. FURLOW. I will.

Mr. CONNERY. Would this be intended for Navy aviators?

Mr. FURLOW. No; the Military Committee is charged with legislation for the Army. Naval aviation legislation must necessarily come from the Naval Committee. I will say, however, in behalf of our naval aviators, that as far as the hazards of training and the hazards of service go, that everything I have said pertaining to Army aviators applies equally to the Navy airmen.

In the Army Air Corps, then, we find the morale low. Why? Because a first lieutenant can not look for anything better than being a captain, or maybe a major, by the time he must retire. What does this bill do? It will make it possible for a second lieutenant to become a first lieutenant in 3 years, a captain in 7 years, a major in 12 years, a lieutenant colonel in 20 years, and a colonel in 26 years. It will give this accelerated promotion to young flyers while they are giving the best years of their lives to the service of their country.

Mr. JAMES. Mr. Speaker, this bill does not apply to nonflyers?

Mr. FURLOW. It does not apply to nonflyers. It is strictly a flying bill.

The SPEAKER. The time of the gentleman from Minnesota has expired.

Mr. BLANTON. Mr. Speaker, the trouble about these bills that come from the Army and Navy is that they are technically drawn by highly technical officers in highly technical language, which practically the entire membership of the Congress in both Houses can not understand.

Mr. JAMES. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. I yield. Is not that so?

Mr. JAMES. This bill does not come from the War Department, and there was not a single word about it written from the War Department. It was drawn up by the members of our committee. [Laughter.]

Mr. BLANTON. Then the members of your committee have, under long training, qualified themselves to draw technical bills in the same technical language that the General Staff can direct and that the high naval officers can direct.

Let us see if this is not technically drawn. They have a provision here which says:

> The President of the United States is hereby authorized to place on the retired list of the Army as a major general, with the retired pay of that grade, the officer who was the first chief of finance of the Army, and who was placed on the retired list as a brigadier general while holding that office.

Is not that technical? Why do they not name him? Why did the committee leave anyone in doubt as to who he was?

Mr. JAMES. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. JAMES. That applies to General Lord.

Mr. BLANTON. Yes. Why not say "General Lord," instead of using that roundabout language?

Mr. JAMES. In similar bills introduced by Mr. BYRNS of Tennessee and Mr. Madden and others they did not recite the name.

Mr. BLANTON. As to most of these provisions that come from the Army and Navy you can not tell what they mean and what effect they will have on the Treasury of the United States. I venture to say that there are not 20 Members out of the total membership of 435 in the House who know what the effect of this bill will be to the Treasury; not over 20. But these bills come in under suspension of the rules and they are thus passed, when they can not be amended in any particular whatever, under suspension of rules.

My service in the House after 12 years is drawing to a close, and I am going to return to private life. In those 12 years, instead of playing golf, I have worked in my office. Instead of going to social affairs, I have worked in my office. Instead of having a good time, I have worked in my office. For what? I have been trying, so far as one Member can by hard work, to reduce the annual cost, the taxes of our Government, by as much as I could.

I have worked hard in trying to do it. Somebody is going to have to do work of that character hereafter and devote every bit of his time to it, if the expenses of this Government are to be curtailed. They are going to grow all the time. We are branching out. We are giving our naval officers and our Army officers and our executive officers better salaries, offices, and quarters, and we are permitting the chiefs to leave their offices two-thirds of the time, and we give them first and second and third assistants to do their work.

It is now 4.20 o'clock, and I will guarantee, if you will go to the telephone, you will not find 5 per cent of these officers in their offices now.

Mr. BRITTEN. Mr. Speaker, will the gentleman yield right there?

Mr. BLANTON. Yes.

Mr. BRITTEN. I have just come from the telephone after talking with the Judge Advocate General of the Army and his assistants, and they are having a conference just now. [Laughter.]

Mr. BLANTON. Yes; it just so happens at this moment; but to-morrow, any time after 2 o'clock, you will find them all out playing golf.

I was amused at our friend from Michigan [Mr. JAMES], who is hard working and conscientious, and I follow him frequently, but I was amused awhile ago when he told me in all sincerity his belief that we were not raising the salary of General Bullard and General Liggett. He said they would still draw the pay of major general, because, forsooth, in the law now existing there is no pay provided for any officer higher than a major general. He said we do not provide a higher salary for a lieutenant general. He really believes that they will get no increase in pay. But I want to call his attention to the fact that this bill, which came from the Senate and which his committee has amended, provided in the Senate for increased pay for two lieutenant generals, for General Bullard and General Liggett. Whenever you make them lieutenant generals, you will find in the next Congress, just as soon as it meets, when a special session is called in April, instead of taking up farm relief there will be another bill like this brought in to give them the increased pay attached to the rank of lieutenant generals. The members of the committee will say, "Here are two men who are lieutenant generals, retired, in our Army. They should be paid salaries commensurate with the dignity and honor of that position."

There will not be enough men here economizing for the people to stop that bill when it comes up for passage. It will pass with the same alacrity that the bill awhile ago was passed to spend $900,000 to tear down this splendid Congress Hall Hotel, the Potomac Hotel, the Geodetic Survey Building, and the Public Health Service Building, over here on the block adjoining the Capitol. They will be torn down, splendid buildings of great value and worth, and the taxpayers in my district and in yours will be called upon to pay the bill. You can not stop it. I can not stop this bill from passing, but to be consistent in the attitude I have taken here for 12 years—and I have followed some mighty good men along that line who used to take that position of economy here, I must register my protest. Everything I have learned about looking after bills and trying to stop bad bills and the unnecessary expenditure of money I learned—although I hate to admit it—from three Republicans. Even before I came to Congress I used to watch the RECORD. I learned it from the splendid efforts that your great Republican leader, James R. Mann, of Chicago, used to make upon this floor, and from Martin B. Madden, and from WILL WOOD. When he first came here you did not have a man who worked harder to save everything for the people, but since you Republicans have gotten into power my old friend WILL does not work at it any longer. He brings the appropriations in here and lets them go. But I learned from them. I do not pay any attention to a bill that is not reported out of a committee. It is only bills that are reported out of committees that are dangerous. I have made it a practice for 12 years, as soon as a bill is reported out of a committee and placed on

the calendar, to get it as soon as I can and study it and see what it means to the people of the country. My rule has been this: Can the people get along without it? Is this such a benefit to the people that they will need it and that they themselves would vote for? And if I did not think the people of the country wanted it, without any fear at all of becoming unpopular, I have gotten upon this floor and opposed it. I have made lots of you colleagues mad at me for opposing your bills, but I had nothing against any of you.

I have great regard for every one of you. I think the world and all of each and every one of you. I have considered it one of the splendid prerogatives and privileges of my whole life to have been associated with you for 12 years. It is something I will remember all the days of my life, when I am working just as hard for the people at home in my law office as I have been working for the people of the country in my congressional office. I will think of you frequently. I have not had anything against you personally, and as the years go on you will realize I was working from the standpoint of the people; that I was trying to benefit the country by the points of order I have made and the votes I have cast against such bills as I thought should not be enacted.

I wish it were possible to stop this bill. How do you know that the promotions you are providing for in this bill are salutary and should be made? How do you know that this technical language means what it appears to mean just from a casual reading of it. You do not know it, and I want to say to my friend, the gentleman from South Carolina [Mr. McSWAIN] that the country looks to him to stop the waste that so often comes from his committee. There is more waste that comes out of his committee than from any other committee of this House, except the Committee on Naval Affairs. There is a great burden placed upon his shoulders. I commend him for sitting around that table and looking into those bills that are sponsored by these high military officers. If he will do that, he will render this country a valuable service and save the country hundreds of millions of dollars.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. I am through, but I yield.

Mr. SCHAFER. Your friend does look into those bills very carefully. He burns the midnight oil the same as the gentleman from Texas.

Mr. BLANTON. I know he does, and I commend him for it. It is the friendship we have for one another that lets some go by. His heart is big, and they outtalk him sometimes.

Mr. BLACK of Texas. Will the gentleman yield?

Mr. BLANTON. I am through, but I yield.

Mr. BLACK of Texas. In the gentleman's time I would like to call attention to one provision in this bill which it seems to me might be a harmful one. The committee in charge of the bill urges as a reason for the bill that it is desired to keep these Air Service officers in the service, so that they will not go into civil aviation, yet the bill provides that they for retirement purposes shall be credited with one and a half times their actual service, so it is certain that by reason of this time and a half credit many of them will retire much earlier than they would otherwise retire and perhaps go into civil aviation.

Mr. BLANTON. Of course; and we lose them out of the service. In conclusion I want to say this about my good friend and colleague from Texas, EUGENE BLACK: Every man on this floor knows that there is not a more valuable man in this entire Congress, in either House, to the people than EUGENE BLACK [applause], and I am sorry we are going to lose him.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. CHINDBLOM. The Republican side with agree with you on that.

Mr. BLANTON. Yes; the Republican side will agree that there is not a man here during the last 12 years who has been more valuable to the people than EUGENE BLACK. I can not understand why the people of a district will let a man like BLACK be defeated. I do not care how efficient the new material is, I can not see for my life how they can afford to lose him. I wish that the people of EUGENE BLACK's district knew him like those of us who have served with him, then some of these days they would send him back. [Applause.]

Mr. JAMES. Mr. Speaker, may I inquire how much time the gentleman from Texas has used?

The SPEAKER. The gentleman from Texas has consumed 14 minutes.

Mr. BLANTON. Mr. Speaker, the gentleman from South Carolina wants some time. I do not know which side the gentleman is on, but if I may I yield him five minutes.

Mr. McSWAIN. Mr. Speaker, I want to say, apropos of the very high compliment that my distinguished friend from Texas has just paid me, to the effect that there is a responsibility on my shoulders in connection with legislation coming out of the Committee on Military Affairs, that I appreciate it. I am satisfied we all agree with what he said about EUGENE BLACK, and for one I am willing to say that TOM BLANTON has rendered his country good and faithful service during his 12 years in this House.

I want to say to him and through him say to you, my colleagues, as it has become somewhat personal, that I make this fight for economy in the committee, and the suggestion made by the gentleman from California [Mr. BARBOUR] to-day with regard to the requirement that the committee shall have definite specifications and estimates as to costs of construction before they come in and make a report is a fight that I made in the committee two years ago, as the gentleman from Kentucky [Mr. VINSON] remembers, and then made it in this House and on this floor in opposition to a motion to suspend the rules.

I try to go into the matters very carefully, and I want to say that after going into this bill, although my good friend who is in opposition to the bill has yielded me this time, I am in favor of what is known as the Furlow bill, for the benefit of the Air Corps, and I will tell you why. I think I can convince my friends from Texas that it is just and right.

The majority of the flying personnel, the overwhelming majority of the actual flying personnel of the Air Corps, are men who went in from civil life, not from the Regular Army, not from West Point, but went in from civil life during the war emergency and became pilots, like the gentleman from Minnesota [Mr. FURLOW] and his brother, both of whom were aces in the air service at that time. They went in as civilian pilots.

When the Army was increased by 100 per cent in 1920, these civilian fliers were invited to remain in the Army as commissioned officers, and they went in not knowing what place they would occupy on the promotion list. Many of them were up in years. They were, however, due to the arrangement of the promotion list by the War Department, put very low down on the promotion list, and some of them who were first lieutenants are to-day 42, 43, or 45 years old, and unless there is a special promotion list for the Air Corps, every time an Air Corps man goes up in the air and gets killed, his place on the promotion list will be taken by either an infantryman or an artilleryman or a cavalryman or a quartermaster officer.

There is just as much difference between the service of the ordinary Army officer on the ground and that of the Air Corps, as there is between the Army and the Navy. We recognize it is a matter of justice and of fairness that there should be one promotion list for the Navy and another promotion list for the Army generally. Now, there is just as much difference between air and land as there is between land and water, and I submit there is more difference and there is more justice and reason that there should be one promotion list and, you might say, one code of service ethics for men who go into the air, actual fliers, as there is for those who go out to sea and another one for those who stay on the land. That is the inherent logic of the situation, gentlemen. [Applause.]

Mr. CONNERY. Will the gentleman yield?

Mr. McSWAIN. Yes.

Mr. CONNERY. Does not the gentleman think, on that ground, we ought to have the men in the Navy included in this too?

Mr. McSWAIN. Well, we have got to recognize the situation as it is. We tried to have a separate air department that would include the fliers of both the Army and the Navy but we could not win out on that. We can not take ideal conditions; we can not take things like we would like to have them; we must take them as they are.

The SPEAKER. The time of the gentleman from South Carolina has expired.

Mr. BLANTON. Mr. Speaker, I yield the gentleman the other one minute in order that I may ask him a question.

Mr. McSWAIN. Certainly.

Mr. BLANTON. We have now four departments of government vieing with each other trying to have the largest air corps, have we not?

Mr. McSWAIN. Well, we have three anyway, because the Department of Commerce has not any planes. It just promotes aviation on paper. We have three anyway.

Mr. BLANTON. But the Department of Commerce makes the fourth department?

Mr. McSWAIN. Yes; but the fourth department works on paper.

Mr. BLANTON. But if we gave them the money, they would work not on paper but on something else.

Mr. McSWAIN. I have no doubt it would like to have some.

Mr. BLANTON. In the interest of economy and efficiency, why not combine all of them into one separate, effective air force; would not that save the people lots of money?

Mr. McSWAIN. It certainly would; and we fought for that two years ago, but we failed. I am willing to fight with the gentleman and any other and all other Members of the House now to put all defense activities on water, on land, and in the air under one department. [Applause.]

Mr. BRITTEN. Will the gentleman yield to me?

Mr. JAMES. I had rather not.

Mr. BRITTEN. The gentleman has plenty of time.

Mr. JAMES. I prefer not to yield further.

The SPEAKER. The question is on the motion of the gentleman from Michigan [Mr. JAMES] to suspend the rules and pass the bill.

The question was taken; and, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

HOUSE OFFICE BUILDING APPROPRIATION BILL

Mr. HARE. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. HARE. Mr. Speaker, I appreciate the statements that have been made in support of this bill and the necessity for additional office space, and I realize that there is some necessity for additional office room that Members might be able to discharge the duties in connection with their positions with greater efficiency, but in view of other conditions and circumstances which deserve the attention of Congress at this time, I can not give my support to the proposed bill. For example, I have thousands of people in my district who are suffering from one of the greatest crop failures in history, and through me, their Representative, they are asking that this Government come to their assistance and lend them such aid as will enable them to live and make a crop this coming year.

They are in need—many of them in distress—and I, for one, think that the erection of this building should be postponed and the money used to relieve the distressed conditions in the coastal counties of South Carolina, Georgia, and Florida caused by the excessive rains and storms last September.

Another reason why I shall vote against this bill is that for two years or more I have been trying to secure appropriations sufficient to construct buildings in my district to furnish the people with better mail facilities and to erect a building in which the Federal Government, or its officials, may hold court and have a place to keep the records of the court. As it is, the Federal court has no place of its own to hold court. It is entirely dependent upon the facilities provided for by the county or State. For the past several years the Federal court has convened at the regularly appointed times at Aiken, S. C., and the court has no place for conducting its trials, no place for keeping the records of the court, and no place for accommodating jurors except that provided for by Aiken County. The judges, district attorneys, and others familiar with the conditions have been insisting that better facilities be provided for carrying on the business of the Government in that section, and I have been pleading here for the past three years for an appropriation sufficient to provide these facilities, and they have all been refused. I shall therefore cast my vote in opposition to this bill.

THE HAUGEN OLEOMARGARINE BILL

Mr. O'CONNOR of Louisiana. Mr. Speaker, I ask unanimous consent to extend my remarks on the bills H. R. 10958 and H. R. 14677.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. O'CONNOR of Louisiana. Mr. Speaker, the bill H. R. 10958, known as the Haugen oleomargarine bill, is a bill fostered and supported mainly by the National Dairy Union and the Institute of Margarine Manufacturers. It is aimed to destroy by taxing as artificially colored olemargarine certain vegetable-oil cooking compounds. These products are made of pure nut oils, sold only in 1-pound cartons, plainly labeled as to what they are, and for what they are intended to be used. No one could mistake them for oleomargarine or butter and the United States courts have held as a matter of fact that they are not made in imitation or semblance of butter and hence not subject to the oleomargarine laws. Regardless of this, the bill seeks to make these goods taxable.

I opposed the passage of this bill for reasons hereafter set out and explained.

The amendment is not limited to food products.

The original oleomargarine law adopted in 1886 was designed to prevent the sale of oleomargarine, a new product at that time, as or for butter and set out the test for oleomargarine; that is, that it was any mixture of certain named substances, if—

made in imitation or semblance of butter, or when so made calculated or intended to be sold as butter or for butter.

It provided for inspection of factories and made identification positive through branding and stamping provisions. The proposed amendment adds to the number of substances named, for instance, including "fish oils or fats," and sets up a third test which in no way limits the substance to articles made to imitate or resemble butter, or even to food products, but makes the test any mixture of the ingredients named, adding the general terms "fish oils or fats" and "vegetable oils," if—

churned, emulsified, or mixed in cream, milk, water, or other liquid, and containing moisture in excess of 1 per cent.

This provision, absolutely foreign to the intent or purpose of the law, would render liable to tax such articles as soap, cheese, cod-liver oil, and every other combination of the common animal, vegetable, or fish fats, providing only that it contained moisture of more than 1 per cent.

The law itself is objectionable in that it taxes products made yellow by harmless artificial coloration, but not products made yellow by natural ingredients to escape taxation.

The original oleomargarine law (act of August 2, 1886) provided that all oleomargarine should be taxed 2 cents per pound. This was reasonably fair, provided for inspection costs, an additional revenue, and allowed a great industry to grow and prosper. A pure, healthful, attractive food product could be delivered to the consumer at approximately 20 cents per pound. The amendment of May 9, 1902, kept the same tests as the original act, but provided a tax of 10 cents per pound (approximately one-half the value of the product), with the proviso, however, that if it were—

free from artificial coloration that causes it to look like butter of any shade of yellow, said tax shall be one-fourth of 1 cent per pound.

This provision was not aimed to tax, but was meant to destroy any food product of a yellow color made to imitate butter.

The law is avoided, however, by the manufacture and sale annually of millions of pounds of oleomargarine made yellow by the use of natural yellow animal fats and cottonseed oil refined to a dark hue. If the law endeavors to eliminate color, it should eliminate color secured by natural as well as artificial means. The present law allows the big packers who produce, hoard, and monopolize the yellow animal oils to add to their profits the additional 9¾ cents per pound levied upon competitors who can not secure the yellow ingredients and are forced to resort to artificial coloration.

The levy of 10 cents per pound upon a 20-cent article is not a tax, but a penalty, and as such is not within the powers of Congress to impose. There is a very grave question as to the constitutionality of any law which in the name of a tax places a levy of 50 per cent on any product or industry. Recent decisions of the United States Supreme Court have repeatedly condemned such attempts.

Among these we find the unsuccessful attempts of Congress to tax out of existence child labor, grain futures, and the manufacture and sale of intoxicating liquor. Your attention is called to the following recent decisions:

Hill *v.* Wallace, 259 U. S. 44; Trussler *v.* Crooks, 269 U. S. 475; Bailey *v.* Drexel Furniture Co., 259 U. S. 20; and Lippe *v.* Lederer, 259 U. S. 557.

The time when a product or industry may be destroyed by a process called taxation is forever past.

The proposed amendment is an attempt to regulate an industry over which Congress has no control. The regulation of the business of manufacturing entirely within a State is and always has been one of the powers of the States, and is not one of the powers granted to the National Government. Not within the pages or provisions of this act are the words "interstate commerce" used. Yet the title provides, "and regulating the manufacture, sale, importation, and exportation of oleomargarine." Such regulation was never one of the powers granted to Congress and should not now be assumed. Such an attempt was particularly condemned in the decisions cited above.

The amendment is in favor of special interests and detrimental to the public in general. A study of the committee hearings and report discloses that this bill was fostered by one of the most powerful combinations in the United States—the dairy and the packing interests, and directed particularly against healthful products produced entirely from vegetable oils.

I am opposed to using the taxing power of the Government for the destruction of any legitimate industry of our country. I am opposed to adding additional taxes to food products which will further burden the consuming public. I am opposed to increasing the burden upon the public merely because the great dairy interests and packing interests are in combination and demanding the increase of taxes upon certain products that they may the better drive them out of business. This is not the time for further taxing the people for the benefit of special interests. Let us rather include oleomargarine and all similar products when colored by "any ingredients" under a bill prescribing a 2 cents per pound tax, which will accomplish more and in a better way than the proposed Haugen oleomargarine bill. I am for the consumers and the reduction of the cost of living.

GOOD-WILL VOYAGE OF PRESIDENT-ELECT HOOVER A NATIONAL ASSET

Mr. O'CONNOR of Louisiana. Mr. Speaker, the good-will voyage of President-elect Hoover is a national asset. It is more than that. It is an international asset. Those that went in search of the golden fleece brought back with them something more valuable—they brought back knowledge. Jason and his Argonauts cemented ties that advanced civilization, and his fabulous adventures and exploits made for a tradition that enriched the classic literature of the world. But the argosy will be looked upon as a small contribution to the big work of the earth when compared with the wonders that will be colored where they are not created by the great journey of an American master builder of inspiring hopes and splendid aspirations. It will not be long now before the highway linking the Americas will be a realization.

The bill, starting the project that will bind the western nations, will undoubtedly be signed by the President, who sees in it an instrumentality for peace and trade, for it is "by trade that the peace of the earth will be made." The dream began long ago when the illustrious statesman, James G. Blaine, prepared a similar project in the form of a Pan American railroad. The highway which apparently has the indorsement of President Coolidge and President-elect Hoover will be the source of unimaginable wealth. Nations that are now separated will be brought closer together. Along this highway there will be a constant interchange of ideas, as well as interchange of commerce. It has been frequently said that if there had been railroads running north and south as there are to-day, there would have been no Civil War. Good roads make for the peace of the world. Build them. They yield in our own national roads and will yield in this highway far greater results than can be secured by Army or Navy, great and splendid as both are. And with the development that must inevitably flow from this giant road will come in accordance with the law of an expanding commerce, a tremendous growth in our shipping, for it will take ten times the number of "riders to the sea" as now cross the Spanish Main to transport the fabrications which the United States will exchange for the raw products of Central and South America.

This trip, or argosy, must be kept permanently before the minds of the world. How can this be done? By advertising it through the New Orleans International Trade Exhibition in the manner which I will gladly set forth by reprinting a bill introduced by me in hopes of securing such a laudable purpose, for it is, indeed, "a consummation devoutly to be wished." Do not let the vision pass away. Do not let the dream vanish. Follow the gleam. It is the seers that look with prophetic eye into the future and see the glories of the coming day. It is great, tall, sun-crowned men like Hoover who see the promised land long in advance of their countrymen. A few great souls come out in each generation and march as torch bearers in the vanguard of civilization. Holding aloft the blazing flame, they cry "Onward" to the throng that follow them. They see from afar the land flowing with milk and honey; a land made smiling, contented, and peaceful by good roads and its offspring, prosperity—a land "that lies deep-meadowed, happy, fair with orchard and bowery hollows, crowned with summer sea." Such are the music makers of the world, of whom it is written:

For we in the ages lying, in the buried past of the earth,
Built Nineveh with our sighing and Babel itself with our mirth;
And overthrew them with prophesying to the Old of the New World's worth,
For each age is a dream that is dying, or one that is coming to birth.

Read this bill "to provide for maintaining, promoting, and advertising the International Trade Exhibition," and which, if enacted into law, will keep alive a memory that has made for the betterment of the Americas:

Whereas the President elect is presently on a journey and mission of good will in order to cement finer, nobler, and more enduring relations among the peoples of our country and those who live to the south of us in Mexico, Central America, and South America, as well as in the islands of the Gulf and Caribbean Sea, all of whom will feel and reflect the generous motives of a great American who believes that the inhabitants of the Western Hemisphere should dwell in amity, accord, understanding, and fraternal affection; and

Whereas the Monroe doctrine will take on a more comprehensive significance and be seen as a protecting shield in a larger and fuller sense and be accepted with a more appreciative understanding of its continental and democratic purpose as a result of this historic visit; and

Whereas the good will engendered may be secured and made permanent and a greater field of enterprise developed by maintaining an agency already established and recognized by our Government, known as the International Trade Exhibition, a nonprofit domestic corporation formed for the purpose of fostering better trade relations between the people of the United States and of foreign nations by exhibiting fabricated and raw products of the United States and similar products of foreign countries; and

Whereas it is desirable that the magnificent effects of this epochal journey, approved unstintedly and enthusiastically by the people of the United States, should not fade from our view but remain permanently in the minds of our people; and

Whereas it is the sense of Congress that the good-will trip of the President elect be logically sustained and supported and its beneficial results be made permanently productive of closer bonds through advertising it and the New Orleans Trade Exhibition appropriately in the leading newspapers and magazines of the world and in any other manner that the board of directors may deem consistent with this great chapter in our history: Therefore

Be it enacted, etc., That for the purpose of providing the corporation known as the International Trade Exhibition with funds for use in maintaining, promoting, and advertising the permanent trade exposition at New Orleans, La., inaugurated on September 15, 1925, there is hereby authorized to be appropriated a sum not in excess of $500,000. Such sum when appropriated may be expended for such purposes by the corporation. All expenditures shall be allowed and paid upon the presentation of itemized vouchers therefor approved by the board of directors and signed by the president of such corporation.

FARM RELIEF

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to extend my remarks by printing in the RECORD an address I delivered over the radio on the 8th of this month.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LANKFORD. Mr. Speaker, under leave to extend my remarks in the RECORD I include an address delivered by me over the radio on December 8, 1928, as follows:

Ladies and gentlemen of the radio audience, during the last decade much has been said about farm relief and yet no real farm relief bill has been passed by Congress, and I very much fear none will be passed in the near future, if ever. Many, many times it has seemed that Congress would surely pass a farm relief bill in just a little while and yet nothing of real value has been done. Farm relief has been talked and promised in season and out of season, in Congress and out of Congress. Especially during campaign years, everywhere and at all times there has been a surfeit of farm relief talk.

In most instances we have heard only words, words, words. Of what value is the promise of a candidate that, if elected, he will work for farm relief? What does any particular candidate or other individual mean when he says he favors farm relief? No one but the candidate knows what he means and in most cases he doesn't know himself.

We are all in favor of farm relief, but each individual favors his or her own particular kind of farm relief. Probably every Member of Congress would, if necessary, honestly make a campaign pledge in favor of farm relief. Practically every bill introduced in Congress can be urged as a measure in behalf of the farmer. A high tariff is praised as a form of farm relief, and its repeal is urged as farm relief.

The antiprohibitionists urge the open barroom as farm relief. They say, "Give us more open barrooms. Sell more corn liquor. Use more corn to make liquor. Increase the price of corn and help the farmer." The words "farm relief" can be made to mean so many things until, because of their indefiniteness, they have practically lost all meaning. For this reason we can not attach any importance to anyone's promise of farm relief until his or her plan of farm relief is fully set forth and explained.

What does farm relief mean? Sunshine is farm relief. Rain is farm relief in dry weather. Moonshine at night is farm relief. I refer to the kind of moonshine that comes down from overhead. Good roads may be classed as farm relief. In fact, almost everything may be classed as farm relief by its advocates.

We have heard farm relief talked on every hand and by everybody and yet no real farm relief has resulted. The farmers have been on tiptoes of expectancy these many years, while farm relief, like a rainbow, is apparently just ahead.

The much talk about farm relief reminds me of the city fellow who bought a farm and went to feed his geese on corn shucks. Some one asked him if the geese ate the shucks and he said, "No; but I left them talking about it." It is time to quit talking about farm relief and pass a farm relief bill which will raise the farmers to the level occupied by other businesses and enterprises. I know there are those who say that the farmer must solve his own problems and that he should expect no help from Congress. I sometimes doubt Congress ever doing anything for him. However, I am convinced that Congress could, if it would, pass a real farm relief act. By real farm relief I mean governmental aid which will enable the farmers to properly organize and by that proper organization to name within reasonable limits the selling price of their farm products.

All the lawmakers from the beginning of time to the present have not enacted and put into operation any such an act, and yet I firmly believe it can be done. Such an act would be passed at once if there were enough people in favor of real farm relief. We have too many who wish to exploit the farmer rather than help him. Too many do not want him to get relief if it interferes in any way with the unconscionable profits that are squeezed from the farmers' products. Too many want farm relief which will furnish more jobs for those who wish to run the farmers' affairs. Too many only want to help the farmer produce more abundantly, but do not want to help him sell to a better advantage. They want to keep the farmer working, not for himself but for the profiteers and speculators. They do not want the farmer to die, but they are not willing to help him live like other folks, if by so doing he deprives them of the alleged right to plunder him.

Practically all the big appropriations made by the States and by Congress are to help the farmer produce, but not to help him sell what he produces. Everybody wants the farmer to toil and produce, but not enough are anxious to help him to sell to a better advantage. Real farm relief would help both the producer and the consumer by elimination of the unnecessary middlemen, the common enemy of both producer and consumer.

Just here let me say that Congress could render a real service to both producer and consumer by passage of an act providing for experimentation in the organization of producers, and consumers' clubs and in the direct sale of farm food products from the producers' to the consumers' clubs. I am thoroughly convinced that there can be worked out a system whereby certain food articles can be sold directly from the producer to the consumer at a less price to the consumer for fresher and better food and at a better price to the producer.

There can also be evolved an extension of the parcel-post system for the handling of large quantities of farm food products, put up in identical packages for delivery directly from producer to consumer, so as to enable the Post Office Department to give a greatly reduced rate for large quantities to be delivered over a specific route at regular intervals of time to a list or club of consumers. These plans, if put into effect, would be real farm relief and also relief for the consumers.

Time will not permit a fuller discussion of these suggestions at this time. I have introduced bills along these lines. I wish to discuss very briefly what to my mind is a good farm-relief plan, in so far as certain basic agricultural commodities are concerned.

There can be no real farm relief in so far as cotton, corn, tobacco, wheat, and so forth, are concerned without price elevation and stabilization, and there can be no effective permanent price elevation and control without an effective control of production. In order to accomplish these results there must be effective organization of the farmers.

The farmers can and will organize if enough inducement is given. If they will only organize, and if they are given sufficient financial assistance, they can control production and thus control within reasonable limits the prices of farm products. Then it occurs to me that a real farm relief bill would provide that the Government render the necessary financial assistance to the farmers of the Nation, provided the farmers organize and properly control their production and marketing.

If the farmers did their part, the Government agency would do its part and good prices for farm products would result. What could be fairer? I have introduced a farm relief bill along this line. It goes into details as to methods for organizing the farmers and the duties of all parties concerned after organization is perfected. In further explanation of my bill, I now repeat what I have heretofore said on several occasions concerning it:

The bill is patterned after the War Finance Corporation act, the first sections being identical with that act except that the bill proposes to create the farmers' finance corporation rather than the War Finance Corporation. This corporation is to be authorized to make loans through the banks of the Nation, much the same as the War Finance Corporation, directly to the producers of basic agricultural commodities. The loans are to bear 4 per cent interest, be made for the full amount of the average price of the commodity for the last 10 years, with the commodity as the sole and only collateral, and without any right on the part of the farmers' finance corporation to collect any amount of the loan not repaid by the sale of the commodity. Thus the farmer will in effect be receiving as a part of the sale price of his commodity an amount equal to the average price for which he usually sells the commodity, thereby establishing the average price of the commodity as the minimum price of the same.

It takes two to make a contract, and no one could expect a Government-owned corporation to be required by Congress to render so great a benefit to the farmers without them agreeing to do something on their part to make the corporation secure in the loans made. There should be and must be a mutality of contract, with a good and sufficient consideration flowing and to flow between the farmers, the banks through which they are to get their loans, and the farmers' finance corporation.

Therefore, the bill provides that before any of the loans mentioned are made, farmers planting 75 per cent of the acreage of cotton, for instance, grown in the United States shall have signed and abided by contracts with each other, with their banks, and with the corporation, agreeing and obligating themselves that the cotton advisory council be authorized to control within reasonable limits the acreage planted so as to hold production within reasonable bounds and that the farmer will not sell any of the particular basic commodity without express authority from the advisory council. Briefly stated, by my plan Congress would simply propose to the farmers that if they would by mutual contracts control their production and marketing, then the farmers' finance corporation would by loans enable the farmers to name within reason the selling price of the products of their own toil.

The farmer would be required to hold his product off the market until it could be sold for enough to repay the loan, all charges such as storage, insurance, interest, etc., and such an additional amount to the farmer as would remain from the sale of the commodity at a fair price. The farmer would be able to hold his product, for he could borrow at a very low rate of interest the reasonable value of his product. The farmer would contract to curtail his production, providing his friends decided it best for him to do so, on condition that all farmers make a similar would contract to curtail his production, providing his friends decided it best for him to do so, on condition that all farmers make a similar reduction and provided he received more for the lesser amount produced than he would if he produced without limit. My bill provides simply that the Government make an offer to the farmers to help them solve their great farm problem, provided the farmers contract to control the great overproduction and surplus menace.

All other farm-relief bills are either silent as to the all-important factor of production control or seek through penalties or other equally vicious methods to control production. This plan seeks to control production and marketing by the voluntary act of the farmer entered into as a part and parcel of the farm-relief scheme itself. All other bills dodge to a great extent this vital feature of the surplus-production control. My bill recognizes this as the heart of the farm-relief plan, and deals with it in a way that must be effective if operation is secured under the scheme. There can be no effective farm relief without effective production and marketing control. I repeat what I have said before:

Just as surely as we elevate prices without some sort of control of production, just so surely will the farmers themselves plant more corn and more cotton and more wheat and produce more and bring about the greater production. In other words, any bill which fails to have within it a proper control of production has failure written on its pages.

In conclusion let me say that in my humble judgment my bill would put the control of the farmer's great problem in the hands of his friends, not his enemies; would help the farmer directly and not indirectly; provide a complete solution of the overproduction problem; would enable the farmer within reasonable bounds to name his own price for his commodity; and would put him for the first time on a parity with other enterprises and industries.

Ladies and gentlemen of the radio audience, I thank you. Good night.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent to have until Wednesday next until 12 o'clock midnight to file a minority report on Senate Joint Resolution 167.

The SPEAKER. The gentleman from New York asks unanimous consent for leave to file a minority report on Senate Joint Resolution 167, up to 12 o'clock midnight on Wednesday. Is there objection?

There was no objection.

LEAVE OF ABSENCE

Leave of absence was granted as follows:

To Mr. BOHN, at the request of Mr. MAPES, indefinitely, on account of illness.

To Mr. PARKS, at the request of Mr. RAGON, indefinitely, on account of illness.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14801) entitled

"An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes."

BILL PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President, for his approval, a bill of the House of the following title:

H. R. 13990. An act to authorize the President to present the distinguished flying cross to Orville Wright and to Wilbur Wright, deceased.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 40 minutes p. m.) the House adjourned until to-morrow, Tuesday, December 18, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Tuesday, December 18, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON AGRICULTURE

(10 a. m.)

To amend the packers and stockyards act, 1921 (H. R. 13596).

COMMITTEE ON INDIAN AFFAIRS

(10.30 a. m.)

A meeting of the subcommittee to consider a bill for the relief of J. F. McMurray (H. R. 10741).

COMMITTEE ON WORLD WAR VETERANS' LEGISLATION

(10.30 a. m.)

To provide for the establishment of a commissioned medical service in the United States Veterans' Bureau (H. R. 12627).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

690. A communication from the President of the United States, transmitting deficiency estimate of appropriation for the Treasury Department for the fiscal year 1928, $606.46, and supplemental estimates for the fiscal year 1929, $311,500; in all, $312,106.46 (H. Doc. No. 479); to the Committee on Appropriations and ordered to be printed.

691. A communication from the President of the United States, transmitting deficiency estimates of appropriations for the Department of State for the fiscal years 1927 and 1928 amounting to $6,994.85, and supplemental estimates of appropriations for the fiscal year 1929 amounting to $795,119.50; in all, $802,114.35 (H. Doc. No. 480); to the Committee on Appropriations and ordered to be printed.

692. A letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Middle Creek and Empire Cut in the vicinity of Henning Tract and Mildred Island, San Joaquin County, Calif. (H. Doc. No. 481); to the Committee on Rivers and Harbors and ordered to be printed.

693. A letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Jekyl and St. Simon Island, Ga., with a view to determining the cause of erosions from said islands, the effects of said erosions on the shoaling of dredged channels leading to Brunswick, and with a view to presenting a plan for the prevention of said erosions; to the Committee on Rivers and Harbors.

694. A letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Tybee Island, Ga., with a view to determining the cause of the erosions from said island, the effect of said erosions on the shoaling of dredged channels leading to Savannah, and with a view to presenting a plan for the prevention of said erosions; to the Committee on Rivers and Harbors.

695. A letter from the Acting Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Manasquan River and Inlet, N. J. (H. Doc. No. 482); to the Committee on Rivers and Harbors and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BEGG: A bill (H. R. 15464) to provide for the retirement of certain employees of the legislative branch of the Government; to the Committee on the Civil Service.

By Mr. WAINWRIGHT: A bill (H. R. 15465) to authorize the erection of a suitable statue of Maj. Gen. George W. Goethals within the Canal Zone; to the Committee on the Library.

By Mr. WINTER: A bill (H. R. 15466) to amend section 2455 of the Revised Statutes of the United States, as amended, relating to isolated tracts of public land; to the Committee on the Public Lands.

By Mr. FISH: A bill (H. R. 15467) to fix a minimum compensation of certain employees of the United States; to the Committee on the Civil Service.

By Mr. ELLIOTT: A bill (H. R. 15468) to repeal the provisions of law authorizing the Secretary of the Treasury to acquire a site and building for the United States subtreasury and other governmental offices at New Orleans, La.; to the Committee on Public Buildings and Grounds.

By Mr. O'CONNOR of Louisiana: A bill (H. R. 15469) to recognize commissioned services as active commissioned service while on the retired list in determining rights of officers of the Regular Army; to the Committee on Military Affairs.

By Mr. HULL of Tennessee: A bill (H. R. 15470) granting the consent of Congress to the Highway Department of the State of Tennessee to construct a bridge across the Cumberland River in the vicinity of Harts Ferry, Trousdale County, Tenn.; to the Committee on Interstate and Foreign Commerce.

By Mr. KEMP: A bill (H. R. 15471) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Baton Rouge, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. THATCHER: A bill (H. R. 15472) to authorize the Secretary of War to lend War Department equipment for use at the eleventh national convention of the American Legion; to the Committee on Military Affairs.

By Mr. BEERS: A bill (H. R. 15473) proposing a location at Buena Vista, Pa., for a summer residence for the President of the United States; to the Committee on Public Buildings and Grounds.

By Mr. SIROVICH: A bill (H. R. 15474) to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services," and the Welch Act approved May 28, 1928, in amendment thereof; to the Committee on the Civil Service.

By Mr. SMITH: A bill (H. R. 15475) to establish the Grand Teton National Park in the State of Wyoming, to revise the boundary of the Yellowstone National Park in the States of Montana, Wyoming, and Idaho, and for other purposes; to the Committee on the Public Lands.

By Mr. COLTON: Joint resolution (H. J. Res. 356) to authorize the exchange of certain public lands in the State of Utah, and for other purposes; to the Committee on the Public Lands.

By Mr. WILLIAMSON: Joint resolution (H. J. Res. 357) entitling all employees of the United States Government in the District of Columbia to pay for Monday, December 24, 1928, the same as any other holiday; to the Committee on Expenditures in the Executive Departments.

By Mr. WINTER: Joint resolution (H. J. Res. 358) proposing an amendment to the Constitution providing for the apportionment of the Representatives and direct taxes among the several States; to the Committee on the Judiciary.

By Mr. BLAND: Concurrent resolution (H. Con. Res. 46) amending section 6 of the House concurrent resolution establishing the United States Yorktown Sesquicentennial Commission; to the Committee on the Library.

By Mr. FISH: Resolution (H. Res. 266) providing for an investigation into old-age pensions; to the Committee on Rules.

By Mr. GILBERT: Resolution (H. Res. 267) to allow expenses in the investigation of the government of the District of Columbia; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ARNOLD: A bill (H. R. 15476) granting a pension to Sarah V. Sanders; to the Committee on Invalid Pensions.

By Mr. AYRES: A bill (H. R. 15477) granting an increase of pension to Sarah F. McKee; to the Committee on Pensions.

By Mr. BOYLAN: A bill (H. R. 15478) for the relief of John D. O'Connell, first lieutenant, Quartermaster Corps; to the Committee on Military Affairs.

By Mr. BRAND of Ohio: A bill (H. R. 15479) granting an increase of pension to Margaret E. Reid; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15480) granting an increase of pension to Mary L. Cleaveland; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15481) granting a pension to Ella P. Neeld; to the Committee on Invalid Pensions.

By Mr. BURDICK: A bill (H. R. 15482) providing for the examination and survey of the east harbor at Block Island, R. I.; to the Committee on Rivers and Harbors.

By Mr. COCHRAN of Missouri: A bill (H. R. 15483) granting an increase of pension to Mathilda F. McLard; to the Committee on Pensions.

By Mr. DEAL: A bill (H. R. 15484) to extend the benefits of the employees' compensation act of September 7, 1916, to Howard Lewter; to the Committee on Claims.

By Mr. EVANS of California: A bill (H. R. 15485) granting a pension to Ida M. Uline; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15486) granting an increase of pension to Eliza A. Stukey; to the Committee on Invalid Pensions.

By Mr. ROY G. FITZGERALD: A bill (H. R. 15487) granting a pension to Charles Odell; to the Committee on Pensions.

By Mr. FITZPATRICK: A bill (H. R. 15488) granting a pension to William Nussbaum; to the Committee on Invalid Pensions.

By Mr. GARDNER of Indiana: A bill (H. R. 15489) for the relief of Leonard T. Newton, pharmacist mate, first class, United States Navy; to the Committee on Naval Affairs.

By Mr. GIFFORD: A bill (H. R. 15490) granting a pension to Sarah A. Varley; to the Committee on Pensions.

Also, a bill (H. R. 15491) granting an increase of pension to Abbie D. Shaw; to the Committee on Invalid Pensions.

By Mr. GLYNN: A bill (H. R. 15492) for the relief of John P. Bushnell; to the Committee on Claims.

By Mr. HALL of North Dakota: A bill (H. R. 15493) for the relief of George W. Posey; to the Committee on Military Affairs.

By Mr. HASTINGS: A bill (H. R. 15494) for the relief of Frank J. Boudinot; to the Committee on Indian Affairs.

By Mr. HOWARD of Oklahoma: A bill (H. R. 15495) granting a pension to John M. Leslie (or Lessley); to the Committee on Invalid Pensions.

By Mr. HUGHES: A bill (H. R. 15496) granting an increase of pension to Sarah A. Woodrun; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15497) granting an increase of pension to Margaret Roush; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15498) granting a pension to Elizabeth Langery; to the Committee on Invalid Pensions.

By Mr. IRWIN: A bill (H. R. 15499) granting a pension to Christine Schmale; to the Committee on Invalid Pensions.

By Mr. KIESS: A bill (H. R. 15500) granting an increase of pension to Carrie A. Kirtland; to the Committee on Invalid Pensions.

By Mr. McLEOD: A bill (H. R. 15501) granting a pension to Phebe A. Hereld; to the Committee on Invalid Pensions.

By Mr. McSWEENEY: A bill (H. R. 15502) granting a pension to Effie Davis; to the Committee on Invalid Pensions.

By Mr. MURPHY: A bill (H. R. 15503) granting a pension to Emma C. Fryer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15504) granting an increase of pension to Albert McAllister; to the Committee on Pensions.

By Mr. PARKER: A bill (H. R. 15505) granting a pension to Emma Magee; to the Committee on Invalid Pensions.

By Mr. REED of New York: A bill (H. R. 15506) granting a pension to Elizabeth Anderson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15507) granting a pension to Mattie Beckwith; to the Committee on Invalid Pensions.

By Mrs. ROGERS: A bill (H. R. 15508) granting a pension to Hulda Marshall; to the Committee on Invalid Pensions.

By Mr. SANDERS of New York: A bill (H. R. 15509) granting a pension to Blanche E. Mullen; to the Committee on Invalid Pensions.

By Mr. WHITE of Colorado: A bill (H. R. 15510) authorizing the promotion on the retired list of the Navy of Stuart L. Johnson, ensign; to the Committee on Naval Affairs.

Also, a bill (H. R. 15511) granting an increase of pension to Margaret C. Donovan; to the Committee on Pensions.

By Mr. WHITE of Maine: A bill (H. R. 15512) granting a pension to Emma R. Daggett; to the Committee on Invalid Pensions.

By Mr. WYANT: A bill (H. R. 15513) granting a pension to Susan Enos; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15514) granting a pension to Emma H. Woolsey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15515) granting a pension to Victoria Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15516) granting a pension to Lillie M. Humphreys; to the Committee on Invalid Pensions.

By Mr. ZIHLMAN: A bill (H. R. 15517) to provide for the making of an examination and survey of Conduit Road, and for other purposes; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

8016. Petition of Lucian Mantell, of 164 East One hundred and twenty-seventh Street, New York, N. Y., transmitting a copy of the American eternal universal peace treaty; to the Committee on Foreign Affairs.

8017. By Mr. BARBOUR: Letter of Visalia Klavern, Ku-Klux Klan, Visalia, Calif., urging passage of Box bill (H. R. 6465), which would place immigration from Mexico upon a quota basis; to the Committee on Immigration and Naturalization.

8018. By Mr. CRAIL: Petition of Los Angeles County Grand Jury for the year 1928, favoring legislation restricting Mexican immigration; to the Committee on Immigration and Naturalization.

8019. Also, petition of Los Angeles Post No. 8, the American Legion, Los Angeles, Calif., favoring legislation providing for additional hospital facilities at the Soldiers' Home, Pacific Branch, Los Angeles County, Calif.; to the Committee on Military Affairs.

8020. Also, petition of Leonard Wood Post No. 125, the American Legion, Los Angeles, Calif., favoring additional hospital facilities at the Soldiers' Home, Pacific Branch, Los Angeles County, Calif.; to the Committee on Military Affairs.

8021. By Mr. GARBER: Petition of the letter carriers of the northeastern district of the National Association of Letter Carriers of Oklahoma, urging support of the Dale-Lehlbach bill (S. 1727); to the Committee on the Civil Service.

8022. Also, petition of the letter carriers of the northeastern district of the National Association of Letter Carriers of Oklahoma, urging support of the Mead-La Follette bill (S. 3281, H. R. 9058); to the Committee on the Post Office and Post Roads.

8023. Also, petition of Owen Black, of Lawton, Okla., urging opposition to pending legislation to provide changes in the present promotion list of the Army; to the Committee on Military Affairs.

8024. Also, letter from W. G. Torbis, Oklahoma City, Okla., urging support of House Joint Resolution 303, amending the Hoch-Smith resolution; to the Committee on Interstate and Foreign Commerce.

8025. By Mr. McSWEENEY: Paper in support of House bill 15243, granting a pension to Emmor Burris; to the Committee on Invalid Pensions.

8026. Also, papers in support of House bill 15444, granting a pension to John G. Hall; to the Committee on Invalid Pensions.

8027. By Mr. QUAYLE: Petition of the Society of Colonial Descendants of America, strongly supporting the naval increase bill (H. R. 11526); to the Committee on Naval Affairs.

8028. Also, petition of George N. Murdock, of Chicago, Ill., opposing the passage of the Haugen bill (H. R. 10958) purporting to amend the definition of oleomargarine; to the Committee on Agriculture.

8029. Also, petition of the Cigarmakers International Union, No. 87, of Brooklyn and Queens, opposing the passage of the Cuban parcel post bill (H. R. 9195); to the Committee on Ways and Means.

8030. Also, petition of Dewey Congressional Medal Men's Association, of San Francisco, Calif., favoring the passage of Senate bill 1265; to the Committee on Pensions.

8031. Also, petition of Union Label Club, of Kings County, Brooklyn, N. Y., opposing the passage of the Cuban parcel post bill (H. R. 9195); to the Committee on Ways and Means.

8032. Also, petition of Lieutenant Commander Butts, favoring the passage of House bill 11331; to the Committee on Naval Affairs.

8033. Also, petition of the Naturopathic Association of the District of Columbia, in favor of Senate bill 3936, to regulate the practice of the healing art to protect the public health in the District of Columbia; to the Committee on the District of Columbia.

8034. Also, petition of the American Printing House for the Blind, expressing appreciation of the attitude of Congress toward blind pupils in the schools of the United States; to the Committee on Appropriations.

8035. By Mr. SPEAKS: Papers in support of the following pension bills: H. R. 15164, granting an increase of pension to Emma Calb; H. R. 15165, granting an increase of pension to Carrie Brooks; H. R. 15166, granting an increase of pension to Julia O. Allen; H. R. 15167, granting an increase of pension to S. Amanda Clark; H. R. 15168, granting an increase of pension

to Calista Ealy; H. R. 15169, granting an increase of pension to Kate Griffith; H. R. 15170, granting a pension to Maggie Groves; H. R. 15171, granting an increase of pension to Anna Hafey; H. R. 15172, granting an increase of pension to Adella Harper; H. R. 15173, granting an increase of pension to Elizabeth Heise; H. R. 15174, granting an increase of pension to Victoria Huddle; H. R. 15175, granting an increase of pension to Mary E. Jaco; H. R. 15176, granting an increase of pension to Althear S. Jones; H. R. 15177, granting an increase of pension to Carrie Miller; H. R. 15178, granting an increase of pension to Laura C. Monfort; H. R. 15179, granting an increase of pension to Mary E. Ryerson; H. R. 15180, granting an increase of pension to Laura B. Pleukhart; H. R. 15181, granting an increase of pension to Adelphia T. Weaver; H. R. 15182, granting an increase of pension to Sarah A. Williams; and H. R. 15247, granting a pension to Matilda Cranmer; to the Committee on Pensions.

8036. By Mr. SWICK: Petition of Protestant Boys, No. 136, Loyal Orange Lodge, Ellwood City, Pa., urging an immigration quota for Canada and Mexico and increased appropriations for enforcement of existing national-origin section of immigration law; to the Committee on Immigration and Naturalization.

8037. By Mr. WYANT: Evidence in support of House bill 14795, granting a pension to Emma R. Duncan; to the Committee on Invalid Pensions.

8038. Also, papers in support of House bill 14793, granting a pension to Elizabeth Hann; to the Committee on Invalid Pensions.

8039. Also, papers in support of House bill 14796, granting a pension to Celina L. DePriest; to the Committee on Invalid Pensions.

8040. Also, papers in support of House bill 14794, granting a pension to Susan E. Henry; to the Committee on Invalid Pensions.

8041. Also, papers in support of House bill 14797, granting a pension to Mary J. Stendts; to the Committee on Invalid Pensions.

8042. Also, papers in support of House bill 14798, granting a pension to Dora Slonaker; to the Committee on Invalid Pensions.

8043. Also, papers in support of House bill 14799, granting a pension to Mary A. Steiner; to the Committee on Invalid Pensions.

8044. Also, petition of the Pittsburgh Central Labor Union, by W. A. Crissman, president, and P. J. McGrath, secretary, recommending enactment of Senate bill 1727; to the Committee on the Civil Service.

SENATE

TUESDAY, *December 18, 1928*

(Legislative day of Monday, December 17, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 3776. An act to authorize the Secretary of the Interior to issue patents for lands held under color of title;

S. 3844. An act amending the fraternal beneficial association law for the District of Columbia as to payment of death benefits; and

S. 4127. An act to provide for the appointment of an additional justice of the Supreme Court of the District of Columbia, and for other purposes.

The message also announced that the House had passed the following bills of the Senate, severally with amendments, in which it requested the concurrence of the Senate:

S. 3269. An act providing for the advancement on the retired list of the Army of Hunter Liggett and Robert L. Bullard, major generals, United States Army, retired;

S. 3881. An act to provide for the paving of the Government road, known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park;

S. 4126. An act authorizing the National Capital Park and Planning Commission to acquire title to land subject to limited rights reserved, and limited rights in land, and authorizing the Director of Public Buildings and Public Parks of the National Capital to lease land or existing buildings for limited periods in certain instances; and

S. 4302. An act to authorize the Secretary of Commerce to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the Battle of Fort Fisher.

The message further announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H. R. 6496. An act granting the consent of Congress to compacts or agreements between the States of New Mexico and Oklahoma with respect to the division and apportionment of the waters of the Cimarron River and all other streams in which such States are jointly interested;

H. R. 6497. An act granting the consent of Congress to compacts or agreements between the States of New Mexico, Oklahoma, and Texas with respect to the division and apportionment of the waters of the Rio Grande, Pecos, and Canadian or Red Rivers, and all other streams in which such States are jointly interested;

H. R. 6499. An act granting the consent of Congress to compacts or agreements between the States of New Mexico and Arizona with respect to the division and apportionment of the waters of the Gila and San Francisco Rivers and all other streams in which such States are jointly interested;

H. R. 7010. An act to amend the organic act of Porto Rico, approved March 2, 1917;

H. R. 7024. An act granting the consent of Congress to compacts or agreements between the States of Colorado and New Mexico with respect to the division and apportionment of the waters of the Rio Grande, San Juan, and Las Animas Rivers, and all other streams in which such States are jointly interested;

H. R. 7025. An act granting the consent of Congress to compacts or agreements between the States of Colorado, Oklahoma, and Kansas with respect to the division and apportionment of the waters of the Arkansas River and all other streams in which such States are jointly interested;

H. R. 7452. An act for the erection of a tablet or marker to be placed at some suitable point at Alfords Bridge in the county of Hart, State of Georgia, on the national highway between the States of Georgia and South Carolina, to commemorate the memory of Nancy Hart;

H. R. 12897. An act to provide for the acquisition of a site and the construction thereon of a fireproof office building or buildings for the House of Representatives;

H. R. 13144. An act to cede certain lands in the State of Idaho, including John Smiths Lake, to the State of Idaho for fish-cultural purposes, and for other purposes;

H. R. 13565. An act to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved July 3, 1926;

H. R. 13665. An act to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States;

H. R. 13978. An act to amend section 5 of the act of March 2, 1895, relating to official bonds;

H. R. 14150. An act to amend section 279 of the Judicial Code;

H. R. 14152. An act to authorize the acquisition of two tracts of land required in connection with the coast defense of the Atlantic seaboard; and

H. J. Res. 352. Joint resolution for the relief of Porto Rico.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	King	Simmons
Barkley	Fletcher	La Follette	Smith
Bayard	Frazier	Larrazolo	Smoot
Bingham	George	McKellar	Steck
Black	Gerry	McMaster	Steiwer
Blease	Glass	McNary	Stephens
Borah	Glenn	Moses	Swanson
Brookhart	Goff	Neely	Thomas, Idaho
Broussard	Gould	Nye	Thomas, Okla.
Bruce	Greene	Oddie	Trammell
Burton	Hale	Pine	Tydings
Capper	Harris	Pittman	Vandenberg
Caraway	Harrison	Ransdell	Wagner.
Copeland	Hastings	Reed, Mo.	Walsh, Mass.
Couzens	Hawes	Reed, Pa.	Walsh, Mont.
Curtis	Hayden	Robinson, Ind.	Warren
Dale	Heflin	Sackett	Waterman
Deneen	Johnson	Schall	Watson
Dill	Jones	Sheppard	Wheeler
Edge	Kendrick	Shipstead	
Edwards	Keyes	Shortridge	

Mr. SHEPPARD. I desire to announce that my colleague the junior Senator from Texas [Mr. MAYFIELD] is absent on account of illness. This announcement may stand for the day.

Mr. NYE. I wish to announce that the Senator from Nebraska [Mr. NORRIS] and the Senator from Wisconsin [Mr. BLAINE] are detained in a meeting of the Committee on the Judiciary.

The VICE PRESIDENT. Eighty-two Senators having answered to their names, a quorum is present.

PERSONAL EXPLANATION—BOULDER DAM

Mr. COPELAND. Mr. President, I have just to-day returned to the Senate after several days' absence because of serious illness in my family. I find in the RECORD of Friday last what is to me a serious error. On that day, where my paid was announced by my colleague, there is a very apparent mistake in the RECORD.

I do not find any fault with the official reporters or those who have charge of the RECORD, because I think the work they do is remarkably accurate. However, the RECORD makes it appear that my colleague the junior Senator from New York [Mr. WAGNER] announced:

> If the senior Senator from New York were present, he would vote "nay." If the junior Senator from New Jersey [Mr. EDWARDS] were present, he would vote "nay."

Of course, this should read:

> If the senior Senator from New York were present, he would vote "yea."

I ask unanimous consent that the RECORD may be corrected. To my friends in California, where I went last year for the express purpose of visiting the site of Boulder Dam and where I expressed my sympathy for the people of the Imperial Valley, who were in imminent danger at that time from a flood which was raging in the Colorado, I should not want it to appear that I was in opposition to this project. From the very first I have favored the legislation and am very happy it passed.

Of course I want the RECORD to show that if I had been present and permitted to vote I should have voted "yea."

Mr. JOHNSON. Mr. President, I simply desire to say that I know the statement in the RECORD is erroneous in regard to the views of the Senator from New York. From the inception of this long struggle the Senator from New York not only has been sympathetic with the desires of the people of southern California, of Imperial Valley, and the southwestern part of the United States, but he has rendered every possible aid in our behalf. Last week, called away as he was by serious illness in his family, he advised me of the fact and gave me authority to arrange a pair for him in favor of the measure and in favor of the project itself. In justice to him I desire to make this statement, so that the RECORD will show that his attitude has always been in full sympathy with and entirely favorable to the project.

Mr. WAGNER. Mr. President, may I state that in accounting for the absence of the senior Senator from New York, I did state that if he were present he would vote for the Boulder Dam bill, because I have known all along his sympathetic attitude toward that legislation.

Mr. ASHURST. Mr. President, I heard the announcement of the junior Senator from New York [Mr. WAGNER] and he made no error. I can testify, which I cheerfully do, that the senior Senator from New York [Mr. COPELAND] was an able and constant supporter of the Boulder Dam bill. Speaking as a vanquished Senator on that subject, I bear the scars from the rapier of the Senator from New York [Mr. COPELAND], but I am happy to say the scars I bear are above the belt and in the front. He neither struck below the belt nor in the back.

Mr. COPELAND. Mr. President, I ask that the correction may be made in the RECORD.

The VICE PRESIDENT. Without objection, the RECORD will be corrected accordingly.

PETITIONS AND MEMORIALS

Mr. EDGE presented a letter from Mrs. G. W. Gehin, president of the Essex County Women's Republican Club, of Newark, N. J., embodying a resolution adopted by that club, indorsing the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD as follows:

ESSEX COUNTY WOMEN'S REPUBLICAN CLUB,
Newark, N. J., December 17, 1928.

Hon. WALTER E. EDGE,
Washington, D. C.

MY DEAR MR. EDGE: Our club, at a meeting on Friday, passed the following resolution:

"Whereas the Republican platform of 1928 states: 'We indorse the proposal of the Secretary of State for a multilateral treaty proposed to the principal powers of the world and open to the signatures of all nations, to renounce war as an instrument of national policy and declaring in favor of pacific settlement of international disputes, the first step in outlawing war'; and

"Whereas such a treaty was signed in Paris, by Secretary of State Kellogg on behalf of the United States, on August 27, 1928: Therefore be it

"*Resolved*, That the Essex County Women's Republican Club indorses the multilateral treaty and urges its prompt ratification by the Senate of the United States."

We are anxious for the passage of this treaty.

Very sincerely yours,

Mrs. G. W. GEHIN, *President.*

Mr. DALE presented numerous petitions of sundry citizens and civic and religious organizations in the State of Vermont, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. GREENE presented numerous petitions of sundry citizens and civic and religious organizations in the State of Vermont, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. VANDENBERG presented a letter in the nature of a petition from the Women's Interdenominational Missionary Council (affiliated with the Detroit Council of Churches, representing all Protestant Evangelical Churches of the city of Detroit), praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

Mr. COPELAND presented a petition of members of the First Methodist Episcopal Church, of Hollis, Long Island, N. Y., praying for the passage of legislation providing for Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of sundry citizens of Clinton, N. Y., praying for the passage of the so-called Sproul bill, being House bill 11410, to amend the act of October 28, 1919, known as the national prohibition act, etc., which was referred to the Committee on the Judiciary.

He also presented a petition of members of American Legion Auxiliary Post No. 274, of Peekskill, N. Y., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

He also presented numerous petitions and papers in the nature of petitions from sundry citizens and civic and religious organizations in the State of New York, praying for the prompt passage of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

He also presented a petition of members of the faculty and students of Auburn (N. Y.) Theological Seminary and School of Religious Education, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

He also presented a resolution adopted by the annual convention of the National Alliance of Former German Soldiers and Army Veterans of North America (Deutscher Krieger Bund von North America), protesting against the continued occupation of German territory by black troops of former enemy nations, and also against the treaty of Versailles, particularly against the declaration contained therein that Germany alone caused the war, etc., which was referred to the Committee on Foreign Relations.

Mr. CAPPER presented a letter in the nature of a memorial from the First Church of the Brethren, of Sabetha, Kans., remonstrating against adoption of the proposed naval building program, which was ordered to lie on the table.

He also presented a letter in the nature of a petition from the First Church of the Brethren, of Sabetha, Kans., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

He also presented petitions of sundry citizens of White City, Morrill, and Jackson County, all in the State of Kansas, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

He also presented resolutions adopted by the Woman's Club, of Topeka; the First Presbyterian Church, of Iola; the Evangelical Church, and the Woman's Christian Temperance Union, both of Holton, in the State of Kansas, favoring the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

He also presented petitions and papers in the nature of petitions of the Woman's Club, of Topeka; the League of Women

Voters of Southwestern College and the First Methodist Episcopal Church, both of Winfield; and members of the Ruskin Club and the Whittier Chautauqua Club, both of Parsons, all in the State of Kansas, praying for the passage of the so-called Gillett resolution, suggesting a further exchange of views relative to the World Court, which were referred to the Committee on Foreign Relations.

LOANS ON ADJUSTED SERVICE CERTIFICATES

Mr. WALSH of Massachusetts. Mr. President, I have had some recent correspondence and criticisms with reference to the interest charged by the Government on loans secured by veterans upon their adjusted service certificates. My attention was called to the fact that the rate of interest charged was reaching as high as 7 per cent.

A letter from the Director of the United States Veterans' Bureau explains the policy pursued with respect to these loans. As the matter is of considerable public interest, I request that the Director's letter be printed in the CONGRESSIONAL RECORD and referred to the Committee on Finance.

There being no objection, the letter was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

UNITED STATES VETERANS' BUREAU,
OFFICE OF THE DIRECTOR,
Washington, December 13, 1928.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

MY DEAR SENATOR WALSH: I wish to acknowledge your letter of December 7, 1928, transmitting a letter dated November 19, from Mr. James G. Garrett, Mittineague, Mass., in connection with the interest charged on loans secured by adjusted-service certificates.

The rate of interest applicable on loans made from the Government life-insurance fund on the security of adjusted-service certificates is not fixed by the administrative authorities of this bureau, but is specifically provided in paragraph (i), section 502, of the World War adjusted compensation act, as amended, which reads in part as follows:

"* * * The rate of interest shall be 2 per cent per annum more than the rate charged at the date of the loan for the discount of 90-day commercial paper under section 13 of the Federal reserve act by the Federal reserve bank for the Federal reserve district in which is located the regional office, suboffice, or hospital of the United States Veterans' Bureau at which the loan is made."

It would appear that the Congress, when it enacted the provision above cited, believed that the interest charged should be in sympathy with prevailing money rates; thus, under present stringent money conditions in some Federal reserve districts the discount rate is as high as 5 per cent. However, it should be pointed out that when discount rates were what might be termed "subnormal," the benefit of such low rates was enjoyed by borrowers on adjusted-service certificates.

Interest collected on loans made on adjusted-service certificates from the United States Government life-insurance fund does not inure to the benefit of the Government either directly or indirectly, but is credited to the trust fund, which represents moneys held in trust by the Government for holders of policies of the United States Government life insurance, who are, of course, all ex-service men. Apparently the Congress felt that holders of United States Government life insurance were entitled to interest returns on their money parallel to that received on commercial loans, and that it would be unfair to loan the funds of ex-service policyholders, for whom it was acting as trustee, on any other basis than prevailing money rates.

The communication addressed to you by Mr. Garrett is inclosed, together with a copy of this letter.

Very truly yours,

FRANK T. HINES, *Director.*

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. DILL:

A bill (S. 4994) granting a pension to Alpheus J. Williamson;
A bill (S. 4995) granting a pension to Henry G. Mauzey;
A bill (S. 4996) granting a pension to Max Lilienthal;
A bill (S. 4997) granting a pension to John Lamburth;
A bill (S. 4998) granting a pension to Thomas Heslin;
A bill (S. 4999) granting a pension to Effie M. Dailey;
A bill (S. 5000) granting a pension to Frank M. Bowman;
A bill (S. 5001) granting a pension to Ferdinand Beyersdorf;
A bill (S. 5002) granting an increase of pension to Frank H. Wilson, alias Henry Wencel;
A bill (S. 5003) granting a pension to Harriett Turk;
A bill (S. 5004) granting a pension to Samuel W. Sims;
A bill (S. 5005) granting a pension to Felix Shaser;
A bill (S. 5006) granting a pension to Jacob E. Rego;
A bill (S. 5007) granting a pension to Mary A. Reed;
A bill (S. 5008) granting a pension to John Pleas Rader;
A bill (S. 5009) granting a pension to Harry Breese Johnson;
A bill (S. 5010) granting an increase of pension to Emily Fisher;
A bill (S. 5011) granting a pension to Robert B. Early; and
A bill (S. 5012) granting a pension to Walter H. Caswell; to the Committee on Pensions.

By Mr. BARKLEY:

A bill (S. 5013) to authorize the Secretary of War to lend War Department equipment for use at the eleventh national convention of the American Legion; to the Committee on Military Affairs.

By Mr. WALSH of Montana:

A bill (S. 5014) authorizing the Secretary of the Interior to issue to the city of Bozeman, Mont., a patent to certain public lands; to the Committee on Public Lands and Surveys.

By Mr. COPELAND:

A bill (S. 5015) for the relief of heirs of Jacob D. Hanson; to the Committee on Claims.

A bill (S. 5016) to confer jurisdiction on the Court of Claims to certify certain findings of fact, and for other purposes; to the Committee on the Judiciary.

By Mr. GREENE:

A bill (S. 5017) for the relief of Cullen D. O'Bryan and Lettie A. O'Bryan; to the Committee on Claims.

By Mr. McMASTER:

A bill (S. 5018) for the relief of the wife of Floyd C. Moulton; to the Committee on Finance.

By Mr. CAPPER:

A bill (S. 5019) granting an increase of pension to Sarah L. Headington (with accompanying papers); and
A bill (S. 5020) granting an increase of pension to Thomas Anderson (with accompanying papers); to the Committee on Pensions.

By Mr. MOSES:

A bill (S. 5021) granting an increase of pension to Julia A. Parsons (with accompanying papers); to the Committee on Pensions.

By Mr. HEFLIN:

A bill (S. 5022) to amend sections 183 and 184 of chapter 6 of title 44, of the United States Code, approved June 30, 1926, relative to the printing and distribution of the CONGRESSIONAL RECORD; to the Committee on Printing.

By Mr. HAWES:

A bill (S. 5023) granting a pension to Jackson St. John; to the Committee on Pensions.

By Mr. WATSON:

A bill (S. 5024) granting a pension to Anna J. Van Nuys; to the Committee on Pensions.

AMENDMENT TO CENSUS BILL

Mr. BRUCE submitted an amendment intended to be proposed by him to the bill (H. R. 393) to provide for the fifteenth and subsequent decennial censuses, which was ordered to lie on the table and to be printed.

PAY AND ALLOWANCES IN THE ARMY, NAVY, ETC.

Mr. JONES submitted an amendment intended to be proposed by him to the bill (H. R. 12032) to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended, which was referred to the Committee on Naval Affairs and ordered to be printed.

ADDRESS BY SENATOR BINGHAM

Mr. BLACK. Mr. President, I ask unanimous consent that there may be inserted in the RECORD an address delivered by the junior Senator from Connecticut [Mr. BINGHAM] at Kitty Hawk, N. C., on December 17, 1928, at the celebration of the twenty-fifth anniversary of the first airplane flight.

The VICE PRESIDENT. Without objection, it is so ordered.

The address is as follows:

It is a source of great pride to the members of the National Aeronautic Association to be standing side by side with the distinguished delegates to the International Civil Aeronautic Conference who have come to this sacred spot from many lands to honor the two men who first showed the world how to fly.

We who have cast our lives and our hopes with aeronautics know that it matters not what boundaries may separate us geographically. We strive for a common goal, and we are guided by one principle. That principle is profound faith in the art of flying, which Orville and Wilbur Wright, first of mankind, began to practice on this very spot 25 years ago to-day.

On December 17, 1903, there stood where we are now standing a strange device that looked like a cross between a box kite and the skeleton of a bird. Its creators believed that it would enable them to fly.

A biting cold wind was blowing across Kill Devil Hills at the rate of 27 miles an hour. Orville Wright and his brother realized the difficulties of flying in such a high wind, but estimated that the added dangers in flight under such conditions would be partly compensated for by the slower speed in landing.

So this great American, who is with us to-day, climbed aboard the strange craft. He warmed up the motor. He released the wire that held the machine to the track from which it was to be launched. The machine moved forward into the wind. His brother, Wilbur Wright, ran at the side, holding a wing to help balance the airplane on the track. And then the machine left the ground. It answered to the controls. Man was flying! Twelve seconds later a landing was made 120 feet from the point at which the machine rose into the air. For thousands of years man had watched and envied the flying birds. At last he had conquered the secret. He too could fly.

Orville Wright has spoken of this flight as being "exceedingly erratic," which he attributed in part to the irregularity of the air and in part to lack of experience in handling the craft. The flight lasted only a few seconds, but it was the first in the history of the world in which a machine carrying a man had raised itself by its own power into the air in full flight, had sailed forward under this same power without reduction in speed, and had finally landed at a point as high as that from which it started.

Three more flights were undertaken immediately thereafter, with Wilbur and Orville Wright alternating as pilots. Each successive flight was an improvement upon its predecessor, and when the joy of these two men was at a height greater than either ever experienced before, a strong gust of wind picked up this mechanical bird and played havoc with it. Although this came like a bolt of lightning out of a blue sky, Orville and Wilbur Wright had cast the die; they had solved the problem of human flight, even though the elements, always the aircraft's greatest enemy, scored a hit almost coincident with man's great victory.

In the quarter of a century which has elapsed since that memorable day the art has developed from two pilots and one plane to tens of thousands of airmen and aircraft flying all over the world. The science of aeronautics has gone forward until it has taken a vital and prominent place in the national defense and in the economic life of all peoples.

Twenty-five years ago to-day an airplane established a distance record of 852 feet and a nonstop flight record of 59 seconds. This was on the fourth and last flight of the original Kitty Hawk machine and was made with Wilbur Wright at the controls.

To-day the records of the National Aeronautic Association show that airplanes have remained aloft for 65 hours and 25 minutes and have traveled 4,466 miles in flight without refueling; have flown to an altitude of 38,418 feet; have shot through the air at 318 miles per hour; and have lifted more than 6 tons of cargo nearly 7,000 feet. They have brought the people of New York and California to within 19 hours of each other. They have joined Europe and America in single nonstop flights. They have linked America and the Far East; they have circled the globe; they have flown over the top of the world; and they have started to shrink the earth until it is difficult to foresee just when and where this shrinkage will stop.

Our mail, express, and, in many cases, our people speed through the night along lighted highways of the air, outdistancing every other available means of transportation. What we have to-day is but an indication of what we shall have in the future. It would be unwise to indulge in predictions as to what we shall be doing with aircraft, or what aircraft will be doing for us, when the fiftieth anniversary of this great event in the history of our Nation and the world rolls around. The best course to pursue is to seek the truth and build on a foundation of thorough knowledge.

[Addressing Mr. Orville Wright.]

We have an obligation to you, Mr. Wright. Our obligation is to take what you gave us here 25 years ago and develop it to the maximum. We must use as far as we are able the intelligence, the foresight, the perseverance, the honesty, and the integrity together with the modesty and unselfishness which have characterized your every action from the day when you and your brother first undertook the solution of the problem of human flight. Mr. Wright, you have endeared yourself to the heart of everyone who has had the good fortune to share your friendship and acquaintance. You have proved yourself worthy of all the honor that has been tendered you for your magnificent contribution to the progress of the world.

No honor is too great for this genius of the twentieth century.

Mr. Wright, we are grateful that you could journey back to the scenes of your first flights to honor by your presence your fellow members of the National Aeronautic Association in their humble efforts to preserve for posterity the exact location which marked man's first flight. At the same time we deeply mourn the absence of your devoted brother not only from this hallowed place on this occasion but from the world.

And now, on behalf of the membership of the National Aeronautic Association, I have the honor to unveil this granite bowlder which we hope will long serve to mark the birthplace of human flight and to perpetuate the affectionate regard in which you are held by all those who are proud to be known as your fellow members.

RADIO BROADCASTING LICENSES

Mr. DILL. Mr. President, I ask unanimous consent to insert in the RECORD the complaint of The Radio Protective Association against The Radio Corporation of America and affiliated corporations, asking the cancellation of licenses for broadcasting by those organizations. This is a complaint under section 17 of the radio act, and is so full and complete and so directly in point that I think it would be well to have it printed in the RECORD.

I also ask unanimous consent to have printed in the RECORD an article from the New York World under date of December 17, quoting Mr. Hoover's testimony before the House Committee on the Merchant Marine and Fisheries against the Radio Trust.

The PRESIDING OFFICER (Mr. MCNARY in the chair). Without objection, it is so ordered.

The matter referred to is here printed, as follows:

Before the FEDERAL RADIO COMMISSION.

The Radio Protective Association *v.* the Radio Corporation of America, the Radio Marine Corporation of America, the National Broadcasting Co., the General Electric Co., the Westinghouse Electric & Manufacturing Co., the United Fruit Co., the Tropical Radio Telegraph Co., and the American Telephone & Telegraph Co.

To the honorable the FEDERAL RADIO COMMISSION,

Washington, D. C.

GENTLEMEN: The Radio Protective Association respectfully charges to your honorable commission that the Radio Corporation of America, the Radio Marine Corporation of America, the National Broadcasting Co., the General Electric Co., the Westinghouse Electric & Manufacturing Co., the United Fruit Co., the Tropical Radio Telegraph Co., and the American Telephone & Telegraph Co.—all licensed by your commission as radio operating companies under the radio act of 1927—are violating section 17 of said act.

Your petitioner charges that these violations consist in the control by these licensees, who are engaged in the business of radio communication, of assets of the American Telephone & Telegraph Co., which is a telephone company doing a wire communications business, and that said control has the purpose and the effect of restraining commerce in the field of communications between the United States and foreign countries and of creating an unlawful monopoly therein. This control of such assets for such purpose is expressly forbidden by said section 17.

Wherefore your petitioner prays that your honorable commission will order the revocation of the licenses heretofore granted to these corporations in the field of broadcasting as well as of communications and for other purposes.

Your petitioner further prays that until the final determination of the issues which arise under these violations of section 17, your commission will refuse to grant any applications for further licenses which may be made by any of these corporations, or for any renewals or modifications of existing licenses.

The records of your commission will be the best evidence of the licenses now held by these companies, but the attached list contains the call letters of the licenses now in the hands of these companies, so far as they are known to us, and against each of which we respectfully ask an order to show cause why such an order of revocation should not be issued.

Only if safeguarded against the threat of monopoly control, can the radio art reach its highest development and give to the American people the fullest benefits of this marvelous means of mass communication. This is the purpose which Congress had when it wrote section 17 into the radio act of 1927. In undertaking to maintain the freedom of competition in radio, Congress, by that section of the statute which created your honorable commission and entrusted it with the protection of this new art, prohibited any combination of wire interests with wireless interests that might restrain competition in the field of international communications.

In response to a previous communication from our association, your commission sent us under date of August 23, 1928, a copy of an opinion rendered by Hon. Louis G. Caldwell, general counsel for your commission, in which he wrote as follows, concerning section 17:

"The foregoing constitute direct prohibitions. The first prohibition is directed specifically against licensees. In my opinion this prohibition comes within the 'restrictions and conditions' of the radio act, and, on a showing to the commission of a violation on the part of a licensee, the license may be revoked. It is not necessary that there first be a judgment of guilty by a Federal court or a finding or certificate of any Federal body. * * * The very evident intention of the section was to prohibit such a combination of wireless or radio communication interests with other forms of communication interests (such as cable,

wire, telegraph, or telephone) as substantially to lessen competition or create monopoly in the field of communication."

We believe that Mr. Caldwell was in error in construing the application of this act to be limited to the field of communications. It is our opinion that the phrase "unlawfully to create monopoly in any line of commerce" gives section 17 a broader application than indicated by Mr. Caldwell. We are not, however, concerned at this time with the effect of this broader application, as within the field of communication this commission is confronted by a situation purely within the prohibitions of section 17 and calling for definite action.

Section 17 provides, among other things, that "no person engaged directly or indirectly in the business of transmitting or receiving communications by radio under a license under this act shall * * * directly or indirectly * * * control any * * * assets of any * * * cable, wire, telegraph, or telephone line or system, if in either case the purpose is and/or the effect thereof may be to restrain competition or restrain commerce between any place in * * * the United States * * * and any place in any foreign country, or unlawfully to create a monopoly in any line of commerce."

Section 17 also provides that any person now or hereafter engaged directly or indirectly in the business of transmitting for hire, messages, by any cable, wire, or telegraph or telephone wire system in interstate commerce within the United States, or between the United States and a foreign country, "shall directly or indirectly * * * control any * * * asset of any such radio station, apparatus, or system, if in either case the purpose is and/or the effect thereof may be to substantially lessen competition or restrain commerce between any place * * * in the United States * * * and any place in any foreign country, or unlawfully to create monopoly in any line of commerce."

The companies against which this complaint is directed fall distinctly within the definition of section 17 and are, within the field of communications, acting clearly in violation of the prohibition of this section. They are, respectively, either in the telephone, wire, or radio communications business, and as such have entered into specific agreements among themselves in which control of their assets is given by each to the others, and the effect of the agreements under which this control is secured is clearly intended to and does substantially lessen competition in the field of communications, and intends to and does unlawfully create a monopoly in that commerce.

It is highly pertinent in examining the details of these agreements to consider the specific functions and nature of each of these companies.

The Radio Corporation of America is the largest radio communications company in the world and is therefore a licensee owning and operating various stations licensed under the radio act of 1927. It also has pending before your commission a number of applications for additional licenses. This company is further the patent pooling and selling agency of the American Telephone & Telegraph Co., the General Electric Co., and the Westinghouse Electric & Manufacturing Co., and is one of the owners of the National Broadcasting Co. and the sole owner of the Radio Marine Corporation of America.

The American Telephone & Telegraph Co. is the greatest concern in the United States engaged in the communications business—operating in both wire and wireless communications. This company has practically a complete monopoly of the long distance telephone business in the United States and between the United States and foreign countries, and has 65 per cent of all the telephone subscribers in the United States. It also owns and operates various radio stations licensed under this act.

The General Electric Co. is the largest manufacturing company of electrical apparatus in the United States, including radio apparatus, and is a licensee owning and operating various radio stations licensed under this act.

The Westinghouse Electric & Manufacturing Co. is the second largest manufacturer of electrical apparatus in the United States, including radio apparatus, and is the licensee owning and operating various radio stations licensed under this contract.

The Radio Marine Corporation is the newest subsidiary of the Radio Corporation of America and its stock is owned entirely by the parent company. It is a licensee of various licenses under this act and has pending before your commission various applications for additional licenses.

The National Broadcasting Co. is engaged primarily in the operation of radio chains and broadcasting stations, and its stock is owned by the Radio Corporation of America, the General Electric Co., and the Westinghouse Electric & Manufacturing Co. It is a licensee of various radio stations licensed under this act.

The United Fruit Co., a corporation of the State of New Jersey, is engaged in radio communications between the United States and various countries in Central and South America. It owns the stock of the Tropical Radio Telegraph Co., which is a licensee of various radio stations licensed under this act.

The economic position of this group—which is widely known as the Radio Trust—is most clearly indicated by the fact that the combination represents aggregate resources of more than $3,000,000,000. We refer only to the admitted assets of this combination and not to the enormous economic power which its members hold through their various affiliations. There is no other group in the radio industry or in the communications field, whether radio, telephone, telegraph, cable, or otherwise, with assets comparable to those of the companies which make up this combination.

Starting with the organization of the Radio Corporation of America, ostensibly by the General Electric Co., in the latter part of 1919, these companies entered into a conspiracy which was carried out by contracts and cross-licensing agreements to the end that every vestige of competition between them has been eliminated in the commercial field, in the field of patents and inventions, in the field of development, in the field of broadcasting, and in the field of communications. Furthermore, under these agreements the combined resources may and must be used as a single instrument to destroy outside competition, and they have been so used.

To show the extent to which this combination has gone in its efforts to destroy the independent radio industry, we refer your commission to the fact that the Supreme Court of the United States has just refused to review a decision of the United States Circuit Court of Appeals for the Third District, which held that the Radio Corporation of America—acting under the agreements hereinbefore mentioned—has undertaken unlawfully to monopolize the radio-tube business of the United States.

That decision held that clause 9, in a contract signed by the Radio Corporation of America, the American Telephone & Telegraph Co., the General Electric Co., and the Westinghouse Electric & Manufacturing Co., was a violation of section 3 of the Clayton Antimonopoly Act. Had the Radio Trust by means of this clause 9 been able to carry out its plan unlawfully to monopolize the radio-tube business it would have been able to completely destroy competition in every phase of radio, because the tube is the heart of all radio apparatus, both in transmission and reception.

Under the cross-licensing agreements, to which we desire specifically to call the attention of your commission, the Radio Corporation of America, which, to use the language of section 17, "is in the business of transmitting and/or receiving for hire energy, communications, or signals by radio," has acquired control of assets of the American Telephone & Telegraph Co., which, again in the language of said section 17, is operating a "cable or wire, telegraph or telephone line, or system, between any place * * * in the United States and any place * * * in any foreign country."

The reverse of this is also true, namely, that the American Telephone & Telegraph Co. has acquired control of assets of the Radio Corporation of America, which control is declared unlawful by said section 17.

The General Electric Co. and the Westinghouse Electric & Manufacturing Co. are directly in the business of transmitting and receiving for hire, energy, communications, or signals by radio, under licenses issued under this act, as well as indirectly, by virtue of their stock ownership and control of interests in the Radio Corporation of America and the National Broadcasting Co. Both of these companies control assets of the American Telephone & Telegraph Co., in contravention of section 17.

The acquisition by these respective companies of the control of assets belonging to each other was for the purpose of eliminating competition between them in the field of communications, as will be shown by the specific agreements.

The text of these agreements is set forth in complete detail in the report on The Radio Industry, 1923, made by the Federal Trade Commission, and we respectfully refer your commission to this public document for the complete details.

The first agreement to be considered is described as: "License Agreement—General Electric Co. and American Telephone & Telegraph Co.," dated July 1, 1920 (Federal Trade Commission Report on Radio Industry, 1923, p. 130). Under this agreement between the General Electric Co. and the American Telephone & Telegraph Co. (Art. V, par. 3, sec. b), the General Electric Co. grants to the American Telephone & Telegraph Co. exclusive licenses in the field of wire telegraphy on land and over ocean cables not more than 100 miles in length, and between the mainland of the United States and Cuba. This grant of an exclusive license under all the patents owned by the General Electric Co. gives the American Telephone & Telegraph Co. control of those patents which are assets of the General Electric Co. and divests the General Electric Co. of the right to engage in the field of wire telegraphy on land and over ocean cables, as set forth. The purpose of this contract is clearly to restrain commerce and communications between the United States and Cuba and substantially lessens competition in this field of wire telegraphy.

As a part of the same license agreement (Art. V, par. 4, sec. b), the American Telephone & Telegraph Co. grants to the General Electric Co. exclusive licenses in the fields of transoceanic wireless telephony (covering telephony between points in the United States and foreign countries, such licenses being limited, so far as concerns service on this continent for the public or for others than the General Electric Co. to rendering such service through only the telephone company's wire or wireless telephone system.

There is a provision for an agreement upon joint through rates and a division of rates; also a provision that in the event the General Electric Co. is not prepared to render proper service the American

Telephone & Telegraph Co. may establish wireless stations for rendering such service, after giving the General Electric Co. reasonable notice and opportunity to do so, and when the General Electric Co. is in a position to render such service it may take over the American Telephone & Telegraph Co. stations at the cost of reconstruction less depreciation. In other words, so far as actual transoceanic wireless telephony is concerned, monopoly is given to the General Electric Co., but in serving the public in the United States in connection with such service the monopoly is given to the American Telephone & Telegraph Co., and these monopolies are tied together. This is the exact situation which section 17 prohibits.

This agreement has the following effect:

If the general public desires to communicate by wireless telephone from any point in the United States to any foreign point over the General Electric wireless telephony system, the call must be originated through the facilities of the American Telephone & Telegraph Co. The General Electric Co. is prevented by this agreement from using any other facilities than those of the American Telephone & Telegraph Co. No other concern in the telephone business can do business in this field with the General Electric Co. By this agreement the potential customer has been effectively barred from patronizing any competing telephone company. It is a tying agreement without reservation, so far as the competitors of the American Telephone & Telegraph Co. are concerned.

On the same day, July 1, 1920, the General Electric Co., the Radio Corporation of America, the American Telephone & Telegraph Co., and the latter's subsidiary corporation, the Western Electric Co., entered into what is termed an "extension agreement" (Federal Trade Commission Rept. p. 139), which made the Radio Corporation and the Western Electric Co. parties to the license agreement already referred to between the General Electric Co. and the American Telephone & Telegraph Co.

This agreement was made by the General Electric Co. in order to pass on the benefits under the agreement to the Radio Corporation of America, which the General Electric Co. was creating at that time and still chiefly controls.

Under this agreement the Radio Corporation of America—

"grants and agrees to grant to the Telephone Company, under the present and future patents of the Radio Company, rights of the same character and scope, and for the same fields and subject to the same limitations and conditions, as the rights granted to the Telephone Company in and by said agreement of July 1, 1920: *Provided, however,* That all rights herein granted and agreed to be granted are subject to the rights which the Radio Company hereby reserves for itself and for the General Company and their several successors in business of the same character and scope and for the same fields and subject to the same limitations and conditions as the rights reserved by the General Company in and by said agreement of July 1, 1920. And the Radio Company hereby assumes toward the Telephone Company (and the General and Radio Companies assume toward the Western Company, to the extent that the Telephone Company under the provisions of clause 1 hereof extends or may hereafter extend its right to the Western Company) obligations similar to the obligations assumed by the General Company toward the Telephone Company in and by said agreement of July 1, 1920, except that the Radio Company assumes no obligation as to manufacturing or selling articles or devices which it is not from time to time engaged in commercially manufacturing."

The effect of this agreement, in restraint of competition in the field of wireless telephony, is therefore extended to include the following:

If the public desires to use the facilities of the Radio Corporation of America in communicating by radiotelephony from any of the States, Territories, or possessions of the United States with any foreign land, it must originate the communication through the telephone system owned, operated, or controlled by the American Telephone & Telegraph Co. The Radio Corporation of America, in connection with its communications business in wireless telephony, can not connect up its service with any other telephone system except that of the American Telephone & Telegraph Co.

As the Radio Corporation has much more extensive facilities than any other concern in the United States for wireless communication, telephony or otherwise, and as the American Telephone & Telegraph Co. completely dominates the telephone business of the United States, the economic effect of this agreement clearly falls within the judicial interpretation of the phrase "substantially lessen competition or restrain commerce." Any competitor of the Radio Corporation of America or the American Telephone & Telegraph Co. is effectively barred by these agreements from this commerce.

In the Standard Fashion Co. *v.* Magrane-Houston Co. (258 U. S. 346), the Supreme Court, in interpreting identically the same language under section 3 of the Clayton Act, held that agreements of a tying nature between persons controlling 45 per cent of the business had the economic effect of substantially lessening competition. The Radio Corporation of America and the American Telephone & Telegraph Co. admittedly have substantially more than 45 per cent of the business in their respective businesses and specifically in the field of wireless telephony.

As another indication of the monopolistic character of this communications business, we refer to the statement of the counsel for the Federal Trade Commission in the matter of the Federal Trade Commission *v.* General Electric Co. et al., at page 56 of the Brief in Opposition to Motion of the Respondents to Dismiss the Complaint, in which the counsel for the commission said as follows:

"All of the traffic contracts of the Radio Corporation with companies in foreign countries, and with countries owning stations, are in evidence. The traffic manager of the Radio Corporation of America testified that as to those countries with which the Radio Corporation had traffic contracts, there were no stations other than those owned by the countries capable of communicating with America, and that with respect to the companies in foreign countries with which the Radio Corporation of America has traffic contracts, there are no other companies owning stations capable of communicating with the United States. (Record, p. 4020.) All of these contracts are exclusive, either expressly so or exclusive in effect."

These exclusive traffic arrangements of the Radio Corporation of America are now reported to cover three-fourths of the international radio business of the United States, including all business done with Great Britain, France, Germany, Italy, Poland, Norway, Sweden, Japan, and many other countries.

We come now to the consideration of what is termed "License agreement—Radio Corporation of America and United Fruit Co.," executed on the 7th day of March, 1921, approximately seven months after the license agreement hereinbefore referred to. (Federal Trade Commission Report, p. 143.)

The United Fruit Co. was a pioneer in the radio communications field. It maintains an extensive radio communications service not only on its great fleet of ships, but in the countries of North, Central, and South America, and the West Indies. It was the owner, prior to entering into this license agreement, of the capital stock of the Tropical Radio Telegraph Co., and in the field of manufacture of broadcasting apparatus, the capital stock of the Wireless Specialty Apparatus Co. It was, prior to entering into agreements with the Radio Corporation of America, a strong potential competitor in the communications field in its own territory.

The General Electric Co. has acquired all of the capital stock of the Wireless Specialty Apparatus Co., and has eliminated that company from competition in the field of manufacturing broadcasting apparatus. Under the license agreement between the Radio Corporation of America and the United Fruit Co. all competition in the field of communications between these companies was destroyed.

Under this agreement the United Fruit Co. agreed to restrict its communications by agreeing not to enter into the field of commercial communications, and agreeing further that its own communications must "have to do with the business of the Fruit Co. or its subsidiaries." It further agreed that "messages destined to points in the United States may be transmitted to destination from said stations in the United States only through the facilities of the Radio Corporation or by wire, and that messages from points in the United States may be transmitted to said stations in the United States only through the facilities of the Radio Corporation or by wire, it being agreed that the Fruit Co. will not enter into any joint traffic arrangements with any other company than the Radio Corporation for forwarding such messages between said stations in the United States and other points in the United States without consent of the Radio Corporation." The agreement further provides wireless telephonic communications for the same purpose, in the same territory, shall be "subject to the same limitations as the wireless telegraphic communications above licensed: *Provided, however,* That no license is granted for wireless telephonic communication in the United States or its possessions." The Fruit Co. agrees further "that it will not establish nor operate stations for wireless communication outside of the Fruit Co. territory, Colombia, Cuba, and the Panama Canal Zone, except said stations at New Orleans, Boston, Burrwood, and Miami or vicinity."

This contract goes into exhaustive details of a complete scheme for eliminating any competition between the United Fruit Co. and the Radio Corporation of America in the communications business in what is termed the "Fruit Co. territory."

This agreement also contains the following important paragraph:

"The Fruit Co. has received a copy of a contract between General Electric Co. and American Telephone & Telegraph Co., dated July 1, 1920, and a copy of the extension agreement between said companies, the Radio Corporation and the Western Electric Co., also dated July 1, 1920, and takes notice of the contents thereof."

We have, therefore, the following situation:

The Radio Corporation of America, by virtue of the General Electric Co.-American Telephone & Telegraph Co. agreement, plus the extension agreement covering the Radio Corporation of America, acquires control in certain fields of the use of the patents of the American Telephone & Telegraph Co., and in consideration thereof gave up its rights to do business in certain fields. The Radio Corporation of America in turn ties this situation up with the United Fruit Co., whereby, in violation of section 17, the United Fruit Co. indirectly "* * * controls * * * assets * * * of the telephone company."

The effect of this series of agreements is that any wireless communication originating in the United Fruit Co. territory destined for a point

within the United States, particularly in the field of wireless telephony, must go through only the facilities of the General Electric Co. or the Radio Corporation of America and the American Telephone & Telegraph Co.

That under these agreements these various companies acquired "control * * * of the assets" of each other is borne out by the following statement by Judges Hough, Manton, and Mayer in the circuit court of appeals, second circuit, in the case of Radio Corporation of America *v.* Emerson (296 Fed. 51, 54, 55):

"Under date of July 1, 1920, the American Telephone & Telegraph Co. entered into an agreement with the General Electric Co. by the terms of which the latter company acquired exclusive and nonexclusive licenses under all the patents and rights to and under patents of the telephone company, including the patents in suit, during the terms thereof, throughout the United States. The exclusive rights acquired by the General Electric Co. under the agreement included the right to make, use, and sell (1) in commercial wireless telegraphy, for profit or *toll*; (2) in the field of wireless telephony, for commercial communication, for profit or toll, by and between airplanes, ships, and automotive devices, except railway vehicles; (3) in the amateur wireless telegraphy field and in amateur wireless telephone field, excepting only the prior reserved personal, nonexclusive, and nontransferable De Forest license; (4) in the field of wireless telephony, but not for public service, where the business use thereof is incidental or where at least one of the stations is portable, excepting only the De Forest license; (5) in the field of wireless telephony, by electric light, electric power, and electric traction companies, excepting only the said De Forest license. This agreement provides that each party may assign and grant special licenses under any of the rights granted by the agreement, providing that the assent of the other property is first obtained.

"On July 1, 1920, an agreement was made between the same parties, the Radio Corporation and Western Electric Co., referred to as an extension agreement, by which the American Telephone & Telegraph Co. consented to the acquisition by the telephone company from the General Electric Co. of any rights or licenses under the patents which were acquired by the General Electric Co. under the agreement of July 1, 1920. We think that by virtue of these agreements the Radio Corporation acquired an exclusive license to use and sell devices and vacuum tubes in the fields therein specified under the patents in suit. It gave the Radio Corporation the sole right to use and sell radio devices and vacuum tubes, employing the invention in suit in the fields above described where toll or profit was made; in other words, for commercial communication between ships, airplanes, and automotive devices. The owner of the patents and all others were excluded from such fields. The radio amateur field is covered by a license to sell the patent devices or tubes granted to the Radio Corporation, with some reservations to sell under limited conditions to the De Forest Co. With the exception of the personal nonexclusive and nontransferable license of the De Forest Co., the Radio Corporation's interest or right in this field is also exclusive. We regard these interests of the Radio Corporation as property rights, and such exclusive interests and rights were apparently very valuable. The Radio Corporation is, therefore, in the position of an exclusive licensee under the De Forest patents."

In the United Fruit Co. situation the General Electric Co. bought the stock of the Wireless Specialty Apparatus Co. from the United Fruit Co. This stock was purely an asset of the United Fruit Co. It was an integral part of the transactions covered by the chain of cross-licensing agreements. By virtue of this acquisition of assets plus the interlocking agreements above set forth the American Telephone & Telegraph Co. indirectly secured control of valuable rights or assets of the United Fruit Co., which is in the radio-communication business. This was indirectly securing a control of assets, in violation of section 17, if the effect of said control was to substantially lessen competition, which has been clearly shown to be the effect.

The Westinghouse Electric & Manufacturing Co. on the 30th day of June, 1922, entered into what is termed "license agreement, Radio Corporation of America, General Electric Co., and the Westinghouse Electric & Manufacturing Co." (Federal Trade Commission Rept., p. 167.) Under this agreement the Westinghouse Co. became an integral part of the program contemplated and hereinbefore set forth and agreed to the same rights and limitations of rights upon itself and upon the other parties to the agreement and their associated companies. They became parties to the same restraints of competition in the same fields, in the same manner, and to the same extent as indicated by the prior agreements.

It will be said by those adversely affected by our complaint that we are destructive. Nothing is further from the truth. We are trying to protect this great radio art against destruction by this monopoly and by the powerful interests that compose it. That is what Congress intended to do when it wrote section 17.

The invention of radiobroadcasting has done more to perfect the operation of our Government, as a direct popular Government, than any other event in our history. In the recent presidential campaign radio made a forum of the whole United States. For the first time the issues and the views of the candidates were carried to countless millions of our people by the voices of the candidates themselves.

The next great contribution of radio communication should be in the field of our international relations. When Congress wrote section 17 into the radio law—the statute which created the Federal Radio Commission and on which the whole fabric of governmental control rests—it intended to safeguard our radio communication with foreign countries against the menace of a radio monopoly, as well as against the possibility that existing wire companies might attempt to throttle this new competitor. It is unthinkable that radio communication from the United States, whether in the field of broadcasting or in any other field, should be monopolized by any individual, group, or combination, no matter how powerful and no matter how noble its professions of public service.

The congressional mandate set forth in section 17 should be carried out.

Respectfully submitted.

RADIO PROTECTIVE ASSOCIATION.
By OSWALD F. SCHUETTE,
Executive Secretary.
ERNEST R. REICHMANN, *Counsel.*

CITY OF WASHINGTON,
District of Columbia, ss:

Oswald F. Schuette, being duly sworn, deposes and says that he is the executive secretary of the Radio Protective Association, the plaintiff named in the foregoing complaint; that he has read the same and knows the contents thereof, and that the same is true of his own knowledge, except as to the matters therein stated to be on information and belief, and as to those matters, he believes it to be true.

OSWALD F. SCHUETTE.

Sworn to and subscribed before me this the 18th day of December, 1928.

[SEAL.] JULIE M. MAYER,
Notary Public in and for the District of Columbia.

Schedule of licenses, by call letters, involved in complaint of Radio Protective Association against violations of section 17:

RADIO CORPORATION OF AMERICA

Broadcasting: WJZ, New York, N. Y.; WRC, Washington, D. C.

Communications and other purposes: WMH, Baltimore, Md.; KEE, KEJ, KEL, KEM, KEN, KER, KES, KET, KKQ, KKR, KKZ, KLL, KMM, KPH, KQJ, KQZ, KSS, KWE, KUN, Bolinas, Calif.; WBL, Buffalo, N. Y.; WIM, Chatham, Mass.; WCY, Cleveland, Ohio; WRL, Duluth, Minn.; KGI, KIE, KIO, KKH, KQH, KRO, Kahuku, Hawaii; KSE, Los Angeles, Calif.; WCC, WRQ, WSO, Marion, Mass.; WAZ, WIZ, WII, WRT, New Brunswick, N. J.; WNY, WKW, New York, N. Y.; KDU, Point Reyes, Calif.; WAJ, WBW, WDS, WEA, WEB, WEC, WED, WEE, WEF, WEG, WEJ, WEL, WEM, WER, WES, WET, WEX, WFX, WHR, WIK, WIR, WIY, WKM, WKO, WKP, WKQ, WKU, WLL, WOP, WPE, WQA, WQB, WQC, WQG, WQK, WQM, WQN, WQQ, WQV, WQW, WQX, WQY, WSS, WTT, Rocky Point, N. Y.; WGT, WGX, WJT, San Juan, P. R.; WGG, WSC, WCI, Tuckerton, N. J.; KSE, Torrence, Calif.; and 65 high-frequency channels for transoceanic service.

RADIO MARINE CORPORATION OF AMERICA

Communication and other purposes: WSA, New London, Conn.

ILLINOIS RADIO CORPORATION OF AMERICA

Communication and other purposes: WGO, Chicago, Ill.

RADIO CORPORATION OF THE PHILIPPINES

Communication and other purposes: KZED, KZEN, KZET, KZRC, Manila, P. I.

RADIO CORPORATION OF PORTO RICO

Broadcasting: WKAQ, San Juan, P. R.

NATIONAL BROADCASTING CO.

Broadcasting: WEAF, Bellmore, N. Y.

GENERAL ELECTRIC CO.

Broadcasting: KGO, Oakland, Calif.; KOA, Denver, Colo.; WGY, Schenectady, N. Y.

Communication and other purposes: KEB, Oakland, Calif.; KFD, Denver, Colo.

WESTINGHOUSE ELECTRIC & MANUFACTURING CO.

Broadcasting: KYW—KFKX, Chicago, Ill.; WBZ, Springfield, Mass.; WBZA, Boston, Mass.; KDKA, Pittsburgh, Pa.

Communication and other purposes: WKA, Pittsburgh, Pa.; WAQ, Newark, N. J.

TROPICAL RADIO TELEGRAPH CO. (UNITED FRUIT CO.)

Communication and other purposes: WBF, Boston, Mass.; WAX, Hialeah, Fla.; WNN, Mobile, Ala.; WNU, New Orleans, La.; and seven high-frequency channels for transoceanic service.

AMERICAN TELEPHONE & TELEGRAPH CO.

Communication and other purposes: WND, Ocean Township, N. J.; WNL, Rocky Point, N. Y.; and 14 high-frequency channels for transoceanic service.

TEXT OF SECTION 17 OF THE RADIO ACT OF 1927

SEC. 17. After the passage of this act no person, firm, company, or corporation now or hereafter directly or indirectly through any subsidiary, associated, or affiliated person, firm, company, corporation, or agent, or otherwise, in the business of transmitting and/or receiving for hire energy, communications, or signals by radio in accordance with the terms of the license issued under this act, shall by purchase, lease, construction, or otherwise, directly or indirectly, acquire, own, control, or operate any cable or wire telegraph or telephone line or system between any place in any State, Territory, or possession of the United States or in the District of Columbia, and any place in any foreign country, or shall acquire, own, or control any part of the stock or other capital share of any interest in the physical property and/or other assets of any such cable, wire, telegraph, or telephone line or system, if in either case the purpose is and/or the effect thereof may be to substantially lessen competition or to restrain commerce between any place in any State, Territory, or possession of the United States or in the District of Columbia and any place in any foreign country, or unlawfully to create monopoly in any line of commerce; nor shall any person, firm, company, or corporation now or hereafter engaged directly or indirectly through any subsidiary, associated, or affiliated person, company, corporation, or agent, or otherwise, in the business of transmitting and/or receiving for hire messages by any cable, wire, telegraph, or telephone line or system (a) between any place in any State, Territory, or possession of the United States or in the District of Columbia, and any place in any other State, Territory, or possession of the United States, or (b) between any place in any State, Territory, or possession of the United States, or the District of Columbia, and any place in any foreign country, by purchase, lease, construction, or otherwise, directly or indirectly acquire, own, control, or operate any station or the apparatus therein, or any system for transmitting and/or receiving radio communications or signals between any place in any State, Territory, or possession of the United States or in the District of Columbia, and any place in any foreign country, or shall acquire, own, or control any part of the stock or other capital share or any interest in the physical property and/or other assets of any such radio station, apparatus, or system, if in either case the purpose is and/or the effect thereof may be to substantially lessen competition or to restrain commerce between any place in any State, Territory, or possession of the United States or in the District of Columbia, and any place in any foreign country, or unlawfully to create monopoly in any line of commerce.

[From the New York World of December 17, 1928]

HOOVER IS QUOTED IN RADIO PROTEST—PROTECTIVE ASSOCIATION SAYS HE OPPOSES MONOPOLY—GAVE VIEW TO CONGRESS—TOLD HOUSE COMMITTEE QUESTION MUST BE SQUARELY MET

(Special dispatch to the World)

WASHINGTON, December 16.—The Radio Protective Association, which has been on the trail of the alleged "radio trust" in season and out and only a few days ago demanded that the Federal Radio Commission forthwith revoke all licenses granted to the Radio Corporation of America, in a statement to-night quotes President-elect Hoover as strongly opposing monopoly in this field.

Oswald F. Schuette, executive secretary of the association, goes back to the testimony given by Mr. Hoover before the House Committee on Merchant Marine and Fisheries in the Sixty-eighth Congress when the White radio bill was up for discussion.

"The most relentless enemy of the Radio Trust could not want a better spokesman than Mr. Hoover," says Mr. Schuette, who added he was confident the President elect has not changed the views he expressed as Secretary of Commerce and chief radio adviser to President Coolidge. At that hearing Mr. Hoover said:

"The question of monopoly in radio communication must be squarely met. It is not conceivable that the American people will allow this newborn system of communication to fall exclusively into the power of any individual, group, or combination. Great as the development of radio distribution has been, we are probably only at the threshold of development of one of the most important human discoveries bearing on education, amusement, culture, and business communication.

"It can not be thought that any single person or group shall ever have the right to determine what communication may be made to the American people. We can not allow any single person or group to place themselves in a position where they can censor the material which shall be broadcast to the public.

"Radio communication is not to be considered as merely a business carried on for private gain, for private advertisement, or for entertainment of the curious. It is a public concern impressed with the public trust and to be considered primarily from the standpoint of public interest to the same extent and upon the basis of the same general principles as our other public utilities."

ARTICLE FROM THE NEW LEADER, OF NEW YORK

Mr. BLEASE. Mr. President, I ask unanimous consent to have printed in the RECORD an article from last Saturday's issue of the New Leader, a journal published in the State of New York, which is entitled "The Hell of Poverty."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New Leader, Saturday, December 15, 1928]

THE HELL OF POVERTY—ORGANIZED CHARITY SHOWS THE HIDEOUS SORES OF CAPITALISM

Like a man with a past our social order has a dual life. Outwardly it is polished and pleasing to the eye if we do not look beneath the surface. Inwardly it is ugly, often foul, even revolting. Vegetating in basements and garrets and shambling in the shadows of city streets are the wastrels, the human driftwood, the misfit unfortunates, who do not live and who never had a chance to live.

Each year as Christmas approaches capitalism casts aside its mask and bares its hideous sores. The spirit of the Carpenter broods over the earth, humankind grows mellow with sentiment for the unfortunate, the money bags yield a fraction of their contents for relief, and into dens and hovels and basements and other haunts of the social abyss agents of charity carry their alms. Sores are salved, empty stomachs are filled, fires kindled, backs clothed, and feet shod—for a time!

Yes, Christ walks the earth 1 day in a year of 365 days. President and politician, banker and industrial magnate, editor and publicist, the grafter who markets his vote and the official who betrays his trust, all sing the praises of the best of all possible worlds. The President of the Republic broadcasts to the multitude "an era of prosperity more extensive" than the world has ever known. Secure in the upper range of their blessed "order," enjoying assured incomes, the ruling gentry live over a social abyss into which we are permitted to peer once each year.

THE PAGEANT OF POVERTY

In New York City the Times and other dailies lift the lid for a few weeks and reveal the social hell below. In all the great cities and in every town charitable organizations, the Salvation Army, the Volunteers, and hundreds of other relief societies parade before us the broken men and women, the cast-off veterans of industry, the wretched unemployed, the human casualties and wrecks of a misdirected system of producing and distributing wealth. These hideous reminders of the social pit shamble in a revolting pageant before us in description of "cases" intended to awaken sympathy. This skeleton closet of capitalism is exhibited swift upon the heels of the gaudy exhibit of "prosperity," and thus two worlds confront each other in stark antagonism.

The New York Times each year has its "Hundred neediest cases." Always a hundred, and these only the neediest. How many other hundreds and even thousands still lurk in the shadows nobody knows. The New York Evening Post has its "old couples' fund," and other papers have their special batch of the wretched. The sister publication of the Post in Philadelphia, the Ledger, carried a crusade against old-age pensions in Mellon's paradise of Pennsylvania to a successful conclusion. Thank God, sayeth the Post, our batch of the old folks will get alms. No continuous reward throughout the year as justice due to useful labor, but a charitable dole thrust down into the pit for withered hands to clutch, and only a few hands at that. Thus the Post, organ of the capitalist and financial gentry, bulletin of the Coolidge religion of "prosperity."

A PEEP INTO THE ABYSS

Turn to the four pages of last Sunday's Times and note the parade of social pariahs, a hundred selected from the pit where thousands fester beneath the richest city in the world. Here is the presser in an East Side tenement who collapsed at his work and sank to destitution while four children cry for food. There is the girl of 13 in a basement stitching powder puffs, child of a longshoreman, head of a family of nine, and earning $20 a week. There is the despairing woman in a rickety tenement thinking of drinking the lye which she purchased with her last 15 cents and a family of five living among rats in a dark and damp storage room. An emaciated young mother with five children starving because civilization had no room for her.

There is the wife and five children whom a noble judge sentenced to destitution by sending the breadwinner to prison for some petty crime. There is the soldier who went to war to make a world "fit for heroes to live in," now a tubercular, homeless, hungry, and dependent upon the alms of neighbors. Another war veteran who at the end of three months of unemployment, his wife and two babes hungry, dazed at the social magic that has hurled him from the heights of a "hero" to the depths as an outcast of the industrial world.

Here comes a tottering old negro mammy, one who in her childhood was a slave and played with the white brood of a noble master. Aunt Mary can no longer wrest bread from a washtub and "freedom" has left her stranded in the pit. Will some one please toss her a few alms? There comes a middle-aged man with four little girls, a father unemployed for five months, furniture sold, all hungry, and the little ones having found beds on wooden planks. Out of a dank cellar stalks a family of 11 children unable to locate Mr. Coolidge's "prosperous" world. Then note the pale, thin man, still in his thirties; the handworker on fine shoes till the factory installed machines and he was turned into the street to walk for weeks in search of a job. It is

finally found, but the weakened man falls in a faint and tumbles into the pit, carrying his wife and three little ones with him. And here feebly walks a woman of 84, a wageworker all her life, and no old-age insurance to assure her some comfort ere she passes into the shadows. Many "philanthropists" who solicit alms for her are sure that old-age pensions are the essence of "paternalism" and possibly the path that leads to "Bolshevism," so this veteran of industry shambles into view to excite our pity.

ICED CHARITY OF CAPITALISM

There are the cripples and the blind, the ragged and the diseased, the neglected and the wastrels, who drag their weary bodies in a wretched pageant of poverty, famine, and despair. And this parade of the social pariahs is repeated in every city in the United States every year in the season of "glad tidings." Not even the Coolidge "era of prosperity more extensive" than the world has ever known has passed these unfortunates into that moderate degree of assured comfort which our ancestors of the caves had. And how many others are there down there in the abyss who are not exhibited at all?

Yea, Christ walks the earth one day in the year. The remaining days the sanctimonious and the well fed, the keepers of the money bags, the polished apologists for the idle gentry who live on the labor of others, the wasters, the speculators, the gamblers in human merchandise—all strut the earth and chant the praises of the social order built upon such rotting human foundations.

And now to your work with your salvaging corps, your bands of mercy and love. Be sure that only the "worthy poor" receive your ministrations. Some of the ragged may be encouraged in a career of "laziness" if not carefully investigated, listed, charted, and indexed. Each one is a "case," as you know, and the whole pageant must be interpreted in terms of statistics and analyzed in accord with that "rugged individualism" which the successor of Coolidge has told us is the basis of our glorious "civilization." This is the age of efficiency, and unless you pry into the most intimate details of the wretched, their ancestry, their habits, and their family histories, you might make a mistake in relieving some famished man or woman. Follow the course of—

Organized charity, scrimped and iced,
In the name of a cautious, statistical Christ.

Do not misunderstand us. We would raise no bar against your mission of mercy. We would not prevent your descent into the pit to bring light, heat, clothing, food, and comfort to its inhabitants, even though it be for only a day, a week, or a few months. It is the best that you have discovered and it is necessary, but it is not a substitute for the industrial equity and social justice that must replace it. Necessary as this mercy is, it merely mops up some social pus and for a time keeps your wretches reconciled to their fate.

CHANGE OF REFERENCE

Mr. REED of Pennsylvania. I ask unanimous consent that the Committee on Claims may be discharged from the further consideration of the bill (H. R. 4029) for the relief of Maude A. Sanger, and that it be referred to the Committee on Finance. It is one of a large number of bills dealing with the war risk insurance act. I understand the Committee on Claims has no objection to this change of reference.

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). Without objection, the change of reference will be made.

PAVING OF DRY VALLEY ROAD, GEORGIA

The PRESIDING OFFICER (Mr. MCNARY in the chair) laid before the Senate the amendments of the House of Representatives to the bill (S. 3881) to provide for the paving of the Government road known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park.

Mr. HARRIS. I move that the Senate disagree to the amendments of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. GREENE, Mr. MCMASTER, Mr. BROOKHART, Mr. FLETCHER, and Mr. TYSON conferees on the part of the Senate.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated below:

H. R. 7010. An act to amend the organic act of Porto Rico, approved March 2, 1917; to the Committee on Territories and Insular Possessions.

H. R. 7452. An act for the erection of a tablet or marker to be placed at some suitable point at Alfords Bridge, in the county of Hart, State of Georgia, on the national highway between the States of Georgia and South Carolina, to commemorate the memory of Nancy Hart; to the Committee on the Library.

H. R. 13144. An act to cede certain lands in the State of Idaho, including John Smiths Lake, to the State of Idaho for fish-cultural purposes, and for other purposes; to the Committee on Public Lands and Surveys.

H. R. 13565. An act to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved July 3, 1926; to the Committee on Civil Service.

H. R. 14152. An act to authorize the acquisition of two tracts of land required in connection with the coast defense of the Atlantic seaboard; to the Committee on Military Affairs.

H. R. 12897. An act to provide for the acquisition of a site and the construction thereon of a fireproof office building or buildings for the House of Representatives; and

H. R. 13665. An act to provide for the submission to the Congress of preliminary plans and estimates of costs for the construction of a building for the Supreme Court of the United States; to the Committee on Public Buildings and Grounds.

H. R. 13978. An act to amend section 5 of the act of March 2, 1895, relating to official bonds; and

H. R. 14150. An act to amend section 279 of the Judicial Code; to the Committee on the Judiciary.

H. R. 6496. An act granting the consent of Congress to compacts or agreements between the States of New Mexico and Oklahoma with respect to the division and apportionment of the waters of the Cimarron River and all other streams in which such States are jointly interested;

H. R. 6497. An act granting the consent of Congress to compacts or agreements between the States of New Mexico, Oklahoma, and Texas with respect to the division and apportionment of the waters of the Rio Grande, Pecos, and Canadian or Red Rivers, and all other streams in which such States are jointly interested;

H. R. 6499. An act granting the consent of Congress to compacts or agreements between the States of New Mexico and Arizona with respect to the division and apportionment of the waters of the Gila and San Francisco Rivers and all other streams in which such States are jointly interested;

H. R. 7024. An act granting the consent of Congress to compacts or agreements between the States of Colorado and New Mexico with respect to the division and apportionment of the waters of the Rio Grande, San Juan, and Las Animas Rivers and all other streams in which such States are jointly interested; and

H. R. 7025. An act granting the consent of Congress to compacts or agreements between the States of Colorado, Oklahoma, and Kansas with respect to the division and apportionment of the waters of the Arkansas River and all other streams in which such States are jointly interested; to the Committee on Irrigation and Reclamation.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the joint resolution (S. J. Res. 167) limiting the operation of sections 198 and 203 of title 18 of the Code of Laws of the United States.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1928, and for other purposes, and that the House had receded from its disagreement to the amendment of the Senate numbered 7 to the bill.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 3776. An act to authorize the Secretary of the Interior to issue patents for lands held under color of title;

S. 3844. An act amending the fraternal beneficial association law for the District of Columbia as to payment of death benefits; and

S. 4127. An act to provide for the appointment of an additional justice of the Supreme Court of the District of Columbia, and for other purposes.

RELIEF FOR PORTO RICO

Mr. BINGHAM. Mr. President, in view of the very great distress in Porto Rico and the need for immediate action I ask unanimous consent that the joint resolution which came over from the House this morning and which is exactly the same as a joint resolution now on the Senate Calendar, except that instead of a loan fund of $10,000,000 it provides for a loan fund of only $6,000,000, may be immediately considered.

The VICE PRESIDENT. The Chair lays before the Senate a joint resolution from the House of Representatives, which will be read.

The joint resolution (H. J. Res. 352) for the relief of Porto Rico was read the first time by its title and the second time at length, as follows:

Whereas the island of Porto Rico is suffering from the effects of a violent hurricane of extraordinary intensity, unusual duration, and unexampled violence which visited the island on September 13 and 14, 1928; and

Whereas no part of the island escaped suffering some damage; and

Whereas the total number of people affected by the hurricane was 1,454,047, of whom, according to the report of the American Red Cross, more than one-third, or 510,161, were absolutely destitute and without food; and

Whereas the coffee and fruit crops were almost totally destroyed, and the coffee plantations so injured that it will be at least five years before they can be restored to normal conditions; and

Whereas a very large part of the shade trees which are essential for the successful functioning of a coffee plantation were destroyed and more than five years will be required for their replacement or recovery; and

Whereas more than 140,000, or about one-third, of the trees in the coconut plantations were destroyed and it will be at least seven years before the new trees to be planted in their place will be bearing fruit; and

Whereas the damage to all the insular industries has been so great as to make it impossible for the insular government to give adequate relief in the emergency: Therefore be it

Resolved, etc., That there is hereby created a commission, to be known as the Porto Rican Hurricane Relief Commission (hereinafter referred to as the commission), and to consist of the Secretary of the Treasury, the Secretary of War, and the Secretary of Agriculture, of whom the Secretary of War shall be the chairman. It shall be the duty of the commission to assist in the rehabilitation of agriculture in the island of Porto Rico, particularly on the coffee plantations and on the coconut plantations, to encourage a more general planting of food crops needed by laborers on the plantations, especially of root crops, to aid in the repair and restoration of schools and roads, and to assist in providing employment for unemployed and destitute laborers. The commissioners shall receive no compensation for their services under this resolution.

SEC. 2. (a) The commission is authorized (1) without regard to the civil service laws to appoint and, without regard to the classification act of 1923, as amended, to fix the compensation of a secretary and such clerical and other assistants; and (2) to make such expenditures (including expenditures for personal services and rent at the seat of government and elsewhere) as may be necessary in carrying out the provisions of this resolution. The commission may, to the extent deemed advisable by it, utilize the facilities and the clerical and other personnel of the Department of the Treasury, the Department of War, and the Department of Agriculture, and may request and accept the cooperation of the insular and municipal governments of Porto Rico in carrying out the provisions of this resolution.

(b) There is hereby authorized to be appropriated the sum of $50,000 for administrative expenses incurred in carrying out the provisions of this resolution.

SEC. 3. For the purpose of carrying out the provisions of this resolution the commission shall have power to make loans to any individual coffee planter, coconut planter, fruit grower, or other agriculturist in the island of Porto Rico in such amounts and upon such terms and conditions as the commission shall by regulation prescribe, including an agreement by the borrowers to use the loan for the purposes specified by the commission; except that no such loan shall be made for a period of more than 10 years or in an amount in excess of $25,000 to any one individual. The rate of interest upon each such loan, beginning with the fourth year, shall be 5 per cent per annum, but the commission may, in its discretion, defer the payment of interest upon any such loan for such a period of time as the commission shall deem necessary. All such loans shall be made by the commission itself or through such agencies as the commission shall designate. For carrying out the purposes of this section there is hereby authorized to be appropriated the sum of $6,000,000, of which $3,000,000 shall be made immediately available, $2,000,000 shall be made available on January 1, 1930, and $1,000,000 shall be made available on January 1, 1931. All money received during a period of five years from the date of the approval of this joint resolution as repayment of any loan or interest on loan made under the provisions of this joint resolution shall be held by said commission as a revolving fund, which may be loaned on applications for the purposes and upon the terms and conditions herein provided, and all money received thereafter as payments of interest and principal on all loans made under the provisions of this joint resolution shall be covered into the Treasury as miscellaneous receipts.

SEC. 4. There is hereby authorized to be appropriated the sum of $2,000,000 to be used for the rebuilding and repair of schoolhouses damaged or destroyed by the hurricane in the small towns and rural districts of Porto Rico and for the employment of labor and the purchase of materials for repairing insular and rural municipal roads. The sum hereby authorized to be appropriated shall be expended in such manner and in such amounts as the commission shall approve.

SEC. 5. There is hereby authorized to be appropriated the sum of $100,000 to be expended by the commission in the purchase and distribution within the devastated area of Porto Rico of seeds and seedlings, particularly of food and root crops, in such manner as it deems advisable.

SEC. 6. The commission shall make an annual report to Congress at the beginning of each regular session, giving a complete account of its activities in carrying out the provisions of this resolution.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

Mr. SMITH. Mr. President, when a similar Senate joint resolution was brought up previously I called attention to conditions which existed in certain of the Southern States and introduced an amendment to the joint resolution.

I want to state, before any further action is taken in this matter, that I called in certain officials both of the intermediate credit bank and of the Department of Agriculture. Not taking sides either way, but with their aid and at their suggestion, I drafted a resolution under which the relief proposed to be extended to the Southeastern States will be under an entirely different administration. It will not interfere at all with the administration of the proposed relief to Porto Rico, but will be administered through the Agricultural Department and its farm-extension agents, just as the grain-seed relief was extended to certain Western States in the time of their adversity.

I am going to propose this resolution as an amendment to the Porto Rican joint resolution, because it would not, as I have stated, interfere at all with the administrative features of the Porto Rican measure, but would give the same character of relief to our own citizens who are suffering as acutely because of the visitation of that storm as people could possibly suffer materially. The area covered is of such extent that the States themselves can not adequately take care of the situation. I need not call the attention of the Senate to the fact that we have a farm-relief problem that was intense without an additional disaster caused by the weather which practically wiped out the proceeds of the labor of a year.

I am not going to object to the immediate consideration of the Porto Rican relief joint resolution, for the reason that I believe and know that the people of Porto Rico are suffering as greatly as, or perhaps more greatly, than are our people; but the degree of difference does not make the situation any less mandatory on our part to do what we can for our own at the same time that we are trying to relieve our adopted brothers.

Mr. SMOOT. Mr. President, will the Senator from South Carolina yield to me?

Mr. SMITH. I yield.

Mr. SMOOT. I ask the Senator if his proposed amendment to the joint resolution has been referred to any committee of the Senate?

Mr. SMITH. It has not been referred to any committee of the Senate. I did not have the time to take that action. The resolution was introduced in the House of Representatives. As a Porto Rican relief joint resolution had been submitted, as the conditions which exist in our section are similar to those which exist in Porto Rico, as the Agricultural Department working through its farm extension agents has itself collaborated in framing the joint resolution relating to relief for the South, which joint resolution has already been submitted to the proper House committee, and as time was pressing, I thought it was best to offer it as an amendment to the pending joint resolution. This amendment is identical with the joint resolution which was introduced in the House of Representatives, and upon which hearings have been had before the proper committee of that body.

Mr. McNARY. Mr. President, will the Senator from South Carolina yield to me?

Mr. SMITH. I yield.

Mr. McNARY. I am not at all conversant with the situation, but I assume from what the Senator has said that he has brought in an amendment to the Porto Rican relief measure covering losses in his own State.

Mr. SMITH. I beg pardon, but I did not hear the statement of the Senator from Oregon.

Mr. McNARY. I should like to have the amendment read to the Senate, in order that we may understand what is proposed to be done.

The VICE PRESIDENT. The clerk will read the amendment.

Mr. SMITH. Mr. President, I now understand the Senator's question, though I did not do so at first because of confusion in

the Chamber. I have offered an amendment to include all of the stricken region in the Southeast. I have a copy of the amendment, which I send to the desk, and I ask that it may be read.

Mr. McNARY. I should like to have the amendment stated, because I am not familiar with the situation as it is now being presented by the able Senator from South Carolina.

Mr. SMITH. I ask that the amendment may be read.

The Chief Clerk read as follows:

SEC. —. The Secretary of Agriculture is hereby authorized, for the crop of 1929, to make advances or loans to farmers in the storm and flood stricken areas of the southeastern United States where he shall find that an emergency for such assistance exists for the purchase of seed of cotton, corn, legumes, and vegetable crops, feed for work stock, and fertilizer, and, when necessary, to procure such seed, feed, and fertilizers and sell same to such farmers. Such advances, loans, or sales shall be made upon such terms and conditions and subject to such regulations as the Secretary of Agriculture shall prescribe, including an agreement by each farmer to use the seed and fertilizer thus obtained by him for crop production. A first lien on the crop to be produced from seed and fertilizer obtained through a loan, advance, or sale made under this section shall, in the discretion of the Secretary of Agriculture, be deemed sufficient security therefor. The total amount of such advances, loans, or sales to any one farmer shall not exceed the sum of $3,000. All such advances or loans shall be made through such agencies as the Secretary of Agriculture may designate. For carrying out the purposes of this section there is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, the sum of $15,000,000, to be immediately available.

Mr. McNARY. Mr. President, the amendment now offered is clearly expressed and seems to apply to all of the stricken regions of the South Atlantic States. I doubt, however, the wisdom of the practice suggested by the Senator from South Carolina. Heretofore all measures of a similar character have been referred to the Committee on Agriculture and Forestry, which has exclusive jurisdiction, and the practice has obtained uniformly, as I recall, that the benefaction extended shall be by way of appropriation of money for seed purposes only, with a lien upon the growing crop.

Without consideration by a committee, and particularly by the committee having jurisdiction, I repeat, I doubt the wisdom of a practice of this character and the going into a field heretofore unexplored, and attaching it as an amendment to a measure offered to meet a situation entirely foreign to the problem which obtains in the Southern States. I am interested that the committee having jurisdiction and being familiar with agricultural problems should have that question submitted to it for consideration and analysis, in conformity with a practice which has been uniform in its application, as I recall.

I say to the Senator, with a sympathy for the people who have suffered in the South, that if he will allow his resolution or amendment to be referred to the committee having jurisdiction, not later than to-morrow at 10 o'clock I will call a meeting of the committee to consider the proposal.

Mr. SMITH. Mr. President, since I have taken the position which I have taken in reference to this relief proposal, I would be perfectly willing to accord to the suggestion of the Senator from Oregon if the Senator who has the Porto Rican measure in charge will not ask unanimous consent for its consideration to-day. In that event I will ask that the resolution I have presented, and which I have proposed in the form of an amendment to the pending measure, be referred to the Committee on Agriculture and Forestry, that committee to have a meeting in the morning, canvass the situation, and make such report as in their wisdom they think the situation justifies. Then, whatever may be done, I will, if, in my judgment, it seems the proper thing to do, propose this resolution as an amendment to the House joint resolution if we may bring that measure up for consideration to-morrow.

Mr. BINGHAM. Mr. President——

Mr. McNARY. Mr. President, may I be pardoned for a moment by the Senator from Connecticut?

Mr. BINGHAM. Certainly.

Mr. McNARY. What course did the resolution in which the Senator from South Carolina is interested take in the House? Was it referred to the Committee on Agriculture of that body?

Mr. SMITH. I think it was; yes.

Mr. McNARY. What was their report?

Mr. SMITH. I have not the report before me. This amendment is one that is identical with a resolution that has been introduced in the House.

Mr. McNARY. And referred to the Committee on Agriculture, I assume?

Mr. SMITH. I think it was; I know the committee had a hearing.

Mr. McNARY. But that committee has taken no action with respect to the merits of this measure?

Mr. SMITH. No.

Mr. McNARY. Would it not be better, I ask the Senator, with a full sympathy for his constituency, to refer this matter to the Committee on Agriculture—I promise that committee will function promptly—and let it be reported by that committee as a separate measure, because it pertains to relief in the Southern States?

Mr. SMITH. The Senator suggests that it is best for us, under all conditions, to act according to our custom here in referring these matters to committees; but the exigencies of this case in the South, to all intents and purposes, are as pressing as are the conditions in Porto Rico. The Senator must know that I would not stand here and take the time of the Senate if the conditions for which I seek relief were not practically as distressing as the conditions in Porto Rico which it is sought to relieve. We have now before the Senate a measure which has already been before a committee and been reported out, and which has likewise passed the House; and I offer in my own capacity an amendment to that measure. I am going to vote for the Porto Rico resolution, but as the destruction of property in the Southeast came from identically the same source and was suffered in practically the same degree I do not think that I would be justified in voting to relieve the one situation and leaving the other to be taken care of at another time, because both measures seek to provide relief for suffering and distress which occurred at the same time. As the Senate can be advised by the officials of the Government who have visited this region as well as by those of us who represent it, I do not see why it is not proper to have this amendment attached to the pending joint resolution which has come here regularly and to have a vote upon it. If, however, the Senator from Connecticut will grant us one day more, I should like to discuss this question before that measure is taken up.

Mr. McNARY. May I make this observation? I appreciate the sympathy that the Senator from South Carolina has for those who suffer and with the problem of agriculture generally, but the Senator, as a very active and important member of the Committee on Agriculture and Forestry, remembers that heretofore we have always limited relief in such cases to the purchase of seed.

Mr. SMITH. Yes, Mr. President; but——

Mr. McNARY. Pardon me for just a moment. In this particular instance, as I gathered the language as read by the clerk, the proposed amendment carries seed, fertilizer, and something else.

Mr. SMITH. Those are the principal things.

Mr. McNARY. There is another.

Mr. BINGHAM. Feed.

Mr. SMITH. Feed for stock.

Mr. McNARY. Feed for stock. The committee in its practice heretofore, and under the precedents, has never gone beyond the mere purchase of seed. I think it is important, I say to the distinguished Senator, that we determine after some consideration whether we will go as far as he wants to go as indicated by his amendment. Consequently, I think the committee ought to consider the various factors involved in this amendment. I again say to the Senator that I shall call a meeting of the committee to-morrow morning at 10 o'clock and he will have quick action, one way or the other; but I think, in the interest of uniformity in legislation and in the wisdom of a practice that has always obtained here, that this amendment should take the regular course. I simply appeal to the judgment of the Senator, in which I have great confidence.

Mr. SMITH. Let me make this suggestion to the Senator: Suppose we refer both of these resolutions to the Committee on Agriculture and consider them together? The features of the one I offer in practically all particulars are the same as those of the one which provides for relief in Porto Rico. I have tried to draw this amendment so that it would cover the absolute needs of our situation. If we could refer both matters to the committee, so that we could have them there unacted upon, we could act more intelligently than upon one of them alone.

Mr. GEORGE. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. GEORGE. I wish to inquire if the joint resolution for the relief of Porto Rico is confined to the purchase of seed?

Mr. SMITH. I should like to ask the Senator in charge of the measure if the Porto Rican joint resolution is confined to the purchase of seed alone?

Mr. BINGHAM. No, Mr. President; the situation is entirely different; and may I say at this time that I hope very much that the Senator will withdraw his amendment and introduce

it as a separate measure and let it go to the Committee on Agriculture and Forestry, which has always had the consideration of questions dealing purely with farm relief.

This is a matter concerning which the Committee on Territories and Insular Possessions has entire jurisdiction, being a matter concerning the people of Porto Rico, over 100,000 of whom are starving at the present time and are being fed daily by the Red Cross. There is no similar situation in the United States. If there were it would not concern the committee of which I have the honor to be chairman.

The House of Representatives put this measure through yesterday without any objection, and without any amendments from any State or quarter of this country being attached to it, realizing that it was a matter of great concern, and that the people of Porto Rico needed immediate relief. It is not a question which concerns the Committee on Agriculture and Forestry so much as it is one which concerns the Committee on Territories and Insular Possessions.

The two matters, being so different, should be considered by two separate committees. Our committee met, and heard people from all quarters. No amendments whatsoever were offered of the nature to which the Senator from South Carolina refers. The matter was unanimously reported by our committee, and has been unanimously passed by the House. I hope very much that the Senator will see the justice of having his measure referred to the Committee on Agriculture and Forestry as a separate proposition, since it changes the agricultural policy of this Government in its connection with the farmers on the mainland of the United States.

Mr. SMITH. Mr. President, in reply to that, I want to say that I do not recall any specific case where relief of any kind has been extended to the South Atlantic States. The seed bills that we have passed from time to time referred to the section of the country where fertilizer is not indicated. Down in our section it is the sine qua non. It is the most expensive element in agriculture. Without it, you need not have seed; you need not have feed. In my section fertilizer is as essential to the production of a crop as irrigating water is to the production of crops in the West. It is the very basis of crop production. Without artificial fertilization there is practically no return.

For that reason, inasmuch as all that these farmers had was destroyed, and fertilizer is essential for the production of a crop, I put it in, having in mind the fact that we had never before asked for any relief that I can recall. If we did, we certainly did not get it; but I do not recall our ever having asked for it. But as fertilizer is so essential, as every man here representing the South Atlantic States must recognize, and as the floods in these stricken regions carried away all the feed for the animals as well as the food for human beings, I incorporated those things without which they can not go on.

As to the amount, that remains for the Senate to decide. I do not know that there is any great difference in regard to that.

Mr. NEELY. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from West Virginia?

Mr. SMITH. I do.

Mr. NEELY. I desire to ask what is the regular order. I understood it was the Hawes-Cooper bill.

The VICE PRESIDENT. This is a joint resolution from the House of Representatives.

Mr. SMITH. It is the one that we are now discussing. Mr. President, I understand that in the case of relief for farmers the precedent was simply a matter of the purchase of seed; that was all they had asked for. In this case, the seed would be practically useless without the fertilizer essential to the production or maintenance of the crop. Therefore I incorporated it in this amendment, after consultation with members of our different departments who understood the situation.

I do not want to prejudice the case at all; but I should prefer, individually, that this matter be held over until such time as the Agricultural Committee could discuss it, and then let the two come along together. After the committee to-morrow shall have canvassed the situation, I am perfectly willing to have the Senate take whatever action it may see fit to take upon it.

Mr. JONES. Mr. President, may I ask the Senator a question?

Mr. SMITH. Certainly.

Mr. JONES. Does not the Senator think it would be the wiser course for Congress to consider each situation of this kind on its own merits? In other words, it would look as though we were making what is ordinarily called a sort of logrolling proposition. It seems to me that each incident of this kind should be considered upon its own merits. I am satisfied that the Senator's proposition will be considered squarely and fairly. It does seem to me, however, that it ought not to be connected with a proposition of this kind, which should be considered solely upon its own merits.

Mr. SMITH. Mr. President, the Senator speaks about logrolling. In the midst of the unspeakable suffering of our people, I do not like to talk about logrolling.

Mr. JONES. I do not like the term, either, and I am not applying it to the Senator's proposition, except that it does seem——

Mr. SMITH. I have not tried to take advantage of any legislative situation. I simply have tried, while the matter of the distress caused by the storm of September 14 and 19 was before the Senate, to bring to its attention the fact that the same disaster visited our own people, and that they are suffering; and when we are considering sending help to aliens, why can we not consider our own people? That is all I ask.

Mr. JONES. This seems to be the situation: I have not been on any of the committees having jurisdiction of the subject; but my understanding is that the joint resolution that has passed the House and come over here has been considered by the House committee and the Senate committee, acting jointly, while the Senator's proposition has not been considered or passed upon by any committee.

I am in sympathy with the Senator's proposition so far as I know it; but it does seem to me that he ought not to insist upon attaching it to an independent proposition. In other words, it seems to me that each proposition of this sort should be considered upon its own merits. I have not any doubt but that the Senator's situation will be considered upon its merits, and passed upon by the committee upon its merits.

I want to appeal to the Senator not to delay this proposition—which, as I understand, has been considered very carefully by the committee of the House and the committee of the Senate—but to allow it to be acted upon under the assurance of the Senator from Oregon that the Senator's proposition and situation will be given early consideration and fair consideration, and a just conclusion will be reached upon it, and fair action taken by the Senate.

Mr. SMITH. Mr. President, when this terrible visitation occurred Members of this body went down to Porto Rico and studied the situation. It was terrible. The destruction of property other than crops was terrific, but it was no greater in degree than in certain sections of our country. It is very discouraging to one who desires to consider himself, and is in fact, a part of this great country, and his section an integral part of it, to find that not a single one except those from the section immediately affected have seemed to take any interest whatever in the distressed condition existing there. What I desire is to see whether or not this body will recognize the existence in the South of a condition similar to that which they have so assiduously sought to relieve in Porto Rico.

Mr. JONES. Mr. President, may I ask the Senator a question?

Mr. SMITH. Yes.

Mr. JONES. Has any bill or joint resolution on this subject been introduced by anybody from this stricken region?

Mr. SMITH. This is the Fulmer joint resolution, which was introduced the first or second day after Congress convened and referred to the committee, and upon which hearings were had. I do not know just what stage the measure has reached in the House; but I have been informed that it was drawn in collaboration with those who have charge of the extension work.

Mr. JONES. As I understand, however, no such joint resolution has been introduced in the Senate by anybody from the stricken area. It has not been brought to the attention of any Senate committee.

Mr. SMITH. Just at the time when I had given notice, through the press and otherwise, that I was preparing such a measure, the Congressman came over and showed me a copy of his joint resolution. My disposition was to wait until the House could act upon that joint resolution. In the meantime this measure came up; and being of the same nature, and the disaster being caused by the same force, the Senator can see how it appealed to me that this was the time for me to take what had already been carefully drafted and offer it as an amendment to the Porto Rican measure, believing that the Senate recognized the necessity of relieving our own citizens as well as our semicitizens.

Mr. JONES. I am not criticizing the Senator's position. I think he had a right to assume that it was proper to wait until action had been taken upon the joint resolution or bill introduced in the House for his section; but I think he should continue to follow that course. I think, if I may properly say so, that the House should act upon that joint resolution

and send it over here, and then let it go to one of our committees and be acted upon promptly.

Mr. SMITH. No, Mr. President; being myself within that region, I do not think my duty to my constituents and to the people of this country calls upon me to await whatever exigencies may exist in the House. I am not acquainted with what they are doing. I only know what my particular duty is; and that is what I am trying to do.

Mr. JONES. Mr. President, I gather from the Senator's statement that he conferred with the Member of the House, or the Member of the House conferred with him, and that it was rather agreed that the House Member would introduce the joint resolution in the House; otherwise the Senator would have introduced it here.

Mr. SMITH. Oh, no; he just brought his joint resolution to me, and said "This is what I have introduced in the House;" and, as I recall, he said that hearings had been had, or were in process of being had, upon it.

Mr. JONES. I do not say this in any critical way at all; but it would seem to be the proper thing for the Senator to introduce his joint resolution in the Senate and let it go to the Senate committee to be dealt with in conjunction with the House. If he should get his measure through first, of course it would go to the House. If they should get theirs through first, then it could be taken up here in the Senate.

Mr. SMITH. I understand, Mr. President. If it were not a case of distressing emergency we could talk about precedents, and so on; but this is a case of distressing emergency. The first of the year is almost here, and those who are in the region to which I have referred must know whether or not they will have to continue in their present condition. If they do not get relief, they can not go on. Any man who will visit that section will come back with the unqualified statement that there are hundreds of thousands who, if they can not get some relief, will have to move out and abandon their property. That is the situation.

Mr. WATSON. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. WATSON. I am sure we all appreciate the Senator's loyalty to his constituents, and his desire to serve them; but I believe that the Senator must know, upon reflection, that the case of the people of Porto Rico at the present time and those of his own State, or even of Florida, or any others in the stricken area of the South, is not parallel with that of Porto Rico. The question in his State is one of agricultural resuscitation and rehabilitation. In Porto Rico it is a question of feeding starving thousands of men, women, and particularly children. It can not be postponed to a later date. We shall be remiss in our duty to those people if we do not grant immediate relief and save them from unutterable despair.

The Senator has said that our first duty and obligation must be to our own people. The Porto Ricans are citizens of the United States, and not only citizens, but, in a very peculiar sense, they are the wards of this Republic. We took them by force. No plebiscite was held; no vote was taken. They were brought in as the result of war, and the simple truth is, I say to my friend, that they are in no better situation and condition to-day in Porto Rico than when they came into the United States and under the dominion of its flag.

If the Senator had read the testimony given by the directors of the Red Cross in Porto Rico, I know that his heart would have been touched. I know that he would have come to the conclusion to which any man must come who reads that testimony, that we have not fully and faithfully discharged our duty to the people of that island, who to-day are our wards, and who yet are suffering because of our remissness of duty, in my judgment.

Before the recent storm there was great disturbance and distress through the island. The death rate in Porto Rico is twice as great as it is in the city of New York; the number of cases of tuberculosis three times as great. Pellagra, or hookworm, affects thousands and tens of thousands of children, all because of underfeeding and undernourishment, and since this terrific storm swept over the island and destroyed their coffee plantations and their citrus-fruit groves, starvation faces them, and in multiplied thousands of instances unless immediate relief be furnished by this Government they must of necessity suffer and die.

There is no such comparable condition in the State of my dear friend from South Carolina. In South Carolina it is a question of agricultural resuscitation, but there is no such condition such as that presented to us to-day in the island of Porto Rico.

I ask my friend, simply as a matter of humanity as well as of justice, to make no objection to this resolution at this time, but permit it to pass in order that immediate service may be rendered to the suffering people of Porto Rico. Then afterwards, I will say to my friend, his measure will have due consideration by the Senate of the United States.

Mr. SMITH. Mr. President, the Senator and others who have spoken on this subject would, by inference, put me in the attitude of being less sympathetic with the Porto Ricans than they are. I suspect that I am really and fundamentally more in sympathy with them than any of these gentlemen. A fellow feeling makes us wondrous kind, and I want to see those people relieved. But our duty to Porto Rico in no sense lessens our duty to our own people.

I am going to make this proposition: If this joint resolution, without my amendment, shall be taken up and disposed of, whatever may be done with it, I shall ask unanimous consent that whatsoever action the Committee on Agriculture may take on the measure I intend to present shall be reported to the Senate to-morrow and shall be taken up for consideration in the morning hour to-morrow.

Mr. WATSON. A parliamentary inquiry. How will that affect the present order of business?

The VICE PRESIDENT. If the agreement is made, it will not affect the existing order of business.

Mr. McNARY. Of course it would not affect the existing order if there shall be a morning hour. But no one has given assurance yet that there will be a morning hour to-morrow.

Mr. SMITH. I mean that it shall have consideration the first thing; I do not care whether there is a morning hour or not.

Mr. McNARY. If there should be no morning hour, and some measure other than the unfinished business were taken up, it would interfere with the unfinished business. I would suggest to the Senator to incorporate in his agreement that we adjourn to-day until 12 o'clock to-morrow, so we would have a morning hour to-morrow. That would prevent any collision with the unfinished business.

The VICE PRESIDENT. Committee reports would not be in order if adjournment were not taken, so such an agreement would interfere with the existing order of business.

Mr. SMITH. I did not understand the ruling of the Chair. May I have the last statement repeated?

The VICE PRESIDENT. If the Senate should take a recess, action such as that suggested by the Senator would interfere with the existing order of business. The report of a committee would not be in order if the Senate took a recess until to-morrow. If the Senate should adjourn until to-morrow, it would not interfere with the unfinished business and the existing order if the agreement were made.

Mr. JONES. Mr. President, I would have no objection to the report being received to-morrow and going to the calendar, but I think the Senate ought to have some opportunity to see what is reported and what is recommended by the committee. I would have no objection to its being brought up day after to-morrow, after it has gone to the calendar for one day, so that Senators may have an opportunity to study the report and see what conclusion the committee has come to. But unanimous consent that a measure shall be taken up immediately upon its report, before anyone has had opportunity to study the report or to see the terms of the measure, I can not agree to. I would not object to the measure being reported to-morrow, whether we recess to-day or not, and the report going to the calendar. Then I would not object to taking it up day after to-morrow. If the Senator will put his request in that way I shall make no objection to it.

Mr. SMITH. Very well, Mr. President. Then I ask unanimous consent that on Thursday, immediately upon the reconvening of the Senate, we proceed to consider the measure reported by the Committee on Agriculture in pursuance of the resolution which I shall now introduce, if we reach the agreement, and it shall be referred to that committee.

The VICE PRESIDENT. Is there objection?

Mr. FRAZIER. Mr. President, I think the Senator from South Carolina has taken a proper step in presenting his amendment at this time. In view of the action that has been taken on the farm-relief question, in behalf of our own farmers here in the United States, in the past, it seems to me the Senator should perhaps be just a little suspicious of what might happen to his resolution if he lets it go over. The farmers in South Carolina have been hit by a hurricane, and they are in need of relief, just as much as are those poor people down on the islands are in need of relief.

Not only the farmers of the Senator's State but the farmers of all the other States of the Union have been hit by some sort of a hurricane during the past few years and need relief, too. Back in the war time we had a war-time hurricane that fixed

the prices of the farmer's products and let everything else soar to the skies. We had that hurricane to contend with. Then, afterwards, we had a deflation hurricane that struck us and blew thousands on thousands of farmers clear off their farms. Down in the South they have the cotton gamblers' hurricane, that manipulates the cotton prices so that the cotton farmers can not make anything from raising their cotton.

Up north we have the wheat gamblers' hurricane, and there was some sort of hurricane that struck the fruit growers and potato growers this fall. In my State, where we raise potatoes, the farmers could not get a price high enough to enable them to pay for the picking and hauling of the potatoes to market. Potatoes were a drug upon the market, because some sort of hurricane struck us. The farmers up there need relief, too. During the last seven or eight years the farmers throughout this Nation have been forced to leave their farms through some sort of manipulated hurricanes to the number of some five or six or seven hundred thousand each year.

I think the Senator should insist on his amendment to the joint resolution right now.

Mr. WHEELER. Mr. President, if the Senator will yield for a second, I was going to suggest that he ought not to insist on any effort to cure the conditions the Senator has described in North Dakota and the Northwest, because when Mr. Hoover comes in I am sure he is going to cure all of those things, and we ought to wait and give him a chance to perform the miracles which he promised to the people of those States.

Mr. FRAZIER. That may help some.

Mr. SMITH. Mr. President, let me make this statement: Whatever concessions I make to the order of business, I am making—if I shall make any—with the hope that the condition that I am here pleading for shall receive the same prompt attention and consideration in this body that the Porto Rican measure will receive. I think I am entitled to that, and I have a right to insist on it. I certainly am obliged to the Senator from North Dakota [Mr. FRAZIER]. I appreciate his sympathy.

I ask unanimous consent that on Thursday morning the report of the Committee on Agriculture on the measure, which I shall introduce and send to the Committee on Agriculture, shall be considered. I make that request.

The VICE PRESIDENT. Is there objection?

Mr. WATSON. What is the request? I could not hear it.

Mr. SMITH. Just one moment.

Mr. TRAMMELL. Mr. President, has the Senator from South Carolina any assurance that the committee will make any report on his resolution on Thursday or at any other time?

Mr. SMITH. I have the assurance of the chairman, but I think I would be willing to take a chance on that. I think we shall get a report of some kind, either favorable or adverse.

Mr. TRAMMELL. Mr. President, I am not going to object to the request for unanimous consent, but I want to make a statement. At the time the Porto Rican resolution was introduced by the Senator from Connecticut [Mr. BINGHAM], I asked to have it reported from the desk. At that time I made some brief remarks in regard to the situation in Florida—my State—a certain limited area of it having suffered similarly, to a great extent, to Porto Rico. While I shall not object to the consideration of the Senator's measure, I propose to offer an amendment to the pending joint resolution, when we reach that order, which will apply to my State in particular.

The VICE PRESIDENT. Is there objection to the unanimous-consent request of the Senator from South Carolina [Mr. SMITH]? The Chair hears none, and it is agreed to.

Mr. SMITH. I introduce the joint resolution for reference.

The joint resolution (S. J. Res. 182) for the relief of farmers in the storm and flood stricken areas of southeastern United States was read twice by its title and referred to the Committee on Agriculture and Forestry.

Mr. TRAMMELL. Mr. President, if amendments are in order, I desire to propose an amendment to the pending joint resolution.

The VICE PRESIDENT. The amendment will be stated.

The LEGISLATIVE CLERK. Insert at the proper place in the joint resolution the following:

That the said commission shall also assist in the rehabilitation of agriculture in that area of the State of Florida which suffered from said hurricane on September 15 and 16, 1928, and shall make and extend to farmers and fruit growers within said area in the State of Florida loans upon similar terms and conditions as herein provided for the purpose of the rehabilitation of agriculture in Porto Rico: *Provided*, That no loan made in the State of Florida shall be for more than $1,000 to any one farmer or fruit grower.

Mr. BINGHAM. Mr. President, am I to understand that the amendment is to go to the Committee on Agriculture and Forestry?

Mr. TRAMMELL. No; it is an amendment to the pending joint resolution.

Mr. WATSON. Does the amendment introduced by the Senator from Florida go to the Committee on Agriculture and Forestry?

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Florida to the joint resolution.

Mr. CURTIS. Mr. President, what is the status of the joint resolution from the House which the Vice President laid before the Senate a few minutes ago? Is it now before the Senate?

The VICE PRESIDENT. It is, as in Committee of the Whole.

Mr. CURTIS. I understood the Senator from South Carolina [Mr. SMITH] to ask unanimous consent that it go over until to-morrow.

The VICE PRESIDENT. No; he asked unanimous consent that on Thursday the resolution which he had just introduced may be considered. It has nothing to do with the pending joint resolution.

Mr. CURTIS. Very well.

Mr. TRAMMELL. Mr. President, I offered the amendment to the pending joint resolution because it was at the same time that a limited area in the State of Florida suffered, and agriculture in particular, about as disastrously as did agriculture in Porto Rico. I believe, in view of the conditions which existed in that limited area as the result of the disaster, that the Florida situation should have consideration at the same time we are considering the Porto Rican situation. I have not proposed, however, by the amendment such general relief as that which is proposed to be afforded under the provisions of the joint resolution now being considered in relation to Porto Rico.

The measure which we are now considering provides for Porto Rico that an appropriation of $2,000,000 shall be made for the purpose of building roads, both on the municipal system of roads and their highway system. This is a direct appropriation and gift on the part of the Federal Government. Within the storm area of Florida our roads suffered to quite an extent. There was great damage to highways in certain localities. But I am not seeking any assistance in that respect.

The joint resolution also provides for an appropriation of $100,000 for the purpose of buying seed and nursery stock as a gift for the purpose of restoring their farms and their fruit-growing enterprises in Porto Rico. The amendment proposed by me does not carry with it any such provision. I am merely seeking by the amendment which I have offered to have the privilege extended to the farmers and fruit growers of Florida of obtaining loans through this commission for the purpose of purchasing seed and fertilizer or for the obtaining of nursery stock that they may return to their farms and fruit-growing activities in that particular locality.

In order to show that there is no disposition to ask for any fabulous sum, it is provided by my amendment that no one loan shall exceed the sum of $1,000. The provision in the joint resolution with reference to Porto Rico is that loans may be made to the extent of $25,000 to any one grower or producer in Porto Rico.

I submit that under the provisions as they are applicable to Porto Rico there will be a restoration of the citrus-fruit industry in Porto Rico; and yet, under the provisions of the measure, if we allow them to stand as they are without some additional legislation, we will withhold from the people of Florida, who were engaged in the citrus-fruit industry, any relief when they, in fact, suffered a similar disaster.

There were groves in the storm area in my State where the trees were entirely uprooted. I recall one concrete case of a locomotive engineer who had saved his money and had planted a grove some 17 years ago, I think he told me. That grove had reached a stage of bearing and was the source of some profit and income to him. The grove was in the storm-stricken district. He told me that it was entirely destroyed and that a piece of property which he regarded as worth $25,000 a few days previously was absolutely worthless the day following the hurricane. Yet this body of American Senators, if my amendment shall be rejected, would presumably take the position that they should assist the people of Porto Rico in rebuilding their groves, but should withhold any assistance from citizens of our own country who have suffered from the same disaster.

Mr. BINGHAM and Mr. WATSON addressed the Chair.

The PRESIDING OFFICER (Mr. MCNARY in the chair). Does the Senator from Florida yield; and if so, to whom?

Mr. TRAMMELL. I will yield first to the Senator from Connecticut, who I think rose first.

Mr. BINGHAM. Will the Senator permit me to say that the fruit growers of Porto Rico have not asked for our assistance

in such a way as he would seem to imply. The chief aid is for coffee growers, who can not come back to the producing stage for five years. The citrus-fruit growers, although their crop was entirely destroyed and 5 or 10 per cent of their trees were destroyed, have not asked for aid and probably there will be very little of the aid required to assist any of them. It is required only in the matter of providing employment to keep from starvation 100,000 people in the mountains of Porto Rico, who work on the coffee plantations. I wish very much the Senator might withdraw his amendment and permit it to go to the Committee on Agriculture and Forestry, together with the amendment which the Senator from South Carolina [Mr. SMITH] proposed and which he so very generously withdrew at this time and asked that it might be referred to the Committee on Agriculture and Forestry, in order that the conditions affecting the States may be considered together, and that we may grant relief to the starving people of Porto Rico at the earliest possible moment.

Mr. TRAMMELL. I wish it understood, of course, that I fully appreciate that the situation is very distressing in Porto Rico, and I am heartily in sympathy with the policy of extending relief to them. But the fact that conditions there demand the consideration and the aid of the Congress emphasizes the fact that in certain territories in our own country our own citizens are entitled to some relief and some consideration. I desire to assist Porto Rico, but I do not care to go to the extent of ignoring the people of our own country who are in distressed circumstances. The picture is probably more extensive in regard to the distress in Porto Rico. There are probably more people there who have suffered, but in a certain territory within my own State, limited in area though it is, there is great distress among the people engaged in agriculture. They had their farm crops entirely destroyed. Not only did they have their crops and livestock destroyed, but they had their homes laid low by the same hurricane which laid low the homes in Porto Rico.

There are certain towns within my State which suffered most terribly as a result of the hurricane. The city of West Palm Beach, which I visited three days after the hurricane, is a striking instance. In the business section of that city I think there was not a single plate-glass window or store front in the entire town that had not been demolished. The stocks of goods had been flooded from rains which lasted throughout the hurricane. Going into the residential section, more particularly in that section where they had the more poorly constructed buildings, we found block after block of buildings absolutely demolished, and thousands and thousands of people were rendered homeless in that particular city. Out in the agricultural sections, particularly on Lake Okeechobee, hundreds of people lost their lives as a result of the flood.

Great damage resulted from the wind and rain, and practically all their farm homes were destroyed. I myself witnessed the fact that a number of buildings were completely demolished which had previously been occupied by the farmers. I saw one building which by wind and by flood had been washed half a mile from its original location as the result of the storm, and only by a miracle five people who were in the house were able to cut their way through the ceiling into the loft of the building and thus save their lives. So that so far as distress is concerned, so far as conditions which should appeal to the Congress are concerned, we have a similar condition in that particular locality in Florida.

Mr. WATSON. Mr. President, will the Senator suffer an interruption at this point?

Mr. TRAMMELL. I yield to the Senator from Indiana.

Mr. WATSON. Of course, suffering is suffering wherever it may occur, however limited may be its scope or however wide the territory it covers. The facts are that Florida is one hundred and seventy times as large as Porto Rico and has about the same population. The Red Cross authorities report that 5 per cent of the people of Florida were affected by this storm and that 95 per cent of the people of Porto Rico were affected, and that is the present situation. I am not abating one jot or tittle of our obligation to our citizens in the United States, in Florida, or elsewhere; but I do submit to the Senator in all fairness that an entirely different situation obtains with reference to the two. I am asking him whether or not he is not now willing to follow the example set by the Senator from South Carolina [Mr. SMITH] and refer his proposition to the Committee on Agriculture and Forestry, as did that Senator.

Mr. TRAMMELL. I will dispose of that suggestion a little later. I do not know whether I want to accept it or not. I rather think now it is an unreasonable request. I believe that American Senators should consider conditions of distress and an appeal for assistance on the part of citizens of their own country just as quickly and just as readily as they do similar appeals that come from Porto Rico, and that the matter should not be deferred until some future day.

Mr. REED of Pennsylvania. Mr. President, will the Senator from Florida yield for a question?

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Pennsylvania?

Mr. TRAMMELL. Certainly; I yield for a question.

Mr. REED of Pennsylvania. I am wondering whether the Senator's remarks are intended to imply that the people of Porto Rico are not American citizens and that Porto Rico is not a part of this country?

Mr. TRAMMELL. Oh, no; I am not trying to convey any such impression as that; but so far as Porto Rican citizens are concerned, there is a difference and distinction between them and American citizens.

Mr. REED of Pennsylvania. I beg the Senator's pardon; a Porto Rican is an American citizen.

Mr. TRAMMELL. I am not opposing the Porto Ricans; I am heartily in sympathy with them, but I wish that I could obtain as much sympathy for citizens who live upon American soil as is being manifested here for citizens who live in Porto Rico. That is what I am seeking.

Mr. REED of Pennsylvania. A citizen of Porto Rico is as much a citizen of the United States as is a citizen of Florida or Pennsylvania.

Mr. TRAMMELL. Technically, of course—we are speaking technically now—I realize that, and the Senator from Pennsylvania need not attempt to enlighten me on that subject. I realize, from a technical standpoint, that is true. What I am appealing for is the same sympathy for people who live upon American soil as is being manifested for those who live in Porto Rico; the same sympathy for industries in our country as is being manifested for industries in Porto Rico. That is what I am appealing for; and I do not enjoy the idea of having the interests of our American people deferred to some future day. That is the reason why I am appealing for consideration at this particular time.

The Senator from Indiana [Mr. WATSON] has stated that Porto Rico is much smaller than is the State of Florida. I forget how many times smaller he said, but that probably the State of Florida was one hundred and seventy-five times as large as Porto Rico. That may be true; but the poor unfortunate orange-grove owner who lost his grove and had his trees uprooted is in just as distressed condition as are some persons who in Porto Rico had similar experiences. So is the poor unfortunate widow who wrote me from West Palm Beach, telling me at the time of her husband's death she had left to her a home which was estimated to be worth about $10,000. She sent me a picture of it, showing nothing except the débris of her once nice, comfortable home, and telling in her letter, as she did, that at the time of her husband's death she thought she had a comfortable place in which to live and a reasonable income from the rent upon the building for the remainder of her life, but after the hurricane she found herself with nothing left but a lot, the building destroyed, her income gone, and she was absolutely penniless, with no means and no way in which she could obtain money to rebuild even a small, humble little building upon the lot which she owns in that city. I think, so far as her condition is concerned, it is just as distressing as is the condition of some one who may live on the soil of Porto Rico. It is for cases of that character and situations of that nature that I am pleading here and appealing to the Senate in the consideration of the disasters and the necessities for relief following the hurricane that some assistance be afforded.

I am not asking for relief to rebuild roads; I am not asking for assistance to rebuild public-school buildings; I am not asking funds for which to make a gift of seeds to farmers; but I am merely pleading and begging of the Senate that the people of Florida who are engaged in agriculture shall be given the same privilege upon similar conditions and terms of obtaining loans for the purpose of buying seed, fertilizer, and nursery stock, and that in our case in Florida the limitation shall be not exceeding $1,000, while it is proposed to extend to citizens in Porto Rico the privilege of loans up to $25,000.

Mr. BINGHAM. Mr. President, will the Senator from Florida yield to me?

Mr. TRAMMELL. I should like very much to have the Senate consider the situation, for, in principle, the affording of relief to the storm area in Florida is not unlike affording relief in similar circumstances to Porto Rico. In the magnitude and extent of the disaster, of course, the two situations might not be similar, but so far as the principles involved are concerned and the distress of a great number of citizens and of a considerable property interest in that limited area in the State of Florida, I think the two situations are quite similar.

Mr. BINGHAM. Mr. President, the Senate has by unanimous consent agreed to consider the situation in the Southeast day after to-morrow, upon the report of the Committee on Agriculture, and I very much hope that the Senator from Florida will offer his proposal as an amendment to the measure just offered by the Senator from South Carolina; that he will appear before the Committee on Agriculture to-morrow and be heard by that committee, and that they may establish the policy to be followed in the case of the distress of farmers in the continental United States just as the Committees on Insular Possessions both of the House and of the Senate have considered the policy to be established with regard to the suffering and distress growing out of the hurricane in Porto Rico.

It seems to me that would be the place where any such amendment should be considered; that it should not be brought up and added to a measure affecting one of our insular possessions, but should then be added to the measure which has been referred to the Committee on Agriculture for the relief of the Southeast. I hope the Senator will be good enough to pursue the course I suggest.

Mr. HEFLIN. Mr. President, will the Senator from Connecticut yield to me?

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Alabama?

Mr. TRAMMELL. I yield.

Mr. HEFLIN. Will the Senator from Connecticut give us his kindly aid if the course which he suggests shall be taken?

Mr. BINGHAM. I said, when the amendment was first offered, that I should be glad to do all I could to secure assistance for the Southeast. That is in the RECORD when the matter was first brought up.

Mr. HEFLIN. Mr. President, I think the amendment offered by the Senator from Florida is a very meritorious one and I would vote for it even on the pending measure, but if the Senator from Florida wishes to pursue the course suggested by the Senator from Connecticut I do not think there will be any trouble about attaching his amendment to the measure offered by the Senator from South Carolina [Mr. SMITH]. I repeat, however, I am ready now to vote for the amendment of the Senator from Florida if he insists on it.

Mr. TRAMMELL. Mr. President, I realize the attitude of the chairman and members of the committee in charge of the pending joint resolution and also the attitude of a great many Senators. Sometimes we can read as we run and understand the situation. I feel very hopeful that the adverse attitude, which seems to be rather apparent to my resolution as an amendment to the pending measure, will not exist if it shall be considered as an independent proposal. I think, however, that the wrong course has been pursued. I think in the very beginning the committee should have brought in a bill dealing with the entire situation and not selecting merely Porto Rico for relief. I think that it should also have considered the people on American soil who suffered as the result of the same hurricane which brought disaster to Porto Rico.

Mr. BINGHAM. Mr. President——

Mr. TRAMMELL. I yield to the Senator from Connecticut.

Mr. BINGHAM. The Senator realizes, does he not, that the Committee on Territories and Insular Possessions has no jurisdiction whatsoever over any thing that may happen in continental United States, and it would have been entirely out of place for that committee to have considered any measure which might properly have gone to the Committee on Agriculture and Forestry?

Mr. TRAMMELL. That may technically be correct; but, as a matter of policy, I do not think that ordinarily the committees are so very jealous in regard to preserving their technical jurisdiction. I find that that situation does not prevail, generally speaking, on the part of the committees of the Senate.

Mr. President, in view of the fact that the Senator from South Carolina, who is also advocating certain relief because of conditions resulting from the hurricane of September 14 to September 16, has agreed to have his measure referred to the Committee on Agriculture, I am willing under the circumstances, of course, to have the proposal made by me considered by that committee. I hope, however, that the committee will give very careful consideration to the entire subject; and I further indulge the hope that the committee will recommend as great generosity for the people of the storm-stricken areas of Florida and other sections in the United States as has been recommended in behalf of the unfortunate people of Porto Rico and that we, too, for our sections in this country, may obtain relief. Such relief would not only be just but is, indeed, very necessary in certain localities on American soil. I repeat that under the circumstances I am willing to let the matter be considered by the Committee on Agriculture and Forestry.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Florida is withdrawn and will be referred to the Committee on Agriculture and Forestry. The joint resolution is still before the Senate as in Committee of the Whole and open to amendment.

Mr. KING. Mr. President, in the face of appalling calamities legal restraints and constitutional limitations become slender reeds. The situation in Porto Rico caused by the hurricane, which swept from one end of the island to the other, excites the sympathy of all who are familiar with the facts. We are told that more than 90 per cent of the people of the island have suffered and that tens of thousands are without homes or employment. Hundreds of thousands are without adequate protection and suffering for want of food and a hundred thousand are on the verge of starvation. The Red Cross organization has done everything within its power to ameliorate the condition of the people, and its services undoubtedly have saved the lives of thousands. But its funds available for Porto Rican relief are practically exhausted, and the conditions there found call for a large measure of relief if suffering is to be mitigated and the death of thousands prevented.

Under conditions of this kind appeals for Federal aid are difficult to resist. If only a small section of the island had been visited by the destructive storm which swept over almost the entire island, there would have been no warrant for an appeal to Congress.

In considering this question it must be borne in mind that Porto Rico is not a part of the continental United States. It is distant from our shores but nevertheless is a part of the United States. Its inhabitants are American citizens. The island has but a few industries and its resources have limitations. The great majority of its people are engaged in producing coffee, sugar, and fruits. Those who are suffering most are persons of but limited means, and indeed, many had no possessions. Tens of thousands were employed in the growing of coffee and upon lands devoted to the production of various kinds of fruits. Unless something shall be done to relieve the situation, many thousands will die of starvation.

A catastrophe so overwhelming, one which practically sweeps an entire country, can not be overlooked. The American people deeply sympathize with their fellow citizens who are the victims of this great calamity. It is to be regretted that there are not agencies to deal with this most deplorable situation. Many of our people have generously contributed to the Red Cross and perhaps to other organizations to meet this great emergency.

The contributions made have been wholly insufficient and those who have made investigation and have brought the facts to the attention of Congress and the country declare that relief must be given immediately, not only to prevent further physical suffering, and indeed starvation, but to make it possible for the people of the island to find employment and for the lands that have been denuded of their trees and vegetation to again be made productive. We are told that it will take a number of years for the coffee lands to again be made productive, and that in the meantime, unless relief is granted, conditions will grow progressively worse. With these facts before us, it is difficult to urge constitutional questions or challenge the right of Congress to grant the relief called for in the pending measure.

Mr. President, there is serious question as to the constitutionality of the bill before us. It is quite likely that those who drafted the constitution did not intend to confer upon the National Government authority to deal with questions of this character, and to take the money obtained from the people, under the taxing power, and devote it to charitable purposes. However, there are some who may defend the bill before us upon the ground that it is an aid to agriculture and that for years Congress has been appropriating large sums to promote and aid agriculture.

My recollection is that appropriations have been made to purchase seed for farmers in draught-stricken parts of the United States. Congress has enacted measures under which loans have been made to aid agriculturists, the advances, as I now recall, being made under the direction of the Department of Agriculture. I am told that most of the obligations of the farmers to whom money was advanced were repaid. The present measure is somewhat similar to measures which I have in mind. At the last session of Congress several million dollars were appropriated for the alleged extermination of the corn borer, a pest which was injuring the corn crop in a number of States, and to compensate farmers in Texas for permitting certain lands to lie idle in order to exterminate a destructive cotton parasite. As a matter of fact, it was a direct aid to farmers within the States affected without any reimbursement to the United States.

The bill under consideration contains provisions for loans which are to be repaid to the Government. It is regrettable that conditions arise which become the basis of demands for Federal relief. Each measure that is passed in response to these demands swells the precedents and makes more difficult resistence to appeals, some of which may lack merit. The precedent having been set, it is difficult to draw the line and determine where relief may be justified.

Mr. President, I fear that appeals to Congress for aid will become more frequent by reason of the precedents which are being established, and it is quite likely many of the appeals made will be entirely lacking in real merit but will be pressed with such fervor as to break down all opposition. We are admonished by the Senator from South Carolina [Mr. SMITH] and the Senator from Florida [Mr. TRAMMELL] that they will press measures calling for relief for their States. They have insisted in forcible speeches just made, that conditions in their States call for relief; that the same storm which wrought such havoc in Porto Rico brought suffering and destruction to sections of their States.

Mr. President, States may do that which the Federal Government may not do; and, speaking generally, and without reference to the situation in South Carolina and Florida, I believe that under some circumstances States should make provision to afford relief to those who suffer from storms or tempests and other calamities which, from time to time, visit various parts of our country. I recall that in my own State quite recently a disastrous flood occurred which wrought considerable havoc and brought ruin to many people.

Two or three years ago a frightful explosion occurred in one of the coal mines in my State which snuffed out the lives of several hundred men. The families of most of them were left without means of support. Several years prior to that awful catastrophe an explosion occurred in a coal mine which resulted in the death of several hundred miners. Their families were left destitute. Appeals were not made to the Federal Government in their behalf. It was felt that the mining companies, the State, and its inhabitants should make provision for the relief of the suffering and sorrowing families.

Disastrous storms have visited Kansas, Nebraska, and other States, destroying farms and their crops and inflicting serious losses and damages. Congress has not granted relief in these cases. The Johnstown disaster, which many recall, swept away property of great value and carried many persons to their death. It was only a few years ago when, in Ohio, there were great floods which caused enormous damage and loss of life. Appeals were not made for Federal relief.

Mr. FESS. Mr. President, the Senator has referred to the disaster in Ohio. That was in 1912, when the Miami River broke its bounds, and flooded all of the cities for about 72 miles down to the Ohio River, including Dayton, through the main street of which water was running at the rate of 30 miles an hour as deep as the second stories of buildings. The State afterwards expended $35,000,000 in the form of conservancy to protect those cities. They did not ask for any relief from the Federal Government.

Mr. KING. The State of Ohio, acting within her constitutional authority, did a splendid thing and met the situation, serious as it was, in a magnificent way.

Mr. President, as I have indicated, it is hard to resist appeals for Federal aid where a condition exists such as that in Porto Rico is presented. It is to be hoped that the action of Congress in dealing with the Porto Rican situation will not be invoked as a precedent for further appeals to Congress. The Porto Rican situation possesses features and characteristics differentiating it, I think, from other appeals which have been made and from some appeals which in the future may be addressed to Congress. Mr. President, expressing my deep sympathy for the people of Porto Rico, I can not help but regret that the Federal Treasury must be drawn upon to meet the situation. It is not a golden cornucopia to which resort may be had by all, and taxes should not be collected except for governmental purposes and should not be expended except within the limits of the Constitution.

However, in view of the precedents and the imperative necessity of immediate aid to prevent further suffering and death, I feel constrained to offer no opposition to the passage of the bill under consideration.

Mr. DILL. Mr. President, the discussion this afternoon regarding conditions in various parts of the country demanding the attention of Congress in connection with this joint resolution leads me to call attention to the fact that if this policy is to become the policy of the Government there is a situation in my own State that should be considered.

The people in the northern part of Stevens County, in the State of Washington, tilling their farms and living there as citizens, have found that the fumes of a great smelter on the Canadian side of the line come across the line and destroy the vegetation on their land, destroy their crops, destroy their forests, and make them sick. We have appealed again and again to the Federal Government to exert its power in an international way to protect the people. Finally we secured an appropriation to have an investigation made; but we have no treaty rights under which we can compel this corporation to do anything, and one by one the farmers of that country are being driven out. Nothing can be done by the State, because the State has no right or authority as against the Canadian Government or a Canadian corporation. The banks of that country are beginning to close, and it is only a matter of a little time until the entire area, rich and prosperous as it has been, will have been devastated by the fumes coming from this smelter.

If this were an American corporation, our people could go into the courts and protect themselves. If it were a corporation in another State, that could be done; but, owing to the fact that it is in a foreign country, the people are absolutely without protection, are absolutely helpless; and the mere fact that their homes are being ruined, that their land is being made a desert, and they are being driven out slowly in no way changes the fact that they are being as literally destroyed in their homes and in their property as if it had been done suddenly.

It seems to me this is a dangerous policy to set out upon unless we are going to continue it to the point of taking care of the ruin that is done in all parts of this great country; and certainly we must take into consideration a condition such as I have mentioned in the State of Washington, where nobody who lives there is to blame.

Mr. FESS. Mr. President, before the Senate votes on the pending measure I should like to state that I regard the situation in Porto Rico as of such emergency that I shall not hesitate to vote for the relief measure. The remarks that have been made, however, are suggestive of the necessity, when we inaugurate a new policy, of having the matter go through all the legitimate committees and receiving proper consideration by them. It is very important; but I shall vote for the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate as in Committee of the Whole and open to amendment.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

PRISON-MADE GOODS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

Mr. HEFLIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	Kendrick	Shipstead
Barkley	Fletcher	Keyes	Shortridge
Bayard	Frazier	King	Simmons
Bingham	George	La Follette	Smith
Black	Gerry	Larrazolo	Smoot
Blease	Glass	McKellar	Steck
Borah	Glenn	McMaster	Steiwer
Brookhart	Goff	McNary	Stephens
Broussard	Gould	Moses	Swanson
Bruce	Greene	Neely	Thomas, Idaho
Capper	Hale	Nye	Trammell
Caraway	Harris	Oddie	Tydings
Copeland	Harrison	Pittman	Vandenberg
Couzens	Hastings	Ransdell	Wagner
Curtis	Hawes	Reed, Pa.	Walsh, Mont.
Dale	Hayden	Robinson, Ind.	Warren
Deneen	Heflin	Sackett	Waterman
Dill	Johnson	Schall	Watson
Edge	Jones	Sheppard	Wheeler

Mr. FESS. My colleague [Mr. BURTON] is unavoidably detained from the Senate on important business. I will let this announcement stand for the rest of the afternoon.

Mr. JOHNSON. I desire to announce that the senior Senator from Nebraska [Mr. NORRIS] and the junior Senator from Wisconsin [Mr. BLAINE] are absent on official business.

The PRESIDING OFFICER. Seventy-six Senators having answered to their names, there is a quorum present.

Mr. CURTIS. Mr. President, I understood that the Senator from West Virginia had the floor when we adjourned last night.

Mr. GOFF. Mr. President, I had promised the Senator from South Carolina [Mr. BLEASE], upon the matter that is now

before the Senate, to yield to him for some remarks which he desires to make concerning the measure before I proceed with the argument which I desire to submit to the Senate on the constitutionality, as well as the facts, of this measure. That Senator being in the Chamber, I shall now yield to him.

Mr. BLEASE. Mr. President, the Senator who introduced the pending bill has it very much at heart, and it is with a great deal of reluctance that I have anything to say against the passage of any bill in which he is so much interested. But the State which I have the honor in part to represent in this body is not in favor of interference with the rights of the States in such a way as this bill proposes. As to the legal question, I shall leave that entirely to the distinguished Senator from West Virginia.

I have had some experience with prison labor. My State at one time had a hosiery mill in her penitentiary and conditions reached such a state that it was absolutely necessary to have it abolished. I was instrumental in having it abolished, and it was on account of the fact that it was detrimental to the health of the people who were put into it without their permission.

We then had a problem of what to do with our convicts. I myself can not imagine anything more pitiful than to see an old man or an old woman taken off and put in a home, with absolutely no work, no task, just to sit there and wait until death comes along and removes them from their condition. I feel that in these homes for the aged, in all such cases, every man and woman should have some task; it does not make any difference how old the person is. If a man has been a farmer let him have two or three little rows out in a yard or a little patch. If he is a bootmaker give him a pair of shoes to mend. Give everyone something so that he can get up in the morning and feel that he has a task before him and that there is something for him to do; that he has a responsibility of some kind.

The same applies to the old woman. Give her part of the house to clean, or give her part of the yard to sweep, not that her work, or that of the old man, would be of any value, not that it would amount to anything, but it would be just a little something to let them feel that they have a responsibility, and are not just to sit around on the porch or in the house waiting to die, to get out of somebody's way. I do not think there is anything more miserable on this earth than that kind of a life for any man or woman.

Nor can I think of a greater punishment than to take a well, strong, hearty man and say to him that he must parade a corridor all day, or sit down and think about his people at home, sit down and think about the outside world, just sit in idleness. I think the convicts would welcome some kind of wholesome, clean work.

We established in my State a chair factory, possibly better called a furniture factory. In that factory there is no danger to health. It is not like the hosiery mill, where the window sash had to be kept down in order to keep the thread from blowing and tearing up the work. In that chair factory the laborers can have plenty of fresh air. They can take exercise. They have everything there that makes for their comfort and health.

What are we going to do with those convicts if we say there shall be no more convict labor? Farming them out has been tried, and that is the most cruel and unmerciful punishment you can inflict on them, to lease them out to somebody who says they have to get up at a certain hour in the morning, rain or shine, hot or cold, and go out and be kicked and beaten and knocked around, to try to make money, to make some man who is in some business more wealthy than he is. That is cruel.

It is just as cruel in some instances to put them out on the road and give some man, who has never even bossed a blind ox, a blacksnake whip and a pistol and say, "Now, you are the boss," and he will beat and kick and knock some poor devil around just because he is unfortunate enough to be a prisoner.

There are a good many people in prison in this country, Mr. President, who should not be there. There are a good many innocent people in the prisons of this country. There are other people who probably are justly in the prisons of this country, who have already paid the penalty for their crime, but, on account of the hardship of having to be tried before some judge who is unmerciful, are given long sentences, while other men who committed the same crime, possibly, or worse, perhaps struck a little more merciful judge and were given shorter sentences.

Then, if we look at the other side of the proposition, there are a good many people out of the penitentiaries of this country who really should be in them; if they had had their just deserts, they would have been there long ago. Sometimes we find them in legislative bodies making laws to govern other people.

I believe, Mr. President, if it is necessary to have either, it is better to have a poor Government and a rich people in preference to a rich Government and a poor people. I consider that good democracy.

In my own State, if we tear down this chair factory, we will deprive the State of South Carolina of a profit which will have to be made from some other source. Of course, if it is a matter of humanity, it does not make any difference about the dollars. Put the man above the dollar every time. When it comes to the matter of a human right or a human soul, it does not make any difference what amount of money is at stake, it should not be taken into consideration. Humanity, and the freedom of human beings, should come first at all times. But when it comes to the question of work, where it is really a help instead of a burden, I say that to take it from these people, and let them be idle and do nothing, inflicts a punishment that is greater than what we have to-day.

I repeat, if the right to make goods in prison is abolished in my own State it will make the burden heavier upon the people who have to pay the taxes of the State, because they are the ones who will be the sufferers.

Mr. President, who is demanding the passage of this bill? Somebody says the women are. I have not a thing to say against them, not a thing, but very often many people advocate things that they do not thoroughly understand.

I have been very much amused in the last few days by an incident of which I am now reminded. I have received some letters and telegrams asking me to lend my support and do all I could for a certain measure that will soon be pending in the Senate. Just for my own satisfaction I wrote back to several of those people and asked them if they had read the measure and understood it. Up to this time I have not received a single reply and I am sure it is because those who telegraphed and wrote me to support the measure had not read it and do not really know what is in it. But they want me to support it simply because some propaganda which has been spread by somebody has come to them and caused them to write me as they did. It may be possible that the same is true in relation to the prison-made goods measure now before us. It may be that certain people have some interest in it. It may be that people who really do not understand the situation and the condition that confronts the people of the country are pushing the measure.

Prison reform is a great question. A great many of us have studied it. In that connection I am going to ask permission, not to read, because I do not care to take up the time of the Senate, but to have printed in connection with my remarks in the RECORD certain extracts from a speech delivered by myself in Boston, Mass., at the governors' conference on August 24, 1915. There is a part of the speech which it is not necessary to print, as it does not relate to the question now before the Senate.

The PRESIDING OFFICER (Mr. FESS in the chair). Without objection, the request of the Senator from South Carolina is granted.

The extracts are as follows:

DUTY AND RESPONSIBILITY OF THE GOVERNOR IN DEALING WITH PRISONERS

(Former Gov. COLE L. BLEASE, of South Carolina)

Mr. Chairman and gentlemen of the governors' conference, three-quarters of a century ago, in the historic city of Boston, one of the clearest thinkers that Massachusetts, or even the Nation, has yet produced, in an address upon Man, the Reformer, emphasized the thought that "every great and commanding moment in the annals of the world is the triumph of some enthusiasm." He cited as an example, "the victories of the Arabs after Mahomet, who, in a few years, from a small and mean beginning, established a larger empire than that of Rome." "But," he predicted, "there will dawn ere long on our politics, on our modes of living, a nobler morning than that Arabian faith, in the sentiment of love. This is the one remedy for all ills, the panacea of nature. We must be lovers, and at once the impossible becomes possible. Our age and history, for these thousand years, has not been the history of kindness, but of selfishness. Our distrust is very expensive. The money we spend for courts and prisons is very ill laid out. We make, by distrust, the thief, and burglar, and incendiary, and by our court and jail we keep him so. An acceptance of the sentiment of love throughout Christendom for a season would bring the felon and the outcast to our side in tears, with the devotion of his faculties to our service."

There is no crystal ball in which man may see portrayed the future, and little did Emerson think that two decades after he was so eloquently preaching this doctrine of peace and love this Nation would be plunged into four years of civil strife. When he said that "this great, overgrown, dead Christendom of ours still keeps alive at least the name of lover of mankind," and phophesied that "one day all men will be lovers, and every calamity will be dissolved in the universal sunshine," little did he reck that 74 years later the

far-flung battle lines of Europe would stretch from hundreds to thousands of miles and that nearly the whole world would be in a death grapple, attended by cruelty and sacrifice and misery which passes human understanding. Millions of men are seeking each other's life blood, and—

"Few shall part where many meet;
The smoke shall be their winding sheet,
And every sod beneath their feet
Shall be a soldier's sepulchre."

But it has been the history of the world, in accordance with the slow but steady progress of the human race, that the darkest night is ever followed by the brightest dawn, and from the gloom which now enshrouds the land and the sea, will emerge a nobler civilization, which will continue to gain strength in an atmosphere purified by the shock of battle, and human nature must be softened by the blood that has been spilled and by the tears that have been shed and by the prayers of widows and orphans that have ascended to the throne of a pitying God.

You will pardon me for this digression; but the thought was suggested by the fact that the spirit which plunges nations into wars, except the nations which wage war against oppression, is the same spirit which has in centuries past led men to seek the cruel punishment of prisoners—a spirit which is vastly too much in evidence in this twentieth century.

Within the past few weeks we read in the newspapers of a man who had made an attempt upon the life of another being plied with questions until he was too weak to talk, then being walked up and down the corridors of his prison to revive him, then plied with questions again, and subjected to God alone knows what else, in the administration of the "third degree." Later this prisoner was found on the floor of his cell with his skull crushed in, and it was stated that he had climbed to the top of his cell door and jumped to the floor, killing himself. Whether he was murdered or whether he really committed suicide I do not know; but this I do know: That the suicide of any man who would hardly be unnatural under such circumstances, and that the treatment accorded him, before conviction, would have been a disgrace to our civilization even had it occurred after he had been tried and sentenced. As remarks a very distinguished southern minister of the Gospel, "the so-called third degree is a revival of the horrible method of the Spanish Inquisition, a species of torture to compel an accused person to incriminate himself, a flat contradiction of the humane principle of law that regards every person innocent until proved guilty." This "third-degree" method that is practiced in the North and the East and the West—less frequently, I am glad to say, in the South—whether a man be killed during its administration, or whether he be driven to commit suicide, or whether he be tortured sometimes into confessing crimes of which he may be innocent, is barbarity in a sneaking form, under the sanction of law, and those guilty of practicing it evidence a spirit as mean and contemptible as the malice which animates the midnight assassin.

* * * * * * *

As was eloquently said by a southern orator not long ago: "A nation of mollycoddles might meekly lie at the feet of popes and kings while schools were being abolished, libraries burnt, scientific research penalized, and the great mass of the people plunged into ignorance, superstition, and slavery; but such a nation never reared a Washington Monument or drank patriotic inspiration on battle fields where brave soldiers died or broke out into enthusiasm when the flags were flying and the bands struck 'Dixie.'

"Grape-juice dreamers may cry, 'Peace, peace,' but there is no peace anywhere, nor was there ever any. The elements have no peace; the stars have no rest; the clouds toss and tumble, float, or fly forever; the ocean always murmus and always moves; the rivers do not stop, and the dews are ever going up or coming down; the storm is gathering its forces, or spending them, all the time; there is no peace. It seems to me, I remember something about 'mobs'; and, strange to say, these mobs are described as being pioneers of our independence and institutions. There was that Boston mob, whose picture used to be in all our histories at school. You can close your eyes and see it now; the British soldiers, standing in well-dressed line, muskets at their shoulders, and the smoke and flame bursting out at the muzzles—and the members of the mob falling to the ground. The firing on the Boston mob fired the American colonies, and the cry went all the way down to Savannah, 'The cause of Boston is the cause of us all.'"

The chief executive of a state has not a more serious duty nor a graver responsibility than the obligation imposed upon him in dealing with prisoners—and by prisoners I mean to include those in jail awaiting trial, with the presumption of innocence thrown around them by the law, as well as those serving sentences after conviction. The aim of the law—not some of the iniquitous laws written by man but the great moral law of God, which was in the beginning and shall ever be—exists for the benefit of society, and not for the punishment and degradation of offenders against the law. It is necessary to deprive men of their liberties, and sometimes of their lives, for two primary reasons—to remove them from society until they may be reformed and to deter others from committing like offenses. To go beyond this is barbaric, inhuman, and in violation of the highest law. A state or a nation that allows its prisoners to suffer cruelties is guilty of a greater crime than the prisoners themselves have committed.

We have prisons and prison methods in the United States to-day which are a disgrace to any civilization, and there are thousands of prisoners who might well describe their condition in the words of Lord Byron's "Prisoner of Chillon":

"My hair is gray, but not with years,
Nor grew it white
In a single night,
As men's have grown from sudden fears;
My limbs are bow'd, though not with toil,
But rusted with a vile repose,
For they have been a dungeon's spoil,
And mine has been the fate of those
To whom the goodly earth and air
Are bann'd and barr'd—forbidden fare."

Or we might describe some of these prisons in the words of Cellini, written in a jail in the sixteenth century, 400 years before our boasted civilization of to-day:

"Mark well how glory steeps her sons in gloom.
You have no seat to sit on, save the stool;
Yet you were active from your mother's womb.
The knave who serves hath orders strict and cool
To list no word you utter, give you naught,
Scarcely to ope the door; such is their rule.
These toys hath glory for her nursling wrought,
No paper, pens, ink, fire, or tools of steel,
To exercise the quick brain's teeming thought."

When I assumed the office of Governor of South Carolina, I inaugurated in my State the parole system and granted hundreds of paroles. As I stated in an article which I wrote for a leading law magazine recently, I was as vigorously condemned on the one hand and so heartily praised on the other, for nearly every decision I reached upon each individual case, as any man who has ever been in public life in the history of this country. I cared not for the condemnation or the praise. I was seeking to do my duty under the constitution, to execute the laws faithfully in mercy, and striving to do the right and to give human beings who had made a mistake a chance to correct it and to do their part for the benefit of society. The parole system which I inaugurated was entirely successful. Out of the hundreds of paroles granted, very few of those receiving this clemency failed to lead good lives. They were given another chance in life, and they took advantage of their opportunity.

I stated to the general assembly of my State in regard to this matter that I considered the parole system the best system ever devised for the handling of convicts. In a letter of transmittal of the reasons which actuated me in each case, I said, among other things:

"Now, for instance, you parole a man during good behavior who possibly has served more than half of the sentence imposed upon him—sometimes they have been paroled when they had only three or four months to serve—you do not turn him loose, but say to him, 'Go forth, make a man of yourself, for if you do not, and you are ever convicted again, you have to go back and serve the remainder of the sentence imposed.' Now, if these men had gone ahead and served out their sentences they would be foot-loose to do as they please, and no restraint would be upon their actions. Even a life prisoner may be paroled; it is simply giving him another chance in life; and how many men who profess to be great Christians would be living and enjoying the blessings of this life had not God forgiven them and given them another chance? The parole during good behavior means what? Good behavior means that he shall not violate any of the criminal laws of the State. If they do, they are not of good behavior, and they can be recommitted to the penitentiary without trial to serve the remainder of their sentences. The system I have now established in South Carolina will be followed by other governors—possibly not so many will be paroled, but the system itself will be kept in vogue. The same system is being tried in other States; some going even further and allowing a man to work himself out by his good behavior in the penitentiary. Take one case particularly: A negro had been in the penitentiary for 18 years; he is paroled during good behavior; he is given another opportunity to live. If he disturbs the peace or violates any of the criminal statutes of the State, he goes back to the penitentiary for life; that condition hangs over him, and he knows that if he is not of good behavior, he goes back to serve the remainder of his sentence. Another instance—a white man sentenced to the penitentiary for a long term, for a crime committed while under the influence of liquor; parole him on the condition that he take not another drop of liquor. If he does, and thereby violates his parole, he goes back to serve the remainder of his sentence."

After an experience of four years as Governor of South Carolina, during which time I exercised clemency in more cases than any other three or four governors combined, I believe more firmly to-day than ever before in the parole system as the most advanced step that has ever been taken in prison reform. As proof of the correctness of this

opinion, I may state to you that since I retired from the office of governor, of all of the large number of those whom I paroled not a one has been returned to imprisonment. These one-time convicts have reformed and are leading good lives and making substantial citizens. By the parole system they have been saved to their families and to the State.

But there must be places of confinement for prisoners who, it may be, can not be paroled, and for those who must serve sufficient time that the lesson may be taught. Therefore, every chief executive ought to familiarize himself thoroughly with the condition of the penal institutions of his State and see to it that they are comfortable and healthy, and that the inmates are treated like human beings and not like cattle.

I believe in fresh air and wholesome food for prisoners and in comfortable, well-ventilated rooms.

I believe they should have good literature and good newspapers, especially their home county papers, enabling them to be posted upon the acts and doings and to keep up with the progress of the people of their respective counties and of their State, in order that when tney are given back to society they may not be as strangers in a new and unknown world but may have the incentive in familiar surroundings to build their lives anew upon the solid foundation of honesty and integrity.

I believe they should have the right kind of amusements, that the social instinct so necessary in the plan of their salvation may not be deadened within them.

I believe that the whipping of prisoners should be forbidden, except in cases of willful disobedience of rules or acts of insubordination, and that then the whipping should be administered only in the presence of disinterested citizens of good repute, who are not connected in any way, directly or indirectly, with the institution. The people of the Nation would be horrified if they knew of the fearful brutality practiced in our prisons—the merciless whippings, the electric shocks, and other forms of shocking cruelty. Every chief executive should inform himself of these things that he may remedy the appalling conditions. As I can testify from experience, it is no easy matter to secure the information. It can not be done by personal visits, because on such visits everything will be in the best of shape; and if the prisoners are asked how they are treated they will be afraid not to say they are well treated because of the knowledge that if they state the facts they will be visited with even more cruel punishment by their keepers. But the proper kind of investigation in the right kind of way will bring forth the facts, and the remedy can be applied by a just and fearless man.

Thousands of prisoners every day are being released after service of the full sentences imposed upon them. In what condition are these men to reenter society and to take up again the burdens and responsibilities and privileges of citizenship? What more important duty rests upon a chief executive than that of seeing to it that confinement has tended to reform the prisoner rather than to make a more hardened criminal of him?

There are some professing Christians—God save the mark!—down in my State who condemn me for these ideas and who sneeringly ask if prisons are to be made so attractive that they will lure men into them. We can only pity such beings and pray God that His all-encircling charity may in some manner include them.

I believe that prisoners in healthy and wholesome surroundings ought to be put to work at useful trades or taught useful trades when they do not know them. In my State most of the convicts are now worked on the roads. This work, properly required, is healthy for the able-bodied and benefits the people at large. But we have the women and the weak-bodied also to look after, and other suitable work may be found for them.

And there is another matter which should be considered. In the majority of cases the family of a prisoner suffers more than the prisoner himself. It seems to me that much of this suffering could be relieved by paying to the dependent family of a prisoner a small compensation for the prisoner's labor. In many instances in my State the husband and father is imprisoned for crime, and his wife and little ones are left at home without any means of support, suffering hardships and privations, thrown absolutely on the mercy of the world for the bread they must have. Had there been a system of compensation to the family in South Carolina while I was governor it would have relieved me of what I felt to be the necessity for taking action in a number of cases where the husband and father was sent home to save his family from dire distress. We are told by some that a man should consider his wife and children before he commits a crime. That is true; but if he does not, the fact of suffering women and children stares us in the face—innocent women and children suffering for food and clothing. Of course, there are cases in which even their appeals must be disregarded in order that society may be protected, and charity, which too often is found wanting, must be relied upon to put bread in the mouths of babes crying because they are hungry.

Still another matter which I have urged is that we ought to discard the system of numbering prisoners—designating them only by number. It would have a much better effect in reclaiming prisoners if their identity was maintained, even though they occupy a prison cell, keeping constantly before them the fact that they are human beings and that they have a soul.

And when the prisoners are released it is nothing short of a greater crime than most of them have committed to hound them down by always reminding anyone to whom they might apply for work that they are ex-convicts. There ought to be a law passed by every State, and a national law passed and enforced, to prevent this great evil. The poor fellow should be helped to rise and do better instead of being held down, with so-called detectives, hirelings, running around trying to get people to perjure themselves in order to work up new cases against men who have expiated their crimes by the time they have spent in prison.

I was heralded to the world as "the pardoning governor," and I am proud of the title. I investigated every case before me, and always was saddened when I found a case in which my duty to my people forbade me to exercise clemency. My ideas along the line of the parole system and of prison reform have been called extreme by many, but there are those of us here to-day who will live to see them carried out throughout the Nation if we continue to go forward in the future as we have advanced in the past. "What if some of the objections whereby our institutions are assailed are extreme and speculative," said Massachusetts' great scholar, "and the reformers tend to idealism; that only shows the extravagance of the abuses which have driven the mind into the opposite extreme."

The greatest debate this Nation ever witnessed was staged in the Senate of the United States between a son of Massachusetts and a son of South Carolina. Both were imbued with the highest patriotism, and each was striving toward the same goal, but along different paths. Looking back to that time, we can see that the gloom of civil war, in which brother was to be pitted against brother, was already settling upon our great Nation. A few years later the inevitable storm was upon us. Fifty years have now passed since its fury was spent, and to-day South Carolina and Massachusetts, by that fervid devotion to principle which helped to bring on the great battles in which the sons of one wore the gray and the sons of the other the blue, can clasp hands with higher respect each for the other and with the friendship of brothers each of whom knows the courage of the other and his devotion to a common mother. And I am glad that to-day South Carolina's voice can be raised in Massachusetts in the interest of the great reforms which I would urge.

I hear sometimes expressions from the North and the East and the West as to the treatment of negroes and negro prisoners in the South. Let me say that while I was Governor of South Carolina three-fourths, at least, of the cases in which I exercised clemency were those involving negro prisoners.

The best friend the negro has ever had, so long as the negro stays in his place, is the southern white man, and the negro knows it. The South will work out her own problems along this line and outside criticism and interference can only retard the solution. But in the underlying principles of improving our systems generally, we should all work hand in hand.

In this connection I may say that recently I visited the penitentiary of my State, and I saw walking around in a large, comfortable corridor two negroes held upon the charge of having criminally assaulted white women. They had escaped their just deserts for the time being. Locked and barred inside of cells about 4 feet wide and about 7 feet long, with a little window, iron barred, about 2 feet square, were three white men, charged with having killed a negro who had criminally assaulted a white woman. I do not mean to say that the incident is usual, but it was in South Carolina.

In conclusion, I would again urge the importance of the duty of the chief executives in the proper handling and treatment of prisoners. Our chief executives are clothed with large powers, and a heavy responsibility is theirs. A man in jail awaiting trial is presumed to be innocent—a presumption too often trampled upon by the law which has made it. A prisoner serving a sentence is a human being, with a soul—a being created in the image of the same God in whose image you and I were created. Society must be protected, but the most efficient means of protecting it is the reform of the criminal, and just as surely as we make criminals more hardened by the punishment which we mete out, so surely is society going to suffer, and those responsible must give an accounting some day, if not in this life, then at the bar of the Great Judge, who, I must believe, is going to hold to a stricter accountability those who have violated His laws under the hypocritical cloak of laws made by men than he will hold the poor unfortunates who have erred through the frailty of their human natures.

"For they appeal from tyranny to God."

Mr. BRUCE. Mr. President, may I interrupt the Senator just a moment?

Mr. BLEASE. I am glad to yield to the Senator from Maryland.

Mr. BRUCE. I think what the Senator has said about the philosophy of the measure is absolutely sound. I think, so far as conduct and character is concerned of the system of prison-made goods, that the system is an admirable one in its practical working. I also think that it is very fine, indeed, that a prisoner should have the opportunity, when he is in prison,

to earn money for his family, for the wife and children whom he has so deeply wronged by his criminal conduct; and, when he has not a family, in order that he may have some little fund to begin life with when he issues from the prison.

But the trouble I experience in dealing with the measure is this: Is it proper that one State in the Union should be placed in a position to impose its ideas with respect to the domestic policy of another State? I would be very glad if the Senator could help me to answer that question.

Mr. BLEASE. Mr. President, I thank the Senator for his observation. I am coming to that very point now. I had just stated that the abolition of this work in my State would cause a certain element of the people of my State to have to pay much more taxes than they are now paying to meet governmental expenses. In that connection I will state, as I did the other day, that at the present time there is going on in my State a system which is going to create a feudal landlordship control of land and is going to make serfs and servants out of some of the people of the country if it is not stopped. The Government is making money out of us all the time in that connection. I asked the question the other day and I want to repeat it now, What is the Government going to do with this land when they get it? Are they endeavoring to sell it on the block and then say that one man or a few men shall own all the land in any section of the country and that others shall become renters and tenants? Does it mean that they shall deprive the State of the privilege, as suggested by the Senator from Maryland, of carrying on any kind of work it desires to carry on in order to relieve the people of the burden of taxation, in order to try to raise money in a legitimate way and in a human way to relieve them from another burden?

I read now from an article appearing in the South Carolina News and Courier published at Charleston, Monday morning, December 17, 1928:

W. Scott Finley, vice president of the Federal land bank in Columbia, tells the Washington correspondent of the Columbia State that since "the organization of our field force we have sold 90 farms—a total acreage of 13,615, for $254,897, averaging approximately $19 per acre. The profits on these sales were $22,704.96.

I shall not read the rest of the article because it is too long and would take too much time, but I ask that it may be printed in the RECORD in connection with my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article is as follows:

[From the News and Courier, Charleston, S. C., Monday, December 17, 1928]

THE FARM LOAN BANKS

W. Scott Finley, vice president of the Federal land bank in Columbia, tells the Washington correspondent of the Columbia State that since "the organization of our field force we have sold 90 farms—a total acreage of 13,615, for $254,897, averaging approximately $19 per acre. The profits on these sales were $22,704.96." This would not indicate serious conditions; the volume of foreclosures by the land bank is comparatively small so far as is disclosed by these figures, but one suspects that no important conclusion is to be drawn from them. The facts are that in most of the counties of South Carolina great quantities of land are advertised for sale by the farm loan land bank or other money lenders.

A casual inspection of weekly newspapers published in courthouse towns leads to the conclusion that foreclosures are as common now as they were between 1890 and 1900 when cotton sold at 6 to 7 cents a pound.

Mr. Finley further says that "we find a good demand for land in Georgia and South Carolina." That is a surprising statement. When he adds that "in South Carolina only last week we sold to one party 11 farms for $35,000, a 40 per cent cash payment being made," inquiry is suggested. In that country, where the land bank had "an excess of real estate," it seems that there is at least one man of means who purposes to become a great landlord. "We feel very much encouraged in our sales," Mr. Finley declares.

The purpose of the Federal land bank legislation was to enable tenants to become owners, to counteract the increase of farm tenancy. If the next census shall disclose that the proportion of farm tenants to owners cultivating their farms has enlarged it will be inferred that the Federal farm land bank system has proved a failure.

In truth, an impression or suspicion has spread that it has failed, that a great if not the greater proportion of the money lent by these banks has been diverted to other uses than permanent farm acquisition and improvement. If citizens in numbers have borrowed money on farms and spent it for luxuries, even if they have used it to educate their children, the purposes that moved Congress to establish the banks have been defeated.

If in the Federal farm loan act there is any provision which should enable a few rich men to come into the possession of large acreages, paying a low average of prices, the Federal farm loan system will have done exactly what it was designed to prevent.

If in the Federal farm loan act there is any radical defect, the legislation should be amended or the banks should be liquidated. Unless they are benefiting the agricultural industry they should not be retained. It is time that Congress provide for a serious and thoroughgoing investigation of the whole system. No such governmental agency should be permanent unless its success as the solution of an emergent problem is clear.

Primarily, it is not the business of Government to conduct banks for the benefit of a particular class. The excuse for this legislation was the apparent existence of an unusual and extraordinary problem. It seemed necessary to devise means whereby farmers could obtain credit on terms as low as merchants and other traders obtained it.

Now, the question is, Have the farmers been benefited? If the answer is no, why continue the experiment?

Mr. BLEASE. There is the Government loaning its people money out of the farm-loan bank, and in just a very short time they have sold 90 homes in one little State and made out of the transactions over $22,000 in profits. I think when the Government puts a man's property on the block and sells it for a debt that he owes the Government that all over and above the amount necessary to pay the debt should be returned to the man, whatever that amount is. If a man owes the Government $10,000 and they have his place sold on the block and buy it in for $6,000 or $8,000 with the privilege of putting the man and his family out in the street or out in the field, then when they finally dispose of that land, if they get more for it than the $10,000 owing to the Government, the Government should take that $10,000 which the man owes and return to him the balance of the amount received for the land. He is an American citizen. Why not give him the right and the privilege, if his land is forced on the market, to receive whatever profit there may be in the ultimate sale of the land? Certainly, it would be nothing but right for the Government to give him whatever the surplus might be in order that he might have an opportunity to take his wife and children and make another start in life.

Mr. GOFF. Mr. President, will the Senator from South Carolina yield to me?

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from West Virginia?

Mr. BLEASE. With pleasure.

Mr. GOFF. I want to ask the Senator for the RECORD as well as my own information whether the laws of the State of South Carolina prohibit or in any way interdict the sale of prison-made goods in that State on the open market?

Mr. BLEASE. If there is any such law as that I have never heard of it. I think there is none.

Mr. GOFF. The Senator knows that there has been discussion, as occurred yesterday, and there was a reference to that fact by the Senator from Ohio [Mr. FESS], now in the chair, in a question which he propounded to me. The Senator said there was a law in the State of Ohio which prohibited the sale of prison-made goods in that State. I desire to know if there is any such law within the knowledge of the Senator from South Carolina now existing in his State?

Mr. BLEASE. There is not.

Mr. GOFF. Will the Senator permit a further question?

Mr. BLEASE. Certainly.

Mr. GOFF. What is the income from prison-made goods to the State of South Carolina each year after the prisoners have made the goods and the State has put them upon the market?

Mr. BLEASE. I can not give a positive answer to that question for the reason that the factory in our penitentiary has not been running very long and I do not think it has yet reached a satisfactory stage of production which would throw much light on the profit and loss question. I may state, however, that I believe there will be a good profit in the business.

Mr. GOFF. It has been with some difficulty on this side of the Chamber that I have heard everything the Senator has said, but has the Senator stated, in the course of his remarks, all of the different "goods, wares, and merchandise," as that phrase is used in the bill, which are now produced in the prisons and houses of incarceration in the Senator's State?

Mr. BLEASE. I understand there is none except furniture in the State penitentiary.

Mr. GOFF. May I ask this further question? If the bill now before the Senate should become a law and should be ultimately determined by the Supreme Court to be constitutional, can the Senator from South Carolina indicate to what employment the State could put the labor now at its disposal in the penitentiary of that State?

Mr. BLEASE. That was a question which I was about to discuss.

Mr. HAWES. Mr. President, before the Senator proceeds, may I answer the question of the Senator from Kentucky?

Mr. BLEASE. I yield to the Senator with pleasure.

Mr. HAWES. I have here the Hoover conference report made on the 12th of December, which shows that there were 375 prisoners employed in the South Carolina penitentiary in the manufacture of furniture. Eighty-three per cent of the total output of that furniture factory is sold outside of South Carolina.

If the Senator from West Virginia will look at the report which he will find in the RECORD, where I had it placed at the last session, he will find the report of the populous States of Pennsylvania, Ohio, New York, and New Jersey, all of which have a State-use system, showing how many prisoners are employed and in what manner. I respectfully submit that when he examines it he will find as great a percentage or a greater percentage of prisoners employed under the State-use system as under the contract system.

Mr. GOFF. I thank the Senator from Missouri for that reference. I have read it in the RECORD, but my specific question to the Senator from South Carolina was aimed at eliciting any further or additional detailed statements of facts that he might have which are not contained in the report which was printed in the RECORD at the request, as I recall, of the Senator from Missouri on Saturday last.

Mr. BLEASE. Mr. President, I am very glad the Senator from Missouri read that statement. I think it speaks pretty well for South Carolina that she can make furniture and send it all over the United States. I think one more reason why we should be allowed to do it is disclosed by that statement. If we can make a better quality of furniture than is made in other States, it is all the more reason why we should give the people in those other States the privilege of having our good furniture.

Mr. President, as I suggested to the Senator from West Virginia, our prison authorities have not yet reached any conclusion, but they are now very much worried about the proposition of what they will do with the prison labor if this bill should become a law. If we let them out under the lease system, that is bound to be a curse. If we try to farm with them, we come in direct competition with the farmers of the State, and yet they have done and are doing some farming. If they be permitted to remain idle, as I said a while ago, I think it is the worst punishment which could be inflicted on anybody. It is really a serious question what can be done. It is not desirable to take these men out and make them dig ditches. We have not any right to hire them out to bridge builders and take all kinds of risks of their being mistreated. In what business can prisoners be employed? I believe that we should have in every penitentiary in the country some method of teaching those who are there confined some trade or occupation out of which they may subsequently make a living. I want to say to my friend from West Virginia I am told that the prisoners in the furniture factory in South Carolina receive a portion of the returns; they are paid a certain amount, and they are allowed to keep that money for their own purposes, to send it to their families or to spend it for things which they need or which they desire to have but which are not furnished by the State to prisoners.

In that way we help the prisoners and help their families outside. I have not any doubt that I could telegraph home and get the information that a great many of the State's prisoners this Christmas will send home to their families money which they have saved since they have been inside the prison walls.

It would be easy enough to settle this question in my State by the governor. I once settled it by turning out about 1,700 convicts, and if I were now governor and the prison officials sent word to me and said, "The prisoners have not anything to do; they have got to walk around the yard with no work, or they have got to sit up in the corridors with nothing to do," I would turn everyone of those prisoners out, because I do not believe in cruel and inhuman punishment; and I think one of the greatest responsibilities resting upon the governor of any State is in the manner in which he deals with the prisoners of the State, with the unfortunates who have got the chain and ball on their feet or the handcuffs around their wrists to keep them inside prison walls.

As I stated a while ago, Mr. President, there are men in the penitentiary to-day who are innocent men, who have been "framed." There are men in the State penitentiaries of some of the States now for selling liquor who never sold a drop of it. Some of these Federal agents will go to a man's home, make out they are sick, fool some poor devil into giving them a drink, and then insist on his taking a quarter of a dollar or 50 cents for it. Another spy, sitting on the outside, will go off and swear that that poor fellow, or perhaps it was a poor old woman, sold the liquor, and will put him or her in jail.

Mr. President, I shall not detain the Senate much longer, because I do not think it is necessary to do so.

Mr. GOFF. Mr. President, will the Senator from South Carolina yield to me?

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from West Virginia?

Mr. BLEASE. Yes, sir.

Mr. GOFF. Before the Senator leaves the subject which he is now discussing, I wish to ask him if he can state what expense it would add to the operation of the prisons in South Carolina if this bill became a law?

Mr. BLEASE. That would depend entirely on the number of convicts who were confined in the penitentiary. For instance, the judges might sentence some prisoners to a county chain gang. In that way they would go on the road. Consequently, they would not be a burden to the State but to the county. I apprehend that if the furniture factory at the South Carolina Penitentiary should be abolished, the governor himself would of necessity be compelled to send back to many of the counties short-term prisoners who would be taken care of possibly in the chain gang; and if the Senator from West Virginia has ever had any experience in dealing with chain gangs he can realize that if a prisoner in the chain gang is not a "pet," or, as the negroes call it in my State, a "trustee," he is in a pretty bad fix from the standpoint of the food he has to eat, the clothes he has to wear, and the treatment he receives at the hands of those who are put over him.

Mr. HAWES. Mr. President, if the Senator from West Virginia [Mr. GOFF] would like to know, I will inform him that the State of South Carolina received $79,300 for the labor of prisoners, and that is all.

While I am on my feet, let me call attention to the fact that there is no State in the Union that prohibits the sale of convict-made goods, but certain States prescribe the manner of sale. That is all this bill, should it become a law, would do. It would revive those laws, and when prison-made goods were sold in another State it would require their branding or that they should comply with the law of that State; but in no single State is the sale of convict-made goods prohibited.

Mr. TYDINGS. Mr. President, will the Senator from South Carolina yield to me?

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Maryland?

Mr. BLEASE. Yes.

Mr. TYDINGS. I should like to ask the Senator if he knows whether his State buys automobile license tags from some concern in the State or from some concern outside the State.

Mr. BLEASE. I do not know positively, but I think such tags are bought from outside the State.

Mr. TYDINGS. I was just going to observe that in the State of Maryland such tags are manufactured in factories in the penitentiary by prison labor, and, of course, the State being engaged in the placing of license tags on automobiles, it is a very proper purpose and conflicts with no private enterprise If the furniture factory in the South Carolina penitentiary were abolished, it would not necessarily mean that the convicts now employed in the furniture factory would have nothing to do. The problem would be to readjust that situation so that they might make such articles as automobile tags and bricks and what not which the State could use in the conduct of the State's business. It does not necessarily mean that all of the convicts would remain idle, but that the State would have to adjust the present system so as not to sell goods in States that did not desire prison-made goods sold within their borders. I thank the Senator for permitting the interruption.

Mr. BLEASE. Mr. President, I call the attention of all Senators who would like to have further information to page 676 of the CONGRESSIONAL RECORD of December 15 in reference to what those who are studying this question all over the United States, including officials of the State of Missouri, from which my good and distinguished friend, the author of this bill, comes, think about this subject. There will be found there a report which sets forth that in the last 130 years six systems of prison labor have been tried—the lease system, the contract system, the piece-price system, the public-account system, the State-use system, and the public-works-and-ways system. Each system has its advantages and critics; each system has both its advantages and disadvantages.

Those who prepared the report go on to state their opposition to this bill. It should not be necessary for me to repeat their statements, as they are in the RECORD, but I might add that the

document is signed by the director of State institutions of Rhode Island and by the wardens and superintendents of penitentiaries in Virginia, Kentucky, Missouri, Iowa, New Hampshire, Maryland, South Carolina, and other States.

Mr. President, I shall not take up further the time of the Senate, because I think that every Senator knows pretty well what his idea is as to how he is going to vote on the merits or demerits of this bill, and, possibly, after all, the main question in the consideration of the bill will be the question of its constitutionality. That question, as I have stated, I shall leave to my distinguished friend the Senator from West Virginia [Mr. GOFF].

Mr. SACKETT. Mr. President, I rise to speak on this bill, I confess, with great reluctance. So far as concerns my personal opinion from the experience I have had with prison labor, I should like to vote for the bill; but the situation within my State is such that I feel that those who are at present confined in our penitentiaries would by the passage of this bill and its logical extension be placed in such a condition that it would be almost hopeless to attempt to rehabilitate the criminal class who are there confined.

I speak with some knowledge of the subject, because for four years I served the State of Kentucky as a member of its board of charities and corrections. During that period it was the hope and object of that board, if possible, to find a way by which there could be eliminated from the penitentiary the contract-labor system then employed. The board made very careful studies of the whole situation, but it was impossible for the board, although it was inclined to do away with the State contract system, to find any occupation in which the prisoners of the State could be employed save for a short period of time each year.

A number of experiments in the employment of prisoners was made, among others the working of prisoners upon the roads. This entailed prison camps, established where work on the roads was to be done. Unavoidably, from time to time, escapes took place from those prison camps. In the country districts of a rural State such as Kentucky it was almost impossible to recapture the escaped convict, and every crime that was committed within a reasonable radius of such prison camps was coupled with and attributed in the public press to the escaping convicts. The people of the communities became alarmed, and public opinion finally drove the prisoners back within the walls.

We made studies of the State-use system. Among other things, as I remember, it was found that the shoe factory which had been established within the prison walls could have provided the shoes necessary for the entire population of the State institutions if it ran continuously for a period of some 27 or 28 days in the year.

From time to time we have made other experiments, and they were not found to be successful. Furthermore, a State like Kentucky, which lives almost up to its income as a matter of necessity in order to provide the very expensive public improvements which are needed for its population, is dependent in a large measure upon income derived from the employment of its prisoners within the penitentiary. Since I have severed connection with the State board of charities and corrections I find that there has been no new opportunity to change the system which had been inaugurated within the prisons and to do away with the contract system.

I am to-day in receipt of a reply to a telegram which I sent to the governor of the State, Governor Sampson, wherein I notified him that this bill would be up for consideration on the floor of the Senate, and asked for a statement of the present attitude of the State with regard to it. The governor referred the inquiry to the chairman of the State board of charities and corrections, and here is the message which I have received:

> Your wire to Governor Sampson, prison labor bill, is received. Bill would deprive Kentucky of half million dollars annually, and enforce idleness on largest number prisoners ever consigned. No other means of employment, and no funds to install industries. Condition unchanged since your service on board.

That is signed by the secretary of the board of charities and corrections.

With a State of a rural character, such as that which I have the honor in part to represent, the loss of half a million dollars of State income, and the requirement to take care of those prisoners at the cost of an additional half million dollars, means a great deal to the people of that community. Much as I personally disapprove of the contract system, much as I disapprove of the prison contractor—and I have had experience with prison contractors—I do not see how the State of Kentucky is going to meet in a comparatively short time the problem which this bill necessarily puts up to it.

The able Senator from Missouri [Mr. HAWES] has agreed to accept a delay of three years in the taking effect of this bill; but it is not a matter of three years in a State like that which I in part represent. It is a matter of finding some method by which the prisoners confided to our care can be taken care of, rehabilitated, and sent back as citizens of the community. In the present situation, from all the data we can gather, I can say to the Members of the Senate that in spite of every effort we can make we have never been able to find any method by which that employment can be had except under the contract system which is now employed.

I think a good deal of consideration ought to be given to the effect of nonemployment forced by any means upon the inmates of a penitentiary. It is not a pleasant situation to contemplate. In my own experience I have seen men who were denied the right of employment, I have seen the moral effect upon those men, and I have seen them go downhill in spite of every educational opportunity that has been offered to them. I have seen how impossible it is to rehabilitate them under those conditions.

I do not believe that convict labor should compete with the free labor of America. I never would stand for any such principle; but here we have a matter which seems to be beyond the control of the officials of our State. We have a requirement that these men be incarcerated for the protection of our citizenship. We have a problem which we are not able to solve under any principle that has been suggested to us in the State of Kentucky. For that reason, and in order to protect the revenues of our community against a loss which they can not afford to sustain, in order to maintain the State government—which I have had, as I say, the honor to represent heretofore—I am constrained to ask the Senate for a considerable further delay in making these goods outlaw in interstate commerce.

Mr. WATSON. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Indiana?

Mr. SACKETT. Yes.

Mr. WATSON. The Senator speaks out of an abundant experience, and therefore his counsel is desirable and valuable. I should like to ask him what, in his judgment, the result would be if men working within prison walls were to be paid the same wages for doing the same work as in outside industry—a competitive wage? What would be the effect?

Mr. SACKETT. Our experience was that the efficiency of a prisoner was about two-thirds that of free labor; and, of course, if they were paid the same amount I do not believe prison contractors could be induced to hire that labor because necessarily it would make the cost of production of the article higher than the cost of production of the same article by free labor.

Mr. WATSON. Is there any way of balancing those wages, taking the lower efficiency into account?

Mr. SACKETT. We have gone in Kentucky to this extent: First, we rent the labor for a great deal higher price than formerly. When I first went on the board the price was a very low one indeed. We gradually got it up until the results of that labor paid the cost of maintaining the penitentiary; and then, in addition to that, we provided a fund by which each one of the prisoners was paid an additional amount per day which went to his credit upon the books of the penitentiary. My judgment is that the payments to him should be raised just as high as it is possible to have them and at the same time not drive the contractor out of business. We have been getting gradually to that point.

Mr. HAWES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kentucky yield to the Senator from Missouri?

Mr. SACKETT. Certainly.

Mr. HAWES. The distinguished Senator from Kentucky asks for a further delay in the time when this bill shall take effect. The Senate committee decided upon two years. The House bill provides for three years. That will give an opportunity for two legislatures in each State to deal with this question.

To show the sympathy in the Senator's own State of Kentucky with the philosophy of this bill, we find that his own State provides that all goods made in prison outside the State must be plainly marked "Convict-made." The important question that concerns the distinguished Senator, however, is the question of unemployment; and he has had a valuable experience in this matter. The penitentiary in his State is one of what may be termed the middle class in number of inmates. I have before me the figures relating to the greater penitentiaries of the more populous States.

Pennsylvania, for instance, has a total prison population of 4,528. Those of that number employed in productive enter-

prises are 3,993, leaving unemployed for various reasons only 535; and that State employes the State-use system.

Taking the State of Ohio, for instance, with over 8,000 prisoners, 2,790 are employed in manufacturing for State use, 2,500 for institutional work, and so on; and they are kept employed.

The same is true of the State of New York, and the State of New Jersey, and other States where the State-use system is employed.

Those are modern penitentiaries. We all know that it would be a crime against society not to keep the prisoners employed, and employed properly; so I direct the Senator's attention to the greater penitentiaries of the country, where they have the largest number of convicts, and where they all are employed in as great a proportion as in the penitentiaries in Kentucky or Missouri; and it is done under the State-use system.

Mr. SACKETT. I agree with the Senator. He has selected probably the three richest States in the United States, having the largest number of people within their charge and being able financially to treat them in the very best manner that prisoners or insane persons or any of that class of people can be treated. In a State which is not rich, which can not afford many of the things that the richer States can afford for their dependents, it has not been found in our experience that there is a market within the State-use system to employ anything like the number of men we find it necessary to keep within prison walls.

Mr. WATERMAN. Mr. President, my colleague the senior Senator from Colorado [Mr. PHIPPS] has asked me to get permission to put into the RECORD two telegrams which he received before leaving the city. One is from the president of the Colorado Board of Corrections; the other is from the warden of the Colorado State Penitentiary. I ask unanimous consent that they may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The telegrams are as follows:

CANON CITY, COLO., *December 17, 1928.*

Hon. LAWRENCE C. PHIPPS,
United States Senate:

Use every effort to defeat Cooper-Hawes bill, coming up now. Effect of its passage would be very bad on Colorado penal institutions.

C. J. MOYNIHAN,
President Colorado Board of Corrections.

CANON CITY, COLO., *December 17, 1928.*

Hon. LAWRENCE C. PHIPPS,
United States Senate:

Passage of Cooper-Hawes bill would be very detrimental to this and other Colorado penal institutions. Use your best efforts for its defeat.

F. E. CRAWFORD,
Warden Colorado State Penitentiary.

Mr. GOFF. Mr. President, I desire to ask the Senator from Kentucky one or two questions arising from his remarks.

Can the Senator state how much below the average market price of labor the labor in the penitentiary of Kentucky is paid?

Mr. SACKETT. No; I can not tell the Senator that now, because it is a long time since I was on the board. At the time I knew it definitely. I should say somewhere in the neighborhood of 60 per cent.

Mr. GOFF. I should like to ask the Senator this further question relative to the matter of State use: What did the State of Kentucky do with the surplus product, if any, over and above the demands of the State-use departments of the State?

Mr. SACKETT. It rented its labor to prison contractors, and the prison contractors sold the products of their factories. I do not know whether they sold them within the State of Kentucky or not. They sold a considerable portion in other States, possibly.

Mr. GOFF. At the time the Senator from Kentucky was connected with the State institution, as he has stated, was there any law in Kentucky which in any way restricted the sale of prison-made goods within that State, or required that prison-made goods so sold in the State should be marked and labeled?

Mr. SACKETT. I think there was. My recollection is that there was a labeling law.

Mr. GOFF. Possibly my question to the Senator was a double question, and I shall now single it out and say, Was there any restriction on the sale in the State of any of the surplus goods not consumed in State use?

Mr. SACKETT. No restrictions, except so far as the requirements for labeling may have served as a restriction.

Mr. COUZENS. Mr. President——

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). Does the Senator from West Virginia yield to the Senator from Michigan?

Mr. GOFF. I yield.

Mr. COUZENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Barkley	Gerry	McKellar	Smoot
Bingham	Glass	McMaster	Steck
Black	Goff	McNary	Steiwer
Brookhart	Gould	Moses	Stephens
Broussard	Hale	Neely	Swanson
Bruce	Harris	Oddie	Thomas, Idaho
Capper	Harrison	Pine	Thomas, Okla.
Copeland	Hastings	Pittman	Trammell
Couzens	Hawes	Ransdell	Tydings
Curtis	Hayden	Reed, Pa.	Vandenberg
Deneen	Heflin	Robinson, Ind.	Wagner
Dill	Johnson	Sackett	Walsh, Mass.
Edge	Jones	Schall	Warren
Fess	Kendrick	Sheppard	Waterman
Fletcher	Keyes	Shortridge	Watson
Frazier	King	Simmons	Wheeler
George	Larrazolo	Smith	

Mr. McNARY. I desire to announce that the Senator from North Dakota [Mr. NYE], the Senator from Vermont [Mr. DALE], the junior Senator from Illinois [Mr. GLENN], the Senator from Montana [Mr. WALSH], and the Senator from Arizona [Mr. ASHURST] are attending a meeting of the Committee on Public Lands and Surveys.

Mr. JONES. I wish to announce that the senior Senator from Nebraska [Mr. NORRIS] and the junior Senator from Wisconsin [Mr. BLAINE] are detained in a meeting of the Committee on the Judiciary.

The PRESIDING OFFICER. Sixty-seven Senators having answered to their names, there is a quorum present. The Senator from West Virginia will proceed.

Mr. GOFF. Mr. President, before proceeding to the discussion of certain facts and the constitutional aspect of Senate bill 1940, now before the Senate, I move that the bill be referred to the Committee on the Judiciary to consider and determine its constitutionality in the light of the Constitution of the United States and to report to the Senate not later than January 7, 1929, such conclusions as the committee may reach.

When I conclude my argument I shall renew the motion just made and shall ask for its immediate consideration.

Mr. HAWES. Mr. President, will the Senator from West Virginia yield?

Mr. GOFF. Certainly.

Mr. HAWES. I understand the Senator proposes that this bill be referred to the Committee on the Judiciary.

Mr. GOFF. That is my motion.

Mr. HAWES. Why does not the Senator propose that the railroad consolidation bill, and the various bills before the Interstate Commerce Committee which involve the same clause of the Constitution, be also referred to the Judiciary Committee before the Committee on Interstate Commerce acts?

Mr. GOFF. The question of the distinguished Senator from Missouri answers itself. The Committee on the Judiciary has no jurisdiction of any such bill prior to action by the Committee on Interstate Commerce, and would not have jurisdiction of any bill emanating from that committee which had not reached the floor of the Senate, and then only by due and orderly motion assigning the measure, with the full consent and approval of the Senate, to the Judiciary Committee for its consideration.

Mr. HAWES. Then what the Senator proposes is the creation in the Senate of a judicial committee with functions similar to that of the Supreme Court. Followed out logically, the same thing would be done in the House. No bill involving a constitutional question could properly be voted upon by the Senate until the Judiciary Committee had passed upon it.

Mr. GOFF. That conclusion does not follow, and I should be the last Member of this body to move that the judicial power exercised by the Supreme Court or any judicial power be conferred upon any committee of the Senate.

Mr. HAWES. Will the Senator point out the distinction of the question of constitutionality in this particular bill and some two or three thousand other bills where the question is always raised as the last resort? Is there any more reason why this bill should go to the Judiciary Committee than the railroad consolidation bill or any other bill?

Mr. GOFF. This is the only bill before the Senate, and I shall not lay down any hypothetical general method of conduct or procedure. If I were satisfied that some of the other bills to which the distinguished Senator has referred were consti-

tutional, I should not move that the Committee on the Judiciary or any committee or even the Senate as a Committee of the Whole consider them.

Mr. HAWES. The logic of the Senator's position is that we create a supreme court in the Senate. I would like to know the difference between this bill, meeting the approval of all the lawyers on the House committee and practically all the lawyers on the Senate committee which considered it, and any other bill. The question of its constitutionality has not been attacked until the Senator now attacks it, but it was very ably discussed before both of those committees. Now, the Senator, after both of those committees have acted, proposes that it be sent to another committee for a report to guide the Senate as to its conduct in a legal matter.

Mr. FESS. Mr. President, the Senator from Missouri overlooks the fact that the Senator from West Virginia is a member of the committee which considered the bill.

Mr. HAWES. Incidentally, that does give the Senator from West Virginia two votes on the subject, one in the Interstate Commerce Committee and one in the Judiciary Committee. It shows what trouble we would get into with an unusual tribunal like that created.

Mr. GOFF. I will say to the Senator from Missouri and to his suggesting and suggestive friend the distinguished Senator from Ohio, since we have entered the realm of personalities, that I was not present when the Interstate Commerce Committee considered this bill, and while I dislike to refer to a personal matter I desire to say that when this bill was considered and reported I was confined to my home with pneumonia. If it had been possible for me to be present in the committee I should have opposed the bill, and I should then and there have advanced the constitutional objection which I think should properly be considered by the Senate before it votes upon this measure or reaches any conclusion as to its provisions.

Mr. FESS. I am sure the Senator from West Virginia does not interpret our observations as offensive in a personal way?

Mr. GOFF. Nothing, may it please the Senator from Ohio, is offensive. This is a give-and-take debate, and I trust in my reply to the suggestions from the two Senators who have just spoken that I neither suggested offensiveness nor that I prompted the suggestion of anything offensive to either of my distinguished friends.

Since we have descended to these mild-mannered personalities, let us now ascend to a discussion of the facts embodied in the hearings before the House and the Senate committees.

It was stated yesterday by the Senator from Missouri [Mr. HAWES] that the bill comes before the Senate at this time due to an "unusual combination of citizenship." He stated that union labor, representing 4,000,000 men and women, and that certain trade-unions and local labor organizations were asking the passage of the bill.

He then said that the bill was supported by the General Federation of Women's Clubs and an association of all the women's clubs in the United States. He very properly made reference to the fact that there had been sent out from the city of Washington to certain Members of the Senate a telegram under date of December 13, 1928, in which it was mentioned that the Prison Wardens' Association of America, meeting with the American Prison Congress at Kansas City, Mo., in October, 1928, unanimously adopted the following resolution, which the distinguished Senator did not read, and which I shall read:

The following resolution was adopted by the Wardens' Association of the United States at the prison congress August, 1927:

"Whereas idleness is a demoralizing influence in all prisons; and

"Whereas steady employment at productive labor helps the inmates of the prison to bear the tedium of confinement and is a wholesome influence on discipline and prison morals; and

"Whereas the labor of able-bodied inmates of the prions should be used to diminish the cost of their confinement: Therefore be it

"*Resolved*, That the Wardens' Association protest against the passage of any State or National legislation which will interfere with the manufacture or sale of prison products; be it further

"*Resolved*, That it is just as unfair to brand or label prison products, so as to render them unmarketable, as it is to degrade prisoners with the stripes or shaven heads as a badge of their conviction.

"J. J. SULLIVAN, *Chairman*.
"H. W. MEYERS.
"J. S. BLITCH."

Then the Senator from Missouri said:

In the report Senators will find that these splendid women are supporting this measure and have supported it for years for humanitarian reasons, because they have believed the prison contractor should be driven from the control of the prisoner, and for the further reason that their efforts in the individual States where they have urged reform legislation were set at naught because some State, trying to exploit its own products heartlessly to the detriment of other States, was breaking down the effort of every State to legislate for itself.

Mr. President, I am not concerned with the classes or the individuals who motivate the proponents of this measure. Every American citizen possesses the inalienable right, regardless of associations, clubs, or unions, to express his, her, or its opinion or opposition to or in favor of any measure pending before the Senate of the United States. The questions, however, involved in all these measures are questions arising at the very threshold, or, as we say in legal parlance, in limine. Is this bill within the power of the Congress of the United States to enact? If such legislation should be enacted by a State it could be justified only as an exercise, within constitutional limits, of the police power of the State.

We are not, however, concerned in this instance with the exercise of the police power of the States, and we are not concerned with the exercise of any Federal police power. Such a power is recognized as a Federal right in many of the decisions of the Supreme Court regardless of the due application of the interstate commerce provisions of the Federal Constitution.

The Constitution of the United States provides that the Congress shall have the power to regulate commerce with foreign nations and among the several States and with the Indian tribes. And when we approach any proposition which involves the regulation of commerce between the States we meet initially the question, Has the Congress of the United States in the instant case "regulated" commerce between the States, or has it unwittingly delegated to the States its power to regulate commerce by the passing of certain laws that recognize and merely assist in the enforcement of existing State laws?

I regret, Mr. President, that there have been and are so few references in the record and the discussion to many of the outstanding facts which justify and compel this argument against the constitutionality of the pending bill. These facts and opinions should be before the Senate, and I shall refer to a few of them in order that Senators may have before them these matters so essentially involved in the proposed legislation.

There appears in the hearings before the House committee a telegram from the American Federation of Labor, addressed to the Governor of Idaho, under the date of February 9, 1928. It reads as follows:

Misleading statements sent out regarding national law for reform and proper employment State prisoners. Respectfully request you read law and hearings held this week before House and Senate committees before expressing opinion. We make request in behalf American Federation of Labor, representing 5,000,000 union workers; General Federation of Women's Clubs of the United States; and manufacturers representing $2,500,000,000 in capital, more than two million and half employees, with factories and mills in 48 States.

Now, there is one further statement I would like to add in this connection: The United States Bureau of Labor Statistics reported in 1923 that the value of goods produced in State and Federal prisons amounted to a little more than $76,000,000; in comparison, the value of products manufactured in the United States amounted to more than $60,250,000,000. In 1923 less than 52,000 convicts were employed in industry, as compared with more than 8,750,000 free men. In the clothing industry, where we have heard so much complaint against prison competition, convict labor in 1923 produced less than $22,000,000 worth of clothing of all kinds, as against a total national production of more than $3,400,000,000.

I do not in opposing this bill and in raising the question of constitutionality intend in any way to oppose the freedom of labor. I go further than that; I am raising the questions involved in the Constitution of the United States, regardless of their effect, regardless of whether they in any way interfere with the freedom of labor, and regardless of whether they keep prisoners incarcerated in State institutions employed or not.

Let us assume for a moment, as the record discloses, that the total prison population of the country is something like 100,000. Even though that is the case, and even though possibly 50, 75, or 85 per cent of those prisoners might be employed in prison industry, yet only one-tenth of 1 per cent of the productive industry of the country would be in prisons. Therefore the real damage which might be done by prison labor is negligible.

Various propositions have been made as substitutes for productive prison labor. During the last 75 years this question has been constantly before the people, and without question these arguments advocating States' use, or the public employment of prisoners, are, while theoretically beautiful, yet actually impracticable.

Mr. President, the question of prison employment is not settled now. Seventy-five years, 100 years—in fact, 500 years of historical study—has failed to find the true solution of the em-

ployment of prison labor. Men are sent to prison, sentenced by the courts for a certain number of years to hard labor. Men are not sentenced under the laws of any State or under the laws of the Federal Government to go to prison in idleness. The great moral question that society has presented for solution, the problem, as the Senator from Kentucky phrased it of rehabilitation, is ever before the civilized nations of to-day; and that is the great question which is submitted in the studies and the reflections of those who oppose the passage of this bill and the necessity for the passage of any law upon this subject.

Are we to pass a law which will result in the unemployment of prison labor? Are we to pass a law which shall say, in effect, when men go to the penitentiary in any State or under the Federal Government, they go there simply to be locked up; that they go there solely to be denied the freedom of locomotion upon the highways and byways of our country; that they go there to reform—with reform denied him? That is not the proper interpretation of the law; and that is not, in my judgment, the correct way of approaching the solution of the moral regeneration and thorough reformation of those who are incarcerated.

I shall not at this time occupy the attention of the Senate in discussing what has been said by different wardens, but in passing I shall commend many of these statements to the attention of the Senate and put them in the RECORD.

On page 143 is this statement:

Mr. SWENDSEN. * * * I might as well answer your question now—

That is, Are the State prisons of Minnesota in a self-supporting condition?

We sell our products in the State of Minnesota first and our surplus in the adjoining States. For last year, 1927, we sold to Wisconsin 820,500 pounds of twine for which we received $102,562.50. In North Dakota we sold 2,230,700 pounds of twine for which we received $292,211.70.

In South Dakota we sold 759,750 pounds of twine for which we received $89,270.62. In Iowa we sold 662,260 pounds, and the amount we received was $78,815.55.

In Nebraska we sold 854,200 pounds, and the amount we received was $100,368.50. In Montana we sold 251,150 pounds for which we received $32,649.61. From miscellaneous there were about 5,000 pounds. In the State of Minnesota we sold 16,819,545 pounds, and the amount we received for that was $2,064,249.07.

Do you want farm machinery?

Mr. FENN. For the information of the committee; yes.

Mr. SWENDSEN. We sold in the State of Wisconsin 568 binders, 1,347 mowers, 1,110 rakes, and 335 trucks at a total price of $208,404.59.

In North Dakota we sold 396 binders, 265 mowers, 124 rakes, and 37 trucks for which the total price was $37,944.36.

In South Dakota we sold 127 binders, 138 mowers, 95 rakes, and 31 trucks, amounting to $30,729.65.

In Iowa we sold 97 binders, 146 mowers, 114 rakes, and 94 trucks, amounting to $30,204.30.

In Nebraska we sold 110 binders, 176 mowers, 107 rakes, and 71 trucks, amounting to $30,585.25.

Then, there was miscellaneous, under which heading we sold 13 binders, 38 mowers, 19 rakes, and 13 trucks for a total price of $4,562.90.

In Minnesota we sold 1,385 binders, 2,363 mowers, 2,116 rakes, and 585 trucks, amounting to $437,064.17.

We pay a wage to every inmate. No inmate gets less than 25 cents per day, and some of them can make up to $1.30 a day. * * *

We have a State-aid system—

He says, and he states the population of Minnesota as being 2,500,000.

The State prison of Minnesota presents a typical illustration of the progress that has been made by the States of the American Union in regenerating the men and women confined in her penal institutions.

I have here a statement by the warden of the State prison of Indiana. I have a statement by Dr. L. M. Robinson, the warden of the State of West Virginia prison, who from study, experience, and ability is highly qualified to discharge the duty and perform the functions of his present position. If this bill should become effective, it will cost the State of West Virginia from $500,000 to $750,000 a year in increased taxes, and I know that it will cost many of the other States larger amounts.

Mr. President, although the question is not before the Senate and is not directly embraced in a constitutional discussion of this question, yet it is very doubtful whether any of the State laws which prohibit, restrict, and in effect deny the employment of prison labor can be held constitutional in so far as they increase the taxes of the citizens of the States where they apply. If a tax is unreasonable and levied not in pursuance of any legal justification, it is a taking of property without due process of law. Not only is it a misuse and an unreasonable exercise of the police power of the State, but it is also a violation of the fourteenth amendment of the Constitution of the United States.

Mr. SMITH. Mr. President——

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). Does the Senator from West Virginia yield to the Senator from South Carolina?

Mr. GOFF. I yield.

Mr. SMITH. Mr. President, I was out of the Chamber when the Senator from West Virginia began his discussion of this question. I presume he intends to elaborate the principle involved in this bill, whether the Federal Government has the constitutional right to prohibit the sale in interstate commerce of goods which in themselves are lawful commodities of commerce upon the ground that the character of labor employed in their production is different from some other character of labor.

Mr. GOFF. I will say to the Senator from South Carolina—and I am very glad he asked the question—that I am only referring to certain of these statements that there may be in the RECORD and before the Senate for its deliberation facts which do not now appear in the RECORD and which have not been brought directly to its attention. I shall then proceed to a discussion of the cases relating to the constitutional questions involved——

Mr. SMITH. The reason I asked the question was this: In studying this subject, having in view my duty as a Member of this body to uphold the Constitution so far as I am able with my understanding of it, it occurs to me that the pending bill partakes of the nature of the child-labor legislation which was before Congress for some time, if, indeed, it does not stand on all fours with it.

Mr. GOFF. I am coming to that after a due reference to certain major facts——

Mr. SMITH. I do not know whether we would have the constitutional right to enact a law providing that the Federal Government may intervene and prohibit the free intercourse of goods because of the character or condition of those engaged in the production of such goods, unless the business is clearly shown to be a nuisance or subversive of the best interests of all the people, and, even in that case, there would be some doubt in my mind.

Mr. HAWES. Mr. President——

The PRESIDING OFFICER. Does the Senator from West Virginia yield to the Senator from Missouri?

Mr. GOFF. I yield.

Mr. HAWES. Is the Senator from South Carolina under the impression that this bill prohibits the interstate shipment of convict-made goods into a State?

Mr. SMITH. I think that is the object of it.

Mr. HAWES. Only where the law of that State prohibits it. There is no State in the Union that does prohibit the sale of convict-made goods. They regulate its sale, and require its branding and marking and licensing; but its sale is not prohibited in any State.

Mr. SMITH. I understand, Mr. President; and, if the Senator from West Virginia will allow me, we had a similar law here, introduced by the Senator from Missouri [Mr. REED], providing that no State should be allowed to ship liquor into a State which had prohibited the manufacture and sale of liquor within its borders. We all recognized, however, that liquor was not in the class of commercial articles the everyday use of which was universal, but it had come under the condemnation of organized society to the extent that the Federal Government had subjected it to taxes and licenses and restricted its sale and it came under the head of nuisances. Here we go further and say, "Here is a State that prohibits the shipment of a certain class of goods outside of its own borders," and then we invoke the power of the Federal Government to keep other States from shipping into that State goods which are in common use and are absolute necessities of everyday use in organized society, because of the nature of the labor employed.

Mr. GOFF. If the Senator will remain in the Chamber for a short time I will proceed, after one more reference, to a discussion of the questions he suggests.

Mr. SMITH. I will.

Mr. GOFF. I now make reference to the letter of Mr. A. H. Harrison, director of the department of penal institutions of the State of Missouri. It is addressed to Hon. JOSEPH J. MANLOVE, House of Representatives, Washington, D. C., and is dated February 15, 1928. In the course of this letter he says:

As you no doubt are aware, we have a prison population in Missouri of over 3,600 prisoners at this time. We employ in the shoe industry, twine industry, and textile industry approximately 2,200 prisoners; and if this bill is enacted into law it is my opinion that we will not be

able to employ any great amount of prisoners in the above-named industries.

The total average cost for each prisoner in the penitentiary is approximately a dollar a day. In the past the cost of maintaining the prison has been largely met by the earnings of the above-named industries, and for the present biennium we have an appropriation of $400,000 toward the maintenance of the penitentiaries. If we are to be deprived of the privilege of operating the industries, the State will then be forced to make an appropriation to maintain the penitentiary, which, in my opinion, would not be less than $2,500,000 for each biennium, in addition to the amount which has heretofore been appropriated by each legislature.

The prison population is constantly increasing. There is a constant complaint now from the taxpayers of the State as to high taxation, and if additional revenues must be provided it will be a serious condition which will confront the taxpayers of all of the States.

That is a typical complaint which comes from most of the States of the American Union. It varies with the population, with the number of men incarcerated in the prison, and with the ability of the State to dispose of its prison-labor products.

Mr. HAWES. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from West Virginia yield to the Senator from Missouri?

Mr. GOFF. Certainly.

Mr. HAWES. Referring to the Missouri report, I direct the Senator's attention to the very exhaustive report made on the 12th of December from the Department of Commerce, approved by the president of the chamber of commerce, labor unions, and so forth, in which they show that in one year at one time the Missouri prison officials dumped on the market some $1,500,000 worth of overalls and broke the overall market in the United States for one year and a half. That is in that report.

Mr. GOFF. I know that is in the report of the Department of Commerce; but if there has been any interference with the economic laws applicable, or with the laws of any State so affected, it is the offense of the State of Missouri or any other State similarly interfering with the laws of supply and demand, or refusing through its officials to observe the laws of the State which may be violated by any such dumping of goods. I do not think such conditions can justify the Senate or the Congress of the United States in assuming legislative jurisdiction to pass such a law. The report, however, is entirely lacking in any constructive suggestions, and while it is analytical and informing, it does not offer any solution in the determination of this pressing and distressing problem. It is the humane aspect and not the economic that should engage our attention and enlist our sympathies.

Of course, I admit that if some State violates the law of another State, or if some State should reach such a point of economic or legal interference with the laws of another State as to deny it a republican form of government, as that right is guaranteed by the Constitution of the United States, then there might exist a situation which would demand or justify the intervention of the Congress of the United States. Under the present circumstances, however, with due respect to my friend from Missouri, I do not consider that such a report, conclusion, or argument is either compelling or persuasive in determining the necessity for the exercise of these great constitutional rights of government.

Mr. HAWES. May I direct the Senator's attention to one of the first Federal enactments on this subject, called the Lacey Act?

Mr. GOFF. Yes; I know that act.

Mr. HAWES. The Lacey Act was intended to preserve the rights of States to protect their birds and fur-bearing animals. It grew out of the shipment from the then Territory of Oklahoma of large quantities of ducks and quail into the markets of the various States; and although these States had prohibitory laws protecting bird and animal life, by reason of the placing upon the market in this way of birds and fur-bearing animals they were unable to enforce their laws. That is the Lacey Act, and it has been sustained.

May I direct the Senator's attention to the fact that some years ago, in the House, I introduced a bill to prohibit the interstate shipment of black bass into States whose laws prohibited their commercial sale; and, if I am not mistaken, the Senator from West Virginia voted for that bill. Certainly it passed both Houses and is now the law.

Returning, however, to the question of invading a State, the Senator, of course, remembers that when the Wilson Act was passed—the so-called "bone dry" law, or the Reed law—liquor had not been outlawed. It was not then "a criminal." It was "a criminal," so to speak, in some States and not in other States; and yet that law has been upheld. If the Senator will compare this law with the Wilson Act, he will find very little difference in the phraseology of the two enactments.

Mr. GOFF. Mr. President, after referring to the general matters to which I called attention when interrupted by the Senator from Missouri—I intend to discuss those principles and go into all the legal questions suggested—I deem it important to call attention to the very explicit and informing statement by the warden of the penitentiary of the State of Rhode Island, which appears in the record of the proceedings in the Senate committee at page 171. At the time he introduced it into the record my distinguished friend from Missouri was present and did not question or dissent from it. Mr. Putnam adopted the report of the warden of the penitentiary at Columbus, Ohio. It is illuminating and informative. The report said:

In reply to your letter of recent date relative to the bill now before Congress regulating the interstate shipment of prison-made goods, will say that we have the State-use system which, if fully worked, will give work to all prisoners; but I do not want to be as the old story of the dog in the manger, that inasmuch as this law does not affect Ohio I can not see any particular good reason for it being passed, as other States have gone to an expense in putting in factories which, if the law were passed, would become nearly a total loss.

I have always opposed this hullabaloo about prison-made goods—

This is from the warden of a prison in a State-use State—

about prison-made goods, because prisoners themselves are less than the legal alcoholic content of nonintoxicating liquors; that is, less than one-tenth of 1 per cent of the population, and the productive class is about one-half of that, which would make in the sum total one-twentieth of 1 per cent to be considered in competition with 99 1/2 per cent. This is nothing more or less than the walking delegate's stock in trade of argument in order that he may continue to draw a fat salary from the earnings of the wage earner. It seems to me that it is about time that the taxpayers of the States have a little consideration, instead of the consideration being given so much to organized interests, both financial and labor.

Trusting that I have made myself clear,

Sincerely yours,

P. E. THOMAS, *Warden.*

The view of many laboring and manufacturing representatives is expressed by the following opinions:

Prisoners always work under the worst possible conditions.

Now, understand that this does not say that they sometimes do, but that they always do.

They are always half starved. The same politicians who sell them into chattel slavery also expend the appropriations that the taxpayers provide for the prisoners' food, and prison food is always insufficient, for the most part spoiled and decayed, and improperly cooked and served.

Making the production of commodities for private gain the primary object of prison administration has a natural tendency to take the discipline and administration of punishment out of the hands of public officials and vest it in the employees of the prison-labor contractor.

Now, how can it be seriously contended that these rehabilitating competitive methods of the States, representing the study and the efforts of centuries, are interfering with or can interfere with the free labor of the Nation? If there be competition, it is inconsequential. In fact, modern prison conditions, with their regular hours, wholesome food, good hospitalization, and humane treatment make the prisoner of to-day a capable and industrious employee.

There are in the record reference after reference to the unemployment in the prisons of the great States of Pennsylvania, Massachusetts, New York, Ohio, and other Commonwealths, large and small, to which the Senator from Missouri made reference. Wardens of other State penitentiaries have gone through the penitentiaries of Pennsylvania, and have found hundreds of men, as many as 500 men, walking around in circles because they had nothing to do. The same is true in the prisons of the great State of New York, and there are in this record statements by Colonel Hannan, from the great State of Wisconsin, a gentleman whom I know well, and in whose judgment I have the greatest confidence, that he visited the penitentiaries of the State of Ohio, and that he found there men unemployed, out in the yards playing marbles, "shooting crap," to use his expression, and doing anything and everything to consume and employ their time—during those moments that consume human existence from the rising until the setting of the sun. There was no work, no opportunity to employ the men. They were locked up—shut up—and denied occupation—employment and work—which is the law of life. Men sentenced to idleness are men sentenced to insanity. Such a punishment by society is worse than a crime; it is a selfish blunder, and it can not be justified or sanctified because committed in the name of sovereignty.

The record discloses that the proponents of this measure believe there is great competition with free labor. The statistics show that about one-twentieth of 1 per cent of the labor of this country is represented by prison labor. Obviously under such conditions competition is negligible. And yet there appears in the record the views of President Green, of the American Federation of Labor, to the effect that his organization is endeavoring to prevent the manufacture of prison products that come directly in competition with those sold in the open market. In fact, he specifies that there should be no competition on the part of the States in the employment of their imprisoned wards in the manufacture of brooms, shirts, overalls, furniture, shoes, and all other products which can be and are made by free labor, as that term is used.

Society must not lose sight of the fact that the majority of those in our prisons will some day be released. If these inmates are taught nothing but idleness, they will come out worse citizens than they were when they were sent in, because the absence of productive employment in any penitentiary leads to corruption, crime, and riot. These very conditions to-day exist in many of the penitentiaries of the larger States where the State-use system is observed.

Many of the penitentiaries have limited prison yards, and if the prisoners there incarcerated are not employed, it will be impossible to keep them physically fit and in a healthy, contented state of mind. The fact that in the majority of the prisons of this country the men have the opportunity to earn money which they send to their families makes them more contented and qualifies them to return to social life better men morally, physically, and mentally, and to take their places as useful citizens. In the prisons of the Northwestern States many of the inmates received as high as $1.30 per day. These men want their families to live and to lead an honest and virtuous life. They want their children educated.

Such men of necessity will become better prisoners if they feel that they are contributing to the happiness and the welfare of those who are dependent upon them. To put a man behind the bars and leave his family destitute, and him in idleness, is to make of our penitentiaries mere incubators of disorder and crime.

The wardens of the penitentiaries of the Nation as well as the penologists all agree that unless the prisoners are employed, the great majority will become habitual criminals and fall into the recidivist class.

Many students of this employment problem have reached the conclusion that a prisoner can not be employed in productive labor within or without prison walls without going into competition with free labor. Prisoners employed in the agricultural and cotton fields of the South compete with free labor. Those engaged in work upon the roads directly under the control of the States deny free labor such employment. Those employed in constructing buildings for the States compete with free labor, and there are many conspicuous instances of this. In passing I cite the employment of 200 prisoners from the State penitentiary in West Virginia engaged in the construction of the Federal Women's Prison at Alderson, W. Va.

In many of the States the number of idle prisoners is appalling. It appears that at Sing Sing Prison a short time ago there were 1,600 idle men, and one of the wardens testifying before the committee stated that he had seen 800 men in the State Prison of Ohio marching into a large hall where they sat from morning until noon and from noon until night. It is no valid objection to the employment of these unfortunates that contractors make a profit out of their labor. The States in their sovereign capacity, unless they go into business, can not well sell such products, and none of our States are in a position to find a market for what their prisoners produce. If the contractor did not make a profit, it certainly follows that he would not be interested in buying articles manufactured in our prisons.

We have by a process of humane and enlightened evolution discarded the harsh and severe punishments of the inquisition periods of human society. We have discarded the stocks, knouts, and the lash. We have come to recognize, as has been well said, that there is some good in the worst of us as well as some bad in the best of us. The world has come to realize that idleness is the most prolific cause of crime. This is shown by the fact that so many of the people confined in our penitentiaries are young men and young women.

If the present bill should become a law it will tend to give effect to practices long since discarded by society. It will be a reach back to the Middle Ages. In the long ago civilization put the branding iron upon the prisoner. It clothed him in stripes, and society abhorred him and hypercritically drew away from him, well knowing that he was, in many instances, confined, because found out, for doing merely what others continue to do until discovered.

The States as well as the Federal Government can not discharge their duty to the prisoners under their control unless they educate them, employ them, and make them better men and women. The passage of this bill will not only curtail the market for prison-made products, but it will produce idleness and disease in our penal institutions and increase the disorders always existing there. I realize that we are confronted by a problem which has existed ever since the organization of our Government. I also know that State and Federal officials charged with the duty of operating our penal institutions agree that the most satisfactory system is to follow a method that not only employs all the prisoners in useful occupations, but a system that makes these establishments self-supporting. Obviously the citizens of this Nation are responsible for the upkeep of our penal and charitable institutions. Such burdens rest heavily upon our entire population, and unless the States reduce such burdens by employing the inmates, then the expense of their upkeeping falls equally upon every man, woman, and child who pays taxes for the maintenance and the continuance of democratic government. Everything in this country to-day is taxed all that it can possibly be taxed. There is no untaxed resource, and if the bill now before us should become a law it will be necessary when it is in full operation to increase the rates of taxation upon all property now subject to such levies. The employment of our prisoners in manufacturing and the sale of their products saves the States of the country from the burden of direct and increased taxation. If the citizenship of the Nation should be taxed directly for the purpose of maintaining these penal institutions, then, without question, our State taxes will be increased approximately $40,000,000 a year.

Mr. President, we might just as well accept this proposition, that if incarcerated men are not morally, vocationally, and properly employed; if they are not to have sanitary surroundings when they do penance "in hard labor"; if their minds are not concentrated and hopeful, then when the courts of this Nation sentence a man to the penitentiary, they are in effect saying, "I give you 5, or 8, or 10 years 'at hard labor' in our State insane asylum. I do not call it by that name but that is what you will find it in fact before you have served your sentence and done the penance which the laws of this State require you to do ere you can be returned to your family as a useful member of our human oligarchy."

Mr. HAWES. Mr. President——

The PRESIDING OFFICER. Does the Senator from West Virginia yield to the Senator from Missouri?

Mr. GOFF. Certainly; and I will say to the Senator from Missouri that I yield to him at any time. He may just rise and ask questions whenever he wishes or the thought prompts him.

Mr. HAWES. Just as I yielded to the Senator the other day.

Mr. GOFF. Yes; at any time, because we are seeking to reach the truth of this matter, and I want the Senator to interrupt whenever the spirit moves him.

Mr. HAWES. The Senator is quoting a description of an Ohio penitentiary by an official of a Wisconsin penitentiary. Is that correct?

Mr. GOFF. Yes.

Mr. HAWES. It seems to me the Senator should give us some testimony, which is at his disposal, about employment at the Ohio Penitentiary from the United States statistics and the statistics of Ohio. While I am speaking, may I call the attention of the Senator to his quoting Mr. Putnam?

Mr. GOFF. Certainly.

Mr. HAWES. Mr. Putnam is from the State of Rhode Island.

Mr. GOFF. Yes.

Mr. HAWES. When we read the United States reports we understand why Mr. Putnam really complains. The Bureau of Labor Statistics shows that in 1925 in Rhode Island $1,400,000 was the total valuation of prison products. Of this amount, $1,396,000 worth are sold outside of the State and only $4,000 sold within the State. Yet the average income to the State is approximately only $90,000 for the employment of 260 men, and this million dollars' worth of goods is breaking the markets in all the States which are neighbors of Rhode Island. Naturally Mr. Putnam is opposed to this measure.

Mr. GOFF. Mr. President, I shall now discuss the question propounded by the Senator from Missouri, and which I promised to discuss. He asked, What would be the effect upon penitentiary labor of the restrictive provisions of this bill, Senate bill 1940? The bill provides:

That all goods, wares, and merchandise manufactured, produced, or mined shall, upon arrival and delivery in such State or Territory, be subject to the operation and effect of the laws of such State or Territory to the same extent and in the same manner as though such goods,

wares, and merchandise had been manufactured, produced, or mined in such State or Territory.

Then the Senator from Missouri seemingly satisfies himself by concluding that the bill if enacted would not interfere with the interstate commerce shipment of goods into States that had not required by their laws that such goods, wares, and merchandise should be submitted to the laws of that State.

I asked the Senator from Missouri whether he could state the number of States having such restrictive or limited enactments, and he did not agree that they did not exceed 12 in number. What I desire to make plain is that if this bill should become a law, then it is an invitation to every State, an invitation to every one of the 48 States, with millions of men and women behind the movement, to have such restrictive laws passed as now exist in the 10 or 12 States out of the 48 States of this Union. So that we would have such an interdiction placed upon prison-made goods that those goods could not be shipped in interstate commerce with any profit from the State where they were manufactured, because in every State into which they might be shipped they would be subject, as soon as their interstate-commerce character had ceased, to the laws and the regulations of such Commonwealth.

Mr. WATERMAN. Mr. President, I would like to ask, if the Senator will permit me, whether or not this bill does not subject this kind of commerce to two things in the State, to wit, the police power of the State and also the general sovereign power of the State, which is above and beyond and different from the police power, but is reserved by the Constitution to the States. In other words, it is not limited, if this bill shall go into effect, to the exercise of the police power of the State. Is that correct?

Mr. GOFF. That is absolutely correct, as I view this measure, and as I interpret the bill. And in this very connection, and as confirmatory of what the Senator from Colorado has said, the tenth amendment to the Constitution of the United States provides:

> The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively or to the people.

The enactment of this bill would be a clear invasion of the tenth amendment to the Constitution of the United States in that it would serve notice upon the States that they should proceed to exercise their so-called police power, and that if they did not so exercise it that then they would suffer an invasion of their reserved dominion by the Congress of the United States acting under, by, and through an improper application of a strictly limited and delegated power.

Mr. WATERMAN. Mr. President, will the Senator yield further?

Mr. GOFF. Certainly.

Mr. WATERMAN. As I take it, any part of the police power which the State possesses with reference to this character of goods can be exercised without this legislation, can it not?

Mr. GOFF. Exactly.

Mr. WATERMAN. Then the purpose of the bill is to reach beyond and into the sovereign powers of the State and have them apply upon interstate commerce?

Mr. GOFF. Exactly. Such a law would be a delegation of Federal power, a surrender of a prohibited power to the States to be used by them along with the powers which were reserved to the States when the Constitution was adopted. The principles of constitutional law which determine and answer the issues here involved are not new. They have been set forth time and time again by the Supreme Court of the United States. I shall now proceed to review them and in chronological order.

This bill is admitted by its proponents to be founded upon and modeled solely after the so-called Wilson Act.

Mr. CURTIS. Mr. President, I understand the Senator is just beginning to discuss the constitutionality of this measure. Would he rather proceed with it in the morning? An executive session is desired. If the Senator desires to stop now, I will move an executive session, or, if he would rather go on, he may proceed for a while.

Mr. GOFF. I am perfectly willing to cease now and begin the constitutional argument, with the record such as I have made it, to-morrow.

MEMORIAL TO BATTLE OF FORT FISHER

The PRESIDING OFFICER (Mr. VANDENBERG in the chair) laid before the Senate the amendments of the House of Representatives to the bill (S. 4302) to authorize the Secretary of Commerce to convey the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the Battle of Fort Fisher, which were, on page 1, line 3, after the word "convey," to insert ", subject to the conditions contained in section 2 of this act," and on page 2, line 23, after the word "proceeding," to insert ", such conditions to be recited in the deed or instrument of conveyance," so as to make the bill read:

Be it enacted, etc., That the Secretary of Commerce is authorized to convey, subject to the conditions contained in section 2 of this act, the Federal Point Lighthouse Reservation, N. C., to the city of Wilmington, N. C., for improvement and maintenance as a memorial to commemorate the Battle of Fort Fisher. The property to be transferred under this act was conveyed to the United States by deed of April 7, 1817, from Charles B. Gause, registered in the records of New Hanover County in Book P, page 305, and is described therein as "a certain piece or parcel of land situate, lying, and being in the State of North Carolina and county of New Hanover on Federal Point near the new inlet of Cape Fear River, whereon the beacon erected by the United States now stands, to contain one square acre of land, the beacon being the center of said square acre," together with "the use and privilege of the most convenient and usual landing place on said point from the river and from said landing place free egress and regress over the said point of land."

SEC. 2. In the event the city of Wilmington should fail to improve or to maintain the said property in the manner contemplated by this act the Secretary of Commerce may at any time by letter addressed to its chief executive officer or officers notify the city of Wilmington that the property conveyed will revert to the United States, and if the city of Wilmington does not begin or resume the performance of such improvement or maintenance within a period of six months from the date of such notice, the said property shall, upon the expiration of such period, revert to the United States without further notice or demand or any suit or proceeding, such conditions to be recited in the deed or instrument of conveyance. The United States reserves the right to resume ownership, possession, and control for Government purposes of the said property so conveyed at any time and without the consent of the grantee.

Mr. SIMMONS. I move that the Senate concur in the amendments made to the bill by the House.

The motion was agreed to.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until to-morrow at 12 o'clock.

The motion was agreed to; and the Senate (at 4 o'clock and 10 minutes p. m.) took a recess until to-morrow, Wednesday, December 19, 1928, at 12 o'clock meridian.

ARBITRATION WITH AUSTRIA

In executive session this day, the following treaty was ratified, and, on motion of Mr. BORAH, the injunction of secrecy was removed therefrom:

To the Senate:

To the end that I may receive the advice and consent of the Senate to its ratification, I transmit herewith a treaty of arbitration between the United States and Austria, signed at Washington on August 16, 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 8, 1928.*

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approve thereof, a treaty of arbitration between the United States and Austria, signed at Washington on August 16, 1928.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, December 1, 1928.

The President of the United States of America and the Federal President of the Republic of Austria

Determined to prevent so far as in their power lies any interruption in the peaceful relations now happily existing between the two nations;

Desirous of reaffirming their adherence to the policy of submitting to impartial decision all justiciable controversies that may arise between them; and

Eager by their example not only to demonstrate their condemnation of war as an instrument of national policy in their

mutual relations, but also to hasten the time when the perfection of international arrangements for the pacific settlement of international disputes shall have eliminated forever the possibility of war among any of the Powers of the world;

Have decided to conclude a new treaty of arbitration enlarging the scope and obligations of the arbitration convention which was signed at Washington, January 15, 1909, but is not now in force, and for that purpose they have appointed as their respective Plenipotentiaries

The President of the United States of America, Mr. Frank B. Kellogg, Secretary of State of the United States of America; and

The Federal President of the Republic of Austria, Mr. Edgar L. G. Prochnik, Envoy Extraordinary and Minister Plenipotentiary to the United States of America,

Who, having communicated to one another their full powers found in good and due form, have agreed upon the following articles:

ARTICLE I

All differences relating to international matters in which the High Contracting Parties are concerned by virtue of a claim of right made by one against the other under treaty or otherwise, which it has not been possible to adjust by diplomacy, which have not been adjusted as a result of reference to an appropriate commission of conciliation, and which are justiciable in their nature by reason of being susceptible of decision by the application of the principles of law or equity, shall be submitted to the Permanent Court of Arbitration established at The Hague by the Convention of October 18, 1907, or to some other competent tribunal, as shall be decided in each case by special agreement, which special agreement shall provide for the organization of such tribunal if necessary, define its powers, state the question or questions at issue, and settle the terms of reference.

The special agreement in each case shall be made on the part of the United States of America by the President of the United States of America by and with the advice and consent of the Senate thereof, and on the part of Austria in accordance with its constitutional laws.

ARTICLE II

The provisions of this treaty shall not be invoked in respect of any dispute the subject matter of which

(a) is within the domestic jurisdiction of either of the High Contracting Parties,

(b) involves the interests of third Parties,

(c) depends upon or involves the maintenance of the traditional attitude of the United States concerning American questions, commonly described as the Monroe Doctrine,

(d) depends upon or involves the observance of the obligations of Austria in accordance with the Covenant of the League of Nations.

ARTICLE III

The present treaty shall be ratified by the President of the United States of America by and with the advice and consent of the Senate thereof and by Austria in accordance with its constitutional laws.

The ratifications shall be exchanged at Washington as soon as possible, and the treaty shall take effect on the date of the exchange of the ratifications. It shall thereafter remain in force continuously unless and until terminated by one year's written notice given by either High Contracting Party to the other.

In faith whereof the respective Plenipotentiaries have signed this treaty in duplicate in the English and German languages, both texts having equal force, and hereunto affixed their seals.

Done at Washington the sixteenth day of August in the year of our Lord one thousand nine hundred and twenty-eight.

The President of the United States of America and the President of the Republic of Lithuania

Determined to prevent so far as in their power lies any interruption in the peaceful relations that have always existed between the two nations;

Desirous of reaffirming their adherence to the policy of submitting to impartial decision all justiciable controversies that may arise between them; and

Eager by their example not only to demonstrate their condemnation of war as an instrument of national policy in their mutual relations, but also to hasten the time when the perfection of international arrangements for the pacific settlement of international disputes shall have eliminated forever the possibility of war among any of the Powers of the world;

Have decided to conclude a treaty of arbitration and for that purpose they have appointed as their respective Plenipotentiaries

The President of the United States of America:

Mr. Frank B. Kellogg, Secretary of State of the United States of America;

The President of the Republic of Lithuania:

Mr. Bronius K. Balutis, Envoy Extraordinary and Minister Plenipotentiary of the Republic of Lithuania at Washington;

Who, having communicated to each other their full powers found in good and due form, have agreed upon the following articles:

ARTICLE I

All differences relating to international matters in which the High Contracting Parties are concerned by virtue of a claim of right made by one against the other under treaty or otherwise, which it has not been possible to adjust by diplomacy, which have not been adjusted as a result of reference to an appropriate commission of conciliation, and which are justiciable in their nature by reason of being susceptible of decision by application of the principles of law or equity, shall be submitted to the Permanent Court of Arbitration established at The Hague by the Convention of October 18, 1907, or to some other competent tribunal, as shall be decided in each case by special agreement, which special agreement shall provide for the organization of such tribunal if necessary, define its powers, state the question or questions at issue, and settle the terms of reference.

The special agreement in each case shall be made on the part of the United States of America by the President of the United States of America by and with the advice and consent of the Senate thereof, and on the part of Lithuania in accordance with its constitutional laws.

ARTICLE II

The provisions of this treaty shall not be invoked in respect of any dispute the subject matter of which

(a) is within the domestic jurisdiction of either of the High Contracting Parties,

(b) involves the interests of third Parties,

(c) depends upon or involves the maintenance of the traditional attitude of the United States concerning American questions, commonly described as the Monroe Doctrine,

(d) depends upon or involves the observance of the obligations of Lithuania in accordance with the Covenant of the League of Nations.

ARTICLE III

The present treaty shall be ratified by the President of the United States of America by and with the advice and consent of the Senate thereof and by Lithuania in accordance with its constitutional laws.

The ratifications shall be exchanged at Washington as soon as possible, and the treaty shall take effect on the date of the exchange of the ratifications. It shall thereafter remain in force continuously unless and until terminated by one year's written notice given by either High Contracting Party to the other.

In faith whereof the respective Plenipotentiaries have signed this treaty in duplicate and hereunto affixed their seals.

Done at Washington the fourteenth day of November in the year of our Lord one thousand nine hundred and twenty-eight.

Washington, December 1, 1928.

The President of the United States of America and His Majesty the King of Sweden

Determined to prevent so far as in their power lies any interruption in the peaceful relations that have always existed between the two nations;

Desirous of reaffirming their adherence to the policy of submitting to impartial decision all justiciable controversies that may arise between them; and

Eager by their example not only to demonstrate their condemnation of war as an instrument of national policy in their mutual relations, but also to hasten the time when the perfection of international arrangements for the pacific settlement of international disputes shall have eliminated forever the possibility of war among any of the Powers of the world;

Have decided to conclude a new treaty of arbitration enlarging the scope and obligations of the arbitration convention signed at Washington on June 24, 1924, and for that purpose they have appointed as their respective Plenipotentiaries;

The President of the United States of America,

Frank B. Kellogg, Secretary of State of the United States of America; and

His Majesty the King of Sweden,

W. Boström, Envoy Extraordinary and Minister Plenipotentiary at Washington;

Who, having communicated to one another their full powers found in good and due form, have agreed upon the following articles:

ARTICLE I

All differences relating to international matters in which the High Contracting Parties are concerned by virtue of a claim of right made by one against the other under treaty or otherwise, which it has not been possible to adjust by diplomacy, which have not been adjusted as a result of reference to the Permanent International Commission constituted pursuant to the treaty signed at Washington, October 13, 1914, and which are justiciable in their nature by reason of being susceptible of decision by the application of the principles of law or equity, shall be submitted to the Permanent Court of Arbitration established at The Hague by the Convention of October 18, 1907, or to some other competent tribunal, as shall be decided in each case by special agreement, which special agreement shall provide for the organization of such tribunal if necessary, define its powers, state the question or questions at issue, and settle the terms of reference.

The special agreement in each case shall be made on the part of the United States of America by the President of the United States of America by and with the advice and consent of the Senate thereof, and on the part of Sweden in accordance with its constitutional laws.

ARTICLE II

The provisions of this treaty shall not be invoked in respect of any dispute the subject matter of which

(a) is within the domestic jurisdiction of either of the High Contracting Parties,

(b) involves the interests of third Parties,

(c) depends upon or involves the maintenance of the traditional attitude of the United States concerning American questions, commonly described as the Monroe Doctrine,

(d) depends upon or involves the observance of the obligations of Sweden in accordance with the Covenant of the League of Nations.

ARTICLE III

The present treaty shall be ratified by the President of the United States of America by and with the advice and consent of the Senate thereof and by His Majesty the King of Sweden with the consent of the Swedish Riksdag.

The ratification shall be exchanged at Washington as soon as possible, and the treaty shall take effect on the date of the exchange of the ratifications, from which date the arbitration convention signed June 24, 1924, shall cease to have any force or effect. It shall thereafter remain in force continuously unless and until terminated by one year's written notice given by either High Contracting Party to the other.

In faith whereof the respective Plenipotentiaries have signed this treaty in duplicate in the English and Swedish languages, both texts having equal force, and hereunto affixed their seals.

Done at Washington the twenty-seventh day of October, in the year of our Lord one thousand nine hundred and twenty-eight.

FRANK B. KELLOGG [SEAL]
W. BOSTRÖM [SEAL]

NOMINATIONS

Executive nominations received by the Senate December 18 (legislative day of December 17), 1928

UNITED STATES ATTORNEY

Julien A. Hurley to be United States attorney for the fourth division of the district of Alaska. (A reappointment, his term having expired.)

POSTMASTERS

ARKANSAS

Viola Leake to be postmaster at Altheimer, Ark., in place of Viola Leake. Incumbent's commission expires December 29, 1928.

Nettie M. O'Neill to be postmaster at Earl, Ark., in place of N. M. O'Neill. Incumbent's commission expires December 29 1928.

Marion M. Parker to be postmaster at Griffin, Ark., in place of M. M. Parker. Incumbent's commission expires December 29, 1928.

Luther H. Presson to be postmaster at Mansfield, Ark., in place of L. H. Presson. Incumbent's commission expires December 29, 1928.

John H. Martin to be postmaster at Russellville, Ark., in place of J. H. Martin. Incumbent's commission expires December 29, 1928.

CALIFORNIA

Morris E. Crane to be postmaster at Pine Knot, Calif., in place of F. C. Skinner, resigned.

COLORADO

James S. Bradbury to be postmaster at Silt, Colo., in place of J. S. Bradbury. Incumbent's commission expires December 29, 1928.

FLORIDA

Victor Allen to be postmaster at Bushnell, Fla., in place of N. B. Winslow, resigned.

GEORGIA

John W. Moore to be postmaster at Crawford, Ga., in place of J. W. Moore. Incumbent's commission expired December 18, 1928.

Walter L. Turner to be postmaster at Lagrange, Ga., in place of W. L. Turner. Incumbent's commission expired December 18, 1928.

Johnnie B. Roddenbery to be postmaster at Thomasville, Ga., in place of J. B. Roddenbery. Incumbent's commission expires December 20, 1928.

ILLINOIS

John S. Redshaw to be postmaster at Granville, Ill., in place of J. S. Redshaw. Incumbent's commission expired December 10, 1928.

IOWA

Samuel W. Campbell to be postmaster at Anthon, Iowa, in place of S. W. Campbell. Incumbent's commission expires December 29, 1928.

Verne T. Herrick to be postmaster at Bridgewater, Iowa, in place of V. T. Herrick. Incumbent's commission expires December 29, 1928.

John T. Bargenholt to be postmaster at Orient, Iowa, in place of J. T. Bargenholt. Incumbent's commission expires December 29, 1928.

Clarence D. Bourke to be postmaster at Primghar, Iowa, in place of C. D. Bourke. Incumbent's commission expires December 29, 1928.

Arthur O. Reinhardt to be postmaster at Van Horne, Iowa, in place of A. O. Reinhardt. Incumbent's commission expired June 6, 1928.

Bruce R. Mills to be postmaster at Woodbine, Iowa, in place of B. R. Mills. Incumbent's commission expires December 29, 1928.

LOUISIANA

Clem S. Clarke to be postmaster at Shreveport, La., in place of C. W. Page, deceased.

MASSACHUSETTS

Edmund Daly to be postmaster at Hingham, Mass., in place of Edmund Daly. Incumbent's commission expired December 10, 1928.

MINNESOTA

Arthur F. Johnson to be postmaster at Dent, Minn., in place of A. F. Johnson. Incumbent's commission expires December 29, 1928.

Effie B. Starkweather to be postmaster at Hackensack, Minn., in place of E. O. King, removed.

Frederick A. Cooley to be postmaster at Heron Lake, Minn., in place of F. A. Cooley. Incumbent's commission expires December 29, 1928.

MISSOURI

Lola L. Higbee to be postmaster at Schell City, Mo., in place of Estella Marquis. Incumbent's commission expired February 17, 1926.

Dana Gerster to be postmaster at Stella, Mo., in place of Dana Gerster. Incumbent's commission expired December 10, 1928.

MONTANA

J. Clarence Manix to be postmaster at Augusta, Mont., in place of J. C. Manix. Incumbent's commission expires December 29, 1928.

Charles E. June to be postmaster at Forsyth, Mont., in place of C. E. June. Incumbent's commission expires December 29, 1928.

NEW JERSEY

Hilding W. Hammarlund to be postmaster at Ridgefield Park, N. J., in place of W. O. Maschke. Incumbent's commission expired January 15, 1928.

NEBRASKA

George W. Whitehead to be postmaster at Mason City, Nebr., in place of G. W. Whitehead. Incumbent's commission expired December 11, 1928.

NEW MEXICO

Mahan Wyman to be postmaster at Loving, N. Mex., in place of Mahan Wyman. Incumbent's commission expired December 13, 1928.

Agnes M. Walsh to be postmaster at Santa Rita, N. Mex., in place of D. J. Walsh, deceased.

NEW YORK

Guy Shook to be postmaster at Claverack, N. Y., in place of M. L. Becker, deceased.

Eleanor C. Griffing to be postmaster at Shelter Island, N. Y., in place of E. C. Griffing. Incumbent's commission expires December 29, 1928.

NORTH DAKOTA

Karl E. Fischer to be postmaster at Hague, N. Dak. Made presidential July 1, 1928.

Erick Myhre to be postmaster at Hampden, N. Dak., in place of Erick Myhre. Incumbent's commission expires December 29, 1928.

Katie H. Hanson to be postmaster at Munich, N. Dak., in place of K. H. Hanson. Incumbent's commission expired December 12, 1928.

OHIO

George H. Scheetz to be postmaster at Bridgeport, Ohio, in place of G. H. Scheetz. Incumbent's commission expired December 17, 1928.

Edwin Seedhouse to be postmaster at Doylestown, Ohio, in place of C. W. Shaffer, resigned.

John T. Wood to be postmaster at East Liverpool, Ohio, in place of J. E. McClure, deceased.

Jennie Fickes to be postmaster at Empire, Ohio, in place of Jennie Fickes. Incumbent's commission expired December 10, 1928.

Bayard F. Thompson to be postmaster at Jewett, Ohio, in place of B. F. Thompson. Incumbent's commission expired March 1, 1928.

John M. McConnell to be postmaster at Mingo Junction, Ohio, in place of J. M. McConnell. Incumbent's commission expired December 17, 1928.

Wellington T. Huntsman to be postmaster at Toledo, Ohio, in place of W. T. Huntsman. Incumbent's commission expires December 20, 1928.

OKLAHOMA

Charles F. Ritcheson to be postmaster at Maysville, Okla., in place of C. F. Ritcheson. Incumbent's commission expired December 10, 1928.

Boone A. Leatherman to be postmaster at Rosston, Okla., in place of B. A. Leatherman. Incumbent's commission expired May 5, 1928.

PENNSYLVANIA

Christian S. Clayton to be postmaster at Huntingdon Valley, Pa., in place of C. S. Clayton. Incumbent's commission expired December 16, 1928.

Anna Postupack to be postmaster at McAdoo, Pa., in place of John Skweir. Incumbent's commission expired January 8, 1928.

Charles M. Wilkins to be postmaster at Wayne, Pa., in place of C. M. Wilkins. Incumbent's commission expired December 17, 1928.

SOUTH CAROLINA

Benjamin T. Frierson to be postmaster at Conway, S. C., in place of B. T. Frierson, resigned.

LeGrand G. Bolin to be postmaster at Neeses, S. C., in place of T. J. Bolin, resigned.

TEXAS

Winnie B. Carroll to be postmaster at Center, Tex., in place of W. B. Carroll. Incumbent's commission expires December 19, 1927.

Samuel J. Hott to be postmaster at Channing, Tex., in place of S. J. Hott. Incumbent's commission expired December 10, 1928.

William G. Shelton to be postmaster at East Bernard, Tex., in place of W. G. Shelton. Incumbent's commission expired December 10, 1928.

Emma Woody to be postmaster at Girard, Tex., in place of Emma Woody. Incumbent's commission expired December 10, 1928.

Jim H. McFarlin to be postmaster at Liberty Hill, Tex., in place of J. H. McFarlin. Incumbent's commission expired December 10, 1928.

Mary M. Ferrel to be postmaster at Roby, Tex., in place of M. M. Ferrel. Incumbent's commission expired December 10, 1928.

Walter J. Kveton to be postmaster at Sealy, Tex., in place of W. F. Viereck, deceased.

William R. Holton to be postmaster at Thornton, Tex., in place of W. R. Holton. Incumbent's commission expired December 10, 1928.

UTAH

Paul G. Johnson to be postmaster at Grantsville, Utah, in place of P. G. Johnson. Incumbent's commission expired December 13, 1928.

David T. Lewis to be postmaster at Spanish Fork, Utah, in place of D. T. Lewis. Incumbent's commission expired December 13, 1928.

WISCONSIN

Helen L. Menzner to be postmaster at Marathon, Wis., in place of A. P. Gertschen, removed.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 18 (legislative day of December 17), 1928

APPRAISERS OF MERCHANDISE

Edward J. Rodrigue to be appraiser of merchandise, customs collection district No. 20, New Orleans, La.

James F. Ingraham to be appraiser of merchandise, customs collection district No. 4, Boston, Mass.

UNITED STATES PUBLIC HEALTH SERVICE

To be passed assistant surgeons

Erval R. Coffey.
Adolph S. Rumreich.
Ernest E. Huber.
Edwin H. Carnes.
Lucius F. Badger.
Albert E. Russell.
Alfred J. Aselmeyer.

To be assistant surgeons

Hiram J. Bush.
Donald P. Ross.
Richard A. Steere.
Aubrey E. Snowe.
Samuel J. Hall.
Walter L. Barnes.
Milton A. Gilmore.
Henry N. Fisher.
Houston G. Foster.
Robert W. Cranston.

WITHDRAWAL

Executive nomination withdrawn from the Senate December 18 (legislative day of December 17), 1928

POSTMASTER

PENNSYLVANIA

Frank S. Grau to be postmaster at Ardsley, in the State of Pennsylvania.

HOUSE OF REPRESENTATIVES

TUESDAY, *December 18, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Galilean Savior, the World's Redeemer, Thou who hast past through the inmost sanctuary of suffering and shed a radiance there, hear us as we tarry in prayer. Death is with us; in its shroud lies an honorable Member of this Chamber, capable in the public service, splendidly upright, and good in private life. He has followed the path of our ascended Lord and walks in the newness of life forever. Yet, Father in Heaven, the song of praise is not burdened and stilled on our lips; neither is the music of our hearts turned into discordant wailing. Death is only a new contact with the infinite God. Through Thy only begotten Son, the grave is empty and the throne is full. Oh, eternity, eternity, is here and near; gird us with its glory and envelop us in its song. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Perkins, its enrolling clerk, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H. J. Res. 352. Joint resolution for the relief of Porto Rico.

The message also announced that the Senate disagrees to the amendments of the House of Representatives to the bill (S. 3881) to provide for the paving of the Government road, known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. GREENE, Mr. MCMASTER, Mr. BROOKHART, Mr. FLETCHER, and Mr. TYSON to be the conferees on the part of the Senate.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 3776. An act to authorize the Secretary of the Interior to issue patents for lands held under color of title;

S. 3844. An act amending the fraternal beneficial association law for the District of Columbia as to payment of death benefits; and

S. 4127. An act to provide for the appointment of an additional justice of the Supreme Court of the District of Columbia, and for other purposes.

TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL—CONFERENCE REPORT

Mr. WOOD. Mr. Speaker, I call up the conference report upon the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes.

The SPEAKER. The gentleman from Indiana calls up a conference report, which the Clerk will report.

The Clerk read the conference report.

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 3, 5, 6, 8, and 20.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 4, 9, 10, 11, 12, 13, 14, 15, and 16, and agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17,

and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$186,000,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$19,400,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$59,300,000"; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$4,300,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$5,100,000"; and the Senate agree to the same.

The committee of conference have not agreed on amendment numbered 7.

WILL R. WOOD,

Except on No. 8.

M. H. THATCHER,

I concur except on Senate amendment No. 5.

JOSEPH W. BYRNS,
Managers on the part of the House.

F. E. WARREN,
REED SMOOT,
GEO. H. MOSES,

Except amendments 5 and 6.

LEE S. OVERMAN,
WM. J. HARRIS,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and embodied in the accompanying conference report, as to each of such amendments, namely:

TREASURY DEPARTMENT

On No. 1: Makes a technical correction in the "average provision" governing the payment of salaries under the Classification act of 1923 as amended.

On Nos. 2 and 3, relating to the office of Treasurer of the United States: Provides for one Assistant Treasurer, as proposed by the House, instead of two, as proposed by the Senate, and appropriates $1,170,000, as proposed by the House, instead of $1,175,000, as proposed by the Senate.

On No. 4: Appropriates $34,703,870, as proposed by the Senate, instead of $34,500,000, as proposed by the House, for the expenses of the Bureau of Internal Revenue.

On No. 5: Strikes out the amendment, inserted by the Senate, relative to the submission of reports of disbursements of refunds of internal-revenue taxes erroneously or illegally collected.

On No. 6: Appropriates $13,500,000, as proposed by the House, instead of $270,627,384, as proposed by the Senate, for the Bureau of Prohibition.

On No. 8: Appropriates $215,500, as proposed by the House, instead of $247,825, as proposed by the Senate, for rural sanitation work under the Public Health Service.

On Nos. 9, 10, and 11, relating to the mints and assay offices: Appropriates $1,646,440, as proposed by the Senate, instead of $1,635,500, as proposed by the House, and restores the mint at Carson, Nev., and the assay office at Salt Lake City, Utah.

On Nos. 12, 13, 14, and 15, relating to the public building at Lubbock, Tex.: Fixes the limit of cost at $335,000, as proposed by the Senate, instead of $220,000, as proposed by the House, and provides for court facilities in the building, as proposed by the Senate, instead of having the building so constructed that such facilities might be added later as was proposed by the House.

On No. 16, relating to the public building at Portland, Oreg.: Fixes the limit of cost of the building at $1,950,000, as proposed by the Senate, instead of at $1,600,000, as proposed by the House.

POST OFFICE DEPARTMENT

On No. 17: Appropriates $186,000,000, instead of $186,800,000, as proposed by the Senate, and $185,000,000 as proposed by the House, for employees at first and second class post offices.

On No. 18: Appropriates $19,400,000, instead of $19,500,000, as proposed by the Senate, and $19,300,000, as proposed by the House, for the vehicle service.

On No. 19: Appropriates $59,300,000, instead of $59,500,000, as proposed by the Senate, and $59,000,000, as proposed by the House, for employees in the Railway Mail Service.

On Nos. 20, 21, and 22, relating to the transportation of foreign mail: Appropriates $23,000,000, as proposed by the House, instead of $23,250,000, as proposed by the Senate; fixes the amount that may be used for transportation of foreign mail by aircraft during the fiscal year 1930 at $4,300,000 instead of $4,400,000, as proposed by the Senate, and $4,000,000, as proposed by the House; and limits the amount of contractual obligations for expenditures for transportation of foreign mail by aircraft during the fiscal year 1931 at $5,100,000 instead of $4,800,000, as proposed by the House, and $5,200,000, as proposed by the Senate.

The committee of conference have not agreed to Senate amendment No. 7, relating to the use of funds under the Bureau of Prohibition for enforcement of the law relating to narcotics.

WILL R. WOOD,
M. H. THATCHER,
JOSEPH W. BYRNS,
Managers on the part of the House.

Mr. WOOD. Mr. Speaker, I yield 10 minutes to the gentleman from Tennessee [Mr. BYRNS].

Mr. BYRNS. Mr. Speaker, I joined in the conference report with the exception of Senate amendment No. 5, which was introduced by the Senator from Tennessee, Mr. MCKELLAR, which related to tax refunds. That amendment possibly should have been changed in some respects, but I was sorry that the conferees did not agree to some amendment which I felt could have been adopted, and which would have given further publicity to some of these large refunds that are being made from time to time by the Treasury Department.

The House is aware of the fact that this bill as it passed the Senate carried an amendment increasing the sum for prohibition enforcement by $250,000,000. I need not say to the House that I am heartily in favor of strict enforcement of the prohibition law, and I think everyone must agree that it has not been strictly enforced during the last seven and a half years. To those of us who want to see all laws enforced—and we all do—it is a source not only of regret but it is humiliating that a law upon the statute books should be enforced in such a lax manner as this law has been enforced during the past seven and a half years, because I dare say there is not a State in the Union where it is not being flagrantly violated, more so, of course, in some States than in others.

When the officers of the Government having charge of the enforcement of that law were before the subcommittee of the Committee on Appropriations of the House I endeavored by some questions to find out just what would be necessary in order to secure a better enforcement of the law, because the head of the Prohibition Bureau and of the Coast Guard, which is charged with preventing smuggling, both admitted that the law was not being fully enforced. In explanation they insisted that not enough money was being provided for that purpose, but on inquiry no one who appeared before us was able to say just how much was needed.

I asked the admiral of the Coast Guard particularly just how many additional boats he would require in order to prevent smuggling on our coasts, and he said that he could not tell at that time. He stated that considerable progress had been made upon the Atlantic coast. I think he said a seventh or an eighth of the supply which had formerly come in was still coming in at various points on the Atlantic coast and, further, that no attention whatsoever is being paid to the Pacific coast. Undoubtedly, if this law is to be enforced as it should be, more money must be provided; but each year the administration comes forward with practically the same estimate for appropriation in the face of the fact that those in charge of the enforcement of this law say that it is not by any means sufficient to enforce the law. But what were we to do? No program was submitted, no one was willing to state just how much additional money was needed, or what would be done with any additional money that might be provided. As a matter of fact, under the present appropriation, notwithstanding the law which was passed a year or two ago provided that all employees of the prohibition service should be put under the civil service,

only about two-thirds are under civil service now, and if you were to appropriate $250,000,000 I am satisfied that if it were used at all it would be used in making appointments of prohibition officers and agents throughout the country not under civil service but, as has happened in many States in the past, through political favoritism; and I was unwilling, in the face of the fact that we are confronted with a deficit, which seems to be inevitable if the figures of the Treasury Department are correct, to vote $250,000,000 out of the United States Treasury when we had no program before us and no intimation or idea as to just how it would be expended if it were so appropriated and no request from the administration for further funds.

Mr. O'CONNOR of New York. Mr. Speaker, will the gentleman yield?

Mr. BYRNS. Yes.

Mr. O'CONNOR of New York. If the gentleman followed his argument to a logical conclusion, that $13,000,000 does not enforce in any State in the Union, then why appropriate anything to enforce the law? Why waste $13,000,000 when it is not effective?

Mr. BYRNS. I think it is to a certain extent effective, but when I speak of enforcement, of course, I am speaking of that complete enforcement of the law which we all desire to see happen and which the people have a right to expect; but I will say to the gentleman that if there had been a possibility of increasing the appropriation even in conference by something like $50,000,000 or even more, I would gladly have supported such a proposition if we could have been given some assurance that it would be used in an effective way and not merely to put more political appointees on the Government pay roll.

And I notice one thing, gentlemen, that every proposition that has been made upon the floor of the House or the floor of the Senate for an increase of this appropriation has come from those who are not in sympathy with this law, and some of them go so far as to state that no amount of money that may be appropriated would be sufficient to enforce it. The Republican Party pledged the people in the recent campaign that it would enforce the prohibition law. Notwithstanding its lamentable failure to do so during the past seven and one-half years the people accepted its promise. Those in charge of its enforcement say they can not enforce it without more money. If this Republican administration sincerely wishes to enforce this law as it promised the people it would do then it should propose and present to this session of Congress, for a deficiency bill, a program for the better enforcement of this law, because I do not believe there are any Members of Congress who would refuse to vote sufficient money to enforce the law if they were given some kind of an assurance that the money appropriated would be properly expended for enforcement and not for political purposes.

Mr. BLANTON. Will the gentleman yield?

Mr. BYRNS. In just a minute. We know this: This amendment was placed upon the bill in the Senate by a distinguished Senator who is every ready to declare his opposition to prohibition and who even yesterday in a statement on the floor of the Senate said that he did not believe that it could be enforced other than by something like an inquisition in this country. Without reflecting upon any gentleman who favors these large appropriations, under these circumstances, those of us who really and conscientiously believe in prohibition and want to see the law enforced as it should be enforced naturally have some reason to suspect the real motives of those gentlemen who never lose an opportunity to attack prohibition and the law upon the statute books but who insist upon these larger appropriations. They must know that in the absence of a careful program by the administration it would be wasted, and perhaps that may be one reason why these active wets make these efforts. They hope to make the law unpopular.

Mr. BLANTON. Will the gentleman yield? If we gave them the money——

The SPEAKER. The time of the gentleman has expired.

Mr. BYRNS. May I have five additional minutes?

Mr. WOOD. I yield the gentleman five additional minutes.

Mr. BLANTON. If we gave them the money they would not have any excuse whatever for saying they could not enforce it, would they?

Mr. BYRNS. No; but I am not willing to vote $250,000,000 without some information as to how it will be expended.

Mr. BLANTON. I noticed that during the recent months the administration leaders have directed much criticism against the State of New York for repealing the State prohibition laws, but none of them have directed any criticism toward the administration for permitting the local laws here in the city of the Nation's Capital to be repeated. There is no local law here that applies in the District.

For instance, the District officials have 1,400 policemen in Washington, and only 20 can make arrests for violations of the prohibition law. The others of the fourteen hundred are helpless, and there has been no attempt whatever to reenact the old Sheppard Act that permitted enforcement by local officials here in the District of Columbia. That would be one step toward enforcement.

Mr. BYRNS. Undoubtedly. The wonder is that so little effort toward honest enforcement has been made and yet many of the prohibitionists of the country indorsed it. I am sure Doctor Doran, of the Prohibition Bureau, and Admiral Billard, of the Coast Guard, are doing all they can with the limited funds at their command. The fault lies with the administration which does not formulate plans for a more rigid enforcement and ask for sufficient money to make it effective. On the contrary, it comes forward each year with the same old request for the same amount of money to be expended in the same old way. Each year Congress has increased it to some extent——

Mr. O'CONNOR of New York. If the gentleman will permit me to clear up the situation——

Mr. BYRNS. I have but a minute.

Mr. O'CONNOR of New York. I want to say this about men advocating these increased appropriations because they are against prohibition: There are some men in the House, including myself, who have never voted for an appropriation to enforce prohibition because I believe the people do not want it. I have not even voted for the $13,000,000 because I believe the American people are against it, and anybody who says he wants enforcement directed against his friends or companions is not frank with the world.

Mr. BYRNS. I was not questioning the motive of the gentleman from New York or any other gentleman on the floor of this House; but I have always been taught to beware of Greeks bearing gifts, and I have noticed that these amendments seeking large appropriations always come from those gentlemen who are recognized as ardent opponents of the prohibition law and gentlemen who do not believe in it. Neither do I, of course, mean to impute any insincerity to any of these gentlemen; but what I want to see is this: I want to see those who are in charge of the enforcement of this law, if they really want to enforce it, come to Congress with a constructive program and tell us how they expect to spend the money, and until they do this I can not with good conscience vote for this immense increase of $250,000,000 to be put into the hands of the administration which has not asked for it. Certainly this ought not to be done until the administration has told the Congress how it expects to expend it. And especially is that true when we are confronted with the fact that we are going to have a deficit in all probability next year.

That was my reason for joining in this conference report. I can not conceive of Congress voting $250,000,000 for the enforcement of law when the administration and those in charge of it have neither asked for it nor told us how they are going to expend it. I do not think we should be swept off our feet for any reason, political or otherwise, in the effort to place this big charge upon the Treasury merely because it is for prohibition or for any other reason. [Applause.]

The SPEAKER. The time of the gentleman from Tennessee has expired.

Mr. WOOD. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. LAGUARDIA[.

The SPEAKER. The gentleman from New York is recognized for five minutes.

Mr. LAGUARDIA. Mr. Speaker, I believe the position of a Member who is opposed to the prohibition laws seeking sufficient appropriations to enforce these impossible laws is much more easily explained than that of the champions of the drys who stand up and vote against necessary appropriations to enforce the laws. We are simply tired of being called nullifiers of the law and pointed out as flouters of the law, as opponents of the Constitution, and then coming to Congress and hearing from the same Members who criticize us, Members who pretend to believe in the eighteenth amendment of the Constitution and champions of the enforcement law, while knowing in their hearts that the law can not be enforced, going through the mockery of voting measly appropriations when they know those appropriations are not sufficient to attempt to enforce the law, because they know the law can not be enforced, but will not admit it. [Applause.]

The distinguished gentleman from Tennessee [Mr. BYRNS] states that there is no plan ready. Why, your very enforcement law is the plan. That is not the reason. The real reason is that the law is a failure, and you know it. I submit that the sending of 250 agents on an average in each State, while not even half sufficient, is at least a reasonable plan. There are no drys who

can honestly complain against that. The distribution of 3,000 agents on the Canadian border, Gulf, Atlantic, and Pacific coasts is a most reasonable plan, and no one can honestly say that is extravagant. By trying to make the law applicable to all States, and not only to New York City, with a small force in each State, would cost $30,000,000 alone. Putting of 3,000 agents on the border lines would cost you $10,000,000. Proper supervision of industrial alcohol would cost at least $10,000,000, and real enforcement of the narcotic law alone would cost $25,000,000 a year. There is $75,000,000 to start, and that would only commence to organize the skeleton of the force necessary to enforce this prohibition law.

Gentlemen, I do not criticize the personal habits of any dry. I believe the eighteenth amendment has brought about a new code of conduct among American gentlemen. In other words, "people who have liquor in their glasses should not look into the other fellow's glass." [Laughter.] I am criticizing the legislative attitude of the drys. The only way to try out this law is to enforce it. We know it can not be enforced. As long as the drys insist that it can be enforced and should be enforced, they can not escape the responsibility of appropriating the funds necessary to do it. It is my function as a legislator, being sent here by a constituency which does not approve of this law, to seek to bring about a change by legislative or constitutional action, not to protect the bootlegger and the poison-monger by lack of appropriations, such as is being done to-day. It is not inconsistent for me as a wet to vote for all the appropriations required and thus let the country know what a farce this whole question of prohibition is.

We are dissatisfied with a laissez faire policy of selling poison and buying a drink on the sly. It is just this policy that has created graft and corruption, that has established a criminal system with unlimited resources, such as threatens to demoralize the whole country. That is the condition to-day. Gentlemen, you must either admit complete failure or vote away millions and millions of dollars for enforcement. Even after we spend millions the drys will have to admit that of which we are convinced, that it just can not be done. Try and appropriate $50,000,000 or $100,000,000 if you are sincere and really believe in enforcement. It will soon reach an annual appropriation of $250,000,000. Then the people will realize the necessity of bringing about a change. We ask you, so long as the law is on the statute books, to enforce it in all the States. [Applause.]

Mr. BYRNS. Mr. Speaker, will the gentleman yield there?

Mr. LAGUARDIA. Yes.

Mr. BYRNS. Mr. Speaker, so far as I am concerned, I think the record will show that the law is being more strictly enforced in the State of Tennessee and much more effectively than in the State of the gentleman who has just spoken. The gentleman has stated that $50,000,000, or $100,000,000, or $200,000,000 would not be sufficient to enforce the law. Why, then, should the gentleman, representing a great constituency, vote for taking $250,000,000, which will require the raising of taxes, when he admits that the law can not be enforced?

Mr. LAGUARDIA. My answer is this: That we must go through this waste of public funds in order to convince the gentleman from Tennessee and other sincere drys in this House that the law is simply impossible of enforcement. If the gentleman is ready to admit it now—let us get busy and amend the law. It seems that it is necessary to go through this costly procedure of attempted enforcement to convince some who still believe in the law. There is no use in talking about the Constitution and law enforcement if you have not the courage to put the necessary money back of it and try it out; try it out until your tongues hang out, until your people can not get a drink. Try it out, and then come back here and modify the law. [Applause.]

Mr. WOOD. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. O'CONNOR].

The SPEAKER. The gentleman from New York is recognized for five minutes.

Mr. O'CONNOR of New York. Mr. Speaker, I belong to a school of thought on this subject of prohibition enforcement entirely at variance to that of the gentleman from New York [Mr. LAGUARDIA]. He is for making the law ridiculous by voting for unavailable amounts to enforce it, knowing that no amount of money will enforce it. That, to my mind, is just as hypocritical as the original enactment of prohibition. I am against enforcing it at all, because I am confident the American people, irrespective of their alleged votes on the merits of prohibition and its related questions, do not want prohibition "enforced." They at least do not want it enforced within their own circle. I do not believe there is a red-blooded man or woman in America to-day who would go the limit in enforcing prohibition as they would other laws, because such a fervor as we hear mouthed here to-day, if carried to a conclusion, would involve decent men and women informing on their relatives and their friends and their social acquaintances. A whole nation of informers would entail. What man here would tolerate his associate in committing burglary or any one of many other crimes without informing on him? But what man here would ever, to his dying day, inform on a colleague or friend for violating the Volstead law? And why is this spirit prevalent among decent men and women? Because they know that the drinking of liquor is not per se a "crime," and all the constitutional amendments and all the prohibition legislation conjurable can not make it one.

If the drinking of liquor can not be made a crime, how are you ever going to convince an intelligent people that the manufacture, transportation, or sale of it is even an offense against morals, let alone a crime?

What man here will sit in a gathering to-night and to-morrow inform on his friends who violate this "law"?

Why, gentlemen, the mere fact that some one in authority, such as Commissioner Doran, burdened with the mockery of trying to enforce it, says you need $300,000,000 to "enforce" this law, is the greatest proof under the sun that there is something fundamentally wrong with the law—that it is not consonant with the wish and the will of the American people. What other law needs that much money? What other one law on the statute books of our Federal Government needs even $28,000,000 to enforce it, as this appropriation bill carries, not to mention the huge sum Commissioner Doran suggests?

Mr. McKEOWN. Will the gentleman yield?

Mr. O'CONNOR of New York. Yes.

Mr. McKEOWN. If the people do not want prohibition, what was the matter with the State of New York in the last election on that question?

Mr. O'CONNOR of New York. Oh, there is always the cry about the State of New York. We hear things reiterated so often that sometimes the people who utter them believe they are true. We will match the great Empire State in its enforcement of prohibition against any State of the Union. It is, in fact and truth, the only place where there has been an attempt at enforcement. Particularly true is this in New York City, because in the rest of the State there has never even been a feeble attempt at enforcement. In the rural counties the Republicans and the professional "drys" are in local control. There has not been a speakeasy in New York City that has not felt the heavy hand of the prohibition enforcement investigators—at least, the tribute-levying hand. In the other counties of the State, outside of New York City, rarely has an old saloon or a new speakeasy ever been visited by a prohibition agent, let alone interfered with in its business of catering to the "drys" of the county. They are all still doing business. One of the favorite indoor sports here is poking at New York for not having a State enforcement act. What about the State of Massachusetts, where your Chief Executive comes from? Have they there a real enforcement act and do they enforce prohibition by State law?

Mr. LUCE. Will the gentleman yield?

Mr. O'CONNOR of New York. Yes.

Mr. LUCE. Yes. [Applause.]

Mr. O'CONNOR of New York. Oh, the gentleman may think they do, but I am informed that not within five years has the State of Massachusetts worked under its State enforcement act, and furthermore the State of Massachusetts, the great State of your Chief Executive, on every occasion when a referendum was submitted to it has voted for light wines and beer.

Now, I am one who refuses to be a hyprocrite about this matter. I would not vote for any appropriation, big or little, to enforce prohibition. I would not vote for $13,000,000 or 13 cents to enforce prohibition. I do not know one person who sincerely wants it enforced. I know of hundreds of laws on the statute books that no man here would dare to suggest appropriating one cent to enforce. If that is against my oath of office, I am at least honest with myself. I can still look in the mirror without saying "thou hypocrite!"

Mr. LAGUARDIA. Will the gentleman yield?

Mr. O'CONNOR of New York. Yes.

Mr. LAGUARDIA. Does the gentleman believe we can convince our colleagues that this law is not enforceable unless we give them every means to enforce it and then show them it can not be enforced?

Mr. O'CONNOR of New York. That is only a roundabout, circuitous way of doing a thing. You are only playing the same game of hypocrisy as those who favor prohibition are playing when you try to call their bluff by using all the resources of the Government to carry the law into effect. You argue it never can be enforced, and then you stand here and advocate wasting hundreds of millions of the taxpayers' money to prove

your case. I am not going to sneak up on it and stab it in the back like that. I am going to hit it right between the eyes. The greatest crime in America to-day is hypocrisy, seeming to be what you are not. Whether you are "dry" or "wet" may depend on whether you are making a campaign speech or giving a dinner party.

Mr. SCHAFER. Will the gentleman yield?

Mr. O'CONNOR of New York. Yes.

Mr. SCHAFER. Would you play the same game of hypocrisy that Governor Smith played in the last campaign on the prohibition issue?

Mr. O'CONNOR of New York. I will answer the "wet" gentleman by saying that if Governor Smith had been a hypocrite, as most politicians are, he might have fared better in those days of demagogues. It is my personal opinion that the greatest claptrap in America that falls from the lips of any statesman is to say that "while this law is on the statute books I am in favor of enforcing it." No man in public life really means that. No man in public life to-day wants to enforce that law to the limit.

I am one who is against its enforcement. The mere fact that something about prohibition is written in the Constitution of the United States does not overawe me. I know the people do not want it enforced. I know they would not want it enforced if all the referendums imaginable were had and huge majorities answered in favor of continuing the present system. I want no referendums. I would not abide by one myself. No majority, however great—aye, 99 per cent—can regulate my personal conduct in such matters. Yes, even if I were the only one in the negative. That majorities have been, and may be, tyrannical was never better evidenced than by the condition in which we find ourselves to-day in this country over prohibition. It was never intended in this democracy that a majority, however large, could invade the homes in the private affairs of our citizens. So, talk no more to me of referendums! I am going to decide the question of temperance or abstinence for myself, and I think every honest man agrees.

This overshadowing problem of prohibition will be solved some day, I am confident. For 10 years no greater or more-discussed issue has confronted the American people. No one will say the law has been effective. No one ventures that it can be. The necessary corollary of that is that something must and will be done about it. It has been the greatest breeder of demagogues since slavery. It furnishes all the appeals to the emotions and passions that are meat to the demagogue. He has thrived on it. Hypocrisy is his coat of arms. Take that away from him and stand him naked in the market place on his own two feet and the people will soon be rid of him. First do away with the hypocrisy in this subject and you will point a way to its solution. I am willing to hazard a guess that before his term shall expire the newly elected President of the United States may advise Congress that prohibition is really not enforceable and that some plan of effecting real temperance should be devised. Perhaps he may even take a leaf out of the book of a certain governor named Smith. Mirabile dictu.

Mr. WOOD. Mr. Speaker and gentlemen of the House, I wish to call your attention to what the conference report means. The amount of this bill as it passed the Senate was $1,376,805,908. The amount of the bill as it passed the House was $1,116,675,389. The amount added by the Senate was $260,130,519. Of this addition $257,127,384 was involved in the Bruce amendment to the prohibition enforcement appropriation. Exclusive of the Bruce amendment the Senate added $3,003,000. In conference the Senate has receded from $258,915,709, of which the Bruce amendment amounted to $257,127,519, leaving the Senate recession on other items $1,388,190. The House has receded from items totaling $1,614,810. The bill as agreed upon is $1,118,290,199. This sum is less than the Budget estimate by $1,112,560. The amount as agreed upon is divided between the two departments as follows: Treasury Department $303,674,474, and Post Office Department $814,615,725.

Now, gentlemen, I wish to make a few observations with reference to the Bruce amendment. The appropriation in this bill is but a small item as compared with the total amount of money that is being expended in an endeavor to enforce the prohibition law. This bill carries $13,000,000 for that purpose. This added to what is appropriated for various other departments for prohibition enforcement amounts in all to more than $35,000,000. This is a considerable sum, yet we are told that we are to appropriate $257,000,000 more. And who tells us to do this? Not the friends of prohibition. The enemies of prohibition are the proponents of all of these amendments, not in good faith, but in order, if you please, to try to break down this law. There is not one among them but what if he had his way to-day would strike it from the statute books. There is not one among them but what would go to great lengths to defeat the prohibition law, and they are never happier than when they hear of its violation.

It is not enforcement they want, and this has been confessed by the gentleman from New York [Mr. LAGUARDIA]. He is admitting that if we appropriated all the money in the Treasury this thing would be a failure. It is his desire that it should be a failure.

I think the people of the United States, upon the 6th day of November last, registered in no uncertain terms what their desires are with reference to the prohibition law, and when the gentlemen from New York on either side of the aisle get up here and tell us that the State of New York is among the chiefest who have tried to enforce it, they know it is not true. Why, that State, so far as I know, is the only State that has held the law in defiance from the very time it was enacted. When it was under consideration here, every Member from the city of New York, from Tammany, voted against it; and after it became the law, the first thing they did was to introduce or have introduced in the Legislature of New York a bill for the purpose of manufacturing 3.75 per cent beer. This law was passed and signed by their governor, the late candidate for President of the United States, on the Democratic ticket, when he knew it was unconstitutional. It was brought to the Supreme Court of the United States and that court very promptly declared it unconstitutional. Not content with this, they introduced a bill in the legislature of that State, passed it, if you please, signed by the governor, Governor Smith, repealing all enforcement laws, yet they come here and tell us they have been trying to enforce this law in the State of New York. If all the States in the Union had taken the same position, had acted through their legislatures and through their governors, the same as they have acted in New York, we would have had pandemonium in this country.

I have faith to believe that by reason of the verdict of the people registered in November, and by reason of the trust they have in the present administration and incoming to enforce this law, a long step has been taken toward its enforcement. If there was any doubt anywhere as to the temper of the people in regard to the enforcement of this law it was dispelled on November 6, 1928. There is no longer any uncertainty on this proposition. The moral effect of the election is going to go a long way toward enforcement of this and all other laws.

Mr. BLACK of New York. Will the gentleman yield?

Mr. WOOD. No. I want to say to you that, on the other hand, had Al Smith been elected President of the United States, occupying the position he has ever occupied with reference to this prohibition law, there would have been ten times more violations then than there is now, because every violator would have felt he had a license, by reason of the attitude of the President of the United States, to go his whole length. [Applause.]

Mr. SCHAFER. Will the gentleman yield?

Mr. WOOD. Not now.

We witnessed a beautiful spectacle the other day when it was proposed by an enemy—and an arch enemy of the prohibition law—to add $257,000,000 to this appropriation; and the remarkable thing is that on yesterday when this conference report was being debated upon the other side some 20 or more Senators who hold themselves out as drys voted with this arch enemy of prohibition. Why did they do it? They have their ears to the ground. There is no uncertain sound still reverberating from what happened on the 6th of November. They supported Smith, and they are now trying, if you please, to back track and get in the confidence of their constituencies again who were betrayed in the late campaign.

Mr. BANKHEAD. Mr. Speaker, I feel that I must rise to a point of order.

The SPEAKER. The gentleman will state it.

Mr. BANKHEAD. The gentleman from Indiana has been in Congress long enough and is enough familiar with the rules of conduct of the House to know that it is a flagrant violation of the rules for him to criticize or speak in terms of disparagement of the vote of Members at the other end of the Capitol. [Applause.] I must respectfully ask the Speaker to admonish the present occupant of the floor of that rule of the House.

The SPEAKER. The gentleman from Indiana will proceed in order.

Mr. CRAMTON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. Does the gentleman from Indiana yield for a parliamentary inquiry?

Mr. WOOD. Yes; I yield.

Mr. CRAMTON. Is a reference to the fact that certain Members of this or another body supported Al Smith for President to be taken as an opprobrious epithet? [Laughter.]

Mr. WOOD. Mr. Speaker, there come times when, in order that the people of this country may know what is going on here, we should call a spade a spade.

Mr. BANKHEAD. Mr. Speaker, I renew my point of order and ask for a ruling from the Chair upon the point of order.

The SPEAKER. The Chair does not think that a mere reference to the particular candidate for whom a Member may have voted is out of order, but thinks that the gentleman from Indiana is rather dangerously close to the line in attributing motives to the Members. The gentleman from Indiana will proceed in order.

Mr. WOOD. I am in accord with the ruling of the Speaker. [Laughter and applause.]

Mr. BLACK of New York. Will the gentleman yield on another point?

Mr. WOOD. Not now.

I want to say, gentlemen of the House, it is pretty near time that the American people should put the blame where blame is due. We have been hearing preached and reiterated for years and years the great conservatism of one body of this Congress as compared with the other. I think it is about time that the people of this country should know which the conservative body is. It has been said of this House that we are very sensitive to the sentiment of the people back home so that we may keep our seats here.

I would like for the people to scan the action of this body on this very bill, in contrast to the action of the other body on the same measure. The same attempt was made here in a more modest degree to hamstring the bill, and this House, without regard to politics, without regard to party, voiced a unanimous sentiment, almost, in opposition to these attempts. When on the other side there was more than two-thirds of those who voted for it, professed drys, and yet they voted with the arch enemy of prohibition.

Mr. HOWARD of Nebraska. Will the gentleman yield to one of his most earnest supporters? [Laughter.]

Mr. WOOD. I will yield to the gentleman.

Mr. HOWARD of Nebraska. I have always followed my colleague from Indiana diligently. I am in doubt what I should do. I want to vote with him, but I would like to have him tell me if I should vote with him, sustaining his action here, in view of his reference to the 6th of November, will I then stand in the attitude of repudiating my own action on the 6th of November? [Laughter.]

Mr. WOOD. I do not know what the gentleman's performance was on the 6th of November. I know what the performance of his candidate for governor was. I do not think he should be very proud of him, and in the name and memory of William Jennings Bryan can you be proud of him [laughter]——

Mr. HOWARD of Nebraska. May I say——

Mr. WOOD. I thought the gentleman was through——

Mr. HOWARD of Nebraska. I may be through, but I wondered if the gentleman from Indiana was through.

Mr. WOOD. The gentleman from Nebraska will support the conference report, for he is consistently in favor of the enforcement of the law.

Mr. HOWARD of Nebraska. Well, that is a pretty good certificate. [Laughter.]

Mr. WOOD. Now, let me say that we have all of the machinery now for the enforcement of the law that can possibly be handled under the existing circumstances. The amount of money carried in this bill is all that the department asked for and all that they can use in a practical way.

Mr. BYRNS. Will the gentleman yield?

Mr. WOOD. Yes.

Mr. BYRNS. The gentleman is in charge of the bill on the floor and he was in charge at the hearing when the bill was pending before the committee. I want to know if the gentleman has any idea or any opinion as to just how $250,000,000 would be expended if appropriated, as was suggested by the Senate amendment.

Mr. WOOD. I have no idea.

Mr. BYRNS. Does the gentleman think it would be or could be expended?

Mr. WOOD. It could not be expended for the purpose appropriated. If expended, it would be simply a waste. As has been stated here, the men who are supposed to enforce the law are to come from the civil-service list. They have had two examinations and have not been able to furnish more than one-third of the force because of one reason or another.

Mr. CRISP. Will the gentleman yield?

Mr. WOOD. I will.

Mr. CRISP. I am supporting the gentleman. He stated that there was $35,000,000 appropriated for enforcement of the law—$13,000,000 in this bill. I would be glad if the gentleman in extending his remarks will set out for the information of the country the other appropriations going to make up the $35,000,000.

Mr. WOOD. I will be glad to do it. It is made up in the appropriations for Coast Guard, Bureau of Prohibition, and the Department of Justice, and I will put in all of the items.

The following statement gives the cost as nearly as can be estimated for 1930, using as a basis appropriations made in the pending bill for bureaus under the Treasury Department, and including for the Department of Justice the total in the Budget estimates:

Bureau of Prohibition appropriation	$13,500,000
Less amount for narcotic enforcement	1,411,260
Net amount for prohibition	12,088,740
To be allotted from Treasury fund for printing and binding	70,000
To be allotted from Treasury fund for stationery	48,000
Total for Bureau of Prohibition	12,206,740
Coast Guard, proportion due to antismuggling	14,686,798
Customs Service, proportion estimated as due to border patrol work taken over from the Bureau of Prohibition	1,000,000
Department of Justice, estimated at one-third of total department estimates for 1930 as due to prohibition enforcement	9,367,853
Total	37,261,391

Mr. BLACK of New York. Will the gentleman yield?

Mr. WOOD. I will.

Mr. BLACK of New York. When the bill was on the floor of the House there was an item for a revolving fund for the narcotic enforcement, which was stricken out on a point of order. And the gentleman indicated that it would be restored in the Senate.

Mr. WOOD. It has been restored.

Mr. BANKHEAD. Will the gentleman yield?

Mr. WOOD. I yield.

Mr. BANKHEAD. The gentleman is chairman of the subcommittee and has heard all the evidence as to the amount of the appropriation for the enforcement of prohibition. Does the gentleman agree that $13,000,000 is all that is reasonably sufficient and necessary to enforce prohibition in the United States?

Mr. WOOD. I will say this: This law will never be enforced as we would like to have it enforced until those whose duty it is to help enforce it, not only in the Federal machinery but in their State machinery, do their utmost.

It is the hardest trial that has ever been put up to the American people. I have faith to believe that eventually it will be done, but I say this to the gentleman: I have had a good deal to do with the liquor laws. I was prosecuting attorney for six years in a town of 25,000 inhabitants that had a hundred and ten saloons. The law was violated constantly, and I dare say the millenium will come before they cease violating the liquor laws in the United States. Liquor has been prolific of more law violations and in consequence prolific of more crime than all of the other causes in this world combined, so that we need never hope to see the day when the liquor laws are completely enforced, for that time will never come. The best we can hope for is to see the violation of the liquor laws reduced to the lowest possible minimum. I have faith to believe that with patience, with honest and earnest endeavor, the laws will be enforced to that extent.

Mr. LOZIER. Mr. Speaker, will the gentleman yield?

Mr. WOOD. Yes.

Mr. LOZIER. Apropos to the favorite indoor sport in America, namely, abusing the House of Representatives, is it not true that this body functions more efficiently and is more responsive to the public will than any other legislative body, State or national, in the world?

Mr. WOOD. I agree with the gentleman entirely on that proposition.

Mr. BANKHEAD. Does the gentleman regard his answer to my inquiry as an adequate answer in good faith, responsive to it? I know the gentleman intended it so to be, but did he complete it?

Mr. WOOD. If I did not complete it, I say this, that the $13,000,000 that we are appropriating in this bill, with the other appropriations aggregating $35,000,000, for the enforcement of this law, will go a long way toward bringing about the end we desire, but that it will accomplish it completely I say no. It is going to take a number of years to do it, but I do say, and I think the gentleman from Tennessee [Mr. BYRNS] agrees with me in this opinion, that the amount that we are appropriating is all the money that can be practically used under the present organization.

Mr. BRAND of Georgia. Mr. Speaker, will the gentleman yield?

Mr. WOOD. Yes.

Mr. BRAND of Georgia. How much was the appropriation two years ago for this purpose, as compared to this appropriation?

Mr. WOOD. I do not remember just what the figures were, but it was not as great as it is to-day. The House in considering this item added $100,000 more than was suggested by the Budget, so that the committee after getting all of the facts as nearly as it could, tried to deal generously and gave much as we thought just and right, and to the entire satisfaction of those whose duty it is to enforce the law.

Mr. BRAND of Georgia. The appropriation now is larger than it was in the last appropriation bill?

Mr. WOOD. Yes.

Mr. LAGUARDIA. Mr. Speaker, will the gentleman yield?

Mr. WOOD. Yes.

Mr. LAGUARDIA. Is it the contention of the supporters of the reduced appropriation that what is being done is all that can be done for the enforcement of that law?

Mr. WOOD. It is not all that can be done. When you get law-enforcement officers who are 100 per cent honest, when you get the cooperation of the State law-enforcement officers who are 100 per cent honest, when you get the cooperation of Federal officers and of State officers, with the sympathy of those officers in favor of enforcement, then we will come more nearly to doing what the gentleman inquires about.

Mr. LAGUARDIA. And, in addition to that, it is only fair to add when we get legislators of that same high degree of honesty.

Mr. WOOD. I say the legislators here have been doing their part in so far as furnishing the sinews of war are concerned.

Mr. BLACK of New York. What does the gentleman mean by sinews of war?

Mr. WOOD. That is the money.

Mr. BLACK of New York. How about the other side?

Mr. WOOD. I am not my brother's keeper.

Mr. STEVENSON. Mr. Speaker, will the gentleman yield?

Mr. WOOD. Yes.

Mr. STEVENSON. A suggestion was made a short time ago by the gentleman, to which some objected—though I did not—in respect to the motive of some of the Members of another body who voted with this proposition yesterday. The gentleman suggested that it was a manifestation of their repentance of what they did last November. I call the attention of the gentleman to the fact that the senior Senator from North Carolina and the senior Senator from Alabama were both with that crowd. Does the gentleman think that they are repenting now?

Mr. WOOD. No; they are sitting upon the pinnacle of self-satisfaction, and can truthfully say to those who sought to crucify them during the campaign, "We told you so."

Mr. STEVENSON. But they were voting with this arch-enemy of prohibition to whom the gentleman refers.

Mr. WOOD. Yes; and I will tell you why they did it. Both of these gentlemen are members of the Democratic Party, in which they were born and reared and hope to die, and they are desirous of seeing their party reborn, rise, and again become active, full fledged, and full of energy for the pursuit of right. They are trying to help these men out of the hole into which they got themselves. That is what they are trying to do. [Laughter and applause.]

Mr. STALKER. Mr. Speaker, will the gentleman yield two minutes to me?

Mr. WOOD. How much time have I remaining, Mr. Speaker?

The SPEAKER. The gentleman has 12 minutes remaining.

Mr. WOOD. I promised to yield five minutes to the gentleman from Texas [Mr. BLANTON]. He does not seem to be present at the moment, and I yield the gentleman from New York two minutes.

Mr. STALKER. Mr. Speaker, I have had a conference this morning with Mr. Lowman, Assistant Secretary of the Treasury, who is a distinguished citizen of my district. The Treasury Department does not need additional money to enforce the national prohibition act. The bill gives them all that they have requested. They can make all of the cases—in fact, more cases than the Department of Justice can prosecute. If the penalties were more severe, the law would command greater respect and the violations would thereby be materially reduced.

Where we have fallen down is that we have not given the Department of Justice sufficient machinery with which to enforce the law. I refer especially to the inadequate penalties. In the western district of New York there are now 3,000 cases pending that have not been tried. I have introduced H. R. 9588, which was referred to the Judiciary Committee and favorably reported, and is now on the House Calendar. This bill increases the penalty and makes a commercial violation of the eighteenth amendment a felony. The penalty is $10,000 or five years' imprisonment, or both. A similar bill was introduced in the Senate by Senator JONES, was favorably reported, and is on the Senate calendar. If Congress will enact this legislation increasing the penalty for violations, and thereby give the Department of Justice the proper machinery with which to enforce the law, we will then be able to cope with the situation and enforce the eighteenth amendment.

The SPEAKER. The time of the gentleman has expired.

Mr. WOOD. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

The SPEAKER. The Clerk will report the amendment in dispute.

The Clerk read as follows:

Amendment No. 7. Page 21, in line 5, after the word "warehouses," insert a colon and the following proviso: "*Provided further,* That moneys expended from this appropriation for the purchase of narcotics and subsequently recovered shall be deposited in the Treasury to the credit of the appropriation for enforcement of narcotic and national prohibition acts current at the time of the deposit."

Mr. WOOD. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

Mr. BYRNS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

LIMITING OPERATION OF SECTIONS 198 AND 203 OF TITLE 18 OF THE CODE OF LAWS OF THE UNITED STATES

Mr. GRAHAM. Mr. Speaker, I ask unanimous consent to have the House take up and consider Senate Joint Resolution 167.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent for the present consideration of the joint resolution, which the Clerk will report.

Senate Joint Resolution 167

Limiting the operation of sections 198 and 203 of title 18 of the Code of Laws of the United States.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection?

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, the report on this joint resolution as yet has not been printed. On yesterday I obtained leave of the House until to-morrow to file a minority report. The distinguished chairman of the committee, the gentleman from Pennsylvania, feels this matter ought to receive prompt attention, and if I may have an opportunity to state my position on the resolution to the House I will take my chances on that.

The SPEAKER. Is there objection?

Mr. HUDDLESTON. Mr. Speaker, reserving the right to object, I would like to have the resolution reported.

The SPEAKER. Without objection, the resolution will be reported.

There was no objection.

The Clerk read as follows:

Resolved, etc., That nothing in sections 198 or 203 of title 18 of the Code of Laws of the United States (secs. 109 and 113, Criminal Code) or any other act of Congress forbidding any person in the employ of the United States or acting in any official capacity under them from acting as agent or attorney for another before any department or branch of the Government or from receiving pay for so acting shall be deemed to apply to counsel serving under the provisions of S. J. Res. 54, Sixty-eighth Congress, first session, approved February 8, 1924.

Mr. HUDDLESTON. Mr. Speaker, further reserving the right to object, may I ask the gentleman from Pennsylvania if that resolution is intended to permit Mr. Roberts to remain in the public service?

Mr. SCHAFER. I will object, Mr. Speaker.

The SPEAKER. Objection is heard.

Mr. GRAHAM. Mr. Speaker, will the gentleman withhold his objection in order that I may explain?

If the gentleman will hear me, I am sure he will withdraw his objection.

Mr. SCHAFER. I will reserve the objection.

Mr. GRAHAM. The matter pending is not a question of the relief of Mr. Roberts. The matter pending is a question of having the United States Government properly represented when the oil case is argued this month. The situation is that Mr. Roberts has resigned from this special attorney generalship. In my humble judgment, and I differ with the Attorney General

in that, these acts which are sought to be made inapplicable to this special appointment as United States Attorney General do not cover the case of Mr. Roberts. Mr. Roberts was appointed under a joint resolution at the instigation of the President to prosecute these oil cases, he and Senator Pomerene of Ohio.

This resolution applies solely and only to relieving him of the effect of the Attorney General's opinion, that those sections do cover the cases of special counsel thus selected.

Now, then, the Government is in this position; it has made an earnest appeal that the case should be presented early, and when it comes to prepare the briefs there will be no one adequately fitted to prepare the briefs with a sufficient knowledge of these cases, and it puts the United States at a great disadvantage.

Mr. SCHAFER. Mr. Speaker, will the case be tried in the District of Columbia?

Mr. GRAHAM. No; it will be argued before the Supreme Court.

Mr. SCHAFER. I withdraw my objection, since the case is to be argued before the Supreme Court. I thought the case was to be tried in the courts of the District of Columbia. No matter who represented the Government in these oil cases, would there be a conviction in the courts of the District of Columbia under existing conditions, particularly the method of selecting juries? I withdraw the objection.

Mr. GRAHAM. The gentleman may be right.

The SPEAKER. Is there objection?

There was no objection.

Mr. GRAHAM. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. LAGUARDIA].

The SPEAKER. The gentleman from New York is recognized for five minutes.

Mr. LAGUARDIA. Mr. Speaker, I do not want to avail myself of the right to object and so prevent this resolution that has passed the Senate from coming before the House for consideration. I do want to warn the membership of this House of the precedent you are establishing if you pass this resolution.

It simply singles out one man and sets aside wise, sound, and necessary provisions of the law in order to obtain the legal services of one particular lawyer. This resolution would make an exception to the law which prohibits an official of the Government from appearing or practicing before the departments of the Government for clients whose interests are adverse to the Government. In other words, represent one client in an action and other clients against that same client in other actions.

I do not believe and can not agree that there is only one man in the United States who can prepare the briefs and argue the particular case for the Government in this particular instance. I believe the Government's case is so strong and has so much merit that we can obtain as many lawyers as we may need to argue the case.

But assuming that the facts are as stated by the gentleman from Pennsylvania [Mr. GRAHAM], that a lawyer has the Government, so to speak, by the throat, assuming that he is the only man who can prepare these briefs and argue the case, then I submit it is manifestly unfair for him to say, "I will not continue. I will resign unless you amend the law especially for me so that I can come in and practice before the departments of the Government in matters against the United States, even though I am retained as special counsel for the same United States." That is what the resolution would do. Mr. Roberts may be replaced, and in that event we need not amend the law. Or if he can not be replaced, he should not exact such unreasonable terms. It is a very unwise and dangerous precedent to establish. I will concede Mr. Roberts's great ability. I will concede the desirability of his continuance in the case. With all that I do not concede the necessity of this resolution which would make Mr. Roberts a most privileged person.

Every corporation or person having a case before the Treasury Department for refund of taxes and all sorts of actions before the Department of the Interior, might well now go to Mr. Roberts, a privileged person by special act of Congress, if you please, and their argument will be, "How can Mr. Roberts be wrong in maintaining our contention, when he is the only one you say is qualified to be intrusted with most important cases by the Government itself?" It will indeed be difficult for the head of a department to get away from that.

These laws are necessary to protect the Government against officials of the Government practicing before the departments in cases brought against the Government. I can see no necessity for such drastic action as setting aside the law in order to retain the service of one lawyer. When the oil cases are mentioned, it seems everybody is afraid to speak. I think that the Government's side of these cases is so strong that the Supreme Court, having nothing else to do than follow its own decisions in cases involving the same transactions, will follow the precedents set in the other cases. If you are going to annul the law prohibiting a Government official from appearing against the Government, you are going to destroy a great protection for the Government and Government resources.

I will state frankly that considerable pressure has been brought for the passage of this resolution. This matter was mentioned in the message from the President of the United States. He recommends the passage of the resolution. It has passed the Senate and the Committee on the Judiciary of the House has reported it out without a dissenting vote except my own; but if I am the only Member of this House to-day to take this position, I am going to take it and stand here and oppose it, because I conscientiously consider it unwise and dangerous.

I want to remind the gentleman from Pennsylvania [Mr. GRAHAM] that we passed another bill similar to this under the same pressure, to bring a witness from a foreign country, and we find now that after passing that law the law is ineffective and the foreign government refuses to surrender the man. That provision of law was passed under exactly the same circumstances as this.

I have performed my duty in giving you the facts. You are voting for a resolution without a report before you, without any case being made out showing the necessity for it. The responsibility is upon the House. I have done my duty. [Applause.]

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

BOULDER DAM

Mr. SMITH. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 5773, together with Senate amendments, and consider the same in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Idaho asks unanimous consent to take from the Speaker's table House bill 5773, with Senate amendments, and consider the same in the House as in Committee of the Whole. Is there objection?

Mr. CLARKE. Mr. Speaker, reserving the right to object, what is this bill?

Mr. SMITH. It is the Boulder Dam bill.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the Senate amendment.

Mr. SMITH. Mr. Speaker, I ask unanimous consent to dispense with the reading of the Senate amendment.

The SPEAKER. The gentleman from Idaho asks unanimous consent to dispense with the reading of the Senate amendment. Is there objection?

There was no objection.

Mr. SMITH. Mr. Speaker, I move that the House concur in the Senate amendment.

The SPEAKER. The gentleman from Idaho moves that the House concur in the Senate amendment, and is recognized for five minutes.

Mr. SMITH. Mr. Speaker, this is the bill known as the Bouldam Dam bill for the improvement of the Colorado River. It passed this Houes on the 25th of May and passed the Senate on the 13th of this month. The Senate struck out all after the enacting clause and inserted its own bill, which had been repored from the Senate Committee on Irrigation and Reclamation. The changes made in the Senate will be explained by the author of the bill, Mr. SWING, of California.

Mr. HOCH. Will the gentleman yield?

Mr. SMITH. Yes.

Mr. HOCH. Is there anything in the Senate amendment with reference to the sale of electrical energy, as far as the rates to consumers are concerned?

Mr. SMITH. No. There is no reference to the rates.

Mr. HOCH. Is there any provision whatever in the bill which provides for the regulation of the rates?

Mr. SMITH. Yes; for the regulation of the rates.

Mr. HOCH. What is the regulation?

Mr. SMITH. The author of the bill will explain in detail the changes in the bill as passed by the Senate.

The SPEAKER. The gentleman from California [Mr. SWING] is recognized for five minutes.

Mr. SWING. Mr. Speaker and Members of the House, the principal changes that were made by the Senate were along the line of bringing the bill into conformity with the report of the Sibert Board of Engineers, which was appointed under a joint resolution concurred in by this House.

The first important amendment or change had to do with a segregation and separation of the all-American canal, its cost, and its method of repayment from the dam and the power plant, their revenues and their method of repayment. That was rec-

ommended by the Sibert Board. Under the House bill, as it passed, all parts of the project were embodied in one group and all revenues from all sources, including the lands under the all-American canal, were pooled to pay off the entire debt due the Government. The contention was seriously made in this House by opponents that the all-American canal would be a drag or burden upon the revenues which would be received from the power and in that way tend to make the project unsound financially. Under the Senate amendment the all-American canal is now to be paid for wholly and distinctly by the lands which will be benefited, and there is no way that it can be made a burden upon the revenues which are secured from the sale of power or power possibilities at the dam.

The second important amendment, in conformity with the Sibert Board's report, provides for an increase in the estimated and authorized cost from $125,000,000 to $165,000,000. There is, then, in accordance with the Sibert report, a segregation of the cost for flood control estimated to be $25,000,000. While some have thought that it was reasonable that such an amount should be contributed by the Federal Government and to be charged off of the project, because flood control is now generally considered to be a Federal function, yet the proponents of the bill and the Senate amendment do not charge it off. They segregate it and provide that during the period of amortization the $25,000,000 shall be paid out of the excess profits.

The State of Arizona and the State of Nevada, under the House bill, are to be paid 18¾ per cent out of the surplus profits. That leaves 62½ per cent of these profits which are to be applied, under the Senate amendment, every year to the repayment of the flood cost of $25,000,000; but the bill expressly provides that if at the end of the period of amortization the entire amount of $25,000,000 has not been completely paid back the project will continue to pay on that $25,000,000 out of the profits, after the period of amortization, until the full amount has been entirely repaid.

The fourth amendment provides for a composure of the differences between the States within the basin, and requires a 7-State pact—an agreement of all seven States in the basin—if that can be secured within a period of six months. If not, then thereafter the work shall proceed upon a 6-State basis. The opinion expressed in the Senate by the representatives of the basin States is that the differences will be composed within the six months and that all of the States will come back into the compact on the 7-State basis.

The SPEAKER. The time of the gentleman from California has expired.

Mr. SWING. Mr. Speaker, I ask unanimous consent to proceed for five additional minutes.

The SPEAKER. The gentleman from California asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. O'CONNELL. Will the gentleman yield?

Mr. SWING. Yes.

Mr. O'CONNELL. Is this approval to come from the State legislatures?

Mr. SWING. Yes.

Mr. O'CONNELL. Suppose they do not meet in the interim?

Mr. SWING. They all do meet, beginning in January of this coming year.

Mr. RANKIN. Will the gentleman yield?

Mr. SWING. Yes.

Mr. RANKIN. The gentleman from Kansas [Mr. HOCH] asked a question a while ago about the regulation of the distribution of surplus power and the price at which this power is to be retailed to the people who purchase it. Can the gentleman give us some information about that?

Mr. SWING. I will come to that before I finish.

Mr. RANKIN. The gentleman's time has expired once, and I did not want his time to expire again before he had covered that point.

Mr. SWING. As a part of the composure between the States, there has been written into this law an ironclad, unconditional, irrevocable provision that California can under no means secure for use within the State water in excess of 4,400,000 acre-feet a year of the amount apportioned to the lower basin, and the State of California is required to ratify this provision by its State legislature before the bill becomes effective.

The sixth amendment of importance is an authorization for a tri-State agreement between Arizona, Nevada, and California which informed Members from these States believe will take place as soon as their legislatures meet.

The seventh amendment continues the embargo which was embodied in the Taylor resolution, adopted by the Congress at the last session, preventing the Federal Water Commission from issuing to private concerns, or to any other agency for that matter, licenses on the Colorado River until first there shall be an opportunity for this bill to take effect.

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. SWING. Yes.

Mr. TAYLOR of Colorado. Is it the gentleman's judgment, as the author of this bill, that the provision in section 6 of the Senate bill directing the Federal Power Commission not to issue or approve any permits or licenses upon or affecting this river or any of its tributaries, except the Gila River, is sufficiently strong and effective to and will prevent that commission doing so until this bill is ratified and becomes a law as provided in section 4, or might there be any contingency whereby the Federal Power Commission may grant these permits after the termination of the law which I had the honor to write and which expires on the 5th of March next?

Mr. SWING. The very purpose of putting this amendment in the bill was to extend the time of the Taylor resolution and to make effective this embargo until this law is in effect.

Mr. TAYLOR of Colorado. I know that was the express intention and purpose of that amendment to this bill, and we all hope it will have that effect. I can not believe the Power Commission would violate this express purpose and direction of Congress. However, I wish the framers of that amendment had used the language of my present pending House Joint Resolution 388, prohibiting the commission from issuing or approving any permits or licenses unless and until the Colorado River compact is unconditionally approved by the legislatures of all of those seven States and by Congress. The gentleman thinks this bill does that?

Mr. SWING. I do.

Mr. WHITE of Colorado. How can it prevent the Federal Power Commission from granting such permits when this bill declares it shall not become effective until ratified by the several States as therein provided?

Mr. SWING. This provision expressly provides that the Federal Power Commission shall not grant these licenses until the act becomes effective. It is beyond the realm of reason to suppose that the Federal Power Commission would want to proceed in the face of a declaration of both the House and the Senate that they are not to do it, and I am sure they will not undertake it, and I do not believe they could if they so desired.

Mr. WHITE of Colorado. How can that be in any sense a prohibition against the Power Commission acting under the general law unless this bill becomes effective and until it does become effective?

Mr. SWING. This bill becomes law when the President signs—its effectiveness is deferred only for certain purposes. If this language does not constitute an embargo, then I am unable to think of English language that would do it. It expressly declares that they shall not grant licenses.

The next important amendment makes a change in the alternatives which are given to the Government as to the course it may pursue.

The Senate has gone back to the provision which was in the House bill at the time the House bill was reported. It leaves to the Government the three alternatives of building the dam and then stopping and leasing the power privileges; or second, building the dam and the power plant and then leasing the power plant; or third, building the dam, building the power plant, operating the power plant, but selling the power at the switchboard.

In my humble opinion the physical situation at the canyon is such——

The SPEAKER. The time of the gentleman from California has again expired.

Mr. BANKHEAD. Mr. Speaker, in view of the fact that this is a very important matter and it is evident that the gentleman from California will not have opportunity to finish in 5 minutes, I ask unanimous consent that the gentleman may be permitted to proceed for 15 minutes or such part thereof as he may need. I think there will be a number of questions propounded to the gentleman.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the time of the gentleman from California may be extended 15 minutes. Is there objection?

There was no objection.

Mr. SWING. It is my belief from a long study of the physical situation at the dam site that it would be, engineeringly, unthinkable, contrary to all good business judgment, to do otherwise than for whoever builds the dam to build the power plant, and since we are authorizing the Government to build the dam, I am quite certain that the administration will find it will be a saving of millions of dollars to have the power plant built at the same time the dam is built, and it is my personal belief that this will be the procedure which will be followed.

Mr. RANKIN. Under the provisions of this bill there is nothing to protect the ultimate purchasers of this power from the exorbitant retail prices that may be charged by any power company that takes the contract for its distribution, is there?

Mr. SWING. I think there is, and I come to that point now.

Mr. RANKIN. The thing I am interested in is a regulation or restriction to prohibit profiteering in this power when it comes to selling it to the ultimate consumer, and I am unable to find anything in the bill that does protect the ultimate consumer.

Mr. SWING. The Federal water power act itself gives to the Federal Power Commission the power to regulate rates in the absence of any State regulation. I assume that where State regulation is in force we must assume it will be effective. If it is not in force under the laws of the States, the Federal Water Power Commission, under the Federal Water Power Commission act, has authority to regulate the rates and see that they are reasonable. But, in addition to that, there is this provision in the bill, inserted by the gentleman from New York [Mr. DAVENPORT]:

He—

Referring to the Secretary of the Interior—

shall also——

Mr. RAMSEYER. Will the gentleman tell us where he is reading?

Mr. SWING. Page 36, lines 9 to 13:

He—

The Secretary of the Interior—

shall also conform with other provisions of the Federal water power act and of the rules and regulations of the Federal Power Commission, which have been devised or which may be hereafter devised, for the protection of the investor and consumer.

So there is a direct mandate in the law that the Secretary of the Interior in the making of his contracts for the sale of power shall protect the ultimate consumer.

Mr. RANKIN. Will the gentleman yield?

Mr. SWING. Certainly.

Mr. RANKIN. Congress at the last session deemed it wise, prudent, and necessary to write into the Muscle Shoals bill a provision that would protect the ultimate consumer against profiteering and against exorbitant charges. There is nothing in this bill as amended by the Senate to so take care of it.

Mr. SWING. There is a direct instruction to the Secretary of the Interior that in his contracts he shall protect the consumer, and we are to presume that he will follow the mandate of Congress.

Mr. RANKIN. Why did you not have the same regulation in this bill, knowing it was the will of Congress specifically expressed on this proposition—why did you not have written into it the same protection to the ultimate consumer that was put in the Muscle Shoals bill, or the one in this bill as it passed the House?

Mr. SWING. The gentleman knows that in all legislation there must be matters of compromise between the two Houses, and that it is not always possible to have your own way in regard to a bill. There are a number of things in this bill not to my liking, but I realize that the bill would not have been enacted in the Senate if there had not been a spirit of compromise and conciliation.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. SWING. I yield.

Mr. LAGUARDIA. In the Muscle Shoals bill we had a provision that the municipalities should receive preference in obtaining power. In the event of the third option would the municipalities in California and other States have a preference?

Mr. SWING. The bill adopts the policy laid down in the Federal water power act of giving municipalities the preference, and I am quite sure that is safeguarded in this bill.

Mr. WAINWRIGHT. Will the gentleman yield?

Mr. SWING. I yield.

Mr. WAINWRIGHT. I note on page 23 the Government is given the right to construct, equip, and operate near the dam a plant for the generation of electrical energy. Does that mean that the Government may operate the plant?

Mr. SWING. Three options are left to the Government: It may build the dam and lease the water power; it may build the dam and the power plant and lease the power plant; or it may build the dam and the power plant and operate the power plant.

Mr. HOCH. Will the gentleman yield?

Mr. SWING. I yield to the gentleman from Kansas.

Mr. HOCH. I am interested in the protection of the ultimate consumer. I call attention to page 31, where it provides that general and uniform regulations shall be prescribed by the said Secretary for the awarding of contracts for the sale and delivery of electrical energy. What legal obligation would there be on anyone to observe any regulation as to rates charged the ultimate consumer?

Mr. SWING. The way I understand it is that it is to be put in the contract.

Mr. HOCH. Do I understand that in making contracts the Secretary of the Interior would attempt to prescribe the rates at which the power shall be sold?

Mr. SWING. If he could not advise a method for the reasonable control of rates, how is Congress to take it out of his hands and write the contract? I think that in legislation it is necessary that we should leave some discretion with the Executive and the working out of the details of the contracts to the Secretary. We declare a policy which we say we want him to put into execution, and that is to protect the ultimate consumer.

Mr. HOCH. The House attempted to do it in the provision on page 11:

Every contract for electrical energy shall provide that the holder of such contract shall guarantee that in any resale of such energy to the consumers thereof the rate shall not exceed what is fair, just, and reasonable, as determined by the Federal Power Commission.

As I read this bill there is nothing in it to protect the ultimate consumer. It all depends upon the contract that the Secretary of the Interior makes.

Mr. SWING. It is presumed that he will follow these regulations and the provisions of law which may hereafter be adopted.

Mr. HOCH. What provisions are there in the water power act that give the Water Power Commission any power to regulate rates?

Mr. SWING. It is in the act.

Mr. LAGUARDIA. This bill would give it anyhow.

Mr. SMITH. I call the attention of the gentleman from Kansas to page 36, line 9:

He shall also conform with other provisions of the Federal water power act and of the rules and regulations of the Federal Power Commission, which have been devised or which may be hereafter devised, for the protection of the investor and consumer.

Mr. HOCH. I am not questioning the provision which provides that the Secretary shall perform, but after he has made a contract, if the man who holds that contract then charges unjust and unreasonable rates, what leverage is there upon him?

Mr. SWING. Let me say now to my good friend from Kansas that if the bill were here for the first time his argument would carry great weight with me, but this House and its committees have labored for the past eight years to try to bring into the Colorado River Basin some sort of river control for the safety of human life and property. At the last session of Congress in the Senate there was a filibuster, the like of which we have not seen in many years, which stopped entirely the effort of the Federal Government to safeguard its own citizens and their property, and finally after the immense effort and great pressure this bill was gotten through the Senate and is here now. If it is to be sent back to the Senate for the purpose of changing some phraseology, which I think is sufficiently covered in this bill, then, of course, we are simply deferring the matter of the safety of 70,000 people and their property to a time which may take us beyond the present session of Congress.

Mr. HOCH. I am entirely in sympathy with that attitude toward the bill, but it seems to me that it is rather a fundamental question as to whether if we are to sell electrical energy on a vast scale we should not be sure that the ultimate consumer will have protection.

Mr. SWING. Who are the ultimate consumers regarding whom the gentleman from Kansas is so solicitous? They are the people who live in southern California. They are willing to take their chances on this bill in order to make safe the life and property of their fellow citizens living in the Imperial Valley in southern California.

Mr. O'CONNOR of New York. Mr. Speaker, will the gentleman yield?

Mr. SWING. Yes.

Mr. O'CONNOR of New York. The gentleman answered some questions based on the assumption that the Government is going to build this power plant and operate it?

Mr. SWING. It is my personal opinion that the Government will find it good policy to build the power plant.

Mr. O'CONNOR of New York. And permission to the Government to build the plant and operate it is granted in the bill?

Mr. SWING. Yes.

Mr. O'CONNOR of New York. In view of the definite, positive position taken by the Republican candidate for President—and I am sincere about this; I am not talking politics—and in view of the message of the President of the United States, does the gentleman, who knows more about the bill than anybody else in this House, I think, believe that this permission in the bill will ever be carried out in reality, and that the Government ever will build the plant and operate it?

Mr. SWING. The gentleman has asked me not about the bill, but regarding the workings of the mind of a Secretary of the Interior who has not yet been chosen. I am willing to express my conviction on my knowledge of the physical situation at the dam site and the economic development in that part of the country, but I can not answer regarding the mental attitude of a Secretary who has not yet been appointed.

Mr. O'CONNOR of New York. What are the gentleman's personal hopes—that the Government does operate it?

Mr. SWING. Yes.

Mr. MONTAGUE. Mr. Speaker, will the gentleman yield?

Mr. SWING. Yes.

Mr. MONTAGUE. I notice the Colorado River Board of Engineers makes an observation as to an agreement between Mexico and the United States as to the amount of water assignable to Mexico. Does this bill cover that observation?

Mr. SWING. The bill provides that nothing herein contained shall be construed as a recognition or a denial of any rights that Mexico may have.

Mr. MONTAGUE. Does not this board suggest that that should be done prior to the determination of that fact?

Mr. SWING. A treaty with Mexico is desirable at the earliest possible date, but it makes no difference regarding this project whether the treaty is made before the project is constructed or afterwards. If Mexico is to get a single drop of water, of which it can be assured, it can not get it out of the natural flow of the stream, which has already been appropriated by the people of the United States; it can only get it by the United States Government building a dam and operating it at this particular place where we are proposing to have it built. That is the one way that Mexico can get its water.

Mr. MONTAGUE. The gentleman's suggestion now relates to the economic aspect of it. I want to ask now about the political or governmental aspect. Would it not be advisable to have a treaty in advance of the confirmation of the project?

Mr. SWING. In my opinion, no. We have tried to negotiate a treaty with Mexico for years. In my opinion, until we have something on which we can trade, something whereby we can show to Mexico that it is to her advantage to negotiate, we will still be waiting years for a treaty.

If this bill is passed, it is my belief and the belief of prominent people in the State Department that it will result in an early treaty with Mexico. Regarding the economic feature, whether Mexico gets much water or little water under a treaty or without a treaty, all water must go through our power plants at the dam, so that it can not affect the economic features of the project.

Mr. Speaker, this has been what might be considered a life work. The eight years that have been spent upon it generally might be construed as the best years of a man's life. The bill passed the House last session. The bill has now been passed by the Senate by a large vote.

The only differences, it seems to me, are matters relatively of small importance compared with the beginning of this great project, and the taking of the water of this river that now runs to waste and is a menace to life and property while it runs to waste and putting it to a use to serve man's purposes, and all without the ultimate cost to the Government of a single dollar, because in the contracts which must be entered into before any appropriation shall be made provision must be made for repayment to the Government of every single dollar; in other words, this is a proposal for turning a natural menace to a national asset. [Applause.]

Mr. CLARKE. Mr. Speaker, I wish to put my opposition to the Boulder Dam in the RECORD.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

Mr. CLARKE. Mr. Speaker and beloved colleagues, I am one of those who believe that there are but two things, or possibly three, that should be undertaken by this short session of Congress.

First. Perform our long-overdue, constitutionally imposed duty of reapportionment of this House of Representatives, making everlastingly certain that there be no increase in the membership; if anything, a decrease.

Second. Passing the necessary appropriation bills to keep the wheels of Government moving.

Third. Of the other work we should undertake, agriculture—not Boulder Dam—is crying aloud for help and has been for some time. Let us lay the preparatory groundwork now for agricultural legislation at the extra session by completing hearings as a basis for preparing the necessary schedules in a tariff to protect agriculture as part of a larger policy that shall be permanent in its nature for American agriculture, and shall, in part, fit in with other legislation in this agricultural-relief program.

I shall not vote against the Boulder Dam bill with the twenty-five million, of the alleged one hundred and sixty-five million necessary to build it, to be charged to flood control, thus not to be returned ultimately to the Federal Treasury nor even because of these promises that the remainder of the expenditure will ultimately come back to Uncle Sam, for I have heard these promises for years regarding irrigation projects and other enterprises, and have yet to see the promises fulfilled for the cost alone, to say nothing of the interest on the taxpayers' money expended. As it saith in the Good Book, "Hope deferred maketh the heart sick."

Judging by past experience in Government construction that estimate of cost for Boulder Dam of $165,000,000 by the engineers will easily exceed $250,000,000.

Undoubtedly the legislation as it now cometh forth from the Senate is an improvement over the original bill, but I can not believe—

First. That the Boulder Dam project is a national project.

Second. Nor can I feel that we should impose more and more taxes on this generation for something that another generation shall enjoy, for the overburdened, tax-paying general public feel now the piling up of war taxes that will last long after even the youngest Member of this House of Representatives has entered upon the great adventure.

Third. I feel that the citizens importuning Uncle Sam should make it their undertaking, not a Federal undertaking, and if it be that flood control is an incident of the project, I will vote for $25,000,000 as a proper amount for the United States to contribute on that basis.

As the Boulder Dam project stands out in my mind now, it looks like another effort to stimulate a land boom with Uncle Sam backing the adventurers and speculators and assisting those who should develop their own water supply, who should promote their own power schemes, leaving it a private enterprise and leaving the Congress of the United States to concentrate all their talents on evolving a permanent enlarged policy for agriculture, spending any necessary sums as a national, not local, matter, for that is the outstanding problem in the United States to-day, Boulder Dam to the contrary notwithstanding.

Mr. DOUGLAS of Arizona. Mr. Speaker and Members of the House, I ask unanimous consent to proceed for 10 minutes instead of the ordinary 5 minutes.

The SPEAKER pro tempore. Is there objection? [After a pause.] The Chair hears none.

Mr. DOUGLAS of Arizona. Mr. Speaker, it is not my intention at this time to waste the time of the House in a prolonged and detailed discussion either of the bill or of the project which the bill authorizes. I do, however, want to take this opportunity to express my opposition to it and to make the statement that my opposition to the Senate amendment is no less than my opposition to the House bill which was considered last May. The amendment to the House bill as it comes from the Senate consists of two distinct propositions, just as the House bill which was considered last May contained two distinct propositions. The first relates to an allocation of water among the States and as between groups of States in the Colorado River drainage area. The second is that which pertains to the project or the authorization of the project. The amendment to the House bill contains no provisions which in any respect alter the fundamental features of the two propositions. With reference to the first, the amendment still provides that the contract, in which seven States are specifically named as parties, shall be binding and effective when approved by only six of the seven States. The amendment has not changed that proposition one iota. Nor does the amendment change anything respecting the project to be authorized, except to this extent, that in terms of dollars and cents it defines it as a larger project by $40,000,000 than was the project considered by the House.

The amendment increases the appropriation from $125,000,000 to $165,000,000. The amendment does do this, however: It outlines the project as a power project, because the amendment in fact attempts to take the all-American canal, which will cost thirty-eight and a half million dollars, and to place that canal

under the reclamation law, making it reimbursable to the Federal Government under the terms of that act and to prohibit any revenues derived from the sale of stored waters or from the sale of power from being applied to the amortization of the canal; it further appropriates $25,000,000 of the $165,000,000 for the purpose of providing for flood control and leaves the remainder—$101,500,000—to be expended on power. Inasmuch as a reasonable flood-control dam on the Colorado will answer this menace and likewise create storage sufficient for irrigation and domestic water demands, the only possible excuse that can be ascribed to proceeding with this high dam at Black Canyon and with the expenditure of $101,500,000 is that of constructing a power dam and a power project. In that connection conclusion No. 4 of the Sibert Commission—that is, the special board of engineers which was authorized to investigate the proposed project—confirms the statement that I have just made. It reads as follows:

It is obvious that the power which can be generated from Boulder Dam is a valuable resource. If the income from storage can be reasonably increased—

Prior to this the engineers stated that the Secretary of the Interior estimated that amount to be one and a half millions annually—

if the income from storage can be reasonably increased and the capital investment reduced by the cost of the all-American canal, together with a reduction of all or a part of the cost properly charged to flood protection, it would be possible to amortize the remaining cost from the income from power.

Mr. COLE of Iowa. Mr. Speaker will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. COLE of Iowa. We have a dam between the State which I have the honor in part to represent and the State of Illinois, known as the Keokuk Dam. It was built by a private corporation. I think that an investigation will show that this dam is nearly out of commission. They are manufacturing power in the city of St. Louis, which is one of the consumers of the power generated by this dam to-day, using internal combustion engines, using coal, and they generate power and sell it in St. Louis, as I am told, for less than it can be supplied from the Keokuk Dam. If this is true, if there is such combustion from these engines by which 80 or 90 per cent can be realized—if that is true and we are going to have development along that line, is it not possible that the United States, when it has invested millions of dollars in this dam and power plant, will be found to have purchased a lemon?

Mr. DOUGLAS of Arizona. I think it is quite possible. highly probable, and in fact practically certain, that the Federal Government will find that it has purchased not only a lemon but a box of lemons. [Laughter.]

This conclusion of the board of engineers does, then, define the project not as a flood-control project, because the board has recommended that the flood-control charge be made nonreimbursable, for flood control will provide storage for irrigation and domestic waters, and not as a storage project, but as a power project.

If the million and a half dollars referred to by the board—and that figure is merely a quoted figure from the Secretary of the Interior, not supported or denied by the board—if the million and a half dollars is obtainable from storage at Black Canyon, it is equally obtainable from a flood control and storage dam at any other site on the river, the cost of which would not exceed at a maximum, $30,000,000.

The SPEAKER. The time of the gentleman from Arizona has expired.

Mr. SMITH. Mr. Speaker, I yield to the gentleman five additional minutes.

The SPEAKER. The gentleman from Arizona is recognized for five minutes additional.

Mr. DOUGLAS of Arizona. If that amount—$1,500,000—is obtainable, it will amortize the cost of such a dam at the expiration of 50 years. What then can be the logic in authorizing a power project at Black Canyon involving innumerable hazards, financial hazards to the Government, when the essential item to amortization of the cost of that project, if obtainable there, will be obtainable from storage elsewhere, and will, without assuming hazards, without developing power, amortize the cost of the flood control and storage project?

As to the economic soundness of the project, the report of the Sibert Board of Engineers is very enlightening. It has reported that, because of inaccuracies and lack of data as to stream flow, it is impossible to make a close estimate of the power output. But on page 14 of its report it says that when irrigation has proceeded beyond the present acreage under cultivation the probable power output will fall to 50 or 60 per cent of the estimated amount. It further says on the same page that even with another reregulating reservoir, the probable power output may fall below that minimum estimate.

How, then, can there be any estimate made of the income from power which will be commensurate even with the estimate made by a proponent to the effect that 3,600,000,000 kilowatt-hours of energy will be sold? How can that estimate be supported when the board of engineers authorized to investigate the economic feasibility of the project very specifically reports that that power output will have to be decreased by possibly more than 50 per cent?

Mr. CLARKE. Mr. Speaker, will the gentleman yield there?

Mr. DOUGLAS of Arizona. Yes.

Mr. CLARKE. Is not another important item left out of the estimate of the engineers there, that for four months during the year the torrent rolls down into the canyon under conditions that make it impossible for human beings to work at the bottom of the canyon? That is left out of the Sibert report.

Mr. DOUGLAS of Arizona. It may be that the Sibert Board may have overlooked certain items on both sides, both for the project and against it. However, I am perfectly willing to stand on the recommendations and findings of this board, because it was a board composed of extraordinarily able and eminent engineers.

Mr. CLARKE. Was not a comparative study made of the plan of Girand, and was not that one of the elements of the study of the engineering possibilities of building a dam there?

Mr. DOUGLAS of Arizona. When General Greenway was considering the construction of the Diamond Creek project his estimate was, as I recall, that there would be a period of from three to four months each year during which it would be impossible for men to work at the bottom of the canyon because of the terrific heat.

The SPEAKER. The time of the gentleman from Arizona has again expired.

Mr. DOUGLAS of Arizona. Mr. Speaker, I ask unanimous consent to proceed for an additional five minutes.

The SPEAKER. Is there objection?

There was no objection.

Mr. BRIGGS. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. BRIGGS. Could the gentleman state, in a general way, in what respects the Senate amendment, which is all of the bill now, conforms to the report of the President's commission, recently appointed?

Mr. DOUGLAS of Arizona. There are three conditions enumerated in the final conclusion of the Sibert Board, the first of which is that if the revenue from stored water can be reasonably increased above $1,500,000 annually, and so forth. With reference to that condition, neither the board nor anyone can say that that revenue can be so increased. I will say to the gentleman that inasmuch as all of the costs of the Reclamation Service and of the Secretary of the Interior—and when I say costs I am referring to costs of the project—have been, according to the Sibert report, too low, and inasmuch as, in addition to that, all of the estimates of revenue from the sale of power, as estimated by the Reclamation Service and the Secretary of the Interior, have been too high, it is reasonable to assume that this figure of $1,500,000 a year from the sale of stored water is likewise too high. So the Senate bill embodies nothing which makes it mandatory to obtain in excess of $1,500,000 from the sale of stored water.

With respect to the second condition, which is that if "the capital investment be reduced by the cost of the all-American canal," and so forth; in a certain sense, the capital investment, in so far as it is related to the burden to be imposed upon the revenues from the sale of power and stored water is concerned—in so far as that is concerned, the capital investment has been reduced by the amount of the all-American canal, so that the second of the conditions has, I suppose, theoretically at least, been met.

With reference to the third condition, "together with a reduction for all or part of the cost properly chargeable to flood protection," that condition has not been met because, under the terms of the Senate amendment, flood control is still reimbursable if there is any money with which to pay it back.

Mr. BRIGGS. I would like to ask whether the gentleman is familiar with the base rate used by the Reclamation Service in estimating the revenues from the sale of power? They had some base rate, did they not?

Mr. DOUGLAS of Arizona. They had and they used the figure of 3 mills per kilowatt-hour at the switchboard which, translated into terms of cost of power in the load center, would have brought that power up to over 5 mills. That estimate was made four years ago and, as the Sibert Board of Engineers very properly points out, "when this project was first proposed the

cost of steam power in southern California was such as to leave a reasonable margin of profit above the probable cost of hydroelectric power generated at the proposed power plant. With the reduction in costs of power generated by steam, this margin has been greatly reduced."

Mr. SWING. If the gentleman will permit, I do not understand that language to mean that it has gone below; that there is still a margin, but it is a small one.

Mr. DOUGLAS of Arizona. Exactly. If the power is to be sold at the switchboard, so as to be equal to a competitive price for power at the load center, 300 miles away, then the power can not be sold for more than 1.9 mills. It follows that the price per kilowatt-hour, as estimated by the Reclamation Service, must be reduced by more than one-third and that the amount of power to be produced must in addition be reduced by over one-third and that revenues will be correspondingly decreased.

The SPEAKER. The time of the gentleman from Arizona has again expired.

Mr. BRIGGS. Mr. Speaker, I ask unanimous consent that the gentleman may proceed for two additional minutes.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. COLE of Iowa. May I ask the gentleman one question?

Mr. DOUGLAS of Arizona. I would like to say this to the Members of the House: It is not my desire to waste the time of Members of the House.

Mr. COLE of Iowa. The gentleman is not wasting the time of the Members of the House, but is giving useful information. My question is this: Much stress has been laid upon the protection of life—the sob element. Can the gentleman tell us whether life there could be safeguarded without this large expenditure?

Mr. DOUGLAS of Arizona. I would be delighted.

Mr. MONTAGUE. May I supplement the inquiry of the gentleman and ascertain whether I understand it. The gentleman means can you prevent floods without this large expenditure?

Mr. COLE of Iowa. That is correct.

Mr. MONTAGUE. I am very anxious to hear the gentleman on that.

Mr. DOUGLAS of Arizona. Whatever flood menace there may be—and there is a flood menace—is not commensurate with the amount of money to be appropriated under the terms of the amendment. The Imperial Valley and the other valleys that may be menaced by the flood waters of the Colorado can be more than adequately protected by the expenditure of a maximum of $30,000,000, and that exceeds any figure estimated by the Reclamation Service or any other Federal bureau or engineer. The expenditure of that amount of money on the construction of a dam on the Colorado would not only protect those valleys, as they may need to be protected, from the menace of floods but it would also provide more than ample water for irrigation and future irrigation purposes, as well as for domestic water, if in fact—and I deny this to be true—there is any demand for domestic water.

The SPEAKER. The time of the gentleman from Arizona has again expired.

Mr. TUCKER. Mr. Speaker, I ask unanimous consent that the gentleman may have 10 minutes more.

Mr. DICKINSON of Iowa. Mr. Speaker, we have been very patient, although we understood we would get on with the appropriation bill in half an hour. It was not our understanding that we were to have indefinite extensions of time. I shall not object to another small extension of time, but I do not want to see it made perpetual here.

Mr. DOUGLAS of Arizona. I will say to the gentleman it is not my desire to take up the time of the House.

Mr. TUCKER. Mr. Speaker, I ask unanimous consent that the gentleman be allowed 10 minutes more.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. JONES. Will the gentleman yield?

Mr. DOUGLAS of Arizona. I yield.

Mr. JONES. I would like to know if there has been an estimate made of the maximum amount of new land that could be brought under irrigation if this project were completed; that is, land in the United States in the basin of this river.

Mr. DOUGLAS of Arizona. Below the dam, as I recall the figure, by gravity 270,000 acres in the State of Arizona and by gravity in California 500,000, I believe. Is it not something like that?

Mr. SWING. Between 400,000 and 500,000 acres; but that is all ultimate and is some distance in the future—25 or 30 years.

Mr. JONES. I would like to have the gentleman's answer.

Mr. DOUGLAS of Arizona. As I recall the figure, it is some time since I have seen it, the total acreage that can be irrigated by gravity in Arizona and California is in the vicinity of a minimum of 770,000 acres, excluding the amount now under cultivation. There is a large one in Arizona which eventually can be irrigated by pumping.

Mr. JONES. In other words, that is the additional amount?

Mr. DOUGLAS of Arizona. Yes.

Mr. JONES. And that is the amount below the dam.

Mr. DOUGLAS of Arizona. Below the dam, in the United States.

Mr. JONES. Is there any other land below the dam that can be brought under irrigation outside of these two States?

Mr. DOUGLAS of Arizona. There is a tremendous amount of land that can be brought under cultivation in Mexico and in this connection I would like to read to you the conclusion of the Sibert Board of Engineers, to be found on page 15:

> While much land has already been brought under irrigation in the Colorado River delta in Mexico, it is evident that such development has been retarded by lack of water available from the river during low-water periods. The storage of flood water in the Black Canyon Reservoir and its release during low-water seasons will make more water available in Mexico and will invite immediate expansion in irrigated acreage in that country—

And so forth.

Mr. JONES. Is there any evidence as to the amount of such additional land?

Mr. DOUGLAS of Arizona. I can say to the gentleman that there are about 1,300,000 acres of very easily cultivated and irrigated land on the delta of the Colorado in the Republic of Mexico.

Mr. JONES. Is that land rich and productive?

Mr. DOUGLAS of Arizona. Very rich and very productive.

Mr. JONES. Is there any additional land above the dam that might be used for irrigation purposes?

Mr. DOUGLAS of Arizona. Yes; quite an acreage in Colorado and in all of the upper-basin States, but this could not be irrigated from water stored at Black Canyon.

Mr. JONES. Does not the gentleman think that bringing all this new land under irrigation might increase the farm problem?

Mr. DOUGLAS of Arizona. I agree with the gentleman perfectly.

Mr. MONTAGUE. Will the gentleman permit me to add this line from the report which the gentleman has just read?

Mr. DOUGLAS of Arizona. Yes.

Mr. MONTAGUE (reading):

> With the limited water supply available from the Colorado River, every acre permanently irrigated in Mexico will mean an acre in the United States can not be irrigated.

Does the gentleman agree with that statement?

Mr. DOUGLAS of Arizona. Yes; and I made that statement on the floor of the House last May.

Mr. MONTAGUE. That is my recollection of the gentleman's statement at that time. One other word, if the gentleman will permit: This report of the Sibert Board states that an agreement with Mexico should be made before the completion of this project. Is that the opinion of the gentleman?

Mr. DOUGLAS of Arizona. It is; and I offered an amendment to that effect last May, which the House refused to accept.

Mr. MONTAGUE. That recommendation or comment is made wholly upon the economic aspects of this case and not upon the political or governmental relations between Mexico and the United States.

Mr. DOUGLAS of Arizona. That is right; yes.

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. DOUGLAS of Arizona. Yes.

Mr. WILLIAM E. HULL. I would like to ask the gentleman if it would not take additional legislation to make any of this additional land that the gentleman is talking about available for irrigation purposes. In other words, Congress would have to act again.

Mr. DOUGLAS of Arizona. It would require additional legislation to irrigate in the vicinity of 200,000 acres of the 700,000 acres in California and it would take additional legislation to irrigate the 200,000 acres in Arizona.

Mr. WILLIAM E. HULL. In other words, we are not in any great danger of bringing in additional land unless Congress so provides?

Mr. DOUGLAS of Arizona. Under this act there is an authorization for a canal to the Coachella Valley, which, according to the statement made by the gentleman from California yesterday, but not on the floor of the House, would make it

possible, under the terms of this legislation, to irrigate approximately 370,000 acres, as I recall the gentleman's figures, including 200,000 acres on the East Mesa.

Mr. JONES. And may I suggest that if we already had the dam and all the water necessary that would be a strong argument in favor of the additional authorization.

Mr. DOUGLAS of Arizona. Yes. This legislation denies the rights of States, it provides for the construction of a power project of questionable economic soundness, it appropriates more than is necessary to meet the demands of flood control and storage; and it will forever stunt the growth of the Southwest in that it will give to Mexico water which will at some time be of great value to the United States. I am therefore as bitterly opposed to the project authorized in the Senate amendment as I was to the project authorized by the House bill (H. R. 5773). I shall, I hope, as long as I am a Member of the House of Representatives, however long that may be, never cast my vote to inject the Federal Government, directly or indirectly, into the power business. [Applause.]

We have had Muscle Shoals and we have been talking about its disposition for a decade. If Boulder Dam is constructed it is my prophecy that with each succeeding Congress for the next half century we will still be disposing of the dam and the plant.

Mr. LEATHERWOOD. Mr. Speaker, for more than seven years I have opposed the so-called Boulder Dam bill in its various forms. What little merit it had when it left the House last spring has been taken from it. I have always been opposed to it, and I am unalterably opposed to it at this time in its present form.

In view of established facts and the Sibert report, the title of this bill should be amended so as to read: "A bill to guarantee to the landowners in Mexico not less than 4,000,000 acre-feet of water in regulated flow from the Colorado River, and to establish the theory that the Government owns and controls the unappropriated waters of the streams in the arid-land States, and that hereafter the Federal Government will allocate the waters of said streams, by legislative fiction if necessary, and deny all ownership by the States in the unappropriated waters of streams within their borders."

The vice in this bill is inherent in the project which it authorizes. As I have repeatedly pointed out to the House, this is not a flood-control or an irrigation project but a great power project. It was conceived as a power project, planned as a power project, and if built it will be a power project first, last, and always, with flood-control and irrigation storage delayed, impaired, and rendered partially ineffective because they are combined with a power project.

The last vestige of excuse for the project has been swept away by the recent engineer's report. Prior to that time this project was justified by proponents on the ground that power was the "burden bearer"; that is, that it was necessary to have power as a dominant part of the project in order to secure revenue with which to pay for the flood control and irrigation—in other words, to make it "financially solvent and self-supporting," as stated in the bill. Now it appears, as those of us who have opposed the bill have long contended, that power can repay none of the cost of flood control or of irrigation; that, indeed, power can not pay that part of the cost which it adds to the project. Instead of being the burden bearer of the entire project, power now stands out as unable to bear its own burden. Hence the investment in a power enterprise which is included in this project and which amounts to about $100,000,000 of the $165,000,000 authorized expenditure is made for no purpose except the production of power, and that the uneconomic and unjustifiable production of power.

I simply wish to say, therefore, that if the Congress is going to authorize this project it makes but little difference in what form or by what words we bind the Federal Government to proceed with it.

Much has been said about who will build the power plants and operate them. While that has some importance, it has but little bearing upon the question as to whether this bill means that the Government is going into the power business. It is going into the power business and deeply and irretrievably into the power business when it builds this dam, because the dam can be justified on no other ground than that of the production of power.

I am not therefore concerned about the Senate amendments or the House amendments. This entire project is unsound and indefensible. When this project is authorized, if it is, the Government has on its hands a glorified Muscle Shoals—a source of administrative worry, of congressional debate, of interstate conflict, of international conflict, for the next 20 years. In the meantime the Imperial Valley will wait for flood control, and we shall find that before Boulder Dam is even started the Congress will be asked to make provision for real and effective flood control for that valley.

I am more than ever convinced that the Government of the United States has never been more imposed upon than by this legislation. It is legislation to no purpose. It is worse than futile because it means not only the wasting of $200,000,000 but the marring of the development of the Colorado River forever.

I desire to let this statement stand as a prediction and as my final blessing upon one of the most unwise measures I ever hope to see. [Applause.]

Mr. COLE of Iowa. Will the gentleman yield?

Mr. LEATHERWOOD. I yield to the gentleman.

Mr. COLE of Iowa. The gentleman referred to Mexico getting a certain amount of irrigation through this dam. Are we supposed to be building the dam for the benefit of Mexico?

Mr. LEATHERWOOD. No; but that is what this bill will accomplish for Mexico at the expense of the taxpayers of the United States. If we accept the engineering facts now before us and the Government builds a power plant capable of developing 1,000,000 horsepower of electric energy it will require more than 10,000,000 acre-feet of water per year to run the plant and of course it will be a regulated flow. Not more than half of this water can be used in the United States for all of the uses that have been suggested so far. Therefore, the other half, of course, by force of gravity will go down to Mexico in regulated flow so that they can use it upon their land for agricultural purposes.

Mr. CRAIL. Mr. Speaker, this is not the time to enter into a general discussion of the merits of the Boulder Dam project bill, and I am taking the floor to be heard on merely one matter which was injected into the discussion by my friend from Iowa [Mr. COLE]. While the gentleman from Arizona was discussing the bill, my friend the gentleman from Iowa asked him to yield for a question in the making of which he stated that the dam on the Mississippi River at Keokuk was losing money and was about to go under, or words to that effect, because of the fact that hydroelectric energy could be generated by turbine steam engines and delivered at St. Louis cheaper than it could be generated at the Keokuk Dam, and that if this were true on the Mississippi it was probably true on the Colorado River. To this the gentleman from Arizona replied, in effect, that if this bill were passed the Government would have spent hundreds of millions of dollars and would have only a white elephant on its hands and that the Government would never get its money back. The gentleman from Arizona also stated, in effect, that if this bill were passed the Government would have another Muscle Shoals Dam on its hands, and that every Congress for the next 50 years would be discussing what disposition it should make of the Boulder Dam, as it has been discussing Muscle Shoals Dam during the last 8 years.

The gentleman from Utah [Mr. LEATHERWOOD] called attention to the similarity between Boulder Dam and Muscle Shoals Dam and predicted that future generations would wonder why the Government of the United States had spent hundreds of millions of dollars in this fantastic enterprise.

I assume that the gentleman from Iowa [Mr. COLE] asked his question in good faith. I know that his statement and his argument thereon greatly impressed many Members of the House. If his statements are correct and his conclusions are accurate, it would be very poor business for the Government of the United States to spend such an enormous sum of money in the construction of Boulder Dam. For this reason I do not believe that the statements referred to and the conclusions drawn therefrom should go unchallenged.

As I stated on this floor a year ago when the bill passed the House of Representatives, not one dollar will be spent under this bill for the construction of a dam, or power plants, until and unless the Secretary of the Interior shall make satisfactory arrangements by written contract, adequate in his judgment, to insure the return payment to the United States of all of the costs of the development, the costs of the operations together with interest on all sums so expended.

This can not be too forcefully presented. The Government is not going into any visionary scheme; it is not going to be extravagant and injudicious in this matter. Not a shovel full of dirt is to be turned, nor a stick of dynamite discharged, nor one dollar expended in the enterprise until the Secretary of the Interior is satisfied that responsible parties have contracted in writing to reimburse the Government of the United States for every dollar that it expends in the project, with interest. This repayment and reimbursement must be within 50 years from the date of the completion of the work. Let me read paragraph B, section 4, of the bill, which is as follows:

Before any money is appropriated for the construction of said dam or power plant, or any construction work done or contracted for, the

Secretary of the Interior shall make provision for revenues by contract, in accordance with the provisions of this act, adequate in his judgment to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of said works, of all amounts advanced to the fund under subdivision (b) of section 2 for such works, together with interest thereon made reimbursable under this act.

Before any money is appropriated for the construction of said main canal and appurtenant structures to connect the Laguna Dam with the Imperial and Coachella Valleys in California, or any construction work is done upon said canal or contracted for, the Secretary of the Interior shall make provision for revenues, by contract or otherwise, adequate in his judgment to insure payment of all expenses of construction, operation, and maintenance of said main canal and appurtenant structures in the manner provided in the reclamation law.

You who want the facts and are willing to consider this project on its merits may have a full assurance that this enterprise is not going to cost the people of the United States one dollar except the small amount which would be required for flood control. The repayment to the Government of the money which may be advanced by it in the carrying into effect of the provisions of this bill, will be secured by the strongest guaranties of municipalities and corporations worth billions of dollars before the work is started. The same foresight, the same care, the same good business judgment will be used by the Government in the building of Boulder Dam as would be used by any other human agency in carrying out the same project.

This bill means much to the people of the Southwest. It means much to all of the seven Colorado River Basin States. It means much to all of the people of the United States for this is a national project. The development of our national waterways should be one of the chief concerns of this and future Congresses. The development of the Colorado River, its control and use by man as an agency for human good, is a worthy step in the direction of the development in a national way of our great waterways.

The passage of this bill and its approval by the President will bring joy and safety to the thousands in the Imperial Valley of my own State and it will make secure for the people of Los Angeles and the coastal cities of southern California an abundant and unfailing supply of water for domestic use.

Mr. SMITH. Mr. Speaker, I move the previous question.

Mr. RANKIN. Mr. Speaker——

The SPEAKER. The gentleman from Idaho moves the previous question.

Mr. RANKIN. But I was on my feet asking for recognition.

The SPEAKER. The gentleman from Idaho is entitled to move the previous question.

Mr. SMITH. We assured the chairman of the Committee on Agriculture, whose bill is entitled to preference, that we would use but half an hour, and we have now run an hour and a half, and it seems to me that the matter has been very well discussed.

Mr. RANKIN. This Boulder Dam bill is just as important to the people of the United States as the appropriation bill.

Mr. SMITH. Mr. Speaker, I insist on my motion.

Mr. RANKIN. I trust, then, that the motion will be voted down in order that the House may have an opportunity to vote on my amendment.

The SPEAKER. The question is on ordering the previous question.

The question was taken; and on a division (demanded by Mr. RANKIN) there were 78 ayes and 49 noes.

So the previous question was ordered.

The SPEAKER. The question now is on the motion of the gentleman from Idaho to agree to the Senate amendment.

The question was taken; and on a division (demanded by Mr. RANKIN) there were 71 ayes and 77 noes.

Mr. SWING. Mr. Speaker, I object to the vote on the ground that it discloses that no quorum is present.

The SPEAKER. The Chair will count.

Mr. SWING. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 167, nays 122, present 1, not voting 138, as follows:

[Roll No. 4]

The Clerk announced the following pairs:

On the vote:

Mr. Free (for) with Mrs. Rogers (against).

Mr. Curry (for) with Mr. Igoe (against).

Mr. King (for) with Mr. Connolly of Pennsylvania (against).

Mr. Spearing (for) with Mr. Harrison (against).

Until further notice:
Mr. Britten with Mr. Corning
Mr. Johnson of Washington with Mr. Cohen.
Mr. Michaelson with Mr. McClintic.
Mr. Dowell with Mr. Kemp.
Mr. Fenn with Mr. Garrett of Tennessee.
Mr. Buckbee with Mr. Hudspeth.
Mr. Welsh of Pennsylvania with Mr. Deal.
Mr. Vestal with Mr. Mead.
Mr. McFadden with Mrs. Norton.
Mr. Fort with Mr. Peery.
Mr. Porter with Mr. Wright.
Mr. Hall of Indiana with Mr. Bulwinkle.
Mr. Begg with Mr. Celler.
Mr. Griest with Mr. Drewry.
Mr. Bohn with Mr. Whittington.
Mr. Graham with Mr. Mooney.
Mr. Brown with Mr. Somers of New York.
Mr. Kurtz with Mr. Underwood.
Mr. Palmer with Mr. Mansfield.
Mr. Golder with Mr. Vinson of Georgia.
Mr. Wurzbach with Mr. Doyle.
Mr. Strong of Pennsylvania with Mr. Wilson of Mississippi.
Mr. Morgan with Mr. Pou.
Mrs. Langley with Mr. McSweeney.
Mr. Burtness with Mr. Weller.
Mr. Dempsey with Mr. Rayburn.
Mr. Goodwin with Mr. Stedman.
Mr. Beck of Pennsylvania with Mr. DeRouen.
Mr. Haugen with Mr. Whitehead.
Mr. Butler with Mr. Tillman.
Mr. Knutson with Mr. Reed of Arkansas.
Mr. Clancy with Mr. Gilbert.
Mr. Hughes with Mr. Sabath.
Mr. Kearns with Mr. Jacobstein.
Mr. Lehlbach with Mr. Oliver of New York.
Mr. White of Maine with Mr. Linthicum.
Mr. Wolfenden with Mr. Auf der Heide.
Mr. Moore of Ohio with Mr. Boylan.
Mr. Eaton with Mr. Johnson of Oklahoma.
Mr. Denison with Mr. Lyon.
Mr. Pratt with Mr. McSwain.
Mr. Robsion of Kentucky with Mr. Prall.
Mr. Kopp with Mr. Fulbright.
Mr. Jenkins with Mr. Edwards.
Mr. Beedy with Mr. Quayle.
Mr. Clague with Mr. Hammer.
Mr. Davenport with Mr. Sears of Florida.
Mr. Cooper of Ohio with Mr. Romjue.
Mr. Roy G. Fitzgerald with Mr. Drane.
Mr. Rowbottom with Mr. Rutherford.
Mr. Wolverton with Mr. Kunz.
Mr. Estep with Mr. Carley.
Mr. W. T. Fitzgerald with Mr. Dickstein.
Mr. Woodruff with Mr. Casey.
Mr. Zihlman with Mr. Lindsay.
Mr. Sanders of New York with Mr. Crosser.
Mr. Peavey with Mr. Kent.
Mr. Sears of Nebraska with Mr. Combs.
Mr. Nelson of Wisconsin with Mr. Kvale.
Mr. Hersey with Mr. Fitzpatrick.
Mr. Schneider with Mr. Palmisano.
Mr. Tatgenhorst with Mr. Moore of New Jersey.

So the motion to concur with the Senate amendment was agreed to.

Mr. BLACK of New York. Mr. Speaker, the lady from New Jersey [Mrs. NORTON] is unable to be present to-day. Had she been present I am authorized to state that she would have voted "yea."

Mr. HARRISON. Mr. Speaker, I desire to withdraw my vote of "no." I am paired with the gentleman from Louisiana [Mr. SPEARING]. If he had been present, he would have voted "yea."

Mr. BUTLER. Mr. Speaker, I desire to vote "yea."

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. BUTLER. I was not.

The SPEAKER. The gentleman does not qualify.

The result of the vote was announced as above recorded.

On motion of Mr. SMITH, a motion to reconsider the vote by which the Senate amendment was agreed to was laid on the table.

THE LATE MARTIN B. MADDEN

Mr. BRITTEN. Mr. Speaker, I ask unanimous consent that Sunday, February 10, 1929, be set aside for memorial services on the life, character, and good deeds of the late Hon. MARTIN B. MADDEN, who was taken away from us on April 27 last.

The SPEAKER. The gentleman from Illinois asks unanimous consent that Sunday, February 10, 1929, be set aside for memorial services for the late MARTIN B. MADDEN. Is there objection?

There was no objection.

ADDRESS OF HON. LINDSAY C. WARREN

Mr. McDUFFIE. Mr. Speaker, I ask unanimous consent to address the House for half a minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. McDUFFIE. Mr. Speaker and gentlemen of the House, yesterday at Kill Devil Hills, in North Carolina, was celebrated the achievement of the Wright brothers, who were the first to teach man that he could master the air. The ceremonies were of great historic interest to all the world. That celebration was the most interesting one it was ever my privilege to witness. The corner stone of the memorial commemorating the first flight of man was laid by the Secretary of War. Amongst the notable speeches made was an address delivered by our colleague from North Carolina, Mr. WARREN, in whose district the ceremonies were held, and who was so largely instrumental in marking this historic spot. His address was most interesting and eloquent. It should be a part of the permanent records of this House, and I therefore ask unanimous consent to extend my remarks in the RECORD by printing therein this address delivered by the distinguished gentleman from North Carolina.

The SPEAKER. The gentleman from Alabama asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. McDUFFIE. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I insert an address of Mr. WARREN, of North Carolina, on the occasion of the laying of the corner stone of the memorial commemorating the first flight of man at Kill Devil Hills, N. C.

The address is as follows:

THE WRIGHT BROTHERS

Mr. Chairman, Mr. Orville Wright, delegates attending the International Civil Aeronautics Conference, and ladies and gentlemen; standing on soil already sacred in the life of the Nation we come here to-day to see the world pay universal acclaim to the inventive genius of man. Over 300 years ago, just 3 miles distant, the first of the English set their feet, built their dwellings, sowed their crops, and performed their religious devotions in the Western World. Upon this soil landed the first English women who crossed the ocean to find homes upon the newly discovered continent, and here was born and christened the first English child who saw the light of day in the New World. Here the customs, laws, and language of England were first transplanted and struck their roots in the soil.

It was this dauntless spirit of adventure and achievement that prompted Sir Walter Raleigh to extend the domain of civilization—this indefinable spirit which has inspired man to greater achievement through the ages. The story of the pioneer has largely constituted the history of the world.

Over 300 years later this same pioneering spirit again selected North Carolina for its greatest triumph, and the world's most important conquest began on this spot. For centuries the mind of man had been fascinated and diverted to overcome what was supposed to be contrary to every law of nature, and for ages men experimented and planned, to be accompanied only by failure.

And then came the Wrights. It was by no mere accident that Kitty Hawk was selected as the scene for an experiment that later astounded the world. Nor was it their desire for privacy that made Wilbur and Orville Wright come to this spot on the narrow banks of North Carolina, which hold back the Atlantic from its inland sounds. They did not think that the public would manifest enough interest to disturb them. Kitty Hawk was chosen because the United States Weather Bureau had advised them that it was in this locality that the winds were the strongest and steadiest, and, therefore, more propitious for their plans. They came to what was then a little isolated village of fishermen, whose life had been a continuous combat with an unrelenting sea. They found here what has been said to be the purest Anglo-Saxon blood on the American Continent—God fearing, noble men and women, who, together with the crew of the United States Coast Guard Station at Kill Devil Hills, composed the population of this outskirt on the eastern frontier of America.

The scant publicity appearing in the press of the Nation termed it a fool's errand. They suffered the same aspersions and derisions as have all others who blazed trails. They became forgotten men—cranks, seeking to obtain the impossible. For three years they conducted their glider experiments, and after a thousand such flights they had actually succeeded in staying in the air for a minute in a glider. Their courage and faith was superb. They knew that the history of their race had been full of failure, but that each failure had marked a surer and firmer advance of civilization. The world might scoff, but the Wrights knew, as well as men can know anything in the future, that the machine they had so patiently constructed would fly, for the formula had been verified. They achieved their results neither by luck or the process of elimination, but by scientific inquiry and study. And so, by a toss of a coin, it fell to the lot of our distinguished guest to usher in a new era that has revolutionized transportation and has redounded to the happiness and progress of the human race.

Twenty-five years ago from this morning, with a 27-mile-an-hour wind against it, his machine rose from the ground and went a distance of 120 feet in a flight lasting 12 seconds. And here it was that for the first time in history a machine carrying a man raised itself by its own power into the air in full flight, went ahead without reduc-

tion of speed, and landed at a point as high as that from which it started. Here this epoch in the history of the world had its genesis. Here stands the cradle of aviation.

As those who first came to these shores lived in the great age of discovery, so to-day we live in the age of invention. Distance has been annihilated by the marvelous radio. The world has been united by the locomotive and automobile. The perfection of the printing press has spread knowledge to every class. The humblest man to-day has available for his comfort and his education facilities that the mightiest king of a former century never dreamed possible. When the gas engine was hurled into the air by Wilbur and Orville Wright the last citadel of man's earthly kingdom was brought into subjection, and it is the sober judgment of students of human history that nothing can compare in creative worth to this accomplishment.

When we stop and visualize that just a quarter of a century ago one of the greatest newspapers in America wired its correspondent to "stop sending fake stuff, for nobody believes these wildcat yarns about men flying in an airplane," the supremacy of man in the air is almost unbelievable. With this humble origin as a setting we have seen the Atlantic spanned, the globe circled, and the North Pole flown over. We have seen the airplane become an indispensable necessity in the commercial and business life of the world, and a vital factor in national defense. What would appear to be a stretch of the wildest imagination could only conjure up the immediate future.

To the honored guest of this splendid gathering I would say that it has not been the privilege of many who have made history to be the recipient of such an ovation as this. There has rarely been accorded to a man in the flesh the plaudits of his fellow citizens such as within a week have been given to you and your lamented brother. A grateful and appreciative Nation, fortified by her friends and neighbors of the universe, come to pay you a tribute of admiration and regard that has only few parallels in history. With the modesty that has ever characterized you, you have seen those who would detract from your achievement succumb in the light of analysis. You stand not only before the world as a discoverer but as one whose brain perfected to its present state what was first conceived in it.

This memorial authorized by the Congress of the United States started here to-day is merely to place in imperishable granite the recording of another milestone of man's work. Its plans have been sought from the most distinguished architects of the Nation. It is contemplated that there shall be a lofty tower containing a light to guide those who travel by air and sea. The second unit calls for a new Coast Guard station on yonder beach, to which will be attached a tablet in bronze to depict what transpired here. How fitting it is that the Coast Guard, that noble service for humanity, which contributed its assistance in this feat, should be recognized in its perpetuation. Next year a bridge will span this sound to make it in easy access to the Nation, and I believe that I can safely state that North Carolina, recognizing its obligation, will construct a paved road to this historic spot.

We are dedicating here to-day a national shrine. There will be gathered here the intimate associations that made it possible. Here the air was conquered and here belongs the implements of conquest. To this spot in centuries to come will journey those who would pay reverent tribute. To-day the homage of the world is given here. To-morrow it will become the pilgrimage and the Mecca of those whose happiness have been enhanced.

This memorial standing here facing a mighty ocean will proclaim the sentiments of a grateful Republic.

AGRICULTURAL APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15386) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Agricultural appropriation bill, with Mr. TREADWAY in the chair.

The Clerk reported the title of the bill.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent to return to page 20 in order to make a correction.

The CHAIRMAN. Is there objection?

There was no objection?

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that the amendment adopted by the House on that page be inserted on line 13, following the word "indemnities," striking out the colon and inserting a comma, instead of on line 12 following the figures "$5,171,000."

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to make the correction indicated. Is there objection?

There was no objection.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that I may be permitted to return to page 24 for the purpose of offering an amendment, which I send to the desk.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to return to page 24 for the purpose of offering an amendment. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 24, after line 25, insert "In all, salaries and expenses, $9,527,790."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. DICKINSON of Iowa. Mr. Chairman, on page 27, I ask unanimous consent to make a correction in line 8, by striking out the letter "D" and inserting in place of it the figure "4," so that it will read "secs. 401–404."

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to make the correction referred to on page 27. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Horticultural crops and diseases: For investigation and control of diseases, for improvement of methods of culture, propagation, breeding, selection, and related activities concerned with the production of fruits, nuts, vegetables, ornamentals, and related plants, for investigation of methods of harvesting, packing, shipping, storing, and utilizing these products, and for studies of the physiological and related changes of such products during processes of marketing and while in commercial storage, $1,077,231.

Mr. HILL of Washington. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. HILL of Washington: On page 34, line 21, strike out "$1,277,281" and insert "$1,292,231."

Mr. HILL of Washington. Mr. Chairman, my amendment proposes to add $15,000 to the amount in line 21, page 34. In the items which go to make up this total is an item of $15,000 for the investigation of a fruit disease known as perennial canker. In the current fiscal year there is an item of $15,000 for this investigation. In the present bill a similar amount is carried for the same purpose. I am seeking to increase that amount $15,000 by making it $30,000. The perennial canker is a fungus disease that attacks apple trees. The spores from the fungus on the apple tree is communicated to the fruit of the tree and causes what is called fruit rot. The apples go into storage in an apparently perfect condition, and then during the period of storage, depending upon the stage of maturity of the apple, there develops a dry rot or fruit rot on the apples in storage caused by the spores from this fungus on the apples, developing under the condition of humidity and temperature in storage. This is coming to be a very destructive disease to the apples in storage. It is causing great economic alarm in the apple-growing sections of the Northwest. The Hood River section has practically reached a point where they can no longer secure credit upon orchard property because of the ravages of this disease. In the Wenachee district and other districts in the State of Washington the perennial canker is distributed throughout the districts of heavier precipitation, and, more or less, throughout the entire apple-growing sections of the State.

This disease has been discovered in the various orchard-growing sections of that State, and it is believed it is also prevalent in the State of Idaho. This disease has reached such a point that apple buyers are now refusing to buy apples for future delivery in storage. The banks of the country and the credit associations are refusing to extend credit and the situation is critical. All I am asking is that this appropriation be increased from $15,000 to $30,000 that this emergency may be met in a more effective way and that a remedy be found at an earlier stage than can possibly be found under the meager appropriation of $15,000 for that purpose. If this disease continues unabated it means the destruction of over $300,000,000 of orchard property in my State. No disinfectant has yet been discovered to combat it.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HILL of Washington. I ask for two additional minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HILL of Washington. We are now threatened with quarantine of our apples and investigators have already visited that section with a view of investigating the situation to determine whether or not our apples shall be moved to the markets of the country and the world. It is an emergency, it is an economic crisis, and I ask that this appropriation be increased

in the modest sum of $15,000, making a total of $30,000, so that we may have sufficient money to properly investigate and combat this insidious disease.

Mr. LARSEN. Will the gentleman yield?

Mr. HILL of Washington. I will.

Mr. LARSEN. I would like to know whether that condition of which the gentleman from Washington complains exists only in that State or in other States?

Mr. HILL of Washington. It exists only in the Northwest at the present time, so far as I am advised.

Mr. LARSEN. And appears in other States?

Mr. HILL of Washington. Oregon, Washington, and probably Idaho, but the disease might well be expected to creep into all that section.

Mr. Chairman, I urgently ask that this meager appropriation of $15,000 for this purpose, to save this great industry of the Northwest, be increased to $30,000.

Mr. DICKINSON of Iowa. Mr. Chairman, I rise in opposition to the amendment. Last year we had before our committee a group of men wanting relief from this same disease. At the urgent request of the apple men of that area we put in the bill an item of $15,000, and the department established a laboratory in the Hood Valley, and they are now working on the disease. The gentleman from Washington now comes in and wants to double that appropriation, although they have been making splendid progress, and they have been working on this disease in this one valley, and are prepared to proceed next year.

The area to which the gentleman refers is the Wenachee Valley, about 150 miles from the Hood River Valley. It does not seem to be justifiable to ask for $15,000 each time they plant apples in another valley. The investigations carried on in one valley should be helpful in another valley, and there is no reason why those experts can not cross those mountains and make a survey of the conditions existing in the Wenachee Valley and transfer their investigations further over to the laboratory that we have established. The gentleman from Washington is here without reason when he asks this House to double this appropriation for this research when he has within a stone's throw of his own valley the very line of work going on with respect to the same disease that he is asking to have controlled by the Government in the Wenachee Valley.

Mr. HILL of Washington. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. HILL of Washington. I want to call the attention of the gentleman to the fact that we already have a laboratory out there which is equipped for the investigation of this disease. You do not have to establish a new laboratory. The man who discovered the identity of the spores with the spores on the apples on the tree is in control of that laboratory.

Mr. DICKINSON of Iowa. If you have a man there already, why do you want $15,000 more? You have an appropriation of $15,000 in the laboratory in the Hood Valley. There is no reason why the department should be asking to extend this work every time the disease breaks out in a neighboring valley. Mr. Chairman, I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. HILL of Washington. A division, Mr. Chairman.

The CHAIRMAN. The gentleman from Washington calls for a division.

The committee divided; and there were—ayes 18, noes 24.

So the amendment was rejected.

Mr. ABERNETHY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from North Carolina moves to strike out the last word.

Mr. ABERNETHY. Mr. Chairman, I desire the attention of the distinguished chairman of the subcommittee [Mr. DICKINSON of Iowa]. I had myself intended to ask for an increase of this item on account of the strawberry troubles we are having down in my section of the country from the disease known as the dwarf. But before this matter came up I talked with the distinguished chairman of the subcommittee about it and found out that an increase to deal with it had been allowed, and knowing the temper of the House, particularly at this time, and knowing how economical the Members are, and how eager they are to follow the distinguished gentleman from Iowa, I have contented myself with asking him to put in the RECORD, if he will, a statement as to how this money, in his opinion, should be expended.

This question of investigating this disease and this strawberry trouble started last year, and the investigation was begun by the department. Now there is an increase in the appropriation, as I understand. It seems to me the attitude of the department should be to continue these investigations with this increase from the point where the trouble started in my territory. I would like to have the gentleman's opinion on that.

Mr. DICKINSON of Iowa. We have increased the strawberry item in this bill very materially. There is a certain disease of the strawberry that is prevalent in different localities, and the experts have already done some work in the gentleman's section of the country. I do not see why, with the increase we have given the department, they can not make additional investigations down in the gentleman's country. I hope the department will be able to do it and I think they will.

Mr. ABERNETHY. I think I can fare better in the future by not contending with the gentleman and by getting under his protective wing. I am thankful for the amount given, and, considering the temper of the House, I will not ask for more.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The CHAIRMAN. The pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

Gardens and grounds: To cultivate and care for the gardens and grounds of the Department of Agriculture in the city of Washington, including the upkeep and lighting of the grounds and the construction, surfacing, and repairing of roadways and walks; and to erect, manage, and maintain conservatories, greenhouses, and plant and fruit propagating houses on the grounds of the Department of Agriculture in the city of Washington, $97,740.

Mr. LARSEN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Georgia moves to strike out the last word.

Mr. LARSEN. Mr. Chairman and gentlemen of the committee, I am not complaining about the rather large sum of money that seems to be appropriated in this bill for the purpose of farming in the District of Columbia, and especially in the city of Washington, although there is nearly $100,000 proposed to be appropriated under the provisions of this bill for that purpose. Personally it occurs to me that probably it would be a great deal more advisable if some of these large appropriations were used for the purpose of furthering agriculture in more distant localities and in agricultural communities where some aid is so badly needed at this time.

But I rise to specifically express my regret at conditions which exist in the crop-estimating department of this Government. It does seem to me that there is not as much harmony and as much cooperation between the departments of our Federal Government, and especially those departments that are engaged in the crop-estimating work, and the agriculture departments of the various States as there should be.

There has been a dispute as to the crop estimate in my own State, Georgia. For some months it has been the contention of our department of agriculture—and I think we have one of the best in the country—that the estimate made by the Department of Agriculture in Washington as regards the production of cotton in Georgia for this year was entirely too high. I have been watching this controversy for some months and as the crop is being harvested, and the harvest has practically been completed and estimated in our State, it appears there was considerable cause for complaint upon the part of the Georgia commissioner of agriculture. The authorities in Washington, at a very crucial period in the marketing of our crop, estimated that the cotton production of the State of Georgia would be 1,020,000 bales. The department of agriculture in that State took the position that it would fall considerably short of 1,000,000 bales. The last estimate as made by the State of Georgia upon this crop is that Georgia will produce, or has produced, you might say, 961,241 bales. The Government estimated, according to the last estimate made, that it would produce 1,020,000 bales, a difference of nearly 59,000 bales of cotton.

If this only applied to the State of Georgia it might be less seriously regarded and we might be inclined to overlook any contentions existing between the authorities here and the authorities in that State, but the same things which are true in Georgia are true in many of the other cotton-producing States. It has existed to such an extent that one of the Senators in the other end of the Capitol called attention to it and said that the Department of Agriculture of the Federal Government had overestimated our cotton crop by nearly 1,000,000 bales, and it appears that is true.

Now, the difficulty is that when the Federal Government comes out—at the time we are marketing our crop in October, or at

least when the poor man has to market his crop, when the one and two horse farmers are forced to put it on the market—and forecasts a production far in excess of what the actual yield will be, you can see what havoc is played and that millions of dollars are lost by these small farmers. It may not make such a material difference, however, to the man who is able to hold his crop over until the next year.

Now, Mr. Chairman, what I want to do is this: I want to urge upon the part of the officials of this Government that they cooperate better with the State officials. I know, and I think everyone else knows, that the various States in this Union have their agricultural departments and are in a better position to make an estimate as to what the production in that particular community is apt to be than the Federal Government, because the Federal Government has not the machinery, has not the facilities, and is largely dependent upon our State authorities, and yet when our State authorities make an estimate which seems to coincide with the facts of the case, in many instances the Federal Government brushes it aside and says, "Oh, no; you will produce a great deal more," just as was the case in Georgia this year.

I think it is regrettable. It is regrettable because it not only affects Georgia but the other States which produce cotton as well.

Mr. RANKIN. Will the gentleman yield?

Mr. LARSEN. Yes.

Mr. RANKIN. In that connection I desire to say to the gentleman from Georgia that when the crop-reporting bureau made its estimates for September, the figures gathered from its correspondents in the field showed that the condition of the cotton crop had declined about 10 per cent.

If they had followed the logic of those figures in making up their estimates of the production at that time they would have reduced their estimate several hundred thousand bales below what it was, but instead of doing that they seem to have disregarded those figures and to have followed the suggestions of the private reporters throughout the country and raised the estimate instead of reducing it.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. RANKIN. Mr. Chairman, I ask unanimous consent that the gentleman from Georgia may proceed for three additional minutes.

The CHAIRMAN. The gentleman from Mississippi asks unanimous consent that the gentleman from Georgia may proceed for three additional minutes. Is there objection?

There was no objection.

Mr. RANKIN. I will say to the committee that this is of more importance to the cotton growers than any other legislation this House will likely pass at this session.

As I said, instead of following the logic of the information received through their field representatives, they seem to have followed the lead of the private crop estimators who are primarily interested in the cotton speculators. They increased their estimate and have held to that lead from that day to this, until to-day it is apparent to every intelligent man, familiar with the cotton crop and cotton-growing conditions, that they are several hundred thousand bales above the actual production. That resulted in driving the price down, depressing the market possibly several cents a pound, all of which cost the cotton growers many millions of dollars.

I telegraphed to Washington protesting against this misconduct at the time.

Mr. LARSEN. I thank the gentleman for his very timely remarks and would add that it not only depressed the cotton market but in many cases it has actually resulted in distressing conditions to the small producers throughout the country.

The tendency of the Federal Government seems to have been, although I do not charge it was, as the gentleman from Mississippi stated, to favorably regard the reports as made by the private speculators and to disregard the reports as made by the various departments of agriculture in the States throughout the cotton-producing area. The result has been that they have taken a position against the accredited authorities of the States and have injuriously affected the price which the producer should receive.

Mr. Chairman, I ask unanimous consent that I may extend my remarks by incorporating in the RECORD a telegram which I have received from Hon. Eugene Talmadge, commissioner of agriculture for the State of Georgia, touching upon this question.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD by printing the telegram referred to. Is there objection?

There was no objection.

The telegram referred to follows:

ATLANTA, GA., *December 15, 1928.*

Congressman W. W. LARSEN:

Final report on Georgia cotton crop for this year compiled by Georgia Department of Agriculture shows 961,241. Final Federal report for Georgia, 1,020,000. According to the records of the Georgia Department of Agriculture, the Federal bureau overestimated the Georgia cotton crop 58,759 bales. The largest estimate of the Federal department on the Georgia cotton crop was released October 8, the peak of marketing. This estimate for Georgia was 1,060,000 bales. If the Federal bureau has overestimated the crop in other States as has been done in Georgia, Senator HEFLIN, of Alabama, is very conservative in his statement that the crop for the entire Cotton Belt has been overestimated 500,000 bales.

EUGENE TALMADGE,
Commissioner of Agriculture.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Arlington Farm: For continuing the necessary improvements to establish and maintain a general experiment farm and agricultural station on the Arlington estate, in the State of Virginia, in accordance with the provisions of the act of Congress approved April 18, 1900 (31 Stat. pp. 135, 136), $60,000: *Provided,* That the limitations in this act as to the cost of farm buildings shall not apply to this paragraph.

Mr. REED of New York. Mr. Chairman, I move to strike out the last word.

I am very sorry to take the time of the committee. It is very unsatisfactory to stand here and try to hurry when you have something you think is of real interest to the Members of the House. After all, I feel I owe something to the chairman, who has very kindly given me this time. I owe something to the Members of the House in saving their time, because I realize you want to finish the bill and you wish to get away. I want to give you the meat of what I have to say and then I am going to ask the privilege of extending my remarks.

There is hardly a Member on the floor of this House who does not have in his district orchards or fruit of some kind. There is no nation in the world which produces more fruit or finer fruit than the United States of America, and fruit growing in the United States is distributed pretty much over the whole country.

I am in sympathy with the Department of Agriculture in the work it is trying to do, and the Department of Agriculture has brought production up to a very high point. But there is one phase of agriculture that has been neglected, and that is the marketing feature. The result is we hear much about overproduction.

I realize you intend to bring in some relief bills, and the chances are that some farm relief bill will be passed either at this session or at a special session of Congress; but there is one phase of agriculture that will not be reached except through the tariff and through the means which I wish to present here.

We provided under the pure food and drugs act for proper labeling and required that certain fruits must be labeled "imitation" or "compound." There has recently been rendered a decision in the district court at Detroit which has simply opened up the floodgates for imitation fruit products, and many manufacturers have seen fit to take advantage of the opportunity to foist upon the public substandard products.

The consumers have learned to rely on the Department of Agriculture to protect them. The result is they little realize or even suspect that they are buying imitation fruit products. The magnitude of this fraud upon the consuming public, I imagine, is not known by the membership of the House.

For instance, take the strawberries from the West. They are putting on the market to-day an imitation with just enough strawberries to give the proper flavor, with large quantities of sugar and a certain amount of peptone, and the rest is a lot of inferior apples ground up. The public is paying the regular price for this product. Your chain stores are handling this sort of thing and this is happening all along the line.

Mr. SUMMERS of Washington. If the gentleman will yield, where is that product manufactured?

Mr. REED of New York. In many of the large cities all over the country, and the gentleman is in just the same position as other Members from fruit-producing districts.

Mr. MILLER. Where is the product put on the market?

Mr. REED of New York. It is put on the market in every part of the country and I will say to the gentleman from Washington that you can find very little pure strawberry jam on the shelves of the stores in this country to-day.

Now, what is the trouble? The floodgate has been let down. The Department of Agriculture ought to take some steps to correct the situation, but so far as I know it has

not presented or recommended any legislation to do so. It has been two years since this decision was rendered and the time has come for some legislation.

Here is the situation and the reason the Department of Agriculture is waiting——

Mr. MILLER. Will the gentleman yield?

Mr. REED of New York. Yes.

Mr. MILLER. If it is a substitute so superior to anything that is prepared any other place, I think it ought to be permitted to be on the market, even though there is but a slight quantity of strawberries in it.

Mr. REED of New York. We will not discuss that. This fraud affects the gentleman's State as much as any State in the Union.

Mr. COOPER of Wisconsin. Can the gentleman indicate briefly what that court decision was to which he has referred?

Mr. REED of New York. I have not the time to go into that, but I can tell the gentleman what happened. They destroyed the corpus of the case, so the Government could not appeal. Then they enjoined the Government—think of that—they enjoined the Government from enforcing a criminal statute, and that matter has been pending for practically two years. No one ever heard of such a thing before. The Agricultural Department is waiting for a final decision in the case, and while they are waiting the fruit producers of the country are being destroyed and the consumer defrauded.

The administrative standard and definition for pure fruit jam or preserve as announced by the Department of Agriculture calls for the use of not less than 45 pounds of fruit to each 55 pounds of sugar in the manufacture of the product. This standard is now violated with impunity.

One of the markets upon which the fruit grower must depend to take the surplus production is the fruit packer and preserver. The manufacture of fruit products keeps the grower alive. There is furnished the grower year after year a steady, certain market for his production less subject to fluctuation than the hazards of the fresh fruit demand. The tonnage of fruit dependent upon the preserving industry is enormous. The fresh fruit markets are not subject to much expansion. The preserving industry can be readily enlarged as the public appetite for preserved fruits is increased by satisfaction with the quality.

I am informed that if only half of the present production of substandard preserves were converted into standard products the increase in the outlet for fruit would be enormous. A standard quality of jelly, for instance, would contain four times more fruit than the substandard articles which are now being sold without the words "imitation" or "compound" to warn the consumer.

In my State of New York there has been a great increase in the acreage devoted to cherries which are grown primarily for the preserve industry. This greatly increased production will soon be upon the growers' hands and they must find a market. There is no fresh fruit market for this variety of cherry. The outlet in the preserve industry must be enjoyed or the growers are facing disaster.

In Washington and Oregon approximately 60,000 barrels of strawberries are packed for manufacturers of fruit products each season. The past two years this fruit has not been absorbed and the stocks have been carried over at ruinous prices. Approximately 80,000 barrels of raspberries are packed each year in the States of Washington and Oregon for manufacturers of fruit products. The supply is greater than the demand. The States of Maryland, Delaware, and Virginia produce large quantities of fruits for preserving use and are in the same situation. In Arkansas, Louisiana, and Tennessee ideal climate and soil conditions have resulted in the creation of a fruit-growing industry which has reached proportions that require larger markets. Michigan and Wisconsin with their strawberries, raspberries, and cherries are in the same condition. They have no adequate market. The grape growers of Ohio, Pennsylvania, and New York depend upon the manufacture of fruit products far more than upon the purchasers of basket fruit for home consumption. The fruit growers of Colorado and Idaho, who have started out with such promise, have reached the limit of their present market. Again, I repeat, the gravity of the situation justifies immediate and drastic action.

The pro forma amendment was withdrawn.

The Clerk read as follows:

For the selection, classification, and segregation of lands within the boundaries of national forests that may be opened to homestead settlement and entry under the homestead laws applicable to the national forests; for the examination and appraisal of lands in effecting exchanges authorized by law and for the survey thereof by metes and bounds or otherwise by employees of the Forest Service, under the direction of the Commissioner of the General Land Office; and for the survey and platting of certain lands, chiefly valuable for agriculture, now listed or to be listed within the national forests, under the act of June 11, 1906 (U. S. C. pp. 423, 424, secs. 506–509), the act of August 10, 1912 (U. S. C. p. 423, sec. 506), and the act of March 3, 1899 U. S. C. p. 421, sec. 488), as provided by the act of March 4, 1913 (U. S. C. p. 424, sec. 512), $52,500.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that a parenthesis mark be inserted following the figures "1899," in line 14, on page 41.

The CHAIRMAN. Without objection, the correction will be made in the manner indicated.

There was no objection.

The Clerk read as follows:

FOREST-FIRE COOPERATION

For cooperation with the various States or other appropriate agencies in forest-fire prevention and suppression and the protection of timbered and cut-over lands in accordance with the provisions of sections 1, 2, and 3 of the act entitled "An act to provide for the protection of forest lands, for the reforestation of denuded areas, for the extension of national forests, and for other purposes, in order to promote continuous production of timber on lands chiefly valuable therefor," approved June 7, 1924 (U. S. C. pp. 427–428, secs. 564–570), as amended, including also the study of the effect of tax laws and the investigation of timber insurance as provided in section 3 of said act, $1,300,000, of which $34,460 shall be available for departmental personal services in the District of Columbia and not to exceed $3,000 for the purchase of supplies and equipment required for the purposes of said act in the District of Columbia.

Mr. LEAVITT. Mr. Chairman, I offer the following amendment:

The Clerk read as follows:

On page 45, line 13, strike out the figures "$1,300,000" and insert "$1,400,000."

Mr. LEAVITT. Mr. Chairman, this amendment is offered to the section of the bill that has to do with fire-protective cooperation. It seems to me, and I think to all who have studied the problem carefully, that protection against fires is the foundation of all forestry practice.

The amount in the bill—$1,300,000—is not sufficient to meet the cooperation already lined up between the different owners of timber in the several States and the Federal Government under the McNary-Clark Act. I have discussed the matter with the committee. In my amendment I have attempted to come somewhat nearer to the amount required to meet the obligations and to carry out a sound forestry policy.

Mr. DICKINSON of Iowa. Mr. Chairman, the evidence before the committee showed that the amount that should be put in for fire protection in cooperation with the States should be about 25 per cent. The amount carried in the bill is a little above 19 per cent. For that reason the committee has no objection to the amendment offered by the gentleman from Montana.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Montana.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Total, Forest Service, $12,814,280.

Mr. HUDSON. Mr. Chairman, I move to strike out the last word. I do not do so with any idea of offering an amendment or opposing the legislation. The committee has decidedly cut down on the amount for the acquisition of these forest lands. I thought it ought to appear in the RECORD why the committee has seemingly gone against the previous recommendations of the House which in the previous sessions virtually, by legislative action, gave a mandate to the Appropriations Committee on the subject of acquiring forest lands which included cut-over lands for the purpose of reforestation.

Mr. DICKINSON of Iowa. Mr. Chairman, there was over a million dollars allocated for the purchase of a great parcel of land in the New England States. It was a lump sum for the purchase of lands, mainly in New Hampshire. That was all provided for and the allocation was known before the appropriation had been made. It is for the beginning of the purchase of the outlying areas that have been surveyed or contracted for that this appropriation will be used. We believe that the President and the Budget reached the conclusion that this was a sufficient amount to inaugurate the purchase of forest land on a larger scale.

Mr. HUDSON. It does not mean any policy on the part of the committee or the Budget to restrict the purchase of these lands.

Mr. DICKINSON of Iowa. It does not on the part of the committee; I can not speak for the Budget.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Soil survey: For the investigation of soils, in cooperation with other branches of the Department of Agriculture, other departments of the Government, State agricultural experiment stations, and other State institutions, and for indicating upon maps and plats, by coloring or otherwise, the results of such investigations, $274,000.

Mr. BUCHANAN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment offered by Mr. BUCHANAN: Page 49, line 14, after the figures "$274,000," insert a new paragraph, as follows:

"To enable the Secretary of Agriculture to make investigation, not otherwise provided for, of the causes of soil erosion and the possibility of increasing the absorption of rainfall by the soil in the United States, and to devise means to be employed in the preservation of soil, the prevention or control of destructive erosion and the conservation of rainfall by terracing or other means, independently or in cooperation with other branches of the Government, State agencies, counties, farm organizations, associations of business men, or individuals, $160,000."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas.

Mr. BUCHANAN. Mr. Chairman, I state to the chairman of the committee [Mr. DICKINSON of Iowa] that if we get into a discussion of this amendment, it will take some time. I do not know how long the gentleman contemplates remaining in session. If we discuss it, I will want at least 25 minutes, and others desire to discuss it. Unless the chairman [Mr. DICKINSON of Iowa] will agree to its adoption it would be better to adjourn.

Mr. DICKINSON of Iowa. Mr. Chairman, this matter was thoroughly discussed before the committee. The committee is absolutely convinced of the merit of the erosion work, and so far as I am concerned, and I think I can speak for the rest of the committee, we do not expect to oppose it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The amendment was agreed to.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that on page 48, line 12, in order to correct the spelling, to strike out "gines" and insert "gins."

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to correct the spelling in the manner indicated. Is there objection?

There was no objection.

Mr. BUCHANAN. Mr. Chairman, I desire to offer another amendment, to go at the end of the erosion amendment just adopted. I do not think the gentleman from Iowa will object to it. It is for the purpose of making the sum of $40,000 of the amount appropriated immediately available, in order to permit the department to commence work this year.

Mr. DICKINSON of Iowa. Mr. Chairman, I have no objection to that.

Mr. BUCHANAN. Mr. Chairman, I offer that amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. BUCHANAN: Page 49, at the end of the amendment just adopted, insert the words "of which amount $40,000 shall be immediately available."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. JOHNSON of Texas. Mr. Chairman, the adoption of the Buchanan amendment, in so far as this House is concerned, means the crystallization into law of a bill (H. R. 12485) introduced by me having for its object the accomplishment of the same purpose. The advantage of having it incorporated as a part of this agricultural appropriation bill is twofold: First, insurance of its immediate passage and second, that funds for carrying the project into effect will be available without further legislation. I am gratified that my colleague [Mr. BUCHANAN], who is the ranking minority member on the Agricultural Appropriation Committee, saw proper to offer the amendment, and I congratulate the House on its adoption.

Science is solving many problems once thought impossible of solution. The forces of nature are being mastered, so that those which were once destructive are now being made to serve the needs of humanity. The great floods which periodically destroy life and property if properly curbed and directed may be made a beneficent blessing. The time will come when we will not permit the excessive rainfall in flood time to bring devastation and ruin, but these waters will be conserved and made useful rather than destructive.

The rainfall, if not permitted to run off too rapidly, will reduce the flood hazard, and this measure therefore affects to some extent the question of flood relief. The checking of the run-off will also give additional moisture to the lands on which it falls by causing an increased absorption of the rainfall.

But paramount in importance is the prevention or control of destructive erosion and the consequent preservation of the soil. It is designed therefore to bring a threefold blessing—reduce the flood hazard, preserve and retain moisture, and conserve the soil.

The damage done by soil erosion is little understood by the American people. According to Mr. H. H. Bennett, of the Bureau of Chemistry and Soils, who has given this subject years of intensive study and is regarded as one of the Nation's experts, the farmers of the United States are losing at least $200,000,000 annually by soil erosion. Mr. Bennett states that the loss to the Nation is difficult to estimate, and that unless it is checked it will ultimately mean the destruction of all agricultural lands. According to him and other experts, as a soil is worn down it becomes less productive, not at a uniform rate, but at a progressively increasing rate.

The State of Texas, realizing the importance of conserving the soil, established some years ago at Spur, Tex., a station to make a study of this important subject. This Texas station was the first comprehensive soil-erosion station in the history of the world, and the work being done there is doing great good.

This statement was made before the hearings on this bill, not by one from Texas, but by one of the experts in the United States Department of Agriculture.

In a letter to me from Mr. A. B. Conner, of the Texas Agricultural Experiment Station, who is connected with the work of this station, he writes most interestingly of results of their investigations. Permit me to quote a paragraph therefrom:

We have at our Spur Station more than 100 acres of land included in the run-off water and soil erosion experiments, and several thousand dollars' worth of equipment, and we are now actively engaged in studying the problem and collecting data. Our preliminary results indicate that our water losses frequently reach 50 per cent of the total rainfall and our most extreme loss has been 85 per cent of the total rainfall, such a rain being of the kind and character that causes flooding of the rivers.

Moreover, in a single year we have obtained a measured loss of 41 tons of surface soil to the acre. This tremendous loss of plant food, caused by washing, is responsible in perhaps a larger measure than we now appreciate for the depleted condition of the soils of east Texas and the difficulty with which we rebuild them.

The problem of soil erosion is not confined to any one State or group of States, but in every State of the American Union where there are agricultural lands the question will sooner or later have to be dealt with. Texas and Missouri are the only two States that have thus far established experiment stations for this purpose. Experts tell us that investigation and experiments to develop the best means of preventing water losses must be established in different parts of the country, as the soils of the various sections differ materially, so as to require different treatment. The sections which the Director of the Bureau of Chemistry and Soils advises need immediate attention are those lands situated in the silty uplands along the Mississippi and Missouri Rivers and their tributaries; in the region of heavy soils of southern Ohio, Indiana, Illinois, and Kentucky; the Piedmont and Appalachian regions; in the black prairies of central Texas; the sandy and stiff soils of east Texas and Louisiana; the red prairies of Texas, Oklahoma, and Kansas; and in many of the New England States; the soil within these areas being especially vulnerable to erosion and in a measure each presenting a different problem for solution.

It is apparent that this investigation is of such magnitude and importance, not only to agriculture, but to the economic life of the Nation, that the Federal Government should undertake its solution, and not leave it to the several States to do. The only matter of surprise is that the Federal Government has not sooner undertaken this important work.

We expend millions of dollars to maintain our Army and Navy to be used in case of wars which may not and we hope may never materialize, but this appropriation is not to avert a threatened menace, but an existing menace, which is destroying the agricultural lands of America.

This is a constructive measure. The money appropriated under this amendment is an investment that will pay vast dividends. Its purpose is to preserve the greatest material asset of the Nation—our agricultural lands. The wealth of this Nation does not consist of its stocks and bonds; these are mere evidences of wealth. The real and fundamental wealth of America is its rich agricultural lands, and when these are gone

the wealth of the Nation will vanish. Stocks and bonds will then become mere scraps of paper. The machinery in the great factories will become silent and commerce will sicken and die. Let us preserve these lands not only for our own use and for those of this generation, but for the use of our children and for those who shall live after us.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word in order to inquire with reference to the appropriation for soil survey. How does that compare with the appropriation made for that purpose last year?

Mr. BUCHANAN. There is a little increase.

Mr. DICKINSON of Iowa. There is an increase of $4,000 after the Welch Act adjustments are taken care of.

Mr. BRIGGS. That is just to take care of the salaries?

Mr. DICKINSON of Iowa. No; that is over and above the Welch Act.

Mr. BRIGGS. I think this work is of a very valuable character, and I am hoping that nothing will be done to impair the effectiveness of it; that its efficiency might be promoted by giving it a little more money. In this connection, is the Bureau of Soils limited in its activities in soil survey to maps on a certain scale which do not conform to the scale of maps of the Topographic Survey? For instance, they insist that the scale is very much larger with respect to the soil-survey maps; the soil-survey people are always asking for the topographic maps on which to build their soil surveys, and one branch or the other of the department is indicating that there is a restriction imposed upon the character of that scale.

Mr. DICKINSON of Iowa. That is a matter over which this committee would have no jurisdiction. It is an administrative matter.

Mr. BRIGGS. I thought perhaps the gentleman might be familiar with it.

Mr. DICKINSON of Iowa. No.

Mr. MORROW. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD upon the Buchanan amendment.

The CHAIRMAN. The gentleman from New Mexico asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. MORROW. Mr. Chairman, in pursuance to leave granted me to extend my remarks in the RECORD, I insert herein information sent to me by Dr. H. L. Kent, president of the College of Agriculture and Mechanic Arts, State College, New Mexico, upon soil erosion and the prevention of same by soil terracing:

NEW MEXICO COLLEGE OF AGRICULTURE AND MECHANIC ARTS,
State College, N. Mex., November 29, 1928.

Hon. JOHN MORROW,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN MORROW: While I was in Washington last week, I learned that Congressman BUCHANAN, of Texas, is planning to ask for an appropriation for the United States Department of Agriculture to provide for experimental work in land terracing, primarily for the prevention of soil erosion, although here in the West we are interested in it fully as much for water conservation as for the prevention of erosion.

As I understand it the situation is as follows:

First. The amount of money wanted, $150,000 is the present judgment of the amount, was not included in the Bureau of the Budget's estimate.

Second. Mr. BUCHANAN has the approval of his subcommittee of the Committee on Agriculture, and they now anticipate that the matter will be introduced on the floor of the House and they believe that without any difficulty it will be added to the Budget estimate.

Third. As you can well appreciate, we must have some support for the measure from the various sections of the United States. My purpose in writing to you at this time is, first, to be sure that you know about the proposed legislation, and, second, to try to enlist your interest in it and then, finally, to furnish you with information which may be used in support of same.

Frankly, I think Mr. BUCHANAN is asking for too little money. I told him so but I assume that his judgment and experience dictate that a small amount shall be asked for in the beginning and thereafter the work and the interest created through the work will make it easier to secure larger amounts and an enlarged amount of work.

I came back from Washington with the soil-conservation specialist of the Federal land bank at Houston, Tex., A. K. Short. Short is a Texas A. and M. graduate who has worked for the college for years and gave up his work for the college to go with the Federal land bank on this special kind of job. He pointed out many of the pressing problems in east Texas where erosion is serious.

Erosion is a problem in west Texas and northeastern New Mexico. We think of it as a problem that is of no immediate importance except in a few isolated cases. As a matter of fact, it is of immediate importance. This is shown by the results obtained at the Spur (Tex.) Experiment Station. Their results indicate that the normal rate of erosion on fields with a slope of only 2 or 3 per cent will remove 6 inches of the top soil from cultivated fields in about 40 years. Long before the entire 6 inches has been removed the fields will be, of course, so reduced in production as to make it almost impossible for a farmer to make a living. Therefore we will or should be concerned with this soil-erosion problem.

Director Conner, of the Texas station, and those of us who are working here in New Mexico are more immediately concerned in water conservation, which goes along with the prevention of erosion.

The method found most effective for preventing erosion is to throw up low, broad terraces running on contour lines through the fields. These terraces, of course, prevent the formation of gullies. At the same time in our plains region, where the rainfall is limited and frequently comes in hard showers, these terraces prevent the run-off of the water and save it for the benefit of crops.

The Spur station data indicate that 25 per cent of their annual rainfall comes in small showers that are of no particular benefit. These showers may be from one-tenth up to one-half inch and, as you can readily understand, are lost through evaporation.

Another 25 per cent of the total rainfall is lost through surface run-off. The farmer ordinarily makes a crop on 50 per cent of the annual rainfall. If through terracing we can conserve the 25 per cent now lost on account of surface run-off, we have really added 50 per cent more effective water to the farmers' crops and that water stored not in a reservoir that requires ditches for distribution but stored on the land on which the crop is growing; that is, stored in the soil.

This puts the matter briefly, except that I want to add that the extension force at the college here has been encouraging soil terracing in northeastern New Mexico. We have been doing that for two or possibly three years. Results are encouraging, but the number of farmers convinced or persuaded is small and we need more data and perhaps the weight of Government data or experiments back of our program.

I have just written to Arthur Jones, of the First National Bank at Portales, who is chairman of the committee on agriculture of the State Bankers' Association, suggesting that at the meeting of the agriculture committee of that association this winter we take up this problem for discussion. I did not mention to him the proposed legislation. We can, of course, get the indorsement of the association to a much better advantage if we have the matter thoroughly discussed with them so that they understand it before asking for an indorsement.

My own personal opinion is that this terracing program should be tied up with water conservation in the dry plains area, and that it will and should, by rights, have a place in the entire program of flood control.

I am mentioning this matter of water conservation and the possible contribution to flood control to you in order that you may have it in mind during the present session of Congress. Let me point out that the proposed method of flood control by means of large reservoirs or dams along the stream courses requires a tremendous expense or investment. It will hold the water in the upper reaches of the streams. But before the water can be put to use it will be necessary to construct long canals and expensive irrigation works, and then the water can be applied to the land. That is, to a limited area of land. If, on the other hand, we could encourage a very general practice of terracing, and we find that these terraces will hold a considerable amount of water that now goes down these streams at times of flood, we reduce the flood danger, prevent erosion, and the silting up of the stream channels, and at the same time store the water in the soil of the fields on which the crops are growing.

The expense in the one case is borne by the farmer, who terraces his own land, the public contribution being the services of the county agent and possibly a terracing engineer. The expense in the other case means millions put into large dams and irrigation works and the additional labor on the part of the farmer to distribute the water after it has been delivered to him through the irrigation works.

The terracing program means that the silt ordinarily removed by flood water is left on the farmer's field and the fertility thereby preserved. In the other case it means that washing goes on, the silt is carried into the stream beds and distributed or deposited in the reservoir above the dam. In time these deposits will fill the reservoir and then you have your problem to solve again. Meanwhile your original resource, the fertility of the land, has been removed, and the second time you attack the flood problem you will be without the natural resources to pay the bill.

That is a long-time view and given to you for your guidance. I think perhaps at this short session Mr. BUCHANAN'S bill ought to be supported just as it is, and at the next session those of you who are acquainted with the problem may go in for additional funds for water conservation and possibly flood-water control.

Very sincerely yours,

H. L. KENT, *President.*

The Clerk read as follows:

Cereal and forage insects: For insects affecting cereal and forage crops, including sugar cane and rice, and including research on the European corn borer, $470,620.

Mr. TAYLOR of Colorado. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. TAYLOR of Colorado: Page 51, line 12, after the sum "$470,620," insert "of which $8,000 shall be immediately available for the control of the cricket in northwestern Colorado."

Mr. TAYLOR of Colorado. Mr. Chairman, that amendment is in accordance with the report and in agreement with the committee.

Mr. DICKINSON of Iowa. Mr. Chairman, there is no objection to that amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Colorado.

The amendment was agreed to.

Mr. TAYLOR of Colorado. Mr. Chairman, in further explanation of this amendment I ask to insert in the RECORD a statement I made before the agricultural appropriations committee, as follows:

FRIDAY, DECEMBER 7, 1928.

CRICKET ERADICATION

STATEMENT OF HON. EDWARD T. TAYLOR, A REPRESENTATIVE IN CONGRESS FROM THE STATE OF COLORADO

Mr. TAYLOR. Mr. Chairman and gentlemen, this is a small matter for which I appear in a financial way, and yet it is of tremendous importance to the State of Colorado. * * * These crickets appear periodically. There is an authentic record of them. They seem to last for a few years and then disappear. They are migratory. The records show their appearances in 1879 and in 1882, 1895, 1900, 1902, and 1904. They come into Utah and southern Idaho. From 1904 to 1918 there is no record of their doing any damage. But from that time to this day they have been more active. About three years ago they appeared in the northwestern corner of Colorado on the public domain, and they have since spread to a considerable portion of the three northwestern counties of that State.

I asked to have an item put into this bill a year ago, for the purpose of exterminating these pests, and the chairman told me then he thought the item for grasshoppers might be used for this purpose; but when the time came to get some of that money the department said the appropriation did not apply to crickets and would not let me have any of it. Of course, when the Budget is being made up in August, September, and November, us Members of Congress are out home, so we can not appear before the departments or the Bureau of the Budget. But as soon as I came here this fall I took it up with the Department of Agriculture, and they are very much in favor of this item. The Federal Bureau of Entomology has very diligently been working on this matter for two or three years. They sent two of their very capable men, Mr. Frank T. Cowen and Mr. Sam C. McCampbell, and they have worked with Mr. C. P. Gillette, of the Colorado State Entomological Association from the State Agricultural College, and with the officials and people of all those three counties, and they have now devised a plan of poisoning those crickets and handling this matter.

The system in brief is to get long sheets of tin and make a tin fence about three feet high and as long as they can make it. They also dig a trench in front of it. When the crickets fill the trench and pile up to the top of the fence they smoke them out, that is they spray them with calcium-arsenate, and it suffocates them.

The local people have spent about $25,000 in the last two or three years in fighting these crickets and trying to save their crops, and that is all they can spend. That is a sparsely settled country and its people are mostly settlers of very limited means. There are nearly 7,000,000 acres of land in those three counties, and only about one-fifth of it is patented land, the rest is mostly public lands of the United States covered with sage brush, oak brush, and buck brush, and other scrubby stuff on the hills and mountain sides that is the breeding place of these crickets. It is unconscionable to expect these people on their little farms in the narrow valleys to guard against these swarms of crickets that come from Uncle Sam's public domain. They travel in bands, swarms, or droves of various sizes, sometimes 2 miles one way and a mile the other. Their distribution is not uniform. But all areas are liable to be infested.

Mr. BUCHANAN. That is one of the plagues of Egypt sent on your people.

Mr. TAYLOR. These swarms of crickets eat everything the farmers grow. They pollute the streams and become so thick that neither the people nor the stock can drink the water. People can not live there. There have been something like 200 farms abandoned in the past three years. The people have been actually driven out, many of them without a dollar on earth, and have had to go off some place and try to get work and something to eat. A few of the Federal land-bank loans have been foreclosed, but not many of those. Most of the Government loans are on lands that have thus far escaped.

The land upon which these crickets breed is the public domain of the Federal Government. It is not privately owned land, subject to taxation. If it were, I would not be here asking for this relief. Colorado would handle it. But it is not right and we can not guard against that condition on public lands. About a million acres of public domain is actually infested with these crickets. In Moffat County alone, before the crickets came, there were 429 farms under cultivation. Now there are only 258. And the crickets caused nearly all of that devastation and depopulation. We look upon them as Uncle Sam's crickets, not ours.

But the people have now learned how to handle them. Those Federal and State entomologists have been diligently experimenting, studying, and working on this matter, together with the people of those counties, and they have worked out the system and the kind of poison that will kill the crickets en masse and have learned the method of doing it. Of course they may improve on the present methods. But I am not asking you to hire people to go out there and do the work. Those people ask Congress to appropriate $12,000 a year for two years to buy the poison, and the tin fencing, and spraying apparatus, and other equipment, and they will do the labor themselves. They ask that this money be made available for their use early next spring so they can poison the crickets early before they commence migrating. They believe with that and what they can get from the local people and the State legislature, they can eradicate this pest from that country.

Mr. BUCHANAN. Do you mean this fiscal year?

Mr. TAYLOR. Yes; this coming year. I want that item to be made available immediately. They have to go in there and poison these crickets when they are hatching out early in the spring.

Mr. BUCHANAN. When do they hatch out?

Mr. TAYLOR. In April mostly, I think. Those people must have this money before that time. They can not wait for the beginning of the next fiscal year on July 1, 1929.

I may say that I talked this matter over with Doctor Marlatt and his assistants several times. The Federal Bureau of Entomology thoroughly understand it. They have at my request already made a favorable recommendation to the Secretary of Agriculture, and the Secretary of Agriculture has made a favorable recommendation to the Bureau of the Budget, and I have conferred with them. I talked to Mr. Peffer of that bureau this morning, and he says they will promptly act upon it. But what they will do with it, of course, I can not say. I am very confident they will heartily approve of it.

Mr. BUCHANAN. Can you not get them to send it up to us?

Mr. TAYLOR. I have been urging them to do so and I believe they will. But I have not heard from them yet.

Here is a map of these three counties. You can see the different colors. They came in here [indicating] in 1921. Then they came in here [indicating] in 1926 and 1927. In this color here [indicating] is where they have been fighting them this past summer. This is the Bear River through here, and they are on the south side of it. They travel like an army. I drive through that country in an automobile every summer or fall, and they are almost as thick as ants all over the roads. We crushed thousands of them driving along with an automobile.

They are poisonous. When the chickens or turkeys eat them, they just topple over and die. There does not seem to be any way of getting rid of them except to poison them with calcium arsenate, and that kills them. The people won't do that on the public lands before they get down to their farms. They dig a ditch and put up a tin fence high enough so that they can not hop over. When the crickets fill up the trench or ditch and get about 3 feet deep and up to the top of the fence, to prevent them from hopping over, they have to spray them and kill them. It is an enormous job, but that is a good farming and stock country that is well worth saving. Uncle Sam naturally has an interest in those three naturally rich counties. At least, they will some day be rich and will be well populated. Congress is spending many millions of dollars every year for relief work of various kinds, and the Department of Agriculture is doing a vast amount of this kind of work in eradicating all kinds of pests that are injurious to agriculture; and I earnestly feel that no expenditure of money is or could be more deserved than this very modest amount I am asking you for, and I hope this committee will respond to the prayers of those pioneer farmers and help them exterminate those morman crickets. I thank you for giving me this very courteous hearing.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Southern field crop insects: For insects affecting cotton and including research on the pink bollworm of cotton there is hereby made available $303,120 of the unexpended balance of the appropriation of $5,000,000 for establishing and enforcing noncotton zones, carried in the second deficiency act, fiscal year 1928.

Mr. HASTINGS. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. HASTINGS: Page 51, line 18, after the figures "1928," strike out the period and add "of which amount $10,000 shall be immediately available for boll-weevil research control work in Oklahoma."

Mr. HASTINGS. I have submitted this amendment to the committee and I understand there is no objection.

Mr. DICKINSON of Iowa. There is no objection.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Crop and livestock estimates: For collecting, compiling, abstracting, analyzing, summarizing, interpreting, and publishing data relating to agriculture, including crop and livestock estimates, acreage, yield, grades, staples of cotton, stocks, and value of farm crops, and numbers, grades, and value of livestock and livestock products on farms, in cooperation with the extension service and other Federal, State, and local agencies, $845,000: *Provided*, That $113,000 shall be available for collecting and disseminating to American producers, importers, exporters, and other interested persons information relative to the world supply of and need for American agricultural products, marketing methods, conditions, prices, and other factors, a knowledge of which is necessary to the advantageous disposition of such products in foreign countries, independently and in cooperation with other branches of the Government, State agencies, purchasing and consuming organizations, and persons engaged in the transportation, marketing, and distribution of farm and food products, including the purchase of such books and periodicals as may be necessary in connection with this work: *Provided further*, That no part of the funds herein appropriated shall be available for any expense incident to ascertaining, collating, or publishing a report stating the intentions of farmers as to the acreage to be planted in cotton: *Provided further*, That no part of the funds herein appropriated shall be available for the preparation of mid-monthly reports of cotton estimates for the months of July, August, and November.

Mr. WOOD. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. WOOD: Page 61, line 16, after the word "cotton," insert "no part of the sum herein appropriated shall be available for establishing a foreign agency where there is now a United States commercial attaché located."

Mr. WOOD. Mr. Chairman, my purpose in introducing this amendment is to call the attention of this body to what is going on in the way of overlapping. We have now at Marseilles a United States consul whose business it is in some degree to furnish the information as provided for in this item. It may be said because the duties the American consuls have, they can not devote the time to this work. They are supposed to devote a part of their time in getting information regarding markets abroad. In addition, the purpose of obtaining this information, we have established in various parts of Europe commercial attachés and agents. There are now located at Marseilles one of these commercial attachés. It is his duty to do the identical thing that is expected by the agricultural agent if he be located there. We are now paying the commercial attachés the same amount of money it is proposed to pay the agricultural attaché to be located there. My experience as a member of this Appropriations Committee has been that instead of being helpful, where there are two agencies whose purpose it is to gather this sort of information, it is hurtful, in this: They do not cooperate, they antagonize each other. It took a long while for us to become convinced and convince the State Department that it was essential to establish commercial attachés because of the conflict or seeming conflict in authority. Now we established these commercial attachés for the purpose of gathering information regarding markets, regarding products, and regarding prices, and we have, as I have stated, a commercial attaché at Marseilles who is doing this very thing.

Now, to establish an agricultural agent there to do this same character of work is going to result in no cooperation between them and there will not be. There will be a conflict of authority, each contending he has a right to do this or do that, and in consequence we are not going to get the information which we are entitled to receive for the expenditure of money we are going to make. It occurs to me that with the information I have from the Budget in reference to this appropriation that before it should be used there should be a getting together of the Department of Commerce and the Department of Agriculture to prevent overlapping. It seems that has not been done, and General Lord tells me he is still waiting for these two departments to get together on this proposition. I think as a business matter this amendment should prevail. We are going to have deficiency hearings soon, and they will probably be completed during the holidays; in all probability the deficiency bill will pass this House and the other House before this bill is finally passed, and those representing these departments, both sides, can be given an opportunity to iron out their differences and convince the committee and Congress that it is not a double expenditure of money for the accomplishment of a single purpose. But it occurs to me that until then we ought to be very slow in passing this appropriation for this purpose.

Mr. McLAUGHLIN. Mr. Chairman, will the gentleman yield there?

Mr. WOOD. Certainly.

Mr. McLAUGHLIN. Is not the gentleman's statement of what he proposes a part of the plan suggested by the Department of Commerce a year or two ago, to do away with these agricultural agents in foreign countries and have their work done by agents of the Department of Commerce?

The gentleman from Indiana speaks about the two departments threshing out their differences and coming to an agreement. An effort was made to that end in the matter of which I speak, and the attempt to reach an agreement was a failure. Officials of the Department of Agriculture insisted that their men were needed and ought to be continued; that their agents ought not to be supplanted and their work ought not to be attempted by agents of another department. It seems to me it is the same thing that was threshed out in this House at some length only a year or two ago, when we came to the conclusion, very emphatically, that this work of the Department of Agriculture ought not to be interfered with by the State Department or by the Department of Commerce.

Mr. WOOD. I will say in answer to the gentleman from Michigan that every time we establish a new agency here or give encouragement to these old agencies by the establishment of some new branch of activity they are always jealous of their jurisdiction. Take the Department of Labor, with reference to the gathering of statistics, for example. They are furnishing statistics that could well be used not only by the Department of Agriculture, but by the Departments of Commerce and State, and yet each one of these is insisting that it shall have an agency for the gathering of the same facts, because they want to be independent of these other establishments.

This overlapping runs into millions and millions of dollars. It is only a small item abroad as compared with the overlapping that is going on in the other departments here. In the interest of good government, in the interest of good business, in the interest of the things we have these agencies for, we should have an understanding between these various departments. If, as the gentleman from Michigan says, one department through its agency is not furnishing all the information that should be furnished, then that agency should be gotten rid of. If one department can perform the service better than another, let the department best performing it have it; let that department render the service. But let us not have two agencies conflicting with each other, trying to accomplish the same purpose.

It is admittedly true from the information we have in regard to this case and from statements of the departments that they are overlapping with respect to the functions involved in this proposition.

Mr. McLAUGHLIN. Mr. Chairman, I will say that when the same data was submitted to others they did not come to the same conclusion as that arrived at by the gentleman from Indiana [Mr. WOOD]. There was an attempt on the part of those who would interfere with the agents of the Department of Agriculture to show that other agents were doing the same work, and perhaps doing it better, and the Department of Agriculture said, "No."

Mr. WOOD. That confirms what I said. Each one contends always that "I am it."

Mr. McLAUGHLIN. But the gentleman stated that it was generally agreed that they were interfering with one another, and that one could do better than two. That has not been agreed to, as I understand it.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. DICKINSON of Iowa. Mr. Chairman, this has been a very delicate matter for many years. It started first with the State Department and then was taken up by the Department of Commerce and the Department of Agriculture. A few years ago we tried to establish legislation to define the authority of these departments. The Ketcham bill respecting the Foreign Service has passed the House, but was objected to in the Senate and has not passed that body. But it is on the Senate Calendar over there and is now pending. I am not convinced myself that the Budget Bureau and the State Department are

aware of this overlapping; otherwise they would not have contended for the necessity of this new station in this city.

I want to suggest to you that amendment of the gentleman from Indiana would not only prevent the continuation of the present station, but it would also deprive the Department of Agriculture of its man in London and its man in Berlin, part-time men in Rome, and the two men in Shanghai that were provided by this House for that department, and which have been approved by the Budget. This amendment not only goes to the new station, as the amendment is drawn, but it goes to all the stations of the Department of Agriculture.

I am wondering whether the Department of Commerce would be willing to have all its stations discontinued and have them taken care of in a deficiency bill. I suggest to you that they would not. It is not only undoing what is proposed to be done in this bill, namely, establishing a new station, but by the amendment of the gentleman from Indiana you would destroy the stations you already have and setting aside the exact understanding we have had in the three departments for a number of years.

This matter has been dragging on for some time. I do not know when we shall be able to get the Ketcham bill through. But there is a letter in existence in which Secretary Jardine and former Secretary Hoover approve a program as suggested in the legislation, and say they will work out the differences between the two departments. I do not know of anything that would interfere with that any more than to have the findings of the Budget Bureau set aside by such an amendment as we have here. Hence I hope the House will vote down this amendment.

Mr. O'CONNOR of Louisiana. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Louisiana moves to strike out the last word.

Mr. O'CONNOR of Louisiana. Mr. Chairman, inasmuch as the reading of the letter which I am going to pass up to the Clerk will throw some light on the subject matter, although it may not be entirely applicable to the item under discussion, I am going to avail myself of a pro forma amendment in order to get that letter and a few of my own notions before the House.

The CHAIRMAN. Without objection, the letter referred to will be read.

The Clerk read as follows:

NEW ORLEANS, *December 14, 1928.*

Hon. JAMES O'CONNOR,

House of Representatives, Washington, D. C.

DEAR JUDGE O'CONNOR: To-day at the Recess Club luncheon I heard, with great interest, Mr. Goff, New Orleans representative of the United States Bureau of Foreign and Domestic Commerce, describe some phases of the enormously important work of that bureau.

From the many questions asked Mr. Goff it was evident that every man present realized, to some extent at least, the value of that work to his own enterprises.

Many years of close contact with the economy of this country convince me beyond a question, that the larger interests of all of us require that the United States Bureau of Foreign and Domestic Commerce be given every possible opportunity to develop its work and service to the very highest degree of efficiency. And I am quite sure such an end can not be obtained unless and until the appropriations made by Congress for the use of that bureau be very radically increased.

The bureau should be placed in position to offer really worth while careers to the most efficient type of representatives. It should be in position to train such representatives at least to the point where their efficiency will never be less than is the efficiency of the best type of representatives of other Governments.

There should at all times be ample money available to the bureau not only for ordinary every-day needs, but for every character of need that might promote our foreign trade.

Were private enterprise to contract with American business to promote its foreign trade, probably $100,000,000 would be spent for that work.

If we are to have adequate overseas outlets for our surplus production, the Government should open its purse strings wide to the Bureau of Foreign and Domestic Commerce, which is the chief, and nearly our only agency looking toward better and better relations for us in overseas trade. I do hope you will bear this matter in mind when the next Budget is under consideration.

Very truly,

WALTER PARKER.

Mr. O'CONNOR of Louisiana. Members of the committee, I could not add to the strength of the statements made in that letter if I attempted to elaborate them. Walter Parker was for years the secretary of the New Orleans Association of Commerce; he was the secretary of the Flood Control Association for many years and was at one time connected with the Department of Commerce. He is looked upon as an unusual economist in the Mississippi Valley and he participates in a great many of the conferences that are held between the peoples of the southern section of the country, Central America, Mexico, and South America. I know it is his view that if there be conflicts among the representatives of our Government in Central America and South America, of course, they ought to be avoided, but from my own personal observations in Mexico, Central America, and that part of South America over which I have traveled, I have come to the conclusion that you can not have too many representatives of this country endeavoring to do propaganda work in behalf of our commerce. We are confronted with tremendous opposition on the part of European countries, particularly those that have cheap labor, and it is essential, in my judgment, to maintain as fine a corps there as possible, of course, endeavoring to obviate all the antagonisms and rivalries which were referred to by the gentleman from Indiana [Mr. WOOD].

Keep in mind, gentlemen, that the future commercial greatness of our country lies on this continent. Canada, Mexico, Central and South America will mean a harvest of gold for the United States during the next half century. Immigration from southern Europe, in view of our immigration laws, will follow the lines of least resistance, as it were, and natural selection. Immigrants from those warm countries around and near the Mediterranean littoral will move to the shores of the Gulf of Mexico and the Caribbean Sea, where there are already a people similar in blood and analogous in habit and custom. With millions of the same people moving farther south to live under the Southern Cross, below the Equator, millions from the British Isles will move northward into the Canadian fields and far above. Let us strengthen our foundations and reinforce our commercial organization so that it can expand with a steady growth.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Indiana [Mr. WOOD].

The question was taken, and the amendment was rejected.

Mr. DICKINSON of Iowa. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15386) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1930, and for other purposes, and had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted as follows:

To Mr. CELLER, for an indefinite period, on account of illness.

To Mr. CLARKE, for 10 days, on account of flu.

To Mr. CULLEN, for an indefinite period, on account of illness.

To Mr. MORGAN, for two days, on account of important business.

HON. CHARLES L. FAUST

Mr. DYER. Mr. Speaker, it is my sad duty to announce to the House the death of my beloved colleague, Congressman CHARLES L. FAUST, who passed away last night. He was one of the most lovable characters we have had in the House, in my judgment, for many years. He was liked and respected by every Member and his death is a very great loss to the House as well as to the splendid constituency which he represented so ably and well for a number of terms.

At a later date, Mr. Speaker, I will ask the House to set aside a day to pay respect to the life and character of my colleague. At this time I offer the resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Missouri offers a resolution, which the Clerk will report.

The Clerk read as follows:

H. Res. 269

Resolved, That the House has heard with profound sorrow of the death of Hon. CHARLES L. FAUST, a Representative from the State of Missouri.

Resolved, That a committee of 19 Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

The SPEAKER. The Chair appoints the following committee:

Mr. DYER, of Missouri; Mr. JOHNSON, of South Dakota; Mr. TIMBERLAKE, of Colorado; Mr. WILLIAMS, of Illinois; Mr. PURNELL, of Indiana; Mr. CHINDBLOM, of Illinois; Mr. DICKINSON, of Iowa; Mr. MANLOVE, of Missouri; Mr. ALLEN, of Illinois; Mr. RAINEY, of Illinois; Mr. HASTINGS, of Oklahoma; Mr. ROMJUE, of Missouri; Mr. MILLIGAN, of Missouri; Mr. CANNON, of Missouri; Mr. RAGON, of Arkansas; Mr. COCHRAN, of Missouri; Mr. NIEDRINGHAUS, of Missouri; Mr. NELSON, of Missouri; and Mr. WILLIAMS, of Missouri.

The Clerk will report the remainder of the resolution.

The Clerk read as follows:

Resolved, That as a further mark of respect, this House do now adjourn.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

ADJOURNMENT

Accordingly (at 4 o'clock and 40 minutes p. m.) the House, in accordance with the resolution heretofore adopted, adjourned until to-morrow, Wednesday, December 19, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Wednesday, December 19, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10 a. m.)

State, Justice, Commerce, and Labor Departments appropriation bill.

COMMITTEE ON PUBLIC BUILDINGS AND PUBLIC GROUNDS

(10.30 a. m.)

Authorizing the erection of a public warehouse for storage of Government supplies and purchase and condemnation of real estate in the District of Columbia (H. R. 8919).

To repeal the provisions of law authorizing the Secretary of the Treasury to acquire a site and building for the United States subtreasury and other governmental offices at New Orleans, La. (H. R. 15468).

COMMITTEE ON IRRIGATION AND RECLAMATION

(10 a. m.)

Providing for the necessary surveys, studies, investigations, and engineering of the Columbia Basin reclamation project (S. 1462).

COMMITTEE ON INDIAN AFFAIRS

(10.30 a. m.)

A meeting of the subcommittee to consider a bill for the relief of J. F. McMurray (H. R. 10741).

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII.

Mr. GRAHAM: Committee on the Judiciary. S. J. Res. 167. A joint resolution limiting the operation of sections 198 and 203 of title 18 of the Code of Laws of the United States; without amendment (Rept. No. 1959). Referred to the House Calendar.

Mr. SPROUL of Kansas: Committee on Indian Affairs. S. 4488. An act declaring the purpose of Congress in passing the act of June 2, 1924 (43 Stat., p. 253), to confer full citizenship upon the Eastern Band of Cherokee Indians, and further declaring that it was not the purpose of Congress in passing the act of June 4, 1924 (43 Stat., p. 376), to repeal, abridge, or modify the provisions of the former act as to the citizenship of said Indians; without amendment (Rept. No. 1960). Referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 8868) for the relief of Samuel Joshua Kolsky; Committee on Claims discharged, and referred to the Committee on Pensions.

A bill (H. R. 15164) granting an increase of pension to Emma Calb; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15165) granting an increase of pension to Carrie Brooks; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15166) granting an increase of pension to Julia O. Allen; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15167) granting an increase of pension to S. Amanda Clark; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15168) granting an increase of pension to Calista Ealy; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15169) granting an increase of pension to Kate Griffith; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15170) granting a pension to Maggie Groves; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15171) granting an increase of pension to Anna Hafey; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15172) granting an increase of pension to Adella Harper; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15173) granting an increase of pension to Elizabeth Heise; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15174) granting an increase of pension to Victoria Huddle; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15175) granting an increase of pension to Mary E. Jaco; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15176) granting an increase of pension to Althear S. Jones; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15177) granting an increase of pension to Carrie Miller; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15178) granting an increase of pension to Laura C. Monfort; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15179) granting an increase of pension to Mary E. Ryerson; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15180) granting an increase of pension to Laura B. Pleukhart; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15181) granting an increase of pension to Adelphia T. Weaver; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15182) granting an increase of pension to Sarah A. Williams; to the Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15247) granting a pension to Matilda Cranmer; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. JOHNSON of Washington: A bill (H. R. 15518) to provide for establishment of an airship base and construction of a hangar and other buildings at Fort Lewis, in the State of Washington; to the Committee on Naval Affairs.

By Mr. BACHMANN: A bill (H. R. 15519) to provide for establishing a country White House; to the Committee on Public Buildings and Grounds.

By Mr. BLACK of New York: A bill (H. R. 15520) to confer jurisdiction on the Court of Claims to certify certain findings of fact, and for other purposes; to the Committee on the Judiciary.

By Mr. BRAND of Georgia: A bill (H. R. 15521) to amend section 5209 of the Revised Statutes of the United States; to the Committee on Banking and Currency.

By Mr. CRAMTON: A bill (H. R. 15522) to extend the civil and criminal laws of the United States to Indians, and for other purposes; to the Committee on Indian Affairs.

Also, a bill (H. R. 15523) authorizing the representatives of the several States to make certain inspections and to investigate State sanitary and health regulations and school attendance on Indian reservations, Indian tribal lands, and Indian allotments; to the Committee on Indian Affairs.

Also, a bill (H. R. 15524) for the acquisition, establishment, and development of the George Washington Memorial Parkway along the Potomac from Mount Vernon and Fort Washington to the Great Falls, and to provide for the acquisition of lands in the District of Columbia and the States of Maryland and Virginia requisite to the comprehensive park, parkway, and playground system of the National Capital; to the Committee on Public Buildings and Grounds.

By Mr. YON: A bill (H. R. 15525) authorizing Thomas E. Brooks, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Garniers Bayou, at or near the point where State Road No. 10 crosses the said Garniers Bayou, in the State of Florida; to the Committee on Interstate and Foreign Commerce.

By Mr. KELLY: A bill (H. R. 15526) for automatic promotions into special clerk grade; to the Committee on the Post Office and Post Roads.

By Mr. O'CONNOR of Louisiana: A bill (H. R. 15527) to amend the act entitled "An act providing for the completion by the Secretary of War of a monument to the memory of the American soldiers who fell in the Battle of New Orleans at Chalmette, La., and making the necessary appropriation therefor," approved March 4, 1907; to the Committee on the Library.

By Mr. HICKEY: A bill (H. R. 15528) to amend the World War adjusted compensation act as amended; to the Committee on Ways and Means.

By Mr. SIROVICH: A bill (H. R. 15529) to establish and operate a national institute of health, to create a system of fellowships in said institute, and to authorize the Government to accept donations for use in ascertaining the cause, prevention, and cure of disease affecting human beings, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BRITTEN: A bill (H. R. 15530) to provide that certain staff officers of the United States Navy shall come under the operation of section 16 of the act of June 10, 1926; to the Committee on Naval Affairs.

By Mr. ANDREW: Joint resolution (H. J. Res. 359) directing and providing for the assembly, inventory, classification, preparation for publication, and publication of the official records and maps relating to the participation of the military and naval forces of the United States in the World War, and authorizing appropriations therefor; to the Committee on Military Affairs.

By Mr. ZIHLMAN: Joint resolution (H. J. Res. 360) entitling all employees of the United States Government in the District of Columbia to pay for Monday, December 24, 1928, the same as any other holiday; to the Committee on Expenditures in the Executive Departments.

By Mr. GRAHAM: Resolution (H. Res. 268) providing for the consideration of sundry bills concerning the appointment of additional district judges in the United States, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDREW: A bill (H. R. 15531) granting a pension to Ellen Noonan; to the Committee on Pensions.

Also, a bill (H. R. 15532) for the relief of Arthur D. Story, assignee of Jacob Story, and Harris H. Gilman, receiver for the Murray & Thregurtha Plant of the National Motors Corporation; to the Committee on Claims.

By Mr. BLAND: A bill (H. R. 15533) to extend the benefits of the employees' compensation act of September 7, 1916, to W. M. Seawell; to the Committee on Claims.

By Mr. BRAND of Ohio: A bill (H. R. 15534) granting a pension to Teresa Matson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15535) granting an increase of pension to Sarah Pearce; to the Committee on Invalid Pensions.

By Mr. CARTWRIGHT: A bill (H. R. 15536) granting a pension to Alice C. Bean; to the Committee on Invalid Pensions.

By Mr. DARROW: A bill (H. R. 15537) granting a pension to William Darrah Kelly Shelmire; to the Committee on Pensions.

By Mr. DOUGLAS of Arizona: A bill (H. R. 15538) granting an increase of pension to Rufus M. Smith; to the Committee on Pensions.

By Mr. EVANS of Montana: A bill (H. R. 15539) granting a pension to Hannah L. Ward; to the Committee on Invalid Pensions.

By Mr. FREE: A bill (H. R. 15540) for the relief of William D. Grush; to the Committee on Military Affairs.

By Mr. FREEMAN: A bill (H. R. 15541) granting an increase of pension to Sarah E. Wells; to the Committee on Invalid Pensions.

By Mr. GIFFORD: A bill (H. R. 15542) granting a pension to George C. Dyer; to the Committee on Invalid Pensions.

By Mr. HARE: A bill (H. R. 15543) for the relief of W. Fred Lightsey; to the Committee on the Post Office and Post Roads.

By Mr. HAWLEY: A bill (H. R. 15544) granting a pension to Mrs. A. E. Harvey; to the Committee on Invalid Pensions.

By Mr. JOHNSON of Indiana: A bill (H. R. 15545) granting a pension to Josie Runyan; to the Committee on Invalid Pensions.

By Mr. LOWREY: A bill (H. R. 15546) granting a pension to Mary E. Beaty; to the Committee on Invalid Pensions.

By Mr. MAPES: A bill (H. R. 15547) granting a pension to William J. Dunn; to the Committee on Pensions.

By Mr. McCORMACK: A bill (H. R. 15548) for the relief of Frank J. Powers; to the Committee on Military Affairs.

By Mr. MOORE of Kentucky: A bill (H. R. 15549) granting a pension to Alice Bunnell; to the Committee on Invalid Pensions.

By Mr. NORTON of Nebraska: A bill (H. R. 15550) granting a pension to Elizabeth M. Juett; to the Committee on Invalid Pensions.

By Mr. O'BRIEN: A bill (H. R. 15551) granting an increase of pension to Sarah Mick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15552) granting an increase of pension to Charles W. Camp; to the Committee on Pensions.

By Mr. PURNELL: A bill (H. R. 15553) granting an increase of pension to Grover Colter; to the Committee on Pensions.

By Mr. RAINEY: A bill (H. R. 15554) granting a pension to Napoleon B. Greathouse; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15555) granting an increase of pension to Carl L. Austin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15556) granting an increase of pension to Zack Pullium; to the Committee on Pensions.

Also, a bill (H. R. 15557) granting an increase of pension to Ellen McFarland; to the Committee on Pensions.

By Mr. RANSLEY: A bill (H. R. 15558) granting a pension to Alice Virginia Parsons; to the Committee on Invalid Pensions.

By Mr. ROBINSON of Iowa: A bill (H. R. 15559) granting an increase of pension to Martha C. Sharp; to the Committee on Invalid Pensions.

By Mr. ROBSION of Kentucky: A bill (H. R. 15560) granting a pension to Robert C. Brown; to the Committee on Pensions.

By Mr. SPEAKS: A bill (H. R. 15561) to correct the military record of Lawrence Fisher; to the Committee on Military Affairs.

Also, a bill (H. R. 15562) for the relief of Anna E. Stratton; to the Committee on Military Affairs.

By Mr. TARVER: A bill (H. R. 15563) for the relief of Nannie White; to the Committee on Claims.

Also, a bill (H. R. 15564) granting an increase of pension to Octavia Evans; to the Committee on Pensions.

By Mr. TAYLOR of Tennessee: A bill (H. R. 15565) granting a pension to William R. Campbell; to the Committee on Invalid Pensions.

By Mr. TREADWAY: A bill (H. R. 15566) granting an increase of pension to Nellie A. R. Sykes; to the Committee on Invalid Pensions.

By Mr. YON: A bill (H. R. 15567) granting a pension to Martha Owens; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

8045. By Mr. CULLEN: Resolutions unanimously adopted by the board of directors of the Maritime Association of the Port of New York, that as the refusal of the Shipping Board to pay brokerage commissions operates against the old-established and necessary business of ship brokers, while in effect subsidizing another, the coal industry, this association earnestly protests against this discrimination as between industries, and urges the adoption by the United States Shipping Board of a policy equally fair to all interests concerned; to the Committee on the Merchant Marine and Fisheries.

8046. By Mr. GARBER: Letter from Standard Tilton Milling Co., urging favorable consideration of House bill 15267, to amend the tariff act of 1922; to the Committee on Ways and Means.

8047. Also, petition of the Regan Safety Devices Co. (Inc.), with clippings inclosed from the New York Times and the

New York Sun, Sunday, December 9, 1928, dealing with the recent decision of the Interstate Commerce Commission not to compel further installations of automatic train control on the railroads of the country; to the Committee on Interstate and Foreign Commerce.

8048. Also, petition of the Chamber of Commerce of the United States of America, in support of House bill 13793, designed to bring about the legalization of residence of certain aliens in this country; to the Committee on Immigration and Naturalization.

8049. Also, petition of the Illinois Valley Protective Association, urging support of Senate bill 4689 and House bill 14116, providing for Federal loans to refinance the bond issues placed upon land in the Illinois Valley for reclamation purposes; to the Committee on Irrigation and Reclamation.

8050. Also, petition of Lewis, Folsom & Murdock, attorneys at law, Chicago, Ill., representing persons and firms opposing the passage of House bill 10958, to amend the definition of oleomargarine; to the Committee on Agriculture.

8051. Also, petition of W. A. Hays & Son, Blackwell, Okla., urging the fixing of a tariff duty on cement; to the Committee on Ways and Means.

8052. By Mr. KINDRED: Petition of the Cigarmakers International Union, No. 87, of Queens County, Brooklyn, N. Y., opposing the passage of House bill 9195, Cuban parcel post bill, amending sections 2804 and 3402 of the Revised Statutes; to the Committee on Ways and Means.

8053. By Mr. O'CONNOR of New York: Resolutions adopted by the board of directors of the Maritime Association of New York, protesting against refusal of the United States Shipping Board to pay brokerage commissions on coal fixtures; to the Committee on the Merchant Marine and Fisheries.

8054. By Mr. YATES: Petition of Capt. W. L. Blanton, captain Nineteenth Infantry, protesting Senate bill and House bill (by Mr. McSWAIN) which seek to change the promotion list; to the Committee on Military Affairs.

8055. Also, petition of Philip M. Tucker, of Boston, Mass., urging adequate protection against attack, especially aerial; to the Committee on Military Affairs.

8056. Also, petition of the Chicago Wholesale Fish and Oyster Dealers' Association (Inc.), urging passage of House Joint Resolution 303 (which has already passed the Senate), known as the Hoch-Smith resolution, to give reduced transportation costs to all farm products and products of fisheries; to the Committee on Interstate and Foreign Commerce.

8057. Also, petition of First National Bank, of Ziegler, Ill., advocating continuance of national bank currency, the only exclusive privilege left to national banks, which State banks can not exercise; to the Committee on Banking and Currency.

8058. Also, petition of Alden, Latham & Young, attorneys, Chicago, Ill., urging passage of Senate bill 3623, to amend section 204 of the transportation act of 1920, the purpose of the amendment being to permit the district supreme court to review conclusions of law of the Interstate Commerce Commission on questions arising under that section; to the Committee on Ways and Means.

8059. Also, petition of Maguire & Voorhis, Orlando, Fla., urging a term of the United States court, southern district of Florida, at Orlando; to the Committee on the Judiciary.

8060. Also, petition of Cigar Makers Union, No. 114, of Jacksonville, Ill., by L. Hoffman, secretary, and R. May, president, protesting, by order of the union at a meeting held December 10, against House bill 9195, which, if passed, would open the doors to thousands of Cuban-made cigars free of duty; to the Committee on Ways and Means.

8061. Also, petition of the Railway Mail Association, Chicago, Ill., Elkhart Branch, urging passage of Dale retirement bill (S. 1727) and La Follette 44-hour bill (S. 3281); also Kelly postal policy bill; to the Committee on the Post Office and Post Roads.

8062. Also, petition of Galesburg Branch of Railway Mail Association, of Galesburg, Ill., by H. E. Ross, president, urging passage of Senate bill 3281; to the Committee on the Post Office and Post Roads.

8063. Also, petition of Hon. James Hamilton Lewis and partners, by George N. Murdock, 112 Adams Street, Chicago, protesting against House bill 10958, purporting to amend the definition of oleomargarine, introduced by Mr. HAUGEN, and favorably reported by the Committee on Agriculture; to the Committee on Agriculture.

8064. Also, petition of Warrensburg Canning Co., of Warrensburg, Ill., protesting against House bill 5773, the Boulder Dam project; to the Committe on Irrigation and Reclamation.

SENATE

WEDNESDAY, *December 19, 1928*

(Legislative day of Monday, December 17, 1928)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

The message communicated to the Senate the intelligence of the death of Hon. CHARLES L. FAUST, late a Representative from the State of Missouri, and transmitted the resolutions of the House thereon; and also announced that pursuant to the resolutions the Speaker had appointed a committee of 19 Members of the House, with such Members of the Senate as may be joined, to attend the funeral of the deceased Representative, as follows:

Representatives DYER, of Missouri; JOHNSON, of South Dakota; TIMBERLAKE, of Colorado; WILLIAMS, of Illinois; PURNELL, of Indiana; CHINDBLOM, of Illinois; DICKINSON, of Iowa; MANLOVE, of Missouri; ALLEN, of Illinois; RAINEY, of Illinois; HASTINGS, of Oklahoma; ROMJUE, of Missouri; MILLIGAN, of Missouri; CANNON, of Missouri; RAGON, of Arkansas; COCHRAN, of Missouri; NIEDRINGHAUS, of Missouri; WILLIAMS, of Missouri; and NELSON, of Missouri.

ENROLLED BILLS SIGNED

The message announced that the Speaker had affixed his signature to the following enrolled bill and joint resolution, and they were signed by the Vice President:

H. R. 14801. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes; and

H. J. Res. 352. Joint resolution for the relief of Porto Rico.

CREDENTIALS

Mr. McLEAN presented the credentials of FREDERIC C. WALCOTT, chosen a Senator from the State of Connecticut for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

STATE OF CONNECTICUT,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on November 6, 1928, FREDERIC C. WALCOTT was duly chosen by the qualified electors of the State of Connecticut a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1929.

Witness: His Excellency our Governor, John H. Trumbull, and our seal hereto affixed at Hartford, this 30th day of November, A. D. 1928.

JOHN H. TRUMBULL, *Governor.*
[SEAL.] FRANCIS A. PALLOTTI, *Secretary.*

Mr. WAGNER presented the credentials of ROYAL S. COPELAND, chosen a Senator from the State of New York for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

STATE OF NEW YORK, *ss:*

We, the attorney general, State senators, and members of assembly, constituting the State board of canvassers, having canvassed and estimated the whole number of votes given for the office of United States Senator at the general election held in said State on the 6th day of November, 1928, according to the certified statements of the said votes received by the secretary of state, in the manner directed by law, do hereby determine, declare, and certify that ROYAL S. COPELAND was, by the greatest number of votes given at the said election, duly elected United States Senator of the said State.

Given under our hands, at the department of state, in the city of Albany, the 11th day of December, A. D. 1928.

ALBERT OTTINGER, *Attorney General.*
BERNARD DOWNING, *State Senator.*
RUSSELL G. DUNMORE, *Member of Assembly.*
MAURICE BLOCH, *Member of Assembly.*

STATE OF NEW YORK,
Department of State, ss:

I certify that I have compared the foregoing with the original certificate filed in this office, and that the same is a correct transcript therefrom and of the whole of such original.

Given under my hand and seal of office, at the city of Albany, this 11th day of December, 1928.

[SEAL.] ROBERT MOSES,
Secretary of State.

Mr. TYSON presented the credentials of KENNETH MCKELLAR, chosen a Senator from the State of Tennessee for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

STATE OF TENNESSEE,
DEPARTMENT OF STATE.

To the honorable PRESIDENT OF THE UNITED STATES SENATE,
Washington, D. C.:

This is to certify that at the regular biennial general election held on the 6th day of November, 1928, the Hon. KENNETH MCKELLAR received 175,329 votes, and his opponent, the Hon. James Fowler, received 120,259 votes.

Mr. MCKELLAR, having received a majority of the votes cast in said election, is duly and constitutionally elected to the office of United States Senator for the State of Tennessee for a term of six years, beginning March 4, 1929.

In witness whereof I have hereto affixed my signature and the great seal of the State, at Nashville, this 17th day of December, A. D. 1928.

HENRY H. HORTON, *Governor.*
[SEAL.] E. N. HASTON,
Secretary of State.

Mr. NYE presented the credentials of LYNN J. FRAZIER, chosen a Senator from the State of North Dakota for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

CERTIFICATE OF ELECTION

STATE OF NORTH DAKOTA.

At an election held on the 6th day of November, 1928, LYNN J. FRAZIER was duly elected to the office of United States Senator of the State of North Dakota for the term of six years, commencing the 4th day of March, 1929.

Given at Bismarck this 4th day of December, 1928.

WALTER MADDOCK, *Governor.*
[SEAL.] ROBERT BRYNE,
Secretary of State.

Attest:

C. A. FISHER,
Member of the State Board of Canvassers.

PETITIONS

Mr. KEYES presented a petition of sundry citizens of Manchester, N. H., praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

He also presented a resolution adopted by the Woman's Foreign Missionary Society, of Lisbon, N. H., favoring the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

Mr. VANDENBERG presented numerous petitions of sundry citizens and civic and religious organizations in the State of Michigan, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

Mr. BINGHAM presented a petition of faculty members of the Hartford Seminary Foundation, of Hartford, Conn., praying for the adoption of the so-called Gillett resolution suggesting a further exchange of views relative to the World Court, which was referred to the Committee on Foreign Relations.

He also presented petitions of sundry citizens of Hartford, Rockville, and Sharon, all in the State of Connecticut, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which were ordered to lie on the table.

He also presented a resolution adopted by the New Haven (Conn.) Branch, American Association of University Women, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

He also presented a letter in the nature of a petition from members of the First Church of Christ, Scientist, of Honolulu, Hawaii, praying for the prompt ratification of the so-called Kellogg multilateral treaty for the renunciation of war, which was ordered to lie on the table.

Mr. HARRISON presented numerous petitions of sundry citizens of Amory, Quincy, Tupelo, Potts Camp, New Albany, Winborn, Myrtle, Columbus, Byhalia, Miller, Nettleton, Red Banks, Sherman, Olive Branch, Hickory Flat, Aberdeen, Gatman, and Holly Springs, all in the State of Mississippi, praying for the passage of legislation regulating the interstate transportation of freight and passengers by busses, trucks, automobiles, or similar vehicles, which were referred to the Committee on Interstate Commerce.

Mr. REED of Pennsylvania presented a resolution adopted by Protestant Boys Loyal Orange Lodge, No. 136, of Ellwood City, Pa., favoring the passage of legislation establishing immigration quotas for Canada and Mexico, and requiring the registration of all aliens, the deportation of aliens illegally in the country, and the prompt application of the national-origins provision of the present immigration law, which was referred to the Committee on Immigration.

GEORGIA COTTON CROP

Mr. HEFLIN. Mr. President, I send to the desk a telegram, which I ask to have the clerk read.

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

ATLANTA, GA., *December 18, 1928.*

United States Senator T. J. HEFLIN,
Washington, D. C.:

Final report on Georgia cotton crop this year compiled by Georgia Department of Agriculture, 961,241 bales; final Federal report for Georgia, 1,020,000. According to the records of the Georgia Department of Agriculture the Federal bureau overestimated the Georgia cotton crop 58,759 bales. The largest estimate of the Federal department on the Georgia cotton crop was released October 8. The peak of marketing this estimate for Georgia was 1,060,000 bales. If the Federal bureau has overestimated the crop in other States as has been done in Georgia, Senator HEFLIN, of Alabama, is very conservative in his statement that the crop for the entire Cotton Belt has been overestimated 500,000 bales.

EUGENE TALMADGE,
Commissioner of Agriculture.

MULTILATERAL TREATY

Mr. BORAH. Mr. President, from the Committee on Foreign Relations I report back for the Executive Calendar what is known as the multilateral treaty. At the same time I am directed to report, without recommendation, a resolution which will also go to the Executive Calendar.

The VICE PRESIDENT. The treaty and resolution will be placed on the Executive Calendar.

REPORTS OF COMMITTEES

Mr. SMITH, from the Committee on Agriculture and Forestry, to which was referred the joint resolution (S. J. Res. 182) for the relief of farmers in the storm and flood stricken areas of southeastern United States, reported it with an amendment.

Mr. SHIPSTEAD, from the Committee on Printing, to which was referred the bill (S. 5022) to amend sections 183 and 184, of chapter 6 of title 44, of the United States Code, approved June 30, 1926, relative to the printing and distribution of the CONGRESSIONAL RECORD, reported it without amendment.

ENROLLED BILLS PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that to-day that committee presented to the President of the United States the following enrolled bills:

S. 3776. An act to authorize the Secretary of the Interior to issue patents for lands held under color of title;

S. 3844. An act amending the fraternal beneficial association law for the District of Columbia as to payment of death benefits; and

S. 4127. An act to provide for the appointment of an additional justice of the Supreme Court of the District of Columbia, and for other purposes.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. COPELAND:

A bill (S. 5025) providing an appropriation for the reconditioning of the frigate *Constitution;* to the Committee on Appropriations.

A bill (S. 5026) granting a pension to Joseph L. Hadden; and

A bill (S. 5027) granting a pension to Bertram C. Hayner; to the Committee on Pensions.

By Mr. DILL:

A bill (S. 5028) granting a pension to Thomas Mortimer Buist; to the Committee on Pensions.

By Mr. FESS:

A bill (S. 5029) to authorize the unification of carriers engaged in interstate commerce, and for other purposes; to the Commfttee on Interstate Commerce.

By Mr. JOHNSON:

A bill (S. 5030) for the relief of Eva Broderick; to the Committee on Claims.

By Mr. TRAMMELL:

A bill (S. 5031) for the relief of Florence P. Hampton; to the Committee on Claims.

By Mr. SMOOT:

A bill (S. 5032) to consolidate certain forest lands within the Cache National Forest, and for other purposes; to the Committee on Public Lands and Surveys.

By Mr. KING:

(By request.) A bill (S. 5033) to authorize the Secretary of the Interior to regulate the use of public lands for grazing, and for other purposes; to the Committee on Public Lands and Surveys.

A bill (S. 5034) to authorize the erection of a Veterans' Bureau hospital in the State of Utah; to the Committee on Finance.

By Mr. PINE:

A bill (S. 5035) granting a pension to Rosetta Barnes; to the Committee on Pensions.

By Mr. TYDINGS:

A bill (S. 5036) authorizing Cornelius V. Roe, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Patapsco River at or near or south of Lazaretto Point, Baltimore, Md., and a point opposite thereto in Baltimore, Md.; to the Committee on Commerce.

By Mr. VANDENBERG:

A bill (S. 5037) to provide for a preliminary examination and survey of Grand Haven Harbor, Ottawa County, Mich.; to the Committee on Commerce.

By Mr. RANSDELL:

A bill (S. 5038) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near Baton Rouge, La.; to the Committee on Commerce.

By Mr. DENEEN:

A bill (S. 5039) to extend the times for commencing and completing the construction of a bridge across the Wabash River at Mount Carmel, Ill.; to the Committee on Commerce.

PROPOSED SITE FOR SUPREME COURT BUILDING

Mr. CARAWAY. Mr. President, I ask permission to place in the RECORD a compilation which has been made by members of the Women's Party. They went through two years of a contest involving the condemnation of some property they owned. Mrs. Burnita Shelton Matthews, an attorney, and Miss Maud Younger have made a very helpful compilation of procedure under the present practice and a discussion of what would be the procedure if the new bill in contemplation should be passed. I ask unanimous consent that the compilation may be referred to the Committee on Public Buildings and Grounds and printed in the RECORD.

There being no objection, the paper was referred to the Committee on Public Buildings and Grounds and ordered to be printed in the RECORD, as follows:

SUMMARY OF CONDEMNATION LAW AND COMPARISON WITH PROPOSED CHANGES IN BILL BEFORE SENATE; CONDEMNATION BILL NOW BEFORE SENATE H. R. 13461

(Passed House in closing hour of last session. Opposition to bill was heard by only one Member of the House, chairman of subcommittee of District of Columbia Committee)

PRESENT LAW	PROPOSED LAW
When the Treasury asks the Department of Justice to institute condemnation proceedings for the acquisition of certain property the following steps ensue:	Provides in greater detail for notice and citation, but does not change order nor shorten proceedings. It is in this period that the greatest delay occurs in condemnation proceedings. For instance:
Search of title.	In March, 1927, the Treasury turned the Supreme Court site over to the Department of Justice for condemnation. It was not until January 3, 1928, that the property owners appeared in court as cited.
Application of Government to court for condemnation.	
Citation of property owners to appear in court and notice thereof in newspapers.	
Property owners appear in court in answer to citation.	
From here on proceedings differ between present and proposed law.	
Jurors chosen.	Government takes over property upon payment into court of assessed valuation.
Jurors view site.	Jurors chosen.
Hearings for taking of testimony to determine compensation.	Jurors view site.
Jurors revisit site to check up on contradictory testimony.	Hearings for taking of testimony to determine compensation.
Awards made.	(No opportunity to revisit site to check up, as property destroyed.)
Property paid for.	Awards made (same status as Court of Claims judgment).
Government gets possession.	

JURORS

Three jurors.	Five jurors.

JURORS VIEW SITE

In Supreme Court site the jurors viewed the property—	Property would be vacant and in possession of Government when viewed by jurors before hearings.
1. Before the hearing began.	There could be no second view after taking of testimony as property would be destroyed. The evidence would be gone.
2. After all the evidence was in, in order to check up on contradictory testimony.	

TRIAL

Three jurors sit as commission without judge.	Five jurors sit with judge.

AWARD

Payment of award before taking of property.	Award takes same status as judgment rendered by Court of Claims, with 6 per cent interest paid on difference between award and assessed valuation.
With the Government desiring possession of property, the Government urges the appropriation upon Congress.	Property owners secure appropriation for judgment.

VALUATION

As at time of award.	As at time of filing declaration of taking when such declaration is filed.

APPEAL

If award is unsatisfactory, new trial with commission of seven may be had for the asking.	Provision for appeal more complicated and expensive, with greater delay.

OBJECTIONS TO PROPOSED LAW

1. Destruction of evidence when the Government takes the property before the trial begins. For instance:

In the condemnation of square 350 and squares 727 and 728, Government witnesses testified to such inaccuracies as: That a building was four stories when it was five; that there was no steel structure in a building; that there was no garage on a property; no basement in a house, etc., etc.

With the Government taking the property and destroying the evidence before proceedings are over, it would be impossible to disprove such testimony.

2. Taking of property upon assessed valuation: The assessment is not a criterion of value and is inadmissible in condemnation trials. The assessment is not fixed by the property owner as in some States, but the assessor alone puts on the assessment.

While shortly before the condemnation of square 350 the assessor raised valuation to as high as $30 a foot, the assessed valuation in the Supreme Court site has in some instances not been changed for 25 years.

Where a person's livelihood centers in a single piece of property the taking of this property at the assessed valuation would work a great hardship.

For instance, a property was assessed at $16,000 which had a mortgage of $16,000. From this property, where the owner herself lives, she supports herself and three children by renting apartments. If this proposed bill becomes a law, the $16,000 paid by the Government would go to satisfy the mortgage and she would be turned out of her home and income until the final award was made.

3. Award same status as Court of Claims judgment: To pay this judgment, the property owners—not the Government—would have to secure the appropriation from Congress.

An appropriation urged by private individuals would have less standing than an appropriation urged by the Government.

Congress has been known to cut down judgment of Court of Claims by appropriating only one-half of the amount.

To secure payment of judgment individuals have sometimes waited for years.

4. Provision for new trial and appeal more complicated and expensive with greater delay.

REASONS FOR NEW LAW STATED BY PROPONENTS OF BILL

1. Confusion through having no judge present at trial.	Opponents to bill agree that law should be amended on these two points.
2. Cutting down of trees or other mutilation of property by owners thus impairing value to Government.	Opponents point out that as to delay, this bill does not deal with the greatest sources of delay but only with court proceedings.
3. Delay in acquiring property.	In the Supreme Court case, the trial consumed only 7 months out of a total of 30 months.

WHERE THE DELAY COMES IN—STEPS IN SUPREME COURT SITE CONDEMNATION

May, 1926: Congress authorized acquisition of a site.

November, 1926: Building commission selected site.

February, 1927: Congress made appropriation.

March, 1927: Department of Justice received case. (Ten months' delay not dealt with in bill.) Treasury turned case over to them to begin condemnation proceedings.

January 3, 1928: The trial began. Property owners in answer to citation appeared in court and panel for jury ordered. (It is only here that the proposed law begins to operate.)

February 21, 1928: Jurors appointed.

March 28, 1928: Hearings began. They consumed 4 months in all; but owing to recess of 10 weeks in summer they did not end until October 27.

This was an unusually long case with 74 separate properties. Hearings in Printing Office case took only a few weeks.

DELAY IN TRIAL AND SUGGESTED REMEDY

1. Selection of jurors: In Supreme Court case, it required 4 panels and 7 weeks to select 3 men.

Time could be saved if jurors were chosen—1 by the people; 1 by the Department of Justice, and 1 by the court, as is sometimes done.

2. Jurors customarily sit afternoons only from 1.30 to 4.30 in some condemnations four afternoons a week—in some five.

Time could be saved if they would sit mornings also (payment is $5 a day).

3. Jurors do not know law, and much wrangling goes on between the lawyers, for Department of Justice and for the people.

Time could be saved if a judge sat with jurors.

4. Time could also be saved without any change of law if the Department of Justice attorneys would try to expedite matters instead of dragging them out.

DELAY IN BUILDING PROGRAM

A great deal of time could be saved in the whole building program without change of law if condemnation trials were held simultaneously instead of stringing them out one after another. This would mean employing a number of lawyers for a brief period instead of one lawyer indefinitely; thus no additional expense need be involved. All Federal condemnation cases here are conducted by a Mr. Glassie with two assistants. At the present time one trial is in progress while three others must wait trial until the Glassie trio can get to them. There are besides numerous other condemnation projects in which even the first steps have not been taken. It is obvious that the great and unnecessary delay in acquiring property through condemnation is due to the policy of the representatives of the Government and not to the law itself.

TO SAVE MONEY AS WELL AS TIME

It would save the Government money as well as time if its representatives would make a sincere effort to negotiate before proceeding to condemnation. The property owners in the Supreme Court site were unable to obtain from the Treasury any indication as to what the Government would be willing to pay for their property. In a number of instances property owners received awards higher than the prices they were willing to accept by negotiation.

A REASON WHY PROPONENTS MIGHT WANT THIS BILL—NOT STATED BY THEM BUT UNDERSTANDABLE

To-day the Department of Justice has all the other departments of Government on its trail urging them to make speed with their special condemnation cases—"Pestering the life out of us," said one official. If this bill should become law, the Department of Justice could take the property and turn it over to them a little sooner and avoid that much "pestering."

PRISON-MADE GOODS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

Mr. GOFF resumed the speech begun by him on yesterday. After having spoken for 15 minutes,

Mr. BINGHAM. Mr. President——

The PRESIDING OFFICER (Mr. ODDIE in the chair). Does the Senator from West Virginia yield to the Senator from Connecticut?

Mr. GOFF. I yield.

Mr. BINGHAM. It seems to me that there ought to be more Senators listening to this argument on the constitutionality of the pending bill, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Bruce	Dill	Glenn
Barkley	Burton	Edge	Goff
Bayard	Capper	Edwards	Gould
Bingham	Caraway	Fess	Greene
Black	Copeland	Fletcher	Hale
Blease	Couzens	Frazier	Harris
Borah	Curtis	George	Harrison
Brookhart	Dale	Gerry	Hawes
Broussard	Deneen	Glass	Hayden
Heflin	Neely	Shipstead	Tydings
Johnson	Nye	Shortridge	Tyson
Jones	Oddie	Simmons	Vandenberg
Kendrick	Pine	Smith	Wagner
Keyes	Pittman	Smoot	Walsh, Mass.
King	Ransdell	Steck	Walsh, Mont.
La Follette	Reed, Mo.	Steiwer	Warren
Larrazolo	Reed, Pa.	Stephens	Waterman
McKellar	Robinson, Ind.	Swanson	Watson
McLean	Sackett	Thomas, Idaho	Wheeler
McNary	Schall	Thomas, Okla.	
Moses	Sheppard	Trammell	

Mr. SHEPPARD. I wish to announce that my colleague the junior Senator from Texas [Mr. MAYFIELD] is absent from the Senate due to illness.

Mr. BINGHAM. On behalf of the junior Senator from South Dakota [Mr. MCMASTER] I desire to state that he is detained at home by illness. I should like to have this announcement stand for the day.

Mr. LA FOLLETTE. I was requested to announce that the Senator from Nebraska [Mr. NORRIS] and the Senator from Wisconsin [Mr. BLAINE] are detained on official business of the Senate in connection with work of the Judiciary Committee.

The PRESIDING OFFICER. Eighty-two Senators having answered to their names, a quorum is present. The Senator from West Virginia will proceed.

Mr. GOFF. Mr. President, as I was stating at the recess period yesterday, the bill before us, Senate 1940, is a bill aimed at suppressing the competition of goods made in penal institutions with like goods made by free labor in the United States. The principles of constitutional law involved are not new. They have been set forth by the Supreme Court of the United States time and time again. A review of those decisions in their chronological order will serve the purpose of presenting to the Senate the unconstitutional features which appear in the proposed enactment.

It is frankly admitted by the proponents of the measure that it follows the so-called Wilson Act. That act provided—

> That intoxicating liquors transported into any State or remaining therein for use, consumption, sale, or storage, shall, upon arrival in such State, be subject to the operations and the effect of the laws of such States to the same extent and in the same manner as though such liquors had been produced in such State, and they shall not be exempt therefrom by reason of being introduced in original packages or otherwise.

The Wilson Act appeared in the Supreme Court under the names of In re Rahrer and is found in volume 140 of the United States Reports at page 545. The Supreme Court in reviewing this act held it constitutional, and in order that there may be a clear understanding of the decision it is important to consider the issue presented and the question to which the Supreme Court addressed itself.

It was not claimed in the Wilson Act that Congress did not possess the power to regulate or even to prohibit entirely, if it saw fit, the interstate commerce shipment of intoxicating liquor. On the contrary, such a power was assumed. It was urged against the constitutionality of the act that Congress could not delegate its own conceded powers nor enlarge by delegation the powers of a State, and that the act in question was an attempt to do both.

The question before the court is thus stated in the opinion:

> It does not admit of argument that Congress can neither delegate its own powers nor enlarge those of a State. This being so, it is urged that the act of Congress can not be sustained as a regulation of commerce, because the Constitution, in the matter of interstate commerce, operates ex proprio vigore as a restraint upon the power of Congress to so regulate it as to bring any of its subjects within the grasp of the police power of the State. In other words, it is earnestly contended that the Constitution guarantees freedom of commerce among the States in all things, and that not only may intoxicating liquors be imported from one State into another, without being subject to regulation under the laws of the latter, but that Congress is powerless to obviate that result.

The opinion, then, takes up this argument at length, points out its fallacies, and rejects it. That is the sole extent to which the opinion went. It did not, either expressly or by implication, discuss or set forth the basis upon which rested the power of Congress to regulate and to prohibit the interstate movement of intoxicating liquors. That, as we shall see, was left to subsequent decisions.

That case was followed by the lottery case, Champion *v.* Ames (188 U. S. 321). The act prohibiting interstate shipment of lottery tickets was declared constitutional.

The court first addresses itself to the question whether the carrying of lottery tickets from one State to another constitutes commerce among the States, and holds that it does. It

then addresses itself to the objection that the power of Congress, under the commerce clause, is limited to regulation and does not include prohibition, and that the act in question, being a prohibition and not a mere regulation, was not within the power of Congress. In the course of its opinion on this point the court says, at pages 355 to 356:

In determining whether regulation may not under some circumstances properly take the form or have the effect of prohibition, the nature of the interstate traffic which it was sought by the act of May 2, 1895, to suppress can not be overlooked. When enacting that statute Congress no doubt shared the views upon the subject of lotteries heretofore expressed by this court. In Phalen *v.* Virginia (8 How. 163, 168), after observing that the suppression of nuisances injurious to public health or morality is among the most important duties of government, this court said: "Experience has shown that the common forms of gambling are comparatively innocuous when placed in contrast with the widespread pestilence of lotteries. The former are confined to a few persons and places, but the latter infests the whole community; it enters every dwelling; it reaches every class; it preys upon the hard earnings of the poor; it plunders the ignorant and simple."

In subsequent parts of the opinion, the court refers repeatedly to the "pollution" of commerce by the carrying of lottery tickets, to the harm done to public morals thereby, to the fact that they are "confessedly injurious to the public morals," to lotteries as "an evil of such appalling character," and to the sale of lottery tickets as "a kind of traffic which no one can be entitled to pursue as of right." It then points out "that regulation may sometimes appropriately assume the form of prohibition," and as an illustration in point cites In re Rahrer (140 U. S. 545), saying at page 362:

We have in the Rahrer case a recognition of the principle that the power of Congress to regulate interstate commerce may sometimes be exerted with the effect of excluding particular articles from such commerce.

The court concludes its opinion with the following statements, pages 362 to 364:

It is said, however, that if, in order to suppress lotteries carried on through interstate commerce, Congress may exclude lottery tickets from such commerce, that principle leads necessarily to the conclusion that Congress may arbitrarily exclude from commerce among the States any article, commodity, or thing, of whatever kind or nature, or however useful or valuable, which it may choose, no matter with what motive, to declare shall not be carried from one State to another. It will be time enough to consider the constitutionality of such legislation when we must do so. The present case does not require the court to declare the full extent of the power that Congress may exercise in the regulation of commerce among the States. We may, however, repeat, in this connection, what the court has heretofore said, that the power of Congress to regulate commerce among the States, although plenary, can not be deemed arbitrary, since it is subject to such limitations or restrictions as are prescribed by the Constitution. This power, therefore, may not be exercised so as to infringe rights secured or protected by that instrument. It would not be difficult to imagine legislation that would be justly liable to such an objection as that stated, and be hostile to the objects for the accomplishment of which Congress was invested with the general power to regulate commerce among the several States.

It is apparent from the foregoing quotation that the court had clearly in mind the fact that it was dealing with articles which are in themselves a menace to public morals and that it did not thereby commit itself to the proposition that enactments prohibiting, restricting, or regulating interstate commerce in articles which are in themselves harmless and innocuous would be within the power of Congress under the commerce clause.

That decision was followed by the white-slave traffic case, Hoke *v.* United States (227 U. S. 308). The act was held to be constitutional, the court saying in the course of its opinion:

But an objection is made and urged with earnestness. It is said that it is the right and privilege of a person to move between States, and that such being the right, another can not be made guilty of the crime of inducing or assisting or aiding in the exercise of it, and "that the motive or intention of the passenger, either before beginning the journey, or during or after completing it, is not a matter of interstate commerce." The contentions confound things important to be distinguished. It urges a right exercised in morality to sustain a right to be exercised in immorality. It is the same right which attacked the law of Congress which prohibits the carrying of obscene literature and articles designed for indecent and immoral use from one State to another. (29 Stat. 512, ch. 172; U. S. Comp. Stat., 1901, p. 3180; United States *v.* Popper, 98 Fed. 423.) It is the same right which was excluded as an element as affecting the constitutionality of the act for the suppression of lottery traffic through national and interstate commerce. Lottery case, Champion *v.* Ames (188 U. S. 321, 357, 47 L. ed. 492, 501, 23 Sup. Ct. Rep. 321, 13 Am. Crim. Rep. 561). It is the right given for beneficial exercise which is attempted to be perverted to and justify baneful exercise, as in the instances stated, and which finds further illustration in Reid *v.* Colorado (187 U. S. 137; 47 L. ed. 108; 23 Sup. Ct. Rep. 92; 12 Am. Crim. Rep. 506). This constitutes the supreme fallacy of plaintiffs' error. It pervades and vitiates their contentions.

And further—

* * * if the facility of interstate transportation can be taken away from the demoralization of lotteries, the debasement of obscene literature, the contagion of diseased cattle or persons, the impurity of food and drugs, the like facility can be taken away from the systematic enticement to and the enslavement in prostitution and debauchery of women, and, more insistently, of girls.

We have thus a clear statement of the reason why the court held the various enactments there considered as a proper exercise of the power of Congress under the commerce clause. Those acts regulated or prohibited interstate commerce in articles of merchandise that were in and of themselves and as articles of merchandise injurious and harmful to the users or consumers of them; for example, lottery tickets used for gambling, obscene literature, articles designed for indecent and immoral use, cattle suffering from contagious disease, impure and adulterated foods and drugs, women and girls enticed for prostitution and debauchery.

The next case was Clark Distilling Co. *v.* Western Maryland Railway Co. (242 U. S. 311). The question before the court was the constitutionality of the Webb-Kenyon Act entitled, "An act divesting intoxicating liquors of their interstate character in certain cases." By that act the shipment or transportation of intoxicating liquors from one State into another to be received, possessed, sold, or in any manner used either in the original package or otherwise in violation of any law of such latter State was prohibited.

It is important to note the express reasons given by the court for its holdings and the arguments which were advanced against constitutionality.

The power of Congress to regulate and to prohibit entirely the shipment of all intoxicating liquors in interstate commerce was fully conceded. The only objection to the constitutionality of the act was an alleged want of power in Congress to adopt the particular method of regulation which it resorted to, in that Congress submitted intoxicating liquors to the control of the States by subjecting interstate commerce in such liquors to present and future State prohibitions. The court said in that part of its opinion in which it dealt with the power of Congress under the commerce clause to enact the law:

It is not in the slightest degree disputed that if Congress had prohibited the shipment of all intoxicants in the channels of interstate commerce and therefore had prevented all movement between the several States, such action would have been lawful because within the power to regulate which the Constitution conferred. (Lottery Case, 188 U. S. 321; Hoke *v.* United States, 227 U. S. 308.)

The court thus expressly states, what was taken for granted and assumed In re Rahrer, that Congress had the power to prohibit entirely the shipment of intoxicating liquors in interstate commerce. The cases cited in support of the statement are significant, namely, the Lottery Case and the White-Slave Traffic Case. The power to regulate and prohibit was held to be based upon the injurious quality of the article of merchandise whose movement in interstate commerce is regulated or prohibited. The court then continues:

The issue, therefore, is not one of an absence of authority to accomplish in substance a more extended result than that brought about by the Webb-Kenyon law but of a want of power to reach the result accomplished because of the method resorted to for that purpose. This is certain, since the sole claim is that the act was not within the power given to Congress to regulate because it submitted liquors to the control of the States by subjecting interstate commerce in such liquors to present and future State prohibitions, and hence in the nature of things was wanting in uniformity.

Then followed the court's discussion of the constitutionality of the act; and the court said:

In view of the conceded power on the part of Congress to prohibit the movement of intoxicants in interstate commerce, we can not admit that because it did not exert its authority to the full limit, but simply regulated to the extent of permitting the prohibitions in one State to prevent the use of interstate commerce to ship liquor from another State, Congress exceeded its authority to regulate.

And, again:

The two things are widely different, since the right to regulate and its scope and the mode of exertion must depend upon the power pos-

sessed by Congress over the subject regulated. Following the unerring path pointed out by that great principle we can see no reason for saying that, although Congress, in view of the nature and character of intoxicants, had a power to forbid their movement in interstate commerce, it had not the authority to so deal with the subject as to establish a regulation (which is what was done by the Webb-Kenyon law) making it impossible for one State to violate the prohibitions of the laws of another through the channels of interstate commerce. Indeed, we can see no escape from the conclusion that if we accepted the proposition urged we would be obliged to announce the contradiction in terms that because Congress had exerted a regulation lesser in power than it was authorized to exert, therefore its action was void for excess of power.

The court was not unmindful of the fact that its decision might be misconstrued and perverted into the claim that Congress was vested with the power to regulate interstate commerce in any and all articles of merchandise, of whatsoever kind they might be, whether in themselves harmful or innocuous. It therefore concluded its opinion with the following very explicit warning and restatement of the ground of its decision:

Before concluding, we come to consider what we deem to be arguments of inconvenience which are relied upon—that is, the dread expressed that the power by regulation to allow State prohibitions to attach to the movement of intoxicants lays the basis for subjecting the interstate commerce in all articles to State control, and therefore destroys the Constitution. The want of force in the suggested inconvenience becomes patent by considering the principle which after all dominates and controls the question here presented—that is, the subject regulated and the extreme power to which that subject may be subjected. The fact that regulations of liquor have been upheld in numberless instances which would have been repugnant to the great guaranties of the Constitution but for the enlarged right possessed by the Government to regulate liquor has never, that we are aware of, been taken as affording the basis for the thought that the Government might exert an enlarged power as to subjects to which under the constitutional guaranties such enlarged power could not be applied. In other words, the exceptional nature of the subject here regulated is the basis upon which the exceptional power exerted must rest, and affords no ground for any fear that such power may be constitutionally extended to things which it may not, consistently with the guaranties of the Constitution, embrace.

Thus clearly and emphatically the power of Congress to regulate and prohibit the interstate shipment of intoxicating liquors is based upon "the exceptional nature" of intoxicating liquors as injurious and deleterious articles in and of themselves.

Mr. President, we have in these cases a clear statement of the reasons why these various enactments were considered a valid exercise of the power of Congress under the commerce clause. These acts regulated or prohibited interstate commerce in articles of merchandise that were in and of themselves injurious and harmful. At this stage of the discussion I emphasize the fact that all of the articles which have been the subject of interstate-commerce interdiction were inherently vicious and harmful in and of themselves. They were not articles free of inherent defects. They were articles that possessed, in and of themselves, the essence of harm. They were articles which if misused would produce a deleterious effect not only upon commerce but upon the morality of the people in the States to which they were transported.

In all such matters Congress is clearly the judge. Congress, however, is required to exercise a sound and a reasonable discretion in the light of the Constitution and in the light of the decisions of the Supreme Court interpreting the Constitution. Congress had before it, as stated yesterday, in all these matters at the very threshold in limine, so to speak: Is the exercise of this constitutional power under the given circumstances reasonable, and is it a justifiable exercise of such power?

Mr. WATERMAN. Mr. President, will the Senator yield?

Mr. GOFF. Certainly.

Mr. WATERMAN. I should like to ask a question as to the limit of this discretion on the part of Congress.

Mr. GOFF. The limit of this discretion is that it must be a reasonable exercise of power over an article which may be essentially and inherently harmful in and of itself. If the article is not so, then the exercise of an interdicting power over such an article that possesses inherently none of the evil qualities suggested by the Senator from Colorado would in effect be a delegation of that power to some State whose exercise of the police power might be assisted or justified by such an action by Congress.

Mr. WATERMAN. There must be a limit to that discretion somewhere finally. To what will the Supreme Court limit it in the event a discretion is exercised by the Congress which is not, in the Senator's opinion or mine, within the discretion of the Congress?

Mr. GOFF. The Supreme Court will limit that discretion solely by the rule whether or not the exercise of the power is justified under all of the facts and circumstances in the case.

Mr. WATERMAN. But will it not be limited strictly within the police powers of the State, or, upon the other hand, by the inherent vice or lack of it in the article which is in interstate commerce?

Mr. GOFF. That is undoubtedly a determining factor which I discussed a moment ago, and it is the fact that the article so transported is inherently vicious, or that it can be used in interstate commerce for vicious and immoral and unlawful and deleterious purposes. If it can be, then, of course, the Congress has the right so to exercise this power, but, as I shall show in the next decision to which reference will be made, if the article sought to be interdicted possesses none of these inherent vicious disqualifications then the Congress will not assume, and has no authority under the decisions of the Supreme Court to exercise, the great power of interdicting the shipment of such matters in interstate commerce.

Mr. WATERMAN. If the Senator will permit, these bills both purport to divest goods, wares, and merchandise of their interstate character. If the pending bill becomes a law, and their interstate character has been divested lawfully, constitutionally, then they cease to be matters of interstate commerce entirely, do they not?

Mr. GOFF. That is correct; absolutely.

The next case passed upon by the Supreme Court was Hammer *v.* Dagenhart (247 U. S. 251). The question for consideration was the constitutionality of the child labor act prohibiting the shipment or delivery for shipment in interstate commerce of any article or commodity the product of any mill, cannery, workshop, factor, or manufacturing establishment in which children under the age of 14 years had been employed or permitted to work, or children between the ages of 14 and 16 years of age had been employed or permitted to work more than eight hours in any day or more than six days in any week or after the hour of 7 p. m. or before the hour of 6 a. m.

Here for the first time it was sought to regulate interstate commerce in articles of merchandise, not because of the nature, quality, or uses to which such articles might be applied, but solely because of the places in which such articles were made or manufactured and the kind of labor employed in such places. As between two articles, for example, hats, of identical nature, quality, and use, but one made in a factory where children under 14 years of age were employed or children between 14 and 16 years of age were employed more than eight hours in any day or more than six days in any week, or after 7 p. m. or before 6 a. m., and the other not made in such a factory, Congress attempted to regulate interstate commerce in the former but not in the latter, and thereby to discriminate between them solely because of the difference in their respective origin of manufacture.

The act was declared unconstitutional.

The court puts the question at issue, as follows:

The controlling question for decision is: Is it within the authority of Congress in regulating commerce among the States to prohibit the transportation in interstate commerce of manufactured goods the product of a factory in which, within 30 days prior to their removal therefrom, children under the age of 14 have been employed or permitted to work, or children between the ages of 14 and 16 years have been employed or permitted to work more than eight hours in any day or more than six days in any week, or after the hour of 7 o'clock p. m. or before the hour of 6 o'clock a. m.?

The court said:

The power essential to the passage of this act the Government contends is found in the commerce clause of the Constitution which authorizes Congress to regulate commerce with foreign nations and among the States.

In Gibbons *v.* Ogden (9 Wheat. 1) Chief Justice Marshall, speaking for this court, and defining the extent and nature of the commerce power, said: "It is the power to regulate; that is, to prescribe the rule by which commerce is to be governed." In other words, the power is one to control the means by which commerce is carried on, which is directly the contrary of the assumed right to forbid commerce from moving and thus destroy it as to particular commodities. But it is insisted that adjudged cases in this court establish the doctrine that the power to regulate given to Congress incidentally includes the authority to prohibit the movement of ordinary commodities, and therefore that the subject is not open for discussion. The cases demonstrate the contrary. They rest upon the character of the particular subject dealt with and the fact that the scope of governmental authority, State or National, possessed over them is such that the authority to prohibit is as to them but the exertion of the power to regulate.

The court said:

The first of these cases is Champion *v.* Ames (188 U. S. 321), the so-called Lottery case, in which it was held that Congress might pass a law having the effect to keep the channels of commerce from use in the transportation of tickets used in the promotion of lottery schemes. In Hipolite Egg Co. *v.* United States (220 U. S. 45) this court sustained the power of Congress to pass the pure food and drug act which prohibited the introduction into the States by means of interstate commerce of impure foods and drugs. In Hoke *v.* United States (227 U. S. 308) this court sustained the constitutionality of the so-called white slave traffic act, whereby the transportation of a woman in interstate commerce for the purpose of prostitution was forbidden. In that case we said, having reference to the authority of Congress, under the regulatory power, to protect the channels of interstate commerce:

"If the facility of interstate transportation can be taken away from the demoralization of lotteries, the debasement of obscene literature, the contagion of diseased cattle or persons, the impurity of foods and drugs, the like facility can be taken away from any other act that is inherently vicious or deleterious."

Mr. President, in view of these decisions and in the light of the questions propounded by the Senator from Colorado, Congress assumed that it had the right to interdict any article from interstate-commerce shipments which, in its judgment and discretion, seemed to relate to the economic or the commercial progress of any given State. In other words, Congress in this very act goes to the extent to which many of the States have gone in their invasion of the commercial and the economic field, and in which they have violated the provisions of the fourteenth amendment to the United States Constitution in attempting to exercise and in fact exercising the so-called police power of the State, a power reserved to the States, because it was not delegated to the Federal Government in the Constitution of the United States. They have invaded the rights of private property, and taken property without due process of law, as that phrase is used and interpreted in the fourteenth amendment of the United States Constitution. Here, in this child labor act, as it is so called, Congress saw fit to say that if a product has in it the exertion, the brain, and the muscle of children under a certain age, if factories and mines and mills have employed therein children between certain hours—yes, even if a father or a mother had permitted their children so to labor in a mine, on their farm, or plantation—then the product of their labor, if I might so term it, the product of their association, is interdicted and prohibited from the channels of interstate commerce.

If this child labor law, Mr. President, had been sustained as constitutional, then the Congress of the United States could have passed a law that if the State of Ohio should employ its labor more than five hours a day, it could not ship the products of that labor in interstate commerce, or that if the State of New York should employ its labor in the nighttime and not in the daylight, it would be contrary to the conception of Congress, and that the products of such labor might be denied the right of shipment in interstate commerce.

The Supreme Court of the United States met the issue, met it as that great court always meets the problem, met it with that clear vision and accurate solution that has always characterized the ultimate expression of opinion by that interpretative judicial body, the greatest in the world. Here for the first time this question was raised, and the Supreme Court said:

The act is clearly unconstitutional.

In Caminetti *v.* United States (242 U. S.) the court said:

We reiterated only recently this view and this opinion.

Then the court said:

The power conferred is to regulate, and the very terms of the grant would seem to repel the contention that only prohibition of movement in interstate commerce was embraced.

But, said the court, concluding the discussion which sustained the authority of the Government to prohibit; and I would ask the Senator from Colorado to pay particular attention to the paragraph which I now read from the decision:

It is the exceptional nature of the subject here regulated which is the basis upon which the exceptional power exerted must rest and affords no ground for any fear that such power may be constitutionally extended to things that it may not, consistently within the guarantees of the Constitution, embrace.

Mr. WATERMAN. Does that not drive the Senator to the conclusion that for the Congress to limit its action in divesting articles of the character of interstate commerce, the article of interstate commerce must be of a kind or character which can be driven out of interstate commerce, outlawed, if you please, not articles which must pass in interstate commerce free and untrammelled?

Mr. GOFF. Exactly; I agree with that conclusion without any reservation.

The court continued as follows in the Dagenhart case:

In Caminetti *v.* United States (242 U. S. 47), we held that Congress might prohibit the transportation of women in interstate commerce for the purposes of debauchery and kindred purposes. In Clark Distilling Co. *v.* Western Maryland Ry. Co. (242 U. S. 311), the power of Congress over the transportation of intoxicating liquors was sustained. In the course of the opinion it was said:

"The power conferred is to regulate, and the very terms of the grant would seem to repel the contention that only prohibition of movement in interstate commerce was embraced. And the cogency of this is manifest since if the doctrine were applied to those manifold and important subjects of interstate commerce as to which Congress from the beginning has regulated, not prohibited, the existence of government under the Constitution would be no longer possible."

And, concluding the discussion which sustained the authority of the Government to prohibit the transportation of liquor in interstate commerce, the court said:

"* * * the exceptional nature of the subject here regulated is the basis upon which the exceptional power exerted must rest and affords no ground for any fear that such power may be constitutionally extended to things which it may not, consistently with the guaranties of the Constitution, embrace."

In each of these instances the use of interstate transportation was necessary to the accomplishment of harmful results. In other words, although the power over interstate transportation was to regulate, that could only be accomplished by prohibiting the use of the facilities of interstate commerce to effect the evil intended.

This element is wanting in the present case. The thing intended to be accomplished by this statute is the denial of the facilities of interstate commerce to those manufacturers in the States who employ children within the prohibited ages. The act in its effect does not regulate transportation among the States, but aims to standardize the ages at which children may be employed in mining and manufacturing within the States. The goods shipped are of themselves harmless. The act permits them to be freely shipped after 30 days from the time of their removal from the factory. When offered for shipment and before transportation begins the labor of their production is over, and the mere fact that they were intended for interstate-commerce transportation does not make their production subject to Federal control under the commerce power.

Commerce "consists of intercourse and traffic * * * and includes the transportation of persons and property, as well as the purchase, sale, and exchange of commodities." The making of goods and the mining of coal are not commerce, nor does the fact that these things are to be afterwards shipped or used in interstate commerce, make their production a part thereof. (Delaware, Lackawanna & Western R. R. Co. *v.* Yorkonis, 238 U. S. 439.)

Over interstate transportation, or its incidents, the regulatory power of Congress is ample, but the production of articles, intended for interstate commerce, is a matter of local regulation.

"When the commerce begins is determined, not by the character of the commodity, nor by the intention of the owner to transfer it to another State for sale, nor by his preparation of it for transportation, but by its actual delivery to a common carrier for transportation, or the actual commencement of its transfer to another State." (Mr. Justice Jackson in In re Green, 52 Fed. Rep. 113.) This principle has been recognized often in this court; Coe *v.* Errol, 116 U. S. 517; Bacon *v.* Illinois, 227 U. S. 504; and cases cited. If it were otherwise all manufacture intended for interstate shipment would be brought under Federal control to the practical exclusion of the authority of the States, a result certainly not contemplated by the framers of the Constitution when they vested in Congress the authority to regulate commerce among the States. (Kidd *v.* Pearson, 128 U. S. 1, 21.)

The court then continues in language which fits the facts of the instant case and the arguments advanced in support of the constitutionality of the instant bill to a nicety. I continue to quote:

It is further contended that the authority of Congress may be exerted to control interstate commerce in the shipment of child-made goods because of the effect of the circulation of such goods in other States where the evil of this class of labor has been recognized by local legislation, and the right to thus employ child labor has been more rigorously restrained than in the State of production. In other words, that the unfair competition, thus engendered, may be controlled by closing the channels of interstate commerce to manufacturers in those States where the local laws do not meet what Congress deems to be the more just standard of other States.

There is no power vested in Congress to require the States to exercise their notice power so as to prevent possible unfair competition. Many causes may cooperate to give one State, by reason of local laws or conditions, an economic advantage over others. The commerce clause was not intended to give to Congress a general authority to equalize such conditions. In some of the States laws have been passed fixing

minimum wages for women, in others the local law regulates the hours of labor of women in various employments. Business done in such States may be at an economic disadvantage when compared with States which have no such regulation; surely, this does not give Congress the power to deny transportation in interstate commerce to those who carry on business where the hours of labor and the rate of compensation for women have not been fixed by a standard in use in other States and approved by Congress.

The grant of power to Congress over the subject of interstate commerce was to enable it to regulate such commerce, and not to give it authority to control the States in their exercise of the police power over local trade and manufacture.

The grant of authority over a purely Federal matter was not intended to destroy the local power always existing and carefully reserved to the States in the tenth amendment to the Constitution.

Answering the argument that Congress should aid in placing limitations upon the right to employ children in mines and factories, the court says:

That there should be limitations upon the right to employ children in mines and factories in the interest of their own and the public welfare, all will admit. That such employment is generally deemed to require regulation is shown by the fact that the brief of counsel states that every State in the Union has a law upon the subject, limiting the right to thus employ children. In North Carolina, the State wherein is located the factory in which the employment was had in the present case, no child under 12 years of age is permitted to work.

It may be desirable that such laws be uniform, but our Federal Government is one of enumerated powers. "This principle," declared Chief Justice Marshall in McCulloch *v.* Maryland (4 Wheat. 316), "is universally admitted."

A statute must be judged by its natural and reasonable effect. Collins *v.* New Hampshire (171 U. S. 30, 33, 34). The control by Congress over interstate commerce can not authorize the exercise of authority not intrusted to it by the Constitution. (Pipe Line Cases, 234 U. S. 548, 560.)

And it adds:

To sustain this statute would not be, in our judgment, a recognition of the lawful exertion of congressional authority over interstate commerce but would sanction an invasion by the Federal power of the control of a matter purely local in its character and over which no authority has been delegated to Congress in conferring the power to regulate commerce among the States.

The opinion concludes with the following language:

In our view the necessary effect of this act is, by means of a prohibition against the movement in interstate commerce of ordinary commercial commodities, to regulate the hours of labor of children in factories and mines within the States, a purely State authority. Thus the act in a twofold sense is repugnant to the Constitution. It not only transcends the authority delegated to Congress over commerce but also exerts a power as to a purely local matter, to which the Federal authority does not extend. The far-reaching result of upholding the act can not be more plainly indicated than by pointing out that if Congress can thus regulate matters intrusted to local authority by prohibition of the movement of commodities in interstate commerce, all freedom of commerce will be at an end and the power of the States over local matters may be eliminated, and thus our system of government be practically destroyed.

The following principles, implicit in the previous decisions of the court, are thus given explicit statement and recognition:

First. The lottery act, the pure food and drugs act, the white slave traffic act, the Wilson Act, and the Webb-Kenyon Act were held to be within the commerce clause and therefore constitutional only because of the exceptional nature of the subjects there regulated.

Second. Where the goods whose interstate movement is sought to be regulated are themselves ordinary and harmless commercial commodities and the regulation is based upon and directed against the manner, method, place or origin of manufacture, or the class of labor by which manufactured, the enactment is not a valid exercise of the power over interstate commerce.

Third. The manufacture of goods, even though intended for interstate shipment, is not commerce, and the regulation of the manufacture of such goods is not, therefore, a regulation of commerce.

Fourth. It is not within the power of Congress under the guise of regulating commerce to control alleged or actual unfair competition between articles produced by one class of labor and identical articles produced by another class of labor.

Fifth. It is not within the power of Congress under the guise of regulating commerce to equalize the economic conditions obtaining in one State for the manufacture of goods with the economic conditions obtaining in another State.

The principles thus clearly enunciated in Hammer against Dagenhart were reiterated in the child-labor tax case, Bailey *v.* Drexel Furniture Co. (259 U. S. 20). The Supreme Court there declared unconstitutional the act imposing a tax on the net income of a person employing child labor. Said Chief Justice Taft in that opinion:

The case before us can not be distinguished from that of Hammer *v.* Dagenhart (247 U. S. 251; 38 Sup. Ct. 529, 62 L. Ed. 1101; 3 A. L. R. A. 649; Ann. Cas. 1918, E. 724). Congress there enacted a law to prohibit transportation in interstate commerce of goods made at a factory in which there was employment of children within the same ages and for the same number of hours a day and days in a week as are penalized by the act in this case. This court held the law in that case to be void. It said:

"In our view the necessary effect of this act is, by means of a prohibition against the movement in interstate commerce of ordinary commercial commodities, to regulate the hours of labor of children in factories and mines within the States, a purely State authority."

In the case at the bar Congress, in the name of a tax which on the face of the act is a penalty, seeks to do the same thing, and the effort must be equally futile.

The analogy of the Dagenhart case is clear. The congressional power over interstate commerce is, within its proper scope, just as complete and unlimited as the congressional power to tax, and the legislative motive in its exercise is just as free from judicial suspicion and inquiry. Yet when Congress threatened to stop interstate commerce in ordinary and necessary commodities, unobjectionable as subjects of transportation, and to deny the same to the people of a State in order to coerce them into compliance with Congress's regulation of State concerns, the court said this was not in fact regulation of interstate commerce, but rather that of State concerns and was invalid. So here the so-called tax is a penalty to coerce people of a State to act as Congress wishes them to act in respect of a matter completely the business of the State government under the Federal Constitution. This case requires, as did the Dagenhart case, the application of the principle announced by Chief Justice Marshall in McCulloch *v.* Maryland (4 Wheat. 316, 423, 4 L. Ed. 579) in a much-quoted passage:

"Should Congress, in the execution of its powers, adopt measures which are prohibited by the Constitution, or should Congress, under the pretext of executing its powers, pass laws for the accomplishment of objects not intrusted to the Government, it would become the painful duty of this tribunal, should a case requiring such a decision come before it, to say that such an act was not the law of the land."

The last decision of the Supreme Court is Brooks *v.* United States (267 U. S. 432). The court there held constitutional an act declaring it a crime to transport in interstate commerce a stolen motor vehicle with knowledge that it was stolen. The opinion was again written by Chief Justice Taft, and his historical review of the prior decisions and of the reasons why in each cited case an act had been declared constitutional or unconstitutional is illuminating. To quote therefrom:

In Reid *v.* Colorado (167 U. S. 137, 47 L. Ed. 108; 23 Sup. Ct. Rep. 506) it was held that Congress could pass a law excluding diseased stock from interstate commerce in order to prevent its use in such a way as thereby to injure the stock of other States. In the Lottery case, Champion *v.* Ames (188 U. S. 321, 47 L. Ed. 492; 23 Sup. Ct. Rep. 321; 13 Am. Crim. Rep. 561), it was held that Congress might pass a law punishing the transmission of lottery tickets from one State to another in order to prevent the carriage of those tickets to be sold in other States and thus demoralize, through a spread of the gambling habit, individuals who were likely to purchase. In the Hipolite Egg Co. *v.* United States (220 U. S. 45, 55 L. Ed. 364; 31 Sup. Ct. Rep. 364) it was held that it was within the regulatory power of Congress to punish the transportation in interstate commerce of adulterated articles which if sold in other States from the one from which they were transported would deceive or injure persons who purchased such articles. In Hoke *v.* United States (227 U. S. 308, 57 L. Ed. 523; 43 L. R. A. (N. S.) 906; 33 Sup. Ct. Rep. 281; Ann. Cas. 1913E, 905) and Caminetti *v.* United States (242 U. S. 470, 61 L. Ed. 442; L. R. A. 1917F, 502; 37 Sup. Ct. Rep. 192; Ann. Cas. 1917B, 1168) the so-called white slave traffic act, which was construed to punish any person engaged in enticing a woman from one State to another for immoral ends, whether for commercial purposes or otherwise, was valid because it was intended to prevent the use of interstate commerce to facilitate prostitution or concubinage and other forms of immorality. In Clark Distilling Co. *v.* Western Maryland Railway Co. (242 U. S. 311, 61 L. Ed. 326; L. R. A. 1917B, 1218; 37 Sup. Ct. Rep. 180; Ann. Cas. 1917B, 845) it was held that Congress had power to forbid the introduction of intoxicating liquors into any State in which their use was prohibited in order to prevent the use of interstate commerce to promote that which was illegal in the State. In Weber *v.* Freed (239 U. S. 325, 60 L. Ed. 308; 36 Sup. Ct. Rep. 131; Ann. Cas. 1916C, 317) it was held that Congress had power to prohibit the importation of pictorial representations of prize fights designed for public exhibition because of the demoralizing effect of such exhibitions in the State of destination.

In Hammer *v.* Dagenhart (247 U. S. 251, 62 L. ed. 1101; 3 A. L. R. 649; 38 Sup. Ct. Rep. 529; Ann. Cas. 1918E, 724), it was held that

a Federal law forbidding the transportation of articles manufactured by child labor in one State to another was invalid because it was really not a regulation of interstate commerce, but a congressional attempt to regulate labor in the State of origin by an embargo on its external trade. Articles made by child labor and transported into other States were harmless, and could be properly transported without injuring any person who either bought or used them. In referring to the cases already cited, upon which the argument for the validity of the child labor act was based, this court pointed out that in each of them the use of interstate commerce had contributed to the accomplishment of harmful results to people of other States, and that the congressional power over interstate transportation in such cases could only be effectively exercised by prohibiting it. The clear distinction between authorities first cited and the child labor case leaves no doubt where the right lies in this case. It is known of all men that the radical change in transportation of persons and goods effected by the introduction of the automobile, the speed with which it moves, and the ease with which evil-minded persons can avoid capture, have greatly encouraged and increased crimes. One of the crimes which has been encouraged is the theft of the automobiles themselves, and their immediate transportation to places remote from homes of the owners. Elaborately organized conspiracies for the theft of automobiles and the spiriting them away into some other State and their sale or other disposition far away from the owner and his neighborhood have roused Congress to devise some method for defeating the success of these widely spread schemes of larceny. The quick passage of the machines into another State helps to conceal the trail of the thieves, gets the stolen property into another police jurisdiction, and facilitates the finding of a safer place in which to dispose of the booty at a good price. This is a gross misuse of interstate commerce. Congress may properly punish such interstate transportation by anyone with knowledge of the theft because of its harmful result and its defeat of the property rights of those whose machines, against their will, are taken into other jurisdictions.

I submit that it is the clear rule deducible from these decisions that the power of Congress to regulate or prohibit under the commerce clause of the Constitution has been sustained in those cases, and in those cases only, where the article whose interstate shipment is regulated or prohibited is such that the article of merchandise is in and of itself harmful, injurious, or tainted with immorality or crime, and that this power of Congress does not extend to the regulation or prohibition of the transportation in interstate commerce of articles which in themselves are harmless and innocuous, ordinary commercial commodities, the objection to which is based solely upon the source of origin or the manner of manufacture or the class of labor by which manufactured in the State or place of origin.

It has been sought to create a superficial seeming of resemblance between the bill under consideration and the Wilson Act by borrowing the language of the latter and inserting it in the former. The apologists who seek to defend the instant bill because it is clothed in the form of an act which has been held constitutional forget that it is not the form of the act which makes it constitutional or unconstitutional, but the substance and reality behind the act. The Supreme Court declared the Wilson Act constitutional, not because it made interstate shipments of intoxicating liquor subject to the law of the State into which such liquor was transported but in spite of that fact. The court declared that act constitutional because Congress had unlimited power to regulate and even prohibit interstate shipments of intoxicating liquor and it deduced the power to subject an interstate shipment of such liquor to the law of the State of delivery from the broader power to regulate and even prohibit generally. All that it held was that the particular rule or method of regulation adopted was not itself obnoxious to the constitutional objection urged, to wit, that Congress had thereby delegated its power to the States and so enlarged the powers of the States. It held that the mere subjecting of an interstate shipment to the local law of the State of delivery did not render an enactment unconstitutional if it was otherwise constitutional. So, subjecting had no bearing on the constitutionality of the enactment and was immaterial and irrelevant from a consideration of constitutional principles. It was no bar to constitutionality. No more is it a guaranty of or argument for constitutionality. That must be determined by other considerations.

Not even the most partisan and blinded advocates of congressional legislation directed against goods made in penal and reformatory institutions any longer assert that Congress has the power to prohibit all interstate shipment of such goods. Bills so providing were, indeed, introduced many years ago but failed of serious consideration because their constitutionality was gravely doubted even then. That was before the Supreme Court had spoken on the Webb-Kenyon Act, the child labor act, and the various other acts referred to supra. The Supreme Court has since spoken repeatedly, each time with growing emphasis and clearness. The warning which concluded its opinion on the Webb-Kenyon Act was applied and carried into execution in its decision on the child labor act. Since the last-mentioned decision the supporters of this particular type of legislation have refrained from urging any bill prohibiting interstate commerce in such goods. They have fallen back on the Hawes-Cooper bill, modeled in verbiage upon the Wilson Act. But they overlook the vital fact that the principle is the same. Congress has the power to regulate interstate commerce in an article by subjecting it to the law of the State into which it is shipped or by forbidding its shipment into a State which prohibits its use or sale only where Congress has the power to regulate interstate commerce in that article. The question is not of the extent of the power but of its existence. Granted that the power exists its extent is ample, even to total prohibition. There is no difference in constitutional principle between total prohibition, partial prohibition, and lesser regulation, such as subjecting the article to the law of particular States. The power to accomplish the latter exists only where a like power exists to accomplish the former. Congress had the power to pass the Wilson Act subjecting interstate shipments of intoxicating liquors to the laws of the States into which such liquors were shipped, and later to pass the Webb-Kenyon Act, prohibiting interstate shipments of intoxicating liquors into States which forbade the use or sale of such liquors only because Congress had general regulating power over interstate shipments of such liquors, even to the extent, if it had seen fit to exercise it, of prohibiting all such liquors from interstate shipment entirely.

That power was based upon the nature and character of intoxicating liquors as being in and of themselves injurious and harmful. On the other hand, Congress did not have the power to prohibit interstate shipment of the products of child labor, because those products are in and of themselves perfectly harmless and innocuous. For precisely the same reasons that it lacked the power to prohibit entirely interstate shipment of those products it lacks the power to prohibit interstate shipment thereof into States which themselves prohibit child labor or to limit or regulate the interstate shipment thereof.

There is no more authority in Congress to control interstate commerce in goods made in penal and reformatory institutions because of the effect of the circulation of such goods in other States where the alleged evil of this class of labor has been recognized by local legislation, or to control the alleged unfair competition thus engendered, than there is to control interstate commerce in goods made in institutions employing child labor. The fact that Congress may deem the State-use system to be more just than the contract-labor system or the public-account system does not vest it with power or authority to further the former or discourage the latter through the guise of a law purporting to be enacted under the power to regulate interstate commerce. Such a law is not a regulation of commerce, but a regulation of manufacture in the State of origin, and therefore beyond the power of Congress.

There is no power vested in Congress to require the States to exercise their police power so as to prevent possible unfair competition, which is the avowed purpose of this bill. The commerce clause was not intended to give to Congress a general authority to equalize the economic conditions under which goods are manufactured in the different States.

In populous States like New York and Pennsylvania where there is a large demand for articles used in State institutions, it may well be feasible and economical to confine the labor of prisoners to articles to be used exclusively by their State institutions. There are so many hats, so many boots and shoes, so many desks used in those institutions that it may well be worth while for each of those States to establish a hat factory, a boot and shoe factory, and a desk factory to supply that need exclusively, and a certain number of prisoners may be given continuous employment in each of those factories and so learn a useful trade. But in smaller States, like Rhode Island, Connecticut, Vermont, and New Hampshire, the situation is quite different. All the boots and shoes used in Rhode Island State institutions in a year could be made by a few of its prisoners in a week. The establishment of a boot and shoe factory in one of its penal institutions is therefore neither practical nor economical. And the same difficulty confronts that State in attempting to confine the sale of any product of its penal and reformatory institutions to the use of its own public institutions. To provide labor for its prisoners it must employ them in the manufacture of articles that can be disposed of in general commerce.

It is therefore not at all surprising, that although representatives of the States of New York and Pennsylvania favor the pending bill because those States have nothing to lose and perhaps something to gain by its enactment, representatives of the penal institutions of such States as Rhode Island, Connecticut,

Vermont, New Hampshire, and West Virginia are bitterly opposed to it. It discriminates in favor of the more populous States against the smaller ones, the most vicious form of discrimination from a constitutional standpoint. It enables 13 of the States to keep out from their borders, or what is in effect the same, to subject to prohibitive enactments, articles manufactured and having their origin in the other 35 States, not because those articles are in themselves harmful or deleterious, but because they are manufactured by a class of labor that the 13 States do not approve of.

As the Supreme Court said of the employment of child labor, it may be desirable that State laws affecting the labor of inmates of penal and reformatory institutions should be uniform. But a uniformity which would work to the advantage of the larger States and to the disadvantage of the smaller is a uniformity that does not work both ways. It is for the latter as well as for the former to decide whether to adopt such uniformity. It is in no event within the authority of Congress to coerce them into such adoption under the guise of a law passed under the power to regulate interstate commerce. For the authority of Congress is one of enumerated powers only.

> The control by Congress over interstate commerce can not authorize the exercise of authority not intrusted to it by the Constitution—

And—

> to sustain this statute would not be a recognition of the lawful exertion of congressional authority over interstate commerce but would sanction an invasion by the Federal power of the control of a matter purely local in its character and over which no authority has been delegated to Congress in conferring the power to regulate commerce among the States.

The necessary effect of this bill would be, by means of a pretended regulation of the movement in interstate commerce of ordinary commercial commodities, to regulate the manufacture of those commodities in State penal and reformatory institutions, a purely State authority. It would therefore be repugnant to the Constitution in a twofold sense. It would not only transcend the authority delegated to Congress over commerce but would also exert a power as to a purely local matter to which the Federal authority does not extend.

The proposed legislation is therefore obviously unconstitutional.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER (Mr. COUZENS in the chair). Does the Senator from West Virginia yield to the Senator from California?

Mr. GOFF. I yield.

Mr. SHORTRIDGE. Before the Senator passes from a consideration of these particular decisions of the Supreme Court permit me to observe that, of course, Congress is in duty bound to be guided by them if we fully understand them or the rule or principle they announce.

I am not questioning the remarks of the learned Senator in respect to any particular decision. But before turning from them I would beg to have it remembered by the Senate that the first decision in the child-labor case was by a very evenly divided court—5 to 4. The dissenting judges were Justices Holmes, McKenna, Brandeis, and Clark.

Will the Senator permit me to refer to another matter to which I hope he will devote attention before he shall have concluded? I invite his and the Senate's attention to section 307 of the tariff act of 1922. That section reads:

> That all goods, wares, articles, and merchandise manufactured wholly or in part in any foreign country by convict labor shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited, and the Secretary of the Treasury is authorized and directed to prescribe such regulations as may be necessary for the enforcement of this provision.

I cite that section of the tariff act and propound this question, to be answered if the Senator deems the question worthy of reply. Is that section of the tariff act constitutional?

Mr. GOFF. Mr. President, I shall answer at the present time the questions propounded by the distinguished Senator from California. It is true that the child-labor case was decided by a divided court. I treat, in the development of law and legislation, the vote in favor of such law or such legislation as purely an incident when the law has been made effective either in the Halls of Congress or through any other branch of the judicial department of the Government. What difference does it make as to the validity of any law whether it passes overwhelmingly in a legislative body or whether it passes by a bare majority? It is the law of the land and the fact that a minority may have dissented therefrom becomes purely immaterial. We observe the law because under our democratic form of government it is the majority, the concurrent, concentrated wisdom of the greater number, that seeks the right road and the right way down the road.

When we come to the decisions of the Supreme Court of the United States, the fact that there is a difference of opinion there makes all the more for the validity of the decision, which is rendered by the majority. When it becomes the decision of the court it is in subsequent decisions, if the issue recurs, reaffirmed, and as a general rule the justices who vigorously dissented in the first decision are among those who do—and they should if they do not—concur in what is unquestionably the law of the land. We had, of course, the second child-labor case, just discussed, and when that case came up there was not one dissenting opinion.

Mr. SHORTRIDGE. The Senator will be good enough to bear in mind that in a few words I expressed substantially the sentiments which he has just now uttered, namely, that we were in duty bound to follow and observe a decision of the Supreme Court. We may be concerned as to the scope and the meaning of that decision and we may be further concerned as to whether a given proposed act of Congress falls within the condemnation of the decision.

Mr. WATERMAN. Mr. President——

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). Does the Senator from West Virginia yield to the Senator from Colorado?

Mr. GOFF. I yield.

Mr. WATERMAN. The Senator from California has injected a suggestion in connection with the tariff law. I presume he and the Senator who has the floor will both admit that in matters of foreign commerce the Congress of the United States is untrammeled and unfettered and can prohibit anything from coming in, and it speaks by authority of its sovereign power and not by or through the limitations of a police power. So that whatever it may have put into a tariff act, it was put there by an exercise of an absolute sovereign power. Is not that true?

Mr. GOFF. That is correct.

Mr. SHORTRIDGE. Mr. President, will the Senator permit me once more to interrupt him?

The PRESIDING OFFICER. Does the Senator from West Virginia yield to the Senator from California?

Mr. GOFF. Certainly.

Mr. SHORTRIDGE. I did not express an opinion in regard to this matter, but in immediate reply to my learned friend from Colorado, where does Congress have the power to legislate in respect of commerce, either foreign or domestic? I am not expressing an opinion, but I am throwing out these thoughts for perhaps future consideration. The power to legislate upon the subject of commerce, we have been told by the Senator from West Virginia, is found in paragraph or subdivision 3 of section 8, Article I of the Constitution, which reads:

> To regulate commerce with foreign nations and among the several States and with the Indian tribes.

I have been taught that the power of the Congress to legislate in respect of this subject matter was found in the section quoted. What it means, whether we have greater power to regulate foreign commerce than we have power to regulate domestic commerce as among the States or with the Indian tribes, may at least be worthy of a passing thought.

Mr. WATERMAN. The Senator would agree that that argument would lead to a question of the constitutionality of the power to legislate and create a tax?

Mr. SHORTRIDGE. No; the section quoted does not deal with the power to tax. This is what I am submitting for consideration: It may be argued that if we have the power thus to regulate, in fact prohibit, commerce in foreign convict-labor goods, we may have an equal power, as all-comprehensive, to regulate and prohibit commerce in convict-labor goods among the States, or as between citizens of a State and the Indian tribes.

Mr. GOFF. Mr. President, I thank my distinguished friend from California for his very favorable and constructive contribution to the argument. I appreciate the equally constructive and helpful suggestions of my distinguished friend from Colorado.

The tenth amendment to the Constitution of the United States—and this should be discussed now in order that there may be no necessity to return to it—reads:

> The powers not delegated to the United States by the Constitution—

Showing that all the powers in the Constitution are delegated powers and nothing else.

> The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

I agree with the suggestion that has been made that the power over foreign commerce is in no sense of the word involved in any reservation to the States. It is a power that is given completely to the Constitution of the United States without any reservation to the people except as the Constitution is enforced by the people. When it is said in the tenth amendment that the powers not delegated to the United States Constitution are reserved to the people of the different States, then if Congress is to be limited or restricted in any way in the exercise of its powers in foreign commerce there should have been a reservation of similar import.

This question, I may say in answer, has never been raised in the tariff act and is not in any of the decisions of the Supreme Court of the United States relating to that matter.

There is in this bill a clear invasion by the Congress of the United States of the police power of the States given to the States in the tenth amendment to the United States Constitution. The Supreme Court recognizes that clearly when it makes use of the language to which I have just called attention.

Commerce—

Says the Supreme Court—

consists of intercourse and traffic * * * and includes the transportation of persons and property, as well as the purchase, sale, and exchange of commodities. The making of goods—

Says the Supreme Court—and that includes manufacturing in any sense—

and the mining of coal are not commerce, nor does the fact that these things are to be afterwards shipped or used in interstate commerce make their production a part thereof.

It is conceded by those who have studied the question that the mining of coal or the mining of any other mineral is not interstate commerce. Coal is not interstate commerce when it comes out of the bowels of the earth and goes upon the cars for shipment in interstate commerce. It becomes interstate commerce only when it starts to move, only when the control of the operator or control of the State has passed into the hands of the common carrier that is moving it in interstate commerce. Here in this act, which is a case involving no evil, the Senate is assuming to make evil that which is thoroughly lacking in harm, and to say that it can not become the subject of interstate commerce. What is there inherently evil in prison-made goods?

Our prisons, as I stated yesterday, are as sanitary as are any of the sweatshops of our great cities. Our prisons are regulated in a way to which free and untrammeled labor does not submit, and to which I would not ask it to submit. Men lose their citizenship when they go to penitentiaries; they should lose their citizenship when they violate the laws of God and man; and so long as they are the wards of society, so long as they are incarcerated in institutions and houses of correction, they must be subservient to the rules and the regulations by which such prisons are governed, but does not interject any inherently harmful defect to the product of their labor.

We are trying to rehabilitate the people who are sent to the penitentiaries of the country; we are trying to eliminate from them the sin of idleness. Busy hands keep the body healthy and the mind tranquil. As I have read the reports from the prison officials of 48 States of this country, they say that in a great majority of instances idleness is the mere gestation period of riot, disorder, and crime; that when men are idle, of course, they are a walking, thinking, living devil's workshop, and they invariably drift into prison, and if idle there degenerate into bestial habits of mind and body. Are we to punish them as was done in the days of old, by sending them to penal colonies far beyond the sea? Not at all. Retributive justice has yielded to moral reformation. It is the humanitarian doctrine, after centuries of struggle, to rehabilitate those who go wrong.

Men and women, Mr. President, violate the moral laws; but are they put forever outside the churches of Christian civilization? They are not. They are brought into those churches, and every spiritual and conducive influence is brought to bear upon them not only to rehabilitate them but to make them anew. Should we say merely because we send a man or a woman to a penitentiary for violating a man-made law that he or she should ever afterwards suffer with the stain of the misdeed and that so long as they are there they can not be taught the principles of good citizenship that involve vocations and avocations, and that they can not be made good members of society; that they can not be allowed to come back with the pardon of an executive and take their place again in human society and go ahead to advance the progress of mankind?

I make reference to these facts to ask where there can be inherent in any prison-made product an evil such as is sought to be injected by this bill. The court says:

That there should be limitations upon the right to employ children in mines and factories in the interest of their own and the public welfare all will admit.

I think we all agree to that. Certainly there should be, just as we say that those who violate the law should be confined in penitentiaries and houses of correction.

It may be desirable that such laws be uniform, but our Federal Government is one of enumerated powers.

A statute must be judged by its natural and reasonable effect. The courts say—and this is important to those who study the constitutional effect of this question—to sustain a statute like the present bill would not be recognition of the lawful exertion of congressional authority over interstate commerce, but would sanction an invasion by the Federal power of the control of a matter purely local in its character, and over which no authority has been delegated to Congress in conferring the power to regulate commerce among the States.

The principle was clearly enunciated in the child-labor case of Bailey *v.* The Drexel Furniture Co. (259 U. S. 20), where the act imposed a tax on the net income of a person employing child labor. Chief Justice Taft in his opinion—

The case before us can not be distinguished from that of Hammer against Dagenhart.

Which was the child-labor case.

Congress there enacted a law to prohibit transportation in interstate commerce of goods made at a factory in which there was employment of children within the same ages and for the same number of hours.

Mr. WAGNER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from West Virginia yield to the Senator from New York?

Mr. GOFF. Certainly.

Mr. WAGNER. The child-labor case is not really analogous to the legislation which we now have under consideration. In that instance there was an absolute prohibition, was there not, of the transportation of any articles produced or manufactured by child labor? There is no prohibition proposed by the pending legislation of the actual transportation of convict-made goods from one State to another, except that when the goods reach another State they are divested of their interstate commerce character and must be disposed of subject to the laws of the particular State to which they have been shipped. In other words, the pending measure is not an invasion of the police power of the State; it rather upholds whatever police powers have been exercised by way of legislation in particular States. It seems to me that is a very clear distinction between these two subjects matter.

Mr. GOFF. Mr. President, I have the greatest respect for the opinion of my distinguished friend from New York. He is a jurist of wide experience and great ability, which came and grew with him as the years went when he made the great record he did upon the bench of the courts of New York State. However, I must disagree with him. It is not necessary that we exercise to the full extent a power given to us. If the doing of anything involves that power, as in the case of the prohibition of the shipment of an article, we have exercised the power so that we are, if I may use a term with which we are all familiar, functus officio; we have performed our office to the uttermost extent; and if we use this power in any respect, if we assume to apply this power, whether or not it invades the police power of the State, whether it does it affirmatively or negatively, whether it does it as an accessory before the act of shipment, or whether it does it as an assistant after the shipment, is, in my judgment, purely immaterial in the light of the decisions of the Supreme Court.

Mr. WATERMAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from West Virginia yield to the Senator from Colorado?

Mr. GOFF. Certainly.

Mr. WATERMAN. If the goods covered by this proposed legislation can be subjected to the police power of any given State then legislation is utterly unnecessary, is it not?

Mr. GOFF. That is correct.

Mr. WATERMAN. Then the purpose of the legislation is not to bring the police power of the State into operation with reference to these goods, but it is to bring the separate and independent sovereign powers of the States, as distinguished from the police powers, into operation in connection with these goods; is not that correct?

Mr. GOFF. Exactly; and that very phase of the question I will say to the Senator from Colorado arose day before yester-

day in the initial stages of this debate in the questions that passed between the senior Senator from Ohio [Mr. FESS] and myself in reference to the application of this law.

Chief Justice Taft said—as I was continuing when interrupted—in the second child-labor case:

> This court held the law in that case—

That is the first child-labor case—

> to be void. It said: "In our view the necessary effect of this act is, by means of a prohibition against the movement in interstate commerce of ordinary commercial commodities, to regulate the hours of labor of children in factories and mines within the States, a purely State authority."
>
> In the case at bar—

Continued Chief Justice Taft:

> Congress, in the name of a tax which on the face of the act is a penalty, seeks to do the same thing—

It sought to do there indirectly what it could not do directly by the first child labor act—

> and the effort must be equally futile.
>
> The analogy of the Dagenhart case is clear. The congressional power over interstate commerce is, within its proper scope, just as complete and unlimited as the congressional power to tax. * * * Yet when Congress threatened to stop interstate commerce in ordinary and necessary commodities, unobjectionable as subjects of transportation, and to deny the same to the people of a State in order to coerce them into compliance with the Congress's regulation of State concerns, the court said, "This was not in fact regulation of interstate commerce, but rather that of State concerns and was invalid."

The last case in which these matters are referred to, as I have shown, is Brooks *v.* United States (267 U. S. 432). There Chief Justice Taft reviews all of the decisions which have been brought to the attention of the Senate, and I commend it to the earnest consideration of every member of this body.

Mr. President, there are just one or two additional matters to which I desire to invite the attention of the Senate.

I call attention to the very well considered case—with which, no doubt, the distinguished Senator from New York [Mr. WAGNER] is very familiar—People against Hawkins. It is reported in Forty-Seventh New York Supplement, page 56, and was decided by the Supreme Court, appellate division. The court there said—I read from the syllabus:

> Laws * * * prohibiting the sale of goods made by convict labor unless labeled as such, as applied to articles of commerce made in a foreign State, conflict with the interstate commerce clause of the Federal Constitution.
>
> Such statute, as applied to a scrub brush made in another State by convict labor, is not within the police power of the State.

The opinion was written and considered, and it has found its way into the citations of other States. It has been commented upon time and again by the decisions of the Supreme Court and by the decisions in other State supreme courts; and that opinion clearly holds that it is not within the police power of the State of New York to attempt or to assume to pass an act that interdicts prison-made goods.

After a very diligent examination of the authorities in the State of New York I can not find that this case was ever at any time overruled. I can not find that it is no longer the law of the great State of New York; but, of course, I know that statutes have been passed that are seemingly in conflict with it, and as to whether or not they have been enforced I can not say.

A very interesting case has been recently decided by the Supreme Court of the United States—Knickerbocker Ice Co. *v.* Stewart (253 U. S. 149). In that case the Supreme Court held that where Congress attempted to allow each State by an act to apply its workmen's compensation law to employees engaged in maritime work within the confines of the State, it was an unwarranted delegation of the power conferred by the interstate-commerce clause of the Federal Constitution. I refer to that case, expressing merely this comment from the opinion:

> Congress can not transfer its legislative power to the States—by nature this is nondelegable.

If the Congress of the United States can not pass a law which will permit the maritime jurisdiction laws of the Federal Government to be utilized by the States because it is a delegation of a governmental constitutional power to a State sovereignty, then I say without the fear of successful contradiction that the Senate can not pass this bill, because in its essence it will be purely and simply a delegation to the different States that see fit to take jurisdiction by prohibition of articles that come within their borders in the course of interstate commerce.

Mr. President, there are several other very pertinent and interesting decisions by the courts of New York that bear very materially upon the question I am now discussing. When the case to which I called attention, People against Hawkins, was originally reported in the court of its deliverance, it went to the court of appeals and was reported in State *v.* Hawkins (157 N. Y.) at page 1. The Court of Appeals of New York passed upon this statute—and that is the court of final resort in the State of New York—requiring that all convict-made goods, including those shipped from other States, be branded before being exposed for sale.

The defendant was convicted under this statute, and his case finally reached the court of appeals. The particular goods which the defendant had exposed for sale had been made by convicts in Ohio and had been shipped from Ohio into the State of New York. The law involved was similar to the laws of other States where such legislation exists. A typical statute is as follows:

> No person or corporation may expose for sale any convict-made goods, merchandise, or wares without a license from the secretary of state. An annual fee of $500 is required and a bond in the sum of $5,000 conditioned on the observance of the law. All goods, wares, etc., made or partly made by convict labor must be marked "convict made" and may not be exposed for sale within a State without such mark on the article, if possible; otherwise on a label attached thereto and to the box or other package.

The New York court held that such a statute was in conflict with and repugnant to the commerce clause of the Federal Constitution, and for that reason obviously and clearly invalid. There can be no question that these State enactments are invalid.

Mr. Justice O'Brien wrote the majority opinion, and went further and held the statute to be unconstitutional upon the ground that it was an unauthorized limitation on the freedom of the individual to buy and sell merchandise which had become part and parcel of the commerce of the State of New York. Mr. Justice O'Brien said:

> It would be difficult to give any satisfactory reason, legal, moral, or economic, why a person who happens to be confined in a prison should not be permitted or compelled to earn his living and pay his way instead of becoming a burden upon the public, to the detriment of his health and morals. The mere fact that he is in prison may be due to misfortune or to his natural surroundings, and in some cases he may be at least morally innocent. The State may certainly, for his own benefit and for the relief of the taxpaying community, employ him at some useful labor, and, whether that labor be in building roads or making shoes, he takes the place of another. If it be lawful and right to employ him, it is difficult to see why the State may, by legislation, depress the value of the products of his labor when such property is purchased in the ordinary course of commerce by a dealer therein.

I have not been able to find that this decision has ever been disturbed either by the courts of New York or by the Supreme Court of the United States. However, a similar law was submitted by the Massachusetts Legislature to the supreme court of that Commonwealth for its advice, but the justices replied Two hundred and eleventh Massachusetts Reports, 605, as follows:

> All goods, wares, and merchandise made by convict labor in a penal institution in this or any other State, before being offered for sale in this Commonwealth, shall be branded, labeled, or marked in such a way as to indicate conspicuously the source of their manufacture.
>
> The bill applies in unmistakable language to interstate commerce. It describes specifically the manufactures made in "any other State." The purpose of the bill is directly to affect interstate commerce. Its aim, in this respect, is emphasized by certain provisions of section 2, which obviously apply to shipments in the original package.
>
> The bounds of the police power have not been defined. The most that the courts have undertaken to do is to lay down certain broad propositions and leave each case to be decided as it arises. In a wide sense, and without undertaking to define its limits, it may be said that the police power authorizes the enactment of statutes to promote the public health, safety, and morals, and the necessary welfare of society.
>
> One who purchases prison-made goods in other States has a right as complete and extensive to sell them upon their merits as he has to sell private-made goods of like nature.
>
> The employment of those convicted of crime in healthful labor is recognized as a necessity of confinement, whether its end be punitive or reformatory. The learning of useful trades has been established by statute as a part of the policy of this Commonwealth in the discipline and improvement of those paying the penalty prescribed for the commission of crime. It is a part of humanitarianism in the treatment of those under sentence. Such goods are not insanitary or so inferior in quality that their sale would constitute a fraud on the public.

Goods made by convicts are lawful subjects of commerce. This is recognized by the bill itself, which allows a free sale when marked. It is a restriction upon the freedom of trade in articles of legitimate business transactions to permit goods made in factories in other States to be sold freely in the market and to require goods alike in every particular in all physical and commercial qualities, after being lawfully purchased in some other State, to be branded as "convict made" before being offered for sale here.

Differences in grade or workmanship, if there are any, would be as apparent without branding as any like products made in private shops.

Then this is the result announced by the Supreme Court of Massachusetts:

We feel constrained to advise that House bill 833, if enacted, would be unconstitutional.

Mr. President, I regret exceedingly to have taken the time I have. I have presented this matter from the standpoint of an honest and sincere conviction that the bill is not within the power of Congress to pass. I have spent many years studying and considering, as have other Members of the Senate, the Constitution of the United States and the laws of this country. I am presenting this matter as a student of our laws and a Senator of the United States. I am presenting it without an intention to harm labor or to interfere with the operation and the maintenance of State and Federal institutions. I have considered it my duty since I have been a Member of this distinguished body to speak out without fear or favor according to the convictions which I entertain. It is in pursuance of that view, and that view only, that I have dared to take the time of this honorable body to present to it the reasons why, in my judgment, this measure is clearly and absolutely unconstitutional and beyond the power and the right of the United States Senate to enact into law.

I cast no reflections upon the distinguished lawyers in the House or the distinguished lawyers in the Senate who entertain a contrary view; but I do say this: I have not yet seen an opinion, I have not yet heard an argument, I have not yet been the beneficiary of an intellectual or a legal suggestion that shows that this measure, which is a measure designed to prevent the shipment in interstate commerce of goods that do not possess any inherent defect or evil, is a valid exercise of our constitutional power.

I agree with all of the decisions of the Supreme Court that wherever the object sought to be achieved is to prevent the mingling with the products of other States of articles of an inherent evil quality, the Congress has jurisdiction, as these cases illustrate, to take the action it has taken, and the action that it might take in this instance if it could be shown that prison-made goods, made solely in an effort to rehabilitate the unfortunate members of society, possess an inherent evil and disqualification.

It has been within my experience, Mr. President, to visit prisons, both Federal and State, and to see the way they are managed, and to know that while the law sentences the inmates to terms with hard labor the officials of our different States are interpreting "hard labor" as merely a phrase that means work is the law of life, and if we are going to progress and rehabilitate the unfortunate members of society we must not only compel them to work but we must teach them how to work, that idleness may be driven from their lives and occupational vocation take its place; so that when these men and women come back again with that vision of clemency which wipes out all sin as far as human power can do it they shall come back worthy to take their places in our democracy, and to go ahead as reformed and repentant individuals.

Mr. President, as I stated yesterday, I now renew the motion then made, and which the clerk has upon his desk, that this entire matter be referred to the Committee on the Judiciary to pass upon the constitutional questions involved and the constitutionality of the act, and that the committee be requested to report not later than Monday, January 7, 1929, upon whether or not this proposed enactment does violence to the Constitution of the United States, as well as the constitutions of the States over which it may have effect.

Mr. WATERMAN. Mr. President, before the Senator takes his seat I would like to ask one question of him in connection with what he referred to a moment ago. Am I to understand that this bill also deprives the Federal Government itself from shipping its own prison-made goods into the different States if such States see fit to prohibit it?

Mr. GOFF. Obviously it would.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	La Follette	Smith
Barkley	Fletcher	McKellar	Smoot
Bingham	Frazier	McLean	Steck
Black	George	McNary	Steiwer
Blaine	Gerry	Moses	Stephens
Blease	Glass	Neely	Swanson
Borah	Glenn	Norris	Thomas, Idaho
Brookhart	Goff	Nye	Thomas, Okla.
Broussard	Gould	Oddie	Trammell
Bruce	Hale	Pine	Tydings
Burton	Harris	Pittman	Tyson
Capper	Harrison	Ransdell	Vandenberg
Caraway	Hawes	Reed, Pa.	Wagner
Copeland	Hayden	Robinson, Ind.	Walsh, Mass.
Couzens	Heflin	Sackett	Walsh, Mont.
Curtis	Johnson	Schall	Warren
Dale	Jones	Sheppard	Waterman
Deneen	Kendrick	Shipstead	Watson
Dill	Keyes	Shortridge	Wheeler
Edge	King	Simmons	

The VICE PRESIDENT. Seventy-nine Senators having answered to their names, there is a quorum present.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House insisted upon its amendments to the bill (S. 3881) to provide for the paving of the Government road known as the Dry Valley Road, commencing where said road leaves the La Fayette Road, in the city of Rossville, Ga., and extending to Chickamauga and Chattanooga National Military Park, constituting an approach road to said park, disagreed to by the Senate; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. JAMES, Mr. WAINWRIGHT, and Mr. MCSWAIN were appointed managers on the part of the House at the conference.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H. R. 5773) to provide for the construction of works for the protection and development of the Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, and it was signed by the Vice President.

APPROPRIATIONS FOR THE INTERIOR DEPARTMENT

Mr. SMOOT. From the Committee on Appropriations I report back favorably with amendments the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes, and I submit a report (No. 1355) thereon. I desire to give notice to the Senate that I shall call the bill up for consideration to-morrow morning, if possible.

The VICE PRESIDENT. The bill will be placed on the calendar.

PROMOTIONS IN AIR CORPS

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 3269) providing for the advancement on the retired list of the Army of Hunter Liggett and Robert L. Bullard, major generals, United States Army, retired, which were to strike out all after the enacting clause and insert:

That the Secretary of War shall cause to be prepared an Air Corps promotion list on which shall be placed the names of all officers of the Air Corps of the Regular Army below the grade of colonel. The names on this list shall be arranged in the same relative order that they now have on the Army promotion list and shall be removed from the Army promotion list, and no officer whose name appears on the original Air Corps promotion list shall be considered as having less commissioned service than any officer whose name is below his on this list. All officers commissioned in the Air Corps after the formation of the original Air Corps promotion list shall be placed thereon in accord with length of commissioned service. Any officer whose position on the Air Corps promotion list is changed by sentence of a general court-martial or by law shall be deemed to have the same commissioned service as the officer next below whom he may be placed by such change.

SEC. 2. Except as herein provided, Air Corps flying officers shall be promoted to the grade of first lieutenant when credited with 3 years' commissioned service; to the grade of captain when credited with 7 years' commissioned service; to the grade of major when credited with 12 years' commissioned service; to the grade of lieutenant colonel when credited with 20 years' commissioned service; to the grade of colonel when credited with 26 years' commissioned service. All flying officers of the Air Corps below the grade of colonel shall be promoted in the order of their standing on the Air Corps promotion list: *Provided*, That the number of Air Corps officers in the grade of colonel shall not be less than 4 per cent nor more than 6 per cent and the number in the grade of lieutenant colonel shall not be less than 5 per cent nor more than 8

per cent of the total number of officers on the Air Corps promotion list, and the aggregate number of Air Corps officers in the grade of colonel, lieutenant colonel, and major shall not be less than 26 per cent nor more than 40 per cent of the total number of officers on the Air Corps promotion list, and in so far as necessary to maintain said minimum percentage, Air Corps flying officers of less than the required years of commissioned service shall be promoted to the grades of colonel, lieutenant colonel, and major, and only in so far as their promotion will not cause said maximum percentages to be exceeded shall officers who have completed the prescribed years of commissioned service be promoted to the grades of colonel, lieutenant colonel, and major. Nonflying officers of the Air Corps shall be promoted as provided for other branches of the Army.

SEC. 3. When an officer of the Air Corps has served 30 years either as an officer or soldier, he shall, if he makes application therefor to the President, be retired from active service and placed on the retired list: *Provided*, That, except in time of war, in computing the length of service for retirement, credit shall be given for one and one-half the time heretofore or hereafter actually detailed to duty involving flying, and credit shall also be given for all other time now counted toward retirement in the Army: *Provided further*, That the number of such voluntary retirements annually shall not exceed 6 per cent of the authorized strength of the Air Corps. When a flying officer of the Air Corps reaches the age of 54 years he shall, if he makes application therefor to the President, be retired from active service and placed on the retired list. Officers of the Air Corps who become physically disqualified for the performance of their duties as flying officers shall be eligible for retirement for physical disability.

SEC. 4. An officer of the Air Corps may, upon his own request, be transferred to another branch of the service, and when so transferred shall take rank and grade therein in accordance with his length of commissioned service as computed under existing laws governing the branch to which transferred.

SEC. 5. That hereafter the Chief of Staff of the Army, while holding office as such, shall have the rank and title of general, and shall receive the pay and allowances of a major general, and in addition thereto, the personal money allowance prescribed by law for the officer of the Navy serving as Chief of Naval Operations. The Chief of Staff of the Army and the Chief of Naval Operations shall take rank between themselves according to dates of appointment as such.

SEC. 6. That the President is hereby authorized to place on the retired list of the Army as a major general, with the retired pay of that grade, the officer who was the first Chief of Finance of the Army, and who was placed on the retired list as a brigadier general while holding that office.

SEC. 7. That on and after the date of the passage of this act, Hunter Liggett and Robert L. Bullard, major generals, United States Army, retired, shall have the rank of lieutenant general on the retired list of the United States Army, and shall receive pay and allowances determined as provided by law for other officers on the retired list.

SEC. 8. All laws or parts of laws in so far as they may be inconsistent herewith or in conflict with the provisions of this act are repealed.

And to amend the title so as to read: "An act to provide for the advancement on the retired list of certain officers of the Army, to increase the efficiency of the Air Corps and of the Army, and for other purposes."

Mr. CURTIS. Mr. President, I ask that that matter may go over until to-morrow.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. KING. I would like to ask the Senator from Kansas if he will not consent that the amendments of the House shall go to the appropriate committee, the Committee on Military Affairs.

Mr. CURTIS. I understand there will be a motion made which will probably lead to some discussion, and I think we have arrangements whereby we can get a vote on the unfinished business pretty soon.

Mr. LA FOLLETTE. It is impossible to hear the Senator from Kansas.

Mr. CURTIS. I ask that the House amendments may go over, because we are trying to reach an agreement to vote on the pending measure, and I think if they go over and we may have a little more opportunity for discussion this afternoon we can reach an agreement.

Mr. REED of Pennsylvania. Mr. President, a parliamentary inquiry. If the matter goes over, as requested by the Senator from Kansas, when would it be laid before the Senate?

The VICE PRESIDENT. It is a privileged matter, and can be laid before the Senate at any time.

Mr. REED of Pennsylvania. Then I give notice that at 2 o'clock to-morrow, or as soon thereafter as I can get recognition, I will ask that the amendments of the House be laid before the Senate.

Mr. BLACK. I move that the consideration of the House amendments relating to promotions in the Air Corps be deferred until the first legislative day after the Christmas holidays. I make that motion for this reason: The Senator from Arkansas [Mr. ROBINSON] is interested in the bill with reference to the Air Corps. He and I have conferred concerning it many times. I am very frank to state that if the bill comes up to-morrow at 2 o'clock, from the information I have received, the debate concerning it will last until Saturday night. It is not fair, in my judgment, that any effort should be made to have the bill disposed of in the absence of the Senator from Arkansas. For that reason I am making the motion.

No one can be delayed; no injury can occur. Conferees could not agree between now and the Christmas holidays, and if the plans go through as devised, in my judgment conferees would never agree. But, irrespective of that, it will lead to prolonged debate if an effort is made to have the House amendments come up in the absence of the Senator from Arkansas, who is interested in the matter. A motion for a conference is going to bring up the question of instructing the conferees.

It may bring up a contest as to who shall be the conferees. It will certainly bring up the question as to whether or not the amendments shall be referred to the Committee on Military Affairs for consideration in order that the conferees may be instructed in line with the majority of that committee. Therefore I make the motion that the consideration of the House amendments be postponed until the first legislative day after the Christmas holidays.

Mr. REED of Pennsylvania. Mr. President, if the Senator from Arkansas [Mr. ROBINSON] desired that this matter should go over, I would, of course, be inclined to comply with his request; but he has made no such request, and I have no reason to think that it is his desire that it should go over. Therefore I make the point of order that the motion of the Senator from Alabama is not now in order.

Mr. BLACK. Why not?

The VICE PRESIDENT. The Chair overrules the point of order. The action of the House has been laid before the Senate.

Mr. REED of Pennsylvania. Then I make a motion that the Senate disagree to the amendments of the House, that it ask for a conference, and that the Chair appoint the conferees on the part of the Senate. In this connection I call attention to the fact that my motion is privileged and would come up before the motion of the Senator from Alabama.

Mr. BLACK. Mr. President, I ask for a ruling on that, because if the Chair holds that to be the rule I desire to submit another motion which is privileged over the motion made by the Senator from Pennsylvania.

The VICE PRESIDENT. The Chair rules that the motion of the Senator from Pensylvania has precedence over the motion of the Senator from Alabama.

Mr. BLACK. Then, Mr. President, I move that the amendments of the House be referred to the Committee on Military Affairs for consideration.

Mr. REED of Pennsylvania. I make the point of order that the motion which I made to refer to a committee of conference takes precedence over the motion of the Senator from Alabama.

The VICE PRESIDENT. The motion to refer to a committee of the Senate would take precedence over a motion to refer to a committee of conference.

Mr. REED of Pennsylvania. But the motion to refer to a committee of conference is a motion to refer to a joint committee and is privileged just as much as a motion to refer to the Committee on Military Affairs.

The VICE PRESIDENT. The Chair is informed that a motion to refer to a standing committee takes precedence over a motion to refer to a committee of conference. The Chair will state the parliamentary situation. It has been a matter of some study and this will perhaps save some debate.

The House amendment, under Rule VII, subdivision 7, is a privileged matter, and its consideration does not displace but simply suspends action on the unfinished business. For the purpose of amendment the House amendment is to be regarded as the original text. It contains several distinct propositions and may be divided as to same.

The following motions, which are debatable, may be made, taking precedence in the order named:

1. To refer same to a committee.
2. To amend same.
3. To disagree and ask conference.
4. To agree to House amendment.

Mr. REED of Pennsylvania. Mr. President, a parliamentary inquiry. Does the Chair hold that the motion of the Senator from Alabama to refer the amendments of the House to the Committee on Military Affairs is now the pending question?

The VICE PRESIDENT. That is correct. It is the pending question.

Mr. REED of Pennsylvania. I have no objection to the adoption of that motion.

The VICE PRESIDENT. The question is upon agreeing to the motion of the Senator from Alabama to refer the amendments of the House to the Committee on Military Affairs.

The motion was agreed to.

PRISON-MADE GOODS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

Mr. BORAH. Mr. President, I know the Senator in charge of the bill is very anxious to have a vote. It has been pending here for a long time and I have no desire to delay the vote, but unless I can be satisfied with reference to some of the legal propositions involved I shall vote against the bill. My purpose principally in rising at this time is to state the reasons. I do not discuss the economic or humanitarian questions involved. There is much to be said on both sides of these questions. But I am interested in the question of power. Believing that Congress has no power to pass such a law, I must vote against it, regardless of what my views on the economic and humanitarian aspects may be. The bill provides:

That all goods, wares, and merchandise manufactured, produced, or mined, wholly or in part, by convicts or prisoners, except paroled convicts or prisoners, or in any penal and/or reformatory institutions, transported into any State or Territory of the United States and remaining therein for use, consumption, sale, or storage, shall upon arrival and delivery in such State or Territory be subject to the operation and effect of the laws of such State or Territory to the same extent and in the same manner as though such goods, wares, and merchandise had been manufactured, produced, or mined in such State or Territory, and shall not be exempt therefrom by reason of being introduced in the original package or otherwise.

My understanding of its legal effect, if it should become a law, would be this: If the State of Idaho were manufacturing goods in its prison and desired to ship them into the State of Oregon, and if the State of Oregon should enact a law prohibiting the transportation and sale of such goods within that State, Idaho would be denied the privilege of the protection of the interstate-commerce clause of the Constitution of the United States. I do not know where the line of demarcation is going to rest if we depart from the rule of the inherent defects of the goods which are being shipped.

The Supreme Court has held that where the goods themselves are of a deleterious nature, unwholesome or injurious to society, Congress may provide for the operation of the police power within the State when those goods arrive within the State. But it is not contended that there is an inherent defect in these goods. It is not contended that they are of an unwholesome nature. It is not contended that a person wearing a shirt manufactured in a prison would be any more affected than if he were wearing a shirt manufactured at Troy, N. Y. It is not contended that products raised upon a prison farm in Oregon would have any different effect upon the human system if they were eaten within the State of Idaho than if they came from a free farm. In other words, there is nothing in the product itself which makes it objectionable. It is because of the place where it was manufactured and those who manufactured it, and not in the defects of the product itself.

I do not know of any rule which hitherto has been established by the Supreme Court other than the rule set forth in what is known as the liquor cases, where the Congress released liquor to the operation of the police powers in the States; but that was because of the peculiar nature of the product itself, because it was deemed that that product was peculiarly dangerous to society unless controlled. It was not because of the place where the liquor was manufactured nor was it because of who manufactured it, but it was because of the nature of the product itself.
